It is 100% mechanically. Cosmetically it looks rough. I have used it as base and as a mobile. I truly loved using it mobile. The slider pots have been replaced. The buttons for NB1 and NB2 were replace with buttons from another radio. On back you will see ACC1 slot had been fitted with a connector for a transverter. This was done by person I bought it from. I have never used a transverter on it though I planned to one day. Does not include microphone

I am asking $300.00

Subject: MT1000 F/S

I have 2 Motorola MT1000's with leather carry cases, 1 speaker microphone, each has battery, and I have a single desk charger.

VHF models currently set up for 2 meters but I believe will cover from 140-170 Mhz.

$75.00 plus shipping for the lot. I could possibly get a spare battery for each radio as well.

I am located in Northwestern Ontario.

6034. Kenwood TS-520SE...South Florida

Yahoo group: ham4sale (2007 — 2015)
Date: 2010-11-27 20:54:13 UTC
From: Tractortom
Topic: 6034 Message: 6034

...I just had it at the Okeechobee (FL) Hamfest today and didn't get a single nibble on it. Everyone who looked agreed it was a great radio and in fine condition, but no one was willing to even make a bid.

The SE has the internal power supply, and is plugged into the wall, requires no additional power supply to operated. When I last used it a few months ago, I had 100 watts on 75 meter band. Audio on this radio is excellent (as is true of most Kenwoods).

I'm asking $350 (or best offer) for the radio, with the factory mic, a set of spare final tubes, and a manual reprint.

I would prefer to sell in the South Florida area, as I don't have the original shipping container and due to the weight of the radio, it would be kind of expensive. I do have an Anvil Case, that I could pad up and ship the radio in. I want $25 for the Anvil Case, plus the whole cost of shipping, if I have to ship it.

Contact me for photos of the rig.

BC-939A Antenna Tuner.

This matches the BC-610 and is often paired with the T-368.

This is the model with dual vacuum variables (there was, apparently,
one released with only one vac variable).

This is a solid tuner like no other! Excellent condition.
(I will send pictures to interested Hams.)

More info here:

http://forums.qrz.com/showthread.php?t=264910&bq=1

I bought this recently then discovered that it won't work with my
station setup and need the funds for another project.
It is an amazing piece of engineering.

Asking $350. but will consider reasonable offers, plus the actual cost
to ship.

(I understand that one recently sold at Nearfest in NH for $375.)

Or, save on shipping and pick it up here in the Statesboro/Savannah, GA
area.

HF Antenna related items For Sale -- Automatic and manual antenna tuners, Legal Limit Baluns, Coaxial Antenna Switch, SWR Bridges, Rotor Control Box, Dummy Load, Low Pass TVI Filters, Speaker, Tower, Connectors and more

LDG Automatic Antenna Tuners:

I have two LDG automatic tuners available. Both will work from 160 thru 6 meters. They will automatically tune with relays, and then hold that tuning. They have memories, so that tuning takes just a fraction of a second after it is done the first time. Both will handle 100 watts on HF. Tuning range is about 6 ohms to 800 ohms, so it is a really broad range.

Z-100 tuner
This tuner can be used with any rig. It can be powered by 9 volt batteries, or a 12 V DC supply. Good for QRP. This one works fine, and looks very close to new. With paper work for $115.

IT-100 tuner
This tuner is made specifically for the Icom rigs with AH-4 interface, which includes the IC-706 series, IC-7000, IC-756, and others. It gets its power from the rig.
This one works fine, and looks close to new. With paper work and cables for $135.

MFJ 900 HF Antenna Tuner:

The MFJ 900 covers 160 thru 10 meters, and is rated at 200 watts. I would not put more than 100 watt thru it, however.

It is in a nice Woodgrain / Eggshell color enclosure that is a perfect match for some of the earlier TenTec gear, such as the Triton I and II, Argonaut 505 and 509, and others. But of course it can be used with any HF rig.

This one works fine, and looks fine also. $45

Heavy Duty Legal Limit Plus Balun:

HyGain BN-4000 D Balun

A balun is used to convert an unbalanced load such as coax to a balanced load such as a beam or dipole. It will also help reduce radiation from the coax feedline, that could reduce TVI and other interference.

The BN-4000 D is a 1 to 1 ratio broadband 50 Ohm current balun, and is potted to seal out moisture. It is rated at 4000 Watts for increased power handling capabilities. Frequency range is 1 MHz to 54 MHz. It has stainless steel hardware and comes with a SO-239 connector.

This particular unit works fine and looks really great. It would appear that it has not been used. All connections are clean and shiny; the case also shines. It is the latest "D" model of the BN-4000.

Paper work is included for $80.

Coaxial Antenna Switch:

B & W Model 550 A coax switch

This model will switch up to 5 antennas, and does NOT ground unused antennas. It has the coax coming out the sides like spokes of a wheel.

This one works fine and looks good as well.

$35

SWR Bridge / Field Strength Meter:

Royce 2-100 Single Meter SWR Bridge / Field Strength Meter

With SO-239 connectors, it covers from 3 to 150 MHz, covering HF, 6 meters, and 2 meters, so is ideal for the new rigs with 6 meters and 2 meters in them.

This one works fine, and looks extremely nice. I do not see any scratches on it, but it does have a previous owners name on it. In its original box with original instructions. $32

Dual Meter SWR Bridges:

Both of these feature two separate meters -- one for reading forward power and another for reading SWR. This permits one to easily monitor both the power going out, and the SWR on the antenna. They were made in Japan, and labeled with various names, including Swan, Siltronix, and Quement. Both have SO-239 connectors on each end, and work fine.

Both will work on HF, and VHF, covering 3 to 150 MHz, so are ideal for the new rigs that include 6 and 2 meters.

Quement SWB-2
No box for this one, but it works fine and looks great.
With paper work for $40.

Siltronix SWR-2
This meter functions fine, but the meter lens of the meter that

reads SWR has a crack on the very right edge of it. Strictly cosmetic. $25

8 wire antenna rotor control box:

Newer 8 wire antenna rotor control box
This control box will work with most of the antenna rotors that require the 8 wire control, which includes most CDE, Ham-M, Ham III, Ham IV, etc.
This is the newer black colored control box, with the HyGain name, designed for the Ham IV. It works fine, and looks very good. Paper work is included for $95.

Please note that this is the control box only, and does not include the actual rotor.

Heath HN-31 "Cantenna" RF Dummy Load

This is the traditional Heath dummy load that will handle a kilowatt. It has a derating curve both printed in the manual and on the can.

I measured the resistor and it is 47 ohms, so obviously it is in good shape and a great match for 50 ohms. The cantenna itself is in really great shape, with no rust, dents or dings.

Paper work is included for $45.

ParaDynamics PDC-5 Wattmeter / Antenna Tuner:

This unit has a wattmeter with scales of 100 W, 10 W, and 1 W with an antenna tuner built in.
The tuner portion works on 10 m, 12 m, and 15 m.
The wattmeter seems accurate from 20 meters thru 10 meters.

It is physically small (only 5 X 3 X 1), so would be ideal for portable use. Of course with a 1 watt scale it would also be great for QRP use.

The wattmeter and antenna tuner portion work fine, however, the SWR portion of this unit is inoperative. It looks great. $12

Low Pass TVI Filters:

A low pass TVI filter is added to the transmitter to reduce harmonic interference. All have SO-239 connectors and include paper work.

Drake TV-1000
This is the copper cased filter that may also be used on the low end of six meters, as well as HF. It is good for 1000 W below 30 MHz, and about 200 W up to 52 MHz. $30.

Drake TV-3300
This is a modern low pass filter has been optimized to have more attenuation in the 40 MHz region, where many TVs have their IF. It is good for 1000 Watts "average" according to the manual, and has over 80 db attenuation at 41 MHz.
This one looks great. $30

B & W FL-10/1500
This filter cuts off just above 10 meters, and handles 1500 Watts. It is the latest model B&W filter.
It looks very close to new. $40.

B & W 425
It cuts off just above 10 meters, and will handle 1500+ Watts.
This is an older, heavier duty model. $35

Yaesu SP-901 P Speaker For Sale:

Although the SP-901 was made to match the FT-901 and FT-902 series, it is a very good match for most ham quipment, and provides a very desirable front facing speaker.

The "P" model of the SP-901 also includes a phone patch, if you would like to use that. Of course you can just use it as a plain speaker without connecting the phone patch portion, if you want.

This particular unit works fine and looks extremely nice. I can not find any scratches on it. It looks perfect.

With paper work for $90.

Gap "Titan DX" HF Vertical Antenna:

The Titan is an 8 Band Multiband DX Antenna. It covers 80 thru 10 meters, including the WARC bands. It covers the entire band on 40 thru 10, and about 100 KHz on 75/80 meters. It is about 25 feet tall, and includes a counterpoise, so that no radials are required.

One of the primary virtues of the Titan is the GAP center feed. By elevating the feed the earth loss is dramatically decreased, which means the RF is going out to make the contact instead of into the ground to warm the earth. Reducing the earth loss eliminates the need for a radial system. The Titan requires NO RADIALS.

This particular antenna is in extremely nice shape with no corrosion. Most of the aluminum is still shiny.

These sell new for about $400. This one is close to new, with paper work for $250. Pick up only near Ocala FL.

Antenna tower for sale in Florida:

A total of 35 feet of antenna tower is available, consisting
of one top section, 2 "middle" sections, and a 5 foot section
for the base.

This tower is "American" tower, which has a horizontal brace
about every 22 inches. It is suitable for VHF antennas, very
large TV antennas, or small tribanders.

This particular tower is in good condition, although there
is some slight surface rust.

It is pickup only near Ocala, FL, just off of I-75. $125

Coax connectors and adapters For Sale:

6056. FS: BC-939A $305.

Yahoo group: ham4sale (2007 — 2015)
Date: 2010-12-08 15:34:51 UTC
From: doc@kd4e.com
Topic: 6056 Message: 6056

BC-939A tuner matches the BC-610
and is often paired with the T-368.
This is the model with dual vacuum caps.
Excellent condition (I have lots of pictures).
More info here:
http://eshop1.chem.buffalo.edu/BC-939.html
http://www.youtube.com/watch?v=ae1KQUYOctM
http://www.w1ujr.net/t368.htm
Manual:
www.militaryradio.com/manuals/GRC-26D/tm11-5820-256-20.pdf
More:
http://www.docstoc.com/docs/34253922/OPERATOR-AND-ORGANIZATIONAL-MAINTENANCE-REPAIR-PARTS
http://forums.qrz.com/showthread.php?t=264910&bq=1
It's too big for my station setup.
Asking $305. (plus the actual cost to ship).
Or, save on shipping and pick it up here in the
Statesboro/Savannah, GA area.
If no interest I will try ebay or reluctantly part-it-out.

6060. FS: Ranger 5054 6 meter all mode radio

Yahoo group: ham4sale (2007 — 2015)
Date: 2010-12-09 03:19:20 UTC
From: John Geiger
Topic: 6060 Message: 6060

I have for sale a Ranger 5054DX 6 meter all mode radio. It does 25 watts on SSB and 10 watts on CW/AM/FM. Works fine and is in pretty good physical condition as well. It comes with the mic, 2 power cords (1 for a PS, one to plug into the cigarette lighter) and a copy of the manual.
Here is your chance to get on the magic band!

I am asking $175 shipped for it and can take paypal/check/MO.

6061. FS: Yaesu FT450 HF/6m radio

Yahoo group: ham4sale (2007 — 2015)
Date: 2010-12-09 03:20:10 UTC
From: John Geiger
Topic: 6061 Message: 6061

I have a almost new Yaesu FT450 HF/6m radio for sale. I bought this about 3 weeks ago from Texas Towers, and really like it but found a good deal on a radio that also does 2m. The FT450 has it all-IF DSP so no extra filters are needed, a built in voice keyer, a built in CW memory keyer, a TCXO for increased stability, and a built in voice synthesizer to announce what frequency and mode you are on at the push of a button. It does 100 watts on HF and 6m, all modes.

It comes with all the things that come with a brand new radio-power cord, mic, manual, all documentation, and original box.

I am asking $550 for it plus any shipping that is necessary.

Kevin
W7BOZ

6065. FS: Icom 706 HF/6m/2m radio

Yahoo group: ham4sale (2007 — 2015)
Date: 2010-12-10 03:28:21 UTC
From: John Geiger
Topic: 6065 Message: 6065

I have for sale an Icom 706 HF/6m/2m transceiver which does 100 watts on HF and 6m, and 10 watts on 2m. No DSP installed as it wasn't an option with the first edition of the 706. It has the built in CW keyer, SWR meter, and several other nice features. It comes with the hand mic, power cord, and copy of the manual.

The rig works fine, the physical condition is ok. There are some scratches and blemishes on the top cover. The sides look pretty good and the face is in very good condition.

This radio will get you on HF but also on 6m and 2m SSB, so it is close to a shack in a box. I am asking $400 shipped for it.

73s John AA5JG

6066. FS: yaesu FT897D HF/VHF/UHF radio

Yahoo group: ham4sale (2007 — 2015)
Date: 2010-12-10 20:44:23 UTC
From: John Geiger
Topic: 6066 Message: 6066

I have for sale a Yaesu FT897D HF/6m/2m/70cm radio in very good condition. This model does 100 watts on HF and 6m, 50 watts on 2m, and 20 watts on 70cm. It has the TCXO installed from the factory and the factory programmed 60 meter channels. It is a 5N serial number meaning it is a 2005 model. It comes with the power cord and a MH67 hand mic (doesn't have up/down buttons on it). This is the slightly larger version of the FT857D that allows for an internal PS or batteries to be used to power the radio. Also has a larger tuning knob and buttons.

I am asking $650 plus shipping for it. These sell new for $900 or so.

6068. Desk Mics, Hand Mics, and other Mics FS

Yahoo group: ham4sale (2007 — 2015)
Date: 2010-12-11 21:56:00 UTC
From: Ken Simpson, W8EK
Topic: 6068 Message: 6068

A variety of Desk Microphones, Hand Microphones, DTMF
Touch Tone Microphones, and HT speaker microphones for sale:

Desk Microphones:

Astatic D-104 Desk Microphone

Most people know that the Astatic D-104 is the "Lollypop"
desk mic. This mic has very nice chrome plating on the mic
itself, and on the PTT grip section. The base is black.

Of course it works fine, and looks extremely nice.

With paper work for $75.

TenTec 709A Desk Microphone
Model 709A is an omni-directional dynamic microphone.
The unit consists of a die-cast zinc shell with molded sliding
PTT on/off switch, dynamic microphone element and detachable
multi-wire connection cable.
It has an 8 pin connector as used on the Orion, Eagle and newer
TenTec rigs.
This particular mic works 100% and is still in its original box. $60

Turner "Plus Three" Desk Microphone
This is an amplified desk mic, so it can be used with most any
rig. Gain can be adjusted from basically no gain to quite a bit.
The reviews on eham, several people say it is the best microphone
they ever used. It requires a 9 volt battery. It presently has
a round 8 pin connector wired for Kenwood, but of course that
can be changed.
This one works fine and looks nice. $40

Hand Microphones:

Kenwood MC-35 S hand microphone
This Hi Z hand microphone is used with most all of the
older Kenwood rigs - TS-120, TS-180, TS-520, TS-820,
etc. This can be a noise canceling mic. It has a switch
to switch the noise cancelling in or out. It has a four
pin plug on it to match these rigs. Of course it can be
used on any rig requiring a Hi Z mic.
This one is in very nice shape, and includes paper work.
$40

Astatic D-104-M6 Hand Microphone
Most of use know what the D-104 "Lollypop" desk mic is like.

This is the hand mic equivalent.
The D104-M6 microphone is a quality performance field effect amplified “power” microphone. The housing is molded black ABS; the front half is chrome plated and the grille screen is chrome plated. The output impedance is compatible with the inputs of almost all commercial transceivers; it has an externally adjustable high gain amplifier to ensure the desired modulation level.
The D104-M6 has an easily accessible control so that the correct modulation level can be set for each operators voice.
This one works fine and looks extremely nice.
With paper work for $40.

Generic Low Impedance Hand Microphone
This is a low impedance hand microphone, black in color.
Looks and works great. With 4 pin connector. $25

DTMF Touch Tone Microphones:

Icom HM-8 hand mic with Touch Tone (DTMF) Pad:
The HM-8 has a 12 digit touch tone (DTMF) pad on the front of it, along with an on-off switch for the tones. Of course it also has the normal PTT switch.
The HM-8 is used on the 25A Red LED, 245, 290, 402, 202S, 451, 471A, plus other rigs.
This particular microphone has an 8 pin round connector, works fine, and includes paper work for $40.

CES 610 L DTMF Touch Tone Mic
Can manually dial a number, or automatically store it in the mic, and "speed dial". 12 digit touch tone pad on the front, with the microphone part above the pad. With an 8 pin modular plug (like a computer LAN) on it, which can be changed.
Looks to be new. $40

KDK DM TT-1 DTMF Touch Tone Mic
This mic has a 12 digit touch tone pad on it, with a switch to turn the pad on and off. With 4 pin plug.
It works fine, and looks great. $35

KDK Model TM-2 DTMF Mic
With touch tone pad and up-down switches. It presently has stripped and tinned ends. Nice condition. $40

Johnson 250-0761-010 / CES 655 L DTMF Mic
It has a 12 digit pad on the front, and is a rugged mic.
Presently with 4 pin plug. Looks to be unused. $40

Data Signal "Data-Coder 5" Touch Tone Mic
This mic has a 12 digit touch tone pad on it, plus a normal low impedance microphone. With 4 pin plug. Like new. $38

HT Speaker Microphones:

Icom HM-70 Speaker Microphone
The Icom HM-70 speaker mic (also known as the EX-1036)
works on the Icom 2SRA, 4SRA, Delta 1, IC-W2/X2 or any
Icom HT which uses the single 3 conductor stereo-style
1/8 inch (3.5 mm) plug.
This one is in the original box, and appears to be unused.
$25

Azden SDX-316
Although it has an Azden name plate, it will also work
with Icom, some Yaesu, and Alinco that needs 3.5 mm and
2.5 mm plugs.
This is the rounder style speaker mic that fits nicely in
the palm of your hand. $20

MFJ-287 Speaker Microphone
This was used on a Kenwood TH-225 HT, but it also fits the
TH-21/31/41 series HTs, TH-205, TH-215, TH-415, as well as
others. It has a 3 conductor 3.5 mm plug and a 2 conductor
2.5 mm plug. The coiled cord has been stretched a bit, but
it works fine. $12

Kenwood SMC-24 speaker microphone
Fits Kenwood TR-2400 HT and others. This one looks fine
and works fine. $18

Prices do not include shipping from Florida.

Thanks.

6084. Transcivers, Power Supplies, Wattmeters, and more FS

Yahoo group: ham4sale (2007 — 2015)
Date: 2010-12-17 18:07:26 UTC
From: Ken Simpson, W8EK
Topic: 6084 Message: 6084

Multiband Multimode Transceviers, Power Supplies, Wattmeters,
and SWR Bridges For Sale:

Icom IC-746 Pro, 160 thru 2 meter Multi mode transceiver:

The Icom IC-746 Pro covers 160-10 meters plus 6 and 2 meters
all mode. 100 Watts of output is available on all bands - HF,
50 MHz and 144 MHz, making the IC-746 Pro a practical choice
for all-around base station use. The die-cast aluminum chassis
and a large cooling fan help to stabilize the PA circuit,
providing 100% full duty cycle operation. The new Pro version
features 32 bit floating point DSP and 24-bit AD/DA converter.
There are NO more expensive optional filters to buy. The
digital IF filter allows one to select 51 filter bandwidths.
There are three user selectable filter memories per mode.
Soft and sharp filter shapes can be selected in both SSB and
CW modes independently. You can also change the settings on
the fly and compare! For repeater operation theres is a
built-in tone encoder and decoder with 50 CTCSS and 108
DTCS based tones. There is even a built-in Baudot RTTY
demodulator.

It has 100 alphanumeric memories, digital RF speech
compression, spectrum display, Manual and Automatic Notch,
digital Twin PBT, Noise Blanker, CTCSS encode/decode, APF,
two stage preamp, automatic antenna tuner and electronic
keyer. A built-in automatic antenna tuner operates on the
HF bands plus 6 meters. The 746 Pro requires 12 VDC at 23
amps. It is 11.3 x 4.8 x 12.5 inches in size and weighs
20 Lbs. See the May 2002 issue of QST for a review of
this radio.

Features
* Spectrum Scope
* 102 Memories
* RIT/XIT
* Digital Noise Reduction
* Manual and Automatic Notch
* Digital Twin PBT
* Dual Display
* 100 Watt Output
* 40 Watt Output (AM)
* Digital RF Speech Compressor
* Microphone Equalizer
* Monitor Transmit Audio
* SWR Plotting

* Built-in Automatic Antenna Tuner 180-6 Meters
* Full Break-In CW
* SSB/CW Synchronous Tuning
* 100% Duty Cycle
* Rx Antenna Jack
* 32 bit DSP
* 1 Hz Readout
* 4 Channel Memory Keyer
* RF Attenuator 6/12/18 dB
* RTTY Demodulator
* CW Pitch and CW Reverse
* Adjustable Transmit Bandwith
* Triple Band Stack Registers

This one works 100% as best I can tell, and looks close to
the same. I can not find a scratch on it. With paper work
for $1050.

Icom IC-706 Mk II G 160 thru 440 MHz transceiver:

The '706' Series represents one of the most popular transceivers
in amateur radio histroy. The latest version is the incredibly
small Icom IC-706 Mark II G which adds many new features and
capabilities not found in previous versions. The "G" is an
all-mode transceiver that provides 100 watts on HF and 6 meters
and 50 watts on 2 meters plus 20 watts on 440 MHz. It receives
from 30 kHz to 199 MHz and from 400 to 470 MHz. It features a
removable, remoteable, front panel that allows control of all
features. The large LCD display features alphanumeric memory
names (9 character) and soft key descriptions. The LCD even
supports a simple band scope display. Other advanced features
include: IF Shift, RIT, Tone Squelch, Scanning, Noise Blanker,
Speech Compressor, Mini Spectrum Scope and Electronic Keyer.
This latest version in the 706 series includes the UT-106 DSP
module as a standard feature. Despite its compact size (6.56"
x 2.28" x 7.88"), it has big, easy to use control dials. With
HM-103 hand mic. One or two optional filters may be added.

Features
* .03-199, 400-470 MHz Receive
* Alpha memories
* RIT
* Preamp/ATT
* VFO A/B
* 1 Hz Display
* IF Shift
* Scanning
* S/RF Meter
* 100 Watts HF+6M
* 50 Watts 2M, 20 Watts 440
* 100 Memories

* All band Multimode
* Removable head
* Mini Spectrum Scope
* Electronic Keyer

This one works 100% as best I can determine. It looks extremely nice. Microphone and paper work are included for $650.

TenTec 585 Paragon HF Transceiver:

The Paragon is a top of the line transceiver that includes a general coverage receiver. It covers 160-10 meters, including WARC bands, with 100 watts output. The receiver is fantastic. It has dual VFOs and many memories built in, along with a speech processor. Basically, it has about every feature that a ham could want in an HF rig.

This particular unit works 100% as best I can tell. Since the rig does so many things, I am sure that there is something I didn't test, but I don't know what it is (or I would have tested it!). It has had all updates completed by TenTec.

Cosmetically, it is in extremely nice shape. The front panel is extremely good. Most all of the lettering is clean and crisp. This one is in exceptional condition. It also has the Giehl chip in it making it similar to a Paragon II.

Large manual and power cord included for $650.

TenTec Power Supplies:

TenTec Model 280 power supply, 20 amps at 13 V DC
This supply is quite heavy duty electrically. It has 2 pass transistors, instead of the one that some have. It also has an ammeter on it.
This one works fine, and looks OK as well.
With paper work for $100.

"Switcher / 25" 25 amp switching power supply:
This is a 25 amp switching power supply in a case that matches the early Omni series case, with the metal bezel around it. It is in a case that is the same size as a 243 remote VFO. It has an ammeter on the front, along with Switch, TenTec logo, and output bulb. The front panel basically looks like a 280 power supply with a metal bezel, but says "Switcher/25" on it. It is very quiet, and well shielded, and does not produce any electrical noise that I could find. $150

Icom PS-125 Switching 25 amp power supply
The ICOM PS-125 switching power supply provides 13.8 VDC, at 25 amps. The output cord has the Molex plug prewired for many Icom radios such as the IC-746Pro (above), or any of

the rigs (including Kenwood and Yaesu) that require the heavy duty 6 pin molex connector. It is 4.4 x 3.7 x 11.3 inches in size and weighs under 7 pounds. With paper work for $135

Astron RS-12 A, 13.8 Volt DC Power Supply:

This power supply is rated at 9 amps continuous and 12 amps ICS. It is ideal for most 2 meter rigs, including the 50 Watt rigs.

This Astron power supply features solid-state electronic regulation, EMI filter, fold back current limiting for protection from excessive current and shorted output, and crowbar over-voltage protection.

This particular supply works 100% and looks the same. I can not find a scratch on it. With paper work for $50.

Heath VHF Wattmeter:

Heath HM-2102 VHF wattmeter, covering 50 to 160 MHz.

Similar to the HM-102, but for VHF frequencies, with 250 and 25 watt scales. It can also be used to check SWR, and has a remote sensor that can either be left inside the meter, or separated from the actual meter. SO-239 connectors in and out.

This particular meter works great. It looks very close to perfect with no defects that I can find.

Paper work included for $50.

M C Jones VHF/UHF Wattmeter:

This MC Jones Wattmeter is a vintage unit, probably from just after WW II. At that time, it was the gold standard of wattmeters, basically equivalent to a Bird today.

This particular meter has N connectors in and out. It reads 12 Watts full scale in the forward position, and 4 Watts full scale in reflected. It also has an SWR calibrate and SWR scale on the meter. I think the frequency range is from 20 to 1000 MHz, but I am not 100% positive of that. It works well on 2 meters and 440 MHz. The RF sensor unit inside is model 576.3.

This one functions fine, and looks extremely nice for its age. $60

Dual Meter SWR Bridges:

All of these feature two separate meters -- one for reading forward power and another for reading SWR. This permits one to easily monitor both the power going out, and the SWR on

the antenna. They were made in Japan, and labeled with various names, including Swan, Siltronix, and Quement. All have SO-239 connectors on each end, and work fine.

All will work on HF, and VHF, covering 3 to 150 MHz, so are ideal for the new rigs that include 6 and 2 meters.

Quement SWB-2
No box for this one, but it works fine and looks great.
With paper work for $40.

Siltronix SWR-2
This meter functions fine, but the meter lens of the meter that reads SWR has a crack in it. Strictly cosmetic. $25

Single meter SWR Bridge:

Royce 2-100 Single Meter SWR Bridge / Field Strength Meter
With SO-239 connectors, it covers from 3 to 150 MHz, covering HF, 6 meters, and 2 meters, so is ideal for the new rigs with 6 meters and 2 meters in them.
This one works fine, and looks extremely nice. I do not see any scratches on it, but it does have a previous owners name on it. In its original box with original instructions. $32

I also have many other accessories available such as many different types of microphones, wattmeters, keyers, etc.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

73,

Ken, W8EK

6086. FS: Complete ICOM IC-703+ Station

Yahoo group: ham4sale (2007 — 2015)
Date: 2010-12-18 21:40:06 UTC
From: J.Gordon Beattie, Jr., W2TTT
Topic: 5396 Message: 6086

Hi Folks!

I have for sale my complete IC-703+ portable kit.

IC-703+ (10W output at 12V, 5W output at 9.6V)
Separation Kit
12V 7AH SLA Battery
External speaker
Mobile bracket
Microphone
Power cables all fitted with Anderson PowerPoles
40m Dipole

Currently set up for simplified access to both front and rear controls and connectors by using the separation kit cable and mounting the front panel to the mobile bracket along with an external speaker.

$650 & Shipping

Check or PayPal accepted.

6088. Dual Band HT, HT Accessories, and VHF related items FS

Yahoo group: ham4sale (2007 — 2015)
Date: 2010-12-19 23:38:31 UTC
From: Ken Simpson, W8EK
Topic: 6088 Message: 6088

Dual Band HT, HT Accessories, and VHF/UHF related equipment
for sale,
such as Wattmeters / SWR Bridges, Duplexers, Protective Cases,
Speaker Microphones, Belt Clips, Wrist Straps, Rubber Ducks,
and more:

Yaesu VX-3 dual band HT:

The compact VX-3R 2m/70cm FM HT Transceiver is loaded with
convenience features. In additon to top quality performance
on 2m and 70cm, you will also be able to enjoy stereo FM and
AM broadcast band reception.

The Yaesu VX-3R 2 meter/440 MHz handheld has extensive receive
frequency coverage, providing local-area two-way amateur
communications along with unmatched monitoring capability.
The VX-3R receives: 500 - 1800 kHz (AM Band), 1.8 - 30 MHz
(Shortwave), 30 - 76 MHz (VHF Lowband with 6M), 76 - 108 MHz
(FM band), 108 - 137 MHz (Air Band), 137 - 174 MHz (VHF High
band with 2M), 174 - 222 MHz, 222 - 420 MHz (VHF band with 220),
420 - 470 MHz (440), 470 - 800 MHz and 800 - 999 MHz (800 band
[cellular blocked]). You get a huge 1000 channel memory system.

Power output with the supplied Lithium Ion battery is 1.5 watts
VHF and 1 watt UHF. With the optional E-DC-21 DC adapter output
jumps to 3 watts and 2 watts!

This particular HT is like new. It works 100%, and looks like
new, with no scratches. It has its original box, rubber duck
antenna, LiIon Battery, charger, and paper work all for only $155.

Yaesu HT Accessories:

Real Yaesu Battery pack for Yaesu VX-2 or VX-3 HT
FNB-82 LI Lithium Ion Battery Pack fits both the VX-2 and the
VX-3. 3.7 volts, 1000 mahr, works great, and holds a charge
like new. $22

Belt Clip for Yaesu FT-207, with hardware. $8

Wrist Strap for Yaesu FT-209, and probably others $4

Yaesu Hat
This "Ball Cap" has Yaesu on the front of it in big letters.
It is white and says "Yaesu" on the front, with the Yaesu
logo. It has never been used. $6

Duplexers / Diplexers:

These units are designed to split transmit and receive signals between 2 meters and 440 MHz bands. Some rigs have only one output connector; you may want to use separate antennas for 2 meters and for 440 MHz. Or, you might have a combination 2m/440 MHz antenna, and your rig has two outputs. These units can be used either to combine or separate the two bands. Both work fine and look great also.

Maldol HS-770
2 m and 440 Mhz ports have a foot long coax with PL-259 connectors. Common is a case mounted SO-239 connector. $50

Diamond MX-72 D
It has a 1.6-150mhz input on one port (so it can be used to split 6 meter or HF as well as 2 meters) and a 400-460mhz port. The HF port will handle 1kw and the UHF port 400 watts. Isolation is 60db between ports. It has an SO-239 on one end and two PL-259's on the other. $40

Heath VHF Wattmeter:

Heath HM-2102 VHF wattmeter, covering 50 to 160 MHz.

Similar to the HM-102, but for VHF frequencies, with 250 and 25 watt scales. It can also be used to check SWR, and has a remote sensor that can either be left inside the meter, or separated from the actual meter. SO-239 connectors in and out.

This particular meter works great. It looks very close to perfect with no defects that I can find.

Paper work included for $50.

M C Jones VHF/UHF Wattmeter:

This MC Jones Wattmeter is a vintage unit, probably from just after WW II. At that time, it was the gold standard of wattmeters, basically equivalent to a Bird today.

This particular meter has N connectors in and out. It reads 12 Watts full scale in the forward position, and 4 Watts full scale in reflected. It also has an SWR calibrate and SWR scale on the meter. I think the frequency range is from 20 to 1000 MHz, but I am not 100% positive of that. It works well on 2 meters and 440 MHz. The RF sensor unit inside is model 576.3.

This one functions fine, and looks extremely nice for its age. $60

Dual Meter SWR Bridges:

Both of these feature two separate meters -- one for reading forward power and another for reading SWR. This permits one to easily monitor both the power going out, and the SWR on

the antenna. They were made in Japan, and labeled with various names, including Swan, Siltronix, and Quement. Both have SO-239 connectors on each end, and work fine.

Both will work on HF, and VHF, covering 3 to 150 MHz, so are ideal for the new rigs that include 6 and 2 meters.

Quement SWB-2
No box for this one, but it works fine and looks great.
With paper work for $40.

Siltronix SWR-2
This meter functions fine, but the meter lens of the meter that reads SWR has a crack on the very right edge of it. Strictly cosmetic. $25

SWR Bridge / Field Strength Meter:

Royce 2-100 Single Meter SWR Bridge / Field Strength Meter

With SO-239 connectors, it covers from 3 to 150 MHz, covering HF, 6 meters, and 2 meters, so is ideal for the new rigs with 6 meters and 2 meters in them.

This one works fine, and looks extremely nice. I do not see any scratches on it, but it does have a previous owners name on it. In its original box with original instructions. $32

"Rigblaster Plus / USB" Digital Interface:

Rigblaster Plus / USB by West Mountain Radio
A RIGblaster is the easiest way to connect your radio to a computer so that you may operate using over 100 existing and future ham radio sound card software programs.
You will be able to operate over 20 exciting modes that your radio could not operate otherwise.

Presently available ham radio sound card software, a RIGblaster, a radio and a computer is the easy and modern way to operate with every existing or future Amateur Radio sound card program.

This particular unit is complete, in its original box, with all of the items listed on the enclosed paper work. Software CD is included, along with many cables. It looks like this unit may not have ever been used. Most bags appear that they have not been opened.

West Mountain sells these for about $160. Buy this one for only $120.

Accessories for Kenwood TH-205, TH-215, TH-225, TH-415, and other HTs in that series:

Kenwood PG-3 E Filtered Cigarette Lighter Cable
This cable is used to power the Kenwood TH-215 series, TH-225 series, TH-25, TH-75, and other Kenwood HTs. It plugs into a cigarette lighter, and filters the noise.
This one is NOS (New, Old Stock), still in its original blister pack. $15

Kenwood SC-13 Vinyl Case
For TH-215, TH-225 and others, with room for the larger PB-1 and PB-4 battery packs. It can also be used with the smaller PB-2 and PB-3 packs. Black color. Great condition. $15

Kenwood BH-2 Belt clip with screws
Used on many Kenwood HTs. $8

Kenwood Wrist Strap for TH-215, plus many other HTs. $4

Original Kenwood Rubber Duck antenna from TH-215. $10

Kenwood BC-2 Charger for PB-2 batteries. $12

Accessories for the Azden PCS-300 HTs:

Azden SDX-316
This is the rounder style speaker mic that fits nicely in the palm of your hand. Has 3.5 mm and 2.5 mm plugs for Azden, Icom, some Yaesu, and others. It works great, and looks great also. $20

Battery charge adapter for Azden PCS-300 HT
This is an adapter that permits one to charge the battery of the Azden PCS-300, 2 meter HT, outside of the HT itself. Usually, one must have the battery inside the HT, but this lets you charge a second battery outside of the HT. The original charger is used. If you have a PCS-300 HT, you need this adapter.
It works fine, and looks like new. $3

Antenna adapter to fit the BNC connector on the HT and provide an SO-239 connector that will permit a PL-259 to be attached. This adapter can be used on any HT with a BNC connector. $5

Santec HT Accessories:

Leather Case for Santec HT
This is a real Bianchi Leather case -- not a vinyl case. It fits most of the Santec HTs, such as the HT-1200, ST-142, ST-144, ST-440, etc. The real leather case includes a built in belt clip, plus a removable leather shoulder strap.
The case itself is in very nice shape. The leather shoulder strap has not been used. $25

Santec ST-142/144 "Service Pack"
This is similar to a service manual, but Santec calls it a
service pack. It has schematics, circuit explanations,
voltages, etc. $18

Antenna adapter to fit the BNC connector on the HT and provide
an SO-239 connector that will permit a PL-259 to be attached.
This adapter can be used on any HT with a BNC connector. $5

Accessories for the Kenwood TH-21 / 31 / 41 series HTs For Sale:

Kenwood W09-0315 charger
This charger is used to charge the larger PB-21 H batteries for
the TH-21 series, and may also be used on other Kenwood radios.
$12

DEAD Kenwood PH-21 H battery pack
This is the heavy duty (high capacity) battery back used with the
TH-21 series HTs. The batteries in it are dead, but it can be sued to
put a new "insert" in, or for building a 12 V DC adapter. Physically
it is in good shape. $10

Kenwood RA-6 Rubber duck antenna for the TH-21 HT
This is the original 2 meter rubber duck. $15
As above, but shorter "Stubby Duck" $20

Rubber Duck antennas for your HT.
All are for 2 meters, are in good condition,
and are $10 each, unless stated otherwise.

BNC - About 7 inches long
BNC - Original from Kenwood TH-215, 5 inches long
BNC - Stubby about 4.5 inches long
-

5/16 inch threaded, like used by Motorola and others
Stubby - 4 inches long

Type F connector - 6.5 inches long

PL-259 connector - 6.5 inches long
HyGain 275, still in original packaging

PL-259 connector - Stubby - 4.6 inches long
Centurion, still in original package

Special for Kenwood TH-21 HT threaded connector
Kenwood RA-6 regular, 6.6 inches long - $15

BNC Stubby for 440 MHz, 3 inches long

Rubber Duck Antennas with SMA Connectors:

All of these have SMA connectors as used by most modern
multiband HTs. All work fine, and look very close to new.

All provide gain over the standard rubber duck.

MFJ 1720 S, for 6 meters, 2 meters and 440 MHz
This MFJ Triple Band HT FlexiDuck antenna is 19 inches tall. It is a 5/8 Wave on 440 MHz to give you 3.2 dB gain. On 2 Meters it is 1/4 Wave antenna with 2.15 dBi gain. On 6 Meters you get an efficient full size 1/4 Wave antenna for full-size performance. $25

Full size SMA for 2 meters and 440 MHz
This is a very flexible antenna that is a quarter wave on both 2 meters and 440 MHz. $20

Two meter vertical antenna:

This 2 meter antenna is made for base station or for portable use. It is a 5/8 wave antenna (so it has about 3 db gain), with four radials. It is made to be mounted to a 1 1/4 or 1 1/2 inch mast pipe. It has an SO-239 connector on it, for connection to a PL-259.

The construction of this is relatively light duty. To put it another way, this one will not survive 100 MPH winds! It appears to be a commercially made unit, but I can not find any name on it. It goes together very quickly, with each radial screwing into a bolt, and then simply attaching the whole thing to a mast. As such, it would be great for portable work.

While the construction is light duty, it appears to be quality hardware. Some appears to be stainless, and some of it anodized. There is no corrosion evident on it. $25

Speaker Microphones:

Azden SDX-316 Speaker Microphone
Although it has an Azden name plate, it will also work with Icom, some Yaesu, and Alinco that needs 3.5 mm and 2.5 mm plugs.
This is the rounder style speaker mic that fits nicely in the palm of your hand. $20

MFJ 286 Speaker Microphone
This was used on a Kenwood TH-225 HT, but it also fits the TH-21/31/41 series HTs, TH-205, TH-215, TH-415, as well as others. It has a 3 conductor 3.5 mm plug and a 2 conductor 2.5 mm plug. It works fine. $12

MFJ-287 Speaker Microphone
Fits same HTs as the MFJ 286 above, but is a smaller more compact speaker mic. It works fine, and looks close to new. $15

Protective Cases:

Kenwood SC-13 Vinyl Case
For TH-215, TH-225 and others, with room for the larger
PB-1 and PB-4 battery packs. It can also be used with
the smaller PB-2 and PB-3 packs. Black color. Great
condition. $15

Case for Drake TR-33C
This is the black case that fits the Drake TR-33C, and has
cutouts in the back for antenna, power, etc. It includes
the shoulder strap, and is in good shape. $12

Case for Drake TR-22
As above, but for the TR-22. No shoulder strap. $10

Leather Case for Santec HT
This is a real Bianchi Leather case -- not a vinyl case.
It fits most of the Santec HTs, such as the HT-1200,
ST-142, ST-144, ST-440, etc. The real leather case
includes a built in belt clip, plus a removable leather
shoulder strap. $25

Belt Clips:
All include the hardware with the belt clip and are $8 each.
Kenwood BH-2 for Kenwood TH-215 / 225 / 415, etc.
Kenwood BH-3 for Kenwood TH-21 / 31 / 41 series HTs
Motorola
Yaesu FT-207

Wrist Straps for various HTs - $4 each
Kenwood TH-215 / 225 / 415, etc.
Kenwood TR-2400
Yaesu FT-209

Astron RS-12 A, 13.8 Volt DC Power Supply:

This power supply is rated at 9 amps continuous and 12 amps ICS.
It is ideal for most 2 meter rigs, including the 50 Watt rigs.

This Astron power supply features solid-state electronic
regulation, EMI filter, fold back current limiting for protection
from excessive current and shorted output, and crowbar over-voltage
protection.

This particular supply works 100% and looks the same. I can not find
a scratch on it. With paper work for $50.

Prices do not include shipping from Florida.

Thanks.

I have a VX3 that has a brand new battery and charger as old one was lost.

The HT looks new and has the manual.

I'll ship it to CONUS for $120.

Pixs on request.

From: doc@kd4e.com
Topic: 6092 Message: 6092

Priorities have shifted and so the Morrow project is off.

Morrow MBR-5 Morrow MB-565
(Picture here: http://kd4e.com/images/mb565-mbr5-sm2.jpg and
can send more.)

Morrow 5BR-2 (can send pic)

Roanwell RM-515 hand mic w/4-pin connector (I can take and send
pics. It is black with a metal screen over the mic element.
Really nice shape.)

$225. for all four pieces, including standard shipping.
(Some locations may be extra.)

Prefer Paypal-Personal but a USPS MO is OK as well.

6102. FS: MFJ 9406 6 meter radio

Yahoo group: ham4sale (2007 — 2015)
Date: 2010-12-27 22:40:57 UTC
From: John Geiger
Topic: 6102 Message: 6102

I have for sale a MFJ 9406 6 meter SSB radio. This is the 10 watt model with the analog tuning dial. It has the headphones mod on the rear of the radio so you can use headphones with it as well. The radio has been around a smoker and does smell like smoke, but could be "desented" fairly easily. It is only putting out 1 to 2 watts, though. The receiver works fine on it, but the transmitter is not putting out the 10 watts it should. It comes with a power cord, hand mic, original box, Manual, and sales slip.

I am asking what I paid for it-$50, plus shippping. Would make a nice 6m receiver or project radio.

6105. Triplett 630-A Multi-meter w/ batteries and leads

Yahoo group: ham4sale (2007 — 2015)
Date: 2010-12-29 16:10:45 UTC
From: phil_ad5x
Topic: 6105 Message: 6105

Up for sale is my vintage Triplett Model 630 Type 4 Suspension multi-meter. This meter is clean and operates perfectly. The front panel and meter are in good condition. However, the rim of the clamshell case has been chipped in a couple of places (photos of the chips as well as external and internal photos available on request). The unit closes up as it should. This Triplett 630-A comes with test leads, and both the necessary 1.5V D-cell and the 30V battery for the low ohms scale. The 30V battery is new (Eveready 413, Mouser 525-413 @ $25.43). Price is $30, plus $15 shipping.

I have a few extra items for sale in Southwest Oklahoma. Prices do not include shipping but an in person meeting can be arranged in SW OKlahoma/North Texas. Can also combine items for a single shipping charge. Here is what I have available:

1. Icom SP-23 external speaker. Had audio filters and dual inputs for 2 radios. Sells new for $200, asking $125.

2. Yaesu MD-100 desk mic. Works with all recent Yaesu radios. It has a 8 pin mic jack on it, so will need an adaptor if you want to use it with a modular jack type radio. Asking $100

3. MFJ 4245MV Power Supply. Switching type supply with meters and rated at 45amps current. Asking $100

4. Jetstream JTPS28M switching type supply with a meter and rated at 28 amps current. Asking $75

5. Daiwa cn-801 swr/power meter. Covers 1.8-200 mhz. Crossneedle design, asking 85.00

6. MFJ 868 Big power/swr meter, 6.5 inch meter face so you can see it from anywhere, covers 160-10 meters, asking 100.00

I can take paypal/check/mo and of course CASH! Let me know if you want any of these items.

6110. For Sale: Kenwood TS-50 - Washington State

Yahoo group: ham4sale (2007 — 2015)
Date: 2010-12-31 07:05:41 UTC
From: Allan
Topic: 6110 Message: 6110

I have a Kenwood TS-50 in great working condition, the radio works just like new with no issues. Always ran as a base with power supply but does show minor scratches from shelf wear.

Includes: Power Cable, Mic, New/Never Used mobile bracket, Instruction Manuel, and Original Box.

Asking $475. plus shipping via Paypal payment only.

Now, I am looking for an "excellent working" AT-440 Automatic Antenna Tuner for the Kenwood TS-440. If you have one that you are willing to part with I am willing to drop the price of the radio to $400. + the AT-440 and shipping.

6111. Heil Mics and accessories, Mic stands, Desk Mics, etc. FS

Yahoo group: ham4sale (2007 — 2015)
Date: 2010-12-31 14:02:46 UTC
From: Ken Simpson, W8EK
Topic: 6111 Message: 6111

A variety of Microphones and Microphone accessories,
including Heil Mics and accessories, other Desk Microphones,
Hand Microphones, DTMF Touch Tone Microphones, and HT
speaker microphones for sale:

Heil Microphones:

Heil GM-5 "Goldline" Professional Microphone

The "Gold Standard" Studio Microphone for Amateur Radio

The GM Series of microphones is a unique, innovative
microphone renowned for its gorgeous audio production. It's
crystal clear response made it an instant best-seller, and
it is the microphone of choice in thousands of Ham shacks
around the world today.

The GM includes the Heil-exclusive "Light Touch" PTT switch,
and is encased in a beautifully-finished high-gloss black
lacquer enclosure. The GM is fitted with a 4-pin XLR connector
compatible with the Heil CC-1 Series of adapter cables.

This GM5 version is equipped with the new full-range mic element
and the famous HC-5 element. It works with most rigs, but is NOT
made to be used with Icom rigs. See HM-I below if you have an
Icom radio.

This one works fine and looks like new. No defects of any
sort. $95

Heil HM-I for Icom Radios

The Heil Sound HM-I is a microphone that is specifically made
for Icom transceivers (green band). It is basically equivalent
to the GM-5 (above), except it is made specifically to work with
Icom rigs. It has a switch to switch between the wide and
narrow elements.

This one works fine, and looks like new. $80

Cables for Heil (and other) Microphones:

Heil CC-1 XLR 4
3 pin XLR Male to 4 pin XLR Female $25

Heil CH-1 I8:
4 pin XLR connector (for GM-5 or HM-I) to round 8 pin mic
connector wired for Icom. It also has a 1/4 jack for a PTT

switch. $20

3 pin XLR to stripped and tinned ends
About 10 feet of quality rubber covered mic cable with a 3 pin XLR connector on one end, and nothing on the other end. Ideal to add your own connector. Can be used with the CC-1 XLR-4 above. $20

AD-1-iCM Headphone Adapter
AD-1 iCM: iC modular, no cap (for use with iC elements only)
It has a modular connector for Icom on one end, with a 1/8 and 1/4 jack on the opposite end. $15

Heil round 8 pin connector to 8 pin modular connector for Icom
Not positive of the number, but it might be HSTA-IM or HSTA-706
$15

Icom OPC-589
Icom round 8 pin microphone jack on one end with a modular 8 pin connector on the other end. Made to convert your mic with the round connector, so it can be use on a rig that requires the modular connector. $22

Microphone Stands:

Regular round desk stand
Round 6 inch diameter heavy black base, with a 3 inch chrome tube coming up from the middle. Standard 5/8 inch threaded. $15

Rectangular desk stand
Approx 4 inch by 5 inch heavy black base, with a 2 1/2 inch chrome tube from the center. Standard 5/8 inch threaded. $15

Gooseneck Extension
Male connection on one end and female on the other, so it can be used as an extension. Standard 5/8 inch threaded. 7 inches long. $10

Solid 12 inch Tube
Male connection both ends. Chrome plated threaded tubing, with a small hole so that a mic cable can be brought out of the center of the tube. Standard 5/8 inch threads. 12 inches long. $10

Triangle Flange
This is a trangle shaped flange that will mount to a desk, board, or other flat wood or metal object. It is about 2 1/2 by 2 inches, chrome plated, with mounting hardware. Standard 5/8 inch threads. $8

Heil Wind Screen

This windscreen can be used with a variety of microphones, including the GM-5 and HM-I above. Excellent condition. $5

Microphone holders:

Electro Voice
Gray colored EV, designed to hold 5/8 to 3/4 inch diameter mics, and go into a stand with standard 5/8 inch threads. $5

Chrome Mic holder
Similar to EV holder, but chrome metal with a green felt on the inside to protect the mic. For 1/2 inch to 5/8 inch diameter microphones. Standard 5/8 inch threads. $5

Desk Microphones:

TenTec 709A Desk Microphone
Model 709A is an omni-directional dynamic microphone.
The unit consists of a die-cast zinc shell with molded sliding PTT on/off switch, dynamic microphone element and detachable multi-wire connection cable.
It has an 8 pin connector as used on the Orion, Eagle and newer TenTec rigs.
This particular mic works 100% and is still in its original box. $60

Johnson equivalent to a Shure 444 desk microphone:

Although the front of this mic says Johnson on it, it looks like a Shure 444. My assumption is that it is a 444 with a Johnson label.

Of course most of us know that the 444 is an extremely good communications microphone with great articulation.

It appears that this one has a low impedance element in it, making it a better match for the more modern rigs.

This one works fine, and looks nice. $45

Gooseneck Microphone:

Astatic Model 810-6.
This mic is on a 12 inch gooseneck. The mic itself is brushed metal about 5 1/4 inches long, and is actually part of the gooseneck. The cable goes thru the gooseneck. This has a 2 conductor shielded cable, so it is a quality balanced microphone with about a 4000 ohm impedance. The gooseneck terminates in a standard 5/8 inch threaded connector.

It is similar to the one found here:
http://www.focusedtechnology.com/1191-19.html

This one works fine and looks good. $45

Hand Microphone:

Generic Low Impedance Hand Microphone
This is a low impedance hand microphone, black in color.
Looks and works great. With 4 pin connector. $25

DTMF Touch Tone Microphones:

Icom HM-8 hand mic with Touch Tone (DTMF) Pad:
The HM-8 has a 12 digit touch tone (DTMF) pad on the front
of it, along with an on-off switch for the tones. Of course
it also has the normal PTT switch.
The HM-8 is used on the 25A Red LED, 245, 290, 402, 202S,
451, 471A, plus other rigs.
This particular microphone has an 8 pin round connector,
works fine, and includes paper work for $40.

CES 610 L DTMF Touch Tone Mic
Can manually dial a number, or automatically store it in the
mic, and "speed dial". 12 digit touch tone pad on the front,
with the microphone part above the pad. With an 8 pin modular
plug (like a computer LAN) on it, which can be changed.
Looks to be new. $40

KDK DM TT-1 DTMF Touch Tone Mic
This mic has a 12 digit touch tone pad on it, with a
switch to turn the pad on and off. With 4 pin plug.
It works fine, and looks great. $35

KDK Model TM-2 DTMF Mic
With touch tone pad and up-down switches. It presently
has stripped and tinned ends. Nice condition. $40

Johnson 250-0761-010 / CES 655 L DTMF Mic
It has a 12 digit pad on the front, and is a rugged mic.
Presently with 4 pin plug. Looks to be unused. $40

Data Signal "Data-Coder 5" Touch Tone Mic
This mic has a 12 digit touch tone pad on it, plus a normal
low impedance microphone. With 4 pin plug. Like new. $38

HT Speaker Microphones:

Azden SDX-316
Although it has an Azden name plate, it will also work
with Icom, some Yaesu, and Alinco that needs 3.5 mm and
2.5 mm plugs.
This is the rounder style speaker mic that fits nicely in
the palm of your hand. $20

MFJ-286 Speaker Microphone
This was used on a Kenwood TH-225 HT, but it also fits the
TH-21/31/41 series HTs, TH-205, TH-215, TH-415, as well as
others. It has a 3 conductor 3.5 mm plug and a 2 conductor
2.5 mm plug. The coiled cord has been stretched a bit, but
it works fine. $12

MFJ-287 Speaker Microphone
Fits same HTs as the MFJ 286 above, but is a smaller more
compact speaker mic. It works fine, and looks close to new. $15

Prices do not include shipping from Florida.

Thanks.

FS: Heath SB-640, Shure M267, Ameritron RCS-8V, etc.

Need quick funds to buy used rig ...

Cosmetically-nice Heath SB-614 Station Monitor. It needs the
power transformer replaced (I have acquired the replacement
transformer). $75. incl. std shipping.

Ameritron RCS-8V Remote Antenna Switch. It is in nice shape
and the insides of the remote unit are sparking-clean. $125.
incl. std. shipping.

Shure M267 Mixer in real nice shape. $45. incl. std. shipping.

OR ... all three for $225. incl. std shipping.

SHURE M267 specs

Features include: a switchable limiter, phantom power, LED peak
indicator, built-in battery pack, headphones jack and level control,
battery check function, tone oscillator, mic/line switches on each input
and output, low-cut switches, mix bus jack and VU meter. Four XLR
transformer-balanced inputs; one XLR output and a binding post output;
battery (three standard 9-volt, alkaline recommended) or 120/240 Vac
power. Rack mountable with A268R.

6119. For trade: Yaesu FT450 HF/6m radio

Yahoo group: ham4sale (2007 — 2015)
Date: 2011-01-05 15:29:23 UTC
From: John Geiger
Topic: 6119 Message: 6119

I have an excellent condition Yaesu FT450 HF/6m radio for trade. The FT450 has it all-IF DSP so no extra filters are needed, a built in voice keyer, a built in CW memory keyer, a TCXO for increased stability, and a built in voice synthesizer to announce what frequency and mode you are on at the push of a button. In other words, this radio does it all.

It does 100 watts on HF and 6m, all modes.
It comes with the power cord, mic, manual, and original box. I am looking to trade it for an Icom 706 original or 706MKIIG, or maybe an Icom 820, or Kenwood TM255A

6122. HF rigs for sale

Yahoo group: ham4sale (2007 — 2015)
Date: 2011-01-06 05:06:16 UTC
From: Mike Blazek
Topic: 6109 Message: 6122

I'm trying to make some room in the shack and have two HF rigs/packages for sale:

#1
Kenwood TS-850SAT w/ DSP-100 signal processor:

The TS-850 has the DRU-2 module and 500Hz filters in both IF's (Kenwood in the 8.83 position, Inrad in the 455 slot), 21 million S/N range. Comes with original manual, power cable and hand mic. The DSP-100 has all cables and the original manual. Both units are in very good shape although the DSP-100 has some small round stains on the top cover from another piece of equipment. Price is $1,250.00 OBO for the package, but I will split (you won't hurt my feelings if you only want the DSP-100).

#2
Japan Radio Corp JST-135 w/ NBD-520 power supply:

Rig covers 160-10 meters including WARC bands. Has all the standard features expected on an HF rig; dual VFO's, direct frequency entry, VOX, full break-in keying, passband tuning. However, it does not have a built-in tuner. Power output is 150 watts. Has 1KHz and 500z filters and RS-232 interface. Comes with original manual and hand mic. If by chance you own an NRD-525 receiver with the RS-232 interface, I'll throw in (assuming I can find it) the transceive cable kit. Price is $895.00 OBO

I'll be happy to provide pics on all items. I don't have any of the original boxes, so I will have them professionally packed, shipped insured via your choice of carrier. Shipping actual cost up to $50.00 Paypal is preferred, but postal money order is OK too.

73,
Mike N5UKZ
Baton Rouge, LA

Date: 2011-01-07 16:09:59 UTC
From: John Geiger
Topic: 6128 Message: 6128

I have for sale an Icom T8A triband HT (6m/2m/70cm) in good condition. It does 5 watts on high power and 500mw on low power and has wideband receive including the FM broadcast band. It comes with the antenna, wall charger, and 2 batteries. One is a battery bought new a month or so ago, and the other is a Batteries America high capacity battery that holds a decent charge. The HT works fine and doesn't have a manual but you can find that on-line.

I am asking $120 shipped for it in the US and international shipping is always possible.

6131. 2 m rigs, dual band HT, mulitmode, & wattmeters FS

Yahoo group: ham4sale (2007 — 2015)
Date: 2011-01-07 21:10:30 UTC
From: Ken Simpson, W8EK
Topic: 6131 Message: 6131

Two meter mobile transceivers, dual band HT, Multiband Multimode transceiver, and VHF and HF Wattmeters For Sale:

Alinco DR-150T VHF FM Mobile Transceiver:

The DR-150 is a 50 watt 2 meter transceiver that will also receive on the 440 MHz band, as well as wide band receive for VHF.

Specs include
Tx: 144.00-147.995 MHz FM
Rx: 108.000-173.995/440.000-449.995 MHz FM/AM
Channel Scope
Sweep Scan
CTCSS Tone encoder
Time-out-timer
DSQ selective call
9600bps connector
100 memory channels
Autodialer
S-meter squelch
Remote DTMF control
Plus many other bells and whistles

This one works fine and looks fine also. I do not find any scratches on it. Mobile bracket with hardware, DTMF Microphone, power cord and paper work are included in the original box for $150.

Kenwood TR-7400 Two Meter FM Transceiver:

The Kenwood TR-7400 is a digitally synthesized high performance, 2 meter mobile FM transceiver. It features a full frequency digital LED display. Transmit power may be set for 5 or 25 watts. Frequency range is 144-147.995 MHz. It is 7.3 x 2.875 x 10.6 inches in size and requires 13.8 VDC at 8 amps.

One of the really nice things about the TR-7400 is that the frequency selection is by means of a rotary switch that has a stop at each end. It can be turned from 0 to 9 for both 10s and 100s of KHz. The MHz switch is a 4 position switch with a detent. This means that someone who is blind or vision impaired can easily count the clicks and know the frequency.

This particular unit works 100%. The front panel is very nice and the digital readout is crisp and clear. It includes a hand mic, DC cord, and tilt bail.

With paper work for $45.

Yaesu VX-3 dual band HT:

The compact VX-3R 2m/70cm FM HT Transceiver is loaded with convenience features. In additon to top quality performance on 2m and 70cm, you will also be able to enjoy stereo FM and AM broadcast band reception.

The Yaesu VX-3R 2 meter/440 MHz handheld has extensive receive frequency coverage, providing local-area two-way amateur communications along with unmatched monitoring capability. The VX-3R receives: 500 - 1800 kHz (AM Band), 1.8 - 30 MHz (Shortwave), 30 - 76 MHz (VHF Lowband with 6M), 76 - 108 MHz (FM band), 108 - 137 MHz (Air Band), 137 - 174 MHz (VHF High band with 2M), 174 - 222 MHz, 222 - 420 MHz (VHF band with 220), 420 - 470 MHz (440), 470 - 800 MHz and 800 - 999 MHz (800 band [cellular blocked]). You get a huge 1000 channel memory system.

Power output with the supplied Lithium Ion battery is 1.5 watts VHF and 1 watt UHF. With the optional E-DC-21 DC adapter output jumps to 3 watts and 2 watts!

This particular HT is like new. It works 100%, and looks like new, with no scratches. It has its original box, rubber duck antenna, LiIon Battery, charger, and paper work all for only $155.

Icom IC-706 Mk II G 160 thru 440 MHz transceiver:

The '706' Series represents one of the most popular transceivers in amateur radio histroy. The latest version is the incredibly small Icom IC-706 Mark II G which adds many new features and capabilities not found in previous versions. The "G" is an all-mode transceiver that provides 100 watts on HF and 6 meters and 50 watts on 2 meters plus 20 watts on 440 MHz. It receives from 30 kHz to 199 MHz and from 400 to 470 MHz. It features a removable, remoteable, front panel that allows control of all features. The large LCD display features alphanumeric memory names (9 character) and soft key descriptions. The LCD even supports a simple band scope display. Other advanced features include: IF Shift, RIT, Tone Squelch, Scanning, Noise Blanker, Speech Compressor, Mini Spectrum Scope and Electronic Keyer. This latest version in the 706 series includes the UT-106 DSP module as a standard feature. Despite its compact size (6.56" x 2.28" x 7.88"), it has big, easy to use control dials. With HM-103 hand mic. One or two optional filters may be added.

Features
* .03-199, 400-470 MHz Receive
* Alpha memories
* RIT
* Preamp/ATT
* VFO A/B

* 1 Hz Display
* IF Shift
* Scanning
* S/RF Meter
* 100 Watts HF+6M
* 50 Watts 2M, 20 Watts 440
* 100 Memories
* All band Multimode
* Removable head
* Mini Spectrum Scope
* Electronic Keyer

This one works 100% as best I can determine. It looks extremely nice. Microphone and paper work are included for $650.

Heath VHF Wattmeter:

Heath HM-2102 VHF wattmeter, covering 50 to 160 MHz.

Similar to the HM-102, but for VHF frequencies, with 250 and 25 watt scales. It can also be used to check SWR, and has a remote sensor that can either be left inside the meter, or separated from the actual meter. SO-239 connectors in and out.

This particular meter works great. It looks very close to perfect with no defects that I can find.

Paper work included for $50.

M C Jones VHF/UHF Wattmeter:

This MC Jones Wattmeter is a vintage unit, probably from just after WW II. At that time, it was the gold standard of wattmeters, basically equivalent to a Bird today.

This particular meter has N connectors in and out. It reads 12 Watts full scale in the forward position, and 4 Watts full scale in reflected. It also has an SWR calibrate and SWR scale on the meter. I think the frequency range is from 20 to 1000 MHz, but I am not 100% positive of that. It works well on 2 meters and 440 MHz. The RF sensor unit inside is model 576.3.

This one functions fine, and looks extremely nice for its age.
$60

I also have many other accessories available.
Just too many to list here.
Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

6133. DSP Signal Processors and Audio Filters FS

Yahoo group: ham4sale (2007 — 2015)
Date: 2011-01-08 15:26:56 UTC
From: Ken Simpson, W8EK
Topic: 6133 Message: 6133

DSP Signal Processors and Audio Filters For Sale:

Timewave DSP-599zx Deluxe DSP Processor / Audio Filter:

Calling it an audio filter does not tell the whole story.
It is really much more. It represents the latest generation
of Digital Signal Processing (DSP) audio filtering, incorporating
the newest high speed CPU. The LCD display, push buttons and
Visible Memory let you see the exact settings of the filters.
The DSP-599zx works in all modes. It is a dream for the non-voice
modes, as well as voice and CW modes. Data filters supported
in the filter are RTTY, Amtor, PACTOR, G-TOR, HF Packet, SSTV,
WeFax, SITOR and Clover. It needs 13 V DC at 1 amp.

This particular unit works fine and looks very nice. A wall
wort power supply and paper work are included for $300.

JPS NIR-10 DSP Audio Filter

The JPS NIR-10 audio filter allows reception of difficult to
read signals and reduces listener fatigue. It operates on
radio receiver audio outputs, then provides its own volume
adjustable processed audio to an external 3 to 8 ohm speaker.
The NIR-10 reduces or eliminates white/pink noise, ignition
noise, static interference, RTTY interference, and power line
noise. PEAK function reduces white noise interference. The
Notch Filter mode removes multiple heterodynes and acts in
3 milliseconds. Band Pass mode has continuously adjustable
center frequency, selectable bandwidths (0.25, 0.6 and 1 kHz),
vertical-skirted filters, and greater than 60 dB ultimate
rejection. The rear panel has RCA phono jacks for Audio Input,
Speaker Output, Remote Bypass, and Inverted Remote Bypass.
There is also a jack for 12 VDC Input (1 amp). The front
panel has a 1/4 inch headphone jack.

This unit works fine, and looks very close to new. I can not
find a scratch on it. With paper work for $75.

Grove SP-200 Speaker and Audio Filter

The Grove SP-200 speaker with filter has extensive audio
filtration capability which includes peak and notch functions,
with variable bandwidth and frequency. In this respect, it
seems to be similar to the Autek QF-1 filter, but it is built
in to the speaker enclosure. It also has a tape recorder
activation feature with a variable hold. Tape out and
activation are on the rear panel.

In addition, it has an audio amplifier in it with a volume control and separate bass and treble controls. A noise limiter is also included. To put it another way, it is quite sophisticated!

It is all housed in a nice woodgrain cabinet, about 11 inches wide by 7 high and 8 deep. $175

Prices do not include shipping from Florida.

Thanks.

73,

Ken, W8EK

6137. FS: Collins 30S-1

Yahoo group: ham4sale (2007 — 2015)
Date: 2011-01-09 22:16:15 UTC
From: W8KZW
Topic: 6137 Message: 6137

I acquired this amplifier as part of an estate purchase. I have a 30S-1 and don't need two.

This amp does not work. Slowly applying voltage with a Variac yields no response - nothing.

The rectifier tubes were replaced with solid state rectifiers. Other mods may have been done as well.

It appears as if the dial mechanism for the tune and load capacitors has been restrung. There is a slight "binding" noise when tuned, and the capacitors do not align with the dial markings as they should.

I just don't have the time or inclination to dig into it and get it working.

The good news here is that the power transformer appears to be fine! I disconnected everything and applied voltage to the primary, and the readings match up almost exactly to those for the Dahl replacement transformer. I also checked the 4CX1000A final in my working amp, and see 700 watts out with 70 watts of drive in the CW position (425 mils plate current), about 1,000 watts PEP output with 60 watts input in the SSB position.

Cosmetically, it's far from beautiful, but the front panel is actually pretty decent. The cabinet has some scrapes, scratches, and dents. It's wired for 220 and has a heavy duty connector. The left dial has one area with a smudge on it, the right dial is fine. The fan motor mounts need to be replaced.

I will not ship this amp - it's local pickup only. I will deliver the amp to the Hazel Park Swap in Hazel Park, MI on January 16 if that is your preference. $895.00.

I will provide a PDF of the manual if you need it. Photos available.

Thanks for looking at this ad.

6141. For Sale: 41yrs worth of QST issues - Washington State

Yahoo group: ham4sale (2007 — 2015)
Date: 2011-01-11 05:01:31 UTC
From: Allan
Topic: 6141 Message: 6141

I have 41 years worth of QST Ham/Amateur Radio issues, dating from 1934 to 1975. 1934 through 1944 are in QST dated binders. All years complete except the January 1946, February and March 1972 issues are missing. These are in what I would say "Very Good" to "Excellent" condition, you might be lucky if you look around and find them in this condition any place else.

Will "not" sell individual issues, selling in year sets only.

Asking $20.00 per yr, includes USPS Flate Rate Shipping. Will only ship with in the US.

Money order or PayPal accepted.

From: w7boz
Topic: 6144 Message: 6144

Hello group,
I am looking to buy in good condition a Dual Band Mobile. Here is what I am looking for. First, must be under $175 with shipping. Must display both bands and usable at the same time. V/U V/V U/U. Have alpha tags, at least 40 memory channels, 800Mhz recieve. If you have one you would like to sell, let me know. Seen a few on Ebay but would like to see more radios. Or if you know of somewhere good to buy used radios let me know.
Thanks, Kevin

From: w7boz
Topic: 6146 Message: 6146

Looking for a Drake MS-4 Speaker and AC-4 power supply. I just picked up my first HF radio, a Drake TR-4C and would like a matching set. I have a power supply, no idea what type that came with it and works. Would also be interested in the DC-4 12V supply.
Thanks, Kevin

*** Tubes ***
These are all old RCA, Sylvania, GE, Westinghouse etc.
No "Realistic", or modern imports in the group.

Eimac JAN 7580W/4CX250R -- pulls. Last pair: $80

Nuvistors

6CW4, 6DS4, 13CW4, 7586 NIB -- $10 ea.
6CW4 RCA pulls, checked OK on a Tektronix curve tracer $5 ea. or 10 for $40
Sweep Tubes

6DQ6B RCA likely NIB + GE 6DQ6B pull -- $10 both
6JF6 NIB -- $15 pair
Victoreen GV4S-1400 Corotron, 1400 volt regulator tube. NOS $20.

Western Electric

403B pull $4
404A pulls $7 ea
408A / 6028 NIB $10 ea

Low Profile Dual Triodes -- All in this group, are 1950's & early 1960's vintage US made devices and were performance verified on a Tektronix curve tracer.

2C51/396A Tung-Sol NIB $10
5670 RCA & GE pulls $10 ea
6386 RCA NIB last pair, $600
6386 GE 5 Star NOS $300
6386 GE pull $200

Dual Triodes -- All in this group were performance verified on a Tektronix curve tracer.

12AT7 pulls $3 ea
12AU7A Sylvania NIB $10 ea
12AX7 pulls $5 ea
12AY7 pulls $3 ea
5814A (12AU7A) RCA NIB $10 ea
5814WA pulls $5 ea
5963 (12AU7) pull $5
Collins KWM2 spare tube lot -- The little ones were mostly made by RCA, with a couple each Sylvania, GE & Raytheon -- all NIB $120

6146W (2) Sylvania
6AU6A
6AZ8 (4)
6BN8 (3)
6CL6 (2)

6DC6
6EB8 (2)
6U8A (4)
12AT7WB/6201 (2)
2C46 Lighthouse tube pull $3
2D21 pulls $5 ea

6AK5 pulls $2 ea
6AL5 pulls $1 ea
6AL5 RCA NIB 4 for $10
6CB6 pulls $2 ea
6ER5 RCA NIB $5

15E Eimac (60 years old!) NIB $10

927 RCA $20
4637 (RCA) pull $20

5663 pull $5
5823 RCA $20
5879 NIB $7 ea
5879 pulls $3 ea

6442 pulls $5 ea
6771 Planar Triode pull $5
6977 / DM160 Mullard Indicator Tubes NIB $10 ea

7056 NIB $7
7554 Pencil tube pull $5
7843 pulls $10 ea or... 3 for $25

*** Tube Sockets and Accessories***

Eimac -- Databook set circa 1985 in two large yellow Eimac 3 ring binders. Includes data sheets from 1976 edition and earlier. Both binders are stuffed to the max! Very good condition. $200

Acorn tube 5 pin ceramic sockets. NOS -- $5 ea

Birnbach 434 "50 watt" socket. Base is cracked clean through adjacent to opposite contacts, not noticeable from the top. Still quite useable as-is, or glue it. $8

Coaxial Planar Tube -- shielded heater/cathode contact assembly. Fits 2C39, 3CX100A5 or similar. Silver plated, NOS -- $10 each

Collins -- 22 assorted tube shields, 7 & 9 pin, short & tall. RFE. $20 all

Eimac SK-620 sockets, "unused" pair. One is a SK-620; the other a SK-620A. Probably 40 years old, a bit tarnished from storage, and unused except the heater pins on one were once soldered... probably to check some tubes. $60 for the pair.

Eimac 3" (or so) diameter Grid lead contact & 6" wire to lug as used on 3CX2500, 3CX3000, leaded versions etc. $5 pair

Johnson 122-101 ceramic 7 pin septar socket (accepts 826, 832, 4D32, PL6549, PL6569, etc). These were likely a special order as they have the standard ground shield but, no ground clips. NOS though, a bit dusty & tarnished from long storage -- $10ea

Johnson 122-237 ceramic 7 pin giant socket for 813, etc. NOS, $15

Johnson 122-237 ceramic 7 pin giant socket for 813, etc. Used, $10

Johnson A pair of used 122-237 ceramic 7 pin giant sockets for 813, etc. including eight base clips. $25

Johnson 122-247A or 122-248 ceramic 7 pin septar socket (accepts 7094, 8877, 832A, etc.) Used, $10

Johnson 124-115-2 UHF socket similar to Eimac SK-620. NOS, but, a mite tarnished from age. $40

Millen 36001 or National SPP-9 -- 9/16" Ceramic Plate Caps (fit 813 or similar) Used. Your choice, $3 ea

6 inch plate leads with National medium (.566") clips on one end; solder lugs on the other. The leads are covered with 16 each 5/16" diam. ceramic insulators. $5 pair

Pomona Electronics TVS-7 & TVS-9 test extender sockets for 7 & 9 pin miniature tubes. Little used. $40 both.

4 Pin Octal size female cable connector with hood. Used -- $3

6 Pin Octal size female cable connector with hood. NOS -- $5

Completely shielded Amphenol Octal M&F pair cable connector pair. Screw on coupling. NOS -- $20

9 pin Octal size Plugs with hoods. NOS -- $7 ea.

11 pin Octal size Plugs. Amphenol 86-CP11 or similar. New -- $5 ea.

11 pin Octal size Plugs. Amphenol 86-CP11 or similar. Used -- $3 ea.

11 pin Octal size sockets, round (may be used on cable or chassis). Used -- $3 ea.

11 pin Octal size sockets, chassis mount w/ears. NOS -- $7 ea

11 pin Octal size M&F pair cable connectors with hoods. NOS -- $15

Completely shielded Amphenol 11 pin Octal size M cable & F chassis connector pair. Screw on coupling. NOS -- $25

IERC Heat Dissipating tube shield, size T12. $10

DL300 50 Ohm Dummy Load With Huge Fins

Looks nice, clean inside and works fine tested with 100W.

ASKING $125. Including standard shipping (some loc. may be extra.)

See: <http://rfparts.com/dummy.html>

Size: 9 1/4? W x 6 3/4?D x 5? H. Shipping Weight: 6 lbs. N(F) 300W

Removed from 900 MHz gear. VSWR measures less than 1.05 @ 1.3 GHz.
Rated *300W continuous*. Bottom of heatsink is tapped with mounting
screws.

(RF Parts gets $225.00, their sale price is $189.00)

6151. FS: Icom OPC-589 mic adaptor

Yahoo group: ham4sale (2007 — 2015)
Date: 2011-01-16 03:50:08 UTC
From: John Geiger
Topic: 6151 Message: 6151

I have for sale an Icom OPC-589 mic adaptor that converts an 8 pin mic to the module jack used on the Icom 7000, 703, and 706 series of radios. Would also work with many of their FM mobile radios. These sell new for $33 plus shipping. I am asking $20 shipped and can take paypal/check/MO.

6152. FS: Kenwood TM-V7A 2m/70cm transceiver

Yahoo group: ham4sale (2007 — 2015)
Date: 2011-01-16 04:15:36 UTC
From: John Geiger
Topic: 6152 Message: 6152

I have for sale a Kenwood TM-7A 2m/70cm dualband, dual receive FM transceiver. The dual receive capability makes it work very nicely for FM satellite use. It also has a built in duplexer so you can run a dualband antenna with it into the single SO239 on the rear. It does 45 watts on 2m and 35 watts on 70cm, has PL tones built in, alphanumeric lables for the memory channels, and has 4 hypermemories for returning to a specific configuration at the push of a button.

It comes with the mic, power cord, mobile bracket, and original box. It does not have the manual with it but you can find those on line. The display works fine on it. There is one line that appears from time to time on the display but it doesn't interfere with anything.

I am asking $225 plus any shipping that is necessary for this rig. I can take paypal/check/MO and am always willing to entertain trades of other ham equipment.

73s John AA5JG

6153. For Sale - TS 440 SAT

Yahoo group: ham4sale (2007 — 2015)
Date: 2011-01-16 20:50:38 UTC
From: n4eof
Topic: 6153 Message: 6153

Offered for sale is my Kenwood TS 440sat, 10mil serial number. It has the auto tuner of course, and also the cw filter. It works fine, there are no operating issues. It looks good, but there are a few scratches on the sides, nothing out of the ordinary for a rig of this age. It comes with manual, power cord, and Kenwood hand mike. I do not have the original boxes, but will double box and ship to the lower 48 for $500. I will meet someone within a 50mi radius of Monroe, NC to eliminate shipping cost. Thanks for looking.
Jack WD4E@...

Firefox & Chrome displays it fine, as does IE6 & IE7.

Bird 5L Power Meter element -- for model 43 or similar meters. 5 Watts, 1.7-2.2 GHz, New -- $100

B&K Precison / Dynascan 501A -- Semiconductor Curve Tracer. Use in conjunction with an oscilloscope. 10" wide x approx. 3" hi x 10" deep. -- $75

EH Research G710 -- 50 Mhz Single/Double Pulse generator 20Hz-50MHz in ten ranges, 10nS-50mS delay, 10nS-50mS width, amplitude control for complementry outputs, plus internal/external trigger in, trigger out. 8+" wide x 3+" hi x 12" deep. -- $150

EH Research G750 -- 100 Mhz Single/Double Pulse /Sq. Wave generator 6Hz-100MHz in twelve ranges, 10nS-50mS delay, 10nS-50mS width, amplitude control for complementry outputs, offset control, plus internal/external trigger in with level control, trigger out. 8+" wide x 3+" hi x 12" deep. Note: Square wave mode only above 50 MHz. -- $200

Gentec, Inc. RF Wattmeter -- mounted in a LMB box. Two ranges 0-250W & 0-1000 watt. UHF female and BNC male connectors on attached sensor. Frequency range unknown. -- $15

Hewlett Packard 141T Spectrum Analyzer system including mainframe, 8552B IF section, 8553B, and 8555A RF sections plus 8443A Tracking generator. All original knobs, terminators,etc. clean and working fine. With manuals (or copies thereof...) for all units. -- $2200

Hewlett Packard 204B -- Sine Wave Generator, 5hZ to 500 KHz in 5 decade ranges. Main knob needs cleaning, otherwise working fine. 110/220VAC power, less cord. -- $40

Hewlett Packard 221A -- Square Wave Generator, 1hZ to 10 MHz in 8 decade ranges, w/Symmetry control, 0-5 volts variable output into 50 ohms. 5"x3"x11" deep series 1 HP cabinet. All original knobs, clean and working fine. 110/220VAC power, less cord. -- $50

Hewlett Packard Strobline Demonstrator A rare sales tool from the late 1960's for dot matrix readouts built in a 5"x3"x11" deep series 1 HP cabinet. Complete your HP collection now! Working! 110/220VAC power, less cord. -- $100

Kepco Dual PCX 15-1.5 MAT Two 15 volt 1.5 amp max lab power supplies in a Kepco PC-4 cabinet. Individual voltage & current meters (4 total). Ten turn voltage adjusts -- $50

Lambda LMOV-3 -- Overvoltage protector. 18-70 VDC range -- $10 ea

Motorola -- M68HC705KICS K-Series In-Circuit Simulator, New in Box including software, all manuals & databook and target device. -- $75

Olektron Corp. -- Directional Coupler Model 330977-1, 2-28 MHz range. -20dB nominal coupling. Four ports and two pots. Low power rating (5W?). New -- $10 ea.

Tektronix DC503 -- Digital 100 MHz Frequency Counter/Timer module for TM500 series mainframe. $250

Tektronix DC504 -- Digital 80 MHz Frequency Counter module for TM500 series mainframe. $125

Tektronix DD501 -- Digital Delay module for TM500 series mainframe. 1-99999 counts up to 65 MHz. w/ original manual. $125

Tektronix PS502 -- Triple Power Supply for TM500 series mainframe. 5V @ 1A plus, dual adjustable tracking 10-20 volt @ 400mA. $125

Tektronix SG503 -- 250 KHz - 250 MHz Leveled Sine Wave Generator, 5 mV to 5.5V P-P output level into 50 ohms, for TM500 series mainframe w/ original manual. $250

Tektronix SW503 -- 1-400 MHz Sweep Generator for TM500 series mainframe w/ original manual. $500

Olson model CB-067 -- SWR & Field Strength meter. In half of original box with instructions & short UHF-UHF cable. Screw in whip antenna is missing. Rated 1KW. UHF connectors. Little used, late 1970's vintage. $10

TEI model 28-200 -- relative power / SWR / Field strength meter -- screw in whip antenna is missing. UHF connectors. $7

I have a mint condition R&S SMY02 9 Khz-2.08 Ghz Signal Generator for sale. Hundreds of special functions.

It'so nice it looks brand new and works as well also. I regard R&S as the RollsRoyce of test Equipment. I don't have to tell you what it goes for on the testequipment market. Passess all self tests and CAL Tests. LOOKS BRAND NEW and waswell taken care of. Selling for $1,595 inc shipping within CONUS. Best offers will be entertained but I will not cover the shipping for a best offerless thanthe selling price. email Bob at rma0100@... for more information, specs,brochures, and pictures of it functioning with a counter and R&S SpectrumAnalyzer. This is an awesome deal that wont last beyond a couplr of days.

You can also call me at 931-498-4339 anytime day or night. The unit comes warrantied for 30 days as well. I have the Manual on CD as well. I will post apicture in the photo section. It will be the unit with the Advantest Countersitting on top You can't go wrong on this immaculate piece of equipment. I alsohave a FLUKE 6060B Synthesized 1 Ghz Signl Generator fLAWLESS.

THIS IS REAL QUALITY

6158. FS: Waters Universal Hybrid Coupler II

Yahoo group: ham4sale (2007 — 2015)
Date: 2011-01-18 19:02:21 UTC
From: Radio WC6W
Topic: 6158 Message: 6158

Waters Universal Hybrid Coupler II -- Model 3002 w/compressor. A fancy phone patch styled to match the Collins S-line. This one is like new in the original box w/ original manual. There are just a couple of hairline scratches on the sides, the front is unblemished. The 1968 price was $72.50, now asking $100 in highly depreciated money! :-)

More stuff for sale may be seen at:

http://qsl.net/wc6w/wc6wfsw/index.html

Alert!!

Microsoft IE8 or IE9 may not properly display my webpage.

It may help if you click on the "Tools" menu and select "Compatibility Settings". Then check the "Display all websites in compatibility view" box.

Firefox & Chrome displays it fine, as does IE6 & IE7.

73 & Good morning,
Marv WC6W

6160. FS: Military VHF Amplifier

Yahoo group: ham4sale (2007 — 2015)
Date: 2011-01-18 19:09:21 UTC
From: Radio WC6W
Topic: 6160 Message: 6160

VHF Amplifier -- Late '70's vintage likely Military, probably airborne, VHF power amplifier assembly. It consists of 7 almost identical amplifier assemblies clustered around a central housing that has splitter combiner networks which are plugged onto each end with a bunch of SMB connectors. There are TNC's for the main in's & outs. I think it was originally configured as one amp, driving two, driving four boards. The complete assembly measures 7.5" x 5" x 3.5" overall -- the individual RF amp boards are 4.5" by 2". The outer covers are mostly missing. Each amplifier is a push pull design -- they appear to be 50 ohm in & out impedance with either PT6747 or PT6702 TRW transistors. I would guess this unit operates on 28VDC. I don't know what frequency range it covers nor the power level though, just guessing, it probably puts out at least 100W. And there is no manufacturer name -- probably went with the outer cover. Six of the modules are marked
OK and one, the input stage I think, is marked NO Good. The individual amps have integral heat sink plates so, they could be removed from the assembly and used separately. Think of it as 7 amplifier boards @ $10 ea -- Bare PCB's would cost as much! -- $75

From: radiotech750
Topic: 6162 Message: 6162

Here is a GE World Monitor for sale. I have had this radio since 1984. It works as it should and the antenna is straight and complete! radio has BFO for SSB and an AGC. This radio was far ahead of it's time. One unique thing it has is an analog plus a digital readout!
Please make offer. Pics on request and I can send you a video to your email if you wish.

Sierracin
5C12A -- 12V (5 Amp?) Switching Power supply with remote sense terminals -- open frame 5"x8.5" x2". Used -- $15 ea (2 available)

Nipron
PS2434-03 -- 39 Volt, 500 Watt Switching Power supply - open frame, 200-240V AC in, 10" x 5.5" x3". NOS -- $100

NPC
Model 12-115. 12VDC - 115 VAC 200W Square Wave inverter. Blackcase w/ gold anodized front panel measures 7" x 7" x 5" high. 10 lbs. shipping wgt. Used -- $20

Onan
3-70455-0000 -- Triple Output Switching Power supply: 5V @50A, 12V@7A, -12V@5.25A on 3x16 pin connector- 120/240V AC in via IEC connector, plus switched AC output, fully enclosed 16" x 8.5" x 4" w/ internal fan, RFE -- $30

Voltex
DLX-82-722-2 -- 12 Volt 50 Watt Switching Power supply, 24VDC in, 6" x 3.5" x 1" enclosed with barrier strip connections, RFE-- $10

International Instrumentation
Model PUP-200. 200W computer style UPS. Off white case measures 15" x 8" x 6" high. Requires 24V worth of lead acid batteries, not included. 18 lbs. shipping wgt. $20

Manufacturer Unknown Open (L-shaped) frame linear power supplies 6" x 3" x 2" with attached 2 wire polarized line cord, 120V 60 Hz AC input; internal 1A line fuse.
There is a relay that switches the 3 voltage outputs. Six-pin SIL output
connector with a matching cable to pigtails.

The wires are: GND, +5V switched, -5V switched, relay (gnd to operate), +12 switched, and +12 constant (for the relay). Just guessing from the 780X series regulators, I would think that the +12 and +5 outputs are good for about an amp. and the -5, which regulator is unheatsinked, perhaps a couple hundred mA -- $10 ea. (5 units available)

6165. SWAP: HF Rig, Amp, Tuner for Rig

Yahoo group: ham4sale (2007 — 2015)

From: doc@kd4e.com
Topic: 6165 Message: 6165

SWAP: HF Rig, Amp, Tuner for Rig

I am looking for Yaesu FT-857D, with separation kit, preferably with MH-59 mic. (Must be working 100%, minor cosmetics OK, not used mobile, not used portable except indoors, and from a non-smoking environment.)

Straight swap - we each pay our own shipping, insurance, and tracking costs to the other.

A local trade in the Savannah/Statesboro, Georgia area preferred.

I will swap all three of the following:

Sideband Engineers SB2-LA HF Amp. 600-700w Output Exc. Cond.

Yaesu FTDX-401B HF Transceiver 560W PEP w/Matching Speaker, receives OK but low output (needs pair of 6KD6 finals), in excellent condition.

Drake MN-2700 HF Tuner - Nice condition and works fine but has damage to the meter bezel and the prior owner covered some parts of the inside with liquid electrical insulation).

Pictures and more details on request.

I am cleaning out my attic and trying get an idea what the worth is on some of the items in my attic.

I would sure appreciate some help on how to market this older gear. Here are some photos

http://picasaweb.google.com/davidjmessing/AtticStuff?authkey=Gv1sRgCOrh1an1w43SL\w&feat=directlink

http://picasaweb.google.com/davidjmessing/Microphones?authkey=Gv1sRgCO6S99eL2Pfg\Gw&feat=directlink

FS: Yaesu FTDX-401B 560W HF Transceiver

Yaesu FTDX-401B HF Transceiver rated at 560W PEP SSB Input (receives
OK but low output, needs pair of 6KD6 finals), in excellent condition.

Yaesu FTDX-401B Matching Speaker in excellent condition.

Includes original manual with schematic.

It is an impressive looking rig (I can send a picture) but I need
the space and lack the time to tinker.

Asking $235. plus the actual cost to ship to you (unless picked up in
the Savannah-Statesboro, Ga area). Reasonable offers welcomed.

From: doc@kd4e.com
Topic: 6171 Message: 6171

FS: DRAKE MN-2700 HF Tuner

Looks nice and works fine ... but ... it has two "issues":

1. There is some liquid electrical insulation inside.

It has no impact on operation but the former owner made an
error and arc'd it and thought that was a good solution!

2. The former owner hacked up the meter bezel and I have not
figured out a repair of replacement.

Pictures on request.

Asking $150. plus the actual cost to ship.

(I know they are 2x - 3x that in 100% orginal condition but
I am not likely to get around to the meter bezel repair and
am not using it.)

6173. For Sale

Yahoo group: ham4sale (2007 — 2015)
Date: 2011-01-25 01:00:12 UTC
From: Charles Rader
Topic: 764 Message: 6173

I have a Radio Shack HTX-242 2 meter mobile and an Alinco DR600 Dual band mobile for sale. Both have been in boxes in storage for several years. Both power on and all functions seem to be working good. Both displays are working.

The HTX-242 is putting out 45 watts, the internal speaker works but I always used an external speaker with it because I did not like the sound of the internal speaker. Received a repeater 50 miles away with a homemade quarter wave antenna. You get Radio, Mic (end of cable is frayed near the connector but still works), and mobile bracket.

The DR600 is putting out 38 watts on High, just under 10 watts on med, and 5 watts on low on both VHF and UHF. VHF receive is death will receive a signal with a hand held though. Unable to test UHF receive. We do not have any UHF repeaters in our area. You get Radio, Mic, and if I can find it the mobile bracket.

So I am selling both as is and needs work. $150.00 (obo) for both shipped to CONUS only.

Thank you,
Charles

From: John Geiger
Topic: 6177 Message: 6177

I have for sale a Kenwood TM-7A 2m/70cm dualband, dual receive FM transceiver.
The dual receive capability makes it work very nicely for FM satellite use. It
also has a built in duplexer so you can run a dualband antenna with it into the
single SO239 on the rear. It does 45 watts on 2m and 35 watts on 70cm, has PL
tones built in, alphanumeric lables for the memory channels, and has 4
hypermemories for returning to a specific configuration at the push of a button.
It comes with the mic, power cord, mobile bracket, and original box. It does
not have the manual with it but you can find those on line. The display works
fine on it. There is one line that appears from time to time on the display but
it doesn't interfere with anything.
I have been using it on the FM satellites recently with good results, and
everything work fine on it.

I am asking $205 shipped and can take
paypal/check/MO and am always willing to entertain trades of other ham
equipment.

Hi all.

I require the following components for my phasing techniques experiments:

LT6231 dual op-amp ultra low noise audio amplifier
LT1719 dual op-amp ultra low noise audio amplifier
OP2228 ultra low noise audio amplifier
INA163 ultra low noise audio amplifier
TDA7052 ultra low noise audio power amplifier, substitute for the noisy LM386
FST3253 mux/demux switch used as Tayloe QSD phasing mixer
FST3126 mux/demux switch used as Tayloe QSD phasing mixer
MAR-4 MMIC RF amplifier or similar
FIN1002 LVDS RX
74AC04
74ACT74
74ACT08
74ACT86
74ACT238
LT1085 or LF33ABV 3 volts regulator or similar
WBC-4-1WL wideband transformer
16x2 LCD character display HD44780 controller compatible; LCM1602A

6180. Need Crystal For My Sixer

Almost ready to put my renovated Sixer on the air. In need of crystals for it. Any help would be greatly appreciated. Thank You

6181. FS: Kenwood HT accessories

Yahoo group: ham4sale (2007 — 2015)
Date: 2011-01-26 16:22:40 UTC
From: John Geiger
Topic: 6181 Message: 6181

I have for sale 2 accessories for Kenwood HTs. One is the SM-34 speaker mic with the volume control on it. The other is a cigarette lighter cord, which is not made by Kenwood but will fit Kenwood HTs and provide 12 volts to run the HT from or to charge the battery. The speaker mic is missing the tip off of one of the pins but it works just fine anyways. I am asking $25 shipped for both and can take paypal/check/MO.

6182. FS: Kenwood TH-F6A triband HT

Yahoo group: ham4sale (2007 — 2015)
Date: 2011-01-26 16:26:04 UTC
From: John Geiger
Topic: 6182 Message: 6182

I have for sale a Kenwood Triband (2m/1.25m/70cm) HT in good condition. This model puts about 5 watts on all three bands, does dual receive and does wideband receive, including SSB/CW receive. It comes with the stock antenna, LiON battery, wall charger, and original manual. The rubber cover for the speaker/mic jacks is wearing out and would probably need to be replaced at some point. The HT is used and does show some wear, but nothing very bad.

I am asking $165 shipped for it and can take paypal/check/MO.

*** Old Radio Knobs ***

These are all used, most have set screws,
with nothing worse than minor scuffs and smudges and fit 1/4" shafts, unless noted.
Note: I'll take $100 for the lot of Radio Knobs... plus shipping

Dakaware -- $20 all
1-1/16" Knurled Knob (3)
1-1/16" Knurled Knob w/ 1.5" skirt w/ white indicator line (2)
1-1/16" Knurled Knob w/ 2" skirt marked 0-10 (1)
1-5/8" Knurled Knob w/ 2-1/16" skirt & unfilled indicator line (1)
2-3/8" Knurled Knob w/ white vinyl pointer at skirt level (2)
2-3/8" Knurled Knob w/ 3" skirt & unfilled indicator line (1)
2-1/16" skirt only

Harry Davies
#1206 1-3/8" knobs 5 for $10
Short (1-3/16")pointer knob unfilled indicator line -- Not sure if this is Davies... There are a box of these -- 2/$1

Kurz-Kasch-- 300 series, 30+ parts, $50 for all --
#308 1-1/8" knob (5)
#385 1-3/8" knob (4)
#309 1-5/8" knob (8)
#310 2-3/8" knob w/metal spinner shaft (3)
#310 2-3/8" knob -- hub drilled out to 3/8"
#380 1-1/8" skirted knob (4)
#308 1-1/8" knob w/vinyl pointer
#308 1-1/8" knob w/ 1-3/4" black metal skirt w/ 100 graduations over 180 degrees
#308 1-1/8" knob w/ 1-3/4" brite metal skirt w/ 100 graduations over 360 degrees
#309 1-5/8" knob w/ metal spinner and 2-1/4" black metal dial with 100 graduations
#309? (may not be KK) 1-5/8" knob w/ plastic spinner and 2-1/4" metal dial with 100 graduations
#311 2-1/16" skirted knob (some of the white lines are need refilling on these) (5)

Kurz-Kasch-- 600 series, $20 for all -- These look like what was on some '60's Hammarlund, Eico & Knight Kit stuff
#642 1.5" skirted knob (1)
#S-645 .75" skirted knob w/indicator line (1)
#647 1" skirted knob w/indicator line (3)
#S-647 1" skirted knob w/indicator line (9)
#653 1.5" skirted knob w/indicator line (5)

*** Not quite as old Radio Knobs ***

Kenwood 5cm diameter knobs that look like they are from a Kenwood TS-830 (main tuning knob) or similar

One that's been backfilled with shot to give it some heft -- $7
The plastic spinner version -- $15

National HRT 2-1/16" diameter. Black, trim rings somewhat tarnished -- $5 ea

*** Other Knobs ***

Beckman model 901 Duodial for a 10 turn potentiometer NIB -- $10

Tycobrahe Guitar Pedal Knobs -- Used on the Octavia, Parapedal, Pedalflanger & Direct Box -- New, $25 ea.

There are also many knobs from 1960's Tektronix and Hewlett Packard oscilloscopes plus a few General Radio knobs. If anyone has any need, please inquire.

73 & Good morning,

6189. Digital Controllers, DSP Filters, and other items FS

Yahoo group: ham4sale (2007 — 2015)
Date: 2011-01-29 14:30:38 UTC
From: Ken Simpson, W8EK
Topic: 6189 Message: 6189

Digital Controllers and interfaces, DSP Signal Processors
and Audio Filters, and other items For Sale:

"Rigblaster Plus / USB" Digital Interface:

Rigblaster Plus / USB by West Mountain Radio
A RIGblaster is the easiest way to connect your radio to
a computer so that you may operate using over 100 existing
and future ham radio sound card software programs.
You will be able to operate over 20 exciting modes that
your radio could not operate otherwise.

Presently available ham radio sound card software, a RIGblaster,
a radio and a computer is the easy and modern way to operate
with every existing or future Amateur Radio sound card program.

This particular unit is complete, in its original box, with all
of the items listed on the enclosed paper work. Software CD is
included, along with many cables. It looks like this unit may
not have ever been used. Most bags appear that they have not
been opened.

West Mountain sells these for about $160. Buy this one for
only $110.

Heath HD-15 digital interface / phone patch

This is the unit with the VU meter on the left and 3 knobs
that match the SB series to the middle and right. Low or
high Z output to the transmitter. It can also be used as
an interface for PSK31, and other digital modes that use
a sound card. The meter makes it great for setting levels.
-
One is in excellent condition. Cosmetically, I can not
find a scratch on it. Everything on it is original.
Paper work included for $25.

I have another available, but it shows some minor wear.
With paper work for $22.

Waters "Universal Hybrid Coupler II" Model 3002:

Most of us would likely call this a phone patch, but it
is really much more than that. It does that, but also
will interface with a tape recorder, and permit recording
and play back of on-the-air QSOs. Nothing says that the
tape recorder input must be used that way. Connect the

sound card in your computer in this position, and you have a very effective interface.

Model 3002 includes a speech compressor powered by a 9 volt battery. The front panel is finished on both sides, with one side having it set in a horizontal position, and the other in a vertical position.

This was a "top of the line" unit years ago. One only found them with top stations such as Collins.

This particular unit is in really great condition.

With paper work for $100.

Timewave DSP-599zx Deluxe DSP Processor / Audio Filter:

Calling it an audio filter does not tell the whole story. It is really much more. It represents the latest generation of Digital Signal Processing (DSP) audio filtering, incorporating the newest high speed CPU. The LCD display, push buttons and Visible Memory let you see the exact settings of the filters. The DSP-599zx works in all modes. It is a dream for the non-voice modes, as well as voice and CW modes. Data filters supported in the filter are RTTY, Amtor, PACTOR, G-TOR, HF Packet, SSTV, WeFax, SITOR and Clover. It needs 13 V DC at 1 amp.

This particular unit works fine and looks very nice. A wall wort power supply and paper work are included for $300.

Grove SP-200 Speaker and Audio Filter

The Grove SP-200 speaker with filter has extensive audio filtration capability which includes peak and notch functions, with variable bandwidth and frequency. In this respect, it seems to be similar to the Autek QF-1 filter, but it is built in to the speaker enclosure. It also has a tape recorder activation feature with a variable hold. Tape out and activation are on the rear panel.

In addition, it has an audio amplifier in it with a volume control and separate bass and treble controls. A noise limiter is also included. To put it another way, it is quite sophisticated!

It is all housed in a nice woodgrain cabinet, about 11 inches wide by 7 high and 8 deep. $175

Code Practice Oscillator:

MFJ 557 code practice oscillator with key

This is a traditional code practice oscillator, with adjustable volume and tone. It includes a straight key on a nice base. It

operates from a 9 volt battery or from a wall wort (not included).

This one works fine and looks fine also.

With paper work for $25.

CW Key and Cables:

Nye Viking Speedex 310-001 "Oval Base" Key
Nice action, with nickel hardware. This originally had a black
base, but someone painted the base to look like it is brass.
Nye sells these for $58. This one is only $35.

Cables for CW keys and keyers:

Cable for straight key
About 3 feet long, with a mono 1/4 inch phone plug on it,
as is used with a straight key. $5
As above, but 1/8 inch (3.5 mm) plug. $5

Cable for paddles
About 3 feet long, and with a 1/4 inch stereo connector
on the end, like used by most rigs. $8
As above, but 1/8 inch (3.5 mm) plug $8

Prices do not include shipping from Florida.

Thanks.

Radio Transmitting Equipment catalog #967. No date but, text suggests wartime publication. Fair condition, 8 pages. $15
Magnecord
Parts/Price list (1966) -- $3
Parts/Price list (1971) -- $3
J.W. Miller -- Catalog #60, front & back cover loose, otherwise in good condtion. 43 pages, 1960. $10

Mini-Products, Inc. -- Minature Transmitting Antenna catalog -- $5

Mosley
A-203-C Flyer -- $1
A-310, A-315, A-320 Flyer -- $1
TA-20-40 Flyer -- $1

Cubical Quads Flyer -- $2
1963 Antennas & Accessories Price List -- $2
1967 Amateur Price Sheet -- $2
Amateur Antennas catalog no. H-174 -- $7
Newark Electronics
Catalog #75 1964 -- corner damaged covers & the first few pages -- $10
Catalog #110 1988 -- $10
Catalog #113 1994 -- $10
Phelps Dodge Communications
Antenna Systems catalog 176 & price list. 1976 -- $3
Antenna Systems short form catalog 877, 1977 -- $1
Radio Mfg. Engineers -- RME-99 Receiver flyer -- $2

Roberts -- Two sided flyer listing all? their tape recorders & accessories including prices, 1966 -- $5

Taylor Tubes -- T-55 data sheet, a bit rough -- $1

Tektronix Test Equipment Catalogs
1997/1998 -- $7
1998/1999 -- $7
2000 -- $7
Telrex Catalog PL-77 plus catalog CT-3, bulletin BA-3 & Big Bertha bulletin. All copyright 1962 -- $10 all

TET Antenna Systems Short Form Catalog -- $3

Thordarson Transformer -- catalog #400-C Fall-Winter/1938-39. Fair condition. 24 pages. Plus poor condition catalog #400 A (cover separated/back page or two missing) -- $15 both

Tri-Ex Towers Guyed Crank-Up & Self Supporting Crank-Up Towers. Two Catalogs. Guessing 1960's era from the prices -- $3

Universal Electronic Supply -- Catalog no. 132. December 1964. This was a New/Surplus outlet in downtown LA in the 1960's. Excellent condition. 32 pages. $7

More stuff for sale may be seen at:

TEMPO AC/one Power Supply & Speaker Console

Matches TEMPO One and FP-200 and should work with
many other boatanchor rigs. I can send the pin-outs
and specs: 600v, 300v, 150v, -100v, 12.6v
Looks good, worked last tested, sold as-is.

ASKING $70. plus the actual cost to ship.

They are asking $89. here, plus shipping:

6198. HF Antennas and related items FS

Yahoo group: ham4sale (2007 — 2015)
Date: 2011-02-02 00:46:13 UTC
From: Ken Simpson, W8EK
Topic: 6198 Message: 6198

HF Antenna related items For Sale --
SWR Bridges, Legal Limit Balun, Low Pass TVI Filters,
Vertical antennas, Tower, Connectors and more

SWR Bridge / Field Strength Meter:

Royce 2-100 Single Meter SWR Bridge / Field Strength Meter

With SO-239 connectors, it covers from 3 to 150 MHz,
covering HF, 6 meters, and 2 meters, so is ideal for the new
rigs with 6 meters and 2 meters in them.

This one works fine, and looks extremely nice. I do not see
any scratches on it, but it does have a previous owners name
on it. In its original box with original instructions. $32

Dual Meter SWR Bridges:

Both of these feature two separate meters -- one for reading
forward power and another for reading SWR. This permits one
to easily monitor both the power going out, and the SWR on
the antenna. They were made in Japan, and labeled with various
names, including Swan, Siltronix, and Quement. Both have SO-239
connectors on each end, and work fine.

Both will work on HF, and VHF, covering 3 to 150 MHz, so are
ideal for the new rigs that include 6 and 2 meters.

Quement SWB-2
No box for this one, but it works fine and looks great.
With paper work for $40.

Siltronix SWR-2
This meter functions fine, but the meter lens of the meter that
reads SWR has a crack on the very right edge of it. Strictly
cosmetic. $25

Heavy Duty Legal Limit Plus Balun:

HyGain BN-4000 D Balun

A balun is used to convert an unbalanced load such as coax
to a balanced load such as a beam or dipole. It will also
help reduce radiation from the coax feedline, that could
reduce TVI and other interference.

The BN-4000 D is a 1 to 1 ratio broadband 50 Ohm current balun,
and is potted to seal out moisture. It is rated at 4000 Watts

for increased power handling capabilities. Frequency range is 1 MHz to 54 MHz. It has stainless steel hardware and comes with a SO-239 connector.

This particular unit works fine and looks really great. It would appear that it has not been used. All connections are clean and shiny; the case also shines. It is the latest "D" model of the BN-4000.

Paper work is included for $80.

Low Pass TVI Filters:

A low pass TVI filter is added to the transmitter to reduce harmonic interference. All have SO-239 connectors and include paper work.

Drake TV-3300
This is a modern low pass filter has been optimized to have more attenuation in the 40 MHz region, where many TVs have their IF. It is good for 1000 Watts "average" according to the manual, and has over 80 db attenuation at 41 MHz.
This one looks great. $30

B & W FL-10/1500
This filter cuts off just above 10 meters, and handles 1500 Watts. It is the latest model B&W filter.
It looks very close to new. $40.

Hustler 4BTV "Base station" HF vertical antenna

The 4BTV covers 10, 15, 20, and 40 meters.
It can also cover 75/80 meters by using an RM-80 S resonator.

This one is in extremely good shape. It actually still shines! No corrosion evident. Penetrox was used on the original assembly, so it comes apart easily.

Paper work is included. but connection points are well marked for easy reconstruction. $120

I would prefer pickup near Ocala, Florida, just off of I-75. It will easily fit inside a minivan, or it can be broken down more to go inside a car. It is possible to ship it, but the cost is high due to it being oversize. Obviously, shipping is not included in the price.

Gap "Titan DX" HF Vertical Antenna:

The Titan is an 8 Band Multiband DX Antenna. It covers 80 thru 10 meters, including the WARC bands. It covers the entire band on 40 thru 10, and about 100 KHz on 75/80 meters. It is about 25 feet tall, and includes a counterpoise, so

that no radials are required.

One of the primary virtues of the Titan is the GAP center feed. By elevating the feed the earth loss is dramatically decreased, which means the RF is going out to make the contact instead of into the ground to warm the earth. Reducing the earth loss eliminates the need for a radial system. The Titan requires NO RADIALS.

This particular antenna is in extremely nice shape with no corrosion. Most of the aluminum is still shiny.

These sell new for about $400. This one is close to new, with paper work for $250. Pick up only near Ocala FL.

Antenna tower for sale in Florida:

A total of 35 feet of antenna tower is available, consisting of one top section, 2 "middle" sections, and a 5 foot section for the base.

This tower is "American" tower, which has a horizontal brace about every 22 inches. It is suitable for VHF antennas, very large TV antennas, or small tribanders.

This particular tower is in good condition, although there is some slight surface rust.

It is pickup only near Ocala, FL, just off of I-75. $125

Coax connectors and adapters For Sale:

Prices are per connector. Several of each are available. These are NOS (have not been used).

"N" Connector - Double Male - $8

BNC male for coax cable
standard type - $2
crimp on type - $3

Chassis mount BNC female
square mount (uses 4 screws) - $3
screw in type - $3

BNC "T" - two female and one male - $3

Antenna adapter to fit the BNC connector on the HT and provide an SO-239 connector that will permit a PL-259 to be attached. (BNC male to UHF female) $5

UHF Male (PL-259) to BNC female (opposite of above) $5

UHF double female "Barrel connector" (two SO-239 together) $3

UHF "T" connector with two female (SO-239) and one male
(PL-259) connection - $5

Prices do not include shipping from Florida.

Thanks.

Alert!!

Microsoft IE8 or IE9 may not properly display my webpage. Surely Billy G. is hard at work on a fix.

Until then, if you are running one of the above browsers, it may help if you click on the "Tools" menu and select "Compatibility Settings". Then check the "Display all websites in compatibility view" box.

Firefox & Chrome displays it fine, as does IE6 & IE7.

1N2804A -- 6.8V 50 Watt Zener Diodes, TO-3 case, NOS -- $10 each

More Semiconductors may be seen at:

http://qsl.net/wc6w/wc6wfsw/index.html?fr20.html

AC-DC Electronics model RS5N30-1. 5V @ 30A switching power supply with remote sense terminals, screwdriver voltage adjust, 6" x 2.5" x 10". Employed with an external soft-start (See-- http://qsl.net/wc6w/wc6wamps/index.html?fr63.html) these can power the heater(s) on a 3CX1000 or a pair of 3-400Z's, 3-500Z's, 4-400A's, etc. Used -- $30 ea. (3 units available)

More Power Supplies may be seen at:

http://qsl.net/wc6w/wc6wfsw/index.html?fr15.html

********** Transformers **********

Stancor Transformers

P-6308 107/117V Primary 50/60 Hz -- 6.3 VCT @ 10A Secondary, Used -- $20

F-106 115/230V Primary 50/60 Hz -- 10 VCT @ 6.5A Secondary, S case Used $20

F-610 115/230V Primary 50/60 Hz -- 6.3 VCT @ 10A Secondary, S case Used $20

Triad Transformers -- 115V 60CPS Primary

F21A 6.3VCT @ 10A Secondary, Used -- $20

F28U 6.3/7.5 VCT @ 25A Secondary, NOS -- $40

More Transformers may be seen at:

http://qsl.net/wc6w/wc6wfsw/index.html?fr36.html

********** Capacitors **********

Cardwell -- XR-1000HS (about 950pF max measured) These have slightly contoured plates for improved tuning resolution at minimum C. .030 air gap. About 4.5" x 4" x 3.5" overall including plate travel. Used, Good condition. $20 ea.

National Type TMC-300, 300pF variable capacitor, .070" air gap, approx. 8" X 4" x 2.5" with plates closed. Nice n' shiny like new! $40

Sprague 3600pF @ 30KV Doorknob capacitor. Red epoxy encased style -- $25

More Capacitors may be seen at:

http://qsl.net/wc6w/wc6wfsw/index.html?fr34.html

********** Tubes, Sockets & Accessories **********

Coaxial Planar Tube -- shielded heater/cathode contact assembly. Fits 2C39, 3CX100A5 or similar. Silver plated, NOS -- $10 each

Eimac JAN 7580W/4CX250R -- pulls. Last pair: $80

Eimac -- Databook set circa 1985 in two large yellow Eimac 3 ring binders. Includes data sheets from 1976 edition and earlier. Very good condition. $200

Eimac SK-620 sockets, "unused" pair. One is a SK-620; the other a SK-620A. Probably 40 years old, a bit tarnished from storage, and unused except the heater pins on one were once soldered... probably to check some tubes. $60 for the pair.

Johnson 122-101 ceramic 7 pin septar socket (accepts 826, 832, 4D32, PL6549, PL6569, etc). These were likely a special order as they have the standard ground shield but, no ground clips. NOS though, a bit dusty & tarnished from long storage -- $10ea

Johnson 122-237 ceramic 7 pin giant socket for 813, etc. NOS, $15

Johnson 122-237 ceramic 7 pin giant socket for 813, etc. Used, $10

Johnson 122-247A or 122-248 ceramic 7 pin septar socket (accepts 7094, 8877, 832A, etc.) Used, $10

Johnson 124-115-2 UHF socket similar to Eimac SK-620. NOS, but, a mite tarnished from age. $40

Millen 36001 or National SPP-9 -- 9/16" Ceramic Plate Caps (fit 813 or similar) Used. Your choice, $3 ea

More sockets and tubes may be seen at:

http://qsl.net/wc6w/wc6wfsw/index.html?fr41.html

********** Connectors -- All NOS , US manufacture **********

Amphenol MHV connectors -- Two 28100 right angle cable males & two 27025 panel mount females. -- $40 all.

UG-932 A/U MHV Male Cable connectors -- $10 ea

UG-961 A/U MHV Female Panel connector -- $12

UG-560/U HN Female panel mount connector -- $15 ea

UG-30C/U N Female-Female Bulkhead Connector -- $10 ea

More connectors may be seen at:

http://qsl.net/wc6w/wc6wfsw/index.html?fr44.html

********** Miscellaneous **********

Synchro Transmitters -- IMC Magnetics, Model 008-216, 26V 400Hz, .75" diameter housing, .120" dia. shaft, flying leads. These will drive a typical Radio Compass Indicator. NOS. $20 ea.

Water cooled heatsinks -- 12" x 8" used, drilled for a flock of TO-3's plus a few diodes. Back is flat. 3/8" water lines. $50 pair

ILG Electric Ventilation -- 17-18-022A squirrel cage type fan. Encased motor with 181-009-EA fan 115/230 VAC 1.6A/.8A 50/60Hz 3000 RPM 4+" round intake, 3+" x 4-3/4" rectangular output flange, weighs 25 lbs. Removed from a RCA transmitter that employed a 4CX5000A. Used -- $45

Commercially made airflow switch assembly consisting of a V4-16 Microswitch (250VAC 5A contact rating) with a 1-3/8" x 1-3/4" sheet metal vane soldered to the switch arm. The switch is mounted in a U shaped anodized aluminum frame about 2.5" deep with mounting ears. Marked S-101 and part no. 467-115 if anyone knows where that's from! NOS $10

****

And of course some meters, panel meters, time meters & RF ammeters, please see:

http://qsl.net/wc6w/wc6wfsw/index.html?fr32.html

6203. FS: Motorola Gensis UHF P200's & HT600's

Yahoo group: ham4sale (2007 — 2015)
Date: 2011-02-04 02:57:14 UTC
From: hitekgearhead
Topic: 6203 Message: 6203

Hey Guys,
I have several UHF Motorola P200's and Ht600's for sale. Most of them are of the 438-470 bandsplit but I also have a few 403-433 split. All of them are 6 channel, or have been converted to 6 channel. And most of them work. Condition is ranging from a 3 to 8. None of them are perfect. Some are quite usable. A select few are quite nice. Most are missing their rubber monitor buttons on the side. I don't have any antennas, batteries, or chargers to offer at this time though.

I am selling them on a sliding scale of $15 to $40 a piece depending upon condition. Basically, $15 gets you one that is usable for parts, and $40 gets you a radio that looks quite presentable and will give you years of good service.

I have a couple representative pictures if you would like some. Just email me and I will shoot them off to you.

Also, I can program the working radios with your desired frequencies and PL tones.

Also, I will be at Hamcation next weekend if anyone is interested.

Thanks guys!

Albert

From: AzleComm
Topic: 6200 Message: 6204

Hello,

I have several TK-790H radios for sale, they all have standard single remote heads. These radios came out of service two to three weeks ago as working radios, I know, I took them out. My company has supported them over the last 8 years. Some of the Microphone cords are frayed but seem to still work, if interested I have plenty of new cords and rebuilt microphones. The power connector is there but the fuse holder and long power wire is not.

If you are interested please email me at azlecomm@... . Discounts for quantity purchases.

Thanks,
Paul Finch

6206. Microphones and related items FS

Yahoo group: ham4sale (2007 — 2015)
Date: 2011-02-04 17:57:47 UTC
From: Ken Simpson, W8EK
Topic: 6206 Message: 6206

Microphones For Sale --
Desk Microphones, DTMF Touch Tone Microphones, Speaker Microphones, and Microphone Stands and other Microphone Accessories

Desk Microphones:

Kenwood MC-80 Desk Microphone:

The Kenwood MC-80 is an omnidirectional electret condenser "gooseneck" desk mic. It has UP-DOWN tuning plus a built-in pre-amp. There is a switch for PTT and also a lock feature. The mic impedance is 700 ohms so it can be used with a wide range of models, and it has a frequency response of 200 Hz to 7 KHz. There is a potentiometer adjustment on the back of the mic stand to adjust the output level. The mic terminates to a standard 8 pin Kenwood mic plug. It requires voltage from the Kenwood transceiver to operate.

This one works fine, sounds good, has a new wind screen, and is in its original box. With paper work for $75.

TenTec 709A Desk Microphone
Model 709A is an omni-directional dynamic microphones designed for use as a communications station microphone for Amateur Radio and other transmitting applications. The unit consists of a die-cast zinc shell with molded sliding PTT on/off switch, dynamic microphone element and detachable multi-wire connection cable. The element has tailored frequency response from 30 Hz to 12 kHz designed for excellent transmit audio in SSB, AM, and FM modes. It has an 8 pin connector as used on the Orion, Eagle and newer TenTec rigs.
This particular mic works 100% and is still in its original box. $60

DTMF Touch Tone Microphones:

Icom HM-56 DTMF Deluxe Microphone:

The Icom HM-56 is a DTMF touchtone microphone with up-down switches and a lot of sophisticated functions built in. This was the original mic that was furnished with an IC-229.

This electret mic has a 16 digit DTMF touchtone pad on it along with other special buttons. It also has 14 memories included in it for remembering phone numbers to dial. It has a round 8 pin connector on it, and works with the Icom 28, 38, 228, 229, 449, 901, 1201, 2330, 2400, 2410, 2500 and others. This mic

also has an up and a down switch on it. Basically, it is like an HM-12, but with DTMF pad and memories added. These are about $170 new, so that gives some idea of its sophistication!

This one works on all of its functions, including the dialing memories. It looks extremely nice, with no scratches.
With paper work for $90.

Alinco DTMF Touch Tone Microphones:

I have two Alinco hand microphones with 16 digit DTMF Touch Tone Pads, and Up-Down switches on them. Neither have an Alinco number on them, but simply say "Alinco". These have the round 8 pin connector on them, and will also work with most Kenwood and ADI rigs, as well as Alinco. Both work 100% on all 16 tones, and Up-Down switches, plus the mic and PTT switch.

One is a more rectangular shape, with only the PTT, 16 digits, and Up-Down switches. It does have a scratch on the side with the DTMF pad, but is in nice shape. $40

The second one is more of a tear drop shape, and has a lock switch and a switch to turn the DTMF pad off, in addition to the other buttons. I think it is an EMS-12, but that number is not on the mic any place. It is in very good condition. $45

KDK DM TT-1 DTMF Touch Tone Mic
This mic has a 12 digit touch tone pad on it, with a switch to turn the pad on and off. With 4 pin plug.
It works fine, and looks great. $35

KDK Model TM-2 DTMF Mic
With touch tone pad and up-down switches. It presently has stripped and tinned ends. Nice condition. $35

CES 610 L DTMF Touch Tone Mic
Can manually dial a number, or automatically store it in the mic, and "speed dial". 12 digit touch tone pad on the front. 8 pin modular plug (like computer LAN).
Looks to be new. $38

Data Signal "Data-Coder 5" Touch Tone Mic
This mic has a 12 digit touch tone pad on it, plus a normal low impedance microphone. With 4 pin plug. Like new. $36

Johnson 250-0761-010 / CES 655 L DTMF Mic
It has a 12 digit pad on the front, and is a rugged mic.
Presently with 4 pin plug. Looks to be unused. $38

HT Speaker Microphones:

Azden SDX-316 Speaker Microphone
Although it has an Azden name plate, it will also work with Icom, some Yaesu, and Alinco that need 3.5 mm and 2.5 mm plugs.
This is the rounder style speaker mic that fits nicely in the palm of your hand. $20

MFJ 286 Speaker Microphone
This was used on a Kenwood TH-225 HT, but it also fits the TH-21/31/41 series HTs, TH-205, TH-215, TH-415, as well as others. It has a 3 conductor 3.5 mm plug and a 2 conductor 2.5 mm plug. It works fine. $12

MFJ-287 Speaker Microphone
Fits same HTs as the MFJ 286 above, but is a smaller more compact speaker mic. It works fine, and looks close to new. $15

Heil Wind Screen
This windscreen can be used with a variety of microphones, including the GM-5 above. Excellent condition. $10

Microphone Stands:

Regular round desk stand
Round 6 inch diameter heavy black base, with a 3 inch chrome tube coming up from the middle. Standard 5/8 inch threaded. $15

Rectangular desk stand
Approx 4 inch by 5 inch heavy black base, with a 2 1/2 inch chrome tube from the center. Standard 5/8 inch threaded. $15

Gooseneck Extension
Male connection on one end and female on the other, so it can be used as an extension. Standard 5/8 inch threaded. 7 inches long. $10

Cables for Heil (and other) Microphones:

Heil CC-1 XLR 4
3 pin XLR Male to 4 pin XLR Female $25

3 pin XLR to stripped and tinned ends
About 10 feet of quality rubber covered mic cable with a 3 pin XLR connector on one end, and nothing on the other end. Ideal to add your own connector. Can be used with the CC-1 XLR-4 above. $20

Heil round 8 pin connector to 8 pin modular connector for Icom
Not positive of the number, but it might be HSTA-IM or HSTA-706
$15

Microphone holders:

Electro Voice
Gray colored EV, designed to hold 5/8 to 3/4 inch diameter mics, and go into a stand with standard 5/8 inch threads. $5

Chrome Mic holder
Similar to EV holder, but chrome metal with a green felt on the inside to protect the mic. For 1/2 inch to 5/8 inch diameter microphones. Standard 5/8 inch threads. $5

Microphone Holder from a Kenwood MC-60 desk microphone
This is the black plastic (or is it bakelite ?) piece that attaches to the mic stand and holds the mic. It includes the chrome screw/bolt, and looks like new. Ideal if yours is broken. It probably is used on other mics as well. $10

Prices do not include shipping from Florida.

Thanks.

Hi all,

Ok, the first couple of lots got snapped up quick, (thanks for the biz) and I'm still looking for more lot purchases on good used/working equipment, this time specifically motorola waris gear, CDM/HT in VHF/UHF

If you have or know of any lots for sale, please respond with info, and email/model/pricing.
Please: You must provide valid and verifiable contact/address information.
No cells, no paypal money requests, WU, etc...

Thanks!
Randy

6212. FS: Uniden HR2510 10 meter radio

Yahoo group: ham4sale (2007 — 2015)
Date: 2011-02-06 15:45:46 UTC
From: John Geiger
Topic: 6212 Message: 6212

I have for sale a Uniden HR2510 10 meter monoband rig in very nice condition. This is the model that does 25 watts on 10 meter, and it comes with the mic, power cord, and mobile bracket. It would make a great stand alone 10 meter radio or an IF radio for VHF/UHF transverters.

I am asking $125 plus shipping and can take paypal/check/MO.

6214. FS: Kenwood TM-V7A dualband FM radio

Yahoo group: ham4sale (2007 — 2015)
Date: 2011-02-07 17:39:58 UTC
From: John Geiger
Topic: 6214 Message: 6214

I have for sale a Kenwood TM-7A 2m/70cm dualband, dual receive FM transceiver.
The dual receive capability makes it work very nicely for FM satellite use. It
also has a built in duplexer so you can run a dualband antenna with it into the
single SO239 on the rear. It does 45 watts on 2m and 35 watts on 70cm, has PL
tones built in, alphanumeric lables for the memory channels, and has 4
hypermemories for returning to a specific configuration at the push of a button.

It comes with the mic, power cord, mobile bracket, and original box. It does
not have the manual with it but you can find those on line. The display works
fine on it. There is one line that appears from time to time on the display but
it doesn't interfere with anything.

I am asking $199 plus shipping and can take paypal/check/MO.

Topic: 6218 Message: 6218

CLEGG FM-76 220-225 mhz mobile transceiver.

Outputs of 1w & 10w. Requires 12vdc.

Good cosmetic condition (some fading of Clegg logo),
appears to work OK. Includes CES tone pad mike.

Crystalled for: (1) 223.5/223.5, (2) 223.7/223.7, (3) 223.9/223.9,
(4) 222.3/223.9, (5) 223.14/224/74 and 223.34/224.94 mhz.

With fused power cable. Includes Original CLEGG Manual in good
condition with Original Schematic. Sold as-is due to age.

Asking $85. including standard shipping (some locations may be
extra).

From: vsmith57
Topic: 5098 Message: 6234

ICOM IC-2AT 2 meter HT. Functional with original antenna, belt clip,1 rebuilt BP-3 battery pack and original charger. Will include extra rebuildable battery pack and a Radio Shack brand speaker mike. Will ship in the original factory box (if I can find it).Battery charger cable may need replaced as the end is corroded, but charger output is fine. Unit still works great; kept it in my truck as a back-up for years.
E-mail for pics. $40 plus shipping from 46062. USPS money order only.

From: vsmith57
Topic: 6235 Message: 6235

ICOM IC-Q7A dual band HT. Disassembled. This is literally a parts radio. Antenna connector and antenna missing. Prior to disassembly, half of the display did not work. The radio did receive, program and scan. Prior to the antenna being snapped off, radio received, transmitted and otherwise functioned fine. Will include user manual, nicad charger(no batteries; uses 2 x AA), and a very used but working Yaesu MH-34 speaker mike.

Beyond my repair capabilities but just can't throw it away.

E-mail for pics. $10 plus shipping from 46062. USPS money order only.

Email: vsmith57@...

6252. FS: Yaesu FT450 HF/6m radio

Yahoo group: ham4sale (2007 — 2015)
Date: 2011-02-23 02:14:44 UTC
From: John Geiger
Topic: 6061 Message: 6252

I have for sale a Yaesu FT450 HF/6m rig which I bought new from Texas Towers back in November 2010. Has all of the new accessories with it (except for the manual but you can find this on-line) plus a carry handle which is an extra option. This rig comes with everything-IF DSP so you don't need to buy filters, built in CW memory keyer, built in voice keyer, built in voice synthesizer, and TCXO. It does not have the autotuner installed but that is no big deal because the autotuner isn't any good anyways.

It looks and works fine, and I will probably regret selling it but I just bought a rig with 2m and 70cm on it because I miss being on 2m SSB. It does have one quirk to it-about once a month or so the AGC "hangs up" on it reducing receive sensitivity. You just turn the radio off, turn it back on again, and it is good to go. I have heard from other FT450 owners who have had this same problem.

I am asking $499 for it plus shipping and packing charges.

From: G0JLX
Topic: 6254 Message: 6254

Hi Group,

I am on the lookout for a couple of reasonably-priced VX-4107e's or a couple of VX-4207e's (both UHF) for use with an emergency response unit in the UK. Programming is not an issue.

Ideally these will be based in UK or at least the EU to avoid shipping and other duties.

Please contact Andy, GØJLX if you have any FS. Thanks.

6255. FS: Kenwood TM-V7A dualband transceiver

Yahoo group: ham4sale (2007 — 2015)
Date: 2011-02-24 17:57:34 UTC
From: John Geiger
Topic: 6255 Message: 6255

I have for sale a Kenwood TM-7A 2m/70cm dualband, dual receive FM transceiver. The dual receive capability makes it work very nicely for FM satellite use.
It also has a built in duplexer so you can run a dualband antenna with it into
the single SO239 on the rear. It does 45 watts on 2m and 35 watts on 70cm, has
PL tones built in, alphanumeric lables for the memory channels, and has 4 hypermemories for returning to a specific configuration at the push of a button.

It comes with the mic, power cord, mobile bracket, and original box. It does not have the manual with it but you can find those on line. The display works fine on it. There is one line that appears from time to time on the display
but it doesn't interfere with anything.

I am asking $175 shipped or $170 for an inperson deal and can take paypal/check/MO.

FS: BC-939A for BC-610 & T-368 Antenna Tuner

*After two buyers delayed for 3 months between them I need this
beast out of my shack! LOWERED to $225. plus shipping.*

This is my last try to sell this intact, next try is parts.

Immediate payment required. No holds. No delays.

This military surplus classic matches the BC-610 and is often paired
with the T-368.

Pictures on request.

This is the model with dual vacuum variables. A solid tuner like no
other! Excellent condition (I have lots of pictures).

More info here:
http://eshop1.chem.buffalo.edu/BC-939.html
http://www.youtube.com/watch?v=ae1KQUYOctM
http://www.w1ujr.net/t368.htm

6260. WTB: 2 meter all mode or Icom 706 original

Yahoo group: ham4sale (2007 — 2015)
Date: 2011-02-25 20:18:24 UTC
From: John Geiger
Topic: 6260 Message: 6260

I am looking for a 2m all mode such as a Kenwood TS-711A, TR9130, TR751A, yaesu FT290RII, Icom 260, 271, 290, or an Icom 706 original at the right price. What do you have? Prefer to pay with PayPal and my account is verified and has a "confirmed" shipping address.
Tnx, John - AA5JG

6262. Wanted: Return Loss Bridge

Yahoo group: ham4sale (2007 — 2015)
Date: 2011-02-26 20:35:03 UTC
From: Charles Rader
Topic: 6262 Message: 6262

I am looking for a good Return Loss Bridge. Anyone have one they are wanting to part with? 50ohm and must at least cover 6 meters and 2 meters. Or homebrew plans would work too.

Thank you,
Charles (kc5dgc)

6265. Portable Antenna

Yahoo group: ham4sale (2007 — 2015)
Date: 2011-02-28 13:05:44 UTC
From: Van
Topic: 6265 Message: 6265

I would really like to have an all-band antenna (10 - 80 mtrs) to carry with me in my RV. It would need to be: Easily and quickly assembled; not large and bulky; cost less than $200; not a wire dipole (few RV parks have trees). If you have anything like this (or if you know about one) please let me know. WB5LAI

6266. WTB: Icom 706MKII or Icom 706

Yahoo group: ham4sale (2007 — 2015)
Date: 2011-02-28 19:53:26 UTC
From: John Geiger
Topic: 6266 Message: 6266

I am looking for an Icom 706MKII or Icom 706 original in good operating condition. Needs to have the mic and power cord with it. Any other accessories, boxes, and manuals are nice but not needed. I can pay with paypal or MO. Let me know if you have a spare around, and price shipped to Lawton, OK.

6267. FS: Drake TR-3 HF Transceiver

Yahoo group: ham4sale (2007 — 2015)
Date: 2011-02-28 16:38:06 UTC
From: doc@kd4e.com
Topic: 6267 Message: 6267

I have agreed to buy a T4X, which better suits the need,
so my Drake TR-3 80-10M transceiver is for sale.

Pictures here: http://kd4e.com/tr3.html

It is as-you-see-it and untested. (Note: I do have the
VFO cover.)

Asking $95. including shipping to standard USA addresses
(some locations may be extra).

Save on shipping - pay ahead and pick up at the APRIL 9th
SE-GA Tailgate in Savannah.

6270. Tait VHF repeater FS

Yahoo group: ham4sale (2007 — 2015)
Date: 2011-03-01 14:09:54 UTC
From: n4irs
Topic: 6270 Message: 6270

I have a used VHF Tait T83X Repeater on 156.xxx for sale.
128 channel EPROM programable.
It is in very good condition, tested and working.

It includes the following:

5U rack mount with speaker.
The receiver is T835-20 148-174 MHz wide bandwidth (25kHz) with CTCSS
The exciter is T837-20 148-174 MHz wide bandwidth (25kHz) with CTCSS
The Power Amp is T838-10 136-156 MHz 10 to 60W (typical) 50W continuous

I'm asking $350.00 OBO plus shipping.
MO or PayPal.

Thanks, Steve N4IRS

6271. SWAP: SWAN TV2 for TV6 or other 6M Transverter

6272. Galaxy Saturn 10 meter base station, awesome radio.

Yahoo group: ham4sale (2007 — 2015)
Date: 2011-03-02 02:56:30 UTC
From: grippynseattle
Topic: 6272 Message: 6272

The base station has 271 channels, 5 bands, frequency 25.615thru 29.500 mhz ham 10 meter band.
This is the deluxe base station transceiver, full channels AM-FM-SSB-CW, am-fm-10watts, ssb 21watts, with roger beep,echo and frequency
counter it has original owners manual. I will even throw in the Galaxy Saturn Service/Owners manual book. I have the original receipt that I will include with the radio. Comes with stock mic and a list of channel numbers and corresponding frequencies. This unit also allows you to adjust to frequencies between channels. This unit has not been modified from its original setup, it has not been "peaked or tuned" (modified), it is in form the factory condition. This is really a great unit and I am sad to see it go. I will sell it for $350 plus shipping. I will accept PayPal payments, cash or check. If you decide to send cash or check I will need to wait until I receive the cash or the check clears before shipping.If you would like to see pic of the unit or ask any questions, please feel free to email me at grippynseattle@... I am a licensed ham radio operator and will be happy to provide you my phone number so we can discuss this radio if you desire.

FS: BC-939A for BC-610 & T-368 Antenna Tuner

Latest would-be buyer bailed ... sigh. Reduced again ...

$175. plus shipping OR will consider offers for parts.

This military surplus classic matches the BC-610 and is often paired
with the T-368.

Pictures on request.

This is the model with dual vacuum variables. A solid tuner like no
other! Excellent condition (I have lots of pictures).

6278. FS: Potentiometers & Power Resistors

Yahoo group: ham4sale (2007 — 2015)
Date: 2011-03-03 17:40:38 UTC
From: Radio WC6W
Topic: 3250 Message: 6278

*** Potentiometers NOS ***

Linear taper unless otherwise noted

25 ohms, Clarostat 3/4" diameter metal cased PC mount trimmer. $2 ea.

50 ohms, Clarostat 3/4" diameter metal cased PC mount trimmer. $2 ea.

75 ohms, .58 amps, Ohmite LH, 1.5" dia., 3/8" bushing, 1/2" long 1/4" shaft. $10

100 ohms, Clarostat 3/4" diameter metal cased PC mount trimmer. $2 (one only)

100 ohms, Clovern CLR2239/22S, 1-5/8" dia., 3/8" bushing, 1" long 1/4" dia. shaft -- $5

500 ohms, 25W, Dejur, 1.75" dia. 3/8" bushing, 5/8" long 1/4" dia. shaft. $10

1K ohms, .9" dia., 3/8" bushing, 1-1/2" long 1/4" shaft. $2 ea

7.5K ohms, .9" dia., horizontal PC mount trimmers. $1 ea

10K Bourns 3862C, 1/2" dia., 1/4" bushing trimmers. $2 ea

10K ohms, .9" dia., 3/8" bushing, 3/4" long 1/4" plastic shaft which also pulls to operate rear mounted DPDT switch. $5 ea

15K Alps audio taper, 5/8" dia., .43" bushing, 3/4" long 3/16" shaft, w/3A switch. $4 ea

15K Ohmite Type E 7/8" dia., 10 watt, 1/4" bushing screw adj. $10

250K CTS Vertical PC mount trimmers -- 4/$1

20M (5W?) IRC Type 69 2" dia., 3/8" bushing, 1/2" long 1/4" shaft, 2 available -- $10 ea.

NOS Allen-Bradley Type J assortment

Values from 50 ohms to 1000 Meghoms. Mostly linear taper, some log & audio, a few reverse log. Mostly 1/2" shafts, a few are longer. A few duals, pads, dual concentric, triples, & some with switches. Typically 5-10 pieces of each value, with a few single exemplars.

Approximately 150 different types / way over 1000 pieces total. $2500

*** Used Resistors ***

8.5 ohm Clarostat 20 watt? pot, 1-1/2" dia. 3/8" bushing, 1/4" dia shaft 1/2" long - $5

10 ohm, 100 ohm, 1K ohm -- Clarostat 58C1, 3W pots, S taper -- $3 ea.

60 ohm Ward Leonard 20 watt?, 2 terminal rheostat, 1-1/2" dia. 3/8" bushing, screw adj. - $5

65 ohm Ohmite Type J pot, 50 watt, 2-1/4" dia., 3/8" bushing, 1/4" dia shaft 1/2" long - $10

1.5K Two 200W (or so -- 10" long) 1.5K ohm 10 tap (every 150 ohms) power resistors. $10 pair

1.5K Dale, 225 Watt power resistors. $15 for all three

2K Ohmite, 225 Watt power resistors w/mounting clips -- $6 ea or 4 for $20 (10 left)

3K Ohmite, 225 Watt power resistors w/mounting clips -- $6 ea or 4 for $20 (8 left)

3.5K ohm, Ohmite Type H pot, 25 watt, 1-9/16" dia., 3/8" bushing, 1/4" dia shaft 1/2" long - $7

500K ohm Carter Radio rheostat with 2" diameter skirted knob, calibrated 0-100 over 270 degrees -- $5

Carborundum -- type SP resistors -- $10 each
30 watt parts (2.5" long) 75 ohms

100 watt parts (6" long) 1 ohm

The numbers have partially worn off some of these units so, some of the above numbers are measured values.

125+ used Potentiometers

Good assortment from 10 ohms to 2.5M. 50 or so Allen-Bradley Type J's, mostly 3/8" bushings with approx. 1/2" long, 1/4" dia. shafts on the rotary parts, a few are longer. A few duals, a few with switches, perhaps 25 trimmers, mostly metal cased except for about 15 sliders. A few appear to be unused. $50 all.

More parts for sale may be seen here:

http://qsl.net/wc6w/wc6wfsw/index.html

Alert!!

Microsoft IE8 or IE9 may not properly display my webpage. Surely Billy G. is hard at work on a fix.

Until then, if you are running one of the above browsers, it may help if you click on the "Tools" menu and select "Compatibility Settings". Then check the "Display all websites in compatibility view" box.

Firefox & Chrome displays it fine, as does IE6 & IE7.

73 & Good morning,
Marv WC6W

Nick, KC8BQS

6281. DRAKE AC-3 or AC-4 Power Supply

Yahoo group: ham4sale (2007 — 2015)
Date: 2011-03-05 02:09:11 UTC
From: doc@kd4e.com
Topic: 6281 Message: 6281

I need a working DRAKE AC-3 or AC-4 Power Supply for my T4X.
Cosmetics less important then the integrity of the PS.
Please state your asking price, including shipping to GA 31321.

Good morning group..

I have up forsale the following:

1-Tait T-800 Slim line repeater. VHF TX puts out 20 watts. RX is at .3 uV sen. Repeater is in great shape. And is eprom programable. They have aftermarket CTCSS Boards in them.

19" Rack mount

Looking for 300.00 obo

1-DX RPT Module VHF TX 15 watts out. And is computer programable.
Good Shape.

Looking for 250.00 obo

1-DX RPT Module VHF RX .25 uV sen. And is computer programable
Good Shape.

Looking for 250.00 obo

1-DX RPT Module UHF TX 15 watts out. And is computer programable.
Good Shape

Looking for 250.00 obo

1-DX RPT Module UHF RX about .25 uV sen. And is computer programable.

Looking for 250.00 obo

(I would incuded service manauls for the RPT equipment)

1-TX/RX 4 can VARI-Notch Duplexer 19" Rack mount VHF

Looking for 300.00 obo

1-KW TK-8180 Moblie Radio UHF. Radio is in great shape. Would come with PWR Cord , Mounting bracket and HD Mic

Looking for 300.00 obo

1-KW TK-7180 Moblie Radio VHF. Radio is NEW. Comes with PWR Cord, Mounting bracket, and HD Mic.

Looking for 300.00 obo

1-KW TK-790 Moblie Radio VHF is Stan Head.Type 2 Comes with PWR Cord, Mounting bracket and HD Mic.

Looking for 225.00 obo

I am open to offers all of the above equipment.

Shipping would be free if you buy more than one item.

Im in OH.

Please buy with ease.. I have been a two-way tech for over 15 years and in HAM Radio for 16.

Please email me me off list. And you have any questions please ask.

Thx

FS: SWAN TV2 2M Transverter

1960's era 100 watt output 2 meter transverter.

Uses 6, 10, 15 or 20 meters for input, depending on the crystals
installed (currently set for a 6m IF).

Covers the whole 2 meter band. CW or SSB.

Low noise Nuvistor-cascade receive converter.

Pictures here: http://kd4e.com/tv2.html

Asking $95. plus the actual cost to ship.

6286. FS: Motorola manuals

Yahoo group: ham4sale (2007 — 2015)
Date: 2011-03-06 21:01:13 UTC
From: Tom B
Topic: 6286 Message: 6286

Hello All,

I have for sale a box of Motorola manuals. It contains the following:

2 Micor UHF
Syntor (original) VHF
2 Micor Low Band
Micor VHF
T1617 remote console
T1375 Remote
T1600 Remote
Micor Compa station control applications manual.
7 really old CCTV manuals

I want to sell the lot. I don't have time to sell individually. The price is $25 plus shipping for the lot. Shipping weight is about 26 lbs from 20904.
Local pickup is also an option.

6287. Trade Laptop toward FT-450AT or 600w Solid State Amp

Yahoo group: ham4sale (2007 — 2015)
Date: 2011-03-06 21:24:31 UTC
From: doc@kd4e.com
Topic: 6287 Message: 6287

For trade toward a FT-450AT or a 600w solid state HF amp.

FS: ACER Aspire 5535-5452 Laptop
* AMD Athlon X2 QL-64 2.1GHz Dual-Core
* 3GB DDR2 RAM
* 320GB Hard Disk Drive
* Double Layer DVD-RW
* 15.6-Inch WXGA display, Vista Home Premium

More Detail:
http://www.usanotebook.com/2820-AAS5535-5452_acer_aspire_5535-5452.php

Full disclosure: Runs hot in Linux when streaming video, I have cleaned the cooling fan and replaced the heat sink compound, it may be a driver-conflict problem causing things to work too hard. I have tried several versions and gave up. I never use any MS versions of windows so I have not tried that. It was 449 new.

Asking $295. including standard shipping USA (some locations may be extra) - or trade toward a FT-450AT or a 600w solid state HF amp.

6288. FS: Drake MN-2700 160-10M Full-Legal Tuner

Yahoo group: ham4sale (2007 — 2015)
Date: 2011-03-07 01:57:40 UTC
From: doc@kd4e.com
Topic: 6288 Message: 6288

FS: Drake MN-2700 160-10M Full-Legal Tuner

Works OK except some odd behavior on some bands that I attribute to
dirty slider switches.

Includes the Original Drake Manual.

Pictures here: http://kd4e.com/mn2700.html

Asking $275. including standard USA shipping (some locations may be extra)

DRAKE MN-2700 FEATURES

bullet 160 thru 10 Meters Frequency Coverage-With out-of-band coverage
for MARS, future band expansions and other applications.
bullet Antenna Choice-Matches antennas fed with coax, balanced line, or
random wire. (For balanced line use optional Drake B-1000 Balun, which
mounts on rear panel of MN-2700.)
bullet Antenna By-pass Switching-Unique design allows unit to be
switch-by-passed regardless of which antenna is in use, whether coax or
wire type. No need to manually disconnect feedlines. Switch also selects
various antennas.
bullet Extra Harmonic Reduction to help fight TVI-Drake Matching
Networks employ special "pi-network" low-pass filter type circuitry for
maximum harmonic rejection. This feature alone makes the MN-2700 a
worthwhile investment; it is a Drake exclusive.
bullet Built-in Metering-Accurate rf wattmeter/VSWR bridge is pushbutton
controlled from front panel
Power Capability-2000 watts PEP, 1000 watts average. Continuous Duty.
bullet 13.09"W x 4.53"H x 13"D including connectors (33.26 x 11.5 x 33 cm);
bullet Weight 11 Ibs. (5 kg).

Firefox & Chrome displays it fine, as does IE6 & IE7.

*** Time Meters ***

Hobbs 120 VAC 60Hz 99999.99 (Yes, displays down to 100th's!) Hour running time meters about 1" high by 2" wide rectangular with triangular shaped mounting ears. New $20 ea

A.W. Haydon miniature 10000 Hour running time meter. Case is about 1/2"square (exclsive of mounting flange) by 1" deep. 115VAC 400Hz NOS $10

Elgin 1000 Hour running time meter. Case is about 5/8" round by 1.5" deep. 115VAC 400Hz Unused $8

*** RF Ammeters -- Thermocouple type ***

GE DW-44, 4 Amp, 2-1/2" round -- NEW in box, $50 pair

Westinghouse NT-33, 9 Amp, 2-1/2" round -- used, $15

Westinghouse NT-33, 5 Amp, 2-1/2" round -- used, $15

Westinghouse OT-33, 3 Amp, 2-1/2" round -- used, $15

Westinghouse NT-33, .25 Amp movement - 5 amp scale, 2-1/2" round -- used, $30 pair

Weston Model 507, 3 Amp, 2-1/2" round -- used, $15

*** Digital Meters ***

Datel
DM-3100N 3.5 Digit LED volt meter w/ 1/2" high LED's. Front bezel is 1.25" high x 2.875" wide. Meter is 4" deep.
Used, checked OK. $20 ea.

New in Box. $35 ea.

Integra Microwave
A210305 4.5 Digit LED volt meter w/ .3" high LED's. Front bezel is 1.25" high x 2.875" wide. Meter is 4" deep. RFE $20 ea

Non-Linear Systems
PM4 10 volt 4.5 Digit LED volt meter w/ .3" high LED's. Front bezel is .9" high x 2.875" wide. Meter is 3-3/4" deep including PCB edge connector. RFE $20

*** Cole Instrument Meters ***

Center zero, 3" square panel meter, 10-0-10 microamp scale & movement. Two available. -- $25 ea

---

*** General Electric Meters ***

** NEW in box -- $15 ea **

251-1 -- 2.25" center zero rectangular panel meter 10-0-10 Volt scale & movement. Two available.

251-1 -- 2.25" center zero rectangular panel meter 5-0-5 Volt scale & movement.

Part no. 50-283013MTMT1 3" thin edgewise panel meter 10V scale. New in an old box

** Used -- $10 ea **

DW-91 -- 2.5" center zero square panel meter 1-0-1 Amp scale & movement.

50-162111LALA2 -- 3.5" square panel meter, 10 Amp scale & movement. 2 available

DO-41 -- 3.5" round panel meter, 1 Milliamp scale & movement.

** Used -- $15 pair **

DO-53 pair of 3+" meters 2A/1V FS One is a 2A scale and movement & The second is a 1 volt meter with a triple scale -- 25 mA, 250 mA, 500 mA for use with external shunts. There is a small crack in the right side of the bakelite front of this second meter which could be filled in with black filler. The glass is fine.

*** Simpson Meters ***

** NEW in box -- $20 ea **

Model 1247 -- approx 2+" square front, 2+" mounting hole -- 50 Volts AC

Model 1257-- approx 2+" square front, 2+" mounting hole -- 10 Volts AC

** Used -- $10 ea **

Model 1327 -- approx 3.25" square front, 2.75" mounting hole -- 2 Amps DC

Model 1521 -- 1.5" edgewise panel meter 1 Milliampere movement -- scale is marked "M" at the left, "O" in the center and "S" on the right.

*** Triplett Meters ***

** Used -- $10 ea **

327-T 10 Amps 3" square. 2 available

220G 50 Volts DC 2-3/4" rectangular

*** Westinghouse Meters ***

3" Round NX-35 series meters

New Old Stock -- $20 ea

50 mA
500 mA

Used -- $15 ea

2 Amps
300 VDC

Used -- $10 ea

1 mA
15 VDC
20VAC

3" Square RX-35 series meters

Ohms -- Marked from 500 to 0 left to right. 70 uA intrinsic movement.
1 mA / 10 mA Dual input terminals / Dual scale markings
25 mA / 250 mA /500 mA triple marked scale -- 15 mA basic movement
300 mA

2" Round NX-33 series meters:

5 Milliamperes, with additional mark at 3 tick for 3 volts

*** Weston Meters ***

** NEW in box -- $20 ea **

Model 7521 -- 2+" x 2-3/8" rectangular front, 150 Volts DC

Model 7522 -- 2+" x 2-3/8" rectangular front, 300 Volts AC

** Used **

Model 301 3" square 3A RF Ammeter (requires an external thermocouple which I don't have). 60 mA movement.-- $5

Model 301 3" round 5 Amp scale, 16 mA movement -- $10

*** New Meters -- $20 ea ***

Alps Keiki SU-55 series 3.4" x 2.4" rectangular NIB

15V DC
3A DC

Lambda 1.75" square

10A scale (made by Honeywell)
40 VDC (made by GE)

*** New Meters -- $15 ea ***

Hewlett Packard

DBM meter HP part number 1120-0037. This unit was actually made by Simpson -- -6 to +3 scale, 2+" round. NOS.

*** Japanese meters ***

Teac lighted VU meter pair -- used
Approx 2.75" high by 3.125" wide each, mounted to a subchassis, obviously removed from an old tape recorder -- $30.

No manufacturer shown
MRA-38 500uA DC 1.7" square used -- $6
MRA-38 500uA DC 1.7" square new -- $10

KEW Electric dual scale 32V / 1.5A meter (1mA movement) 1.9 x 1.6 rectangular -- Used $5

No manufacturer shown -- Small (1-3/16" wide x 9/16 hi" -- rear a mite larger) lighted, edgewise S / Power meters, NOS -- $7 each

No manufacturer shown -- Small (1-7/8" wide x 15/16 hi" -- rear a mite smaller) lighted, edgewise S / Power meters, NOS -- $8 each

No manufacturer shown -- Small (11/16" x 1 3/16") poorly designed vertical edgewise S meters, unshielded, orientation sensitive, one new & one used. -- $5 both.

General Radiotelephone Co. -- Small (1-11/16 square) lighted, S meter plus 0-5 & 0-10 scales, bezel a bit scratched & a small crack in the lower right -- $3

No manufacturer shown. -- 2-1/2" square S meter plus 1-10 scale, NOS --$10

No manufacturer shown -- Small (1-3/8" wide x 1-1/4" hi") VU meters. Scale is on lower portion of meter / movement on top. NOS -- $6 each

7554 Pencil tube pull $5
7843 pulls $10 ea or... 3 for $25

*** Tube Sockets and Accessories***

Eimac -- Databook set circa 1985 in two large yellow Eimac 3 ring binders. Includes data sheets from 1976 edition and earlier. Both binders are stuffed to the max! Very good condition. $200

Acorn tube 5 pin ceramic sockets. NOS -- $5 ea

Birnbach 434 "50 watt" socket. Base is cracked clean through adjacent to opposite contacts, not noticeable from the top. Still quite useable as-is, or glue it. $8

Coaxial Planar Tube -- shielded heater/cathode contact assembly. Fits 2C39, 3CX100A5 or similar. Silver plated, NOS -- $10 each

Collins -- 22 assorted tube shields, 7 & 9 pin, short & tall. RFE. $20 all

Eimac SK-620 sockets, "unused" pair. One is a SK-620; the other a SK-620A. Probably 40 years old, a bit tarnished from storage, and unused except the heater pins on one were once soldered... probably to check some tubes. $60 for the pair.

Eimac 3" (or so) diameter Grid lead contact & 6" wire to lug as used on 3CX2500, 3CX3000, leaded versions etc. $5 pair

Johnson 122-101 ceramic 7 pin septar socket (accepts 826, 832, 4D32, PL6549, PL6569, etc). These were likely a special order as they have the standard ground shield but, no ground clips. NOS though, a bit dusty & tarnished from long storage -- $10ea

Johnson 122-237 ceramic 7 pin giant socket for 813, etc. NOS, $15

Johnson 122-237 ceramic 7 pin giant socket for 813, etc. Used, $10

Johnson 122-247A or 122-248 ceramic 7 pin septar socket (accepts 7094, 8877, 832A, etc.) Used, $10

Johnson 124-115-2 UHF socket similar to Eimac SK-620. NOS, but, a mite tarnished from age. $40

Millen 36001 or National SPP-9 -- 9/16" Ceramic Plate Caps (fit 813 or similar) Used. Your choice, $3 ea

6 inch plate leads with National medium (.566") clips on one end; solder lugs on the other. The leads are covered with 16 each 5/16" diam. ceramic insulators. $5 pair

Pomona Electronics TVS-7 & TVS-9 test extender sockets for 7 & 9 pin miniature tubes. Little used. $40 both.

4 Pin Octal size female cable connector with hood. Used -- $3

6 Pin Octal size female cable connector with hood. NOS -- $5

Completely shielded Amphenol Octal (8 pin) M&F pair cable connector pair. Screw on coupling. NOS -- $20

9 pin Octal size socket, round (may be used on cable or chassis). NOS -- $7

11 pin Octal size plugs. Amphenol 86-CP11 or similar. New -- $5 ea.

11 pin Octal size plugs. Amphenol 86-CP11 or similar. Used -- $3 ea.

11 pin Octal size sockets, round (may be used on cable or chassis). Used -- $3 ea.

11 pin Octal size sockets, chassis mount w/ears. NOS -- $7 ea

11 pin Octal size M&F pair cable connectors with hoods. NOS -- $15

Completely shielded Amphenol 11 pin Octal size M cable & F chassis connector pair. Screw on coupling. NOS -- $25

IERC Heat Dissipating tube shield, size T12. $10

IERC Heat Dissipating tube shields, sizes include:

TR5-5015 (short 7 pin)
TR5-5020 (medium 7 pin)
TR5-5025 (tall 7 pin)
TR6-6015 (short 9 pin)
TR6-6020 (medium 9 pin)
TR6-6025 (tall 9 pin)
20 pieces total -- $30

6293. Military radio items for sale

Yahoo group: ham4sale (2007 — 2015)
Date: 2011-03-10 12:46:25 UTC
From: BobS
Topic: 6293 Message: 6293

Hi, All,

In anticipation of moving to a much smaller property, I having a major (and hopefully one-off) clearance of many military radio items, mostly of "Larkspur" vintage, but a few earlier and some of "Clansman" vintage but not specifically from the Clansman range. All are located in the UK, and rather than post the huge list here it may be better if anyone interested mails me off-list.

Please note that some items may be subject to the export restrictions on military items from the UK.

regards,

Bob, G8IYK

6294. FS: TEMPO AC/one Power Supply & Speaker Console

Yahoo group: ham4sale (2007 — 2015)

TEMPO AC/one Power Supply& Speaker Console

Matches TEMPO One and FP-200 - Should work with many other
boatanchor rigs.

(Specs: 600v, 300v, 150v, -100v, 12.6v. Can send some docs.)

ASKING $85. including standard USA shipping

They are asking 89. here, plus shipping:

6306. WANTED: 160-10M TX RF Section

Yahoo group: ham4sale (2007 — 2015)
Date: 2011-03-16 02:08:11 UTC
From: doc@kd4e.com
Topic: 6306 Message: 6306

Too many projects here, I will never get around to building
the 160-10m RF output section I need.

I am looking for a RF section that uses a pair of 6146's or
a common TX tube equivalent.

Prefer 100w output, 50-75 is OK. If the tubes are not 6146's
they must be good through 6m (should I later wish to attempt
a mod).

It also needs to include a no-solid-state-components power
supply, preferably external, but integrated also OK.

Compact, both the RF deck and the PS, is good.

A damaged transmitter with an intact RF output section is
an option.

I would strongly prefer to work a trade rather than cash.

Recommendations as to what RF decks I should look for are
also welcomed.

6307. Re: WANTED: 160-10M TX RF Section - HW-100/101

Yahoo group: ham4sale (2007 — 2015)
Date: 2011-03-16 03:46:08 UTC
From: doc@kd4e.com
Topic: 6307 Message: 6307

The "winner" appears to be a needs-work HW-101.

It should be the most affordable, since the original was
inexpensive and they sold a ton of them.

I will have to modified it for 160m.

And there just happens to be a new local Tailgate here in the
Savannah area April 9th.

If I don't find one there I will be back here looking ...

Thanks everyone!

6309. FS: Capacitors - Variable, Vacuum, Mica, Ceramic, Electrolytic

Yahoo group: ham4sale (2007 — 2015)
Date: 2011-03-18 17:38:34 UTC
From: Radio WC6W
Topic: 6309 Message: 6309

A more cleanly formatted listing with some pictures may be seen at:

http://qsl.net/wc6w/wc6wfsw/index.html?fr34.html

Alert!!

Microsoft IE8 or IE9 may not properly display my webpage.

It may help if you click on the "Tools" menu and select "Compatibility Settings". Then check the "Display all websites in compatibility view" box.

Firefox & Chrome displays it fine, as does IE6 & IE7.

*** Vacuum Capacitors & other Vacuum things ***

Jennings Vacuum Variables -- all used (or at least aged)

CVCJ-1000-5S 1000pF 5KV -- $150 with standard puller

CVEP-1000 1000pF 20KV -- $250 with standard puller (My Hipot only goes to 15KV so that is the max. I could test this one)

Collins 622-0193-001 low profile motor drive assembly with limit switches for a Jennings CMV1-4000 vacuum cap. $40

Fixed vacuum caps

Jennings VC-12 12pF 20KV -- $20
Jennings 50pF 86KV -- $86

Western Elec 50pF 5KV -- $15

Vacuum Switch & Relay
Struthers Dunn Type 78CCA109 "Keying Relay" which consists of a vacuum relay mounted on top of a small (2"x3"x4") metal enclosure. There is a 15 pin Jones connector on the side of the box. I believe that there are some auxiliary contacts in the box in addition to the vacuum relay. 28VDC. $15

Jennings R1G SPST 20KV 20Amp Vacuum Switch; no solenoid -- $25

*** Air Variable Capacitors ***

Bud Two Section variable capacitor, 75pF (measured) per section max. Balanced rotor construction. .025" air gap, approx. 4" x 1-3/4" x 1-3/4" overall. Used, good condition -- $15

Cardwell -- EU-140-AU, Two section variable cap., 140pF / section, .020 air gap, 1-7/16" square by 4-1/2" deep, 1/4" dia. shaft. NOS -- $20

Cardwell -- XR-1000PS, 1000 pF max. capacitance. .030 air gap. About 4.5" x 4" x 3.5" overall including plate travel. Used, Good condition, except that the shaft has been cut down to extend only 1/2" beyond bushing. $20 ea.

Cardwell -- XR-1000HS (about 950pF max measured) These have slightly contoured plates for improved tuning resolution at minimum C. .030 air gap. About 4.5" x 4" x 3.5" overall including plate travel. Used, Good condition. $20 ea.

Cardwell -- 30-900pF (measured) (XR-900PS? -- 4 fewer plates than an XR-1000) .030 air gap. About 4.5" x 4" x 3.5" overall including plate travel and mounting ears. Used, Good condition. Last one, $20

Cardwell -- Differential capacitor 30-600pF (measured) each side .030 air gap. About 4" x 3.5" x 3" overall; Used, Excellent condition. Just one, $30

General Electric Two Section capacitor, 150pF (measured) per section max. Balanced rotor construction. .040" air gap, approx. 6" x 2" x 2" overall. Used, good condition -- $20

Hammurlund -- MC-100S with two fixed plates and 3 variable plates removed to make a 70pF maximum part. Used. $2

Hammurlund -- Type RMC (I think) with 3-1 reduction drive. 60pF max. (measured). Approx. 1-3/4" x 1-3/ 4" x 3 long overall including shaft. Used. $5

Johnson T9-5 miniature vertical PC mount trimmers 1.9-15.7 pF, Silver Plated machined plates -- NOS $1 ea.

National Type TMC-300, 300pF variable capacitor, .070" air gap, approx. 8" x 4" x 2.5" with plates closed. Nice n' shiny like new! -- $40

National Type 30D, 30pF Dual variable capacitor, approx. 3" x 2.5" x 4" overall including shaft. Used, good condition. $5

Poly varicon 4 Section miniature capacitor. 35pF / 35pF / 100pF / 160pF measured max. with trimmers for each section. Approx. 7/8" x 7/8" x 1" deep overall. NOS $5 ea or 5 for $20.

Remler -- "Butterfly" variables.
Type 630 350pF $25
Type 631 500pF $25

TRW 15-90pF (measured) Air Variable, .060 gap, ball bearing shaft, very stoutly built -- $20

4 Section capacitor 20-550 pF (measured) per section large receiving style capacitor. .010 air gap. 7" x 3-1/2" x 3" overall. 1/4" diameter shaft. Clockwise rotation for capacity increase. A mite tarnished from age; Otherwise, like new. $25

4 Section capacitor 20-250 pF (measured) per section large receiving style capacitor. .020 air gap. 5-1/2" x 3-1/2" x 3" overall. 3/8" diameter shaft. Counter-clockwise rotation for capacity increase. A mite tarnished from age; Otherwise, like new. Two available. $20

5 Section capacitor 400 pF (measured) per section large receiving style capacitor with individually insulated rotor and stator sections. .010 air gap. 6" x 3-1/4" x 2-3/4" overall. 3/8" diameter shaft. Clockwise rotation for capacity increase. Used, just mite tarnished from age; $40

*** Mica & Ceramic caps ***

Centralab 857-25Z Ceramic 25pF NPO 15,000 volts. NIB $20.

850 Series Ceramics
47pF N750 -- not sure if these are 5 or 7.5 KV rated -- $5 ea

Used old "Brown" Micas
Aerovox, Cornell Dubilier, Polymet, Sangamo, Solar, Sprague -- CM45 style or similar -- $2 ea or $30 all

Topic: 6310 Message: 6310

Hello,

Heathkit: Im looking for a good SB-104A or SB-104 "G" and "D" boards. Might also buy others.

Drake: Have a nice MS-4 or MS-3 speaker that is missing the glue on nameplate. Looking for replacement or repro name plate.

Thanks,

Craig

Let's try this again:

I have for sale or trade:

1) Realistic TRC-457 SSB/AM radio (convertible to 10 meters) $125.00

2) Realistic Pro-2002 50 Channel scanner $50.00

3) White Tornado 225 amplifier $150.00

4) RCA Co-Pilot 40 channel AM CB radio (Convertible to 10 meters) $75.00

5) Yaesu SP-901P External speaker with phone patch, for older Rigs like FT101 etc.. $65.00

6) 2 Telefunken 6 meter FM radios with mobile brackets, power cables and external speakers and microphones,52.525 calling frequency installed $60.00 for the pair

7) 2 Motorola MT-1000's with leather case and battery charger,VHF,16 channels $100.00/Pair

8) PK-232 MBX TNC with manual and cables $225.00

All items do not include shipping charges..

I do have a Elecraft K1 with wood panels and wood grain front on tuning knob, 80/40 band module in rig now, have second board unbuilt for choice of 2 other bands. Radio is in mint shape. No tuner or filters installed. $350.00 or trade for FT-817 or ICOM-703.

Pictures are available of all products.

6312. FS: British radios in USA

Yahoo group: ham4sale (2007 — 2015)
Date: 2011-03-19 18:43:09 UTC
From: Tom B
Topic: 6312 Message: 6312

Hello All,

First - these are for pickup only in Silver Spring, MD or I can deliver to the Timonium hamfest next weekend.

I have for sale several British radios.

1. WW2 R1132A VHF receiver. This is a 220V AC powered ground receiver, covering 100-125MHz. It comes with the original power supply and interconnect cables. It is being sold AS-IS. Price is $150.

2. WW2 R208 receiver. This is a AC or 6V DC powered set, covering 10-60 MHz. It comes with an additional R110 receiver chassis which is almost identical but does not have the case. It is being sold AS-IS. Price is $150 for both pieces.

3. Larkspur B44 transceiver. This is a DC powered VHF AM transceiver, covering 60-95 MHz, crystal controlled. I only have the RT, no accessories. It is being sold AS-IS. Price is $100.

4. WW2 Wavemeter Type W1310. I think this covers 150-220 MHz. There is no case, but I think it is all there otherwise. Good for parts or whatever. It is being sold AS-IS. Price is $25.

Looking for working scanner antenna for broadband reception (digital television, GMRS). Must be capable of transmitting on UHF (440-450 MHz). Discone type OK. Plan on applying for OTARD exemption with my condo Board.

Please quote make, model, asking price, your location and attach pic.

From: doc@kd4e.com
Topic: 6317 Message: 6317

Parting Out - Heathkit SB-400 chassis:

No case, faceplace, or power transformer.

The rest is mostly there:

VFO, most tubes, RF final section w/cage,
osc-drive section, two black and one silver
tube shield, dial light sockets, etc.

Also, crystals on board fragment marked "85-132-1"
& "28 21 28.5 29 29.5" and individually labeled:

36.99500
29.89580
37.39500
37.89500
38.39500

Prefer to sell entire assembly for $55. shipped to std.
USA addresses (some may be a little extra) but will sell
parts. Please make a reasonable offer and give this a
new home.

FS: Spring Cleaning - Boatanchors

Too many family, farm, and house projects demanding attention,
no time for the boatanchors for now.

Reasonable offers for gear, especially for all of it, are welcomed.

Pictures here: http://kd4e.com/fr.html

Pierson KE-93 160-6m + BC Receiver w/matching PS.
(Compact mobile tube receiver w/BFO, AM, CW, SSB.
Includes manual and schematic copies. Hard to find set.)

Asking $185. plus cost to ship.

WRL Meteor SB-175 80-10m DSB Transmitter w/matching
Multi-Pak PSA-63 PS. (175w CW, 100w AM, 140w DSB,
includes manual and schematic copies. Hard to find set.)

Asking $165. plus cost to ship.

P&H Electronics 2-150 20m - 2m Transmitting Converter
w/built-in PS. (175w PEP SSB, i65w CW, 90w linear AM,
copper chassis, heavy-duty construction, very unique.)

Asking $125. plus cost to ship.

Also available for Pick-Up at April 9th Tailgate in Savannah.

(NOTE: I will not separate the PS from the rigs unless the
matching rig has been sold first.)

I am looking for a VHF-UHF Diplexer in good working condition. Prefer Diamond MX-72D or Maldol HS-790D or MFJ-916 or anything similar. Please email me what you have and the price. Will buy one or two. 73's Raj

6325. Transceivers, Power Supplies, Mics, DSP FS

Yahoo group: ham4sale (2007 — 2015)
Date: 2011-03-25 12:58:04 UTC
From: Ken Simpson, W8EK
Topic: 6325 Message: 6325

Several Transceivers, Power Supplies, Desk Microphones,
and DSP Filter For Sale:

Icom IC-746 Pro, 160 thru 2 meter Multi mode transceiver:

The Icom IC-746 Pro covers 160-10 meters plus 6 and 2 meters
all mode. 100 Watts of output is available on all bands - HF,
50 MHz and 144 MHz, making the IC-746 Pro a practical choice
for all-around base station use. The die-cast aluminum chassis
and a large cooling fan help to stabilize the PA circuit,
providing 100% full duty cycle operation. The new Pro version
features 32 bit floating point DSP and 24-bit AD/DA converter.
There are NO more expensive optional filters to buy. The
digital IF filter allows one to select 51 filter bandwidths.
There are three user selectable filter memories per mode.
Soft and sharp filter shapes can be selected in both SSB and
CW modes independently. You can also change the settings on
the fly and compare! For repeater operation theres is a
built-in tone encoder and decoder with 50 CTCSS and 108
DTCS based tones. There is even a built-in Baudot RTTY
demodulator.

It has 100 alphanumeric memories, digital RF speech
compression, spectrum display, Manual and Automatic Notch,
digital Twin PBT, Noise Blanker, CTCSS encode/decode, APF,
two stage preamp, automatic antenna tuner and electronic
keyer. A built-in automatic antenna tuner operates on the
HF bands plus 6 meters. The 746 Pro requires 12 VDC at 23
amps. It is 11.3 x 4.8 x 12.5 inches in size and weighs
20 Lbs. See the May 2002 issue of QST for a review of
this radio.

Features
* Spectrum Scope
* 102 Memories
* RIT/XIT
* Digital Noise Reduction
* Manual and Automatic Notch
* Digital Twin PBT
* Dual Display
* 100 Watt Output
* 40 Watt Output (AM)
* Digital RF Speech Compressor
* Microphone Equalizer
* Monitor Transmit Audio
* SWR Plotting

* Built-in Automatic Antenna Tuner 180-6 Meters
* Full Break-In CW
* SSB/CW Synchronous Tuning
* 100% Duty Cycle
* Rx Antenna Jack
* 32 bit DSP
* 1 Hz Readout
* 4 Channel Memory Keyer
* RF Attenuator 6/12/18 dB
* RTTY Demodulator
* CW Pitch and CW Reverse
* Adjustable Transmit Bandwith
* Triple Band Stack Registers

This one works 100% as best I can tell, and looks close to the same. I can not find a scratch on it. With paper work for $1050.

TenTec 585 Paragon HF Transceiver:

The Paragon is a top of the line transceiver that includes a general coverage receiver. It covers 160-10 meters, including WARC bands, with 100 watts output. The receiver is fantastic. It has dual VFOs and many memories built in, along with a speech processor. Basically, it has about every feature that a ham could want in an HF rig.

This particular unit works 100% as best I can tell. Since the rig does so many things, I am sure that there is something I didn't test, but I don't know what it is (or I would have tested it!). It has had all updates completed by TenTec.

Cosmetically, it is in extremely nice shape. The front panel is extremely good. Most all of the lettering is clean and crisp. This one is in exceptional condition. It also has the Giehl chip in it making it similar to a Paragon II.

Large manual and power cord included for $650.

TenTec Power Supply:

"Switcher / 25" 25 amp switching power supply:
This is a 25 amp switching power supply in a case that matches the early Omni series case, with the metal bezel around it. It is in a case that is the same size as a 243 remote VFO. It has an ammeter on the front, along with Switch, TenTec logo, and output bulb. The front panel basically looks like a 280 power supply with a metal bezel, but says "Switcher/25" on it. It is very quiet, and well shielded, and does not produce any electrical noise that I could find. $150

Icom PS-125 Switching 25 amp power supply
The ICOM PS-125 switching power supply provides 13.8 VDC, at 25 amps. The output cord has the Molex plug prewired for many Icom radios such as the IC-746Pro (above), or any of the rigs (including Kenwood and Yaesu) that require the heavy duty 6 pin molex connector. It is 4.4 x 3.7 x 11.3 inches in size and weighs under 7 pounds. With paper work for $135

Shure 444 D Dual Impedance Desk Microphone:

The Shure 444 D has voice shaping built in to it, providing greater articulation at communications frequencies. Of course it has a PTT switch on the base, that can be used as a momentary switch, or can be locked in position. Also under the base are switches for High or Low Z. It also has a switch for VOX or PTT under the base.

This mic is the black color, has a coiled cord, and is in very nice shape. It works fine, and looks great. It presently has stripped and tinned ends, ready to add the connector of your choice.

With paper work for $75.

Kenwood MC-80 Desk Microphone:

The Kenwood MC-80 is an omnidirectional electret condenser "gooseneck" desk mic. It has UP-DOWN tuning plus a built-in pre-amp. There is a switch for PTT and also a lock feature. The mic impedance is 700 ohms so it can be used with a wide range of models, and it has a frequency response of 200 Hz to 7 KHz. There is a potentiometer adjustment on the back of the mic stand to adjust the output level. The mic terminates to a standard 8 pin Kenwood mic plug. It requires voltage from the Kenwood transceiver to operate.

This one works fine, sounds good, has a new wind screen, and is in its original box. With paper work for $75.

Cables for Heil (and other) Microphones:

Heil CC-1 XLR 4
3 pin XLR Male to 4 pin XLR Female $25

3 pin XLR to stripped and tinned ends
About 10 feet of quality rubber covered mic cable with a 3 pin XLR connector on one end, and nothing on the other end. Ideal to add your own connector. Can be used with the CC-1 XLR-4 above. $20

Heil round 8 pin connector to 8 pin modular connector for Icom
Not positive of the number, but it might be HSTA-IM or HSTA-706
$15

Regular round desk stand
Round 6 inch diameter heavy black base, with a 3 inch chrome
tube coming up from the middle. Standard 5/8 inch threaded. $15

Timewave DSP-599zx DSP Processor / Audio Filter:

Calling it an audio filter does not tell the whole story.
It is really much more. It represents the latest generation
of Digital Signal Processing (DSP) audio filtering, incorporating
the newest high speed CPU. The LCD display, push buttons and
Visible Memory let you see the exact settings of the filters.
The DSP-599zx works in all modes. It is a dream for the non-voice
modes, as well as voice and CW modes. Data filters supported
in the filter are RTTY, Amtor, PACTOR, G-TOR, HF Packet, SSTV,
WeFax, SITOR and Clover. It needs 13 V DC at 1 amp.

This particular unit works fine and looks very nice. A wall
wort power supply and paper work are included for $300.

I also have many other accessories available such as many
different types of microphones, wattmeters, keyers, and many
other ham accessories. Just too many to list here.
Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

73,

Ken, W8EK

$1.00 per issue plus $2.50 Shipping for a single issue. Multiple issues will be shipped useing a flat rate of $4.75 USPS.
Will accept Money Order or PayPal

Thanks, Allan

6329. FS: Yaesu FT450 HF/6m transceiver

Yahoo group: ham4sale (2007 — 2015)
Date: 2011-03-26 16:29:50 UTC
From: John Geiger
Topic: 5848 Message: 6329

I have for sale a Yaesu FT450 HF/6m rig which I bought new from Texas Towers back in November 2010. Has all of the new accessories with it (except for the manual but you can find this on-line) plus a carry handle which is an extra
option. This rig comes with everything-IF DSP so you don't need to buy filters, built in CW memory keyer, built in voice keyer, built in voice synthesizer, and TCXO. It does not have the autotuner installed but that is no big deal because
the autotuner isn't any good anyways.

It looks and works fine, and I will probably regret selling it but I just bought a rig with 2m on it because I miss being on 2m SSB. At one point it did have one quirk to it-about once a month or so the AGC would "hang up" on it reducing receive sensitivity. You had to turn the radio off, turn it back on again, and it was good to go. I have heard from other FT450 owners who have had this same problem.

I called Yaesu about it and they suggested doing a full CPU reset. I did, and it hasn't done this again since doing the reset.

I am asking $499 for it plus shipping and packing charges.

73s John AA5JG

Alert!!

Microsoft IE8 or IE9 may not properly display my webpage. Surely Billy G. is hard at work on a fix.

Until then, if you are running one of the above browsers, it may help if you click on the "Tools" menu and select "Compatibility Settings". Then check the "Display all websites in compatibility view" box.

Firefox & Chrome displays it fine, as does IE6 & IE7.

1N2804A -- 6.8V 50 Watt Zener Diodes, TO-3 case, NOS -- $10 each

More Semiconductors may be seen at:

http://qsl.net/wc6w/wc6wfsw/index.html?fr20.html

AC-DC Electronics model RS5N30-1. 5V @ 30A switching power supply with remote sense terminals, screwdriver voltage adjust, 6" x 2.5" x 10". Employed with an external soft-start (See -- http://qsl.net/wc6w/wc6wamps/index.html?fr63.html) these can power the heater(s) on a 3CX1000 or a pair of 3-400Z's, 3-500Z's, 4-400A's, etc. Used -- $30 ea. (3 units available)

More Power Supplies may be seen at:

http://qsl.net/wc6w/wc6wfsw/index.html?fr15.html

Commercially made airflow switch assembly consisting of a V4-16 Microswitch (250VAC 5A contact rating) with a 1-3/8" x 1-3/4" sheet metal vane soldered to the switch arm. The switch is mounted in a U shaped anodized aluminum frame about 2.5" deep with mounting ears. Marked S-101 and part no. 467-115 if anyone knows where that's from! NOS $10

********** Transformers **********

Stancor Transformers

P-6308 107/117V Primary 50/60 Hz -- 6.3 VCT @ 10A Secondary, Used -- $20

F-106 115/230V Primary 50/60 Hz -- 10 VCT @ 6.5A Secondary, S case Used $20

F-610 115/230V Primary 50/60 Hz -- 6.3 VCT @ 10A Secondary, S case Used $20

Triad Transformers -- 115V 60CPS Primary

F21A 6.3VCT @ 10A Secondary, Used -- $20

F28U 6.3/7.5 VCT @ 25A Secondary, NOS -- $40

More Transformers may be seen at:

http://qsl.net/wc6w/wc6wfsw/index.html?fr36.html

********** Capacitors **********

Cardwell -- XR-1000HS (about 950pF max measured) These have slightly contoured plates for improved tuning resolution at minimum C. .030 air gap. About 4.5" x 4" x 3.5" overall including plate travel. Used, Good condition. $20 ea.

National Type TMC-300, 300pF variable capacitor, .070" air gap, approx. 8" X 4" x 2.5" with plates closed. Nice n' shiny like new! $40

OAK #22641, Four Section capacitor, 20-550 pF (measured) per section large receiving style capacitor .010 air gap. 6-1/2"" x 3-1/2" x 3" overall. 1/4" diameter shaft.
Counter-Clockwise rotation for capacity increase. NOS $30

Sprague 3600pF @ 30KV Doorknob capacitor. Red epoxy encased style -- $25

More Capacitors may be seen at:

http://qsl.net/wc6w/wc6wfsw/index.html?fr34.html

********** Tube Sockets & Accessories **********

Eimac -- Databook set circa 1985 in two large yellow Eimac 3 ring binders. Includes data sheets from 1976 edition and earlier. Very good condition. $200

Coaxial Planar Tube -- shielded heater/cathode contact assembly. Fits 2C39, 3CX100A5 or similar. Silver plated, NOS -- $10 each

Johnson 122-101 ceramic 7 pin septar socket (accepts 826, 832, 4D32, PL6549, PL6569, etc). These were likely a special order as they have the standard ground shield but, no ground clips. NOS though, a bit dusty & tarnished from long storage -- $10 ea.

Johnson 122-237 ceramic 7 pin giant socket for 813, etc. NOS, $15

Johnson 122-237 ceramic 7 pin giant socket for 813, etc. Used, $10 ea.

Johnson 122-247 ceramic 7 pin septar socket (accepts 7094, 8877, 832A, etc.) Used, $10 ea.

Johnson 122-247A or 122-248 ceramic 7 pin septar socket (accepts 7094, 8877, 832A, etc.) Used, $10 ea.

Johnson 124-115-2 UHF socket similar to Eimac SK-620. NOS, but, a mite tarnished from age. $40

Millen 36001 or National SPP-9 -- 9/16" Ceramic Plate Caps (fit 813 or similar) Used. Your choice, $3 ea

More sockets and some tubes may be seen at:

http://qsl.net/wc6w/wc6wfsw/index.html?fr41.html

********** Connectors -- All NOS , US manufacture **********

Amphenol MHV connectors -- Two 28100 right angle cable males & two 27025 panel mount females. -- $40 all.

UG-932 A/U MHV Male Cable connectors -- $10 ea

UG-961 A/U MHV Female Panel connector -- $12

UG-560/U HN Female panel mount connector -- $15 ea

UG-30C/U N Female-Female Bulkhead Connector -- $10 ea

More connectors may be seen at:

http://qsl.net/wc6w/wc6wfsw/index.html?fr44.html

********** Miscellaneous **********

Synchro Transmitters -- IMC Magnetics, Model 008-216, 26V 400Hz, .75" diameter housing, .120" dia. shaft, flying leads. These will drive a typical Radio Compass Indicator. NOS. $20 ea.

Water cooled heatsinks -- 12" x 8" used, drilled for a flock of TO-3's plus a few diodes. Back is flat. 3/8" water lines. $50 pair

ILG Electric Ventilation -- 17-18-022A squirrel cage type fan. Encased motor with 181-009-EA fan 115/230 VAC 1.6A/.8A 50/60Hz 3000 RPM 4+" round intake, 3+" x 4-3/4" rectangular output flange, weighs 25 lbs. Removed from a RCA transmitter that employed a 4CX5000A. Used -- $45

****

And of course some meters, panel meters, time meters & RF ammeters, please see:

http://qsl.net/wc6w/wc6wfsw/index.html?fr32.html

****

73 & Good morning,
Marv WC6W

http://qsl.net/wc6w/

Alert!!

Microsoft IE8 or IE9 may not properly display my webpage. Surely Billy G. is hard at work on a fix.

Until then, if you are running one of the above browsers, it may help if you click on the "Tools" menu and select "Compatibility Settings". Then check the "Display all websites in compatibility view" box.

Firefox & Chrome displays it fine, as does IE6 & IE7.

6336. FS: Ranger 5054 6 meter all mode

Yahoo group: ham4sale (2007 — 2015)
Date: 2011-03-29 19:59:58 UTC
From: John Geiger
Topic: 6336 Message: 6336

I have for sale a Ranger 5054DX 6 meter all mode radio. It does 25 watts on SSB
and 10 watts on CW/AM/FM. Works fine and is in pretty good physical condition as
well. It comes with the mic, 2 power cords (1 for a PS, one to plug into the cigarette lighter) and a copy of the manual.
Here is your chance to get on the magic band!

I am asking $170 shipped for it and can take paypal/check/MO.

6338. MAXTRAC VHF 2 CHANNEL - GREAT FOR APRS

Yahoo group: ham4sale (2007 — 2015)
Date: 2011-03-30 19:26:35 UTC
From: Mayfield, Walt
Topic: 6338 Message: 6338

The Radio for sale is a 2 channel MaxTrac model:D43MJA73A5CK. It has the 5 pin accessory port on the back. The frequency range is VHF 136-162MHz. It is in great working condition. I have been using it for APRS with a Tinytrac. but bought a radio that does APRS so I don't need this one any more. It is currently programmed with the APRS frequencies 144.39mhz and 144.34mhz. The front speaker was disconnected for APRS operation. It can easily be re-connected if you plan on using it for voice, *but I do not have the Microphone*. I am including the cable to use in the front mic jack to a serial port on a Byonics Tinytrac or Kantronics TNC. I am also including the power cord with power poles and the mini uhf/259 connector. I am not able to program any other frequencies in the radio. I have pictures if anyone is interested. Asking $75.00 plus shipping. Is sold as is. Payment is PAYPAL. If you have any questions I can be reached by email. walt@....

6344. Many HT accessories FS

Yahoo group: ham4sale (2007 — 2015)
Date: 2011-03-31 13:16:25 UTC
From: Ken Simpson, W8EK
Topic: 6344 Message: 6344

Many HT Accessories For Sale:

Yaesu HT Accessories:

Real Yaesu Battery pack for Yaesu VX-2 or VX-3 HT
FNB-82 LI Lithium Ion Battery Pack fits both the VX-2 and the
VX-3. 3.7 volts, 1000 mahr, works great, and holds a charge
like new. $22

Belt Clip for Yaesu FT-207, with hardware. $8

Wrist Strap for Yaesu FT-209, and probably others $4

HT Speaker Microphones:

Azden SDX-316 Speaker Microphone
Although it has an Azden name plate, it will also work
with Icom, some Yaesu, and Alinco that need 3.5 mm and
2.5 mm plugs.
This is the rounder style speaker mic that fits nicely in
the palm of your hand. $20

MFJ 286 Speaker Microphone
This was used on a Kenwood TH-225 HT, but it also fits the
TH-21/31/41 series HTs, TH-205, TH-215, TH-415, as well as
others. It has a 3 conductor 3.5 mm plug and a 2 conductor
2.5 mm plug. It works fine. $12

MFJ-287 Speaker Microphone
Fits same HTs as the MFJ 286 above, but is a smaller more
compact speaker mic. It works fine, and looks close to new. $15

Icom BC-127 A, Battery Charger for Icom IC-Q7A
Dual Band HT:

This charger charges two AA NiCads (or NiMH) for the
IC-Q7 A Dual band HT, and Icom R-2 receiver, and probably
others.

This appears to be new, unused, still in its bag.
Icom lists them at $21.
Buy this one for $12.

Icom BC-110 A Wall Wort Charger:
It produces 12 V DC at 200 ma.
I am not sure of all the units that use this charger. I know
it is used by many of the aircraft HTs, and also to charge the
R-10, T2H, T7H, T70, T80AD, T90A, T91A, T92AD, W32A, and I am

sure others. Apparently it is also known as a BC-167 in
addition to BC-110 A. This is NOT one of the switching units,
so you will not have RFI from this one.
This one works fine and appears very close to new.
Icom charges almost $40 for this. Buy this one for $15.

Icom batteries and DC accessories:

Icom DC-25
This is a pack that is used on the Icom µ2AT, Icom µ4AT, and
on other HTs that use the BP-20, BP-21, BP-22, BP-23 and BP-24
battery packs. It takes 13 V DC (such as from a cigarette
lighter), and converts it to the 9.4 V DC voltage needed for
the HT. It is used in place of a battery. This one works
fine and looks fine. $20

Icom BP-21
This battery pack is DEAD and sold for rebuilding, building
a DC converter, or whatever. $10

Icom BP-22
This battery pack is DEAD and sold for rebuilding, building
a DC converter, or whatever. $10

Icom MB-20 Belt clip
This belt clip is used on the Icom µ 2AT series of HTs, and
probably on others as well. This one appears to be new,
with hardware, still in its original plastic bag. $10

Rubber Duck antennas for your HT:
All are for 2 meters, are in good condition,
and are $10 each, unless stated otherwise.

BNC - About 7 inches long
BNC - Original from Kenwood TH-215, about 5 inches long
BNC - Stubby about 4.5 inches long

5/16 inch threaded, as used by Motorola and others
Stubby - 4 inches long

Type F connector - 6.5 inches long

PL-259 connector - 6.5 inches long
HyGain 275, still in original packaging

PL-259 connector - Stubby - 4.6 inches long
Centurion, still in original package

Special for Kenwood TH-21 HT threaded connector
Stubby, about 4.5 inches long - $20

Full size SMA for 2 meters and 440 MHz
This is a very flexible antenna that is a quarter wave on

both 2 meters and 440 MHz. $20

BNC Stubby for 440 MHz, 3 inches long

Protective Cases:

Kenwood SC-13 Vinyl Case
For TH-215, TH-225 and others, with room for the larger PB-1 and PB-4 battery packs. It can also be used with the smaller PB-2 and PB-3 packs. Black color. Great condition. $15

Case for Drake TR-33C
This is the black case that fits the Drake TR-33C, and has cutouts in the back for antenna, power, etc. It includes the shoulder strap, and is in good shape. $12

Case for Drake TR-22
As above, but for the TR-22. No shoulder strap. $10

Leather Case for Santec HT
This is a real Bianchi Leather case -- not a vinyl case. It fits most of the Santec HTs, such as the HT-1200, ST-142, ST-144, ST-440, etc. The real leather case includes a built in belt clip, plus a removable leather shoulder strap. $25

Accessories for Kenwood TH-205, TH-215, TH-225, TH-415, and other HTs in that series:

Kenwood SC-13 Vinyl Case
For TH-215, TH-225 and others, with room for the larger PB-1 and PB-4 battery packs. It can also be used with the smaller PB-2 and PB-3 packs. Black color. Great condition. $15

Kenwood BH-2 Belt clip with screws
Used on many Kenwood HTs. $8

Kenwood Wrist Strap for TH-215, plus many other HTs. $4

Original Kenwood Rubber Duck antenna from TH-215. $10

Kenwood BC-2 Charger for PB-2 batteries. $12

BNC to PL-259 antenna adapter $5

Accessories for the Kenwood TH-21 / 31 / 41 series HTs:

Kenwood BH-3 belt clip and hardware for Kenwood TH-21 / 31 / 41 series HTs. $8

Kenwood W09-0315 charger
This charger is used to charge the larger PB-21 H batteries

for the TH-21 series, and also on other Kenwood radios.
It produces 10.5 V DC at 42 ma, with a standard 2.1 mm
coaxial connector. $12

DEAD Kenwood PB-21 battery pack
This battery pack is used on the TH-21 series HTs. This one is
dead, but can be used for rebuilding. It is in good physical
condition, with no cracks. $10

Kenwood Rubber duck antenna for the TH-21 HT
Shorter "Stubby Duck" from Kenwood. $20

Accessories for the Azden PCS-300 HTs:

Azden SDX-316
This is the rounder style speaker mic that fits nicely in
the palm of your hand. Has 3.5 mm and 2.5 mm plugs for
Azden, Icom, some Yaesu, and others. It works great, and
looks great also. $20

Battery charge adapter for Azden PCS-300 HT
This is an adapter that permits one to charge the battery
of the Azden PCS-300, 2 meter HT, outside of the HT itself.
Usually, one must have the battery inside the HT, but this
lets you charge a second battery outside of the HT. The
original charger is used. If you have a PCS-300 HT, you
need this adapter.
It works fine, and looks like new. $3

Antenna adapter to fit the BNC connector on the HT and provide
an SO-239 connector that will permit a PL-259 to be attached.
This adapter can be used on any HT with a BNC connector. $5

Santec HT Accessories:

Leather Case for Santec HT
This is a real Bianchi Leather case -- not a vinyl case.
It fits most of the Santec HTs, such as the HT-1200,
ST-142, ST-144, ST-440, etc. The real leather case
includes a built in belt clip, plus a removable leather
shoulder strap.
The case itself is in very nice shape. The leather
shoulder strap has not been used. $25

Santec ST-142/144 "Service Pack"
This is similar to a service manual, but Santec calls it a
service pack. It has schematics, circuit explanations,
voltages, etc. $18

Battery pack for Yaesu VX-2 or VX-3 HT
Lithium Ion Battery Pack that fits both the VX-2 and the VX-3
3.7 volts, 1200 mahr, works great, and holds a charge like new.
$15

HT Belt Clips and Wrist Straps:

Belt Clips:
All include the hardware with the belt clip and are $8 each.
Kenwood BH-2 for TR-2500, TH-205, TH-215, and many others
Kenwood BH-3 for Kenwood TH-21 / 31 / 41 series HTs
Motorola
Yaesu FT-207

Icom MB-20 Belt clip
This belt clip is used on the Icom µ 2AT series of HTs, and probably on others as well. This one appears to be new, with hardware, still in its original plastic bag. $10

Wrist Straps for various HTs - $4 each
Kenwood TH-215 / 225 / 415, TR-2500, etc.
Kenwood TR-2400
Yaesu FT-209

Duplexer / Diplexer :

This unit is designed to split transmit and receive signals between the 2 meter and 440 MHz bands. Some rigs have only one output connector; you may want to use separate antennas for 2 meters and for 440 MHz. Or, you might have a combination 2m/440 MHz antenna, and your rig has two outputs. This unit can be used either to combine or separate the two bands.

Maldol HS-770
2 m and 440 Mhz ports have a foot long coax with PL-259 connectors. Common is a case mounted SO-239 connector. It works fine and looks good as well. $50

DTMF Touch Tone Microphones:

CES 610 L DTMF Touch Tone Mic
Can manually dial a number, or automatically store it in the mic, and "speed dial". 12 digit touch tone pad on the front. 8 pin modular plug (like computer LAN).
Looks to be new. $38

Data Signal "Data-Coder 5" Touch Tone Mic
This mic has a 12 digit touch tone pad on it, plus a normal low impedance microphone. With 4 pin plug. Like new. $36

KDK DM TT-1 DTMF Touch Tone Mic
This mic has a 12 digit touch tone pad on it, with a switch to turn the pad on and off. With 4 pin plug.
It works fine, and looks great. $35

KDK Model TM-2 DTMF Mic
With touch tone pad and up-down switches. It presently has stripped and tinned ends. Nice condition. $35

Johnson 250-0761-010 / CES 655 L DTMF Mic
It has a 12 digit pad on the front, and is a rugged mic.
Presently with 4 pin plug. Looks to be unused. $38

I also have many other items, including HF rigs, power supplies, microphones, and other items too numerous to list. Please let me know what you need. I might have it.

Prices do not include shipping from Florida.

Thanks.

6345. Cushcraft A3s

Yahoo group: ham4sale (2007 — 2015)
Date: 2011-03-31 04:58:39 UTC
From: Patriot in Ohio
Topic: 6345 Message: 6345

I have a Cushcraft A3s 10-15-20m beam that is down a ready to go to a new shack. The antenna has been stored inside with the exception of the beam itself. Due to the size of my lot and the nearby power lines I was unable put this beam up after moving to General class. I have the instruction manual and all the hardware. I bought it used, but it is in very good condition. I would like $300.00 for it or trade it for a no-radial verticle like a MFJ-1796 or something similar. It is ready for pickup and I would be willing to meet for a trade somewhere in between our QTH's. Thanks feel free to ask for any info or photos. 73's Bill KC8WVG

FS: Daiwa AF-606K Allmode Active Filter

I bought this recently but it is not going to fit
where I thought it would. Nice shape, minor marks,
includes a DC adapter.

Controls on front of unit as follows:
- Notch: 500, 1.2K, 1.5K, 1.7K, 2.0K, 2.5K (Hz)
- PLL: 500, 650, 850, 1.0K, 1.1K, 1.2K (Hz)
- Band Pass: 500, 700, 850, 1.0K, 1.2K (Hz)
- Mode: "Notch"; SSB 2.5K, 2.0K, or 1.5K; CW 140, 110, or 80; "PLL".
- Power On/Off switch
- Headphone (1/4") output.

Connections on back as follows:
- 13.8VDC input (2.1 or 2.5mm coaxial)
- External speaker 8ohm (phono jack)
- Input (phone jack)
- Tone adjustment dial
- Width adjustment dial
- Volume (UNIT HAS BUILT-IN SPEAKER)

Asking $75. incl. std. USA shipping.

I have a stamp collection that I would like to trade toward a mobile dual band radio. most items are still sealed in the original package. might be willing to add some cash into it. please let me know if it has dtmf capabilities too.

6349. Wanted: Sangamo mica capacitors

Yahoo group: ham4sale (2007 — 2015)
Date: 2011-04-01 17:13:33 UTC
From: N1BUG
Topic: 6349 Message: 6349

I am looking for older Sangamo mica capacitors, .002 and .005 uF (will say MFD on the capacitors). They must look like the one in the link below. Note the shape and dark brown color. I would prefer those exact values but will consider any in the ranges .0015 to .0025 and .004 to .006 uF.

http://www.n1bug.com/sangamo-mica.jpg

I may also be interested in .0003, .00035, .0004 uF of the same type.

73,
Paul N1BUG

6350. Microphones FS - Desk, DTMF, HT Speaker Mics, Mic Accessories

Yahoo group: ham4sale (2007 — 2015)
Date: 2011-04-02 13:24:22 UTC
From: Ken Simpson, W8EK
Topic: 6350 Message: 6350

Microphones For Sale --
Desk Microphones, DTMF Touch Tone Microphones, Speaker Microphones, and Microphone Stands and other Microphone Accessories

Desk Microphones:

Kenwood MC-80 Desk Microphone:

The Kenwood MC-80 is an omnidirectional electret condenser "gooseneck" desk mic. It has UP-DOWN tuning plus a built-in pre-amp. There is a switch for PTT and also a lock feature. The mic impedance is 700 ohms so it can be used with a wide range of models, and it has a frequency response of 200 Hz to 7 KHz. There is a potentiometer adjustment on the back of the mic stand to adjust the output level. The mic terminates to a standard 8 pin Kenwood mic plug. It requires voltage from the Kenwood transceiver to operate.

This one works fine, sounds good, has a new wind screen, and is in its original box. With paper work for $75.

Shure 444 D Desk Microphone:

The Shure 444 D has voice shaping built in to it, providing greater articulation at communications frequencies. Of course it has a PTT switch on the base, that can be used as a momentary switch, or can be locked in position. Also under the base are switches for High or Low Z. It also has a switch for VOX or PTT under the base.

This mic is the black color, has a coiled cord, and is in very nice shape. It works fine, and looks great. It presently has stripped and tinned ends, ready to add the connector of your choice.

With paper work for $75.

Astatic Model 810-6 Gooseneck Microphone:

This mic is on a 12 inch gooseneck. The mic is a brushed metal about 5 1/4 inches long, and is actually part of the gooseneck. The cable goes thru the gooseneck. This has a 2 conductor shielded cable, so it is a quality balanced microphone with about a 4000 ohm impedance. The gooseneck terminates in a standard 5/8 inch threaded connector.

This one works fine and looks good. $45

DTMF Touch Tone Microphones:

KDK DM TT-1 DTMF Touch Tone Mic
This mic has a 12 digit touch tone pad on it, with a
switch to turn the pad on and off. With 4 pin plug.
It works fine, and looks great. $35

KDK Model TM-2 DTMF Mic
With touch tone pad and up-down switches. It presently
has stripped and tinned ends. Nice condition. $35

CES 610 L DTMF Touch Tone Mic
Can manually dial a number, or automatically store it in
the mic, and "speed dial". 12 digit touch tone pad on the
front. 8 pin modular plug (like computer LAN).
Looks to be new. $38

Data Signal "Data-Coder 5" Touch Tone Mic
This mic has a 12 digit touch tone pad on it, plus a normal
low impedance microphone. With 4 pin plug. Like new. $36

Johnson 250-0761-010 / CES 655 L DTMF Mic
It has a 12 digit pad on the front, and is a rugged mic.
Presently with 4 pin plug. Looks to be unused. $38

Viking 2000, Model 709
It has a 12 digit pad on the front, and is a rugged mic.
Presently with 4 pin plug. $35

Regular Hand Microphone:
This one says Midland on the front, but no model number
given. It has a transformer inside, so it can be used for
either Hi Z or Low Z. Stripped and tined leads. $25

HT Speaker Microphones:

Azden SDX-316 Speaker Microphone
Although it has an Azden name plate, it will also work
with Icom, some Yaesu, and Alinco that need 3.5 mm and
2.5 mm plugs.
This is the rounder style speaker mic that fits nicely in
the palm of your hand. $20

MFJ 286 Speaker Microphone
This was used on a Kenwood TH-225 HT, but it also fits the
TH-21/31/41 series HTs, TH-205, TH-215, TH-415, as well as
others. It has a 3 conductor 3.5 mm plug and a 2 conductor
2.5 mm plug. It works fine. $12

MFJ-287 Speaker Microphone
Fits same HTs as the MFJ 286 above, but is a smaller more
compact speaker mic. It works fine, and looks close to new. $15

Heil Wind Screen
This windscreen can be used with a variety of microphones, including the GM-5. Excellent condition. $10

Microphone Stands:

Regular round desk stand
Round 6 inch diameter heavy black base, with a 3 inch chrome tube coming up from the middle. Standard 5/8 inch threaded. $15

Cables for Heil (and other) Microphones:

Heil CC-1 XLR 4
3 pin XLR Male to 4 pin XLR Female $25

3 pin XLR to stripped and tinned ends
About 10 feet of quality rubber covered mic cable with a 3 pin XLR connector on one end, and nothing on the other end. Ideal to add your own connector. Can be used with the CC-1 XLR-4 above. $20

Heil round 8 pin connector to 8 pin modular connector for Icom
Not positive of the number, but it might be HSTA-IM or HSTA-706 $15

Microphone holders:

Electro Voice
Gray colored EV, designed to hold 5/8 to 3/4 inch diameter mics, and go into a stand with standard 5/8 inch threads. $5

Chrome Mic holder
Similar to EV holder, but chrome metal with a green felt on the inside to protect the mic. For 1/2 inch to 5/8 inch diameter microphones. Standard 5/8 inch threads. $5

Microphone Holder from a Kenwood MC-60 desk microphone
This is the black plastic (or is it bakelite ?) piece that attaches to the mic stand and holds the mic. It includes the chrome screw/bolt, and looks like new. Ideal if yours is broken. It probably is used on other mics as well. $10

Prices do not include shipping from Florida.

Thanks.

6352. Wanted: Sangamo mica capacitors (Updated)

Yahoo group: ham4sale (2007 — 2015)
Date: 2011-04-03 15:44:18 UTC
From: N1BUG
Topic: 6349 Message: 6352

I apologize for posting this again. I got several replies indicating I may not have been specific enough in my request. I am looking for older Sangamo micas, very dark brown with rounded ends, 1-3/4" long by 1-3/8" wide, 1/2" thick at the thickest point which is the 6-32 threaded brass terminals. I have edited my photo with dimensions and a few other comments on the capacitors I am looking for. I should add these do NOT have a voltage rating marked on them. The shape of these is rather unique, I believe. See photo link below.

Again, looking for .002 and .005 mfd in particular

But also potentially interested in ranges

.0015 to .0025
.004 to .006
.0003 to .0004

http://www.n1bug.com/sangamo-mica.jpg

Perhaps most of these have been thrown away by now... they are a bit finicky and failure prone due to age, as found out when I started testing the ones in my stash. :-(

73,
Paul N1BUG

6353. Trade FT-817ND for IC-703+

6354. F/S Siltronix 1011D Comanche - $300 (Salisbury)

Yahoo group: ham4sale (2007 — 2015)
Date: 2011-04-06 05:12:16 UTC
From: Garry
Topic: 6354 Message: 6354

This is a working Black face Siltronix Comanche 1011D. It has a Shure desk mike, a FD1011 frequency counter and a model 90 VFO. All items work well the only known problem is a couple bars are out on the LED of the FD1011 counter. The tubes are all in good shape and after proper warmup it is very stable on frequency. I do have a D104 that is wired for the 1011D and will include it for $50. Radio covers 10 and 11 meters and has very strong clear transmit. Any questions feel free to contact me.

Location Salisbury,NC

6363. HF Antennas and related items FS

Yahoo group: ham4sale (2007 — 2015)
Date: 2011-04-12 15:09:14 UTC
From: Ken Simpson, W8EK
Topic: 6198 Message: 6363

HF Antenna related items For Sale -- Vertical antennas,
SWR Bridges, Low Pass TVI Filter, Connectors and more

Hustler 4BTV "Base station" HF vertical antenna

The 4BTV covers 10, 15, 20, and 40 meters.
It can also cover 75/80 meters by using an RM-80 S resonator.

This one is in extremely good shape. It actually still shines!
No corrosion evident. Penetrox was used on the original
assembly, so it comes apart easily.

Paper work is included. but connection points are well marked
for easy reconstruction. $120

I would prefer pickup near Ocala, Florida, just off of I-75.
It will easily fit inside a minivan, or it can be broken down
more to go inside a car. It is possible to ship it, but the
cost is high due to it being oversize. Obviously, shipping
is not included in the price.

Solarcon A-99 vertical antenna:

The Solarcon A99 is a half wave over a quarter wave variable
mutual inductance antenna for 10 to 17 meters. It features
the Solarcon twin ring Adjust-A-Match system to obtain the
optimum SWR. Simply raise the rings to raise the frequency
or lower the lower rings to lower the resonant frequency.
The rugged three-piece white fiberglass construction features
triple plated brass fittings.

This antenna is 17.75 feet high. It has 3 dBi gain and the
power limit is 2000 watts. It accepts a PL-259 and mounts on
a 1.5 inch mast.

This particular unit is in good condition, with no corrosion.
With paper work for $50.

Pick up of this antenna near Ocala, FL, just off of I-75 is
preferred. It could be shipped, but it is long enough that
it may be considered oversize. Shipping is not included in
the price.

SWR Bridges:

Both of these cover from 3 to 150 MHz, covering HF, 6 meters,
and 2 meters, so are ideal for the new rigs with 6 meters and
2 meters in them. SO-239 connectors.

Quement SWB-2
This unit features two separate meters -- one for reading forward power and another for reading SWR. This permits one to easily monitor both the power going out, and the SWR on the antenna at the same time.
It works fine and looks great. With paper work for $40.

Royce 2-100 Single Meter SWR Bridge / Field Strength Meter
This one works fine, and looks extremely nice. I do not see any scratches on it, but it does have a previous owners name on it. In its original box with original instructions. $32

Low Pass TVI Filters:

A low pass TVI filter is added to the transmitter to reduce harmonic interference. All have SO-239 connectors and include paper work.

B & W FL-10/1500
This filter cuts off just above 10 meters, and handles 1500 Watts. It is the latest model B&W filter.
It looks very close to new. $40.

Coax connectors and adapters:

Prices are per connector. Several of each are available.
These are NOS (have not been used).

"N" Connector - Double Male - $8

BNC male for coax cable
standard type - $2
crimp on type - $3

Chassis mount BNC female
square mount (uses 4 screws) - $3
screw in type - $3

BNC "T" - two female and one male - $3

Antenna adapter to fit the BNC connector on the HT and provide an SO-239 connector that will permit a PL-259 to be attached. (BNC male to UHF female) $5

UHF Male (PL-259) to BNC female (opposite of above) $5

UHF double female "Barrel connector" (two SO-239 together) $3

UHF "T" connector with two female (SO-239) and one male (PL-259) connection - $5

I also have many other accessories available such as many different types of microphones, HTs, HF, VHF and UHF rigs, HF and VHF/UHF antennas, etc.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

6372. ICOM IC-207 & Nicholas Cerreto

Yahoo group: ham4sale (2007 — 2015)
Date: 2011-04-18 04:04:10 UTC
From: J.Gordon Beattie, Jr., W2TTT
Topic: 6369 Message: 6372

Hi Folks!
I have opened a Dispute with PayPal so as to help move this issue along with Nicholas Cerreto. Many thanks for those who provided me with their experiences and wisdom. I compressed the email chain, removing only spaces and carriage returns in my claim of dispute in order to fit it into the 1000 character field along with my introductory comments/complaint. I hope that this gets resolved promptly and successfully.

If others have had issues with him in the past, I would like to know about it. This may be needed if I ask for PayPal to adjudicate the issue.

Thanks & 73,
Gordon Beattie, W2TTT

Subject: [ICOM] FW: ICOM IC-207 & Nicholas Cerreto

Hi Folks!
Does anyone know how to get in touch with

KC2BQS

Nicholas L Cerreto

418 Palamino Ct

Lagrange, OH 44050

He sold me an IC-207 radio and has had some personal difficulties that have made him busy. If there is anyone in who knows him, who could remind him to ship the radio or perhaps help him to get it done, I would really appreciate it!

Thanks & 73,

Gordon Beattie, W2TTT

To: 'J.Gordon Beattie, Jr., W2TTT'; 'Nicholas Cerreto'
Subject: RE: ICOM IC-207

Nick,

Where is my radio?

You need to provide me with the radio shipment tracking number, or send back the funds via PayPal immediately.

Thanks & 73,

Gordon Beattie, W2TTT

Nicholas,

I'm truly sorry for your loss. You are all in our prayers.

We are looking forward to receiving the radio.

Thanks & 73,

Gordon Beattie, W2TTT

Sir,

I will get the ICOM out today or tomorrow..

My dad died and I've been dealing with all that mess..I should sent you an email just didn't have the time.

I hope you understand

Thx

Nick

6375. FS: Antenex Laird CW27 26-29 mhz wideband antenna, NMO mount

Yahoo group: ham4sale (2007 — 2015)
Date: 2011-04-19 02:33:42 UTC
From: John Carpenter, W5JMC
Topic: 6375 Message: 6375

I have for sale a brand new Antenex Laird CW27 (CW-27, CW 27) wideband mobile antenna. This antenna is a base loaded 1/4 wave and covers 26.8 - 29.7 MHz, with a center frequency of 28.25 MHz. It is 67.5 inches in length. I ordered this antenna new and never installed it. I paid near $100 for this antenna...am looking to get $55 plus shipping, obo. If interested, email me at w5jmc(dot)john(at)gmail(dot)com. Thanks and 73s.

6377. Kenwood TM-741A Triband Radio $480

Yahoo group: ham4sale (2007 — 2015)
Date: 2011-04-20 11:31:47 UTC
From: devtty1
Topic: 6377 Message: 6377

I have a working Kenwood TM-741a tri-band radio (220/440/144).

* I've owned the radio since Jan of 2010 and am selling it because I just bought a D710A and because I don't really use the 220 much.
* It was working in my truck as of last week-end (April 16, 2011)
* The radio itself has no physical abuse/damage but does have some scuffs and scratches

There are a couple of issues with the radio:

1) the VFO button on the front of the control unit does not work. I have to use the VFO button on the mic. The MR and MHZ buttons (below the VFO button) work fine because I got in there and rigged a fix for them
2) crossband repeat does not work
3) The extension kit is homemade and my connection isn't real solid so when you plug/unplug the remote head, I have to jiggle the connection to get it to work. But once it's working, I don't have any problems with it
4) I have the soft part of velcro attached to the bottom side of the radio (this is how I keep it stationary in my truck)
5) the side speaker jack is well worn so it takes a little bit of jiggling to get the external speaker to work, but it does work
6) the cover plate on the radio is gone so I made one out of plexi-glass which has my call etched into it. I will make you one that has your call cause you don't want mine

$480 plus shipping to US only

6379. Remote atu

Yahoo group: ham4sale (2007 — 2015)
Date: 2011-04-21 16:12:18 UTC
From: pauldebono@rocketmail.com
Topic: 6379 Message: 6379

I am looking to buy a decent external remote ATU, max 100 watts, which can tune anything, longwire, G5RV, dipoles, verticals etc.
Which is the ideal ? MAC , CG, MFJ, SG, LDG ?

6380. FS: Long list of RF transistors, electronic parts bundles and misc. items

Yahoo group: ham4sale (2007 — 2015)
Date: 2011-04-22 13:21:26 UTC
From: topossibilities
Topic: 6380 Message: 6380

After years of designing and building projects, it's time to unwind additional component bundles and items surplus to my needs.

Item 1: Large new/unused parts bundle....great way to begin or restock a junk box with commonly used parts and save on shipping/handling, minimum orders etc.

Transistors and FETs....includes many RF and low noise types, (2)2N5179, (1) MFE521, (2) 2N3866, (1) 2N222A, (1) 2N4401, (3) 2N4403, (5)2N4125, (1) MPSH10, (1) MPSA18, (1) MPS6514, (3) 2N3904, (3) 2N3906, (1) 2N5210, (1) MPS918, (1) 2N5088, (1) 2N3053, (2) 2N3819, (2) 2N5484, (2)2N5386, (2) 2N4416A, (2) MPF102, (1) VN10, (2) J310, (1) BS170

Linear ICs....includes (2) NE5532, (2) NE5534, (2) MC1458, (1) SE510A,(1) LM301, (1) TL074, (1) MC2240P, (2) LM386, (2) LM317L, (2) MC1350P, (1) XR2209CP

Diodes: (4) 1N914, (4) 1N4148, (8) iN4007, (1) 1N34, (1) 2A/400V bridge rectifier, (2) MPN 3404 Pin, (4) 1N6263 Schottky

PCB Trimmer Pots.....(15) assorted values, single and multi-turn

Capacitors.....(25) .1uF 50V Monolithic ceramic

Inductors.....(10) molded type chokes, assorted values from 1uH to 1,000uH

Ferrite materials....nice assortment of (25) toroid, bead, binocular, transformer cores.

Powdered Iron Cores......includes (10) T50-6, toroid cores and 20' of Belden 24 AWG magnetic wire

(1) Murata 10.7Mhz ceramic filter

Miscellaneous hardware.......(8) 5/8" x 1/4" screw mount runner feet,(12) 3/16" 4-40 metal stand-offs, (4) 1/2" 4-40 metal stand-offs, (4)1/2" 6-32 metal stand-offs, (4) 1/4" feed though insulators, assortment of 15) single and double solder lugs

Price: $30 Note: I had pre-assembled 12 of these bundles and 1 remain available at this time.

Item 2: Showa SF0922B SSB Crystal Filter, 9.000 MHz Center Frequency, 1 3/8"L x 7/8"W x 13/16"H

Includes 8.9985 MHz offset crystal

Price is $25

Option: With filter purchase, I can include the PCB and all parts to build the IF amplifier (w/ RF derived AGC) used in the W7ZOI/K5IRK High Performance Communications Receiver receiver that was featured in QST, numerous ARRL Handbooks (e.g. see Fig. 17 Chapter 30, 1995 HB) for an additional $15.

Item 3: RF power transistors

a) Motorola MRF450, NPN, 2-30 MHz, Pout 50W (PEP) Note: these are used in TenTec 405 amplifier.

http://pdf1.alldatasheet.net/datasheet-pdf/view/116605/MOTOROLA/MRF450.html

Price: $12 each or (2) for $20

b) NTE335, NPN. 2-30 MHz, Pout 80W (PEP), cross to Motorola MRF454. Note: these are used in numerous commercial 120W class transceivers.

http://www.nteinc.com/specs/300to399/pdf/nte335_6.pdf

Price: $15 each

c) NTE333, NPN, 2 - 30 MHz, Pout 60W (PEP)

http://www.nteinc.com/specs/300to399/pdf/nte333_4.pdf

d) Motorola 2N6081, NPN, Pout 15W minimum @ 175Mhz

http://www.digchip.com/datasheets/parts/datasheet/300/2N6081-pdf.php

Price $7

e) MRF479 NPN, TO-220AB (COMMON EMITTER), Po 15W PEP to 50MHz Note: Used in numerous MFJ, popular kits

http://www.datasheetcatalog.org/datasheets2/29/29874_1.pdf

Price: $10

Item 4: Motorola MWA220, .1-600MHz wide band hybrid (3 terminal), 50 ohm 10dB amplifier

http://pdf1.alldatasheet.net/datasheet-pdf/view/120127/MOTOROLA/MWA220.html

Price: $6 for a bundle of 3 units

Item 5: Dual gate MOSFet bundle

Includes (9) assorted Motorola 3N211, 3N201, 3N202 and 3N204

Price: $15

Item 6: Lots of new analog panel meters

These are price reduced meters , many shown on my web site at
http://mysite.verizon.net/resota6z/id1.html

a) Very nice Crompton Instruments, 3"w x 2-1/4"h (bottom third black and upper portion clear), expanded scale voltmeter, reads 8-16 volts DC

Price: $10 Note: only 2 available

b) Pair of Hoyt 2-1/2"W x 7/8"H edge type panel meters for measuring/monitoring DC power

Voltmeter is 0-15V and amp meter 0-20 and 0-200 amperes (will need correct shunt).

Price: $6

c) Simpson 3" square panel meter, FS is 0-100uA

Price: $7.50

d)Simpson 2-3/8" square panel meter, FS is 0-500uA

Price: $7.50

e)Weston 1-1/4"W x 3/8" H X 3" D edge type panel meter, FS is 200uA, with bezel and mounting hardware.

New but the internal scale has very slight dis-coloring in one corner.

Price: $5

f) Nice 1-3/4" square panel meter, FS is 50 uA.

Only requires a 1-1/4" round opening to mount (plastic retaining nut fits over threaded body)

Price: $7

g) Very nice Vanco Panel Meters, 2 3/8"w x 1 13/16"h .

Model PM-1. 0 - 1mA DC, $7.00

Model PM-2, 0 - 100uA DC, $7.00

Model PM-4, 0 - 15V DC, $7.00

Model PM-5, 0 - 50uA DC, $7.00

Item 7: Air variable capacitors

a) Dual section, 205pF and 75pF with 6:1 vernier drive reduction.

1-5/8"W x 1-1/4"H x 1-11/16"D and has threaded holes for mounting to either panel or chassis.Inner shaft is 1/4" 1:1 where a pointing dial can be mounted. Knob end is 1/8" (1/4" slip on shaft adapter included)

Price: $8 each

b) 110pF capacitors with 2:1 gear reduction, 1 1/2" W x 1 1/4" H (plates meshed) x 1 3/4" D, chassis mount w/ 1/2" L 1/4" shaft.

Price: $8 each (2 available)

c) Cardwell ZU-140-A, 140 pF, 1 1/2"W x 1 1/2" H x 1 3/4" D. Has 1/2"L 1/4" shaft. Panel mount in 3/8" hole.

Price $7

d) Hammarlund HFBD35E Dual (split stator) capacitor.

35 pF per section, 2" W x 2" H x 3 1/4" D. Has 2" L 1/4" shaft. Chassis mount.

Price $8

e) EF Johnson 154-1-4 , 244pF, 2,000 volt

http://www.cardwellcondenser.com/PAGES/jcsp17.html

http://www.cardwellcondenser.com/PAGES/jcsc16.html

Same as 154-1-1 except has 1/4" L shaft both ends (can include a 1-1/4"L shaft extension and coupling)

These are the same capacitors that came with the antenna tuner kits (see below site).

Price: $19 each (only 2 available).

The above capacitors are price reduced from shown on my web site at http://mysite.verizon.net/resota6z/id1.html

Item 8: Bundle of air variable trimmer capacitors

a) Johnson subminiature "T" type, silver plated, slot adjust air variable capacitor bundle.

See (CTA) T6-5 at http://www.surplussales.com/Variables/VariableTrimmers/VarTrimm5.html

Includes 18 capacitors, (14) 18pF, (1) 10pF and (3) 5pF

Price: $20

b) Johnson vertical mount, machined silver plated slot adjust air variable capacitor bundle.

See (CTA) 193-8-5 at http://www.surplussales.com/Variables/VariableTrimmers/VarTrimm5.html

Includes (3) 2.2 - 34pF capacitors.

Price: $4.50

Item: 9 Bundle of miscellaneous connector adapters

Includes an assortment of (14) adapters (e.g. converts between PL259, SO239, BNC, F, right angle, RCA, double male/female etc.)

Price: $12

Item 10: Bundle of EF Johnson ceramic cone stand-offs and feed troughs

Includes (6) large, (6) medium cone stand-off and (2) medium and (2) medium feed trough insulators

Price: $10

Item 13: Bundle of EF Johnson ceramic 1/4" shaft couplings

a) (6) P/N 104-251-2, large heavy duty couplers

Price $6

b) (8) P/N 104-250 medium size couplers

Price $8

Heat sink bundles and miscellaneous

a) Very nice 5-1/4" x 5-3/4" x 1-1/8" (base 3/8" thick w/ 3/4" fins), charcoal color

Have used these type heat sinks on amplifiers of up to 140 watts output.

Price: $9.00 each (2) available

b) Very nice 4-5/8" x 2-3/8" x 7/8" (thicker base w/ fins), black

Probably good to 50 or more watts output

Price: $6 each (2) available

c) Very nice 3-1/2" x 1-1/2" x 7/8" (thicker base w/ fins), black

Price: $5

d) Very nice 4-3/4" x 3" x 1/2" (w/ fins), black

Price: $4 each (2) available

e) Very nice 4-3/4" x 1-3/4"" x 1/2" (w/ fins), black

Price: $3 each (4) available

f) Very nice 3-1/2" x 2-3/4" x 15/16" (w/ fins), gold anodized

Price: $2 each (4) available

g) Bundle of (15) small, medium and large T05 type heat sinks

Price: $5 (3) bundles available

h) Bundle of (13) small, medium and large T0220 type heat sinks

Price: $5 (3) bundles available

i) Bundle of (16) heavy duty T0220 heat sinks

Price: $7

j) Bundle of (10) T03 type heat sinks

Price: $5

All items are unused/new (NOS) and will be combined and shipped most economical way via USPS (e.g. flat rate box).

Please email w1aaz at verizon.net to verify availability and shipping cost to your zip.

Ed, W1AAZ

6385. KENWOOD TM-G707A 2m/70cm - $250

Yahoo group: ham4sale (2007 — 2015)
Date: 2011-04-23 17:33:56 UTC
From: wt1078
Topic: 6385 Message: 6385

From the extra-large control panel - with the welcoming glow of its amber-colored LCD - to Kenwood's new Easy Operation mode, the TM-G707A is extraordinarily user-friendly. That, after all, is a design imperative for mobile communications equipment. But this FM dual-band (2m/70cm) transceiver goes well beyond the call of duty, offering a "five-in-one" programmable memory, a Memory Name function, and numerous other features that make operation more natural than ever. Optimized convenience goes hand in hand with the polished performance of the TM-G707A.

Features at a glance:

High-visibility 7-character display
Easy Operation mode
"Five-in-one" programmable memory
180 multi-function memory channels
Memory Name function
Multi-scan functions
Priority scan
Built-in CTCSS encoder/decoder
Quick-release detachable front panel kit (option)
Selectable frequency step (5, 6.25, 10, 12.5, 15, 20, 25 or 50kHz)
Voice Guide (requires VS-3 option)
AIP (Advanced Intercept Point)
Heavy-duty construction

This radio works good just to many radios. Come with the copy of manual and 11 amp power supply.plus shipping from port orchard wa 98367 cost $250.oo obo

thank for looking
Dennis KB7WFV

6386. Ameritron AL-800 1250 watt amplifier for sale

Yahoo group: ham4sale (2007 — 2015)
Date: 2011-04-28 12:23:35 UTC
From: Art
Topic: 6386 Message: 6386

Ameritron AL-800 1250 watt amplifier for sale $1250. This amp uses a single Eimac 3CX800A7 tube and covers 160 through 10 meters. I purchased this amplifier new in February 2006. This amp is in very clean condition with no scratches. No tape or labels on the front panel. I've always kept it covered with a custom cover when not in use. It has seen little use and never more than 800 watts out due to antenna power limitations. I am not an incessant tuner. I use software to give me amp settings for specific frequencies. This amp has been used for chasing DX (though I was already on the Mixed and CW Honor Rolls before buying this amp) and casual contesting (usually 100 to 400 QSOs per contest). This amp is for sale by pick up only in central Long Island, New York. I will not ship as it weighs 68 pounds and I do not have the original packing material.

If you want to read about this amp, here is the link for the manual:

6394. WANTED: Flat Base Mounting Plate for Rohn 25

Yahoo group: ham4sale (2007 — 2015)
Date: 2011-05-08 00:51:35 UTC
From: doc@kd4e.com
Topic: 6394 Message: 6394

I have a modified Rohn 25 tower, pictures here:
http://kd4e.com/tower.html

I need a plate to mount on the bottom, either with a right-angle side plate attached that I can lag to the connex (steel shipping container), or to which I may add bolted-on angle iron for that purpose.

It would be even nicer if the base plate were hinged ...

I will pay cash or work out a trade for Ham accessories/gear - trades are more fun!

WDYT?

6399. TRADE: Boatanchors for FT-857D

Yahoo group: ham4sale (2007 — 2015)
Date: 2011-05-10 18:20:39 UTC
From: doc@kd4e.com
Topic: 6399 Message: 6399

I recently sold my FT-857D and regret it as I discovered
a need for that mobile/portable resource.

If you have a FT-857D that you aren't using much and
would prefer some boatanchor gear to tinker with instead
I'd like to work a deal. (I will add some cash and cover
my shipping to you.)

Clegg Zeus (needs lots of work, faceplate good, no mod/PS)

Swan 350 (working, no PS included)

P&H 2-150 20m to 2m 100w transmitting converter

Heathkit VX-1 external vox

Astatic 10-D mic head on UG-8 base with chrome stem with
PTT on the stem.

Misc extra tubes, knobs, etc.

Also have a GBC CCD-150 CCTV camera (nos in box).

6400. For Sale: AvMap Geosat 5 APRS GPS Unit with New 2011 Map SD-Card

Yahoo group: ham4sale (2007 — 2015)
Date: 2011-05-13 14:10:49 UTC
From: w2gld
Topic: 6400 Message: 6400

For Sale:

Brand new, never used, AvMap Geosat 5 APRS GPS unit. This unit is complete with all original boxes, manuals, cables, etc. It has the latest firmware updates installed and comes complete with a brand new North America, v.07 (T-NA-Q001.05T) SD-Card Maps ($119 value) plus a fixed mounting bracket ($9.99 value).

I purchased this about a year ago with the intent of installing this and the Kenwood TM-D710A in my Ford Explorer; however, with school and other personal issues I never got around to doing it and I no longer have this vehicle.

I am asking for $500 shipped via USPS Priority Mail anywhere in the United States. I paid $549 plus the additional $119 for the new maps and another $9.99 for the mounting bracket.

Interested parties, please e-mail me directly at: W2GLD@...

Thanks and 73!

6401. For Sale: Kenwood TH-D72A Handheld Complete Package

Yahoo group: ham4sale (2007 — 2015)
Date: 2011-05-13 14:16:13 UTC
From: w2gld
Topic: 6401 Message: 6401

For Sale:

New, Mint condition, Kenwood TH-D72A Dual Band (2-Meter & 70-CM) APRS handheld. Comes complete with all boxes, manuals, warranty card, etc. as well as a spare Kenwood Lithium-ion battery pack and the Kenwood KSC-32 Rapid Desktop Charger.

I purchased this back in January with the intent on completing my mobile Sky-Command station; however, with school and some other personal issues I have decided not to continue with this project. I have used this radio a handful of times and it works great. It has NOT been modified in anyway; completely factory new and is running the latest firmware release.

I paid over $650 for the entire package from HRO in January.

I am asking for $600 shipped via USPS Priority Mail anywhere in the U.S.

Interested parties should e-mail me directly at: W2GLD@...

Thanks and 73!

6402. For Sale: Kenwood TM-D710A Complete Package

For Sale:

Brand new, mint condition, Kenwood TM-D710A Dual Band (2-Meter & 70-CM) mobile transceiver, complete with all original boxes, manuals, mounting hardware, cables, etc. Also, installed in the VGS-1 Voice Guide & Storage Unit. The radio has been modified for MARS/CAP as well. Also included in the package is a brand new, PG-5F Extension Cable Kit and the PG-5G Serial Programming Cable.

I purchased this radio about a year ago with the intent on installing this in my Ford Explorer; however, with school and other personal issues I have never got around to installing it and now I no longer have this vehicle.

I paid $549 for the TM-D710, $69 for the VGS-1, and $70 for the PG-5F Extension Cables, and $36 for the PG-5G Programming cable.

I am asking $650 for the entire packaged shipped via USPS Priority Mail anywhere in the U.S.

Interested parties, please e-mail me directly at: W2GLD@...

From: doc@kd4e.com
Topic: 6406 Message: 6406

Alinco DX-70T (160-10M 100w 6M 10w) - Needs Work

It has the following symptoms:

With 12 volts on the rig in receive mode it's drawing 9 amps.
Receives OK.

The internal 4 amp fuse inside the radio pops.

This came from an estate and the widow did not want to bother
with pre-sale repair. It was kept in a clean, warm, smokeless
room.

Alinco via phone speculated that it may have a relay stuck or
a broken relay.

I don't have time to get to this, and need the funds for an
antenna project.

Includes DC cable, Original Manual, Original mic.

Asking $165. including standard USA shipping.

6409. Heliax

Yahoo group: ham4sale (2007 — 2015)
Date: 2011-05-22 17:46:45 UTC
From: Chris Boone
Topic: 5487 Message: 6409

I have a LARGE storage place full of Heliax...mostly 1/2 and 7/8...time to empty it...pick up or you ship....in SE TX (Beaumont area).
One 300ft new 7/8 still on reel..most of it used but in excellent shape.
Been stored for a while...projects planned got canned so the feedline needs to go

Contact direct if interested....I either sell this as feedline or it goes to a scrap yard but I would like to see it go to ham use...also have connectors for 7/8..
Plan to go inventory this coming week so I can give accurate numbers.

Chris

6423. For Sale: Force12 MAG620/340N

Yahoo group: ham4sale (2007 — 2015)
Date: 2011-05-30 12:06:00 UTC
From: Bill Cotter
Topic: 6423 Message: 6423

Greetings,

I have for sale a new-in-crate, unused Force12 MAG620/340N antenna. This is MONSTER 6ele on 20M and 3ele on 40M on the same 47ft boom. It requires a tower such as Rohn-45/55, and a healthy rotor such as a prop pitch unit. The present-day cost for this antenna is nearly $4,750 plus $500 shipping from CA to KY.

Pictures and manual summary
http://web.qx.net/bcotter/forsale/Force12%20MAG620340N%20antenna/

I ordered (full-payment in advance) this from Tom N6BT five years ago in the spring and it took almost 24mo to get it to my door. Between the production efforts, material supply issues and other problems, and the continuous delays, I opted for other antennas. I ended up using a 4ele20M 36ft boom and a 4-square on 40M.

I have this unassembled antenna kit (crate is 150" x 25" x 25" and 400lbs) in my garage. The 47ft boom starts out 6" dia, tapers to 5" and finally tapers to 3". The mast plate (actually a cradle) is made from 18" x 18" x 1/2" aluminum, and all the elements are very heavy duty (N=100mph). The up-the-tower weight is stated to be 250lbs, but may be slightly more.

My preference, for obvious reasons, is to sell it pickup-locally. However, If you wish to use a freight carrier, I am good with a prepaid shipment. I am located in Nicholasville, KY outside of Lexington.

$3,999 (save $1,250)

"Magnum 620 and the 3 element 340N: Several enterprising customers added the "N"series elements to their existing Magnum 620/340 antenna, with excellent results. We took the hint and expanded the design to accommodate the larger "N"series 40 meter elements. The boom has been increased in diameter and extended out to 47', plus a drop-in cradle mount. "

6424. FS: Solid State HF Amp

Yahoo group: ham4sale (2007 — 2015)

From: doc@kd4e.com
Topic: 6424 Message: 6424

FS: Solid State HF Amp

R.M Italy KL500 Linear Amplifier
All-mode HF linear amplifier 3.5-30 MHz

Not FCC Type-accepted. This requires mods for Ham use
just like most surplus commercial/military gear.

Asking $175. shipped to standard USA addresses.

Voltage: 12-14 VDC Max 34 A
Drive Power: AM/FM: 1-15 W, SSB/CW: 2-30 W
Maximum Power Output: AM/FM: 60-150 W, SSB/CW: 120-400 W
Impedance: 50 ohms, SO-239 12.5" x 6.5" x 2.5"
Devices: Four MRF-455's (which may be swapped for SD1446's)
Input Vwsr 1-1.5:1
Fuses: 3 x 12 amp DC
Output Power Level Selections: 6
Antenna preamplifier: 26 dB
Reverse polarity protection
Inside pic. here: http://kd4e.com/rm-kl500.html

NOTE: This needs switched filters on the output and bias
tweaks to be clean and legal for Ham use.

From: doc@kd4e.com
Topic: 6429 Message: 6429

FS: LDG At-600Pro Auto-Tuner

"Up to 600 watts SSB and CW and 300 on RTTY (1.8 ? 30 MHz),
250 watts on 54 MHz. LDG?s state-of-the-art, processor-controlled
Switched-L tuner. It will match virtually any kind of coax-fed antenna,
including Yagis, dipoles, inverted Vs, slopers, loops, just about
anything. It will typically match a 10:1 SWR down to 1.5:1 in just a few
seconds. You can also use the AT-600Pro with longwires, random wires and
antennas fed with ladder line just by adding a balun."

Not using this enough to justify the investment.
Excellent cosmetic and operating condition.

$275. shipped to standard USA addresses

Tubes

These are all old RCA, Sylvania, GE, Westinghouse etc.
No "Realistic", or modern imports in the group.

Nuvistors

6CW4, 6DS4, 13CW4, 7586 NIB -- $10 ea.
6CW4 RCA pulls, checked OK on a Tektronix curve tracer $5 ea. or 10 for $40

Sweep Tubes

6DQ6B RCA likely NIB + GE 6DQ6B pull -- $10 both
6JF6 NIB -- $15 pair
Victoreen GV4S-1400 Corotron, 1400 volt regulator tube. NOS $20.

Western Electric

403B pull $4
404A pulls $7 ea
408A / 6028 NIB $10 ea

Low Profile Dual Triodes -- All in this group, are 1950's & early 1960's vintage US made devices and were performance verified on a Tektronix curve tracer.

2C51/396A Tung-Sol NIB $10
5670 RCA & GE pulls $10 ea
6386 RCA NIB last pair, $600
6386 GE 5 Star NOS $300
6386 GE pull $200

Dual Triodes -- All in this group were performance verified on a Tektronix curve tracer.

12AU7A Sylvania NIB $10 ea
12AX7 pulls $5 ea
12AY7 pulls $3 ea
5814A (12AU7A) RCA NIB $10 ea
5814WA pulls $5 ea
5963 (12AU7) pull $5

Collins KWM2 spare tube lot -- The little ones were mostly made by RCA, with a couple each Sylvania, GE & Raytheon -- all NIB $120

6146W (2) Sylvania
6AU6A
6AZ8 (4)

6BN8 (3)
6CL6 (2)
6DC6
6EB8 (2)
6U8A (4)
12AT7WB/6201 (2)

2C46 Lighthouse tube pull $3
2D21 pulls $5 ea

6AK5 pulls $2 ea
6AL5 pulls $1 ea
6AL5 RCA NIB 4 for $10
6CB6 pulls $2 ea
6ER5 RCA NIB $5

15E Eimac (65 years old!) NIB $10

927 RCA $20
4637 (RCA) pull $20

5663 pull $5
5823 RCA $20
5879 NIB $7 ea
5879 pulls $3 ea

6442 pulls $5 ea
6771 Planar Triode pull $5
6977 / DM160 Mullard Indicator Tubes NIB $10 ea

7056 NIB $7
7554 Pencil tube pull $5
7843 pulls $10 ea or... 3 for $25

Tube Sockets and Accessories

---

5 pin ceramic sockets for Acorn tubes. NOS -- $5 ea

Birnbach 434 "50 watt" socket. Base is cracked clean through adjacent to opposite contacts, not noticeable from the top. Still quite useable as-is, or glue it. $8

Coaxial Planar Tube -- shielded heater/cathode contact assembly. Fits 2C39, 3CX100A5 or similar. Silver plated, NOS -- $12 each

Collins -- 22 assorted tube shields, 7 & 9 pin, short & tall. RFE. $20 all

Eimac 3" (or so) diameter Grid lead contact & 6" wire to lug as used on 3CX2500, 3CX3000, leaded versions etc. $5 pair

Johnson 122-101 ceramic 7 pin septar socket (accepts 826, 832, 4D32, PL6549, PL6569, etc). These were likely a special order as they have the standard ground shield but, no ground clips. NOS though, a bit dusty & tarnished from long storage -- $10 ea.

Johnson 122-237 ceramic 7 pin giant socket for 813, etc. NOS, $15

Johnson 122-237 ceramic 7 pin giant socket for 813, etc. Used, $10 ea.

Johnson 122-247 ceramic 7 pin septar socket (accepts 7094, 8877, 832A, etc.) Used, $10 ea.

Johnson 122-247A or 122-248 ceramic 7 pin septar socket (accepts 7094, 8877, 832A, etc.) Used, $10 ea.

Millen 36001 or National SPP-9 -- 9/16" Ceramic Plate Caps (fit 813 or similar) Used. Your choice, $3 ea.

6 inch plate leads with National medium (.566") clips on one end; solder lugs on the other. The leads are covered with 16 each 5/16" diam. ceramic insulators. $5 pair.

Pomona Electronics TVS-7 & TVS-9 test extender sockets for 7 & 9 pin miniature tubes. Little used. $40 both.

4 Pin Octal outline female cable connector with hood. Used -- $3

6 Pin Octal outline female cable connector with hood. NOS -- $5

Completely shielded Amphenol Octal (8 pin) M&F pair cable connector pair. Screw on coupling. NOS -- $15

9 pin Octal outline socket, round (may be used on cable or chassis). NOS -- $7

9 pin Octal outline socket, chassis mount w/ears. NOS -- $7

11 pin Octal outline plugs. Amphenol 86-CP11 or similar. New -- $5 ea.

11 pin Octal outline plugs. Amphenol 86-CP11 or similar. Used -- $3 ea.

11 pin Octal outline sockets, round (may be used on cable or chassis). Used -- $3 ea.

11 pin Octal outline sockets, chassis mount w/ears. NOS -- $7 ea.

11 pin Octal outline sockets, chassis mount w/ears. Used -- $4 ea.

11 pin Octal outline M&F pair cable connectors with hoods. NOS -- $15

Completely shielded Amphenol 11 pin Octal outline M cable & F chassis connector pair. Screw on coupling. NOS -- $20

12 pin Octal outline plugs. Amphenol 86-CP12 NOS -- $7 ea.

12 pin Duodecar (Compactron) sockets. NOS -- $5 ea.

12 pin Duodecar Plugs. NOS -- $5 ea.

13 pin socket (whatever that's called!), slightly smaller pin circle than Duodecar. NOS -- $5.

IERC Heat Dissipating tube shield, size T12. $10

Bird 5L Power Meter element -- for model 43 or similar meters. 5 Watts, 1.7-2.2 GHz, New -- $100

EH Research G710 -- 50 Mhz Single/Double Pulse generator 20Hz-50MHz in ten ranges, 10nS-50mS delay, 10nS-50mS width, amplitude control for complementry outputs, plus internal/external trigger in, trigger out. 8+" wide x 3+" hi x 12" deep. -- $150

EH Research G750 -- 100 Mhz Single/Double Pulse /Sq. Wave generator 6Hz-100MHz in twelve ranges, 10nS-50mS delay, 10nS-50mS width, amplitude control for complementry outputs, offset control, plus internal/external trigger in with level control, trigger out. 8+" wide x 3+" hi x 12" deep. Note: Square wave mode only above 50 MHz. -- $200

Gentec, Inc. RF Wattmeter -- mounted in a LMB box. Two ranges 0-250W & 0-1000 watt. UHF female and BNC male connectors on attached sensor. Frequency range unknown. -- $15

Hewlett Packard 141T Spectrum Analyzer system including mainframe, 8552B IF section, 8553B, and 8555A RF sections plus 8443A Tracking generator. All original knobs, terminators,etc. clean and working fine. With manuals (or copies thereof...) for all units. -- $2200

Hewlett Packard 204B -- Sine Wave Generator, 5hZ to 500 KHz in 5 decade ranges. Main knob needs cleaning, otherwise working fine. 110/220VAC power, less cord. -- $40

Hewlett Packard 221A -- Square Wave Generator, 1hZ to 10 MHz in 8 decade ranges, w/Symmetry control, 0-5 volts variable output into 50 ohms. 5"x3"x11" deep series 1 HP cabinet. All original knobs, clean and working fine. 110/220VAC power, less cord. -- $50

Hewlett Packard Strobline Demonstrator A rare sales tool from the late 1960's for dot matrix readouts built in a 5"x3"x11" deep series 1 HP cabinet. Complete your HP collection now! Working! 110/220VAC power, less cord. -- $100

Kepco Dual PCX 15-1.5 MAT Two 15 volt 1.5 amp max lab power supplies in a Kepco PC-4 cabinet. Individual voltage & current meters (4 total). Ten turn voltage adjusts -- $50

Lambda LMOV-3 -- Overvoltage protector. 18-70 VDC range -- $10 ea

Motorola -- M68HC705KICS K-Series In-Circuit Simulator, New in Box including software, all manuals & databook and target device. -- $75

Olektron Corp. -- Directional Coupler Model 330977-1, 2-28 MHz range. -20dB nominal coupling. Four ports and two pots. Low power rating (5W?). New -- $10 ea.

Tektronix DC503 -- Digital 100 MHz Frequency Counter/Timer module for TM500 series mainframe. $250

Tektronix DC504 -- Digital 80 MHz Frequency Counter module for TM500 series mainframe. $125

Tektronix DD501 -- Digital Delay module for TM500 series mainframe. 1-99999 counts up to 65 MHz. w/ original manual. $125

Tektronix PS502 -- Triple Power Supply for TM500 series mainframe. 5V @ 1A plus, dual adjustable tracking 10-20 volt @ 400mA. $125

Tektronix SG503 -- 250 KHz - 250 MHz Leveled Sine Wave Generator, 5 mV to 5.5V P-P output level into 50 ohms, for TM500 series mainframe w/ original manual. $250

Tektronix SW503 -- 1-400 MHz Sweep Generator for TM500 series mainframe w/ original manual. $500

Olson model CB-067 -- SWR & Field Strength meter. In half of original box with instructions & short UHF-UHF cable. Screw in whip antenna is missing. Rated 1KW. UHF connectors. Little used, late 1970's vintage. $10

TEI model 28-200 -- relative power / SWR / Field strength meter -- screw in whip antenna is missing. UHF connectors. $7

Electronic Books

More books for sale may be seen here:

http://qsl.net/wc6w/wc6wfsw/index.html?fr50.html

These are originals unless noted.

ABC's of Transistors by George Mann, First Edition, Fourth Printing, August 1961. Very Good condition. 96 pages. $4

Allied's Electronics Data Handbook -- Second Edition, 1959. Previous owners name written on cover, otherwise excellent condition, 64 pages. $2

Amateur Single Sideband by Collins Radio. 1962 Hardbound. Excellent condition except one previous owner's name in ink on p.106. 143 pages -- $60

Antique Radio Classifieds -- May, June, July (2 copies), August 1985 -- $1 all

ARRL
Antenna Book, 13th edition, 1974, good condtion -- $7
Proceedings of Microwave Update '89, 200 pages -- $10
Radio Amateur's Handbook, 1983. Very good condition -- $10
Radio Amateur's Handbook, 1977. Cover a mite worn, insides fine, no apparent writing --$10
Radio Amateur's Handbook Ninth Edition, 1931. Has a typewritten note glued to the frontspiece stating that it belongs in the radio room of the USS Maryland (the Battleship which was moored just inshore of the USS Oklahoma on the first Pearl Harbor Day). Cover somewhat rough, torn at spine, index and first two chapters missing up to page 24, otherwise good, no writing in text nor torn pages. Softbound, about 200 pages left -- $500
Confidential Frequency List by Ferrell, 6th edition, 1984. 300 pages. -- $3

The Contact Modulator -- 8 booklet series by the Engineering Staff of Airpax with more than anyone ever needed to know about choppers. About 30 pages per booklet. Very good condition 1958-1960 -- $50

Dictionary of Electronic Terms by Allied Radio Corp, Eighth Edition, First Printing, May 1968. 112 pages. $4

Electronics in Engineering by Hill, McGraw Hill, second edition, 1961. Hardbound. Excellent condition. 340 pages. $10

Electronics Engineering Manual, Volume 5 -- Electronics Magazine article compendium. Very good condition. 252 pages -- $10

Electronic Shortcuts for Hobbyists by Sylvania Electric Products. Second edition, first printing, 1951. Cover separated, otherwise good condition. 35 pages. $3

5 Meter Radiotelephony by Frank Jones -- This is a REPRINT of a 1934 booklet Excellent condition 20 pages or so $2

General Electric Nickel-Cadmium Battery Application Engineering Handbook -- 1971 plus supplemental volume 1973. Just a bit of writing on the cover of the first book, otherwise very good condition. $10 both books.

GE Transistor Manual -- 7th edition 1964. Paperback. Good condition 650 pages. $5

Handbook of Industrial Electronic Circuits by Markus & Zeluff 1948. Hardbound. Very good condition. 272 pages. $10

Having Fun with Transistors by Len Buckwalter, Howard W. Sams, First Edition, First Printing, 1962. Very good condition. 127 pages. $4

Hewlett Packard Meaursement News February/March issue... somewhere in the 60's. $1

Hughes 0-5KW Power Amplifier Equipment -- June 1962. Includes block diagrams plus background on Hughes facilities & staff. Labeled "exhibit B", appears to have been part of a project proposal. 55 pages. $7

Hughes 10 KW HF Automatically Tuned Transmitter -- June 1962. Includes block diagrams plus background on Hughes facilities & staff. Labeled "exhibit B", appears to have been part of a project proposal. 63 pages. $7

Hughes 10 KW HF Transmitter -- December 1961. Includes block diagram, abbreviated schematic, some photos. 22 pages. $7

Hughes Aircraft Digital Computer Course book -- circa 1957 based on some propietary core memory system of that era. 100 or pages in a 3 ring binder plus some blueprints, $10

Hughes Aircraft -- The Hacon Story A slice of history regarding a transmitter fitted on the Convair B-58 bomber, $10

Hughes Aircraft -- Vectors -- Company newsmagazine, 20 pages, 4th Quarter 1963. -- $3

The Instrument Sketch Book -- Weston Electrical Instruments, 32 pages, © 1941. Softbound, good condition with some writing on first five or so blank facing pages that were intended for note taking in this educational piece. $10

Intel ASM86 Language Reference Manual -- 1981. $5

Low Level Measurements by Keithley. 1984, 125 pages. Softbound, excellent condition. $5

Magnetic Amplifier Circuits by Geyger, McGraw Hill, second edition, 1957. Hardbound, cover ripped at spine, previous owner(s) info inside front, insides good. 392 pages. $10

Components for Microcomputer System Design by Dave Bursky, Hayden, 1980. Large format, softbound, excellent condtion, 250 pages. $5

Most Often Needed 1926-1938 Radio Diagrams -- originally published by Supreme Publications 1941. This is a REPRINT, by Vintage Radio. 240 pages, solid schematics! Like new, $10

MOSPOWER Applications -- by Siliconix, 1985. Approx. 200 pages. Excellent condition, $40.

Motorola
The Semiconductor Data Library Vols. 1 & 2, First edition 1972 plus Reference Vol. Third editon, 1973. $30
Power Transistor Handbook 1960, First edition. Spiral bound. Good condition 200 pages. $10
National
NS16000 Programmer's Reference manual, preliminary, 1982. Appx. 100 pages. $5
The COPS Programming Manual. Early draft copy, 210 pages. Circa 1980. $5
National Bureau of Standards -- Report #5589 Facilites & Services of the Electronic Calibration Center Radio Standards Laboratory, 1958.-- $3

Navy Department -- Bureau of Aeronuatics Manufacturing Operations Section 20 booklets, 5" x 7½" totaling 2½" thick of perhaps a set of 30, detailing metal forming for aircraft construction. A couple of the covers are loose, otherwise very good condition. Copyright 1943-44 -- $25

101 Easy Audio Projects by Brown & Kneitel, First Edition, First Printing, 1968. 168 pages. $4

102 Simple Transistor Projects by Kneitel, Seventh Printing, 1969. 120 pages. $4

Principles of Permanent Magnet Moving Coil & Movable Iron Types of Instruments -- Monograph B-7 by Weston Electrical Instrument Corp, 1933. Cover a mite worn, insides excellent. 95 pages. $20

Programming the 6502 by Rodnay Zaks, Sybex. 1978. 300 pages. $7

Radar Electronic Fundamentals T.O.16-1-195 -- US Navy Technical manual. June 1, 1944. Good Condition except for water damage on front edge; no pages stuck nor ink bleed. 474 pages. $5

Radio Collector's Guide 1921-1932 -- revised edition. Langley & McMahon, Vintage Radio. Excellent conditon. 1981. $7

Radio Fundamentals TM11-455 -- US ARMY Technical manual. 22 May 1944. Good Condition except for owner's sticker inside front cover and a little writing on title page. 333 pages. $5

RCA
Linear Integrated Circuits & MOS Devices plus application notes, 2 book set: SSD-201 & SSD-202, 1972. About 1000 pages total. Good condition. $20
Transistor Manual SC-13, 1967. Paperback. Good condition 540 pages. $10
Silicon Power Circuits Manaual SP-50. 1967. Paperback. Good condition 415 pages. $10
RC-18 Receiving Tube Manual 1956. Spine broken, no pages missing, a bit of water damage around the edges. 340 pages, $4
RC-14 Receiving Tube Manual 1940. Front cover rough and half of spine cover missing. Insides good. 255 pages, $5
Television DC Component by K.R. Wendt. RCA Laboratories. Library bound. 1948. $5
Television Vol. 1, RCA Institutes, 1936. A collection of papers concerning the genesis of television. Softbound, a couple small tears at the bottom of the cover, insides in very good condition, 452 pages. $250
Transistor Servicing Guide. 194 pages. 1968. 194 pages. $5
Servomechanisms & Regulating System Design -- by Chestnut & Mayer. Previous owners name written inside cover, otherwise excellent condition, 500 pages. 1951 -- $7

Superheterodyne Converters and IF Amplifiers by Alexander Schure. Rider. Second edition 1963. 100 pages. Very Good condition. $5

Sylvania Gold Brand 26.5 Volt Subminiature Tubes Complete data, including many curves, on this product line. 1960, Large format, softbound, 84 pages. Very Good condition. $10

Transistor Radio Servicing made easy by Lemons, Second Edition, Fourth Edition, 1968. Very good condition. 144 pages. $4

Transistors by Louis Garner Jr., 2nd edition, 1954. Coyne Publishing distributed by Howard W. Sams. 105 pages Very Good condition $4

Tuned Circuits by J.M. Quinn, 1943. Small hardcover book 52 pages. Very Good condition, one page is punched with Los Angeles Public Library ID. $4

UHF Television Antennas & Converters by Lytel, Rider, 1st ed, 1953. Very Good condition. 115 pages, $4

Understanding Transistors by Allied Radio. 1962 First Edition, first printing. Good condition 96 pages. $4

U.S. Army Satellite Communications Agency Flyer. 1963 -- $1

U.S. Naval Communication Reserve "Tickler" 40 pages of pre-war newsletter that escaped a paper drive. Cover rough, insides OK. February 1941 -- $20

Vacuum Tube Voltmeters by John F. Rider, © 1941, printed 1942, hardbound, cover a little worn, original owners name & his Pearl Harbor posting written inside front cover, otherwise good condition, 180 pages. $10

Varactor Applications by Penfield & Rafuse, MIT Press 1962. Hardbound, good condition with original paper jacket under plastic cover, owners name on frontleaf and on two edges, 620 pages. $15

Very High Frequency Techniques by Radio Research Lab Harvard University, McGraw Hill, 1947. Volume #1, hardbound, cover a little worn, insides in very good condition, owner's name on inside front cover & frontspiece, 550 pages. $10

VHF UHF Manual by Jessop. RSGB, 4th edition 1983, approx 300 pages. Softbound, excellent condition. $10

Williamson Amplifer Data Collection Two Acrosound Transformer Catalogs, copies of two Radio Electronics constuction articles from the '50's, 6550 tube data sheet, Chicago BO-13 & BO-14 transformer data sheets, Two Stancor application notes detailing Williamson amps., plus a couple loose schematics -- $10 all

6437. Looking For...HF Rig

Yahoo group: ham4sale (2007 — 2015)
Date: 2011-06-04 03:28:21 UTC
From: jpetrocxme
Topic: 6433 Message: 6437

Hi all,

Just started looking for an HF rig. Want to get back onto HF.

1st choice -- TS-520 or 530 series
2nd choice -- TS 4xx series
3rd choice -- TS-8xx series
4th choice -- Heathkit SB-10x series

I am also considering some of the ICOM radios in the save vintage as above.

I am far from a rich man but willing to spend something reasonable.

Any input, suggestions or offers appreciated.

6438. SDR

Yahoo group: ham4sale (2007 — 2015)
Date: 2011-06-04 15:01:22 UTC
From: Ronald
Topic: 6438 Message: 6438

I am looking to try SDR but budget small. Might trade something for Flex 1000 or 1500 QRP ok.

6439. FS: Polyphaser 125MHz-1GHz Arrestors

Yahoo group: ham4sale (2007 — 2015)
Date: 2011-06-05 23:11:01 UTC
From: doc@kd4e.com
Topic: 6439 Message: 6439

FS: Polyphaser 125MHz-1GHz Arrestors
These are nos, extras from my new setup:
Polyphaser Specs:
IS-IE50LN-C2 Throughput Energy (typical): 137?J
Frequency Range: 125MHz to 1GHz
Max. Power: VHF 375W, UHF (low) 125W, 800MHz to 1GHz 50WW
Asking $20. each, shipped or $35. for the pair, shipped.

--

Thanks! & 73, KD4E

6442. WTB: Antenna Tuner-Small

Yahoo group: ham4sale (2007 — 2015)
Date: 2011-06-06 13:50:25 UTC
From: John P.
Topic: 6442 Message: 6442

Hi All,

  Getting back on HF and just bought a nice IC-725 at the local hamfest.

  Limited options for antenna so I am thinking of a stealth long wire with a tuner.

  I am looking for (WTB) a tuner perhaps similar to the MFJ-971 which has a meter - cross needle is preferred.
  Seeking an affordable one.

  All input, thinking and ideas very welcome and appreciated.

Thanks & 73,
John - WA2HIP

6444. FS: Radio & Test Eq manuals

Yahoo group: ham4sale (2007 — 2015)
Date: 2011-06-06 17:49:25 UTC
From: Radio WC6W
Topic: 6444 Message: 6444

These are originals unless noted.

Priced as shown or... $250 for all of them

Ampex
Model 600 Tape Recorder -- $10
Mddel 601 Tape Recorder (copy) -- $5
Army / Airforce / Navy
AN/URM25D Signal Gen (partial copy) -- $5
BC-314G Receiver (schematic copy only) -- $1
BC-344D Receiver (schematic copy only) -- $1
SCR-211 A-T plus AA-AL Frequency Meter -- $10
Hughes HTR-12A/C HTR-13A/C Radar -- $10
Navy Mark V Sextant (AN-05-35-22) unbound copy -- $7
Atlas -- 210/215 Owners Manual includes schematics; unbound copy, 40+ pages on 20 sheets -- $7

Concord Data Systems -- 224 Autodial Modem -- $3

Collins Radio
32S-1 Transmitter -- $40
520 5430 00 Vernier Tuning Knob -- $4
Cushcraft
Ringo Antennas AR-2, AR-25, AR-220, AR-450 -- $4
Ringo Rangers ARX-2, ARX-220, ARX-450 -- $4
Gilbert -- Model 4½ Erector Set Manual, 1950's vintage, cover a bit worn, insides fine, $10.

Görler -- UT-345 AFC / UT-343 FM Tuner -- $2

Groth -- TC2/TC3 Turn Count Dial data sheet -- $1

Heathkit
309C RF Probe -- $3
A-9C Audio Amplifier -- $7
FM-3 FM Tuner -- $7
FM-4 FM Tuner -- $7
0-12 'Scope schematic copy -- $1
WA-P2 Preamplifier -- $7
Hewlett Packard
150A/AR Oscilloscope -- $5
152 Dual Trace Amplifier -- $3
202D Oscillator (copy) -- $1
400A VTVM -- $3
400C VTVM -- $3

3312A Function Generator -- $15
6200A DC Power Supply -- $10
6201B DC Power Supply -- $10
6203B DC Power Supply -- $10
6204B DC Power Supply -- $10
7035B X-Y Recorder -- $15
8556A Spectrum Analyzer LF unit -- $30
8740A Transmission Test Unit Operating Note 3/68, 20 pages (copy) -- $2
10001A-D, 10002A-D, 10003A-B Probes Operating Note (specs & service info) $3
Hustler -- 4-BTV Trap Vertical -- $2

Hy-Gain
204BA 4 Element, 20 Meter beam manual. Partial original/copy from 2 manuals. Includes dimensions & SWR graphs -- $3
TH3 (copy) $2
Jennings -- Type RC5, RC6, RC10, RC21E, RC21G, RC40 data sheets -- $3 all

Magnecord
M-30 Tape Recorder + Sams manual -- $7
PT6-AH Schematic (blueprint) -- $2
Motorola
Motran (136-174 MHz) FM transceiver manual, 68P81043A45C $10
Motran (150.8-174 MHz) FM transceiver service manual (copy) 68P81041A15 -- $5
Model X53GJV-1091A Two-Way FM Radio (160-174 MHz) service manual (copy) -- $5
NU178-A Microphone (copy) -- $1
M68HC04EVM Evaluation Module User's Manual -- $10
McCoy Electronics -- 32B1 & 48B1 filter data sheet -- $2

National Radio
FBX & FBX-A Receiver Alignment instructions (copy - 8 pages) -- $2
SW-3 Receiver (copy - 12 pages) -- $2
Pilot Super Wasp -- Data Sheet #7 K-100 Battery Type kit assembly & operation manual (copy) -- $2

Polaroid -- Land Camera Model 360 User's Manual -- $3

QUME -- Laser TEN/LaserTENPLUS Maintenance manual NISW (new in shrink wrap) -- $7

Radio Shack
CT-101 Cell Phone Owners Manual -- $1
SA-10 Stereo Amplifier -- $1
21-1167A Ceramic Mike -- $1
TRC-83 CB Walkie Talkie -- $1
RCA
Pressure Microphone Type 88-A -- $3
5-E 5KW AM Broadcast Xmtr -- $15
Sabotronics -- 2000 DMM -- $2

Signal One -- CX7A (partial copy -- schematics mostly) -- $3

Sony
BVU-50 Videocassette Recorder Operation & Maint. Manual -- $20

VO-2850 Service Manual -- $20
VO-2860 Service Manual -- $25
Teac
MV-550 VCR Service Manual -- $5
MV-800 VCR Owners Manual -- $1
Tektronix
535/545 Operators Manual (the little one that goes in the top compartment) -- $5
2432 Digital Oscilloscope User Reference Guide New! (small) -- $15
P6006 Probe -- $5
P6047 Probe -- $7
P6201 Probe -- $10
FG503 Function Generator -- $15
PS503 Power Supply -- $15
PS503A Power Supply (back cover missing) -- $10
TG501 Time Mark Generator Comb bound copy -- $10
TELEX Hy-gain -- BN-86 Balun -- $2

Texas Instruments
SR-52 Calculator Operating manual -- $5
TI-83 Plus Calculator Guidebook -- $7
TI-89 Titanium Calculator Guidebook -- $10
Van Gordon Engineering -- SD-80 Dipole Antenna Manual (copy) -- $1

W2AU -- Balun Instructions -- $1

Xerox -- D-25 Printer Users Manual -- $2

Yaesu -- FT-101E / FT101 ES (in Japanese) -- $5

6445. FS: Crystals & Filters

Yahoo group: ham4sale (2007 — 2015)
Date: 2011-06-06 17:43:56 UTC
From: Radio WC6W
Topic: 6445 Message: 6445

Mechanical Filters

450 KHz Collins Mechanical Filters Used, checked OK

526 9901 010 & 526 9902 010 -- LSB & USB set, 2.2 KHz Bandwidth. $200 for the pair

---

Crystal Filters

10.7 MHz, 13 KHz Bandwidth Crystal filters. I believe these are pulls from some Motorola radio. Two carry what I think is a Mot part no. 532-0003-01.

They are all the same size & footprint. About 2+" long by 1" wide by 3/4" high. On the bottom, there are a pair of (4-40?) studs on diagonally opposite corners, in & out pins on the other pair of corners. A ground pin sits in the middle of one side. Assorted mfgrs. used $5 ea

10.7 MHz, 15 KHz Bandwidth Crystal filters. Made by Tyco. Same footprint as above. NOS $10ea

Motorola TLD5340A, 157.590 MHz, RCA connectors -- $5

Ceramic Filters

Clevite TF-01A, 455KHz center freq.-- $10 ea

Murata CFU455G, 455KHz center freq., 9KHz 6dB bandwidth, 1500 ohms, NOS-- $2 ea

Vernitron which acquired these designs from Clevite

TO-01A, 455KHz center freq., NOS -- $20 ea

TO-02A, 455KHz center freq., NOS -- $20 ea

Crytal Oscillators

CTS Knights JKTO-47 970-2602 -- 1MHz ovenized oscillator also bears Collins part number: 292-0308-010. Looks like NOS, w/data sheet. Original cost was $325! now only $50

Quartz Crytals

Electronic Research Co. EROX160-BM5, 1 MHz ovenized crystal. 115VAC heater, octal base. Used $25.

James Knights octal base crystal ovens, 6.3V heaters. JK02 used, $5
JK09 NOS, $10

James Knights Glass octal base (tube style) crystals
Type G9 97 KHz (split electrodes) -- $10

Motorola B5490303P2 Crystal ovens, octal base $3 ea

Signal Corps octal cased Crystals -- $10 ea
DC-15A-200KC

FT-241 -- 200 KC $7 ea

US Army Signal Corps CS-137, dual compartmented crystal case, with complete set of 120, FT-243 crystals -- channels 270 (5675 kc) through channel 389 (8650 kc) inclusive in 25KHz steps; all checked good! $300

WW2 vintage US Army Signal Corps CS-137, dual compartmented crystal case that holds 120 FT-243's, less crystals -- $40

Bliley AX-2 (FT-243 pin spacing) -- 14125.2 KHz -- $4

20 meter FT-243's -- 14267, 14346 KHz-- $7 ea.

40 meter FT-243's -- 7089.4 KHz-- $7 ea.

80 meter HC-6 / CR-18 / CR-27 -- 3566.667, 3932.16, 3952.3 KHz-- $5 ea.

160 meter H4 (large) 1936 KHz -- $4

FT-243 -- 2500 KHz -- $5

CR-1A -- 5014.5, 5047.3, 5780, 5910, 6750, 6772.222, 7580, 7830, 7920, 7960, 8007.69, 8050, 8205, 8307.647, 8320, 8361.54, 8380, 8386.66, 8392 (3), 8392.31, 8423.076, 8423.08 (3), 8428 (2), 8453.84, 8453.85, 8460, 8476.92, 8512.777, 8538.33, 8592.3 (2), 8870, 8950, 9720 (2), 10208.333 KHz- $2 ea or $25 all

---

FT-241 -- 398.148KHz (Ch 15), 475 (Ch 342), 490.277 (Ch 353), 516.667KHz (Ch 79), -- $1 ea

---

FT-243 crystals -- $2 ea, or $30 for all

Excellent shape, bought new old stock a little over a year ago. I control it with HRD so the plastic is still on the display:)

Non-smoking never mobile comes with original box, mic, power cable, and manual.

Asking 800/usd shipping will be 30 and only in the CONUS.

From: netravler
Topic: 6449 Message: 6449

I'm offering a good solid Kenwood TS-50S that was used as a RACES station. It was carried around in a "Go KIT" and never really had much use maybe 10 or 20 hours.

It has some scratches and an engraved ID on the top cover and also a slight long scratch on the bottom side cover. The face is clean and no scratches on the display. As for operation its 100%. I put it on the air through my Coaxial Dynamics watt meter to show power output. Receiver sounds good and I ran it around the bands this weekend for a short time. Lots of Europe and China on the air. Included is the power cord and stock microphone and a reprint of the user instruction manual. This is sold as-is but I doubt you will be disappointed. Sale only to 475 (firm) + shipping 20... flat rate US/CONUS only.

ht=k1cc> &highlight=k1cc for my other items.

VHF mobile antennas

All items are new in sealed original plastic bags, prices include shipping

** (2) Maxim 7305 K3 glass mount antennas (800-900 MHz), perfect for scanner use or retune for ham bands, open coil whip

with 15 foot coax cable and mini-UHF connector -- $25 each

** Antenna Specialists ASPD910T flat surface mount mobile antenna, 3 db gain, 824-896 MHz with TNC male connector -- $25

** Larsen Kulrod T W-145B whip, 5/8 over 1/4 wave, 3 dB gain, 450-470 MHz -- $15

** Larsen NMOQ Spec whip, 1/4 wave, 136-512 MHz, includes chrome base and chrome whip -- $15

** Larsen NMO UHF Base B, 460-1300 MHz, black base only -- $10

** Larsen windshield mount, sealed package with the chrome foot, adhesive and hardware for the Larsen glass-mount antennas.

Does not include the inside coupling unit or the whip -- $10

** Larsen 2m mag mount 5/8-wave -- $25 shipped

VHF HT antennas and accessories

** 54 in whip antenna with loading coil -- $10 shipped

** 10 in extended rubber ducky -- $10 shipped

** Kenwood PB-6 NiCd with BC-9 wall charger for TH-25/45/55AT -- $10 shipped

** New leather case for larger old-style Icom HT -- $3 shipped

HF/VHF parts and cables

** Lots of coax cables, short pieces and some reels, also have some 75 ohm 1/2" and 5/8" hardline -- Pickup only, please inquire

** Icom/Kenwood (?) 2-prong DC power cable, came from older style radio -- $10 shipped

** TCXO crystal for Icom -- CR275A and CR21 -- $5 shipped

** TCXO crystal for Icom 746PRO -- CR337A -- $5 shipped

** Small center knob for Kenwood TS-2000 (new from Kenwood, P/N K29-5398-03 -- $5 shipped

** Icom 746 interface cable -- 8-pin DIN to 3-conductor 1/8" plug

** Icom interface (RTTY or digital?) cable -- 8-pin mike plug to 1/4" 2-conductor plug -- $5 shipped

** Yaesu FT-847 power switch (new) -- $5 shipped

** Heil AD1-iC adapter cable for Icom (the one with no DC blocking capacitor) -- $17 shipped

** Kenwood TS-850 keying and amplifier interface cable -- 7-pin DIN to (3) RCA plugs -- $7 shipped

** (2) Vintage lightweight Superex Model 601 headphones (high-impedance, I think), look like new -- $5 each shipped

** Realistic dual impedance mike, cardiod pattern, looks like new -- $25 shipped

Electronic parts

** (1) General radio Type 973M precision potentiometer, 200 ohms -- $6 shipped

** (25) General Radio 975M 5K ohm precision potentiometers (new) -- $6 each shipped

** (12) General Radio 973M 5K ohm precision potentiometer (new) -- $6 each shipped

** (2) Cornell Dubilier mica caps, 0.00005 mfd, 3000 V, 1.2A -- $5 shipped

** (1) Potter-Brumfield 2PDT relay with socket, 24 VDC -- $5 shipped

** (2) 8-pin octal relay bases, new - $8 shipped

Computer stuff - All offers considered!

** (2) QuickShot Super Warrior QS-201 joysticks - Make offer

** HP Colorado 8 GB internal IDE tape backup drive + tapes -- Make offer

** Leading Edge Model D with monitor, really nice -- Make offer

** Intel 8087 Gold math coprocessor (C8087-3) -- Make offer

** Avatar Shark 250 external drive + optional PC Card interface + disks -- Make offer

** Computer monitor desk-mount adjustable arm, very rugged, no shipping -- Make offer

** Assorted new computer fans -- Make offer

** External 120 GB USB hard drive, very nice condition -- Make offer

** IBM 75GXP 46.1 GB 3.5" hard drive, new in box -- Make offer

** Microsoft 2-button Serial Mouse, very nice -- Make offer

** Microsoft 2-button PS/2 Compatible mous -- Make offer

** Norton Ghost 9.0 - Backup software by Symantec -- Make offer

** PCSync LapLink - Software including USB cable and serial cable for file transfer and synchronization

between computers -- Make offer

** Money 2007 Premium - Personal finance software -- Make offer

** Zone Alarm Internet Security Suite 2007 - Firewall and anti-virus protection software -- Make offer

** Adobe Photoshop Album 2.0 - Photo editing and organizing software --- Make offer

** Norton AntiVirus 5.0 - Anti-virus protection software -- Make offer

** (2) Speedstream 5260 Ethernet ADSL modems -- Make offer

Codar PR30 preselector amplifier, 1.5 to 30MHz. Increases signal and improves selectivity on older receivers.
This is the one without internal psu so needs ht and heaters, usually supplied from receiver.
Outer case needs a repray otherwise nice. Comes with power lead and matching plug. £30

6454. Cushcraft A3s triband beam

Yahoo group: ham4sale (2007 — 2015)
Date: 2011-06-09 14:54:56 UTC
From: Patriot in Ohio
Topic: 6366 Message: 6454

I have a Cushcraft A3s tri-band beam for either sale, $200.00, or trade for a HF no ground vertical. I have the manual and the beam is in good condition. It is down and ready for pick up in NE Ohio. With the exception of the beam it has been stored inside. I would be willing to drive part of the way to meet since gas prices are high. Please call me at 330-323-6406 or email with any questions.
Thanks, KC8WVG Bill 73

FS: Pierson KE-93 w/AC & DC PS's w/Original Manual.

Asking ...

Pierson KE-93 $125.
Pierson AC PS w/Speaker & SWR Meter $95.
Pierson DC PS $75.
All three units for $275. including standard shipping.
(The AC-PS will not be sold until the KE-93 has been sold
but I am willing to sell the DC-PS separately.)
Reasonable offers encouraged.

The Pierson is a 160-10m mobile receiver + AM-BC. It will copy AM, CW, &
SSB.
For what it is worth ... Collectors rate the Pierson KE-93 as "scarce".
They rate the matching AC Power Supply (it includes the Speaker and the
SWR Meter) the same. I believe that the matching DC-PS is considered "rare".

Lots of pictures as well as the manual and schematics here:
http://kd4e.com/pierson.html

All units are as-described and pictured but are untested and are sold as-is.

(On the advice of other Hams I am seeking a Drake 2B to pair with my
CE 20-A SSB transmitter. I will make a direct trade for a clean and
operating 100% 2B. It does not have to be cosmetically perfect.)

6456. Want to Buy: 6 Meter tranceiver, FM,

Yahoo group: ham4sale (2007 — 2015)
Date: 2011-06-10 16:25:13 UTC
From: mspaddles40
Topic: 6456 Message: 6456

We would like to buy a 6 meter tranceiver, the receiver must work but we don't care if the transmitter works or not. Doesn't necessarily need to have a mic with it, either.

Thank You
Kiss-Electronics

Time Meters

Hobbs 120 VAC 60Hz 99999.99 (Yes, displays down to 100th's!) Hour running time meters about 1" high by 2" wide rectangular with triangular shaped mounting ears. New $20 ea

A.W. Haydon miniature 10000 Hour running time meter. Case is about 1/2"square (exclsive of mounting flange) by 1" deep. 115VAC 400Hz NOS $10

Elgin 1000 Hour running time meter. Case is about 5/8" round by 1.5" deep. 115VAC 400Hz Unused $8

RF Ammeters -- Thermocouple type

rfamm
GE DW-44, 4 Amp, 2-1/2" round -- NEW in box, $50 pair

Westinghouse NT-33, 5 Amp, 2-1/2" round -- used, $15

Westinghouse OT-33, 3 Amp, 2-1/2" round -- used, $15

Westinghouse NT-33, .25 Amp movement - 5 amp scale, 2-1/2" round -- used, $30 pair

Weston Model 507, 3 Amp, 2-1/2" round -- used, $15

Digital Meters

Datel
DM-3100N 3.5 Digit LED volt meter w/ 1/2" high LED's. Front bezel is 1.25" high x 2.875" wide. Meter is 4" deep.
Used, checked OK. $20 ea.
New in Box. $35 ea.

Integra Microwave
A210305 4.5 Digit LED volt meter w/ .3" high LED's. Front bezel is 1.25" high x 2.875" wide. Meter is 4" deep. RFE $20 ea

Non-Linear Systems
PM4 10 volt 4.5 Digit LED volt meter w/ .3" high LED's. Front bezel is .9" high x 2.875" wide. Meter is 3-3/4" deep including PCB edge connector. RFE $20

Cole Instrument Meters

Center zero, 3" square panel meter, 10-0-10 microamp scale & movement. Two available. -- $25 ea

General Electric Meters

GEmtrs
** NEW in box -- $15 ea **

251-1 -- 2.25" center zero rectangular panel meter 10-0-10 Volt scale & movement. Two available.

251-1 -- 2.25" center zero rectangular panel meter 5-0-5 Volt scale & movement.

Part no. 50-283013MTMT1 3" thin edgewise panel meter 10V scale. New in an old box

** Used -- $10 ea **

DW-91 -- 2.5" center zero square panel meter 1-0-1 Amp scale & movement.

50-162111LALA2 -- 3.5" square panel meter, 10 Amp scale & movement. 2 available

DO-41 -- 3.5" round panel meter, 1 Milliamp scale & movement.

** Used -- $15 pair **

DO-53 pair of 3+" meters 2A/1V FS One is a 2A scale and movement & The second is a 1 volt meter with a triple scale -- 25 mA, 250 mA, 500 mA for use with external shunts. There is a small crack in the right side of the bakelite front of this second meter which could be filled in with black filler. The glass is fine.

Simpson Meters

** NEW in box -- $20 ea **

Model 1212-- approx 1.75" square front, 1.5" mounting hole -- 3 Amps DC

Model 1247 -- approx 2.5" square front, 2.17" mounting hole -- 50 Volts AC

Model 1257-- approx 2.5" square front, 2.17" mounting hole -- 10 Volts AC

** Used -- $10 ea **

Model 1227 -- approx 2.5" square front, 2.17" mounting hole -- 30 Volts DC

Model 1327 -- approx 3.25" square front, 2.75" mounting hole -- 2 Amps DC

Model 1521 -- 1.5" edgewise panel meter 1 Milliampere movement -- scale is marked "M" at the left, "O" in the center and "S" on the right.

Triplett Meters

6460. Hallicrafters S-95 parts or repair question

Yahoo group: ham4sale (2007 — 2015)
Date: 2011-06-10 17:04:29 UTC
From: w6adv
Topic: 6460 Message: 6460

I have a restorable Hallicrafters S-95 that is complete except for the back and bottom covers being missing. The knobs and dial are good. the front panel is 7/10. It lights up and hums. This is the VHF FM tunable with squelch, good for listening to police and fire. I'm told it's fairly easy to retune to cover 2 meters.

I'm not sure it is cost effective to secure the missing covers and install new caps only to then sell radio.

I'm sure this model shares may parts with other radios of the era, so the quest is....should I sell it or part it out?

Anyone have a bottom or back cover? Offers for parts or whole radio welcome.

Thanks,

Craig

Topic: 6463 Message: 6463

Hi and thanks for reading, i am looking for a 32 position tone board assembly to help update an older 2m rig for repeater usage. If you have such an item at a reasonable price plz email me at kb8rwi@... with price and shipping
thank you
Mike - KB8RWI

6464. HF Rigs, Desk Mics, Coax Switches, Wattmeters FS

Yahoo group: ham4sale (2007 — 2015)
Date: 2011-06-11 12:40:03 UTC
From: Ken Simpson, W8EK
Topic: 6464 Message: 6464

HF Transceivers, Power Supply, Desk Microphones, Coaxial
Antenna Switches, Wattmeters and SWR Bridges For Sale:

TenTec 561 Corsair II, HF transceiver:

Many consider the Corsair to be the best rig that TenTec
ever made, before the Orion or Eagle. It is not a
synthesized rig, so phase noise is virtually nonexistent.
This means that it has a really superb receiver that is
far better than most of the Japanese rigs. It covers 160
thru 10 meters, including the WARC bands, and has such
things such as band pass tuning, notch filter, QSK, noise
blanker, etc. It has 8 pole filter in the 9 MHz IF, for
additional selectivity. It has up to 100 watts output,
with front panel adjustment for QRP, and is all solid
state. It also has a built in keyer.

Electrically, everything works 100%. It is an exceptional
performing unit. The PTO is smooth and works great.
Cosmetically, it is also in great condition. No defects
that I can find. Manual is included for $550.

TenTec 585 Paragon HF Transceiver:

The Paragon is a top of the line transceiver that includes a
general coverage receiver. It covers 160-10 meters, including
WARC bands, with 100 watts output. The receiver is fantastic.
It has dual VFOs and many memories built in, along with a
speech processor. Basically, it has about every feature that
a ham could want in an HF rig.

This particular unit works 100% as best I can tell. Since the
rig does so many things, I am sure that there is something I
didn't test, but I don't know what it is (or I would have
tested it!). It has had all updates completed by TenTec.

Cosmetically, it is in extremely nice shape. The front panel
is extremely good. Most all of the lettering is clean and
crisp. This one is in exceptional condition. It also has the
Giehl chip in it making it similar to a Paragon II.

Large manual and power cord included for $650.

TenTec Power Supply:

"Switcher / 25" 25 amp switching power supply:
This is a 25 amp switching power supply in a case that

matches the early Omni series case, with the metal bezel around it. It is in a case that is the same size as a 243 remote VFO. It has an ammeter on the front, along with Switch, TenTec logo, and output bulb. The front panel basically looks like a 280 power supply with a metal bezel, but says "Switcher/25" on it. It is very quiet, and well shielded, and does not produce any electrical noise that I could find. $175

TenTec 705 desk microphone
This electret desk mic has the PTT and "hold" buttons.
It works great, and looks close to new.
With paper work for $75.

Kenwood MC-80 Desk Microphone:

The Kenwood MC-80 is an omnidirectional electret condenser "gooseneck" desk mic. It has UP-DOWN tuning plus a built-in pre-amp. There is a switch for PTT and also a lock feature. The mic impedance is 700 ohms so it can be used with a wide range of models, and it has a frequency response of 200 Hz to 7 KHz. There is a potentiometer adjustment on the back of the mic stand to adjust the output level. The mic terminates to a standard 8 pin Kenwood mic plug. It requires voltage from the Kenwood transceiver to operate.

This one works fine, sounds good, has a new wind screen, and is in its original box. With paper work for $75.

Coaxial antenna switches:

B & W CS-3 G "Protax" (formerly called Model 593)
This is a 3 position antenna switch with the four SO-239 connectors coming out the back of the rectangular enclosure. It does ground all unused connections.
This one works fine and looks like new. With paper work for $30.

B & W CSR-5 G "Protax" (Formerly known as Model 376)
This is a five position antenna switch with the six SO-239 connectors coming out of the switch like the spokes of a wheel. Unused connections are grounded.
This switch is in its original box, with paper work, and appears unused. These go for about $75 new. Buy this one for only $55.

B & W Model 550 G coax switch
This model will switch up to 5 antennas, and DOES ground unused antennas. It has SO-239 connectors on the sides, with the coax coming out like spokes of a wheel. It is in good condition and works fine. Mounting bracket is included for $30.

Wattmeters:

Dentron W-2 Dual Meter HF Wattmeter:
This wattmeter has two separate meters and is designed for use on the HF bands (1.8 to 30 MHz). It has full scale readings of 2000 Watts and 200 Watts. It has a separate sensor that can either be used remotely, or can be attached to the enclosure for a more compact unit. It is in a nice black enclosure that will match most ham gear.
This one works fine, and looks very close to new. No scratches, dents, or dings.
With paper work for $75.

Micronta 21-520 A Dual Meter HF Wattmeter:
Full scale readings of 10, 100 and 1000 Watts. It has a remote pickup sensor with about 3 feet of cable to the dual meter control head. It reads both SWR and forward watts at the same time, on the dual meters, which are fairly large. This one is in extremely nice, close to new, shape. $55

Heath HM-2102 VHF wattmeter, covering 50 to 160 MHz. Similar to the HM-102, but for VHF frequencies, with 250 and 25 watt scales. It can also be used to check SWR, and has a remote sensor that can either be left inside the meter, or separated from the actual meter. SO-239 connectors in and out. This particular meter works great, looks great and includes paper work for $45.

SWR Bridges:

Both of these cover from 3 to 150 MHz, covering HF, 6 meters, and 2 meters, so are ideal for the new rigs with 6 meters and 2 meters in them. SO-239 connectors.

Quement SWB-2
This unit features two separate meters -- one for reading forward power and another for reading SWR. This permits one to easily monitor both the power going out, and the SWR on the antenna at the same time.
It works fine and looks great. With paper work for $40.

Royce 2-100 Single Meter SWR Bridge / Field Strength Meter
This one works fine, and looks extremely nice. I do not see any scratches on it, but it does have a previous owners name on it. In its original box with original instructions. $32

I also have many other accessories available such as many different types of microphones, HTs, VHF and UHF rigs, HF and VHF/UHF antennas, etc.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

6465. Yaesu FT-2000D HF Transceiver package deal

Yahoo group: ham4sale (2007 — 2015)
Date: 2011-06-11 20:27:59 UTC
From: ART SEARLE
Topic: 6465 Message: 6465

For Sale - Yaesu FT-2000D 200 watt HF Transceiver package includes:
FT-2000D Transceiver
FP-2000 Power Supply
DMU-2000 Data Management Unit
RF uTuning Kit A 160 m Band
RF uTuning Kit B 80/40 m Bands
RF uTuning Kit C 30/20 m Bands
YF-122C Collins CW Filter 500 Hz
YF-122CN Collins CW Filter 300 Hz
RF Space SDR-1Q Software Defined Receiver with circuit board for FT-2000 installed.

This transceiver is in excellent condition. It has no scratches, was kept covered when not in use and was always in a non-smoking environment. The whole package is for sale for $2,200.00. As I do not have the original boxes this package is available for pick-up only in Lake Grove, New York, located in central Long Island.

For Sale HT Battery Chargers

W&W Manufacturing MasterCharger 1A & 1 NiMH/NiCd HT Battery Chargers

with two cups for Alinco HTs using batteries EBP-45N & 46N, EBP-10N & 12N & EBP-20N & 22N

In original boxes. The MasterCharger 1A was never used but is 100%.

$50 + shipping for both units

W&W has additional cups for other radios which makes them a very attractive tool.

PayPal, Postal Money Order or Personal Check are all fine.

Questions? Email or call me anytime!

Thanks & 73,

Gordon Beattie, W2TTT@...

6472. FS: Coax connectors & a few others

Yahoo group: ham4sale (2007 — 2015)
Date: 2011-06-14 18:08:08 UTC
From: Radio WC6W
Topic: 6472 Message: 6472

New Coax Connectors

These are all vintage NOS made in USA parts. No 3rd Millennium imported junk!!

Amphenol MHV connectors
Two 28100 right angle cable males & two 27025 panel mount females. -- $40 all.

Amp N Female Cable crimp style connectors, part no.: 225664-2 -- $2 ea.

Amphenol UG-30C/U N Female-Female Bulkhead Connector -- $10 ea

UG-88/U BNC Male cable connector for RG-58 -- $2 ea

Amphenol UG-201 Male N - Female BNC adapter -- $10 ea

UG-260/U BNC Male cable connector for RG-59, RG-62, etc. -- $4 ea

UG-536 B/U N Male cable connector for RG-58 size cable -- $6 ea

UG-560/U HN Female panel mount connector -- $15 ea

UG-625 B/U BNC Female panel mount connector -- $2 ea

UG-657 U Sealed BNC Female panel mount connector -- $3 ea

UG-692/U SM Female Cable connector -- $10 ea

UG-932 A/U MHV Male Cable connectors -- $10 ea

UG-961 A/U MHV Female Panel connector -- $12

Automatic / Cannon SM Right Angle Female Cable connector -- $10 ea

Kings KH-39-11 HN Female Cable connector -- $20

F-81 F-female/F-female barrel connector -- 3/1$

Amp 2-321444-1 BNC Male Cable connector -- $2 ea

Below are all new crimp on connectors, with all hardware, in individual plastic bags; late 80's to early-mid 1990's date codes. I believe that they are all for RG-59 size cable. -- $1 ea

Kings Electronics

KC-59-642-M06 BNC Cable Males
KA-59-385-M06 TNC Cable Males
KA-19-43 TNC Bulkhead Females

Amphenol 558-86 BNC Cable Males

Amp 2-329064-1 BNC Cable Males

Used Coax Connectors

These are used, fairly clean, mostly vintage Amphenol parts; Quantities up to 20 are available for some of these.

UG-27/U N Right Angle -- $2.50 ea or 5/$10
UG-57B/U N Male-Male connector -- $4 ea
UG-107B/U N F-M-F Tee connector -- $5 ea

UG-131/U N Female to SKL Female -- $5 ea
UG-175/U RG58 Adapter for PL259 -- 5 for $2
UG-201 Male N - Female BNC adapter -- $5 ea
UG-255/U UHF female - BNC male adapters -- $2.50 ea 5/$10
UG-259A/U - 91836 -- LC female to HN female bulkhead adapter -- $30

UG-273/U UHF male - BNC female adapters -- $2.50 ea 5/$10
UG-309/U Male HN to BNC female adapter -- $10 ea
UG-413/U HN F-F-F Tee connector -- $15 ea
UG-496/U HN female panel connector, a bit tarnished -- $7 ea

UG-565A/U Male C to N Female adapter-- $15 ea
UG-625/U BNC Female panel mount connector -- $1 ea

Polarized variant (male center pin) of UG-931/U MHV female panel mount connector -- $10 ea

M-358 --UHF F-M-F Tee connector -- $3 ea
Unbranded N Female - BNC male adapters -- $3 ea

SMA Female-Female Bulkhead (barrel with a flange) connector -- $1 ea
SMA Female-Female Sealed Bulkhead (barrel with a flange) connector, gold plated -- $3 ea

N Female Chassis Mount connectors with gold (plated/flashed) PC style. The center pin (extends about 1/8" back from the insulator) -- $1ea

C Triax Female Polarized variant (male center pin) - TPS female w/Isolated shield Sealed Bulkhead (barrel with a flange) connector -- $25

More Connectors

Amphenol Ultramite Connectors -- 48-06C10-5S6 & 48-00R10-5P6, 5 pin miniature, mating panel and cable connector. NOS -- $10

Amphenol MS connectors -- 3 pairs MS20-1 14 pin military style connectors 3 male panel connectors + 3 female cable connectors with shells (two straight, one 90 degree); some new, some used but clean. $10 all

Amphenol MS connector pair 28-15 size -- 35 pin chassis mount female plus male cable connector. NOS -- $20

4 Pin Octal size female cable connector with hood. Used -- $3

6 Pin Octal size female cable connector with hood. NOS -- $5

Completely shielded Amphenol Octal M&F pair cable connector pair. Screw on coupling. NOS -- $20

9 pin Octal size Plugs with hoods. NOS -- $7 ea.

11 pin Octal size Plugs. Amphenol 86-CP11 or similar. New -- $5 ea.

11 pin Octal size Plugs. Amphenol 86-CP11 or similar. Used -- $3 ea.

11 pin Octal size sockets, round (may be used on cable or chassis). Used -- $3 ea.

11 pin Octal size sockets, chassis mount w/ears. NOS -- $7 ea

11 pin Octal size M&F pair cable connectors with hoods. NOS -- $15

Completely shielded Amphenol 11 pin Octal size M cable & F chassis connector pair. Screw on coupling. NOS -- $25

12 pin Octal outline plugs. Amphenol 86-CP12 NOS -- $7 ea.

12 pin Duodecar (Compactron) sockets. NOS -- $5 ea.

12 pin Duodecar Plugs. NOS -- $5 ea.

AMP 837043 LGH 20 KV Bulkhead connector with one 833807-3 cable cut short to 4" -- RFE, $10

Bendix / Amphenol 10 conductor 6' (unstretched) coily cable assembly -- 18-1S, 10 pin female Mil-C-5015 connectors on each end -- Used, $20

Motorola 1-80754A94AD Connector kit. Looks like a PL-259 w/a UG175 reducer plus some mounting rings (1-1/4" diam.) for an antenna. NIB. $5

PJ-055B & similar 1/4" phone plugs, 10 pieces, used. $10 all.

Reynolds 167-3517 -- 20KV sealed male panel connector. Complete data here -- NOS, $20 ea

73 & Good Morning,
Marv WC6W

6474. Kenwood TM-2400 (2.4 GHz) Radio

Yahoo group: ham4sale (2007 — 2015)
Date: 2011-06-15 04:53:12 UTC
From: kb6uda
Topic: 6417 Message: 6474

Hi,

Anyone have a Kenwood TM-2400 (2.4 GHz) Radio.

If so contact me if U are selling it.

Thanks and 73
Sincerely,
Tedd

6476. Re: [ham4sale] FS: Integrated circuits

Yahoo group: ham4sale (2007 — 2015)
Date: 2011-06-15 13:16:41 UTC
From: Bob W5UQ
Topic: 6471 Message: 6476

Hi all,
sure was hoping that I would find some of the IC's I need on this
list.
In case someone happens to have, I need:

quan.
two - MC12040
two - 11C44
two- MC12014
four-MC4016
one- MFE121(transistor)
three- MC10137
three-SPF1023(transistor)

Possibly:
one- CA3089
three-CA3076

This is a list I have and set back. I've forgotten if I located some of
them and will have to go back through my notes again. I'm restoring a
Motorola R-1201A signal generator.
For some reason several parts in it are going out. A friend gave up on
it and I'm trying my skills on it. It's a bugger too.

PLUS:
one - uPD7507C- however, it needs to have Yaesu FC-757AT (auto ant
tuner) data on it or someone capable of programming it with that data.
OR a parts rig FC757AT someone will part with... and that chip is still
good. Lightning hit this one. I traded for it thinking I could restore
it. Have replaced almost all solid state in it to find the
microprocessor chip is bad.
(I found the bare chip on line)

Thanks,
Bob Hardie
W5UQ

... ... and the beat goes onnnnnn!

W5UQ.com
aka: A25UQ, V31UQ& VP2EEU.
QRZ.com is accurate for all calls.
I Will be ZF2UQ in July.

These are originals unless noted.

ATT DSP 16 Application Note collection: DTMF Receiver, CCITT Coder, ADPCM Transcoder, Noise Generators, Disk Servo Controller. Like new. $7 all

ATT DSP 32 Application Note collection: DTMF Receiver, Linear Prediction DTMF ReceiverDSP Calculator, Code Generator, Digital Filters, Kalman Filters. Like new. $7 all

The Contact Modulator -- 8 booklet series by the Engineering Staff of Airpax with more than anyone ever needed to know about choppers. About 30 pages per booklet. Very good condition 1958-1960 -- $50

General Electric Nickel-Cadmium Battery Application Engineering Handbook -- 1971 plus supplemental volume 1973. Just a bit of writing on the cover of the first book, otherwise very good condition. $10 both books.

Motorola
•APR2/D Digital Stereo 10 Band Graphic Equalizer using the DSP56001 -- $5
•APR12/D Twin CODEC Expansion Board for the DSP56000 Application Development System -- $3
•Echelon Neuron Chip Application Notes: EB146/D, EB147/D, EB148/D, EB149/D, EB150/D, EB151/D, EB152/D, EB153/D, EB155/D, EB157/D, EB159/D, EB160/D & EB161/D $10 all.
•RF Amplifier Application Notes: AN-593, AN-749, AN-758, AN-791, AN1033, AN1034, AR164, & 176. $5 all.
RCA Linear Integrated Circuits & MOS Devices plus application notes, 2 book set: SSD-201 & SSD-202, 1972. About 1000 pages total. Good condition. $20

Sharp LH9124 Application Note collection: Fast Fourier Transform, DFT Filter Bank, Time Domain Convolution, Medical Tomograpy Imaging, Multichannel Echo Cancellation, Spectral Analysis, Image Correlation, Image Compression, 2-D TimeDomain Convolution, Fast Convolution, Constant False Alarm Rate Analysis. Like new. $7 all

TMS320 DSP Designer's Notebook -- by Texas Instruments -- Notes 1-81 inclusive plus index, 1992 - 1996. Loose sheets. $10

Williamson Amplifer Data Collection Two Acrosound Transformer Catalogs, copies of two Radio Electronics constuction articles from the '50's, 6550 tube data sheet, Chicago BO-13 & BO-14 transformer data sheets, Two Stancor application notes detailing Williamson amps., plus a couple loose schematics -- $10 all

---

73 & Good morning,
Marv WC6W

6481. FS: Power Supplies

Yahoo group: ham4sale (2007 — 2015)
Date: 2011-06-17 17:17:47 UTC
From: Radio WC6W
Topic: 2162 Message: 6481

AC-DC Electornics model RS5N30-1. 5V @ 30A switching power supply with remote sense terminals, screwdriver voltage adjust, 6" x 2.5" x 10". Used -- $30 ea. (3 units available)

Lambda LM B0-60 -- 0-60V, .45A Linear Power supply with remote sense terminals, screwdriver voltage adjust, 5" x 3" x 7". Used -- $20

Power General
Model 1035-2 -- 12V, 3A, Switching Power supply, uncased PCB, 5" x 3" x 2" -- NOS -- $15

Model 3050-1 -- 5V@6A , 12V@1A & -12V@1A, Switching Power supply, uncased PCB, 5" x 4" x 2" -- NOS -- $15 ea (4 available)

Model 3056-6 -- 5V@6A & 12V@3A, Switching Power supply, uncased PCB, 5" x 4"x 1.5" -- NOS $20

Sierracin
5C12A -- 12V (5 Amp?) Switching Power supply with remote sense terminals -- open frame 5"x8.5" x2". Used -- $15 ea (2 available)

NPC
Model 12-115. 12VDC - 115 VAC 200W Square Wave inverter. Blackcase w/ gold anodized front panel measures 7" x 7" x 5" high. 10 lbs.shipping wgt. Used -- $20

Onan
3-70455-0000 -- Triple Output Switching Power supply: 5V @50A, 12V@7A, -12V@5.25A on 3x16 pin connector- 120/240V AC in via IEC connector, plus switched AC output, fully enclosed 16" x 8.5" x 4" w/ internal fan, RFE -- $30

Voltex
DLX-82-722-2 -- 12 Volt 50 Watt Switching Power supply, 24VDC in, 6" x 3.5" x 1" enclosed with barrier strip connections, RFE-- $10

International Instrumentation
Model PUP-200. 200W computer style UPS. Off white case measures 15" x 8" x 6" high. Requires 24V worth of lead acid batteries, not included. 18 lbs. shipping wgt. $20

Manufacturer Unknown Open (L-shaped) frame linear power supplies 6" x 3" x 2" with attached 2 wire polarized line cord, 120V 60 Hz AC input; internal 1A line fuse.
There is a relay that switches the 3 voltage outputs. Six-pin SIL output connector with a matching cable to pigtails.
The wires are: GND, +5V switched, -5V switched, relay (gnd to operate), +12 switched, and +12 constant (for the relay). Just guessing from the 780X series regulators, I would think that the +12 and +5 outputs are good for about an amp. and the -5, which regulator is unheatsinked, perhaps a couple hundred mA -- $10 ea. (5 units available)

73 & Good morning,
Marv WC6W

6482. FS: Capacitors -- Air, Vacuum, Electrolytic

Yahoo group: ham4sale (2007 — 2015)
Date: 2011-06-17 17:13:36 UTC
From: Radio WC6W
Topic: 6482 Message: 6482

Some pictures of the below may be viewed at:

http://qsl.net/wc6w/wc6wfsw/index.html?fr34.html

Vacuum Capacitors & other Vacuum things

Jennings Vacuum Variables -- all used (or at least aged)

CVEP-1000 1000pF 20KV -- $250 with standard puller (My Hipot only goes to 15KV so that is the max. I could test this one)

Collins 622-0193-001 low profile motor drive assembly with limit switches for a Jennings CMV1-4000 vacuum cap. $40

Fixed vacuum caps

Jennings VC-12 12pF 20KV -- $20
Jennings 50pF 86KV -- $86

Western Elec 50pF 5KV -- $15

Vacuum Switch & Relay
Struthers Dunn Type 78CCA109 "Keying Relay" which consists of a vacuum relay mounted on top of a small (2"x3"x4") metal enclosure. There is a 15 pin Jones connector on the side of the box. I believe that there are some auxiliary contacts in the box in addition to the vacuum relay. 28VDC. $15

Jennings R1G SPST 20KV 20Amp Vacuum Switch; no solenoid -- $25

Air Variable Capacitors

Bud Two Section variable capacitor, 75pF (measured) per section max. Balanced rotor construction. .025" air gap, approx. 4" x 1-3/4" x 1-3/4" overall. Used, good condition -- $15

Cardwell -- EU-140-AU, Two section variable cap., 140pF / section, .020 air gap, 1-7/16" square by 4-1/2" deep, 1/4" dia. shaft. NOS -- $20

Cardwell -- XR-1000PS, 1000 pF max. capacitance. .030 air gap. About 4.5" x 4" x 3.5" overall including plate travel. Used, Good condition, except that the shaft has been cut down to extend only 1/2" beyond bushing. $20 ea.

Cardwell -- XR-1000HS (about 950pF max measured) These have slightly contoured plates for improved tuning resolution at minimum C. .030 air gap. About 4.5" x 4" x 3.5" overall including plate travel. Used, Good condition. $20 ea.

Cardwell -- 30-900pF (measured) (XR-900PS? -- 4 fewer plates than an XR-1000) .030 air gap. About 4.5" x 4" x 3.5" overall including plate travel and mounting ears. Used, Good condition. Last one, $20

Cardwell -- Differential capacitor 30-600pF (measured) each side .030 air gap. About 4" x 3.5" x 3" overall; Used, Excellent condition. Just one, $30

General Electric Two Section capacitor, 150pF (measured) per section max. Balanced rotor construction. .040" air gap, approx. 6" x 2" x 2" overall. Used, good condition -- $20

Hammurlund -- MC-100S with two fixed plates and 3 variable plates removed to make a 70pF maximum part. Used. $2

Hammurlund -- Type RMC (I think) with 3-1 reduction drive. 60pF max. (measured). Approx. 1-3/4" x 1-3/ 4" x 3 long overall including shaft. Used. $5

Johnson T9-5 miniature vertical PC mount trimmers 1.9-15.7 pF, Silver Plated machined plates -- NOS $1 ea.

National Type TMC-300, 300pF variable capacitor, .070" air gap, approx. 8" x 4" x 2.5" with plates closed. Nice n' shiny like new! -- $40

National Type 30D, 30pF Dual variable capacitor, approx. 3" x 2.5" x 4" overall including shaft. Used, good condition. $10

OAK 22641, Four Section capacitor, 20-550 pF (measured) per section large receiving style capacitor. .010 air gap. 6-1/2"" x 3-1/2" x 3" overall. 1/4" diameter shaft. Counter-Clockwise rotation for capacity increase. NOS $30

Poly varicon 4 Section miniature capacitor. 35pF / 35pF / 100pF / 160pF measured max. with trimmers for each section. Approx. 7/8" x 7/8" x 1" deep overall. NOS $5 ea or 5 for $20.

Remler -- "Butterfly" variables.
Type 630 350pF $25
Type 631 500pF $25

TRW 15-90pF (measured) Air Variable, .060 gap, ball bearing shaft, very stoutly built -- $20

4 Section capacitor 20-550 pF (measured) per section large receiving style capacitor. .010 air gap. 7" x 3-1/2" x 3" overall. 1/4" diameter shaft. Clockwise rotation for capacity increase. A mite tarnished from age; Otherwise, like new. $25

4 Section capacitor 20-250 pF (measured) per section large receiving style capacitor. .020 air gap. 5-1/2" x 3-1/2" x 3" overall. 3/8" diameter shaft. Counter-clockwise rotation for capacity increase. A mite tarnished from age; Otherwise, like new. Two available. $20

5 Section capacitor 400 pF (measured) per section large receiving style capacitor with individually insulated rotor and stator sections. .010 air gap. 6" x 3-1/4" x 2-3/4" overall. 3/8" diameter shaft. Clockwise rotation for capacity increase. Used, just mite tarnished from age; $40

Mica & Ceramic caps

Centralab 857-25Z Ceramic 25pF NPO 15,000 volts. NIB $20.

850 Series Ceramics
47pF N750 -- not sure if these are 5 or 7.5 KV rated -- $5 ea

Used old "Brown" Micas
Aerovox, Cornell Dubilier, Polymet, Sangamo, Solar, Sprague -- CM45 style or similar -- $2 ea or $30 all

6485. Coaxial Antenna Switches, Wattmeters FS

Yahoo group: ham4sale (2007 — 2015)
Date: 2011-06-18 14:58:31 UTC
From: Ken Simpson, W8EK
Topic: 6485 Message: 6485

Coaxial Antenna Switches, Wattmeter/SWR Bridges For Sale:

Coaxial antenna switches:

B & W CS-3 G "Protax" (formerly called Model 593)
This is a 3 position antenna switch with the four SO-239
connectors coming out the back of the rectangular enclosure.
It does ground all unused connections.
This one works fine and looks like new. With paper work
for $30.

B & W CSR-5 G "Protax" (Formerly known as Model 376)
This is a five position antenna switch with the six SO-239
connectors coming out of the switch like the spokes of a
wheel. Unused connections are grounded.
This switch is in its original box, with paper work, and
appears unused. These go for about $75 new. Buy this
one for only $55.

B & W Model 550 G coax switch
This model will switch up to 5 antennas, and DOES ground
unused antennas. It has SO-239 connectors on the sides,
with the coax coming out like spokes of a wheel. It is
in good condition and works fine. Mounting bracket is
included for $30.

Wattmeters:

Micronta 21-520 A Dual Meter HF Wattmeter:
Full scale readings of 10, 100 and 1000 Watts. It has a
remote pickup sensor with about 3 feet of cable to the
dual meter control head. It reads both SWR and forward
watts at the same time, on the dual meters, which are
fairly large. This one is in extremely nice, close to
new, shape. $55

Heath HM-2102 VHF wattmeter, covering 50 to 160 MHz.
Similar to the HM-102, but for VHF frequencies, with
250 and 25 watt scales. It can also be used to check
SWR, and has a remote sensor that can either be left
inside the meter, or separated from the actual meter.
SO-239 connectors in and out. This particular meter works
great, looks great and includes paper work for $45.

SWR Bridges:

Both of these SWR Meters will operate from 160 thru 2 meters, and have an SO-239 connector on each end.
All will work on HF, and VHF, covering 3 to 150 MHz, so are ideal for the new rigs that include 6 and 2 meters.

Quement SWB-2

This SWR Bridge features two separate meters -- one for reading forward power and another for reading SWR. This permits one to easily monitor both the power going out, and the SWR on the antenna at the same time. They were made in Japan, and labeled with various names, including Swan, Siltronix, and Quement.
It works fine and looks great. With paper work for $40.

Single meter SWR Bridge:

Royce 2-100 Single Meter SWR Bridge / Field Strength Meter
Covering HF, 6 meters, and 2 meters, it is ideal for the new rigs with 6 meters and 2 meters in them.
This one works fine, and looks extremely nice. I do not see any scratches on it, but it does have a previous owners name on it. In its original box with original instructions. $32

I also have many other accessories available such as many different types of microphones, HTs, VHF and UHF rigs, HF and VHF/UHF antennas, etc.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

Waters Universal Hybrid Coupler II -- Model 3002 w/compressor. A fancy phone patch styled to match the Collins S-line. This one is like new in the original box w/ original manual. There are just a couple of hairline scratches on the sides, the front is unblemished. The 1968 price was $72.50, now asking $100 in highly depreciated money! :-)

6492. FS: Military VHF Amplifier

Yahoo group: ham4sale (2007 — 2015)
Date: 2011-06-20 17:14:35 UTC
From: Radio WC6W
Topic: 6160 Message: 6492

VHF Amplifier -- Late '70's vintage likely Military, probably airborne, VHF power amplifier assembly. It consists of 7 almost identical amplifier assemblies clustered around a central housing that has splitter combiner networks which are plugged onto each end with a bunch of SMB connectors. There are TNC's for the main in's & outs. I think it was originally configured as one amp, driving two, driving four boards. The complete assembly measures 7.5" x 5" x 3.5" overall -- the individual RF amp boards are 4.5" by 2". The outer covers are mostly missing. Each amplifier is a push pull design -- they appear to be 50 ohm in & out impedance with either PT6747 or PT6702 TRW transistors. I would guess this unit operates on 28VDC. I don't know what frequency range it covers nor the power level though, just guessing, it probably puts out at least 100W. And there is no manufacturer name -- probably went with the outer cover. Six of the modules are marked
OK and one, the input stage I think, is marked NO Good. The individual amps have integral heat sink plates so, they could be removed from the assembly and used separately. Think of it as 7 amplifier boards @ $10 ea -- Bare PCB's would cost as much! -- $75

Roller Coil Parts

New! GE Ceramic end plates, part no. 7463338, for a GE roller coil. I believe these fit the GE coil that was used in the BC-375. $10 pair

---

Coils:

Miller #4551 4.0 mHy, 400mA, transmitter RF choke. A touch grungy from 40 years in a box but, NOS -- $15 ea.

A large RF choke -- #22 enameled wire space wound 24 TPI for 2.75 on a 1" diameter grooved fiberglass form 5" overall -- $7

Miller 62A024 series (.173-.272uH I think!?) coils, 1/4" diameter wound with a 5 turn coil. Blue (carbonyl SF 40-300 MHz) core. 4 terminals, 2 currently unused. NOS.-- 2/$1

Antique Radio coil -- wound with old green cloth covered wire, 3" diameter & 3" long overall on bakelite form, 138 uH total, tapped at 6 turns. -- $10

Iron Powder Cores with threaded brass shafts

1-1/8" long x 1/4" diameter w/ 1-1/4" long 4-40 threaded shaft -- $1 ea
1-1/2" long x 1/4" diameter w/ 1-1/2" long 4-40 threaded shaft -- $1.50 ea
1-1/2" long x 3/8" diameter w/ 1-1/2" long 6-32 threaded shaft -- $2.50 ea
2-1/4" long x 3/8" diameter w/ 1-1/2" long 6-32 threaded shaft -- $3.50 ea
3"long x 3/8" diameter w/ 1-1/2" long 6-32 threaded shaft -- $5 ea

---

6495. FS: MFJ-784B Tunable Super DSP Filter

Yahoo group: ham4sale (2007 — 2015)
Date: 2011-06-21 17:42:19 UTC
From: doc@kd4e.com
Topic: 6495 Message: 6495

Looks as-new, includes dc cable, original manual, and original
box.

Asking 1/2 of new price, and will include shipping to standard
USA locations. $135.

"MFJs tunable super DSP filter automatically eliminates heterodyne,
reduces noise and interference simultaneously on SSB, AM, CW, packet,
AMTOR, PACTOR, RTTY, SSTV, WeFAX, FAX, weak signal VHF, EME, satellite
-- nearly any mode.
You get MFJs tunable FIR linear phase filters that minimize ringing,
prevent data errors and have "brick wall" filter response with up to 57
dB attenuation 75 Hz away.
Only MFJ gives you 5 tunable DSP filters. You can tune each lowpass,
highpass, notch, and bandpass filter including optimized SSB and CW
filters. You can vary the bandwidth to eliminate interference."

Lots more detail, and download manual, here:
http://www.mfjenterprises.com/Product.php?productid=MFJ-784B

Details here:
http://www.universal-radio.com/catalog/filters/3470.html

6497. Motorola 900mhz items for sale: Spectra, MCS, and PURC Repeater and 6m CDM

Yahoo group: ham4sale (2007 — 2015)
Date: 2011-06-23 23:33:45 UTC
From: TimB
Topic: 6497 Message: 6497

I have three 900mhz Motorolas for sale. All are currently on Ham Frequencies. Programming will be provided if you need it. Money Orders and Paypal accepted.

First is a Spectra A4 midpower. It has been modded and works fine on both simplex and repeater splits. It is the 15 watt version. It includes the A4 head, a like new microphone, bracket, speaker, and new power cord. Also includes a full length accessory connector. Asking $100 for this.

Next is a MCS2000 Model 1. This is a 15 watt radio, has bracket, Microphone, Accessory Plug, new power cord, AND remote mount kit! I can install the kit or send it along seperately, your choice. I am asking $175 for this one.

Finally, I have a MCS2000 Model 3. This is also a 15 watt radio, it is complete with Accessory connector, Jedi Style Microphone, external speaker, control cable, and new power cord. It is in great shape. I am asking $250 for this.

I will include Troy Faceplates for all three radios for an extra $20 each.

All three are working, I have just upgraded to a MotoTrbo.

Finally I have a PURC 5000 375 watt repeater for sale. This is the 375 watt, 100% duty cycle repeater. It has a true 900mhz Maxtrac as a reciever, has Sinclair Reslock Duplexers, and all the manuals. This thing is BIG and Heavy, but it talks like a Champ! It has been interfaced to a SCOM 7330 controller, but the controller is not included. I am Asking $1500 for the complete unit, I will help with shipping this thing, but that wouldnt be cheap!

I also have a CDM1250 that has been retuned and programmed for 6 meters. it is a REMOTE MOUNT, 60wt radio. It is complete with cable, bracket, mic, and new power cord. I am asking $175 for this one also.

I can provide pics and model numbers of all equipment.

Please email me at kd0ezq@yahoo.com, or text me at 785-735-5166 for more information.

Thanks

kd0ezq

6498. Ten-Tec Antenna Tuner Model 238B

6499. Digital Interfaces and related items FS

Yahoo group: ham4sale (2007 — 2015)
Date: 2011-06-24 12:21:17 UTC
From: Ken Simpson, W8EK
Topic: 6499 Message: 6499

Digital Interfaces and related items For Sale:

AEA PK-232 MBX, multi-mode digital controller.
More than just a TNC. It will handle packet, RTTY, Amtor, ASCII, CW, etc. It has version 7 firmware, which I think is the latest. It includes Pactor in it. It works fine, and looks very close to new. The large, inch thick manual is included, all in the original box, for $125.

AEA AC-1 "Wall Wort" Power Supply
This "Wall wort" power supply will supply 12 V DC at up to 1 amp.
It can be used with the AEA PK-232, PK-88 or others.
This unit has a 2.1 mm plug, with the center positive, so it can be used on many different things that require 12 V DC at up to an amp, such as keyers, antenna tuners, etc.
This is a "regular" wall wort -- not the new switching type that creates all sort of noise in your receiver. Get this one, and leave the noise behind. $14

Waters "Universal Hybrid Coupler II" Model 3002:

Most of us would likely call this a phone patch, but it is really much more than that. It does that, but also will interface with a tape recorder, and permit recording and play back of on-the-air QSOs. Nothing says that the tape recorder input must be used that way. Connect the sound card in your computer in this position, and you have a very effective interface.

Model 3002 includes a speech compressor powered by a 9 volt battery. The front panel is finished on both sides, with one side having it set in a horizontal position, and the other in a vertical position.

This was a "top of the line" unit years ago. One only found them with top stations such as Collins.

This particular unit is in really great condition.

With paper work for $100.

Heath HD-15 phone patch / digital interface
This is the unit with the VU meter on the left and 3 knobs that match the SB series to the middle and right. Low or high Z output to the transmitter. It can also be used as

an interface for PSK31, and other digital modes that use
a sound card. The meter makes it great for setting levels.
This one is all original. It is in excellent condition.
Cosmetically, I can not find a scratch on it.
Paper work included for $25.

Heath HD-15 as above, but shows slight wear. $22

I also have parts from an HD-15 donor unit available.
Please let me know what parts you need.

Books related to digital modes:

CQ: The Packet Radio Operators Manual
By Buck Rogers, K4ABT, Close to new condition, $14

ARRL Your Packet Companion
by Steve Ford, WB8IMY; like new. $8

ARRL Specialized Communications Techniques

Like New, 208 pages, 1992, $12

The Packet Radio Operators Manual published by CQ
By Buck Rogers, K4ABT, 1995, Close to new condition, $12

Tab Books:
"Oscar: The Ham Radio Satellites"
by recent silent key Dave Ingram, K4TWJ
First Edition, Hardback, Like new, $14

Ham CD:

Ham Exams
Software for studying for Tech, General and Extra Class License
exams. It also includes Morse Code Software, plus a variety of
other nice ham programs, including digital programs. $15

MFJ 484 C "Grandmaster" Memory Keyer:

MFJ 484 C "GrandMaster" Keyer with Memories
This keyer has a built in sidetone, with volume and tone
adjustable on the front panel. Speed and weighting are
also adjustable from the front panel.
It has 4 large memories. You may install a 9 volt battery
to preserve memory contents during a power failure. It can
be powered by either a 9 Volt battery, a 9 V DC wall wart,
or your station 12 V DC power supply.

It is a nice eggshell white and wood grain enclosure that matches the TenTec KR-2 paddle. This one works fine and looks great.

With paper work for $55.

I also have many other accessories available such as many different types of microphones, HTs, VHF and UHF rigs, HF and VHF/UHF antennas, etc.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

6500. FS: Homebrew Radio Thingys

Yahoo group: ham4sale (2007 — 2015)
Date: 2011-06-24 17:04:24 UTC
From: Radio WC6W
Topic: 1627 Message: 6500

Pictures of many of these critters may be seen at:

http://qsl.net/wc6w/wc6wfsw/index.html?fr17.html

PL Tone generator -- Wein Bridge Oscillator powered by two 9 volt batteries (not included). - $1

Touch Tone Encoder -- Western Electric Touch Tone Dial mounted in a 4"x4"x2" metal enclosure with power switch. Has a 4 pin DIN connector plus matching cable terminated in a 1/8" mini plug. -- $2

NE556 Oscillator Circuit -- Two pots with anodized gold (colored) knobs, pwr. sw., LED,. & Banana jack outputs -- $3

---

1 Mhz Oscillator -- built on a small piece of perfboard with an HC-6 crystal on the back. Checked and seems to run on about 15-20 volts. There are a few of these. -- $4 ea.

PPG Electronics project #880-CB -- 13.5V 2 Amp, power supply kit, unbuilt. Most parts are under shrink wrap. Power transformer & main filter cap are missing.-- $3

HF Harmonic Filter -- built in a 5" x 2.25" x 2.25" LMB Aluminum box. UHF connectors. Probably good for 100W. -- $5

VHF thing mostly complete -- Double sided circuit board with 3 Motorola MWA120 amplifiers, 5 coils, mounted in Bud 4" x 2-1/4" x 1.5" aluminum box with a BNC connector (unwired). Looks to be finished except for power & I/O -- $10

---

435 MHz power splitter -- N connectors (3). This is made out of brass sheet stock and is about 15" long by 1" square.-- $10

VHF thing just started -- Pomona 4" x 2.5" x 1.5" cast box with a couple 160-104 capacitors, BNC connectors, a miniature 50K bourns pot., 6 capacitors mounted to gold plated terminals with a very pretty gold flashed internal shield structure. Nothing is soldered -- this was just started. -- $10

Two Meter to 24-28 MHz receiving converter -- At least I think that's what it is... -- 5" x 4" x 1.75" -- $10

Transistor Tester -- per July 76 Ham Radio, p.40. Aluminum case. NPN/PNP select switch is broken but, a replacement is included along with a copy of the article. Nice sealed Weston 50uA meter.-- $12

---

6503. 6 meter linears... and MORE to boot....

Yahoo group: ham4sale (2007 — 2015)
Date: 2011-06-24 22:10:50 UTC
From: Bob W5UQ
Topic: 6503 Message: 6503

go to my website W5UQ.com for Motorola VHF tube linears.
Documentation included.
I have one HV power supply left.

Also the Harris fully solid state linear with power supply and cooling
fans for full power.
It's ready for 6 meters from 200 to 1500 watts. Drive requirement are low.
Can be modified to cover 20 through 6 meters. Full documentation for this.

Contact me at W5UQ@... for particulars.

I'll be gone for field day activities however.
Bob Hardie

6504. Mobile FM rigs, Dual Band HTs FS

Yahoo group: ham4sale (2007 — 2015)
Date: 2011-06-26 13:19:32 UTC
From: Ken Simpson, W8EK
Topic: 6504 Message: 6504

Dual Band mobile FM transceivers, 2 meter FM transceivers,
and Dual Band HTs, For Sale:

Kenwood TW-4100 A, Dual Band mobile FM transceiver:

The Kenwood TW-4100A is a high powered dual-band transceiver
providing 45 watts on 2 meters and 35 watts on 70 cm (440 MHz).
A low power setting of 5 watts may also be selected. Ten memories
with offset recall and lithium battery backup are provided. There
are separate antenna output jacks on the back panel for 2 meters
and 440 MHz. It is supplied with an MC-48, 16 key DTMF hand mic,
mobile mounting bracket and DC power cord. Requires 13.8 VDC at
7.5 amps.

Features
* 10 Memories
* Scanning
* Priority Watch
* Lithium battery backup
* Frequency Lock
* Auto Repeater Offset
* Large LCD Display
* MC-48 DTMF Microphone with up/down switches

This particular unit works great and looks fine. It has a
subaudible tone encoder added where the speaker would normally
be. That means that an external speaker needs to be used with
it.

With DTMF Mic, tone encoder, mobile bracket, power cord, and
paper work for $160.

Icom IC-228 H, 45 watt 2 meter mobile transceiver:

The Icom 228H is a 45 watt 2 Meter mobile FM transceiver.
There is also a setting for 5 watts output when less power is
needed. The multi-colored backlit LCD display is readable
over a wide range of light. This radio has 20 memories and
priority watch. It also has programmed scanning or memory
scanning. This radio requires 13.8 VDC and receives from
138 to 174 MHz. It has a built in tone encoder.

This particular unit works great and looks very close to new.
It is in its original box, with mobile bracket, power cord,
and DTMF Touch Tone Microphone. It even has the bag of misc
hardware that I don't think has ever been opened.

With paper work for $110.

Icom IC-28 H, 2 meter FM mobile transceiver:

The Icom IC-28 H is a well-built 2 meter FM mobile transceiver
providing 45 watts of power. There is also a setting for 5
watts output when less power is needed. The backlit LCD display
is readable over a wide range of light. This radio has 21 memories.
It also has programmed scanning or memory scanning. This radio
requires 13.8 VDC and received from 138 to 174 MHz. It has a
built in tone encoder.

It works fine and looks fine also. No mobile bracket or "extras"
with this one -- just the radio and paper work for $80.

Alinco DJ-580 dual band (2m and 440 MHz) HT:

Covers 110 to 174 MHz in the VHF position, which
includes the AM Aircraft band. 440 to over 480 MHz
in the UHF position. It is my understanding that it
can also be modified to cover into the 800 and 900
MHz region. It will also cross band repeat, and is
a very rugged radio.

Power output has 3 different levels. With the
7.2 V battery packs, it has 0.25 W / 1 W / 2.5 W.
If used with the larger 12 V batteries, it will
produce 0.25 W / 1.2 W / 5 W.

This particular unit is in very good shape, both
electrically and cosmetically. The keyboard has very
crisp and clear lettering. It includes the empty
6 cell battery pack that takes six AA cells, rubber
duck antenna, belt clip, wrist strap, and paper work.
$150

Yaesu VX-3 dual band HT:

The Yaesu VX-3R 2 meter/440 MHz handheld has extensive receive
frequency coverage, providing local-area two-way amateur
communications along with unmatched monitoring capability.
The VX-3R receives 500-1800 kHz (AM Band), 1.8-30 MHz
(Shortwave), 30-76 MHz (VHF Lowband with 6M), 76-108 MHz
(FM band), 108-137 MHz (Air), 137-174 MHz (VHF with 2M),
174-222 MHz, 222-420 MHz (VHF with 220), 420-470 MHz (440),
470-800 MHz and 800-999 MHz.
You get a 1000 channel memory system, and can enjoy
stereo FM and AM broadcast reception.

Power output with the supplied Lithium Ion battery is 1.5 watts
VHF and 1 watt UHF. With the optional E-DC-21 DC adapter output
jumps to 3 watts and 2 watts!

This particular HT is like new. It works 100%, and looks like new, with no scratches. It has a rubber duck antenna, LiIon Battery and charger in its original box, with paper work all for only $155.

I also have many other accessories available such as many different types of microphones, HTs, HF, VHF and UHF rigs, HF and VHF/UHF antennas, etc.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

NOS Potentiometers

Linear taper unless otherwise noted

---

25 ohms, Clarostat 3/4" diameter metal cased PC mount trimmer. $2 ea.

50 ohms, Clarostat 3/4" diameter metal cased PC mount trimmer. $2 ea.

75 ohms, .58 amps, Ohmite LH, 1.5" dia., 3/8" bushing, 1/2" long 1/4" shaft. $10

100 ohms, Clarostat 3/4" diameter metal cased PC mount trimmer. $2 (one only)

500 ohms, 25W, Dejur, 1.75" dia. 3/8" bushing, 5/8" long 1/4" dia. shaft. $10

1K ohms, .9" dia., 3/8" bushing, 1-1/2" long 1/4" shaft. $2 ea

7.5K ohms, .9" dia., horizontal PC mount trimmers. $1 ea

10K Bourns 3862C, 1/2" dia., 1/4" bushing trimmers. $2 ea

10K ohms, .9" dia., 3/8" bushing, 3/4" long 1/4" plastic shaft which also pulls to operate rear mounted DPDT switch. $5 ea

15K Alps audio taper, 5/8" dia., .43" bushing, 3/4" long 3/16" shaft, w/3A switch. $4 ea

15K Ohmite Type E 7/8" dia., 10 watt, 1/4" bushing screw adj. $10

100K ohms, Clovern CLR4239/22S, 1-5/8" dia., 3/8" bushing, 1" long 1/4" dia. shaft -- $5

250K CTS Vertical PC mount trimmers -- 4/$1

20M (5W?) IRC Type 69 2" dia., 3/8" bushing, 1/2" long 1/4" shaft, 2 available -- $10 ea.

NOS Allen-Bradley Type J assortment

Values from 50 ohms to 1000 Meghoms. Mostly linear taper, some log & audio, a few reverse log. Mostly 1/2" shafts, a few are longer. A few duals, pads, dual concentric, triples, & some with switches. Typically 5-10 pieces of each value, with a few single exemplars.

Approximately 150 different types / way over 1000 pieces total. $2500

Used Resistors

8.5 ohm Clarostat 20 watt? pot, 1-1/2" dia. 3/8" bushing, 1/4" dia shaft 1/2" long - $5

10 ohm, 100 ohm, 1K ohm -- Clarostat 58C1, 3W pots, S taper -- $3 ea.

60 ohm Ward Leonard 20 watt?, 2 terminal rheostat, 1-1/2" dia. 3/8" bushing, screw adj. - $5

65 ohm Ohmite Type J pot, 50 watt, 2-1/4" dia., 3/8" bushing, 1/4" dia shaft 1/2" long - $10

1.5K Two 200W (or so -- 10" long) 1.5K ohm 10 tap (every 150 ohms) power resistors. $10 pair

1.5K Dale, 225 Watt power resistors. $15 for all three

2K Ohmite, 225 Watt power resistors w/mounting clips -- $6 ea or 4 for $20 (10 left)

3K Ohmite, 225 Watt power resistors w/mounting clips -- $6 ea or 4 for $20 (8 left)

3.5K ohm, Ohmite Type H pot, 25 watt, 1-9/16" dia., 3/8" bushing, 1/4" dia shaft 1/2" long - $7

500K ohm Carter Radio rheostat with 2" diameter skirted knob, calibrated 0-100 over 270 degrees -- $5

Carborundum -- type SP resistors -- $10 each
30 watt parts (2.5" long) 75 ohms

100 watt parts (6" long) 1 ohm

The numbers have partially worn off some of these units so, some of the above numbers are measured values.

125+ used Potentiometers

Good assortment from 10 ohms to 2.5M. 50 or so Allen-Bradley Type J's, mostly 3/8" bushings with approx. 1/2" long, 1/4" dia. shafts on the rotary parts, a few are longer. A few duals, a few with switches, perhaps 25 trimmers, mostly metal cased except for about 15 sliders. A few appear to be unused. $50 all.

5 Volt, 4 Amp, protection circuit -- The input via a small 4 turn coil, connects to a spark gap, with a small bulk resistor in parallel, then to a 2uH choke, an 11 volt MOV to ground, another 2uH choke, a large 5 Volt transorb with a small ceramic cap in parallel to ground and finally another small coil to the output. All mounted on a 1" x 1-1/2" metal base. Someone wasn't taking any chances! NOS -- $2 ea.

Avantek GaAs Fet Preamp SD7-0738N 3.7-4.2 Ghz. WR-229 input flange. N output connector. 4 pin AN type power connector -- pin assignments noted on label. Used -- $25

Rantec FU-301 Microwave device This is some kind of filter or delay line?? at some GHz ...I don't know. N connectors -- 7 3/4" x 3 3/4" x 1" overall. -- $10

Hughes M-band balanced mixer assemblies which have WR-75 flanges on the RF & Oscillator inputs and wire terminals on the IF outputs. $20 ea

IBM Model 75 Selectric typewriter --
Rare transistional electronic 96 character model, circa 1980, in IBM blue with mechanical keyboard (feels like a Selectric II) and electronic 7500 character (26 documents + 99 phrases) memory. Good condition, types, but needs a bit of TLC (new ribbons, oil?) as it has been stored (indoors, clean & dry) for the last 20 years. $150

Trav-A-Dial bidirectional electronic counter
-- I think this was originally for use with a mill or lathe in conjunction with a 200 count/rev quadrature encoder (which I DON'T have but are available from many sources) to read displacement in .0005" increments up to 200 inches. These use Hewlett Packard dot matrix decimal readouts for a very pretty display. Switches for direction control and reset. Nice cast metal case, requires 5 volts power, 6 pin female Jones connector interface w/pinout provided. $75

Miscellaneous Parts

Photocell Corp. PB200 Cadmium Sulfide (CdS) Photocells, 1/4" diameter x 1/2" long glass enclosed with wire leads, measure 1M dark, 1K in bright room light. NOS -- $1ea

Fuses -- 3AG, 1/2 amp, 250V, fast blow, 40 pieces. NOS! $7

Sharp CE-155 8K Byte Memory Module. NOS $5

Motorola TLN6824A Vibrasender -- Freq. 1B, 107.2 Hz -- $1

Motorola 48B800145-A 6 pin vibrators, pulls. -- $10 pair

Fahnestock (and a few other brands) clips -- These are old, brass, used, a few different sizes, all singles. 70 parts total. -- $20 all

Antique boxes
DM-36-D Dynamotor spare brush box -- $2
Bliley BC3 Crystal, includes data sheet. Top rough. -- $5
Continental Carbomite Resistors -- $5

****

Mechanical Things

****

Synchro Transmitters -- IMC Magnetics, Model 008-216, 26V 400Hz, .75" diameter housing, .120" dia. shaft, flying leads. These will drive a typical Radio Compass Indicator. NOS. $20 ea.

Insulated Couplings -- all for 1/4" shafts. $5 ea.
•H.H. Smith #164, Nylon, slightly flexible, 3/4" max. diameter, 1-3/8" long, NIB
•Millen 39001, Isolanite, flexible, 3/4" max. diameter, 1-1/4" long, NOS
•Millen 39006, Steatite, slide style, 1"max. diameter, 5/8" long, NOS
•National TX-8, Steatite, 1" max. diameter, 3/4" long, NOS
•National TX-10, Phenolic , 1" max. diameter, 1/2" long, NIB, last one

---

Water cooled heatsinks -- 12" x 8" used, drilled for TO-3's plus a few diodes. Back is flat. 3/8" water lines. $50 pair

---

Sperry Gyroscope bearings? part no. 165899. 10 pieces packed in oil in a glass bottle sealed with black glop in June 1944. $10

Craftsman (Atlas) -- Lathe screw for a 54" bed (36" work space) lathe. Used, good condition. $100

ILG Electric Ventilation -- 17-18-022A squirrel cage type fan. Encased motor, 6" diameter by 6" long, 115/230 VAC 1.6A/.8A 50/60Hz 3000 RPM, attached to a 181-009-EA fan housing about 4" by 9" diameter, 4+" round intake, 3+" x 4-3/4" rectangular output flange, weighs 25 lbs. Removed from a RCA transmitter that employed a 4CX5000A. Used -- $45

NOS fan that fits some Japanese radio (Kenwood, Yeasu, Icom, JRL?)...marked: 57 10.01 100V. The wires from the motor are about 4' long and are terminated in a 2 pin JST connector. The impeller has 8 blades and is 7 cm in diameter. It is mounted to a U shaped metal frame with four mounting holes spaced 5cm by 9cm -- $10

Sodeco, Model RG-162E 1/25 & 1/50. Two 12VDC Resetable Impulse counters. Used, working. -- $10 both

6510. Old Radio Knobs

Yahoo group: ham4sale (2007 — 2015)
Date: 2011-06-28 17:37:00 UTC
From: Radio WC6W
Topic: 6510 Message: 6510

Old Radio Knobs

These are all used, most have set screws,
with nothing worse than minor scuffs and smudges and fit 1/4" shafts, unless noted.

Note: I'll take $100 for the lot of Radio Knobs... plus shipping

---

Dakaware -- $20 all
1-1/16" Knurled Knob (3)
1-1/16" Knurled Knob w/ 1.5" skirt w/ white indicator line (2)
1-1/16" Knurled Knob w/ 2" skirt marked 0-10 (1)
1-5/8" Knurled Knob w/ 2-1/16" skirt & unfilled indicator line (1)
2-3/8" Knurled Knob w/ white vinyl pointer at skirt level (2)
2-3/8" Knurled Knob w/ 3" skirt & unfilled indicator line (1)
2-1/16" skirt only

Harry Davies
#1206 1-3/8" knobs 5 for $10
Short (1-3/16")pointer knob unfilled indicator line -- Not sure if this is Davies... There are a box of these -- 2/$1

Kurz-Kasch-- 300 series, 30+ parts, $50 for all --
#308 1-1/8" knob (5)
#385 1-3/8" knob (4)
#309 1-5/8" knob (8)
#310 2-3/8" knob w/metal spinner shaft (3)
#310 2-3/8" knob -- hub drilled out to 3/8"
#380 1-1/8" skirted knob (4)
#308 1-1/8" knob w/vinyl pointer
#308 1-1/8" knob w/ 1-3/4" black metal skirt w/ 100 graduations over 180 degrees
#308 1-1/8" knob w/ 1-3/4" brite metal skirt w/ 100 graduations over 360 degrees
#309 1-5/8" knob w/ metal spinner and 2-1/4" black metal dial with 100 graduations
#309? (may not be KK) 1-5/8" knob w/ plastic spinner and 2-1/4" metal dial with 100 graduations
#311 2-1/16" skirted knob (some of the white lines are need refilling on these) (5)

Kurz-Kasch-- 600 series, $20 for all -- These look like what was on some '60's Hammarlund, Eico & Knight Kit stuff
#642 1.5" skirted knob (1)
#S-645 .75" skirted knob w/indicator line (1)
#647 1" skirted knob w/indicator line (3)
#S-647 1" skirted knob w/indicator line (9)
#653 1.5" skirted knob w/indicator line (5)

Not quite as old Radio Knobs

Kenwood 5cm diameter knobs that look like they are from a Kenwood TS-830 (main tuning knob) or similar
One that's been backfilled with shot to give it some heft -- $7
The plastic spinner version -- $15

National HRT 2-1/16" diameter. Black, trim rings somewhat tarnished -- $5 ea

---

*** Other Knobs ***

Beckman model 901 Duodial for a 10 turn potentiometer NIB -- $10

Tycobrahe Guitar Pedal Knobs -- Used on the Octavia, Parapedal, Pedalflanger & Direct Box -- New, $25 ea.

There are also many knobs from 1960's Tektronix and Hewlett Packard oscilloscopes plus a few General Radio knobs. If anyone has any need, please inquire.

---

73 & Good morning,
Marv WC6W

6511. 6 or 2 Meter Linear Amps For Sale

Yahoo group: ham4sale (2007 — 2015)
Date: 2011-06-29 15:35:13 UTC
From: Bob W5UQ
Topic: 6511 Message: 6511

To see pictures of these amps, go to my website W5UQ.com

I have the Motorola manual section on these amps.
I have one HV power supply left. The Motorola amps can be converted to any ham band from 10 to 2 meters.
They are a natural for SIX meters and up to about 600 watts with low drive.

Also the Harris fully solid state linear with 50 Vdc 55 Amp power supply and cooling fans for full power.
It's ready for 6 meters from about 200 to around 1500 watts. Drive requirement are low.

Full documentation for this amp will be supplied. In advance if you like. I'm trying to put it on my website if I can figure out how to do it. It should be a reasonably easy project for anyone capable of following these instructions and good at soldering.
I was also told that they can be modified to cover 20 through 6 meters. Filters will have to be changed out.

Contact me at W5UQ@... for particulars or call 281-259-7877 between 8am and 6pm CDT any day.

Bob Hardie

6515. WTB: VHF Amateur Repeater

Yahoo group: ham4sale (2007 — 2015)
Date: 2011-06-30 17:46:11 UTC
From: Mark
Topic: 6515 Message: 6515

Everyone,

I have been contacted by a ham group in my area (about 50 mi. S/W of Chicago) that is looking for a VHF repeater. They aren't particularly picky about what they get - Micor, Mastr II, whatever - as long as they can get it on the air.

Having said, that, does anyone have anything available at a reasonable cost?? (Their budget is around $2000, including duplexer.) Of course, they'd prefer something near Chicago to pick-up and save on shipping. And if it's a Micor, I can help them get it going. (I have VERY limited experience with, and documentation for, Mastr II machines. at this point in time, that is. hehehe) I'm especially interested in hearing from someone who has "upgraded" to D-STAR or P25 and has their old, analog machine in storage and may be looking to move it out.

Feel free to reply OFF-LIST to:

n9wys <(at)> ameritech <(dot)> net

Thanks for the bandwidth.

Mark- N9WYS

6520. Microphones of many types FS

Yahoo group: ham4sale (2007 — 2015)
Date: 2011-07-01 17:31:24 UTC
From: Ken Simpson, W8EK
Topic: 6520 Message: 6520

Microphones For Sale --
Desk Microphones, DTMF Touch Tone Microphones, Speaker Microphones, and Microphone Stands and other Microphone Accessories

Note: There are new listings, and also deletions.

Astatic Model 810-6 Gooseneck Microphone:

This mic is on a 12 inch gooseneck. The mic is a brushed metal about 5 1/4 inches long, and is actually part of the gooseneck. The cable goes thru the gooseneck. This has a 2 conductor shielded cable, so it is a quality balanced microphone with about a 4000 ohm impedance. The gooseneck terminates in a standard 5/8 inch threaded connector.

This one works fine and looks good. $45

Hand Microphone:

Azden PCM-463
I think this mic was used on the Azden PCS-4000 and probably other Azden rigs as well. It has an up/down switch on it, and a round 8 pin connector. This one works fine and looks very close to new. $35

DTMF Touch Tone Microphones:

Kenwood MC-46 DTMF Touch Tone Microphone
Touch tone DTMF microphone with 6 pin connector, as used on TR-7730, TR-7800, TR-7850, TR-7930, TR-7950, TR-8400, TR-9000, TR-9130, and others. Up-down switch on top. 16 digit touch tone pad. This one works fine, and includes paper work for $40.

Kenwood MC-48, DTMF Touch Tone Microphone
Round, 8 pin connector, will go with any Kenwood rig taking this kind of connector (TM-201, TM-211, TM-221, TM-231, TM-241, TM-2530, TS-50, TS-430, TS-440, TS-570, TS-850, TS-870, TS-930, TS-940, TS-950, TW-4000, etc.). Has UP and DOWN switches and PTT, along with 16 digit touch. This one works fine, and looks close to new. With paper work for $45.

KDK DM TT-1 DTMF Touch Tone Mic
This mic has a 12 digit touch tone pad on it, with a switch to turn the pad on and off. With 4 pin plug.
It works fine, and looks great. $35

KDK Model TM-2 DTMF Mic
With touch tone pad and up-down switches. It has been rewired with a round 8 pin connector for Kenwood. Nice condition. $40

CES 610 L DTMF Touch Tone Mic
Can manually dial a number, or automatically store it in the mic, and "speed dial". 12 digit touch tone pad on the front. 8 pin modular plug (like computer LAN).
Looks to be new. $38

Johnson 250-0761-010 / CES 655 DTMF Mic
It has a 12 digit pad on the front, and is a rugged mic. Presently with 4 pin plug. Looks to be unused. $38

HT Speaker Microphones:

Azden SDX-316 Speaker Microphone
Although it has an Azden name plate, it will also work with Icom, some Yaesu, and Alinco that need 3.5 mm and 2.5 mm plugs.
This is the rounder style speaker mic that fits nicely in the palm of your hand. $20

MFJ 286 Speaker Microphone
This was used on a Kenwood TH-225 HT, but it also fits the TH-21/31/41 series HTs, TH-205, TH-215, TH-415, as well as others. It has a 3 conductor 3.5 mm plug and a 2 conductor 2.5 mm plug. It works fine. $12

MFJ-287 Speaker Microphone
Fits same HTs as the MFJ 286 above, but is a smaller more compact speaker mic. It works fine, and looks close to new. $15

Heil Wind Screen
This windscreen can be used with a variety of microphones, including the GM-5. Excellent condition. $8

Cables for Heil (and other) Microphones:

Heil CC-1 XLR 4
3 pin XLR Male to 4 pin XLR Female $25

3 pin XLR to stripped and tinned ends
About 10 feet of quality rubber covered mic cable with a 3 pin XLR connector on one end, and nothing on the other end. Ideal to add your own connector. Can be used with the CC-1 XLR-4 above. $20

Heil round 8 pin connector to 8 pin modular connector for Icom
Not positive of the number, but it might be HSTA-IM or HSTA-706
$15

Microphone holders:

Electro Voice
Gray colored EV, designed to hold 5/8 to 3/4 inch diameter mics,
and go into a stand with standard 5/8 inch threads. $5

Chrome Mic holder
Similar to EV holder, but chrome metal with a green felt on the
inside to protect the mic. For 1/2 inch to 5/8 inch diameter
microphones. Standard 5/8 inch threads. $5

Microphone Holder from a Kenwood MC-60 desk microphone
This is the black plastic (or is it bakelite ?) piece that
attaches to the mic stand and holds the mic. It looks like
new. Ideal if yours is broken.
It probably is used on other mics as well. $10

Prices do not include shipping from Florida.

I also have many other accessories available such as many
different types of HTs, VHF and UHF rigs, HF and VHF/UHF
antennas, etc.
Just too many to list here. Please e-mail your requests.

Thanks.

I have three Volcaline Series JRC 465 Mc. transceivers for sale. If you are a collector of these early business band regen sets then you might be interested in them. I got them out of a closet where they had been resting for many years. There is a user license with name and call letters plus original manuals. One is a base package with small mountable ground plane, the second unit comes with a short plug-in whip, and the third which is the prize in my opinion is the portable which is packaged in a leather carrying case and a spot for a small lead acid battery. I remember the ads for them in 50's magazines.

I have not tried to power-up any of them. I am looking to sell all three as a package if there is interest. Email for pics.

6530. WTB: Harvey Wells R-9 or R-9A Receiver

Yahoo group: ham4sale (2007 — 2015)
Date: 2011-07-12 22:45:17 UTC
From: Pigman
Topic: 6530 Message: 6530

Can anyone on here help me and give me a lead finding a Harvey Wells R-9 or R-9A receiver? I'm trying to set up a station as I used as a kid. (Maybe someone on here has or knows of one I might be able to find. I really want to find one that is all there).

I plan to restore it and match it with my Harvey Wells T-90 transmitter, H-W power supply and Harvey Wells antenna tuner.

I am not looking for one restored but that would be OK. I mainly want to start out with a nice looking radio (completely there) I can fully restore. Please describe fully the physical condition of the radio if it's yours. (Paint, rust, holes, original knobs, meter, dial, cabinet, etc.) Pictures would be great but not a deal breaker. (I don't want a rusty hulk).

I had used a pair of Harvey Wells as a youth and would like to reassemble a similar station. I have the tuner, transmitter and power supply right now. Just need the receiver to make things complete.

Please contact me if you would have any leads for me in finding one. Thanks a lot. This is the last missing link to come up with a replica of my Harvey Wells station. I appreciate all of you having to read this. I'm hoping this boat anchor group might have a lead for me to follow.

Lee, w0vt
Houston, TX

6531. Wattmeters, Low Pass TVI Filters FS

Yahoo group: ham4sale (2007 — 2015)
Date: 2011-07-13 22:24:25 UTC
From: Ken Simpson, W8EK
Topic: 6531 Message: 6531

Wattmeter/SWR Bridges, Low Pass TVI Filters For Sale:

Wattmeters:

Micronta 21-520 A Dual Meter HF Wattmeter:
Full scale readings of 10, 100 and 1000 Watts. It has a
remote pickup sensor with about 3 feet of cable to the
dual meter control head. It reads both SWR and forward
watts at the same time, on the dual meters, which are
fairly large. This one is in extremely nice, close to
new, shape. $55

Heath HM-2102 VHF wattmeter, covering 50 to 160 MHz.
Similar to the HM-102, but for VHF frequencies, with
250 and 25 watt scales. It can also be used to check
SWR, and has a remote sensor that can either be left
inside the meter, or separated from the actual meter.
SO-239 connectors in and out. This particular meter works
great, looks great and includes paper work for $45.

SWR Bridges:

Both of these SWR Meters will operate from 160 thru 2 meters,
and have an SO-239 connector on each end.
All will work on HF, and VHF, covering 3 to 150 MHz, so are
ideal for the new rigs that include 6 and 2 meters.

Quement SWB-2

This SWR Bridge features two separate meters -- one for reading
forward power and another for reading SWR. This permits one
to easily monitor both the power going out, and the SWR on
the antenna at the same time. They were made in Japan, and
labeled with various names, including Swan, Siltronix, and
Quement.
It works fine and looks great. With paper work for $40.

Single meter SWR Bridge:

Royce 2-100 Single Meter SWR Bridge / Field Strength Meter
Covering HF, 6 meters, and 2 meters, it is ideal for the new
rigs with 6 meters and 2 meters in them.
This one works fine, and looks extremely nice. I do not see
any scratches on it, but it does have a previous owners name
on it. In its original box with original instructions. $32

Full Power Low Pass TVI Filters:

A low pass TVI filter is added to the transmitter to reduce
harmonic interference. All have SO-239 connectors, and are 50
ohm filters.

Bencher YA-1, high power, low pass TVI filter
If you need a more heavy duty filter for the output of
your amplifier, this one is ideal. It will take full legal
power plus, and has at least 80 db signal attenuation at
TV channel 2.
It is also in a very sturdy metal case with SO-239 connectors
on each end, and is a 50 ohm filter.
This one works great, and looks close to new. It has paper work.
Bencher currently sells these for about $90. This one is only $60.

B & W FL-10/1500
This filter cuts off just above 10 meters, and handles 1500
Watts. It is the latest model B&W filter.
In very nice condition, it looks very close to new. $40.

Para Dynamics PDC 1089
This filter is rated at a full Kilowatt, up to 30 MHz.
5 x 6 x 2 inch black box, instead of the more familiar long
enclosure. It looks like new. $25

Lower power Low Pass Filters:

B & W FL-10/100 low pass filter
Similar to FL-10/1500 above, except power rating is only 100 Watts.
Use this one after your rig, and before
your amplifier. Nice shape for $18.

I also have many other accessories available such as many
different types of microphones, HTs, VHF and UHF rigs, HF
and VHF/UHF antennas, etc.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

6532. Yaesu FT-767GX With 6M-2M-440 Modules

Yahoo group: ham4sale (2007 — 2015)
Date: 2011-07-14 01:54:32 UTC
From: Darren Mende - K5QB
Topic: 6532 Message: 6532

I have for sale a fully loaded Yaesu FT-767GX with all 3 modules - 6M, 2M, and 70 CM - FM tone board, and a high performance MD-1 microphone. The radio has a built-in power supply so there is no need for an external power supply and it can be powered by any source from 110v-220v. The radio has a built-in antenna tuner as well and will tune up almost any coax-fed antenna. I've just changed the VFO encoder, which typically goes on these radios, so it is now rock solid. I've also changed the front panel lights with OEM lights, so it is nice and bright. Below is a list of some of the highlights.

*Auto Tuner
*Built-In Power Supply
*All Mode - All Band (160M - 70CM) Including 60M and 30M
*160M - 10M 100 Watts
*VHF and UHF 10 Watts
*VHF and UHF All Mode - Time for 2M Simplex
*FM Tone Board Installed
*MD-1 Desk Mike Included
*Simple Interface - Everything is Located on the Front Panel

I am the third owner of the radio and have it for five years. I am selling in order to save for a K3. The previous owner was a smoker, so there is some evidence of that. I have cleaned the radio, but it is not brand new looking. The only issue I have with this radio is the VOX and MONI crackle some and are sometimes intermittent. Also, when I changed out the VFO encoder I found that the previous owner secured the knob with glue, so the knob's inner screw is a little loose, but is ok. As the photos show, the radio is a "7" cosmetically with some scratches (mostly from tuners and switches sitting on top) and some small screws missing. The radio is an "8-9" mechanically based on the intermittent VOX and MONI.

As with all electronics, the radio will be sold as is - no returns, but not DOA. Shipping will be actual cost to box and ship to your QTH.

This radio was well over $2,500 when sold new with all of the options. This radio was the Yaesu flagship of the late 1980's. Below is the link to the eham review of the radio. It should be no surprise that everyone is still in love with this radio. I have made QSO all over the world on this radio with a number of simple antennas. From dipoles, to loops, to verticals (I use a Butternut now), this radio has been a workhorse. I also use it on 2M simplex (FM and USB) for a Wednesday night net in DFW. I

really hate to part with it, but I want to build a K3 and I
really need to save up for one.

eham: http://www.eham.net/reviews/detail/498

Please go to the eBay listing for pricing info.

Ebay: http://tinyurl.com/6kex4o5

For pictures, information, or to set up a QSO (I am near Dallas,
TX) send me an email. k5qb at arrl dot net. Also, if you are in
the Metroplex, feel free to contact me to come over and see the
radio.

Jason:

I saw this one, those modules are worth quite a bit so it's a pretty good deal. Of course as with any eBay transaction sold "as-is", there's no assurance that everything works OK. As I mentioned to you on the phone today, I was never a big fan of the FT-767GX's, the receiver's were not that great and they always seemed to have reliability problems.

Congrats on your call sign, that's a great call , very short on CW - now you have to finally get on the air! Call me this evening or any time.

6542. vhf, uhf, and 900 MHz radios for sale

Yahoo group: ham4sale (2007 — 2015)
Date: 2011-07-25 02:14:58 UTC
From: John Miller
Topic: 6542 Message: 6542

I have a few radios for sale, I'll consider offers on these. May consider trades but it's not my first choice as I'm saving up to buy a house soon.
First is a vertex FTL-1011 VHF mobile. Tested to work, I'm told it's been used in the 10 meter band, should go to 6 meters as well. It looks like the lower power version, really looks pretty good I don't know how it was used but it doesn't look like it was mobile. It comes with a mic, I'm asking $75 plus shipping on that.

I have several Motorola MTS2000's for 900 MHz. They're currently programmed with New England area ham frequencies in them, most come with a stubby antenna on them, I have a couple other antennas around if you'd rather, I have used both and don't see any difference noticeably. I've tested them all work fine, batteries are questionable in some cases but I have got a bit of use out of all batteries to check them. I have used all radios and all work fine and look better than the one I use most often as strange as that may sound. There's only one that won't do talk around, and I'll take less money for that one, all the others do repeaters and talk around no problem. I only have one, maybe 2 chargers available, now, this is the jeti series of radios, maybe you prefer the impress batteries and chargers or something, I'll talk on this, and I use one of these on 900 MHz every day, if you don't want the battery, no problem, I'll gladly use them. With battery, I'd like $175, without battery 150 I have one, maybe 2 chargers we can talk on that, I'd like to keep one of the 2 chargers I may have available but if it's a deal breaker let me know, the one charger I will sell I'll let go for $25 which is just a standard charger, the other's a fast charger we can talk on it if you really want it. The radio that wont' do talk around I'll take $ 100 for with battery, 80 with out. There's supposedly an easy fix for that issue with talk around, with as many of these radios as I have and my limited space and what not, I don't want to do it.

There's a Motorola MCS2000 mobile around, it's a version 1 as well 30 watts, programmed also with local 900 MHz ham frequencies in it, I use one of these base and one mobile daily, programmed, tested, and working fine with mobile bracket, Motorola accessory plug, power and ignition sense cable, mic, mounting screws, asking $250

A UHF Kenwood TK-880, 450 to 512 MHz radio but works fine in the high end of the 440 MHz ham band. It's a little scratched but has mic, mobile bracket and power cord, not using it where I live now this is the only one I'm not too keen on talking much on the price of, $175.

Also, I have a bunch of Motorola MT1000 Hand helds, They'll cover most of the UHF ham band, 438-470 no batteries or chargers, they're in good shape, some have engraving on them, maybe a scratch here or there but were tested to work, $45 each.

No prices include shipping, shipping will be extra, I will gladly take paypal or money orders

6545. Crystals FS

Yahoo group: ham4sale (2007 — 2015)
Date: 2011-07-26 15:27:03 UTC
From: Ken Simpson, W8EK
Topic: 6545 Message: 6545

Crystals For Sale:

FT-243, HC-6, etc.:

FT-243 Crystals for 40, 20, 15, and 10 meter ham bands

Crystals can be used at fundamental, or multiplied for
20, 15, or 10 meters. E.g. the 7081 could be used at 7081,
14162, 21243, or 28324 KHz.

7094 (HC-6), 7174 (HC-6), 7175, 7186, 7189, 7198.5 (HC-6),
7200 (HC-6), 7200, 7207, 7225, 7236.2 (HC-6), 7248,
7261, 7283.33 (HC-6), 7325, 7375, 7395, 7400, 7404, 7410,

HC-6 Crystals
These may be used as heterodyning crystals in many
Collins, Drake, Heath, Yaesu, and other rigs.
Freq of crystal in MHz.
7.98, 12.0, 15.0, 16.0, 30.75, 32.5, 39.0, 42.7,
44.5, 46.0, 46.7, 49.9, 51.1,

All crystals above are $8 each.

Crystals for 2 meter ham rigs For Sale:

Does anyone have an older two meter ham rig and need crystals?

Maybe I can help. I have some 2 meter crystals available -- both
transmit and receive. Most are in the 146 and 147 MHz band segments,
with very, very few in the 145 MHz segment, and none in the 144 MHz
segment. These are for ham rigs only, and not commercial rigs.

These are all the small HC-25 crystals, like are used in most of the
solid state 2 meter mobiles and HTs. Please e-mail the operating
frequency you need. I have them listed by operating frequency and rig,
and not by actual xtal frequency. Send the frequencies you need
(transmit or receive), and the rig that you have, and I will see if
I can help. I have cross references for the various rigs, so I will
know what you need if you give the rig. These crystals are $6 each.

Prices do not include shipping from Florida.

Thanks.

6548. Homebrew Grid Dip meter

Yahoo group: ham4sale (2007 — 2015)
Date: 2011-07-27 13:45:12 UTC
From: W4RON@carolina.rr.com
Topic: 6548 Message: 6548

This Grid Dip Meter was built by an old friend of
mine Rufus Castles W4SZG.
Rufus was a master machinist, and electronics tech.

A year or so after he passed away his son called me
and asked me to clean out his work shop. It took
three loads in my Grand Caravan to get it all home.

This meter is one of the pieces I've kept mainly because I didn't want to sell it. But it's been sitting
in the shelf in my garage for nearly ten years now and
it's time for it to go to a new home.
Since I can only put 3 photos in this ad I built a
web page for it, you can see a lot more photos
here,

http://radioheaven.homestead.com/W4SZG-GridDipMeter.html

I've racked my brain trying to think of a fair price
to ask for it.
I think $50 plus postage is fair, I think it'll fit in a
flat rate priority mail box OK which is $10.95.
It'll be well packed.

Total with postage is $60.95

6551. Dual Band HT, mobile rigs, and related items FS

Yahoo group: ham4sale (2007 — 2015)
Date: 2011-07-27 19:17:09 UTC
From: Ken Simpson, W8EK
Topic: 6551 Message: 6551

Dual Band HT and Dual Band mobile FM transceivers;
DTMF Touchtone Microphones, and Speaker Mics, For Sale:

Alinco DJ-580 dual band (2m and 440 MHz) HT:

Covers 110 to 174 MHz in the VHF position, which
includes the AM Aircraft band. 440 to over 480 MHz
in the UHF position. It is my understanding that it
can also be modified to cover into the 800 and 900
MHz region. It will also cross band repeat, and is
a very rugged radio.

Power output has 3 different levels. With the
7.2 V battery packs, it has 0.25 W / 1 W / 2.5 W.
If used with the larger 12 V batteries, it will
produce 0.25 W / 1.2 W / 5 W.

This particular unit is in very good shape, both
electrically and cosmetically. The keyboard has very
crisp and clear lettering. It includes the empty
6 cell battery pack that takes six AA cells, rubber
duck antenna, belt clip, wrist strap, and paper work.
$150

Kenwood TW-4100 A, Dual Band mobile FM transceiver:

The Kenwood TW-4100A is a high powered dual-band transceiver
providing 45 watts on 2 meters and 35 watts on 70 cm (440 MHz).
A low power setting of 5 watts may also be selected. Ten memories
with offset recall and lithium battery backup are provided. There
are separate antenna output jacks on the back panel for 2 meters
and 440 MHz. It is supplied with a 16 key DTMF hand mic,
mobile mounting bracket and DC power cord. Requires 13 VDC at
7.5 amps.

Features
* 10 Memories
* Scanning
* Priority Watch
* Lithium battery backup
* Frequency Lock
* Auto Repeater Offset
* Large LCD Display
* DTMF Microphone

This particular unit works great and looks fine. It has a
subaudible tone encoder added where the speaker would normally

be. That means that an external speaker needs to be used with it.

With DTMF Mic, tone encoder, mobile bracket, power cord, and paper work for $160.

Icom IC-281 H, 2 meter transceiver with 440 MHz receive:

The Icom IC-281H 2 meter mobile FM transceiver boasts 50 watts output plus 440 band receive (440-450 MHz) for full duplex crossband operation. Other features include 60 regular memories, 10 scratch pad memories, 14 auto dialer memories, built-in pager and code squelch functions and auto memory channel advance. The IC-281H is packet ready. A data jack is available for direct TNC connection, supporting speeds up to 9600 baud. It features a huge heat sink. Requires 10.5 amps at 13 VDC.

Features
* 440 MHz Band Receive
* Tone Scan
* 60 Memories
* 10 Scratch Pad Memories
* Scanning
* Call Channel
* 50/10/5 Watts Output
* Auto Power Off
* Priority Watch

This one works 100% and looks extremely nice.
With DTMF Mic, tone encoder, mobile bracket, power cord, and paper work for $150.

DTMF Touch Tone Microphones:

Kenwood MC-46 DTMF Touch Tone Microphone
Touch tone DTMF microphone with 6 pin connector, as used on TR-7730, TR-7800, TR-7850, TR-7930, TR-7950, TR-8400, TR-9000, TR-9130, and others. Up-down switch on top. 16 digit touch tone pad. This one works fine, and includes paper work for $40.

Kenwood MC-48, DTMF Touch Tone Microphone
Round, 8 pin connector, will go with any Kenwood rig taking this kind of connector (TM-201, TM-211, TM-221, TM-231, TM-241, TM-2530, TS-50, TS-430, TS-440, TS-570, TS-850, TS-870, TS-930, TS-940, TS-950, TW-4000, etc.). Has UP and DOWN switches and PTT, along with 16 digit touch tone pad.
This one works fine, and looks extremely nice.
With paper work for $45.

CES 610 L DTMF Touch Tone Mic
Can manually dial a number, or automatically store it in

the mic, and "speed dial". 12 digit touch tone pad on the
front. 8 pin modular plug (like computer LAN).
Looks to be new. $38

KDK DM TT-1 DTMF Touch Tone Mic
This mic has a 12 digit touch tone pad on it, with a
switch to turn the pad on and off. With 4 pin plug.
It works fine, and looks great. $35

KDK Model TM-2 DTMF Mic
With touch tone pad and up-down switches. It presently
has a round 8 pin connector wired for Kenwood. Nice
condition. $40

Johnson 250-0761-010 / CES 655 L DTMF Mic
It has a 12 digit pad on the front, and is a rugged mic.
Presently with 4 pin plug. Looks to be unused. $38

HT Speaker Microphones:

Azden SDX-316 Speaker Microphone
Although it has an Azden name plate, it will also work
with Icom, some Yaesu, and Alinco that need 3.5 mm and
2.5 mm plugs.
This is the rounder style speaker mic that fits nicely in
the palm of your hand. $20

MFJ 286 Speaker Microphone
This was used on a Kenwood TH-225 HT, but it also fits the
TH-21/31/41 series HTs, TH-205, TH-215, TH-415, as well as
others. It has a 3 conductor 3.5 mm plug and a 2 conductor
2.5 mm plug. It works fine. $12

MFJ-287 Speaker Microphone
Fits same HTs as the MFJ 286 above, but is a smaller more
compact speaker mic. It works fine, and looks close to new. $15

I also have many other accessories available such as many
different types of microphones, HTs, HF, VHF and UHF rigs, HF
and VHF/UHF antennas, etc.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

6554. Antennas and related items FS

Yahoo group: ham4sale (2007 — 2015)
Date: 2011-07-30 17:18:48 UTC
From: Ken Simpson, W8EK
Topic: 5416 Message: 6554

Antennas and related items For Sale, such as HF Antenna Tuner, 2 meter and 440 MHz mobile antennas, mobile antenna mounts, VHF Wattmeter, SWR Bridges, HT Rubber Duck Antennas, Coax Connectors, and Low Pass TVI Filters:

TenTec 229 Full Power HF antenna tuner:

This roller inductor tuner will handle full legal power. It uses an "L" match instead of a "T" match, which means there is only one spot that will give the correct match. The "L" match is also more efficient. Electrically, it is the same as the 238 series, 229 A, 229 B, and 4229.

There is also a built in wattmeter with full scale reading of 200 and 2000 watts. It also has an SWR bridge with lighted meter, plus a 4 position antenna switch.

It can be used on any HF frequency, including the WARC bands, as it is continuously adjustable. It has a built in internal balun, so open wire can be used.

Cosmetically, this unit is the color of the earlier Omni series (Omni 546, series A, B, and C) with the black vinyl covering, and nice aluminum trim around the front.

This particular unit functions 100%, and looks perfect. I can not find a scratch on it.

Paper work is included for $325.

Two meter mobile antennas:

Larsen LM-150, 2 meter antenna
Has 3 db gain on 2 meters.
This coil is still in its original box, & appears to never have been used. It even has its rubber washer with it. Coil only for $20.
Coil, with 4 foot used whip. $29

Larsen Q Quarter Wave Antenna
Fits a 5/16 inch stud, such as the Larsen LM mount, and others. It can be cut for 2 meters, 220 MHz, or 450 MHz bands. $9

Trunk Lip Mount with 5/16 inch stud
Ideal for use with the "Q" or LM-150, or any other antenna that requires a 5/16 inch stud. Coax is included for $18.

Buy the LM-150 with 5/8 whip, the 1/4 wave whip, and the
mount for $50.

Larsen VHF and UHF Mobile antennas:

All are in very nice condition.

Larsen NLA-150, 2 meter antenna, for Larsen NLA mount
Has about 3 db gain on 2 meters.
Coil only, without whip (whip is hard to ship). $10
With four foot whip. $19

Larsen NLA-450 coil and "stacked" whip for 440 MHz
Fits the Larsen NLA mount, and has about 5 db gain on
the 70 cm band. Coil and stacked whip are included. $15

Larsen Q Quarter Wave Antenna
Fits a 5/16 inch stud. It can be cut for 2 meters,
220 MHz, or 450 MHz bands. $9

UHF (440 MHz) Mobile Antennas:

Avanti "On Glass" antenna for 440 MHz:
This antenna was made by Avanti to mount on a windshield,
or other glass. It does not require a ground plane, as
it is a 1/2 wave antenna, rated to have 3 db gain. It is
ideal for places where a ground plane is not available,
such as a boat or motor home, in addition to cars. A
special tuning box is included to match to your particular
situation.
Avanti Antenna for 440 MHz
Still in its original tube, unopened. $30

Larsen NLA-450 coil and "stacked" whip for 440 MHz
Fits the Larsen NLA mount, and has about 5 db gain on
the 70 cm band. Stacked whip is included. $15

Mobile Antenna Mounts:

Large, heavy duty magnetic mount
This large mag mount will take any antenna with a standard
3/8 inch 24 thread connector. It is very heavy duty, about
5 inches in diameter, with a long coax for $25.

Trunk Lip Mount with 5/16 inch stud
Ideal for use with the "Q" or LM-150, or any other
antenna that requires a 5/16 inch stud. Coax is included.
Very nice for $18.

Heath HM-2102 VHF Wattmeter:

Heath HM-2102 VHF wattmeter, covering 50 to 160 MHz.
Similar to the HM-102, but for VHF frequencies, with 250
and 25 watt scales. It can also be used to check SWR, and

has a remote sensor that can either be left inside the
meter, or separated from the actual meter. SO-239
connectors in and out.

This particular meter works great. It looks very close
to perfect with no defects that I can find.

Paper work included for $50.

HF and VHF SWR Bridges:

Both of these cover from 3 to 150 MHz, covering HF, 6 meters,
and 2 meters, so are ideal for the new rigs with 6 meters and
2 meters in them. SO-239 connectors.

Quement SWB-2
This unit features two separate meters -- one for reading
forward power and another for reading SWR. This permits one
to easily monitor both the power going out, and the SWR on
the antenna at the same time.
It works fine and looks great. With paper work for $40.

Royce 2-100 Single Meter SWR Bridge / Field Strength Meter
This one works fine, and looks extremely nice. I do not see
any scratches on it, but it does have a previous owners name
on it. In its original box with original instructions. $32

Rubber Duck antennas for your HT:
All are for 2 meters, are in good condition,
and are $10 each, unless stated otherwise.

BNC - Standard length, about 7 inches long
BNC - Original from Kenwood TH-215, about 5 inches long
BNC - Stubby about 4.5 inches long

5/16 inch threaded, as used by Motorola and others
Stubby - 4 inches long

Type F connector - 6.5 inches long

PL-259 connector - 6.5 inches long
HyGain 275, still in original packaging

PL-259 connector - Stubby - 4.6 inches long
Centurion, still in original package

Special for Kenwood TH-21 HT threaded connector
Stubby, about 4.5 inches long - $20

BNC Stubby for 440 MHz, 3 inches long

Coax connectors and adapters:

Prices are per connector. Several of each are
available. It looks like these have not been used.

"N" Connector - Double Male $8

BNC male for coax cable
standard type $2
crimp on type $3

Chassis mount BNC female
square mount (uses 4 screws) $3
screw in type $3

BNC "T" - two female and one male $3

Antenna adapter to fit the BNC connector on the HT
and provide an SO-239 connector that will permit
a PL-259 to be attached. (BNC male to UHF female) $5

UHF Male (PL-259) to BNC female (opposite of above) $5

UHF double female "Barrel connector" (two SO-239 together) $3

UHF "Bulkhead Connector" - Double female, as above, but for
mounting thru a window, siding, etc. about 3 inches long $6

UHF double male connector (two PL-259's together) $3

UHF "T" connector with two female (SO-239) and one male
(PL-259) connection $5

Low Pass TVI Filters:

A low pass TVI filter is added to the transmitter to reduce
harmonic interference. All have SO-239 connectors, are 50
ohm filters, and include paper work.

Bencher YA-1, high power, low pass TVI filter
If you need a more heavy duty filter for the output of
your amplifier, this one is ideal. It will take full legal
power plus, and has at least 80 db signal attenuation at
TV channel 2.
This one works great, and looks close to new. Bencher
currently sells these for about $90. This one is only $60.

B & W FL-10/1500
This filter cuts off just above 10 meters, and handles 1500
Watts. It is the latest model B&W filter.
In very nice condition, it looks very close to new. $40.

Para Dynamics PDC 1089
This filter is rated at a full Kilowatt, up to 30 MHz.
5 x 6 x 2 inch black box, instead of the more familiar long
enclosure. It looks like new. $25

B & W FL-10/100 low pass filter
Similar to FL-10/1500, except power rating is only 100 Watts.
Use this one after your rig, and before your amplifier.
Nice shape for $18.

I also have many other accessories available such as many different types of microphones, HTs, HF, VHF and UHF rigs, HF and VHF/UHF antennas, etc.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

********** Tube Sockets & Accessories **********

Coaxial Planar Tube -- shielded heater/cathode contact assembly. Fits 2C39, 3CX100A5 or similar. Silver plated, NOS -- $10 each

Johnson 122-101 ceramic 7 pin septar socket (accepts 826, 832, 4D32, PL6549, PL6569, etc). These were likely a special order as they have the standard ground shield but, no ground clips. NOS though, a bit dusty & tarnished from long storage -- $10ea

Johnson 122-237 ceramic 7 pin giant socket for 813, etc. NOS, $15

Johnson 122-237 ceramic 7 pin giant socket for 813, etc. Used, $10

Johnson 122-247A or 122-248 ceramic 7 pin septar socket (accepts 7094, 8877, 832A, etc.) Used, $10

National SPP-9 -- 9/16" Ceramic Plate Caps (fit 813 or similar) NOS, last pair $10.

More sockets and some tubes may be seen at:

http://qsl.net/wc6w/wc6wfsw/index.html?fr41.html

********** Transformers **********

Stancor Transformers

FH-210 115/230V Primary 50/60 Hz -- 2.5 VCT@10A Secondary, sealed square metal case, used -- $15

F-106 115/230V Primary 50/60 Hz -- 10 VCT @ 6.5A Secondary, S case Used $20

F-610 115/230V Primary 50/60 Hz -- 6.3 VCT @ 10A Secondary, S case Used $20

Triad Transformers -- 115V 60CPS Primary

F21A 6.3VCT @ 10A Secondary, Used -- $20

F28U 6.3/7.5 VCT @ 25A Secondary, NOS -- $40

More Transformers may be seen at:

http://qsl.net/wc6w/wc6wfsw/index.html?fr36.html

********** Capacitors **********

Cardwell -- XR-1000HS (about 950pF max measured) These have slightly contoured plates for improved tuning resolution at minimum C. .030 air gap. About 4.5" x 4" x 3.5" overall including plate travel. Used, Good condition. $20 ea.

National Type TMC-300, 300pF variable capacitor, .070" air gap, approx. 8" X 4" x 2.5" with plates closed. Nice n' shiny like new! $40

OAK 22641, Four Section capacitor, 20-550 pF (measured) per section large receiving style capacitor. .010 air gap. 6½" x 3½" x 3" overall. ¼" diameter shaft. Counter-Clockwise rotation for capacity increase. NOS $30

Three Section capacitor -- 20-640 pF (measured) per section large receiving style capacitor. .010 air gap. 5½" x 3½" x 3" (open rotor) overall . ¼" diameter shaft. Counter-clockwise rotation for capacity increase. Very slightly used. $25

Sprague 3600pF @ 30KV Doorknob capacitor. Red epoxy encased style -- $25

Centralab 857-25Z Ceramic 25pF NPO 15,000 volts. NIB $20.

More Capacitors may be seen at:

http://qsl.net/wc6w/wc6wfsw/index.html?fr34.html

********** Connectors -- All NOS , US manufacture ******************

Amphenol MHV connectors -- Two 28100 right angle cable males & two 27025 panel mount females. -- $40 all.

UG-932 A/U MHV Male Cable connectors -- $10 ea

UG-961 A/U MHV Female Panel connector -- $12

UG-560/U HN Female panel mount connector -- $15 ea

UG-30C/U N Female-Female Bulkhead Connector -- $10 ea

More connectors may be seen at:

http://qsl.net/wc6w/wc6wfsw/index.html?fr44.html

********** Miscellaneous **********

Radio Switch 86 series, 6 position, 2 deck, switch with 60 degree indexing. NOS but, a mite tarnished from age, should clean up fine with Tarn-X. $50

More Switches may be seen at:

http://qsl.net/wc6w/wc6wfsw/index.html?fr43.html

1N2804A -- 6.8V 50 Watt Zener Diodes, TO-3 case, NOS -- $10 each

More Semiconductors may be seen at:

http://qsl.net/wc6w/wc6wfsw/index.html?fr20.html

AC-DC Electronics model RS5N30-1. 5V @ 30A switching power supply with remote sense terminals, screwdriver voltage adjust, 6" x 2.5" x 10". Employed with an external soft-start (See-- http://qsl.net/wc6w/wc6wamps/index.html?fr63.html) these can power the heater(s) on a 3CX1000 or a pair of 3-400Z's, 3-500Z's, 4-400A's, etc. Used -- $30 ea. (3 units available)

More Power Supplies may be seen at:

http://qsl.net/wc6w/wc6wfsw/index.html?fr15.html

Synchro Transmitters -- IMC Magnetics, Model 008-216, 26V 400Hz, .75" diameter housing, .120" dia. shaft, flying leads. These will drive a typical Radio Compass Indicator. NOS. $20 ea.

Water cooled heatsinks -- 12" x 8" used, drilled for a flock of TO-3's plus a few diodes. Back is flat. 3/8" water lines. $50 pair

ILG Electric Ventilation -- 17-18-022A squirrel cage type fan. Encased motor with 181-009-EA fan 115/230 VAC 1.6A/.8A 50/60Hz 3000 RPM 4+" round intake, 3+" x 4-3/4" rectangular output flange, weighs 25 lbs. Removed from a RCA transmitter that employed a 4CX5000A. Used -- $45

Commercially made airflow switch assembly consisting of a V4-16 Microswitch (250VAC 5A contact rating) with a 1-3/8" x 1-3/4" sheet metal vane soldered to the switch arm. The switch is mounted in a U shaped anodized aluminum frame about 2.5" deep with mounting ears. Marked S-101 and part no. 467-115 if anyone knows where that's from! NOS $10

More mechanical items may be seen at:

http://qsl.net/wc6w/wc6wfsw/index.html?fr46.html

****

And of course some meters, panel meters, time meters & RF ammeters, please see:

http://qsl.net/wc6w/wc6wfsw/index.html?fr32.html

****

From: John P.
Topic: 6546 Message: 6556

Hi all,

  I am updated my posting. I am still looking. At this time, and looking at my budget, I am thinking of the MFJ 815C which has peak reading, cross-needle, and has 2 ranges including 2KW.

  Some here had mentioned a Bird. But this is a little beyond my budget.

  I continue to look to buy one in used but good condition.

Thanks,
John - WA2HIP

6557. FS: The Complete DXer (3rd edition) book

Yahoo group: ham4sale (2007 — 2015)
Date: 2011-07-31 22:19:07 UTC
From: John Geiger
Topic: 6557 Message: 6557

I have for sale a copy of "The Complete DXer" by Bob, W9KNI. This is the 3rd edition of the book which came out in 2003, and it covers using spotting clusters, whereas the first 2 editions didn't. It is a great read, and full of useful information for chasing DX. It is in very good condition, and you will definitely up your DX totals after reading this unless you are already on the honor roll or just waiting for KP1 and P5.

I am asking $9 plus $3 for shipping in North America.

73s John AA5JG

Sinadder 3 By Helper Instruments

Sinadder 3 sinad meter, unit is used but is working 100% OK verified its ops against my Motorola R-2670 service monitor and found to be right on at 12db and 20db sinad. It has a few scratch's but i would rate it at a 9 out of 10. I also have a picture of the back of the unit if someone would like to see it. I'm asking $150.00 plus $15.00 shipping.

RF Millivolter RF801 by Helper Instruments

I have for sale a used RF Millivolter RF-801 with probe, This unit is in like new condition and is very clean. It has been used very little over the years. I would like to get $125.00 for this unit but i will take reasonable offers as well.

Hitachi VC-5025 ScopeMaster

Used but like new condition Hitachi VC-5025 ScopeMaster. 20Mhz digital scope, DVM,Serial Data Analyzer, Frequency counter, timer. Unit comes with power transformer, 2 scope probes, DVM leads, Nicad battery pack. This unit is 100% functionally. I used this primarily as a serial data analyzer for a few years, but all functions work as if it was new. I paid $1300.00 for this unit new. I would like to get $400.00 out of it but willing to take offers.

Motorola R-1151A Code Synthesizer II

I have for sale 1 good used Motorola R1151A Code Synthesizer II with manual. The unit is working 100% OK i used this unit to test pagers a few years back 2 tone, 5-6 tone, pocsag and super pocsag it has other functions as well but those are the ones that i used. This unit has some signs of usage on it but has not been abused. The front panel keypad is 100% functional. I'm asking $125.00 for this unit but will take reasonable offers as well.

I'm good on QRZ.com

6563. FS: Yaesu FT450 HF/6m transceiver

Yahoo group: ham4sale (2007 — 2015)
Date: 2011-08-01 16:49:57 UTC
From: John Geiger
Topic: 5848 Message: 6563

I have for sale a Yaesu FT450 HF/6m transceiver in excellent condition. The case looks very good with no scratches, but there are a couple of very light "smudges" on the one side. You really have to look for them, they are light and small, and won't show up in a picture, but they are there. The rest of the radio looks excellent.

It does 100 watts on HF and 6m, with IF DSP so there are no filters to buy. Has a built in CW keyer, built in voice keyer, built in TXCO and a 10khz roofing filter as standard. The radio works excellent except that the fan is a little noisy at times, especially when it goes into high speed. Probably need a drop or 2 of oil or something like that.

THe FT450 comes with the hand mic, power cord, original box, and manual. It has the ATU-450 autotuner installed, but I will pull that and sell for less if you like.

I am asking $560 plus shipping with the AT, or $500 plus shipping without it. Trade offers are always welcome as well.

Topic: 6565 Message: 6565

FS: MFJ-1045C 1.8 - 54MHz Preselector

"The *MFJ-1045C* receiver preselector covers 1.8 to 54 MHz and
lets you copy weak signals. It rejects out-of-band signals, images
with up to 20 dB gain. Gain control. Dual gate MOSFET, bipolar
transistors for low noise, high gain. Connects 2 antennas and 2
receivers."

I got this when I thought I was getting a Kenwood TH-F6A and
wanted to test its impact, and protection of the front-end,
on the SW receive side. Plans changed.

Nearly-new in original box with manual. $65. shipped conus.

6566. FS: Kenwood TK-230 VHF +charger +spares +new battery

Yahoo group: ham4sale (2007 — 2015)
Date: 2011-08-01 23:36:42 UTC
From: hitekgearhead
Topic: 6566 Message: 6566

I have a TK-230, two parts radios, a rapid charger and one brand new battery (almost) available for sale. Two of the radios have full keypads.

Last year, I purchased the original TK-230 from a group member. I then bought the parts radios as spares, acquired a rapid charger and then also purchased a 1200mAh commercial quality battery from Power Products. I thought I would tinker with these radios but I have never gotten around to it. So now that we are planning on moving I am starting to thin out the projects that I have never gotten around to. So I have these up for sale.

I would like to get $50 for the lot. I figure the knobs, antenna and new battery are worth that. Shipping would be via USPS flat rate box. $15 should cover that just fine.

If you would like pictures I can gladly pass a few of them along just email me at the below address.

Thanks!
Albert

Topic: 6571 Message: 6571

Just the thing for running grounds in you shack;
1" wide braid, $1.25 per foot plus postage CONUS ONLY.

~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~

This Grid Dip Meter was built by an old friend of
mine Rufus Castles W4SZG.
Rufus was a master machinist, and homebrewer.

A year or so after he passed away his son called me
and asked me to clean out his work shop. It took
three loads in my Grand Caravan to get it all home.

This meter is one of the pieces I've kept mainly because
I just didn't want to sell it. But it's been sitting
in the shelf in my garage for nearly ten years now and
it's time for it to go to a new home.
I put some photos on a web page
http://radioheaven.homestead.com/W4SZG-GridDipMeter.html

I've racked my brain trying to think of a fair price
to ask for it.
I think $50 plus postage is fair, I think it'll fit in a
flat rate priority mail box OK which is $10.95.
It'll be well packed.

Total with postage is $60.95

~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~

For Sale: 12.6/6.3V CT, 50VA Transformer
Brand New, in original box.

$12 plus postage, or $18.35 total.

http://radioheaven.homestead.com/12volttransformer.html

These would be perfect for building yourself a voltage
bucking unit to reduce the high modern AC line voltage
to something a little more suited to powering
your antique/vintage radios.

~~~~~~

A neat looking vintage Triplett model 1200A.

RadioMuseum says it was made in 1938.
Here's a link to their page on it;
~~~~~~

http://www.radiomuseum.org/r/triplett_1200a1200.html

It looks to be in nice condition,
I tried it and it reads AC line voltage.
Could not get it to read DC, or Ohms.

Sold as is, for parts or repair.

Price is $45 plus postage.

I try to get some photos on a web page later today.

From: John Geiger
Topic: 6573 Message: 6573

I am looking for a 70cm all mode radio like the FT780, FT790, FT790RII, TS811, TR851A, TR9500, TM455A, IC 451, IC 471, IC490.or FT726 with UHF module. Might be able to swing a FT736R for the right price. I would also be interested in a yaesu FT100D or FT857D. It needs the mic and power cord. Any other accessories aren't really needed. Let me know if you have one for sale.

Date: 2011-08-10 02:27:08 UTC
From: Robert Fish
Topic: 6583 Message: 6583

I have a brand new (about a month old) Kenwood TS-590 for sale. I bought it to try it out and see if I liked it.
It is a fine radio, but it is more radio than I need at the moment. I have less than 10 hours on it.
I guess I like radios with big knobs and analog dials and no menus. I will stick to my Drakes for now.

My loss is your gain, I will ship it to your door in its original box for $1450.00. (I paid about $1700.00 with taxes,shipping etc.)

Lots of warranty left.

Thanks,

Bob K6GGO

6587. Hammarlund SP-600 for sale

Yahoo group: ham4sale (2007 — 2015)
Date: 2011-08-11 17:02:53 UTC
From: Robert Fish
Topic: 6587 Message: 6587

I have an SP-600 for sale. It is in a nice cabinet and works well. There
are some blemishes you can barely see in the picture on the front faceplate.
They aren't bare metal, it is more like he gloss came off in places
leaving just the original paint color. I will also throw in the two
DVD's (4 hours) that
Chuck Rippel made on the SP-600. It details how to operate, modify,
restore and align this fine receiver. I bought these videos (they were
90 bucks)
when I first bought the receiver because I was going to restore it. But,
it seemed like it worked pretty well to me so I never got around to it.
Now I need
to make some room around here for other projects. The picture shows a
spinner type tuning knob, I have the Stock one as well it will be included.
Best reasonable offer for the radio and the videos will take it.
Pick up would be best or I could meet somewhere in the Bay Area or the
central valley. This guy weighs at least 80 lbs so it won't be easy to ship.
I am willing to ship this radio if I have to, but you will have to tell
me how you want it packed. Like I said pick up would be best.

Here's a link to a picture:

Hitachi VC-5025 ScopeMaster

Used but like new condition Hitachi VC-5025 ScopeMaster.
20Mhz digital scope,DVM,Serial Data Analyzer, Frequency counter, timer. Unit comes with power transformer, 2 scope probes, DVM leads, Nicad battery pack.
This unit is 100% functionally. I used this primarily as a serial data analyzer for a few years,
but all functions work as if it was new. I paid $1300.00 for this unit new. I would like to get $300.00 out of it but willing to take offers.

6592. New Portable 5500 Watt Gas Generator For Sale

Topic: 6592 Message: 6592

I purchased a new UST Model GG5500 portable gas generator from Pep Boys & have never used it other than to fire it up & test it & let it run until gas went thru to dry it out. It's 5500 watts with volt meter & 2 wheels & handles to lift & roll. Current price on Pep Boys website is $599.99. Will sacrifice for $450 OBO. I can take a couple of photos & email them upon request. Hv manual for it. Good generator for field day activities.

Thanks for looking & 73,
Bob, K6PF

Date: 2011-08-15 03:45:58 UTC
From: Mark
Topic: 6593 Message: 6593

I'm in need of a A9 (Systems 9000) control head for a Spectra. The one I have is currently from a T45ZXA5JE9AK, and is a HCN1073A. (I have it on a converted 900 MHz Spectra, and was working well until about a month or so ago.) It started to go flakey on me and I thought it was in need of a re-cap job. Well, since the re-cap, the problems remain. It's now displaying a checksum error code (FAIL 05/82) so I think it's toast.

I've tried swapping it out with a head with an earlier Model number, but no joy.

PLEASE REPLY OFF-LIST to: n9wys <(at)> ameritech <(dot)> net

Thanks,

6595. AADE L/C Meter IIB for sale

Yahoo group: ham4sale (2007 — 2015)
Date: 2011-08-16 11:39:34 UTC
From: phil_ad5x
Topic: 6595 Message: 6595

The AADE L/C Meter IIB is a hand-held, digital inductance and capacitance meter with a four digit display. It features automatic ranging and self-calibration. You can find reviews here: www.eham.net/reviews/detail/2253. Here's the direct link to Almost All Digital Electronics: www.aade.com/lcmeter.htm.

I am the original owner of this unit, and I built it from a kit. It has a few scratches on the face, but it works perfectly. I also built a little adapter board that makes it easy to plug-in leaded inductors and capacitors. Email me and I'll send you a photo of the unit with the adapter board. The kit sells for $100, and the wired/tested unit for $130. My price is $75 shipped in the US. Check, money order or PayPal accepted.

Phil - AD5X

6596. Several Bench Power Supplies FS

Yahoo group: ham4sale (2007 — 2015)
Date: 2011-08-16 11:57:43 UTC
From: Ken Simpson, W8EK
Topic: 6596 Message: 6596

Several Variable Bench Type Power Supplies For Sale:

Kepco CK 18-3 Variable Bench Power Supply:

This variable power supply is a Kepco Model CK 18-3, which means
that it will produce up to 18 V DC at up to 3 amps. This is
an ideal bench power supply!

The voltage is adjustable with a 10 turn pot from close to zero,
up to almost 20 volts. There is a fairly large analog meter that
reads the voltage. Built in current limiting is adjustable with
a 10 turn pot from a few ma to up to about 3 amps. A separate
meter reads the current, so both voltage and current can be read
at the same time. Also, there are connections on the back to
allow remote sensing and remote programming. This is a quality
regulated power supply!

This particular unit works 100%, and looks extremely nice.

These are going for $190 to $200 (plus shipping) in this
condition on that e place. Buy this one for $160.

Kepco Model ABC 40-0.5 Variable Bench Power Supply:

This variable power supply is a Kepco Model ABC 40-0.5, which means
that it will produce up to 40 V DC at up to 1/2 amp. This is
an ideal bench power supply.

The voltage is adjustable with a 10 turn pot from close to zero,
up to about 40 volts. There is a fairly large analog meter that
reads the voltage. There is also current limiting built in that
is adjustable from about 100 ma to up to about 700 ma. The same
meter that reads voltage can be switched to read current, or
short circuit current (the point that the current limit is set).
In addition, there are connections on the back to allow remote
sensing and remote programming. This is a quality regulated
power supply!

This particular unit works 100%, and looks extremely nice.

These are going for $125 to $150 (plus shipping) in this
condition on that e place. Buy this one for $90.

Prices do not include shipping from Florida.

I also have many other accessories available such as many
different types of microphones, HTs, HF, VHF and UHF rigs, HF
and VHF/UHF antennas, etc.

Just too many to list here. Please e-mail your requests.

Thanks.

6597. Looking For Linear

Yahoo group: ham4sale (2007 — 2015)
Date: 2011-08-17 03:43:58 UTC
From: John P.
Topic: 6597 Message: 6597

Greetings,

I am now in the market for a linear to augment my station.

My current thinking is as follows:
SB-200/201
Yaesu FL-1000/1000B
GLA-1000B
Swan 1200W/1200Z

I am willing to consider also a project amp for a reasonable price.

My target is the 500 to 600 watt output range at a reasonable and fair price.

Suggestions, input, comments and for-sale-offers are welcome and requested.

BTW, I also need to consider shipping - I am in Maine

Thanks,
John - WA2HIP

6599. Wanted

Yahoo group: ham4sale (2007 — 2015)
Date: 2011-08-20 10:24:20 UTC
From: pauldebono@rocketmail.com
Topic: 11 Message: 6599

Wanted:

A motorised classic antenna tuning unit similar to Collins (no microprocessors or chips, just the old real LC type) or a motorised roller coaster coil for HF.
Will pay a reasonable price as long as the shipping is reasonable !

6600. Digital Interfaces and related items FS

Yahoo group: ham4sale (2007 — 2015)
Date: 2011-08-20 16:19:15 UTC
From: Ken Simpson, W8EK
Topic: 6499 Message: 6600

Digital Interfaces and related items For Sale:

AEA PK-232 MBX, multi-mode digital controller.
More than just a TNC. It will handle packet, RTTY, Amtor, ASCII, CW, etc. It has version 7 firmware, which I think is the latest. It includes Pactor in it. It works fine, and looks very close to new. The large, inch thick manual is included, all in the original box, for $125.

AEA AC-1 "Wall Wort" Power Supply
This "Wall wort" power supply will supply 12 V DC at up to 1 amp.
It can be used with the AEA PK-232, PK-88 or others.
This unit has a 2.1 mm plug, with the center positive, so it can be used on many different things that require 12 V DC at up to an amp, such as keyers, antenna tuners, etc.
This is a "regular" wall wort -- not the new switching type that creates all sort of noise in your receiver. Get this one, and leave the noise behind. $14

Waters "Universal Hybrid Coupler II" Model 3002:

Most of us would likely call this a phone patch, but it is really much more than that. It does that, but also will interface with a tape recorder, and permit recording and play back of on-the-air QSOs. Nothing says that the tape recorder input must be used that way. Connect the sound card in your computer in this position, and you have a very effective interface.

Model 3002 includes a speech compressor powered by a 9 volt battery. The front panel is finished on both sides, with one side having it set in a horizontal position, and the other in a vertical position.

This was a "top of the line" unit years ago. One only found them with top stations such as Collins.

This particular unit is in really great condition.

With paper work for $100.

Heath HD-15 phone patch / digital interface
This is the unit with the VU meter on the left and 3 knobs that match the SB series to the middle and right. Low or high Z output to the transmitter. It can also be used as

an interface for PSK31, and other digital modes that use
a sound card. The meter makes it great for setting levels.
This one is all original. It is in excellent condition.
Cosmetically, I can not find a scratch on it.
Paper work included for $25.

Heath HD-15 as above, but shows slight wear. $22

I also have parts from an HD-15 donor unit available.
Please let me know what parts you need.

Books related to digital modes:

CQ: The Packet Radio Operators Manual
By Buck Rogers, K4ABT, Close to new condition, $14

ARRL Your Packet Companion
by Steve Ford, WB8IMY; like new. $8

ARRL Specialized Communications Techniques
1975, First Edition, $15

ARRL Learning to Work with Integrated Circuits,
First edition $10

The Radio Amateur's Digital Communications Handbook
By KR3T, J Mayo, Published by Tab, Hardback Book,
Like New, 208 pages, 1992, $12

The Packet Radio Operators Manual published by CQ
By Buck Rogers, K4ABT, 1995, Close to new condition, $12

Tab Books:
"Oscar: The Ham Radio Satellites"
by recent silent key Dave Ingram, K4TWJ
First Edition, Hardback, Like new, $14

I also have many other accessories available such as many
different types of microphones, HTs, VHF and UHF rigs, HF
and VHF/UHF antennas, etc.
Just too many to list here. Please e-mail your requests.

6606. For Sale: HFp HF Portable Vertical Antenna

Yahoo group: ham4sale (2007 — 2015)
Date: 2011-08-22 19:12:45 UTC
From: kcszjerseyham
Topic: 6606 Message: 6606

For Sale: Ventenna Hfp Portable Vertical Antenna which covers 40M through 6M . The kit comes with all the parts required to set the antenna up on the Ham bands from 40M through 6M, including base plates, radial wires, guy lines, a coax pigtail, 6 each 18" sections that you screw together to match the frequency you are working on and a laminated card which shows the configuration for each Ham band. All parts store in a 6" x 20" heavy-duty nylon bag which is included. The entire antenna and nylon bag weighs less than 3 pounds. Just connect your own coaxial feed line to your transceiver and you are ready to get on the air.
I am the original owner and can attest this antenna has only been assembled one time and is in like new condition. HRO is selling this antenna for $225.95 which includes shipping. I am asking $185.00 which includes shipping to continental U.S.A. if paid for with U.S. Postal Money Order. If PayPal is used the price is $191.00 to defray the PayPal charges. Please contact Jim KC2SZ via email jameslhiggins0527@gmail.com

From: doc@kd4e.com
Topic: 6609 Message: 6609

FS: Drake T-4X, R-4, MS-4, AC-4, DC-3, etc. with all cables.

Copper is real clean and gear is in excellent condition.
Extras include a 160m crystal and a small digital freq. counter.

I will trade for a really clean FT-857D w/the separation kit
and preferably also the MH-59 mic. or $550. cash.

(I'd rather the Drakes than the Yaesu but circumstances dictate
a highly mobile/portable rig.)

Also FS: Heil PR 781 mic & PL-2T "toplss" boom combo. $225.

Prefer local Savannah-Statesboro, GA deal but I will ship for
the actual cost of shipping.

6612. CW Items FS

Yahoo group: ham4sale (2007 — 2015)
Date: 2011-08-28 01:45:34 UTC
From: Ken Simpson, W8EK
Topic: 6612 Message: 6612

CW Items For Sale -- Keyer Paddles, Keyers, etc.

TenTec KR-20 A Single Paddle Electronic Keyer:

The KR-20 A is a single paddle keyer with the paddle
actuation force factory adjusted. It is basically the
same as a KR-5 A keyer, with the addition of a 110 V AC
power supply.

Contact spacing adjustments are on the front. The weighting
factor is factory set for optimum smoothness and articulation.
An Over-ride "straight key" is conveniently located on the
top for emphasis, QRS sending or tune-up. It has reed relay
output and a side-tone generator with adjustable level.
117 VAC or 6-14 V DC. Finished in an etched aluminum panel
and black textured top and sides that matches the TenTec
Triton IV and others of similar vintage.

This particular unit works fine and looks extremely nice.
It has had a 1/4 inch jack added to the left side so that
an external paddle can be used if desired.

Paper work for the KR-5 A is included for $45.

MFJ 8043 Electronic Keyer:

This is an electronic keyer that uses the Curtis 8043
Keyer IC. It has speed, weight, tone, and volume adjustments.
It is capable of fully automatic or semiautomatic (like
a bug) operation. Also, it can emit a solid "key down"
for tuning up. It works with tube or solid state transceivers.
It has sidetone with a front panel volume and tone control.
Weighting is adjustable from the front panel. It can be powered
via four internal C cells or an external 6 to 9 volt DC
power supply.

The styling of this unit is the wood grain and eggshell color
that TenTec used with their early equipment. TenTec made the
enclosure for MFJ, so it is an exact match.

This particular unit looks really great, and of course
it works. Paper work is included for $35.

TenTec KR-2 A Vintage Keyer Paddle:

The KR-2 A keyer paddle dates to the 1960's and 70's. It
is a keyer paddle only -- no electronics. The styling is
wood grain and eggshell that matches the early TenTec equipment.

The KR-2 A also has a a button on the top (known as over ride switch) that can be used as a straight key, or to tune up a tuner, or whatever you might want to use it for.

This is the same paddle mechanism that TenTec used in the KR-5 and KR-20 keyers.

In addition, there is a heavy weight in it, to keep in in place, so you do not need to chase it across your operating table. It would be a great match with the MFJ 8043 keyer above.

This one works fine, looks good, and even includes the single sheet instruction manual for $25.

MFJ 407 B Electronic Keyer:

This is an electronic keyer that uses the Curtis 8044 ABM Keyer IC. It has TONE, VOL, WEIGHT and SPEED adjustments. It is capable of fully automatic or semiautomatic (like a bug) operation. Also, it can emit a solid "key down" for tuning up. It works with tube or solid state transceivers. It has sidetone with a front panel volume and tone control. Weighting is adjustable from the front panel. Iambic switch on the back selects Iambic keyer mode. It can be powered via an internal 9 v battery or an external power supply.

This particular unit looks really great, and of course it works. Paper work is included for $40.

MFJ 1312 Wall Wart power supply
This unit provides 12 V DC at 500 ma. It has a small 2.5 mm male plug, and is often used for keyers, lighting tuner lights, and other small misc jobs where 12 V DC at low current is needed. $10

I also have many other accessories available such as many different types of microphones, HTs, VHF and UHF rigs, HF and VHF/UHF antennas, etc.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

6618. Two meter & Dual Band mobiles and HTs and related items FS

Yahoo group: ham4sale (2007 — 2015)
Date: 2011-09-05 11:54:08 UTC
From: Ken Simpson, W8EK
Topic: 6618 Message: 6618

Two meter and dual band mobile rigs and HTs and
related items For Sale:

Icom IC-281 H, 2 meter transceiver with 440 MHz receive

The Icom IC-281H 2 meter mobile FM transceiver boasts 50
watts output plus 440 band receive (440-450 MHz) for full
duplex crossband operation. Other features include 60
regular memories, 10 scratch pad memories, 14 auto dialer
memories, built-in pager and code squelch functions and
auto memory channel advance. The IC-281H is packet ready.
A data jack is available for direct TNC connection,
supporting speeds up to 9600 baud. It features a huge
heat sink. Requires 10.5 amps at 13 VDC.

Features
* 440 MHz Band Receive
* Tone Scan
* 60 Memories
* 10 Scratch Pad Memories
* Scanning
* Call Channel
* 50/10/5 Watts Output
* Auto Power Off
* Priority Watch

This one works 100% and looks extremely nice.
With mic, tone encoder, mobile bracket, power cord,
and paper work for $150.

Alinco DJ-580 dual band (2m and 440 MHz) HT:

This HT receives from 110 to 174 MHz in the VHF position,
which includes the AM Aircraft band. 440 to over 480
MHz in the UHF position. Of course it transmits in the
2 meter and 440 MHz ham bands. It is my understanding
that it can also be modified to receive into the 800
and 900 MHz region. It will also cross band repeat,
and is an extremely rugged radio.

Power output has 3 different levels. With the
7.2 V battery packs, it has 0.25 W / 1 W / 2.5 W.
If used with the larger 12 V batteries, it will
produce 0.25 W / 1.2 W / 5 W.

This particular unit is in very good shape, both
electrically and cosmetically. The keyboard has very

crisp and clear lettering. It includes the empty
6 cell battery pack that takes six AA cells, rubber
duck antenna, belt clip, wrist strap, and paper work.
$150

Alinco EDC-43, DC cord / cigarette lighter plug:

This DC cord is used with the Alinco DJ-G7T, DJ-F1T, DJ-160,
DJ-180, DJ-196, DJ-580, and other Alinco HTs. In fact
it appears that it works with most Alinco HTs, except the
"credit card" size HTs. It plugs into a cigarette lighter,
and has a small coaxial power connector on the other end.

This one works 100% and looks like new. $12

Several HT Speaker Microphones:

Speaker-mic for Yaesu Vertex VX-6 / VX-7 / VX-8
This speaker mic has a 4 conductor 3.5 mm connector, with
the threads as used by the VX-6 / VX-7 / VX-8.
Looks to be unused. $15

Azden SDX-316 Speaker Microphone
Although it has an Azden name plate, it will also work
with Icom, some Yaesu, and Alinco that need 3.5 mm and
2.5 mm plugs.
This is the rounder style speaker mic that fits nicely in
the palm of your hand. $18

MFJ 286 Speaker Microphone
This was used on a Kenwood TH-225 HT, but it also fits the
TH-21/31/41 series HTs, TH-205, TH-215, TH-415, as well as
others. It has a 3 conductor 3.5 mm plug and a 2 conductor
2.5 mm plug. It works fine. $12

MFJ-287 Speaker Microphone
Fits same HTs as the MFJ 286 above, but is a smaller more
compact speaker mic. It works fine, and looks close to new. $15

Accessories for Kenwood TH-205, TH-215, TH-225, TH-415,
and other HTs in this series:

MFJ 286 Speaker Microphone
This was used on a Kenwood TH-225 HT, but it also fits the
TH-21/31/41 series HTs, TH-205, TH-215, TH-415, as well as
others. It works fine. $12

MFJ-287 Speaker Microphone
Fits same HTs as the MFJ 286 above, but is a smaller more
compact speaker mic. It works fine, and looks close to new. $15

Kenwood Wrist Strap for TH-215, plus many other HTs. $4

Original Kenwood Rubber Duck antenna from TH-215. $10

Kenwood BC-2 Charger for PB-2 batteries. $12

BNC to PL-259 antenna adapter $5

Accessories for the Kenwood TH-21 / 31 / 41 series HTs:

Original Operating manual for TH-21 HT for 2 meters $8

Kenwood BH-3 belt clip and hardware for Kenwood TH-21/31/41 series HTs. $8

MFJ 286 Speaker Microphone
This was used on a Kenwood TH-225 HT, but it also fits the TH-21/31/41 series HTs, TH-205, TH-215, TH-415, as well as others. It has a 3 conductor 3.5 mm plug and a 2 conductor 2.5 mm plug. It works fine. $12

MFJ-287 Speaker Microphone
Fits same HTs as the MFJ 286 above, but is a smaller more compact speaker mic. It works fine, and looks close to new. $15

Kenwood W09-0315 charger
This charger is used to charge the larger PB-21 H batteries for the TH-21 series, and also on other Kenwood radios. It produces 10.5 V DC at 42 ma, with a standard 2.1 mm coaxial connector. $12

Kenwood Rubber duck antenna for the TH-21 HT
Shorter "Stubby Duck" from Kenwood. $20

Yaesu HT Accessory Items:

Speaker-mic for Yaesu (Vertex) VX-6 / VX-7 / VX-8
No number on this speaker-mic, but it has a 4 conductor 3.5 mm connector, with the threads, as used by the VX-6 / VX-7 / VX-8. Looks to be unused. $15

Yaesu E-DC-5 B Cigarette Lighter Cord
DC Cable with voltage regulation, filtering and cigarette lighter plug. For many Yaesu handheld radios including FT-530/415/50R/FT-60R, VX-5/VX6/VX-7/VX-8/VX-170, etc. These sell new for $27. Buy this one for only $18.

Yaesu NC-18 B Charger
Provides 14.5 V DC at 50 ma to charge many different HTs, including the Yaesu FT-411, FT-811, FT-911, FT-23, FT-209, FT-415, FT-410, FT-470, FT-727, FT-530, FT-703, and more. Small 2.5 mm male plug. $10

Belt Clip for Yaesu FT-207, with hardware. $8

Wrist Strap for Yaesu FT-209, and probably others $4

Icom BC-127 A, Battery Charger for Icom IC-Q7A
Dual Band HT:

This charger charges two AA NiCads (or NiMH) for the
IC-Q7 A Dual band HT, and Icom R-2 receiver, and probably
others.

This appears to be new, unused, still in its bag.
Icom lists them at $21. Buy this one for $12.

Icom BC-110 A, Wall Charger:

I am not sure of all the units that use this charger. I know
it is used by many of the aircraft HTs, and also to charge the
R-10, T2H, T7H, T70, T80AD, T90A, T91A, T92AD, W32A, and I am
sure others. Apparently it is also known as a BC-167 in
addition to BC-110 A. This is NOT one of the switching units,
so you will not have RFI from this one.

This one works fine and appears very close to new.

Icom charges almost $40 for this. Buy this one for $12.

Icom DC adapter, and battery packs:

Icom DC-25 DC Adapter
This is a pack that is used on the Icom µ2AT, Icom µ4AT, and
on other HTs that use the BP-20, BP-21, BP-22, BP-23 and BP-24
battery packs. It takes 13 V DC (such as from a cigarette
lighter), and converts it to the 9.4 V DC voltage needed for
the HT. It is used in place of a battery. This one works
fine and looks fine. $20

Icom BP-21
This battery pack is DEAD and sold for rebuilding, or
whatever. $8

Icom BP-22
This battery pack is DEAD and sold for rebuilding, or
whatever. $8

Santec HT Accessories:

Leather Case for Santec HT
This is a real Bianchi Leather case -- not a vinyl case.
It fits most of the Santec HTs, such as the HT-1200,
ST-142, ST-144, ST-440, etc. The real leather case
includes a built in belt clip, plus a removable leather
shoulder strap.
The case itself is in very nice shape. The leather
shoulder strap has not been used. $25

Santec ST-142/144 "Service Pack"
This is similar to a service manual, but Santec calls it a

service pack. It has schematics, circuit explanations, voltages, etc. $18

Antenna adapter to fit the BNC connector on the HT and provide an SO-239 connector that will permit a PL-259 to be attached. This adapter can be used on any HT with a BNC connector. $5

Accessories for the Azden PCS-300 HTs:

Azden SDX-316
This is the rounder style speaker mic that fits nicely in the palm of your hand. Has 3.5 mm and 2.5 mm plugs for Azden, Icom, some Yaesu, and others. It works great, and looks great also. $20

Battery charge adapter for Azden PCS-300 HT
This is an adapter that permits one to charge the battery of the Azden PCS-300, 2 meter HT, outside of the HT itself. Usually, one must have the battery inside the HT, but this lets you charge a second battery outside of the HT. The original charger is used. If you have a PCS-300 HT, you need this adapter.
It works fine, and looks like new. $3

Antenna adapter to fit the BNC connector on the HT and provide an SO-239 connector that will permit a PL-259 to be attached. This adapter can be used on any HT with a BNC connector. $5

HT Belt Clips and Wrist Straps:

Belt Clips:
All include the hardware with the belt clip and are $8 each.
Kenwood BH-3 for Kenwood TH-21 / 31 / 41 series HTs
Motorola
Yaesu FT-207

Wrist Straps for various HTs - $4 each
Kenwood TH-215 / 225 / 415, TR-2500, etc.
Kenwood TR-2400
Yaesu FT-209

SubAudible Tone (CTCSS or PL) Encoder:

This unit is designed to add subaudible tones (sometimes called PL tones or CTCSS) to a rig that does not have them internally. This is usually used on some of the older 2 meter FM or 440 MHz FM rigs produced before the tones were included in the rig.

This particular unit can be used on most any rig, although it came from an Icom IC-22 S, and I think was also used with an Icom IC-230. It has a 9 pin plug on it that looks like the base of a miniature 9 pin tube. This was the type of

socket used on these Icom rigs, but it could be changed.

This unit has a switch for 6 different tone on the front panel. Each of the tones are internally adjustable. It is presently set up for 71.9, 74.4, 94.8, 100, 123, and 179.9 Hz tones, although they could be changed. It is housed in a black box about 6.2 W, 2 H, X 4 inches deep.

This unit works fine. $35

Heath HM-2102 VHF Wattmeter:

Heath HM-2102 VHF wattmeter, covering 50 to 160 MHz. Similar to the HM-102, but for VHF frequencies, with 250 and 25 watt scales. It can also be used to check SWR, and has a remote sensor that can either be left inside the meter, or separated from the actual meter. SO-239 connectors in and out.

This particular meter works great. It looks really terrific -- very close to perfect, with no defects that I can find.

Paper work included for $50.

HF and VHF SWR Bridges:

Both of these cover from 3 to 150 MHz, covering HF, 6 meters, and 2 meters, so are ideal for the new rigs with 6 meters and 2 meters in them. SO-239 connectors.

Quement SWB-2
This unit features two separate meters -- one for reading forward power and another for reading SWR. This permits one to easily monitor both the power going out, and the SWR on the antenna at the same time.
It works fine and looks great. With paper work for $38.

Royce 2-100 Single Meter SWR Bridge / Field Strength Meter
This one works fine, and looks extremely nice. I do not see any scratches on it, but it does have a previous owners name on it. In its original box with original instructions. $30

Two meter mobile antennas:

Larsen LM-150, 2 meter antenna
Has 3 db gain on 2 meters.
This coil is still in its original box, & appears to never have been used. It even has its rubber washer with it. Coil only for $20.
Coil, with 4 foot used whip. $26

Larsen Q Quarter Wave Antenna
Fits a 5/16 inch stud, such as the Larsen LM mount,
and others. It can be cut for 2 meters, 220 MHz, or
450 MHz bands. $9

Trunk Lip Mount with 5/16 inch stud
Ideal for use with the "Q" or LM-150, or any other
antenna that requires a 5/16 inch stud. Coax is included
for $18.

Buy the LM-150 with 5/8 whip, the 1/4 wave whip, and the
mount for $50.

Larsen NLA-150, 2 meter antenna, for Larsen NLA mount
Has about 3 db gain on 2 meters.
Coil only, without whip (whip is hard to ship). $10
With four foot whip. $19

Larsen NLA-450 coil and "stacked" whip for 440 MHz
Fits the Larsen NLA mount, and has about 5 db gain on
the 70 cm band. Coil and stacked whip are included. $15

UHF (440 MHz) Mobile Antennas:

Larsen NLA-450 coil and "stacked" whip for 440 MHz
Fits the Larsen NLA mount, and has about 5 db gain on
the 70 cm band. Stacked whip is included. $12

Avanti "On Glass" antenna for 440 MHz:
This antenna was made by Avanti to mount on a windshield,
or other glass. It does not require a ground plane, as
it is a 1/2 wave antenna, rated to have 3 db gain. It is
ideal for places where a ground plane is not available,
such as a boat or motor home, in addition to cars. A
special tuning box is included to match to your particular
situation.
Avanti Antenna for 440 MHz
Still in its original tube, unopened. $33

Mobile Antenna Mounts:

Large, heavy duty magnetic mount
This large mag mount will take any antenna with a standard
3/8 inch 24 thread connector. It is very heavy duty, about
5 inches in diameter, with a long coax for $25.

Trunk Lip Mount with 5/16 inch stud
Ideal for use with the "Q" or LM-150, or any other
antenna that requires a 5/16 inch stud. Coax is included.
Very nice for $18.

Rubber Duck antennas for your HT:
All are for 2 meters, are in good condition,
and are $10 each, unless stated otherwise.

BNC - Standard length, about 7 inches long
BNC - Original from Kenwood TH-215, about 5 inches long
BNC - Stubby about 4.5 inches long

5/16 inch threaded, as used by Motorola and others
Stubby - 4 inches long

Type F connector - 6.5 inches long

PL-259 connector - 6.5 inches long
HyGain 275, still in original packaging

PL-259 connector - Stubby - 4.6 inches long
Centurion, still in original package

Special for Kenwood TH-21 HT threaded connector
Stubby, about 4.5 inches long - $20

BNC Stubby for 440 MHz, 3 inches long

I also have many other accessories available such as many different types of microphones, HTs, VHF and UHF rigs, HF and VHF/UHF antennas, etc.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

This is a new, never installed, Kenpro Ham Radio Antenna Rotator, Model KR-400RC.
Picked up from the widow of a ham in Utah who was killed on the highway while assisting a motorist.
I never did get it installed either. A used one like this one just sold on ebay for $220.
I can throw in some rotator control cable also.

6630. For Sale: Rohn HDBX 40' tower, Spaulding X64BO base, CDE Rotor

Yahoo group: ham4sale (2007 — 2015)
Date: 2011-09-15 01:08:52 UTC
From: The Observer
Topic: 6630 Message: 6630

For Sale or trade, Rohn HDBX 40' Tower, Spaulding X64BO screw base, CDE Rotor & Control.

I have a 40' Rohn HDBX tower (sections 8/base, 7, 6, 5, 4) that evidently started as a 64' but it was already down to 40' when I got
it. The tower is down, disassembled, and needs painting but is in good shape otherwise. This also includes the Schedule 80 steel mast, bearings, and mounting plates. There is also a rotor mount in the bottom section (section 8).

The Spaulding X64BO screw base is complete and in good shape but would have to be removed. The base is held in place by 3 screw anchors and I have the wrench to remove them. I have the documentation for the base and can scan and send along if desired.

I would like to sell the tower and base as a set and am asking $200 for both.

The CDE Rotor is in good shape but hasn't been used in about 20 years. I also have a spare position rheostat for the rotor.

I'm asking $100 for for the rotor and control head.

Please contact me via email (WoodcarvingGypsy at comcast dot net) or Callbook address and we can discuss particulars on shipping, transport, etc. I would discuss trade for other ham related items if that works better.

Thanks

Al
WD9AGT

6631. Harris RF-103 Amplifier for sale

Yahoo group: ham4sale (2007 — 2015)
Date: 2011-09-15 01:17:03 UTC
From: lfc1960
Topic: 6631 Message: 6631

Hello,

These amps are designed to operate from 2.0 to 30MHz continuously, at an RF power output level of 1Kw, in any mode, no time limit. It weighs a gut-busting 246 Lbs. It stands 30" tall, 20.6" wide, 21" deep. It uses a single 3-1000Z tube in grounded-grid, cathode driven configuration. About 65 watts of drive will yield 1Kw output. It is tuned manually and functional I have a brand new spare 3-1000z tube. If interested drop me a line.

Thanks
ka4ffp

6651. IC706MKII vs MKIIG

Yahoo group: ham4sale (2007 — 2015)
Date: 2011-09-18 09:39:40 UTC
From: Chris Boone
Topic: 6651 Message: 6651

Anyone know the difference between the 706MKII and the MKIIG???? I have a friend who is going into assisted living...and he wants to sell all his gear...some of it includes a Ten Tec Omni VI Plus and a Ten Tec linear amp for HF. I am getting some pricing together and will start taking bids on the gear shortly..BUT I am interested in the 706 if it will do what I want...I cannot recall what the differences are between the MkII and MkIIG...

Would appreciate some help.

Also if you would like to help in pricing this gear, get with me off line..I want people who are UNBIASED and NOT planning to buy at a lowball price...a legit fair market price is what I want to get for him. If you are wishing to HELP (not BUY) please get with me off list.

Thanks
Chris

6652. AR-77E receiver FS

Yahoo group: ham4sale (2007 — 2015)
Date: 2011-09-18 15:18:49 UTC
From: BenG4BXD
Topic: 6652 Message: 6652

The AR-77 was a communications and general purpose receiver for the consumer and amateur radio market.
It had 10 tubes. The AR-77E was the "export" model and could be operated over a supply voltage range of 105 to 250 VAC.
Valves / Tubes 9: 6SK7 6K8 6SK7 6SK7 6H6 6SQ7 6F6 6SJ7 5Z4 VR150
Frequency coverage: 540 to 31,000 kc in 6 bands.
circuit: http://www.nostalgiaair.org/PagesByModel/414/M0015414.pdf

picture: www.qsl.net/g4bxd/ar77a.jpg

In fair condition, the dial tuning is ok, the band change needs re-stringing, the easier one to replace than the dial. S Meter missing.
Untested.
£50

cheers, Ben,

Topic: 764 Message: 6656

Selling for a friend of mine:

Kenwood TR-7950 with mic and mobile mount bracket (quick release)
Astron PS20 PS
TenTec Omni VI PLUS HF transceiver
Ten Tec Centurion (I THINK that's the right spelling) HF linear amp
Ten Tec Desk mic and speaker/PS for the Omni
Ten Tec keyer with built in paddles (model 670 IIRC)
Alpha Delta 4 band dipole (80-40-20-10) and some LMR 400 connecting it to the OMNI (the OMNI MAY have a built in tuner..there is no external tuner)

(his ICOM 706MKII has already been spoken for and that's off the for sale list)

ALL in excellent to MINT condition. ALL gear will be checked and CERTIFIED with printout by me (using my IFR 1500 service monitor w/spectrum analyzer; NIST calibrated/certified recently by the Kurt, the IFR Doctor himself at www.kgelectronics.com).

Please reply to me direct..prices are still being determined but WILL be fair market value but WILL consider offers of decent value only.

From: Chris Boone
Topic: 764 Message: 6658

Correction on the HF antenna:

It is a Alpha Delta DX Ultra....Universal Radio says its recommended for RX ONLY!!!! but the wire and coils should be able to handle 100-500w ok (I hope he didn't fire the linear into it though there are NO caps to blow..only the loading coils..which are NOT traps as he was led to believe by whoever put it up for him)..I will put a MFJ analyzer on it and see what the resonant freqs are:

Details of the antenna can be found at :

http://www.universal-radio.com/catalog/sw_ant/3377.html

It has been confirmed the OMNI DOES NOT have a tuner (but with this antenna probably you would need one)

6659. RE: [HoustonHam] For Sale

Date: 2011-09-18 18:35:36 UTC
From: Chris Boone
Topic: 764 Message: 6659

On the 7950, I DON'T think it includes the tone encoder board (IT MAY and if so, it included for free.) HOWEVER, PIEXX.com makes an aftermarket model for direct replacement..only problem is you only have 3 tones to choose from...for local decode that's fine..want to travel and be sure you can access ANY rptr? Add the CommSpec TE64 which covers ALL CTCSS tones (I can do that for an extra amount and have it ready for you)..turn OFF the internal tone card, turn ON the external and you're good to go!!!

The PIEXX model is encode/decode I think...$59...the radio asking price is $75....the TE64 runs about $50 or so......with the three, you are ready on the road with 50w of FM, a BIG readout and all PL tones and touchtone from the keypad..

For those going to Belton, I CAN and WILL deliver including to Houston or at Belton....

Chris

6660. RE: [HoustonHam] For Sale

Yahoo group: ham4sale (2007 — 2015)
Date: 2011-09-18 18:38:29 UTC
From: Chris Boone
Topic: 764 Message: 6660

Again, correction...the PIEXX board is encode only...like the OEM that came with the 79xx series...BUT I can retrofit a TS32inside for encode AND decode on 3 tone memories..and then still have the TE64 or a TE32 (which is all you really need...the 64 covers newer commercially used PL tones not normally found on the ham gear)

6662. Final listing w/prices

Yahoo group: ham4sale (2007 — 2015)
Date: 2011-09-18 19:52:10 UTC
From: Chris Boone
Topic: 764 Message: 6662

Kenwood TR-7950 with mic and mobile mount bracket (quick release) No tone board but one can be installed/retrofitted AND for all tones, not just 3 AND will do DECODE as well as encode!! $75 obo...

will retrofit the TS64 Comspec to it with external rotary switch for ALL PL tones, encode AND decode (the original did only 3 ENCODE only) for cost of the TS64 and $20 labor. May take a week or more to get to it...WAY behind in projects!

Astron PS20 PS (will load test to 20A) $50 obo

TenTec Omni VI PLUS HF transceiver MINT (Ten Tec currently sells this for $1250) NO tuner.....
Ten Tec Goose neck Desk mic and speaker/PS for the Omni (ncluded with the OMNI)

Ten Tec 422 Centurion HF linear amp (TenTec sells this used demo for $2875!!) MINT shape with pair of 3-500Zs....YOU do the math on this one; have to load test this at shop or at friends house...IFR can only take 150w MAX but can look at spectrum output with NO problem

****Ten Tec keyer with built in paddles (model 607 IIRC)****
SOLD!!!!!!!!!!!!!!!

Alpha Delta DX Ultra (all band RECEIVE dipole..someone recommended this to Jack and AD does NOT sell it as a transmit antenna...but with a tuner it should work ok 160-10 with 200w PEP or so...MAY handle 1KW but I AM NOT guaranteeing that; will check resonant spots using MFJ analyzer today) and some LMR 400 connecting it to the OMNI---$120 obo

SMALL antenna tuner (150w max??) Jack just pulled it out today and I will look it over later...and then post it

PICs becoming available TODAY

ALSO CAN deliver to Beaumont-Port Arthur, Houston OR Belton TX hamfest Sept 30 or October 1st!!! OR even Lake Charles, LA if you are to the east...So if you are in Texas and close to Houston or the route to Belton from Houston (usually 290 to 6 and then north to Belton!), let me know...free delivery...but will require CASH for that unless PayPal or check clears before hand.

ALL others, prices DO NOT include shipping and handling.

Topic: 6667 Message: 6667

I have a rare BIRD TS-118A/AP Military Spec. RF Watt Meter dated 1956! It's in incredible condition for it's age and the fact that it was Army issued! It is in the original metal case & even has original Army operators manual! I don't have any pics yet but a copy of the Army manual showing pics & all the details of the meter can be seen here:
http://www.bird-technologies.com/resources/discontinued/bec_manuals/693.pdf
Other than a few scuffs & scratches & stains on the case, it is in great shape. Asking $400.00 or best offer. I would prefer local pick up because it is HEAVY but will work out shipping if necessary.

more
* Power supply 9-15V DC, 500 mA
* Frequency Range RF LOW:0.4-50MHz RF HIGH: 50-1000MHz
* Max Input 150 watts

Bird 82A TERMALINE Coaxial Load Resistor $175. plus shipping.

Specifications

500W *Continuous*
600W (for 5 minutes)
(Additional power for brief periods and/or with a fan.)
VSWR: DC to 2.5 GHz
Impedance: 50 Ω Nominal

(Recent online prices used are 219.00 and 345.00)

The Bird TERMALINE 82A is a general purpose coaxial load resistor to be
used in conjunction with transmitters which have an RF output up to 500
Watts, over an extended frequency range of dc to 2.5 GHz. This coaxial

load resistor is designed to match commonly used 50Ω coaxial transmission lines. The impedance is quite independent of frequency, and is almost a pure resistence. On the production units, the voltage standing wave ratio (VSWR) values are maintained below 1.1 to 1.0 up to 1000 MHz. VSWR determinations for the particular resistor are tabulated on an individual test tag attached to each unit. Calibration is not normally performed for frequencies from 1000 to 3500 MHz, but experience shows that units checking good will be within specification in the upper range.

Below 50 MHz, the input impedance of the TERMILINE is very nearly a pure resistance value. The production tolerance on the dc resistance is ±3% from the nominal 50Ω, and measured exact values for this particular resistance are also given on the test tag.

Any Series 82 load resistor may be made to operate as a termination type wattmeter with the insertion of a Bird Model 43 THRULINE Wattmeter in series with the load. This will permit measurement of forward power within the usual capabilities of the TERMALINE and the THRULINE Wattmeter.

From: Ken Simpson, W8EK
Topic: 6679 Message: 6679

Alinco dual bander and 2 meter FM transceivers and
dual band HT, plus other Alinco items For Sale:

Alinco DR-605 T Dual Band Mobile Transceiver

The Alinco DR-605 T is a dual band FM transceiver covering
both the 2 meter and 440 MHz ham bands, plus extended
receive outside of the ham bands for weather, police, fire,
etc. It will cross band repeat, receive both 2 m and 440 at
the same time, and many other neat things. Subaudible (PL)
tones are built in. A DTMF microphone with up/down switches
is included.

You can find details at
http://www.alinco.com/Archives/Mobile/dr-605t.shtml

This one works 100% as best I can tell. Cosmetically, one
of the lights behind the display is burned out, but the
others work, so there is plenty of light to read the
display. It looks great.

Paper work is included for $170.

Alinco DR-110 T, 2 meter FM Transceiver

The Alinco DR-110T is a full-featured 2 Meter FM mobile
transceiver with 14 memory channels. Power output is
selectable at 45 or 5 watts. Subaudible tone encoder
and decoder is included. Tuning steps may be selected
at 5, 10, 12.5, 15, 20 or 25 kHz. It is 5.5 x 2 x 6.75
inches. With hand mic.

Features:
* 14 Memories
* VFO Scaning
* Memory Scanning
* Odd Offsets
* CTCSS Encode/Decode
* Large LCD
* Function Lock
* Reverse Key

This unit works fine, and looks extremely nice. It
includes a mic, power cord, internal tone unit, and
paper work for $90.

Alinco DJ-580 dual band (2m and 440 MHz) HT:

This HT receives from 110 to 174 MHz in the VHF position,
which includes the AM Aircraft band. 440 to over 480
MHz in the UHF position. Of course it transmits in the
2 meter and 440 MHz ham bands. It is my understanding
that it can also be modified to receive into the 800
and 900 MHz region. It will also cross band repeat,
and is an extremely rugged radio.

Power output has 3 different levels. With the
7.2 V battery packs, it has 0.25 W / 1 W / 2.5 W.
If used with the larger 12 V batteries, it will
produce 0.25 W / 1.2 W / 5 W.

This particular unit is in very good shape, both
electrically and cosmetically. The keyboard has very
crisp and clear lettering. It includes the empty
6 cell battery pack that takes six AA cells, rubber
duck antenna, belt clip, wrist strap, and paper work.
$140

Alinco EDC-43, DC cord / cigarette lighter plug:

This DC cord is used with the Alinco DJ-G7T, DJ-F1T, DJ-160,
DJ-180, DJ-196, DJ-580, and other Alinco HTs. In fact
it appears that it works with most Alinco HTs, except the
"credit card" size HTs. It plugs into a cigarette lighter,
and has a small coaxial power connector on the other end.

This one works 100% and looks like new. $12

Hand Microphone that can be used with Alinco rigs:

Hand Microphone with round 8 pin plug:

This hand mic works great on most Kenwood rigs with the
round 8 pin connector, such as the TS-430, TS-440, TS-570,
TM-241, TM-2530, TW-4000, and others, and also on most
Alinco rigs with the round 8 pin plug..
It only says "Electret Condenser Mic" on it, with no
model number.

Basically, this mic is like an MC-43, only with a couple
more features. Of course it has the mic and PTT switch;
it also has up/down switches on the top. There are four
"extra" buttons labeled Call, VFO, MR, and PF. What these
four buttons do depends on the rig that it is attached to.
They will function on some rigs, and are completely useless
on others. There is also a "Lock" switch on the back.

Regardless if you use the four extra buttons or not, you
still have a mic that works like an MC-43.

This mic works fine, and looks like new. I am guessing it
came with a rig, and was immediately put in the drawer. $30

DTMF Touch Tone Microphones:

CES 610 L DTMF Touch Tone Mic
Can manually dial a number, or automatically store it in the mic, and "speed dial". 12 digit touch tone pad on the front. 8 pin modular plug (like computer LAN).
Looks to be new. $38

KDK DM TT-1 DTMF Touch Tone Mic
This mic has a 12 digit touch tone pad on it, with a switch to turn the pad on and off. With 4 pin plug.
It works fine, and looks great. $35

KDK Model TM-2 DTMF Mic
With touch tone pad and up-down switches. It presently has a round 8 pin connector wired for Kenwood/Alinco.
Nice condition. $40

Johnson 250-0761-010 / CES 655 L DTMF Mic
It has a 12 digit pad on the front, and is a rugged mic.
Presently with 4 pin plug. Looks to be unused. $38

I also have many other accessories available such as many different types of microphones, HTs, VHF and UHF rigs, HF and VHF/UHF antennas, etc.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

6681. In need of an Antenna Tuner with twin meters for SWR and Power

Yahoo group: ham4sale (2007 — 2015)
Date: 2011-09-30 01:18:34 UTC
From: Walt Wilson
Topic: 6681 Message: 6681

Looking for a good used Tuner with two meters built in that is not too small to see. Would like to have at least 300+ watts rating for the tuner. Contact: wwilson at triad.rr.com with offers

6682. MFJ Items FS

Yahoo group: ham4sale (2007 — 2015)
Date: 2011-09-30 13:50:59 UTC
From: Ken Simpson, W8EK
Topic: 6682 Message: 6682

MFJ Items For Sale -- "Amplifier Saver", HF Antenna Tuner,
Coax Switches, CW Keyers, Wall Wart, HT Speaker Microphones

MFJ 216 Deluxe "Amplifier Saver":

Amplifier Saver lets you safely tune up your linear amplifier
for full power output and best linearity. It protects your
expensive amplifier during tune-ups from over-heating, tube
damage, power supply stress and arc-over. MFJs innovative
pulse tuning technology lets you tune your amplifier at full
peak output power. It can also be used to evaluate wattmeters
and QSK systems.

It plugs into your rigs CW key jack. Simply press Pulse Tune
button and tune your amplifier normally for maximum power
output. It has Duty Cycle and Pulse Rate controls on front
panel, and is in a fully shielded all metal case. Uses 9 V
battery and measures a compact 3 1/4 x 1 1/4 x 4 inches.

This unit works fine and looks very close to new. MFJ sells
these for $80. But this one for $60.

MFJ 941 E HF Antenna Tuner

MFJ 941 E antenna tuner for 160 thru 10 meters
This tuner has a "cross needle" SWR bridge built into
it, so one can read both forward power, reflected power,
and SWR at the same time. The meter has a switched back
light, assuming 12 Volts is applied to the tuner. The
wattmeter portion will read either 30 W or 300 W full
scale, either peak or average power.

An antenna switch will switch between either balanced
line, two coax antennas, or an external dummy load.
Antennas can be operated thru the tuner, or the tuner
can be bypassed. This tuner will operate on 160 thru
10 meters, including the WARC bands.

This particular unit works 100%. It looks extremely nice.
I can not find a scratch on it.
Paper work is included for $110.

MFJ "Strip Line" Coaxial antenna switches:

Both of these antenna switches are in a heavy diecast housing
that utilizes "stripline" construction to keep the impedance
very close to 50 ohms. It also permits good operation at

higher frequencies up to 500 MHz, and gives over 50 db isolation. Unused antenna are grounded, with an additional position to ground all antennas. SO-239 connectors.

MFJ 1704 Coax Switch
Will switch up to 4 antennas. It works fine and looks close to new. $55

MFJ 1702 B Coax Switch
Switches 2 antennas. This one works 100% and looks great also. $24

MFJ 8043 Electronic Keyer:

This is an electronic keyer that uses the Curtis 8043 Keyer IC. It has speed, weight, tone, and volume adjustments.
It is capable of fully automatic or semiautomatic (like a bug) operation. Also, it can emit a solid "key down" for tuning up. It works with tube or solid state transceivers. It has sidetone with a front panel volume and tone control. Weighting is adjustable from the front panel. It can be powered via four internal C cells or an external 6 to 9 volt DC power supply.

The styling of this unit is the wood grain and eggshell color that TenTec used with their early equipment. TenTec made the enclosure for MFJ, so it is an exact match.

This particular unit looks really great, and of course it works. Paper work is included for $35.

MFJ 407 B Electronic Keyer:

This is an electronic keyer that uses the Curtis 8044 ABM Keyer IC. It has TONE, VOL, WEIGHT and SPEED adjustments. It is capable of fully automatic or semiautomatic (like a bug) operation. Also, it can emit a solid "key down" for tuning up. It works with tube or solid state transceivers. It has sidetone with a front panel volume and tone control. Weighting is adjustable from the front panel. Iambic switch on the back selects Iambic keyer mode. It can be powered via an internal 9 v battery or an external power supply.

This particular unit looks really great, and of course it works. Paper work is included for $40.

MFJ 1312 Wall Wart power supply
This unit provides 12 V DC at 500 ma. It has a small 2.5 mm male plug, and is often used for keyers, lighting tuner lights, and other small misc jobs where 12 V DC at low current is needed. $10

Cables for CW keys and keyers:

Cable for paddles
About 3 feet long, and with a 1/8 inch (3.5 mm) stereo
connector on the end, like used by most rigs. $8
As above, but 1/4 inch plug. $8
As above, with 1/4 inch GOLD plated plug. $15

Cable for straight key
About 3 feet long, with a mono 1/8 inch (3.5 mm) phone
plug on it, as used with a straight key. $5
As above, but 1/4 inch plug. $5

Several HT Speaker Microphones:

MFJ 286 Speaker Microphone
This was used on a Kenwood TH-225 HT, but it also fits the
TH-21/31/41 series HTs, TH-205, TH-215, TH-415, as well as
others. It has a 3 conductor 3.5 mm plug and a 2 conductor
2.5 mm plug. It works fine. $12

MFJ-287 Speaker Microphone
Fits same HTs as the MFJ 286 above, but is a smaller more
compact speaker mic. It works fine, and looks close to new. $15

Azden SDX-316 Speaker Microphone
Although it has an Azden name plate, it will also work
with Icom, some Yaesu, and Alinco that need 3.5 mm and
2.5 mm plugs.
This is the rounder style speaker mic that fits nicely in
the palm of your hand. $18

I also have many other accessories available such as many
different types of microphones, HTs, VHF and UHF rigs, HF
and VHF/UHF antennas, etc.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

6683. Vanco SWR Meter for sale

Yahoo group: ham4sale (2007 — 2015)
Date: 2011-10-01 13:00:38 UTC
From: Robert
Topic: 6683 Message: 6683

I have a new Vanco SWR Meter in the box.
Never used. This is a single meter unit.
50 ohms, RF Power 0 - 10 Watts and 0 -100 Watts
Freq Range is 1.7 - 150 MHZ so it will also work for 2 meters.
New cost is $40 to $50.
I will sell this one for $25 plus shipping.
Pics, specs and instructions available via email.
Robert

Yaesu Items For Sale -- Filtered speaker, microphones,
cables, HT accessories, and more

Yaesu SP-6 Speaker with phone patch and Filters:

This Yaesu SP-6 speaker has the phone patch and filters in it.
It is the matching speaker for the Yaesu FT-990 and many others.
It permits one to switch between two different rigs, and has
adjustable filters on both the high and low end to permit one
to get rid of QRM, and have a great sound.

This one is in extremely nice condition and works 100%. Not
a single scratch or mark on it. You will not find a nicer one
unless it just came out of the box.

With paper work for $150.

Yaesu MH-1 Hand Microphone:

The Yaesu MH-1 b8 is the hand mic that is used on most of
the Yaesu HF and some of the Yaesu VHF rigs. It is a hand
mic that has a switch on the back with two audio frequency
responses -- one for rag chewing, and one for more punch
for DX. It has up and down switches, in addition to a
"fast" switch. Of course it also has the normal PTT
switch. It has a round 8 pin mic connector, wired for
Yaesu.

This particular microphone looks like it might not have
ever been used. I think it was probably put in a drawer
when new, and left there. Of course it works fine. $38

Heil HM-10 Deluxe Microphone:

The Heil HM-10-5 is a beautiful microphone resembling the
"gold line series". It has the HM-5 wide element for good
frequency response, and good articulation.
This particular microphone looks very close to new.
It includes paper work in its original fancy Heil box. $75

Cables for Heil (and other) Microphones:

Heil CC-1 Y cable for Yaesu (yellow)
Connects to Heil mics with the 4 pin XLR connector (most
Heil mics), and has a round 8 pin connector wired for Yaesu,
plus a jack for PTT. $25

Hand held PTT switch
The Heil Microphones require a separate PTT switch -- either a hand switch or a foot switch. This is a home made hand switch. It is similar to the Heil, except it is in a 1 x 1 x 2 inch minibox, with about a 3 foot cord. It works and looks fine. $12

Heil CC-1 XLR 4
4 pin XLR Female to 3 pin XLR Male $25

3 pin XLR to stripped ends
About 10 feet of quality rubber covered mic cable with a 3 pin XLR connector on one end. Ideal to add your own connector. Can be used with the CC-1 XLR-4 above. $20

Heil Wind Screen
This windscreen can be used with a variety of microphones, including the HM-10 and others. Like new condition. $8

Yaesu CT-20 Adapter Cable:

The CT-20 adapter cable is made to be used with the Yaesu MD-1 desk microphone. As the MD-1 c 8 comes from Yaesu, it has a round 8 pin connector on it to plug into the rig. The CT-20 cable is used in place of the regular cable, to adapt to one of the Yaesu rigs that takes the newer 8 pin modular (like a computer LAN) connector. The CT-20 has a round 8 pin connector on one end that goes into the desk mic, and a modular connector on the other end for the rig.

This particular cable is still sealed in its original package, unused, unopened. $20

Yaesu HT Accessory Items:

Yaesu E-DC-5 B Cigarette Lighter Cord
DC Cable with voltage regulation, filtering and cigarette lighter plug. For many Yaesu handheld radios including FT-530/415/50R/FT-60R, VX-5/VX6/VX-7/VX-8/VX-170, etc. These sell new for $27. Buy this one for only $18.

Battery pack for Yaesu VX-2 or VX-3 HT
Lithium Ion Battery Pack fits both the VX-2 and the VX-3. 3.7 volts, 1200 mahr, works great, and holds a charge like new. $15

Yaesu NC-18 B Charger
Provides 14.5 V DC at 50 ma to charge many different HTs, including the Yaesu FT-411, FT-811, FT-911, FT-23, FT-209, FT-415, FT-410, FT-470, FT-727, FT-530, FT-703, and more. Small 2.5 mm male plug. $10

Belt Clip for Yaesu FT-207, with hardware. $8

Wrist Strap for Yaesu FT-209, and probably others $4

Prices do not include shipping from Florida.

I also have many other accessories available such as many
different types of HTs, VHF and UHF rigs, HF and VHF/UHF
antennas, etc.
Just too many to list here. Please e-mail your requests.

Thanks.

From: John Miller
Topic: 6693 Message: 6693

These are must sell items, recent layoff we're in trouble.
vertex ftl-1011 mobile, covers the low VHF bands can go to 10 meters and probably 6 meters, asking $65 OBO
Motorola MT1000 UHF hand helds, some with batteries, some without, one charger, make offer for some or all.
Kenwood TK-880 UHF mobile, has scratches but works fine, comes with mic and mobile bracket asking $175 again all prices are negotiable.
Motorola MTS2000 hand helds for 900 MHz, all work fine, batteries are questionable but seem to work, asking $175 with battery, 150 without all programmed for New England frequencies. These are version 3 radios with full keypads nothing better for the band. I have one that wont' do talk around but works fine other wise,make an offer.
Motorola MCS2000 30 watt mobile, this is a version 1 works fine, the brand new ones I'll let go for $200 each, again programmed for New England 900 MHz, I have one slightly used but works fine, all have mics and power cords maybe mobile brackets if I can find them, the used one I'll let fgo for $165.
all prices do not include shipping, I take paypal, if I can just sell one for close to asking price I'll be alright but I need to sell something fast.

6696. Several Wattmeters and SAR Bridges FS

Yahoo group: ham4sale (2007 — 2015)
Date: 2011-10-11 15:25:10 UTC
From: Ken Simpson, W8EK
Topic: 6696 Message: 6696

Several Wattmeters and SWR Bridges For Sale:

Swan WM-2000 Wattmeter / SWR Bridge:

The Swan WM-2000 power meter and SWR bridge covers 3.5 to 30 MHz. Power scales are 200, 1000, 2000 watts. It has a very large (over 5 inch) meter, for easy visibility. The rear panel has SO-239 input and output connectors.

This is an extremely nice meter, primarily due to its large physical meter, making it easy to read.

This one is in extremely good condition. It works 100% and looks very close to new.

With paper work for $80.

Autek WM-1 Computing HF Wattmeter:

The WM-1 Meter doesn't make you stare at crossed needles or make adjustments or do any calculations to read SWR. Instead, like magic, it shows SWR instantly and continuously. So it's a snap to do SWR plots, adjust antenna tuners, or just glance at the SWR occasionally to see that it's still low.

This meter has scales of 20, 200, and 2000 watts. It will measure either peak or average power. And peak is true peak, with a slowly decaying display that can really can be read. It also has a separate sensor that can be separated from the actual meter. It covers from 1.5 to 30 MHz, and will cover to 54 MHz at reduced power, so it will cover all of the HF bands, plus 6 meters.

This particular meter works 100% and looks fine. Paper work is included for $100.

Heath HM-2140 A, dual meter Wattmeter / SWR Bridge:

The HM-2140 A uses two separate meters to measure power and SWR (forward and reflected power). It will measure either average power, or peak power (PEP) with a 9 volt battery. Power ranges are 200 and 2000 watts. Frequency range is from 160 thru 10 meters. It has a remote sensor, which permits the meter to be separated from the coax connection by up to 3 feet. This is the "A" model of this meter, which is the Heath Brown color (not the green), and has more features.

More details can be found at
http://www.radiomuseum.org/r/heath_wattmeter_hm_2140a_hm2140.html

This particular unit works fine, and looks very close to new.
With paper work for $100.

Heath SB-634 Station Console, with Wattmeter and more:

The Heathkit SB-634 station console is a multifunction unit.
It contains a 24 hour digital clock (6 large digits, including
seconds), 10 minute interval timer (3 digits -- minutes and
seconds), phone patch and an SWR/Power meter. The large
wattmeter reads either 200 watts or 2000 watts full scale,
in addition to SWR. It matches the Heath SB series of equipment
(Heath green), and is powered by 115 V AC.

This unit works on all of its functions. It looks extremely
nice. I can not find a scratch on it, but there is very slight
(and I emphasize very slight) wear on the 2000 watt push button.

With paper work for $150.

HF and VHF Standing Wave Ratio Bridges:

All of these cover from 3 to 150 MHz, covering HF, 6 meters,
and 2 meters, so are ideal for the new rigs with 6 meters and
2 meters in them. SO-239 connectors.

Carter Craft 90-300 HF SWR Bridge:
The Carter Craft 90-300 is a single Meter SWR Bridge /
Field Strength Meter. It covers from 3 to 150 MHz,
covering HF, 6 meters, and 2 meters, so is ideal for
the new rigs with 6 meters and 2 meters in them.
SO-239 connectors.
Although this has a Carter Craft name on it, it is the
same meter that was sold years ago under a couple dozen
different names, including Vanco, Midland, Quements,
Olson, and many others.
This one works fine, and looks extremely nice. I do not
see any scratches on it, and I am 99% certain it has not
been used, except for my testing of it.
In its original box with original instructions and little
field strength antenna. $30

Quement SWB-2
This unit features two separate meters -- one for reading
forward power and another for reading SWR. This permits one
to easily monitor both the power going out, and the SWR on
the antenna at the same time.
It works fine and looks great. With paper work for $37.

Royce 2-100 Single Meter SWR Bridge / Field Strength Meter
This one works fine, and looks extremely nice. I do not see
any scratches on it, but it does have a previous owners name

on it. In its original box with original instructions. $28

I also have many other accessories available such as many
different types of microphones, HTs, VHF and UHF rigs, HF
and VHF/UHF antennas, etc.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

73,

Ken, W8EK

6697. RF Amp 2 Meters - 140 Watts - for sale

Yahoo group: ham4sale (2007 — 2015)
Date: 2011-10-12 10:20:20 UTC
From: Robert
Topic: 6697 Message: 6697

I have a very nice Trilectric RF Amplifier for sale.
It is Model # A40140H which translates to 40 Watts in
and 140 Watts out.
I have not used this one but loaned it to a friend who
lived about 20 miles away and we could never hear him very
well on our 2M net (simplex) as there is a hill between us and him. After he started using this amp it made
a world of difference! Solid QSO so I know it works.

Look here to see a picture:
https://www.dropbox.com/gallery/42378863/1/Trilectric%20Amp?h=4c498c

Asking $250 or best offer.
Robert k7res

6698. Plastic Pull Knobs for Yaesu 301D

Yahoo group: ham4sale (2007 — 2015)
Date: 2011-10-12 19:54:49 UTC
From: Walt Wilson
Topic: 6698 Message: 6698

I am finding out fast that these knobs are mostly gone on most 301 units. So far I have not found a replacement online, now asking if anyone has a source for these.

6699. MT1000 Volume -- On/Off knob

Yahoo group: ham4sale (2007 — 2015)
Date: 2011-10-12 21:12:13 UTC
From: kb6uda
Topic: 6699 Message: 6699

Hi,

My MT1000 fell on the floor and the plastic knob to charnge the volume and turn it off and on broke off.

Does someone have this knob for sale?

Thanks

Topic: 6701 Message: 6701

Heath Items For Sale - HF transceiver, Station Console,
Wattmeters, Misc Parts, and Original Manuals:

Heath SB-1400 HF Transceiver:

This is a 100 watt multimode HF transceiver covering 160 to
10 meters (including WARC bands). It operates on SSB, CW,and
AM. The receiver is very sensitive. This rig has noise blanker,
squelch, adjustable AGC and attenuator, as well as memories
and two VFOs. A narrow CW filter is included. It even has a
computer interface and is very similar to the Yaesu FT-747.

This one works 100% and looks very, very nice.
It includes power cord and paper work for $300.

Heath SB-1400-2 hand microphone:
This hand mic is basically the same as a Yaesu MH-1, but with a
Heath label. Use it with the SB-1400 above, or with Yeasu rigs
with the round 8 pin connector. Like new for $40.

Heath SB-634 Station Console:

The Heathkit SB-634 station console is a multifunction unit.
It contains a 24 hour digital clock (6 large digits, including
seconds), 10 minute interval timer (3 digits -- minutes and
seconds), phone patch and an SWR/Power meter. The large
wattmeter reads either 200 watts or 2000 watts full scale,
in addition to SWR. It matches the Heath SB series of equipment
(Heath green), and is powered by 115 V AC.

This unit works on all of its functions. It looks extremely
nice. I can not find a scratch on it, but there is very slight
(and I emphasize very slight) wear on the 2000 watt push button.

With paper work for $150.

Heath HM-2140 A, dual meter Wattmeter / SWR Bridge:

The HM-2140 A uses two separate meters to measure power and
SWR (forward and reflected power). It will measure either
average power, or peak power (PEP) with a 9 volt battery.
Power ranges are 200 and 2000 watts. Frequency range is
from 160 thru 10 meters. It has a remote sensor, which
permits the meter to be separated from the coax connection
by up to 3 feet. This is the "A" model of this meter, which
is the Heath Brown color (not the green), and has more features.

More details can be found at
http://www.radiomuseum.org/r/heath_wattmeter_hm_2140a_hm2140.html

This particular unit works fine, and looks very close to new.
With paper work for $100.

Heath HD-15 phone patch / digital interface:

This unit can be used to interface a sound card in a
PC to your transceiver. It was originally designed to
be used as a phone patch, but many have converted them
to a digital interface.

This is the unit with the VU meter on the left and 3 knobs
that match the SB series to the middle and right. Low or
high Z output to the transmitter. The meter makes it great
for setting levels.

This one is all original. It is in great condition.
Paper work included for $22.

I also have parts from a Heath HD-15 phone patch available.
This includes an audio transformer used for digital
interfacing, VU meter, and other parts. Outer cover and
knobs are gone. What do you need?

Miscellaneous Heath Parts:

I have many Heath SB-630 Station Console parts available.
Most of the internal parts are available, but no clock.
Front panel and outer case are gone, but reflectometer
assembly, switches, etc. are still available.
Please let me know what you need.

I also have parts from a Heath HD-15 phone patch available.
This includes an audio transformer used for digital
interfacing, VU meter, and other parts. Outer cover and
knobs are gone. What do you need?

RCA VT-138 / 1629 Magic Eye Tube:

This magic eye tube is a RCA VT-138 that is also known as
a JAN-CRC-1629, or simply a 1629.

The RCA 1629 / VT-138 is a military spec magic eye tube
for use as a tuning level indicator. It has a green phosphor
element.

This tube is often used as an indicator in capacitor checking
instrumentation. I know it is used in some of the Heathkit
units, and probably others.

This one works fine and is $17.

ORIGINAL Heath manuals For Sale:

These are manuals / brochures / schematics only.
They are all originals, not copies, and all are in
extremely nice condition.

Brochure "Heathkit Specials" featuring the
Twoer, Sixer, SB series, and others. $4

GD-600 Photoelectric Light Switch, 1972, $5

HM-102 HF Wattmeter
1971, Schematic in book $10

HW-29 A "Sixer" 6 meter transceiver
1964, Schematic in book, $12

HW-2021 2 meter hand held transceiver
1975, No check marks $9

SB-620 Scanalyzer
Schematic Only, Large fold out page, $4

These are original manuals / brochures / schematics only.

I also have many other accessories available such as many
different types of microphones, HTs, VHF and UHF rigs, HF
and VHF/UHF antennas, etc.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

2 meter FM transceiver, HF Solid State Amplifier, Active
Audio Filter, Speaker Microphones, Amplifier Saver, Charger,
Manuals, Coax Switches and other Miscellaneous For Sale:

Icom IC-229 H, 2 meter mobile transceiver

The Icom IC-229 H is a 2 meter FM mobile transceiver
providing 50 watts of power. There is also a setting for
25, 10, or 5 watts output when less power is needed. The
LCD display is easy to read. This radio has 20 memories
and priority watch. It also has programmed scanning or
memory scanning. This radio requires 13 V DC at 10 amps,
measures 5.5 x 1.6 x 6.1 inches, and weighs 2.2 lbs.

Features:
* SubAudible (CTCSS, PL) tones
* 20 Memories
* Priority Watch
* Call Channel
* Memory Skip
* Scan
* Backlit LCD
* Receive 138-174 MHz
* 4 RF Output Levels

This particular unit has extremely low power output in
all power positions. I am 99% sure that the problem is
the output power module. It receives great and functions
fine in all other respects. It was used for packet and
does not include a microphone. Cosmetically, it is in
nice condition. It does have a bulb burned out. $60

Ameritron ALS-600 HF Solid State No Tune Amplifier:
-
This is a solid state, HF no tune linear amplifier, including
coverage of the WARC bands, and is supplied with a separate
power supply. It is a great match to Icom gear.

Features:
No Tubes - all solid state
Instant band switching, no tuning, no warm up
Output Power 600 Watts PEP, 500 Watts CW
Continuous HF Coverage
SWR Protection
Over Power Protection
Extremely quiet low speed fan

Very Compact
Illuminated Cross-Needle SWR/Wattmeter
Operate / Standby Switch
Transmit, ALC & SWR LED indicators
Step Start Inrush Protection
Power Supply has voltage & current cross needle meter

This is a really great amplifier. It has full output, working 100%. The amp proper looks extremely nice, although a bit of the very bottom of the laxan panel on the power supply has a bubble. It ends up on the floor out of sight anyhow, so does not mater.

With paper work for $900.

Autek QF-1 A, Active Audio Filter:

This is an audio filter that goes between your rig and speaker. It runs off of 110 V AC or 13 Volt DC, and will peak, notch, or become a low pass or high pass filter. Selectivity (bandwidth) and frequency are adjustable from the front panel. This is the "A" model that also has an additional notch filter added. The input is an 1/4 inch phone plug, and the output is a 1/4 inch jack on the rear panel.

This particular unit works 100%, and looks very, very nice. I can not find a scratch on it.

With paper work for $50.

HT Speaker Microphones:

All of these have the 3.5 mm and 2.5 mm plugs on them, as used by Icom, Alinco, Radio Shack, some Yaesu, and other HTs.

Pryme Speaker Microphone
It works fine and look line new. $20

Azden SDX-316
This is the rounder style speaker mic that fits nicely in the palm of your hand. $ 20

MFJ-287 Speaker Microphone
This fits the TH-21/31/41 series HTs, TH-205, TH-215, TH-415, as well as others. It has a 3 conductor 3.5 mm plug and a 2 conductor 2.5 mm plug.
It works fine, and looks close to new. $15

MFJ 216 Deluxe "Amplifier Saver":

Amplifier Saver lets you safely tune up your linear amplifier for full power output and best linearity. It protects your

expensive amplifier during tune-ups from over-heating, tube damage, power supply stress and arc-over. MFJs innovative pulse tuning technology lets you tune your amplifier at full peak output power. It can also be used to evaluate wattmeters and QSK systems.

It plugs into your rigs CW key jack. Simply press Pulse Tune button and tune your amplifier normally for maximum power output. It has Duty Cycle and Pulse Rate controls on front panel, and is in a fully shielded all metal case. Uses 9 V battery and measures a compact 3 1/4 x 1 1/4 x 4 inches.

This unit works fine and looks very close to new. MFJ sells these for $80. But this one for $60.

Icom Battery Charger:

Icom BC-127 A, Battery Charger for Icom IC-Q7A Dual Band HT:
This charger charges two AA NiCads (or NiMH) for the IC-Q7 A Dual band HT, and Icom R-2 receiver, and probably others.
This appears to be new, unused, still in its bag.
Icom lists them at $21. Buy this one for $12.

Wall Wart Power supplies:

All are standard "non-switching" types, with no noise like the switching types have.

AEA AC-1 "Wall Wart" Power Supply
This "Wall wart" power supply will supply 12 V DC at up to 1 amp.
It can be used with the AEA PK-232, PK-88 or others.
This unit has a 2.1 mm plug, with the center positive, so it can be used on many different things that require 12 V DC at up to an amp, such as keyers, antenna tuners, etc. $14

Yaesu NC-18 B Charger
Provides 14.5 V DC at 50 ma to charge many different HTs, including the Yaesu FT-411, FT-811, FT-911, FT-23, FT-209, FT-415, FT-410, FT-470, FT-727, FT-530, FT-703, and more.
Small 2.5 mm male plug. $10

Icom DC adapter and batteries:

Icom DC-25
This is a pack that is used on the Icom μ2AT, Icom μ4AT, and on other HTs that use the BP-20, BP-21, BP-22, BP-23 and BP-24 battery packs. It takes 13 V DC (such as from a cigarette lighter), and converts it to the 9.4 V DC voltage needed for the HT. It is used in place of a battery. This one works fine and looks fine. $18

Icom BP-21 and Icom BP-22
Neither of these battery packs hold a charge and are sold
for rebuilding, for using the case, etc. $7 each

ORIGINAL Icom operating manuals:

Please note that all of these are original Icom manuals
and are not copies. All are in very good condition.
These are original manuals only.

BC-30 Desk Charger $5
BC-35 Desk Charger $7
BP-2, BP-3, BP-4, BP-5 battery packs $3
BP-21, BP-22, BP-23, and BP-24 Batteries $3
DC-1 DC pack for IC-2 AT series HTs $4
HM-8 Hand Microphone, w/schematic $5
IC-22 S, 2 m FM transceiver $12
IC-28 H, 2 m FM transceiver $12
IC-3 PA Power supply / speaker $10
UT-16 Voice Synthesizer $5

These are original manuals only.

MFJ "Strip Line" Coaxial antenna switches:

Both of these antenna switches are in a heavy diecast housing
that utilizes "stripline" construction to keep the impedance
very close to 50 ohms. It also permits good operation at
higher frequencies up to 500 MHz, and gives over 50 db
isolation. Unused antenna are grounded, with an additional
position to ground all antennas. SO-239 connectors.

MFJ 1704 Coax Switch
Will switch up to 4 antennas, and has lightning protection built
in. It works fine and looks close to new. $55

MFJ 1702 B Coax Switch
Switches 2 antennas. This one works 100% and looks great
also. $24

Coax connectors and adapters:

Prices are per connector. Several of each are available.
It looks like these have not been used.

"N" Connector - Double Male $8

BNC male for coax cable
standard type $2
crimp on type $3

Chassis mount BNC female
square mount (uses 4 screws) $3
screw in type $3

BNC "T" - two female and one male $3

Antenna adapter to fit the BNC connector on the HT
and provide an SO-239 connector that will permit
a PL-259 to be attached. (BNC male to UHF female) $5

UHF Male (PL-259) to BNC female (opposite of above) $5

UHF double female "Barrel connector" (two SO-239 together) $3

UHF "Bulkhead Connector" - Double female, as above, but for
mounting thru a window, siding, etc. about 3 inches long $6

UHF double male connector (two PL-259's together) $3

UHF "T" connector with two female (SO-239) and one male
(PL-259) connection $5

I also have many other accessories available such as many
different types of microphones, HTs, HF, VHF and UHF rigs, HF
and VHF/UHF antennas, etc.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

Amplifier Saver, Active Audio Filter,
Wattmeters/SWR Bridges, Coax Antenna Switches,
Microphones, HT Speaker Mics, DTMF Touch Tone
Microphones, Accessories for Kenwood HTs, original
Kenwood Manuals, and other Kenwood items For Sale:

MFJ 216 Deluxe "Amplifier Saver":

Amplifier Saver lets you safely tune up your linear amplifier for full power output and best linearity. It protects your expensive amplifier during tune-ups from over-heating, tube damage, power supply stress and arc-over. MFJs innovative pulse tuning technology lets you tune your amplifier at full peak output power. It can also be used to evaluate wattmeters and QSK systems.

It plugs into your rigs CW key jack. Simply press Pulse Tune button and tune your amplifier normally for maximum power output. It has Duty Cycle and Pulse Rate controls on front panel, and is in a fully shielded all metal case. Uses 9 V battery and measures a compact 3 1/4 x 1 1/4 x 4 inches.

This unit works fine and looks very close to new. MFJ sells these for $80. But this one for $60.

Autek QF-1 A, Active Audio Filter:

This is an audio filter that goes between your rig and speaker. It runs off of 110 V AC or 13 Volt DC, and will peak, notch, or become a low pass or high pass filter. Selectivity (bandwidth) and frequency are adjustable from the front panel. This is the "A" model that also has an additional notch filter added. The input is an 1/4 inch phone plug, and the output is a 1/4 inch jack on the rear panel.

This particular unit works 100%, and looks very, very nice. I can not find a scratch on it.

With paper work for $50.

Swan WM-2000 Wattmeter / SWR Bridge:

The Swan WM-2000 power meter and SWR bridge covers 3.5 to 30 MHz. Power scales are 200, 1000, 2000 watts. It has a very large (over 5 inch) meter, for easy visibility. The rear panel has SO-239 input and output connectors.

This is an extremely nice meter, primarily due to its large physical meter, making it easy to read.

This one is in extremely good condition. It works 100% and looks very close to new.

With paper work for $80.

Heath SB-634 Station Console:

The Heathkit SB-634 station console is a multifunction unit. It contains a 24 hour digital clock (6 large digits, including seconds), 10 minute interval timer (3 digits -- minutes and seconds), phone patch and an SWR/Power meter. The large wattmeter reads either 200 watts or 2000 watts full scale, in addition to SWR. It matches the Heath SB series of equipment (Heath green), and is powered by 115 V AC.

This unit works on all of its functions. It looks extremely nice. I can not find a scratch on it, but there is very slight (and I emphasize very slight) wear on the 2000 watt push button.

With paper work for $150.

Heath HM-2140 A, dual meter Wattmeter / SWR Bridge:

The HM-2140 A uses two separate meters to measure power and SWR (forward and reflected power). It will measure either average power, or peak power (PEP) with a 9 volt battery. Power ranges are 200 and 2000 watts. Frequency range is from 160 thru 10 meters. It has a remote sensor, which permits the meter to be separated from the coax connection by up to 3 feet. This is the "A" model of this meter, which is the Heath Brown color (not the green), and has more features.

More details can be found at http://www.radiomuseum.org/r/heath_wattmeter_hm_2140a_hm2140.html

This particular unit works fine, and looks very close to new. With paper work for $100.

MFJ "Strip Line" Coaxial antenna switches:

Both of these antenna switches are in a heavy diecast housing that utilizes "stripline" construction to keep the impedance very close to 50 ohms. It also permits good operation at higher frequencies up to 500 MHz, and gives over 50 db isolation. Unused antenna are grounded, with an additional position to ground all antennas. SO-239 connectors.

MFJ 1704 Coax Switch
Will switch up to 4 antennas. It works fine and looks close to new. $55

MFJ 1702 B Coax Switch
Switches 2 antennas. With lightning protection. This one works 100% and looks great also. $24

Deluxe Desk Microphone w/ Kenwood 8 pin connector:

This is a great looking and great performing low impedance desk mic. It has a quality Shure 600 ohm cartridge in it (the cartridge alone is over $40 new), with a very nice black die case base and neck, with a chrome grill. It looks somewhat like a Shure 444, but no plastic on this one -- all metal!

This one looks like new, and works the same. It has a long (approx 6 foot) cord, with a round 8 pin connector for Kenwood. $75

Astatic Model 810-6 Gooseneck Microphone:

This mic is on a 12 inch gooseneck. The mic is a brushed metal about 5 1/4 inches long, and is actually part of the gooseneck. The cable goes thru the gooseneck. This has a 2 conductor shielded cable, so it is a quality balanced microphone with about a 4000 ohm impedance. The gooseneck terminates in a standard 5/8 inch threaded connector.

This one works fine and looks good. $45

Kenwood Hand Microphone with round 8 pin plug:

This hand mic works great on most Kenwood rigs with the round 8 pin connector, such as the TS-430, TS-440, TS-570, TM-241, TM-2530, TW-4000, and others.
It only says "Electret Condenser Mic" on it, with no model number.

Basically, this mic is like an MC-43, only with a couple more features. Of course it has the mic and PTT switch; it also has up/down switches on the top. There are four "extra" buttons labeled Call, VFO, MR, and PF. What these four buttons do depends on the rig that it is attached to. They will function on some rigs, and are completely useless on others. There is also a "Lock" switch on the back.

Regardless if you use the four extra buttons or not, you still have a mic that works like an MC-43.

This mic works fine, and looks like new. I am guessing it came with a rig, and was immediately put in the drawer. $30

Speaker Microphones:

All of these have the 3.5 mm and 2.5 mm plugs on them, as used by Kenwood, Icom, Alinco, Radio Shack, some Yaesu,

and other HTs.

Azden SDX-316
This is the rounder style speaker mic that fits nicely in
the palm of your hand. $ 20

Pryme Speaker Microphone
It works fine and look line new. $20

MFJ-287 Speaker Microphone
This fits the TH-21/31/41 series HTs, TH-205, TH-215, TH-415,
as well as others. It has a 3 conductor 3.5 mm plug and a 2
conductor 2.5 mm plug.
It works fine, and looks close to new. $15

DTMF Touch Tone Microphones:

CES 610 L DTMF Touch Tone Mic
Can manually dial a number, or automatically store it in
the mic, and "speed dial". 12 digit touch tone pad on the
front. 8 pin modular plug (like computer LAN).
Looks to be new. $38

KDK Model TM-2 DTMF Mic
With touch tone pad and up-down switches. It presently
has a round 8 pin connector wired for Kenwood.
Nice condition. $40

Johnson 250-0761-010 / CES 655 L DTMF Mic
It has a 12 digit pad on the front, and is a rugged mic.
Presently with 4 pin plug. Looks to be unused. $38

Yaesu YM-22 DTMF Condenser Microphone
This mic has a 16 digit touch tone (DTMF) pad on the front.
There are up and down buttons on the top, in addition to
the PTT switch.
Stripped and tinned ends. Great condition. $40

Cables for CW keyers and keys:

NEW listing of additional cables

Cable for paddles
About 3 feet long, and with a 1/8 inch (3.5 mm) stereo
connector on the end, like used by most rigs. $8
As above, but 1/4 inch plug. $8
As above, with 1/4 inch GOLD plated plug. $15

Cable for straight key
About 3 feet long, with a mono 1/8 inch (3.5 mm) phone
plug on it, as used with a straight key. $5
As above, but 1/4 inch plug. $5

Accessories for Kenwood TH-205, TH-215, TH-225, TH-415,
and other HTs in this series:

Original Kenwood Rubber Duck antenna from TH-215. $10

Kenwood BC-2 Charger for PB-2 batteries. $12

MFJ-287 Speaker Microphone
Fits same HTs as the MFJ 286 above, but is a smaller more
compact speaker mic. It works fine, and looks close to new. $15

Kenwood Wrist Strap for TH-215, plus many other HTs. $4

BNC to PL-259 antenna adapter $5

Accessories for the Kenwood TH-21 / 31 / 41 series HTs:

Original Operating manual for TH-21 HT for 2 meters $8

Kenwood BH-3 belt clip and hardware for Kenwood TH-21/31/41
series HTs. $8

MFJ-287 Speaker Microphone
Fits same HTs as the MFJ 286 above, but is a smaller more
compact speaker mic. It works fine, and looks close to new. $15

Kenwood W09-0315 charger
This charger is used to charge the larger PB-21 H batteries
for the TH-21 series, and also on other Kenwood radios.
It produces 10.5 V DC at 42 ma, with a standard 2.1 mm
coaxial connector. $12

Kenwood Rubber duck antenna for the TH-21 HT
Shorter "Stubby Duck" from Kenwood. $20

Operator's Manual for Kenwood (Trio) TS-440 S:

This is a quality reproduction with a "comb" binding
that has been done by one of the professional reproduction
houses. W7FG I think.

This one has a plastic protector on the front, and is
in very nice condition. It includes schematic diagrams.
$18

Original Manuals for Kenwood equipment:
New ones have been added.

All manuals are in very nice condition, for Kenwood equipment.
All are original manuals only.

Operating manual for TM-2570/2550/2530 2 m xcvr $15
Operating manual for TW-4000 dual bander $15
Service manual for TW-4000 dual bander $20
Operating manual for TW-4100 dual bander $15

Operating manual for TH-21 HT for 2 m $8
Operating manual for TH-225, 2 m HT $12
Operating manual for TM-221/421 mobile $15
Operating manual for TH-241/441/541 mobile FM transceivers
...For 2 m, 440 MHz, & 1200 MHz. $12
Operating manual for TR-2400, 2 m HT $12
Service manual for TR-2600, 2 m HT $12
Operating manual for TR-7400, 2 m xcvr $8

Kenwood TM G-707 operating manual in Spanish:
Spanish version of the Operating Manual
for the TM G-707 dual band transceiver. New $10
All other manuals are English.

LF-30A Low Pass Filter $5
MC-30 & MC-35 hand microphones $5
MC-85 desk microphone $4
PB-1, PB-2, PB-3, & PB-4 battery packs $3
PS-6 power supply $6
SMC-24 speaker mic $4
SMC-25 speaker mic $4
SP-430 speaker $2
SP-820 Speaker $2

These are original Kenwood manuals only.

HT Belt Clips and Wrist Straps:

Belt Clips:
All include the hardware with the belt clip and are $8 each.
Kenwood BH-3 for Kenwood TH-21 / 31 / 41 series HTs
Motorola
Yaesu FT-207

Wrist Straps for various HTs - $4 each
Kenwood TH-215 / 225 / 415, TR-2500, etc.
Kenwood TR-2400
Yaesu FT-209

I also have many other accessories available such as many
different types of microphones, HTs, HF, VHF and UHF rigs, HF
and VHF/UHF antennas, and many miscellaneous accessories.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

6708. FS: Icom UHF P25 HT's

Yahoo group: ham4sale (2007 — 2015)
Date: 2011-10-17 23:56:42 UTC
From: n4irs
Topic: 6708 Message: 6708

I have 2 new "demo" Icom F80DT APCO 25 P25 / Analog Hand Held radios.
These radios include new battery charger programming cable and software.
The radios were programmed for the Florida UHF HAM P25 repeaters and GMRS.

I'm asking $500 each. Complete specs are available all over the web.
Paypal or USPS MO

Thanks, Steve N4IRS

6709. Various Microphones - Hi & Low Z; Desk & Hand; Mic accessories FS

Yahoo group: ham4sale (2007 — 2015)
Date: 2011-10-20 13:55:20 UTC
From: Ken Simpson, W8EK
Topic: 6709 Message: 6709

Various Microphones For Sale:
Desk Mics, Hand Mics, DTMF Touch Tone Mics, Speaker
Mics, and Miscellaneous Mic accessories

Astatic D-104 "Lollypop" Desk Microphone:

The D-104 is a high impedance microphone that matches many
of the older rigs, and is often seen pictured with them.
It looks somewhat like a giant chrome plated lollypop, stuck
into a gray base. The chrome PTT switch is a bar that is
parallel to the "stick" of the lollypop. This is the
unamplified version.

This particular D-104 is in extremely nice condition.
Of course it works well, and has good frequency response.
Cosmetically, it is extremely nice. The chrome seems
perfect, with no scratches or defects of any sort.
The gray base has a couple of very minor scratches.
It presently has a 4 pin connector, but that obviously
could be changed. $55

Another Astatic D-104
This D-104 is the mic element and chrome housing, but does
not have the base with it. It has a short (about 3 inch)
tube that is made to screw into a regular mic stand (see
stands available in this listing). It has an in line PTT
switch, and presently has the 2 pin Amphenol plug as used
by Heath, Johnson, Hallicrafters, and others.
It works well, and looks great. $35

Astatic Model 810-6 Gooseneck Microphone:

This mic is on a 12 inch gooseneck. The mic is a brushed
metal about 5 1/4 inches long, and is actually part of the
gooseneck. The cable goes thru the gooseneck. This has a
2 conductor shielded cable, so it is a quality balanced
microphone with about a 4000 ohm impedance. The gooseneck
terminates in a standard 5/8 inch threaded connector.

This one works fine and looks good. $45

Turner 350, High Impedance Hand Microphone
This is a Hi Z hand mic, that looks like a Turner 350. The
label is off of it, but I am 99% certain it is a 350. This
one is the grayish color, and has a right angle 1/4 inch
stereo plug on it, as used by many rigs in the 1970's. It
has a great pattern on the scope, and looks fine as well. $28

Deluxe Desk Microphone - Kenwood round 8 pin:

This is a great looking and great performing low impedance
desk mic. It has a quality Shure 600 ohm cartridge in it
(the cartridge alone is over $40 new), with a very nice
black die case base and neck, with a chrome grill. It
looks somewhat like a Shure 444, but no plastic on this
one -- all metal! This one has a round 8 pin connector
wired for Kenwood on it, but that can be changed.

This one looks like new, and works the same. It has a
long (approx 6 foot) cord. $75

Heil HM-10-5 Deluxe Microphone:

The Heil HM-10-5 is a beautiful microphone resembling the
"gold line series". It has the HM-5 wide element for good
frequency response, and good articulation.
This particular microphone looks very close to new.
It includes paper work in its original fancy Heil box. $75

Cables for Heil (and other) Microphones:

Heil CC-1 Y (also known as Yellow)
4 pin XLR connector on one end, to Yaesu round 8 pin connector
(Yellow cable) $25

Heil CC-1 XLR 4
3 pin XLR Male to 4 pin XLR Female $25

3 pin XLR to stripped and tinned ends
About 10 feet of quality rubber covered mic cable with a 3 pin
XLR connector on one end, and nothing on the other end. Ideal
to add your own connector. Can be used with the CC-1 XLR-4
above. $20

Heil round 8 pin connector to 8 pin modular connector for Icom
Not positive of the number, but it might be HSTA-IM or HSTA-706
$15

Heil Wind Screen
This windscreen can be used with a variety of microphones,
including the GM-5. Excellent condition. $8

Microphone Stands and holders:

Microphone Stands:

Heil SB-2 small boom
The Heil Sound SB-2 Small Boom is ideal for mounting your
Heil microphone.
The SB-2 includes the 'stealth' C-Clamp.
This one is in extremely nice condition. $50

Regular round desk stand
Round 6 inch diameter heavy black / dark grey base, with
a 3 inch chrome tube coming up from the middle.
Standard 5/8 inch threaded. $15

Microphone holders:

Heil Mic Holder
Black plastic holder, for 1 inch diameter mics.
Standard 5/8 inch threads. $8

Electro Voice Mic Holder
Gray colored EV, designed to hold 5/8 to 3/4 inch diameter mics,
and go into a stand with standard 5/8 inch threads. $5

Chrome Mic holder
Similar to EV holder, but chrome metal with a green felt on the
inside to protect the mic. For 1/2 inch to 5/8 inch diameter
microphones. Standard 5/8 inch threads. $5

Heil Wind Screen
This windscreen can be used with a variety of microphones,
including the GM-5. Excellent condition. $8

Hand Microphone with round 8 pin plug for Kenwood:

This hand mic works great on most Kenwood rigs with the
round 8 pin connector, such as the TS-5-, TS-60, TS-430,
TS-440, TS-570, TM-241, TM-2530, TW-4000, and others.
It only says "Electret Condenser Mic" on it, with no
model number. It is very similar to an MC-47, but the
4 buttons are at the top instead of the bottom.

Basically, this mic is like an MC-43, only with a couple
more features. Of course it has the mic and PTT switch;
it also has up/down switches on the top. There are four
"extra" buttons labeled Call, VFO, MR, and PF. What these
four buttons do depends on the rig that it is attached to.
They will function on some rigs, and are completely useless
on others. There is also a "Lock" switch on the back.

Regardless if you use the four extra buttons or not, you
still have a mic that works like an MC-43.

This mic works fine, and looks like new. I am guessing it
came with a rig, and was immediately put in the drawer. $28

Kenwood Mic with modular connector:

This mic is basically the same as the one with the round
8 pin connector above, except it has the modular plug on it,
as used by the TM-261, TM-271, and many others.
It looks like new. $30

Yaesu Hand Microphones:

Yaesu MH-1 Hand Microphone
The Yaesu MH-1 b8 is the hand mic that is used on most of the Yaesu HF and some of the Yaesu VHF rigs. It is a hand mic that has a switch on the back with two audio frequency responses -- one for rag chewing, and one for more punch for DX. It has up and down switches, in addition to a "fast" switch. Of course it also has the normal PTT switch. It has a round 8 pin mic connector, wired for Yaesu.
This particular microphone looks like it might not have ever been used. I think it was probably put in a drawer when new, and left there. Of course it works fine. $40

Yaesu MH-31 B 8 dynamic hand microphone:
This is the Yaesu hand microphone that has the round 8 pin connector on it. It will go with virtually any Yaesu rig that uses the round 8 pin connector. It has up, down, and fst switches, and well as a tone switch, in addition to the PTT switch.
This particular unit works 100%, and appears to be unused. $40

Yaesu YM-31 hand microphone
The Yaesu YM-31 is a hand mic with a round 6 pin connector. Apparently it is either similar or the same as the MH-25A6j (not the MH-25 with the 8 pin connector). It is a 600 ohm impedance hand microphone, and has a Monitor on-off switch on the back. It should be compatible with any of the Yaesu rigs that uses the round 6 pin connector. It looks very similar to the Yaesu MH-1.
This one works fine and looks extremely nice. $25

Yaesu YM-22 DTMF Condenser Microphone
This mic has a 16 digit touch tone (DTMF) pad on the front. There are up and down buttons on the top, in addition to the PTT switch.
Stripped and tinned ends. Great condition. $40

Heath SB-1400-2 hand microphone
This hand mic is basically the same as a Yaesu MH-1, but with a Heath label. Use it with the SB-1400, or with Yeasu rigs with the round 8 pin connector. Like new for $40.

DTMF Touch Tone Microphones:

Yaesu YM-22 DTMF Condenser Microphone
This mic has a 16 digit touch tone (DTMF) pad on the front. There are up and down buttons on the top, in addition to the PTT switch.
Stripped and tinned ends. Great condition. $40

CES 610 L DTMF Touch Tone Mic
Can manually dial a number, or automatically store it in the mic, and "speed dial". 12 digit touch tone pad on the front. 8 pin modular plug (like computer LAN).
Looks to be new. $38

KDK Model TM-2 DTMF Mic
With touch tone pad and up-down switches. It presently has a round 8 pin connector wired for Kenwood.
Nice condition. $40

Johnson 250-0761-010 / CES 655 L DTMF Mic
It has a 12 digit pad on the front, and is a rugged mic. Presently with 4 pin plug. Looks to be unused. $38

Several HT Speaker Microphones:

Yaesu MH-34 b 4 b speaker microphone
This is the one that fits the Yaesu HT with the 4 conductor 1/8 inch (3.5 mm) plug, such as the VX-5, VX-3, etc.
This one is just like new. $35

Pryme Speaker Microphone
This is the equivalent of the Yaesu MH-34 (above). It has the 4 conductor 1/8 inch plug on it. It works 100% and looks like it has not been used. $28

Yaesu YM-24 A speaker microphone
This speaker mic fits the Yaesu FT-207, 208, plus many others. It can be modified for Santec, Wilson, and others. It has the odd little round connector on it like Yaesu, Wilson, Santec, and others used in the 1970s and 80s.
This particular unit works fine, and looks great also. $20

All of the following speaker mics have the 3.5 mm and 2.5 mm plugs on them, as used by Icom, Alinco, Radio Shack, some Yaesu, and other HTs.

Azden SDX-316
This is the rounder style speaker mic that fits nicely in the palm of your hand. $ 20

Pryme Speaker Microphone
It works fine and look line new. $20

MFJ-287 Speaker Microphone
This fits the TH-21/31/41 series HTs, TH-205, TH-215, TH-415, as well as others. It has a 3 conductor 3.5 mm plug and a 2 conductor 2.5 mm plug.
It works fine, and looks close to new. $15

I also have many other accessories available such as many different types of microphones, HTs, VHF and UHF rigs, HF

and VHF/UHF antennas, etc.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

6712. Antenna related items FS

Yahoo group: ham4sale (2007 — 2015)
Date: 2011-10-21 22:34:51 UTC
From: Ken Simpson, W8EK
Topic: 6712 Message: 6712

Antenna related items For Sale:
Coaxial Antenna Switches, SWR Bridges and Wattmeters,
VHF and UHF Mobile Antennas and Mounts, Coax Connectors
and Adapters, Rubber Duck HT Antennas, etc.

MFJ "Strip Line" Coaxial antenna switches:

Both of these antenna switches are in a heavy diecast housing
that utilizes "stripline" construction to keep the impedance
very close to 50 ohms. This means it permits good operation
at higher frequencies up to 500 MHz, and gives over 50 db
isolation. Unused antennas are grounded, with an additional
position to ground all antennas. SO-239 connectors.

MFJ 1704 Coax Switch
Will switch up to 4 antennas. Lightning protection is built
in. It works fine and looks close to new. $55

MFJ 1702 B Coax Switch
Switches 2 antennas. This one works 100% and looks great
also. $24

HF and VHF SWR Bridges For Sale:

All of these cover from 3 to 150 MHz, covering HF, 6 meters,
and 2 meters, so are ideal for the new rigs with 6 meters and
2 meters in them. SO-239 connectors.

Quement SWB-2
This unit features two separate meters -- one for reading
forward power and another for reading SWR. This permits one
to easily monitor both the power going out, and the SWR on
the antenna at the same time.
It works fine and looks great. With paper work for $37.

Carter Craft 90-300 HF SWR Bridge
The Carter Craft 90-300 is a single Meter SWR Bridge /
Field Strength Meter.
Although this has a Carter Craft name on it, it is the
same meter that was sold years ago under a couple dozen
different names, including Vanco, Midland, Quements,
Olson, and many others.
This one works fine, and looks extremely nice. I do not
see any scratches on it, and I am 99% certain it has not
been used, except for my testing of it.
In its original box with original instructions and little
field strength antenna. $30

Royce 2-100 Single Meter SWR Bridge / Field Strength Meter
This one works fine, and looks extremely nice. I do not see
any scratches on it, but it does have a previous owners name
on it. In its original box with original instructions. $28

Heath SB-634 Station Console w/ Wattmeter:

The Heathkit SB-634 station console is a multifunction unit.
It contains a 24 hour digital clock (6 large digits, including
seconds), 10 minute interval timer (3 digits -- minutes and
seconds), phone patch and an SWR/Power meter. The large
wattmeter reads either 200 watts or 2000 watts full scale,
in addition to SWR. It matches the Heath SB series of equipment
(Heath green), and is powered by 115 V AC.

This unit works on all of its functions. It looks extremely
nice. I can not find a scratch on it, but there is very slight
(and I emphasize very slight) wear on the 2000 watt push button.

With paper work for $150.

Heath HM-2140 A, dual meter Wattmeter / SWR Bridge:

The HM-2140 A uses two separate meters to measure power and
SWR (forward and reflected power). It will measure either
average power, or peak power (PEP) with a 9 volt battery.
Power ranges are 200 and 2000 watts. Frequency range is
from 160 thru 10 meters. It has a remote sensor, which
permits the meter to be separated from the coax connection
by up to 3 feet. This is the "A" model of this meter, which
is the Heath Brown color (not the green), and has more features.

More details can be found at
http://www.radiomuseum.org/r/heath_wattmeter_hm_2140a_hm2140.html

This particular unit works fine, and looks very close to new.
With paper work for $100.

Larsen NLA Type Mobile Antennas:

These antennas fit the Larsen NLA mobile mount, which is
a special mount made by Larsen.

Larsen NLA-150, 2 meter antenna, for Larsen NLA mount
Has about 3 db gain on 2 meters.
Coil only, without whip (whip is hard to ship). $10
With four foot whip. $19

Larsen NLA-450 coil and "stacked" whip for 440 MHz
Fits the Larsen NLA mount, and has about 5 db gain on
the 70 cm band. Coil and stacked whip are included. $12

UHF (440 MHz) Mobile Antennas :

Avanti "On Glass" antenna for 440 MHz:
This antenna was made by Avanti to mount on a windshield, or other glass. It does not require a ground plane, as it is a 1/2 wave antenna, rated to have 3 db gain. It is ideal for places where a ground plane is not available, such as a boat or motor home, in addition to cars. A special tuning box is included to match to your particular situation.
Avanti Antenna for 440 MHz
Still in its original tube, unopened. $33

Larsen NLA-450 coil and "stacked" whip for 440 MHz
Fits the Larsen NLA mount, and has about 5 db gain on the 70 cm band. Stacked whip is included. $12

Mobile Antenna Mounts:

Large, heavy duty magnetic mount
This large mag mount will take any antenna with a standard 3/8 inch 24 thread connector. It is very heavy duty, about 5 inches in diameter, with a long coax for $25.

Larsen NMO "Button" Mount
This mount fits into a 3/4 inch hole, and will then take any of the many NMO types of antennas. Coax included.
It is in close to new condition. $15

Coax connectors and adapters:

Prices are per connector. Several of each are available.
It looks like these have not been used.

"N" Connector - Double Male $8

BNC male for coax cable
standard type $2
crimp on type $3

Chassis mount BNC female
square mount (uses 4 screws) $3
screw in type $3

BNC "T" - two female and one male $3

Antenna adapter to fit the BNC connector on the HT and provide an SO-239 connector that will permit a PL-259 to be attached. (BNC male to UHF female) $5

UHF Male (PL-259) to BNC female (opposite of above) $5

UHF double female "Barrel connector" (two SO-239 together) $3

UHF "Bulkhead Connector" - Double female, as above, but for mounting thru a window, siding, etc. about 3 inches long $6

UHF double male connector (two PL-259's together) $3

UHF "T" connector with two female (SO-239) and one male
(PL-259) connection $5

Rubber Duck antennas for your HT:
All are for 2 meters, are in good condition,
and are $10 each, unless stated otherwise.

BNC - Standard length, about 7 inches long
BNC - Original from Kenwood TH-215, about 5 inches long
BNC - Stubby about 4.5 inches long

5/16 inch threaded, as used by Motorola and others
Stubby - 4 inches long

Type F connector - 6.5 inches long

PL-259 connector - 6.5 inches long
HyGain 275, still in original packaging

PL-259 connector - Stubby - 4.6 inches long
Centurion, still in original package

Special for Kenwood TH-21 HT threaded connector
Stubby, about 4.5 inches long - $20

BNC Stubby for 440 MHz, 3 inches long

I also have many other accessories available such as many
different types of microphones, HTs, HF, VHF and UHF rigs, HF
and VHF/UHF antennas, and many miscellaneous accessories.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

6714. For Sale - Yaesu FT-817 - Loaded with Extras

Yahoo group: ham4sale (2007 — 2015)
Date: 2011-10-23 20:11:33 UTC
From: kc4vg
Topic: 6714 Message: 6714

I am selling my very complete FT-817 (non-ND) transceiver as it is excess to my needs.

The FT-817 is loaded with the following W4RT installed options:
- One Board Filter (Collins SSB and CW filters mounted on a single board)
- BHI Ltd DSP Module
- W4RT Microphone modifications - One Big Punch (speech compression) with Super Punch - switchable Heil HC-4 (OBP active) and Heil HC-5 (OBP not active) microphone elements. Note: this version of the One Big Punch with the Super Punch is no longer available from W4RT as Heil no longer will make its microphone elements available to others)

Other extras - Case, Wall Charger and NiMH Battery Pack

The FT-817 is in great shape and fully operational.

Price: $750.00 Priority Mail Delivered CONUS only. Accept US Postal Money Order or Personal Check (radio held until check clears). No PayPal.

FOR SALE:

The following items are for sale. All items are in excellent cosmetic and operational condition and I am the original owner. All were used by me in a non-smoking environment. Items are offered as a package deal. I am in Monroe, NC and would prefer to meet the buyer to make the transaction if possible. My home telephone number is 704-764-7279. Items are boxed, but I could unbox for pictures if needed.

Yaesu FT-1000 MK V Field, purchased new in 2003.
Yaesu SP-8 matching speaker for FT-1000 purchased new in 2003
Heil Goldline Pro microphone purchased new in 2003

Items were purchased together and used together, you will not be disappointed. Reason for selling? I have purchased an Icom IC-7600 and Heil PR-781 and do not need two large radios, so the FT-1000 must go.

Package deal for all three items $1400. If you feel this is too high, Make an offer! You never know I may take it! I will ship using USPS unless the buyer has other preferences. Shipping will be $25 and if it is more I will cover higher shipping cost. Your total price plus shipping will be $1425.00

Call the number above or email me for further information at wb4u@...

6718. R1155L receiver FS

Yahoo group: ham4sale (2007 — 2015)
Date: 2011-10-26 12:20:27 UTC
From: BenG4BXD
Topic: 6718 Message: 6718

R1155L, this is the version covering 160Mtrs. Quite nice condition, dial clear, scale fully readable, unfortunately the DF section has been removed otherwise looks ok. Certainly a good basis for a restoration or just using as is without the DF option. Was certainly working but sold as untested, not that difficult to repair though. £200.

pictures at: www.qsl.net/g4bxd/qmstores.htm

cheers, Ben.

6719. FS Elecraft K-1

Yahoo group: ham4sale (2007 — 2015)

Many Miscellaneous Accessory Items For Sale
Coaxial Antenna Switches; Active Audio Filter; Amplifier Saver; CW Keys, Keyers, Cables, and Tapes; Deluxe Speaker; Digital Controller; Station Console; Wattmeter; SWR Bridges; Station 24/12 hour clock; Power Supplies (both for rig and for bench), and more

MFJ "Strip Line" Coaxial antenna switches:

Both of these antenna switches are in a heavy diecast housing that utilizes "stripline" construction to keep the impedance very close to 50 ohms. This means it permits good operation at higher frequencies up to 500 MHz, and gives over 50 db isolation. Unused antennas are grounded, with an additional position to ground all antennas. SO-239 connectors.

MFJ 1704 Coax Switch
Will switch up to 4 antennas. Lightning protection is built in. It works fine and looks close to new. $55

MFJ 1702 B Coax Switch
Switches 2 antennas. This one works 100% and looks great also. $24

Autek QF-1 A, Active Audio Filter:

This is an audio filter that goes between your rig and speaker. It runs off of 110 V AC or 13 Volt DC, and will peak, notch, or become a low pass or high pass filter. Selectivity (bandwidth) and frequency are adjustable from the front panel. This is the "A" model that also has an additional notch filter added. The input is an 1/4 inch phone plug, and the output is a 1/4 inch jack on the rear panel.

This particular unit works 100%, and looks very, very nice. I can not find a scratch on it.

With paper work for $50.

MFJ 216 Deluxe "Amplifier Saver":

Amplifier Saver lets you safely tune up your linear amplifier for full power output and best linearity. It protects your expensive amplifier during tune-ups from over-heating, tube damage, power supply stress and arc-over. MFJs innovative pulse tuning technology lets you tune your amplifier at full peak output power. It can also be used to evaluate wattmeters

and QSK systems.

It plugs into your rigs CW key jack. Simply press Pulse Tune button and tune your amplifier normally for maximum power output. It has Duty Cycle and Pulse Rate controls on front panel, and is in a fully shielded all metal case. Uses 9 V battery and measures a compact 3 1/4 x 1 1/4 x 4 inches.

This unit works fine and looks very close to new. MFJ sells these for $80. But this one for $60.

CW Keys and cables:

Generic brass colored, oval base key
This is similar to a J-38 (without the bakelite base), but is a Japanese copy. It is brass colored, but is not real brass. Includes shorting switch.
It works fine and looks fine. $18

Generic straight key
This is a generic CW straight key with a plastic base.
It is nothing fancy, but it will do the job. $10

Cable for straight key
About 3 feet long, with a mono 1/8 inch (3.5 mm) phone plug on it, as used with a straight key. $5
As above, but 1/4 inch plug. $5

Cable for paddles
About 3 feet long, and with a 1/8 inch (3.5 mm) stereo connector on the end, like used by most rigs. $8
As above, but 1/4 inch plug. $8
As above, with 1/4 inch GOLD plated plug. $15

MFJ 8043 Electronic Keyer:

This is an electronic keyer that uses the Curtis 8043 Keyer IC. It has speed, weight, tone, and volume adjustments. It is capable of fully automatic or semiautomatic (like a bug) operation. Also, it can emit a solid "key down" for tuning up. It works with tube or solid state transceivers. It has sidetone with a front panel volume and tone control. Weighting is adjustable from the front panel. It can be powered via four internal C cells or an external 6 to 9 volt DC power supply.

The styling of this unit is the wood grain and eggshell color that TenTec used with their early equipment. TenTec made the enclosure for MFJ, so it is an exact match.

This particular unit looks really great, and of course it works. Paper work is included for $35.

Autek MK-1 Memory Keyer:

The Autek MK-1 is a keyer which runs on 120 V AC or on DC
from 9 to 14 V. It has four programmable memories, two of
which can be bridged by throwing a switch on the front
panel. Memories are selected by front panel switches.
Another switch selects "record" or "play". There are two
outputs on the back for negative and positive keying,
which means this unit will key most ham gear including
older tube transceivers.

It also has a built in side tone with volume control on
the front panel and an internal tone control. Of course
there is also a speed control on the front panel.

Cosmetically, this unit looks very nice. Electrically,
it emits a solid tone, so it will need some repair. All
of the ICs are socketed, which should make repair easier.

With complete paper work, including schematic diagram and
parts placement diagram for $20.

Cassette Tapes for learning the code:

These tapes came from a silent key estate, and are the only
ones we found.

ARRL "Increasing your code speed -- 10 to 15 WPM"
This is a set of two cassette tapes, but only the first tape
is in the original packing. It includes the booklet listing
what is on the tapes, but only has the first tape.
Great condition. $7

"The Radio Code by the Word Method"
Side 3 and Side 4
Apparently side 1 and side 2 are missing!
This cassette tape is in good condition. $5

Buy both of these for $10.

Yaesu SP-6 Speaker with phone patch and Filters:

This Yaesu SP-6 speaker has the phone patch and filters in it.
It is the matching speaker for the Yaesu FT-990 and many others.
It permits one to switch between two different rigs, and has
adjustable filters on both the high and low end to permit one
to get rid of QRM, and have a great sound.

This one is in extremely nice condition and works 100%. Not
a single scratch or mark on it. You will not find a nicer one
unless it just came out of the box.

With paper work for $150.

AEA items:

AEA PK-232 MBX, multi-mode digital controller.
More than just a TNC. It will handle packet, RTTY, Amtor,
ASCII, CW, etc. It has version 7 firmware, which I think
is the latest. It includes Pactor in it. It works fine,
and looks very close to new. The large, inch thick manual
is included, all in the original box, for $125.

AEA AC-1 "Wall Wort" Power Supply
This "Wall wort" power supply will supply 12 V DC at
up to 1 amp.
It can be used with the AEA PK-232, PK-88 or others.
This unit has a 2.1 mm plug, with the center positive,
so it can be used on many different things that require
12 V DC at up to an amp, such as keyers, antenna tuners,
etc.
This is a "regular" wall wort -- not the new switching
type that creates all sort of noise in your receiver.
Get this one, and leave the noise behind. $14

Heath SB-634 Station Console:

The Heathkit SB-634 station console is a multifunction unit.
It contains a 24 hour digital clock (6 large digits, including
seconds), 10 minute interval timer (3 digits -- minutes and
seconds), phone patch and an SWR/Power meter. The large
wattmeter reads either 200 watts or 2000 watts full scale,
in addition to SWR. It matches the Heath SB series of equipment
(Heath green), and is powered by 115 V AC.

This unit works on all of its functions. It looks extremely
nice. I can not find a scratch on it, but there is very slight
(and I emphasize very slight) wear on the 2000 watt push button.

With paper work for $150.

Heath HM-2140 A, dual meter Wattmeter / SWR Bridge:

The HM-2140 A uses two separate meters to measure power and
SWR (forward and reflected power). It will measure either
average power, or peak power (PEP) with a 9 volt battery.
Power ranges are 200 and 2000 watts. Frequency range is
from 160 thru 10 meters. It has a remote sensor, which
permits the meter to be separated from the coax connection
by up to 3 feet. This is the "A" model of this meter, which
is the Heath Brown color (not the green), and has more features.

More details can be found at
http://www.radiomuseum.org/r/heath_w...0a_hm2140.html

This particular unit works fine, and looks very close to new.
With paper work for $100.

HF and VHF SWR Bridges:

These cover from 3 to 150 MHz, covering HF, 6 meters,
and 2 meters, so are ideal for the new rigs with 6 meters and
2 meters in them. SO-239 connectors.

Quement SWB-2
This unit features two separate meters -- one for reading
forward power and another for reading SWR. This permits one
to easily monitor both the power going out, and the SWR on
the antenna at the same time.
It works fine and looks great. With paper work for $37.

Royce 2-100 Single Meter SWR Bridge / Field Strength Meter
This one works fine, and looks extremely nice. I do not see
any scratches on it, but it does have a previous owners name
on it. In its original box with original instructions. $28

Carter Craft 90-300 HF SWR Bridge:
The Carter Craft 90-300 is a single Meter SWR Bridge /
Field Strength Meter. It covers from 3 to 150 MHz,
covering HF, 6 meters, and 2 meters, so is ideal for
the new rigs with 6 meters and 2 meters in them.
SO-239 connectors.
Although this has a Carter Craft name on it, it is the
same meter that was sold years ago under a couple dozen
different names, including Vanco, Midland, Quements,
Olson, and many others.
This one works fine, and looks extremely nice. I do not
see any scratches on it, and I am 99% certain it has not
been used, except for my testing of it.
In its original box with original instructions and little
field strength antenna. $30

MFJ 108 B, dual digital clock:

The MFJ 108 B is actually two digital clocks on one base --
a 12 hour clock for local time, and a 24 hour clock for
universal (GMT) Time.

Read both UTC and local time at a glance with the dual 12 / 24
hour LCD clock that displays 12 / 24 hour time simultaneously!
Mounted in a brushed aluminum frame, the 12 / 24 Hour LCD Clock
features huge, easy-to-read 5/8 inch LCD numerals and a sloped
face that makes it easy-to-read across the room. One can
synchronize the two clock faces to WWV for split-second timing.
The clocks are quartz controlled for excellent accuracy. It
measures 4.5W x 2.5H x 2D inches.

This unit works fine, and looks very close to new.
Paper work (if you can call a single sheet paper work) is
included for $18.

TenTec 25 amp switching power supply:

"Switcher / 25" 25 amp switching power supply

This is a 25 amp switching power supply in a case that
matches the early Omni series case, with the metal bezel
around it. It is in a case that is the same size as a 243
remote VFO. It has an ammeter on the front, along with
Switch, TenTec logo, and output bulb. The front panel
basically looks like a 280 power supply with a metal bezel,
but says "Switcher/25" on it. It is electrically very quiet,
and well shielded. It does not produce any electrical noise
that I could find.

Of course it works fine, and looks fine also. $175

Kepco Variable Bench Power Supply:

This variable power supply is a Kepco Model CK 18-3, which
means that it will produce up to 18 V DC at up to 3 amps.
This is an ideal bench power supply!

The voltage is adjustable with a 10 turn pot from close to zero,
up to almost 20 volts. There is a fairly large analog meter that
reads the voltage. Built in current limiting is adjustable with
a 10 turn pot from a few ma to up to about 3 amps. A separate
meter reads the current, so both voltage and current can be read
at the same time. Also, there are connections on the back to
allow remote sensing and remote programming. This is a quality
regulated power supply!

This particular unit works 100%, and looks extremely nice.

These are going for $190 to $200 (plus shipping).
Buy this one for $160.

Kepco Variable Bench Power Supply:

This is an ideal bench power supply! It is a Kepco Model ABC
40-0.5, which means that it will produce from zero up to 40 V
DC at up to 1/2 amp. Great for the bench.

The voltage is adjustable with a 10 turn pot from close to zero,
up to about 40 volts. There is a fairly large analog meter that
reads the voltage. There is also current limiting built in that
is adjustable from about 100 ma to up to about 700 ma. The same
meter that reads voltage can be switched to read current, or
short circuit current (the point that the current limit is set).
In addition, there are connections on the back to allow remote
sensing and remote programming. This is a quality regulated
power supply!

This particular unit works 100%, and looks extremely nice.

These normally sell for $125 to $150 (plus shipping).
Buy this one for $90.

Olson RA-472 Bench Type Power Supply:

This power supply is suitable for low current bench use.
It provides a variable voltage source from about 5 V DC
up to about 15 V DC. It has one knob for course voltage
that is labeled 6 V, 9 V and 12 V. An additional knob
will fine tune the voltage. I do not have specs on this
supply, but I would guess that it is good for maybe 1/3
to 1/2 amp current. It has an analog meter that seems
to be fairly accurate; at least it compares favorably
to my lab type DMM.

This unit is not a "top of the line" unit, but is a
utility type power supply. $15

I also have many other accessories available such as many
different types of microphones, HTs, VHF and UHF rigs, HF
and VHF/UHF antennas, etc.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

These are all originals unless noted:

ABC's of Transistors by George Mann, First Edition, Fourth Printing, August 1961. Very Good condition. 96 pages. $4

Amateur Single Sideband by Collins Radio. 1962 Hardbound. Excellent condition except one previous owner's name in ink on p.106. 143 pages -- $60

Antique Radio Classifieds -- May, June, July (2 copies), August 1985 -- $1 all

ARRL
•Antenna Book, 13th edition, 1974, good condtion -- $7
•Proceedings of Microwave Update '89, 200 pages -- $10
•Radio Amateur's Handbook, 1983. Very good condition -- $10
•Radio Amateur's Handbook, 1977. Cover a mite worn, insides fine, no apparent writing --$10
•Radio Amateur's Handbook Ninth Edition, 1931. Has a typewritten note glued to the frontspiece stating that it belongs in the radio room of the USS Maryland (the Battleship which was moored just inshore of the USS Oklahoma on the first Pearl Harbor Day). Cover somewhat rough, torn at spine, index and first two chapters missing up to page 24, otherwise good, no writing in text nor torn pages. Softbound, about 200 pages left -- $500
Confidential Frequency List by Ferrell, 6th edition, 1984. 300 pages. -- $3

The Contact Modulator -- 8 booklet series by the Engineering Staff of Airpax with more than anyone ever needed to know about choppers. About 30 pages per booklet. Very good condition 1958-1960 -- $50

Dictionary of Electronic Terms by Allied Radio Corp, Eighth Edition, First Printing, May 1968. 112 pages. $4

Electronics in Engineering by Hill, McGraw Hill, second edition, 1961. Hardbound. Excellent condition. 340 pages. $10

Electronics Engineering Manual, Volume 5 -- Electronics Magazine article compendium. Very good condition. 252 pages -- $10

Electronic Shortcuts for Hobbyists by Sylvania Electric Products. Second edition, first printing, 1951. Cover separated, otherwise good condition. 35 pages. $3

5 Meter Radiotelephony by Frank Jones -- This is a REPRINT of a 1934 booklet Excellent condition 20 pages or so $2

General Electric Nickel-Cadmium Battery Application Engineering Handbook -- 1971 plus supplemental volume 1973. Just a bit of writing on the cover of the first book, otherwise very good condition. $10 both books.

GE Transistor Manual -- 7th edition 1964. Paperback. Good condition 650 pages. $5

Having Fun with Transistors by Len Buckwalter, Howard W. Sams, First Edition, First Printing, 1962. Very good condition. 127 pages. $4

Hewlett Packard Meaursement News February/March issue... somewhere in the 60's. $1

Hughes 0-5KW Power Amplifier Equipment -- June 1962. Includes block diagrams plus background on Hughes facilities & staff. Labeled "exhibit B", appears to have been part of a project proposal. 55 pages. $7

Hughes 10 KW HF Automatically Tuned Transmitter -- June 1962. Includes block diagrams plus background on Hughes facilities & staff. Labeled "exhibit B", appears to have been part of a project proposal. 63 pages. $7

Hughes 10 KW HF Transmitter -- December 1961. Includes block diagram, abbreviated schematic, some photos. 22 pages. $7

Hughes Aircraft Digital Computer Course book -- circa 1957 based on some propietary core memory system of that era. 100 or pages in a 3 ring binder plus some blueprints, $10

Hughes Aircraft -- The Hacon Story A slice of history regarding a transmitter fitted on the Convair B-58 bomber, $10

Hughes Aircraft -- Vectors -- Company newsmagazine, 20 pages, 4th Quarter 1963. -- $3

The Instrument Sketch Book -- Weston Electrical Instruments, 32 pages, © 1941. Softbound, good condition with some writing on first five or so blank facing pages that were intended for note taking in this educational piece. $10

Intel ASM86 Language Reference Manual -- 1981. $5

Low Level Measurements by Keithley. 1984, 125 pages. Softbound, excellent condition. $5

Magnetic Amplifier Circuits by Geyger, McGraw Hill, second edition, 1957. Hardbound, cover ripped at spine, previous owner(s) info inside front, insides good. 392 pages. $10

Components for Microcomputer System Design by Dave Bursky, Hayden, 1980. Large format, softbound, excellent condtion, 250 pages. $5

Most Often Needed 1926-1938 Radio Diagrams -- originally published by Supreme Publications 1941. This is a REPRINT, by Vintage Radio. 240 pages, solid schematics! Like new, $10

MOSPOWER Applications -- by Siliconix, 1985. Approx. 200 pages. Excellent condition, $40.

Motorola
•The Semiconductor Data Library Vols. 1 & 2, First edition 1972 plus Reference Vol. Third editon, 1973. $30
•Power Transistor Handbook 1960, First edition. Spiral bound. Good condition 200 pages. $10
National
•NS16000 Programmer's Reference manual, preliminary, 1982. Appx. 100 pages. $5
•The COPS Programming Manual. Early draft copy, 210 pages. Circa 1980. $5
National Bureau of Standards -- Report #5589 Facilites & Services of the Electronic Calibration Center Radio Standards Laboratory, 1958.-- $3

Navy Department -- Bureau of Aeronuatics Manufacturing Operations Section 20 booklets, 5" x 7½" totaling 2½" thick of perhaps a set of 30, detailing metal forming for aircraft

construction. A couple of the covers are loose, otherwise very good condition. Copyright 1943-44 -- $25

101 Easy Audio Projects by Brown & Kneitel, First Edition, First Printing, 1968. 168 pages. $4

102 Simple Transistor Projects by Kneitel, Seventh Printing, 1969. 120 pages. $4

Principles of Permanent Magnet Moving Coil & Movable Iron Types of Instruments -- Monograph B-7 by Weston Electrical Instrument Corp, 1933. Cover a mite worn, insides excellent. 95 pages. $20

Programming the 6502 by Rodnay Zaks, Sybex. 1978. 300 pages. $7

Radar Electronic Fundamentals T.O.16-1-195 -- US Navy Technical manual. June 1, 1944. Good Condition except for water damage on front edge; no pages stuck nor ink bleed. 474 pages. $5

Radio Collector's Guide 1921-1932 -- revised edition. Langley & McMahon, Vintage Radio. Excellent conditon. 1981. $7

Radio Fundamentals TM11-455 -- US ARMY Technical manual. 22 May 1944. Good Condition except for owner's sticker inside front cover and a little writing on title page. 333 pages. $5

RCA
•Linear Integrated Circuits & MOS Devices plus application notes, 2 book set: SSD-201 & SSD-202, 1972. About 1000 pages total. Good condition. $20
•Transistor Manual SC-13, 1967. Paperback. Good condition 540 pages. $10
•Silicon Power Circuits Manaual SP-50. 1967. Paperback. Good condition 415 pages. $10
•RC-18 Receiving Tube Manual 1956. Spine broken, no pages missing, a bit of water damage around the edges. 340 pages, $4
•RC-14 Receiving Tube Manual 1940. Front cover rough and half of spine cover missing. Insides good. 255 pages, $5
•Television DC Component by K.R. Wendt. RCA Laboratories. Library bound. 1948. $5
•Television Vol. 1, RCA Institutes, 1936. A collection of papers concerning the genesis of television. Softbound, a couple small tears at the bottom of the cover, insides in very good condition, 452 pages. $250
•Transistor Servicing Guide. 194 pages. 1968. 194 pages. $5
Servomechanisms & Regulating System Design -- by Chestnut & Mayer. Previous owners name written inside cover, otherwise excellent condition, 500 pages. 1951 -- $7

Superheterodyne Converters and IF Amplifiers by Alexander Schure. Rider. Second edition 1963. 100 pages. Very Good condition. $5

Sylvania Gold Brand 26.5 Volt Subminiature Tubes Complete data, including many curves, on this product line. 1960, Large format, softbound, 84 pages. Very Good condition. $10

Transistor Radio Servicing made easy by Lemons, Second Edition, Fourth Edition, 1968. Very good condition. 144 pages. $4

Transistors by Louis Garner Jr., 2nd edition, 1954. Coyne Publishing distributed by Howard W. Sams. 105 pages Very Good condition $4

Tuned Circuits by J.M. Quinn, 1943. Small hardcover book 52 pages. Very Good condition, one page is punched with Los Angeles Public Library ID. $4

UHF Television Antennas & Converters by Lytel, Rider, 1st ed, 1953. Very Good condition. 115 pages, $4

Understanding Transistors by Allied Radio. 1962 First Edition, first printing. Good condition 96 pages. $4

U.S. Army Satellite Communications Agency Flyer. 1963 -- $1

U.S. Naval Communication Reserve "Tickler" 40 pages of pre-war newsletter that escaped a paper drive. Cover rough, insides OK. February 1941 -- $20

Vacuum Tube Voltmeters by John F. Rider, © 1941, printed 1942, hardbound, cover a little worn, original owners name & his Pearl Harbor posting written inside front cover, otherwise good condition, 180 pages. $10

Varactor Applications by Penfield & Rafuse, MIT Press 1962. Hardbound, good condition with original paper jacket under plastic cover, owners name on frontleaf and on two edges, 620 pages. $15

Very High Frequency Techniques by Radio Research Lab Harvard University, McGraw Hill, 1947. Volume #1, hardbound, cover a little worn, insides in very good condition, owner's name on inside front cover & frontspiece, 550 pages. $10

VHF UHF Manual by Jessop. RSGB, 4th edition 1983, approx 300 pages. Softbound, excellent condition. $10

Williamson Amplifer Data Collection Two Acrosound Transformer Catalogs, copies of two Radio Electronics constuction articles from the '50's, 6550 tube data sheet, Chicago BO-13 & BO-14 transformer data sheets, Two Stancor application notes detailing Williamson amps., plus a couple loose schematics -- $10 all

All functional!!

Bird 5L Power Meter element -- for model 43 or similar meters. 5 Watts, 1.7-2.2 GHz, New -- $100

EH Research G710 -- 50 Mhz Single/Double Pulse generator 20Hz-50MHz in ten ranges, 10nS-50mS delay, 10nS-50mS width, amplitude control for complementry outputs, plus internal/external trigger in, trigger out. 8+" wide x 3+" hi x 12" deep. -- $150

EH Research G750 -- 100 Mhz Single/Double Pulse /Sq. Wave generator 6Hz-100MHz in twelve ranges, 10nS-50mS delay, 10nS-50mS width, amplitude control for complementry outputs, offset control, plus internal/external trigger in with level control, trigger out. 8+" wide x 3+" hi x 12" deep. Note: Square wave mode only above 50 MHz. -- $200

Hewlett Packard 141T Spectrum Analyzer system including mainframe, 8552B IF section, 8553B, and 8555A RF sections plus 8443A Tracking generator. All original knobs, terminators,etc. clean and working fine. With manuals (or copies thereof...) for all units. -- $2200

Hewlett Packard 204B -- Sine Wave Generator, 5hZ to 500 KHz in 5 decade ranges. Main knob needs cleaning, otherwise working fine. 110/220VAC power, less cord. -- $40

Hewlett Packard 221A -- Square Wave Generator, 1hZ to 10 MHz in 8 decade ranges, w/Symmetry control, 0-5 volts variable output into 50 ohms. 5"x3"x11" deep series 1 HP cabinet. All original knobs, clean and working fine. 110/220VAC power, less cord. -- $50

Hewlett Packard Strobline Demonstrator A rare sales tool from the late 1960's for dot matrix readouts built in a 5"x3"x11" deep series 1 HP cabinet. Complete your HP collection now! Working! 110/220VAC power, less cord. -- $100

Kepco Dual PCX 15-1.5 MAT Two 15 volt 1.5 amp max lab power supplies in a Kepco PC-4 cabinet. Individual voltage & current meters (4 total). Ten turn voltage adjusts -- $50

Lambda LMOV-3 -- Overvoltage protector. 18-70 VDC range -- $10 ea

Motorola -- M68HC705KICS K-Series In-Circuit Simulator, New in Box including software, all manuals & databook and target device. -- $75

Olektron Corp. -- Directional Coupler Model 330977-1, 2-28 MHz range. -20dB nominal coupling. Four ports and two pots. Low power rating (5W?). New -- $10 ea.

Tektronix DC503 -- Digital 100 MHz Frequency Counter/Timer module for TM500 series mainframe. $225

Tektronix DC504 -- Digital 80 MHz Frequency Counter module for TM500 series mainframe. $125

Tektronix DD501 -- Digital Delay module for TM500 series mainframe. 1-99999 counts up to 65 MHz. w/ original manual. $125

Tektronix PS502 -- Triple Power Supply for TM500 series mainframe. 5V @ 1A plus, dual adjustable tracking 10-20 volt @ 400mA. $125

Tektronix SG503 -- 250 KHz - 250 MHz Leveled Sine Wave Generator, 5 mV to 5.5V P-P output level into 50 ohms, for TM500 series mainframe w/ original manual. $300

Tektronix SW503 + DC502 option 1&7 -- 1-400 MHz Sweep Generator for TM500 series mainframe w/ original manual plus companion Digital Counter with precison time base & generator interface; $800

Olson model CB-067 -- SWR & Field Strength meter. In half of original box with instructions & short UHF-UHF cable. Screw in whip antenna is missing. Rated 1KW. UHF connectors. Little used, late 1970's vintage. $10

TEI model 28-200 -- relative power / SWR / Field strength meter -- screw in whip antenna is missing. UHF connectors. $7

Test Equipment Parts

Hewlett Packard PCB Assemblies -- $20 each unless noted
They're probably worth my asking price just for the gold!

8020 -- 1 MHz Marker Card
8020 -- 30 MHz Marker Card
Triple Marker -- 55 MHz / 59.5 MHz / 64 MHz

Scope Probes

Some New, some used & checked...

B&K PR-40 w/slip on grabber tip (electrical tape covers soldering iron burn), ground clip, data sheet & accys. -- $20

Hewlett Packard
10006D -- New in old plastic bag with accessory pack -- $40
5060-0402 -- New 5' replacement cable for HP 10001 or 10002 probes, may fit others. -- $10

Phillips PM8921-- New in old plastic bag with accessory pack -- $35

Probe Master PM2901 w/ground clip -- $20

*** RF Attenuators ***

0-35 dB stepped attenuator (5db steps) -- Side mounted female BNC connectors. Case is made from 1/8" thick aluminum. 2-3/8" diameter x 2-1/4" high. One inch long 1/4" diameter shaft. No dial nor knob. $25

6 dB low power pads with N connectors , male on one end, female on the other. Approx. 1"x1"x3" overall. 2 left. $10 ea.

6727. FS: Tubes & Sockets

Yahoo group: ham4sale (2007 — 2015)

From: Radio WC6W
Topic: 1188 Message: 6727

These are all old RCA, Sylvania, GE, Westinghouse etc.
No "Realistic", or modern imports in the group.

Nuvistors
•6CW4, 6DS4, 13CW4, 7586 NIB -- $10 ea.
•6CW4 RCA pulls, checked OK on a Tektronix curve tracer $5 ea. or 10 for $40

Sweep Tubes
•6DQ6B RCA likely NIB + GE 6DQ6B pull -- $10 both
•6JF6 NIB -- $15 pair

Victoreen GV4S-1400 Corotron, 1400 volt regulator tube. NOS $20.

Western Electric
•403B pull $4
•404A pulls $7 ea
•408A / 6028 NIB $10 ea

Low Profile Dual Triodes -- All in this group, are 1950's & early 1960's vintage US made devices and were performance verified on a Tektronix curve tracer.
•5670 RCA & GE pulls $10 ea
•6386 RCA NIB last pair, $500
•6386 GE 5 Star NOS $250
•6386 GE pull $200

Dual Triodes -- All in this group were performance verified on a Tektronix curve tracer.
•12AU7A Sylvania NIB $10 ea (2)
•12AY7 pulls $3 ea (2)
•5814A (12AU7A) RCA NIB $10 (last one)
•5814WA pulls $5 ea
•5963 (12AU7) pull $5

Collins KWM2 spare tube lot -- The little ones were mostly made by RCA, with a couple each Sylvania, GE & Raytheon -- all NIB $120
•6146W (2) Sylvania
•6AU6A
•6AZ8 (4)
•6BN8 (3)
•6CL6 (2)
•6DC6
•6EB8 (2)
•6U8A (4)
•12AT7WB/6201 (2)

2C46 Lighthouse tube pull $3
2D21 pulls $5 ea

6AK5 pulls $2 ea
6AL5 pulls $1 ea
6AL5 RCA NIB 4 for $10
6CB6 pulls $2 ea
6ER5 RCA NIB $5

15E Eimac (70 years old!) NIB $10

927 RCA $20
4637 (RCA) pull $20

5663 pull $5
5823 RCA $20
5879 NIB $7 ea
5879 pulls $3 ea

6442 pulls $5 ea
6771 Planar Triode pull $5
6977 / DM160 Mullard Indicator Tubes NIB $10 ea

7056 NIB $7
7554 Pencil tube pull $5
7843 pulls $10 ea or... 3 for $25

Tube Sockets and Accessories

---
5 pin ceramic sockets for Acorn tubes. NOS -- $5 ea

Birnbach 434 "50 watt" socket. Base is cracked clean through adjacent to opposite contacts, not noticeable from the top. Still quite useable as-is, or glue it. $8

Coaxial Planar Tube -- shielded heater/cathode contact assembly. Fits 2C39, 3CX100A5 or similar. Silver plated, NOS -- $12 each

Collins -- 22 assorted tube shields, 7 & 9 pin, short & tall. RFE. $20 all

Eimac 3" (or so) diameter Grid lead contact & 6" wire to lug as used on 3CX2500, 3CX3000, leaded versions etc. $5 pair

Johnson 122-101 ceramic 7 pin septar socket (accepts 826, 832, 4D32, PL6549, PL6569, etc). These were likely a special order as they have the standard ground shield but, no ground clips. NOS though, a bit dusty & tarnished from long storage -- $10 ea.

Johnson 122-237 ceramic 7 pin giant socket for 813, etc. NOS, $15

Johnson 122-237 ceramic 7 pin giant socket for 813, etc. Used, $10 ea.

Johnson 122-247 ceramic 7 pin septar socket (accepts 7094, 8877, 832A, etc.) Used, $10 ea.

Johnson 122-247A or 122-248 ceramic 7 pin septar socket (accepts 7094, 8877, 832A, etc.) Used, $10 ea.

National SPP-9 -- 9/16" Ceramic Plate Caps (fit 813 or similar) NOS pair -- $10

6 inch plate leads with National medium (.566") clips on one end; solder lugs on the other. The leads are covered with 16 each 5/16" diam. ceramic insulators. $10 pair.

Pomona Electronics TVS-7 & TVS-9 test extender sockets for 7 & 9 pin miniature tubes. Little used. $40 both.

4 Pin Octal outline female cable connector with hood. Used -- $3

6 Pin Octal outline female cable connector with hood. NOS -- $5

Completely shielded Amphenol Octal (8 pin) M&F pair cable connector pair. Screw on coupling. NOS -- $15

9 pin Octal outline socket, round (may be used on cable or chassis). NOS -- $7

9 pin Octal outline socket, chassis mount w/ears. NOS -- $7

11 pin Octal outline plugs. Amphenol 86-CP11 or similar. New -- $5 ea.

11 pin Octal outline plugs. Amphenol 86-CP11 or similar. Used -- $3 ea.

11 pin Octal outline sockets, round (may be used on cable or chassis). Used -- $3 ea.

11 pin Octal outline sockets, chassis mount w/ears. NOS -- $7 ea.

11 pin Octal outline sockets, chassis mount w/ears. Used -- $4 ea.

11 pin Octal outline M&F pair cable connectors with hoods. NOS -- $15

Completely shielded Amphenol 11 pin Octal outline M cable & F chassis connector pair. Screw on coupling. NOS -- $20

12 pin Octal outline plugs. Amphenol 86-CP12 NOS -- $7 ea.

12 pin Duodecar (Compactron) sockets. NOS -- $5 ea.

12 pin Duodecar Plugs. NOS -- $5 ea.

IERC Heat Dissipating tube shield, size T12. $10

6728. FS: Crystals

Yahoo group: ham4sale (2007 — 2015)

Crystal Oscillators

CTS Knights JKTO-47 970-2602 -- 1MHz ovenized oscillator also bears Collins part number: 292-0308-010. Looks like NOS, w/data sheet. Original cost was $325! now only $50

Homebrew 1 Mhz Oscillator -- built on a small piece of perfboard with an HC-6 crystal on the back. Checked and seems to run on about 15-20 volts. There are a few of these. -- $4 ea.

Quartz Crytals

Electronic Research Co. EROX160-BM5, 1 MHz ovenized crystal. 115VAC heater, octal base. Used $25.

James Knights octal base crystal ovens, 6.3V heaters. JK02 used, $5
JK09 NOS, $10

James Knights Glass octal base (tube style) crystals
Type G9 97 KHz (split electrodes) -- $10

Motorola B5490303P2 Crystal ovens, octal base $3 ea

Signal Corps octal cased Crystals -- $10 ea
DC-15A-200KC

FT-241 -- 200 KC $7 ea

US Army Signal Corps CS-137, dual compartmented crystal case, with complete set of 120, FT-243 crystals -- channels 270 (5675 kc) through channel 389 (8650 kc) inclusive in 25KHz steps; all checked good! $300

WW2 vintage US Army Signal Corps CS-137, dual compartmented crystal case that holds 120 FT-243's, less crystals -- $40

FT-243 -- 2500 KHz -- $5

Bliley AX-2 (FT-243 pin spacing) -- 14125.2 KHz -- $7

20 meter FT-243's

14051 KHz -- $10

14252, 14267, 14346 KHz-- $7 ea.

40 meter FT-243's

7000, 7006.667, 7073.33, 7075, 7100, 7150 KHz-- $10 ea.

7157.5, 7175.0, 7179.8, 7185, 7192, 7200, 7225 KHz -- $7 ea.

40 meter HC-6 / CR-18 / CR-27 -- 7159 (6 left) KHz -- $5 ea.

80 meter FT-243's

3713, 3738, 3746, 3750 -- $10 ea.

3825, 3845, 3980 (2), 3995 KHz -- $7 ea.

80 meter HC-6 / CR-18 / CR-27 -- 3566.667, 3579.545, 3932.16, 3952.3 KHz -- $5 ea.

160 meter FT-243's -- 1925, 1930, 1965 -- $10 ea.

CR-1A case -- $2 ea or $25 all

5014.5, 5047.3, 5780, 5910
6750, 6772.222, 7580, 7830, 7920, 7960
8007.69, 8050, 8205, 8307.647, 8320, 8361.54, 8380, 8386.66, 8392 (3), 8392.31, 8423.076, 8423.08 (3), 8428 (2), 8453.84, 8453.85, 8460, 8476.92, 8512.777, 8538.33, 8592.3 (2), 8870, 8950

These are originals unless noted.

Priced as shown or... $200 for all of them

Ampex
•Model 600 Tape Recorder -- $10
•Mddel 601 Tape Recorder (copy) -- $5

Army / Airforce / Navy
•AN/URM25D Signal Gen (partial copy) -- $5
•BC-314G Receiver (schematic copy only) -- $1
•BC-344D Receiver (schematic copy only) -- $1
•SCR-211 A-T plus AA-AL Frequency Meter -- $10
•Hughes HTR-12A/C HTR-13A/C Radar -- $10
•Navy Mark V Sextant (AN-05-35-22) unbound copy -- $7

Atlas -- 210/215 Owners Manual includes schematics; unbound copy, 40+ pages on 20 sheets -- $7

Concord Data Systems -- 224 Autodial Modem -- $3

Collins Radio
•32S-1 Transmitter -- $40
•520 5430 00 Vernier Tuning Knob -- $4

Cushcraft
•Ringo Antennas AR-2, AR-25, AR-220, AR-450 -- $4
•Ringo Rangers ARX-2, ARX-220, ARX-450 -- $4

Gilbert -- Model 4½ Erector Set Manual, 1950's vintage, cover a bit worn, insides fine, $10.

Görler -- UT-345 AFC / UT-343 FM Tuner -- $2

Groth -- TC2/TC3 Turn Count Dial data sheet -- $1

Heathkit
•309C RF Probe -- $3
•A-9C Audio Amplifier -- $7
•FM-3 FM Tuner -- $7
•FM-4 FM Tuner -- $7
•0-12 'Scope schematic copy -- $1
•WA-P2 Preamplifier -- $7

Hewlett Packard
•150A/AR Oscilloscope -- $5

•152 Dual Trace Amplifier -- $3
•6200A DC Power Supply -- $10
•6201B DC Power Supply -- $10
•6203B DC Power Supply -- $10
•6204B DC Power Supply -- $10
•7035B X-Y Recorder -- $15
•8740A Transmission Test Unit Operating Note 3/68, 20 pages (copy) -- $2
•10001A-D, 10002A-D, 10003A-B Probes Operating Note (specs & service info) $3

Hustler -- 4-BTV Trap Vertical -- $2

Hy-Gain
•204BA 4 Element, 20 Meter beam manual. Partial original/copy from 2 manuals. Includes dimensions & SWR graphs -- $3
•TH3 (copy) $2

Jennings -- Type RC5, RC6, RC10, RC21E, RC21G, RC40 data sheets -- $3 all

Magnecord
•M-30 Tape Recorder + Sams manual -- $7
•PT6-AH Schematic (blueprint) -- $2

Motorola
•Motran (136-174 MHz) FM transceiver manual, 68P81043A45C $10
•Motran (150.8-174 MHz) FM transceiver service manual (copy) 68P81041A15 -- $5
•Model X53GJV-1091A Two-Way FM Radio (160-174 MHz) service manual (copy) -- $5
•NU178-A Microphone (copy) -- $1
•M68HC04EVM Evaluation Module User's Manual -- $10

National Radio
•FBX & FBX-A Receiver Alignment instructions (copy - 8 pages) -- $2
•SW-3 Receiver (copy - 12 pages) -- $2

Pilot Super Wasp -- Data Sheet #7 K-100 Battery Type kit assembly & operation manual (copy) -- $2

Polaroid -- Land Camera Model 360 User's Manual -- $3

QUME -- Laser TEN/LaserTENPLUS Maintenance manual NISW (new in shrink wrap) -- $7

Radio Shack
•CT-101 Cell Phone Owners Manual -- $1
•SA-10 Stereo Amplifier -- $1
•21-1167A Ceramic Mike -- $1
•TRC-83 CB Walkie Talkie -- $1

RCA
•Pressure Microphone Type 88-A -- $3
•5-E 5KW AM Broadcast Xmtr -- $15

Sabotronics -- 2000 DMM -- $2

Signal One -- CX7A (partial copy -- schematics mostly) -- $3

Sony
•BVU-50 Videocassette Recorder Operation & Maint. Manual -- $20
•VO-2850 Service Manual -- $20
•VO-2860 Service Manual -- $25

Teac
•MV-550 VCR Service Manual -- $5
•MV-800 VCR Owners Manual -- $1

Tektronix
•2432 Digital Oscilloscope User Reference Guide New! (small) -- $15
•P6006 Probe -- $5
•P6047 Probe -- $7
•P6201 Probe -- $10
•FG503 Function Generator -- $15
•PS503 Power Supply -- $15
•PS503A Power Supply (back cover missing) -- $10
•TG501 Time Mark Generator. Comb bound copy -- $10

TELEX Hy-gain -- BN-86 Balun -- $2

Texas Instruments
•SR-52 Calculator Operating manual -- $5
•TI-83 Plus Calculator Guidebook -- $7
•TI-89 Titanium Calculator Guidebook -- $10

Van Gordon Engineering -- SD-80 Dipole Antenna Manual (copy) -- $1

W2AU -- Balun Instructions -- $1

Xerox -- D-25 Printer Users Manual -- $2

Yaesu -- FT-101E / FT101 ES (in Japanese) -- $5

6732. FS: Panel Meters

Yahoo group: ham4sale (2007 — 2015)
Date: 2011-11-01 17:20:28 UTC
From: Radio WC6W
Topic: 3010 Message: 6732

Pictures of many of these may be seen at:

http://qsl.net/wc6w/wc6wfsw/index.html?fr32.html

Time Meters

Hobbs 120 VAC 60Hz 99999.99 (Yes, displays down to 100th's!) Hour running time meters about 1" high by 2" wide rectangular with triangular shaped mounting ears. New $20 ea

A.W. Haydon miniature 10000 Hour running time meter. Case is about 1/2"square (exclsive of mounting flange) by 1" deep. 115VAC 400Hz NOS $10

Elgin 1000 Hour running time meter. Case is about 5/8" round by 1.5" deep. 115VAC 400Hz Unused $8

RF Ammeters -- Thermocouple type

GE DW-52, 100 mA, 2-1/2" round, with external thermocouple -- New in box, $30

GE DW-52, 2 Amp, 2-1/2" round -- little used, $15

Westinghouse OT-33, 3 Amp, 2-1/2" round -- used, $15

Westinghouse NT-33, 5 Amp, 2-1/2" round -- used, $15

Westinghouse NT-33, .25 Amp movement - 5 amp scale, 2-1/2" round -- used, $30 pair

Weston Model 507, 3 Amp, 2-1/2" round -- used, $15

Weston Model 507, 4 Amp, 2-1/2" round -- used, $15

Digital Meters

Datel
DM-3100N 3.5 Digit LED volt meter w/ 1/2" high LED's. Front bezel is 1.25" high x 2.875" wide. Meter is 4" deep.
Used, checked OK. $20 ea.
New in Box. $35 ea.

Integra Microwave
A210305 4.5 Digit LED volt meter w/ .3" high LED's. Front bezel is 1.25" high x 2.875" wide. Meter is 4" deep. RFE $20 ea

Non-Linear Systems
PM4 10 volt 4.5 Digit LED volt meter w/ .3" high LED's. Front bezel is .9" high x 2.875" wide. Meter is 3-3/4" deep including PCB edge connector. RFE $20

Cole Instrument Meters

Center zero, 3" square panel meter, 10-0-10 microamp scale & movement. Two available. -- $25 ea

---

General Electric Meters

** NEW in box -- $15 ea **

251-1 -- 2.25" center zero rectangular panel meter 10-0-10 Volt scale & movement. Two available.

251-1 -- 2.25" center zero rectangular panel meter 5-0-5 Volt scale & movement.

Part no. 50-283013MTMT1 3" thin edgewise panel meter 10V scale. New in an old box

** Used -- $10 ea **

DW-91 -- 2.5" center zero square panel meter 1-0-1 Amp scale & movement.

50-162111LALA2 -- 3.5" square panel meter, 10 Amp scale & movement. 2 available

DO-41 -- 3.5" round panel meter, 1 Milliamp scale & movement.

Hewlett Packard

DBM meter HP part number 1120-0037. This unit was actually made by Simpson -- -6 to +3 scale, 2+" round. NOS -- $15

5060-6015 4½" rectangular meter with mirrored scale, 1 ma movement, 0-1, 0-3, -10dbm-0, scales. I believe this is from a 432A, 435A, 437A or similar power meter. RFE -- $15

Simpson Meters

** NEW in box -- $20 ea **

Model 1212-- approx 1.75" square front, 1.5" mounting hole -- 3 Amps DC

Model 1247 -- approx 2.5" square front, 2.17" mounting hole -- 50 Volts AC

Model 1257-- approx 2.5" square front, 2.17" mounting hole -- 10 Volts AC

** Used -- $10 ea **

Model 1227 -- approx 2.5" square front, 2.17" mounting hole -- 30 Volts DC

Model 1327 -- approx 3.25" square front, 2.75" mounting hole -- 2 Amps DC

Model 1521 -- 1.5" edgewise panel meter 1 Milliampere movement -- scale is marked "M" at the left, "O" in the center and "S" on the right.

Triplett Meters

** Used -- $10 ea **

327-T 10 Amps 3" square. 2 available

220G 50 Volts DC 2-3/4" rectangular

Westinghouse Meters

3" Round NX-35 series meters

New Old Stock -- $20 ea

50 mA
500 mA
2.5kV scale / 1 mA movement

Used -- $15 ea

2 Amps
300 VDC

Used -- $10 ea

1 mA
15 VDC
20 VAC

3" Square RX-35 series meters

Ohms -- Marked from 500 to 0 left to right. 70 uA intrinsic movement.
1 mA / 10 mA Dual input terminals / Dual scale markings
300 mA

2" Round NX-33 series meters:

5 Milliamperes, with additional mark at 3 tick for 3 volts

Weston Meters

** NEW in box -- $20 ea **

Model 7522 -- 2+" x 2-3/8" rectangular front, 300 Volts AC

** Used **

Model 301 3" square 3A RF Ammeter (requires an external thermocouple which I don't have). 60 mA movement.-- $5

Model 301 3" round 5 Amp scale, 16 mA movement -- $10

New Meters -- $20 ea

Alps Keiki SU-55 series 3.4" x 2.4" rectangular NIB

15V DC
3A DC

Lambda 1.75" square

10A scale (made by Honeywell)
40 VDC (made by GE)

Japanese meters

No manufacturer shown
MRA-38 500uA DC 1.7" square used -- $6
MRA-38 500uA DC 1.7" square new -- $10

KEW Electric dual scale 32V / 1.5A meter (1mA movement) 1.9 x 1.6 rectangular -- Used $5

No manufacturer shown -- Small (1-3/16" wide x 9/16 hi" -- rear a mite larger) lighted, edgewise S / Power meters, NOS -- $7 each

No manufacturer shown -- Small (1-7/8" wide x 15/16 hi" -- rear a mite smaller) lighted, edgewise S / Power meters, NOS -- $8 each

No manufacturer shown -- Small (11/16" x 1 3/16") poorly designed vertical edgewise S meters, unshielded, orientation sensitive, one new & one used. -- $5 both.

General Radiotelephone Co. -- Small (1-11/16 square) lighted, S meter plus 0-5 & 0-10 scales, bezel a bit scratched & a small crack in the lower right -- $3

No manufacturer shown. -- 2-1/2" square S meter plus 1-10 scale, NOS --$10

No manufacturer shown -- Small (1-3/8" wide x 1-1/4" hi") VU meters. Scale is on lower portion of meter / movement on top. NOS -- $6 each

•11720A Pulse Modulator Technical Data 9/80 -- $2

Hughes Aircraft
•Components Catalog #3. August 1965 -- $7
•Components Catalog #5. September 1969 -- $7
•Electronic Purchased Parts Catalog. January 1976 -- $7

Hustler
•1979 Amateur & Commercial Antennas Catalog -- $1
•1980 Amateur & Professional Antennas Catalog -- $1

Hycon -- Crystal Filter Catalog, 1957 -- $5

Hy-Gain -- 1977 Amateur Antenna Price List -- $1

International Crystal Catalog. Includes a description of their MC-24 microwave oven! Very good condition. 1970. $7

J.J. Glass -- Catalog no. 135. This was a Surplus outlet in downtown LA in the 1960's. Excellent condition. 32 pages. $10

EF Johnson
•Electronic products catalog #978. No date but, looks like late 1950's. Good condition, previous owners name written on front, 20 pages. $15
•Radio Transmitting Equipment catalog #967. No date but, text suggests wartime publication. Fair condition, 8 pages. $15

Magnecord
•Parts/Price list (1966) -- $3
•Parts/Price list (1971) -- $3

J.W. Miller -- Catalog #60, front & back cover loose, otherwise in good condtion. 43 pages, 1960. $10

Mini-Products, Inc. -- Minature Transmitting Antenna catalog -- $5

Mosley
•A-203-C Flyer -- $1
•A-310, A-315, A-320 Flyer -- $1
•TA-20-40 Flyer -- $1
•Cubical Quads Flyer -- $2
•1963 Antennas & Accessories Price List -- $2
•1967 Amateur Price Sheet -- $2
•Amateur Antennas catalog no. H-174 -- $7

Newark Electronics
•Catalog #75 1964 -- corner damaged covers & the first few pages -- $10
•Catalog #110 1988 -- $10
•Catalog #113 1994 -- $10

Phelps Dodge Communications
•Antenna Systems catalog 176 & price list. 1976 -- $3
•Antenna Systems short form catalog 877, 1977 -- $1

Radio Mfg. Engineers -- RME-99 Receiver flyer -- $2

Roberts -- Two sided flyer listing all? their tape recorders & accessories including prices, 1966 -- $5

Taylor Tubes -- T-55 data sheet, a bit rough -- $1

Tektronix Test Equipment Catalogs
•1997/1998 -- $7
•1998/1999 -- $7
•2000 -- $7

Telrex Catalog PL-77 plus catalog CT-3, bulletin BA-3 & Big Bertha bulletin. All copyright 1962 -- $10 all

TET Antenna Systems Short Form Catalog -- $3

Thordarson Transformer -- catalog #400-C Fall-Winter/1938-39. Fair condition. 24 pages. Plus poor condition catalog #400 A (cover separated/back page or two missing) -- $15 both

Tri-Ex Towers Guyed Crank-Up & Self Supporting Crank-Up Towers. Two Catalogs. Guessing 1960's era from the prices -- $3

Universal Electronic Supply -- Catalog no. 132. December 1964. This was a New/Surplus outlet in downtown LA in the 1960's. Excellent condition. 32 pages. $7

6735. FOR SALE: PALSTAR AT AUTO 1500 WATT AUTOMATIC ANTENNA TUNER

Yahoo group: ham4sale (2007 — 2015)
Date: 2011-11-02 01:57:32 UTC
From: n3dg
Topic: 6735 Message: 6735

Palstar AT AUTO Automatic Antenna Tuner supports 160-6 Meters Continuously at up to 1500 Watts key-down, Coaxial Cable, Single Wire and Ladder Lines, both Balanced and Unbalanced Feed Lines, and automaticlly matches almost any antenna to practically 1:1 SWR by Frequency Tracking your transceiver and/or RF Sensing any transceiver/transmitter with Fast, Quiet Stepper Motors controlling the Heavy-Duty Motorized Capacitor and Roller Inductor. As a Very Limited Edition unique device and soon to be collectors item, Palstar AT AUTO is the only high power automatic antenna tuner that has automatic frequency tracking, following your transceiver wherever it goes from 160-6 meters and even in between. Even the new Palstar HF AUTO does not Automatically Frequency Track. A Dual Backlit Analog Meter displays Forward/Reverse Power & SWR as well as an LCD Display shows SWR and operating conditions at all times. You can have the Palstar AT AUTO in Automatic Mode to automatically ensure lowest SWR wherever you go, or manually tune if you wish, or Bypass the tuner when you desire, all with a convenient front panel switch. Also included is a 4:1 Balun so you can tune open-wire and ladder-line antennas does not even come with the new Palstar HF AUTO.

The advantages of the Palstar AT AUTO over the Palstar HF AUTO are:
☐ Automatic Frequency Tracking
☐ Dual Analog Power/SWR Meter (as well as digital SWR)
☐ 4:1 Balun

She is in Mint Condition from an estate, rarely used as the owner had a SteppIR antenna that did not require a tuner.
Package includes: Palstar AT AUTO with latest Palstar Version 2.11 Firmware, Power Cable, Original Manual, Palstar Packaging and Carton.
$895 plus shipping, will include the optional Yaesu 6' CAT Interface Cable for $25.

From: John Murphy
Topic: 6740 Message: 6740

Hi all, recently at a hamfest, I acquired a Simpson Model 467 Digital Multimeter for $10.00. However it did not come with test leads. I am guessing, looking at the connectors where the leads plug into, it needs some special connectors. Anyone have a pair (or just the connectors) that would fit? I have looked online and have found them for a low, low, low price (but wait there□s more) (LOL Love those infomercials) for $23.+, however, I was hoping someone had something in their junkbox that may fit. Thanks for looking.

New Coax Connectors

These are all vintage NOS made in USA parts. No 3rd Millennium imported junk!!

Amphenol MHV connectors
Two 28100 right angle cable males & two 27025 panel mount females. -- $40 all.

Amp N Female Cable crimp style connectors, part no.: 225664-2 -- $2 ea.

Amphenol UG-30C/U N Female-Female Bulkhead Connector -- $10 ea

UG-88/U BNC Male cable connector for RG-58 -- $2 ea

Amphenol UG-201 Male N - Female BNC adapter -- $10 ea

UG-260/U BNC Male cable connector for RG-59, RG-62, etc. -- $4 ea

UG-536 B/U N Male cable connector for RG-58 size cable -- $6 ea

UG-560/U HN Female panel mount connector -- $15 ea

UG-625 B/U BNC Female panel mount connector -- $2 ea

UG-657 U Sealed BNC Female panel mount connector -- $3 ea

UG-692/U SM Female Cable connector -- $10 ea

UG-932 A/U MHV Male Cable connectors -- $10 ea

UG-961 A/U MHV Female Panel connector -- $12

Automatic / Cannon SM Right Angle Female Cable connector -- $10 ea

Kings KH-39-11 HN Female Cable connector -- $20

F-81 F-female/F-female barrel connector -- 3/1$

Amp 2-321444-1 BNC Male Cable connector -- $2 ea

Below are all new crimp on connectors, with all hardware, in individual plastic bags; late 80's to early-mid 1990's date codes. I believe that they are all for RG-59 size cable. -- $1 ea

Kings Electronics

KC-59-642-M06 BNC Cable Males
KA-59-385-M06 TNC Cable Males
KA-19-43 TNC Bulkhead Females

Amphenol 558-86 BNC Cable Males

Amp 2-329064-1 BNC Cable Males

Used Coax Connectors

These are used, fairly clean, mostly vintage Amphenol parts; Quantities up to 20 are available for some of these.

UG-27/U N Right Angle -- $2.50 ea or 5/$10
UG-57B/U N Male-Male connector -- $4 ea
UG-107B/U N F-M-F Tee connector -- $5 ea

UG-131/U N Female to SKL Female -- $5 ea
UG-175/U RG58 Adapter for PL259 -- 5 for $2
UG-201 Male N - Female BNC adapter -- $5 ea
UG-255/U UHF female - BNC male adapters -- $2.50 ea 5/$10
UG-259A/U - 91836 -- LC female to HN female bulkhead adapter -- $30

UG-273/U UHF male - BNC female adapters -- $2.50 ea 5/$10
UG-309/U Male HN to BNC female adapter -- $10 ea
UG-413/U HN F-F-F Tee connector -- $15 ea
UG-496/U HN female panel connector, a bit tarnished -- $7 ea

UG-565A/U Male C to N Female adapter-- $15 ea
UG-625/U BNC Female panel mount connector -- $1 ea

Polarized variant (male center pin) of UG-931/U MHV female panel mount connector -- $10 ea

M-358 --UHF F-M-F Tee connector -- $3 ea
Unbranded N Female - BNC male adapters -- $3 ea

SMA Female-Female Bulkhead (barrel with a flange) connector -- $1 ea
SMA Female-Female Sealed Bulkhead (barrel with a flange) connector, gold plated -- $3 ea

N Female Chassis Mount connectors with gold (plated/flashed) PC style. The center pin (extends about 1/8" back from the insulator) -- $1ea

C Triax Female Polarized variant (male center pin) - TPS female w/Isolated shield Sealed Bulkhead (barrel with a flange) connector -- $25

More Connectors

Amphenol Ultramite Connectors -- 48-06C10-5S6 & 48-00R10-5P6, 5 pin miniature, mating panel and cable connector. NOS -- $10

Amphenol MS connectors -- 3 pairs MS20-1 14 pin military style connectors 3 male panel connectors + 3 female cable connectors with shells (two straight, one 90 degree); some new, some used but clean. $10 all

Amphenol MS connector pair 28-15 size -- 35 pin chassis mount female plus male cable connector. NOS -- $20

4 Pin Octal size female cable connector with hood. Used -- $3

6 Pin Octal size female cable connector with hood. NOS -- $5

Completely shielded Amphenol Octal M&F pair cable connector pair. Screw on coupling. NOS -- $20

9 pin Octal size Plugs with hoods. NOS -- $7 ea.

11 pin Octal size Plugs. Amphenol 86-CP11 or similar. New -- $5 ea.

11 pin Octal size Plugs. Amphenol 86-CP11 or similar. Used -- $3 ea.

11 pin Octal size sockets, round (may be used on cable or chassis). Used -- $3 ea.

11 pin Octal size sockets, chassis mount w/ears. NOS -- $7 ea

11 pin Octal size M&F pair cable connectors with hoods. NOS -- $15

Completely shielded Amphenol 11 pin Octal size M cable & F chassis connector pair. Screw on coupling. NOS -- $25

12 pin Octal outline plugs. Amphenol 86-CP12 NOS -- $7 ea.

12 pin Duodecar (Compactron) sockets. NOS -- $5 ea.

12 pin Duodecar Plugs. NOS -- $5 ea.

AMP 837043 LGH 20 KV Bulkhead connector with one 833807-3 cable cut short to 4" -- RFE, $10

Bendix / Amphenol 10 conductor 6' (unstretched) coily cable assembly -- 18-1S, 10 pin female Mil-C-5015 connectors on each end -- Used, $20

Motorola 1-80754A94AD Connector kit. Looks like a PL-259 w/a UG175 reducer plus some mounting rings (1-1/4" diam.) for an antenna. NIB. $5

PJ-055B & similar 1/4" phone plugs, 10 pieces, used. $10 all.

Reynolds 167-3517 -- 20KV sealed male panel connector. Complete data here -- NOS, $20

Mostly like new. Probably can't order much from these but,
they may be useful to service a 2nd Millennium relic

Your choice at $9 per pound including US Postal media rate shipping
or...
$1100 including shipping (CONUS) for all of them

I, too, would like to find a lower-priced source for these test leads.
I have a 260 series 7 that uses them--bought it at a yard sale for
$5.00. You would think with all the Simpson meters in the world,
somebody would stock reasonably priced accessories for them. Also need
the big 2A fuse that goes in it. (Right now it has crumpled up aluminum
foil where the fuse should be.) Suggestions appreciated.

In Ref to the ones who were looking for good Quality Test Leads at a reasonable Price

I hate to Post a You know link But I want to share the info for some Great Test Cables with adapters Brand New made for the Military and as You know They got the best We paid for them , I have two sets they are for My 260 and others Nice Rubber

Check them out http://tinyurl.com/3f7w68o

I think that area is a Military Base I got mine 2 Yrs ago He is still selling them

/snip/

I was looking for meter leads for a Sumpson 260 series 7, which I think
are the same ones the OP was looking for. These military leads that
fit Fluke and Tripplett probably do NOT have the right connectors for
the Simpson equipment. If you know otherwise, please let me know.

Vacuum Capacitors & other Vacuum things

Jennings Vacuum Variables -- all used (or at least aged)

CVEP-1000 1000pF 20KV -- $250 with standard puller (My Hipot only goes to 15KV so that is the max. I could test this one)

Collins 622-0193-001 low profile motor drive assembly with limit switches for a Jennings CMV1-4000 vacuum cap. $40

Fixed vacuum caps

Jennings VC-12 12pF 20KV -- $20
Jennings 50pF 86KV -- $86

Vacuum Switch & Relay
Struthers Dunn Type 78CCA109 "Keying Relay" which consists of a vacuum relay mounted on top of a small (2"x3"x4") metal enclosure. There is a 15 pin Jones connector on the side of the box. I believe that there are some auxiliary contacts in the box in addition to the vacuum relay. 28VDC. $20

Jennings R1G SPST 20KV 20Amp Vacuum Switch; no solenoid -- $25

Air Variable Capacitors

Bud -- Two Section variable capacitor, 75pF (measured) per section max. Balanced rotor construction. .025" air gap, approx. 4" x 1¾" x 1¾" overall. Used, good condition -- $15

Cardwell -- EU-140-AU, Two section variable cap., 140pF / section, .020 air gap, 1-7/16" square by 4½" deep, ¼" dia. shaft. NOS -- $20

Cardwell -- XR-1000HS (about 950pF max measured) These have slightly contoured plates for improved tuning resolution at minimum C. .030 air gap. About 4½" x 4" x 3½" overall including plate travel. Used, Good condition. $20 ea.

Cardwell -- 30-900pF (measured) (XR-900PS? -- 4 fewer plates than an XR-1000) .030 air gap. About 4½" x 4" x 3½" overall including plate travel and mounting ears. Used, Good condition. Last one, $20

Cardwell -- Differential capacitor 30-600pF (measured) each side .030 air gap. About 4" x 3½" x 3" overall; Used, Excellent condition. Just one, $30

General Electric -- Two Section capacitor, 150pF (measured) per section max. Balanced rotor construction. .040" air gap, approx. 6" x 2" x 2" overall. Used, good condition -- $20

Hammurlund -- MC-100S with two fixed plates and 3 variable plates removed to make a 70pF maximum part. Used. $2

Hammurlund -- Type RMC (I think) with 3-1 reduction drive. 60pF max. (measured). Approx. 1¾" x 1¾" x 3" long overall including shaft. Used. $5

Johnson-- T9-5 miniature vertical PC mount trimmers 1.9-15.7 pF, Silver Plated machined plates -- NOS $1 ea.

National -- Type TMC-300, 300pF variable capacitor, .070" air gap, approx. 8" x 4" x 2½" with plates closed including shaft. Nice n' shiny like new! -- $40

National -- Type 30D, 30pF Dual variable capacitor, approx. 3" x 2½" x 4" overall including shaft. Used, good condition. $10

OAK 22641, Four Section capacitor, 20-550 pF (measured) per section large receiving style capacitor. .010 air gap. 6½" x 3½" x 3" overall. ¼" diameter shaft. Counter-Clockwise rotation for capacity increase. NOS $30

Poly varicon -- 4 Section miniature capacitor. 35pF / 35pF / 100pF / 160pF measured max. with trimmers for each section. Approx. 7/8" x 7/8" x 1" deep overall. NOS $5 ea or 5 for $20.

TRW 15-90pF (measured) Air Variable, .060 gap, ball bearing shaft, very stoutly built -- $20

4 Section capacitor 20-250 pF (measured) per section large receiving style capacitor. .020 air gap. 5½" x 3½" x 3"(open rotor) overall. 3/8" diameter shaft. Counter-clockwise rotation for capacity increase. A mite tarnished from age; Otherwise, like new. Two available. $20

4 Section capacitor 20-550 pF (measured) per section large receiving style capacitor. .010 air gap. 7" x 3½" x 3"(open rotor) overall. ¼" diameter shaft. Clockwise rotation for capacity increase. A mite tarnished from age; Otherwise, like new. $25

5 Section capacitor 400 pF (measured) per section large receiving style capacitor with individually insulated rotor and stator sections. .010 air gap. 6" x 3¼" x 2¾" overall. 3/8" diameter shaft. Clockwise rotation for capacity increase. Used, just mite tarnished from age; $40

Mica & Ceramic caps

Centralab 857-25Z Ceramic 25pF NPO 15,000 volts. NIB $20.

850 Series Ceramics
47pF N750 -- not sure if these are 5 or 7.5 KV rated -- $5 ea

Used old "Brown" Micas
Aerovox, Cornell Dubilier, Polymet, Sangamo, Solar, Sprague -- CM45 style or similar -- $2 ea or $30 all

AC-DC Electornics model RS5N30-1. 5V @ 30A switching power supply with remote sense terminals, screwdriver voltage adjust, 6" x 2.5" x 10". Used -- $30 ea. (3 units available)

International Instrumentation
Model PUP-200. 200W computer style UPS. Off white case measures 15" x 8" x 6" high. Requires 24V worth of lead acid batteries, not included. 18 lbs. shipping wgt. $20

Lambda LM B0-60 -- 0-60V, .45A Linear Power supply with remote sense terminals, screwdriver voltage adjust, 5" x 3" x 7". Used -- $20

NPC
Model 12-115. 12VDC - 115 VAC 200W Square Wave inverter. Blackcase w/ gold anodized front panel measures 7" x 7" x 5" high. 10 lbs.shipping wgt. Used -- $20

Onan
3-70455-0000 -- Triple Output Switching Power supply: 5V @50A, 12V@7A, -12V@5.25A on 3x16 pin connector- 120/240V AC in via IEC connector, plus switched AC output, fully enclosed 16" x 8.5" x 4" w/ internal fan, RFE -- $30

Power General
Model 1035-2 -- 12V, 3A, Switching Power supply, uncased PCB, 5" x 3" x 2" -- NOS -- $15

Model 3050-1 -- 5V@6A , 12V@1A & -12V@1A, Switching Power supply, uncased PCB, 5" x 4" x 2" -- NOS -- $15 ea (4 available)

Model 3056-6 -- 5V@6A & 12V@3A, Switching Power supply, uncased PCB, 5" x 4"x 1.5" -- NOS $20

Sierracin
5C12A -- 12V (5 Amp?) Switching Power supply with remote sense terminals -- open frame 5"x8.5" x2". Used -- $15 ea (2 available)

Sony BVW series Power Supplies
•UR-06 Part No. 1-413-119-13 -- $100
•UR-07 Part No. 1-413-120-12 -- $100
•UR-09 Part No. 1-413-166-11 -- $200

ATT DSP 16 Application Note collection: DTMF Receiver, CCITT Coder, ADPCM Transcoder, Noise Generators, Disk Servo Controller. Like new. $7 all

ATT DSP 32 Application Note collection: DTMF Receiver, Linear Prediction DTMF ReceiverDSP Calculator, Code Generator, Digital Filters, Kalman Filters. Like new. $7 all

The Contact Modulator -- 8 booklet series by the Engineering Staff of Airpax with more than anyone ever needed to know about choppers. About 30 pages per booklet. Very good condition 1958-1960 -- $50

General Electric Nickel-Cadmium Battery Application Engineering Handbook -- 1971 plus supplemental volume 1973. Just a bit of writing on the cover of the first book, otherwise very good condition. $10 both books.

Motorola
•APR2/D Digital Stereo 10 Band Graphic Equalizer using the DSP56001 -- $5
•APR12/D Twin CODEC Expansion Board for the DSP56000 Application Development System -- $3
•Echelon Neuron Chip Application Notes: EB146/D, EB147/D, EB148/D, EB149/D, EB150/D, EB151/D, EB152/D, EB153/D, EB155/D, EB157/D, EB159/D, EB160/D & EB161/D $10 all.
•RF Amplifier Application Notes: AN-593, AN-749, AN-758, AN-791, AN1033, AN1034, AR164, & 176. $5 all.
RCA Linear Integrated Circuits & MOS Devices plus application notes, 2 book set: SSD-201 & SSD-202, 1972. About 1000 pages total. Good condition. $20

Sharp LH9124 Application Note collection: Fast Fourier Transform, DFT Filter Bank, Time Domain Convolution, Medical Tomograpy Imaging, Multichannel Echo Cancellation, Spectral Analysis, Image Correlation, Image Compression, 2-D TimeDomain Convolution, Fast Convolution, Constant False Alarm Rate Analysis. Like new. $7 all

TMS320 DSP Designer's Notebook -- by Texas Instruments -- Notes 1-81 inclusive plus index, 1992 - 1996. Loose sheets. $10

Williamson Amplifer Data Collection Two Acrosound Transformer Catalogs, copies of two Radio Electronics constuction articles from the '50's, 6550 tube data sheet, Chicago BO-13 & BO-14 transformer data sheets, Two Stancor application notes detailing Williamson amps., plus a couple loose schematics -- $10 all

Hi all, I am the original poster for this subject. I had found the test leads on Ebay, but waited to see what, if anything, anyone else would come up with. I thank you all for your suggestions, however none of them matched the Simpson Model 467. Someone had posted the exact link to eBay of the one□s I bought, so I went ahead and purchased them tonight. Again thank you everyone for the various suggestions

/snip/

I was looking for meter leads for a Sumpson 260 series 7, which I think
are the same ones the OP was looking for. These military leads that
fit Fluke and Tripplett probably do NOT have the right connectors for
the Simpson equipment. If you know otherwise, please let me know.

From: Radio WC6W
Topic: 6158 Message: 6757

Waters Universal Hybrid Coupler II -- Model 3002 w/compressor. A fancy phone patch styled to match the Collins S-line. This one is like new in the original box w/ original manual. There are just a couple of hairline scratches on the sides, the front is unblemished. The 1968 price was $72.50, now asking $100 in highly depreciated money! :-)

6758. Trade for FT-817

Yahoo group: ham4sale (2007 — 2015)
Date: 2011-11-07 17:52:53 UTC
From: VE3FAL-Fred
Topic: 6758 Message: 6758

Gang:

Looking at my EMCOMM go kits and what I am using and not using I have decided to trade my K1 and Index Labs QRP rig for a FT-817.
The K1 is set up for 80 and 40 , no tuner option in it, has wood side panels and wooden tuner dimple plate. I have another 2 band board that needs to be built to give a few other bands with the rig. This unit is a 9.7/10, I also have an Index Labs QRP rig with microphone, this unit works well as well and have used it on both cw and SSB.

Will part with both for a FT-817 if someone wants to play with something new(newish) to some.

Please email me directly...

6760. DX-100 Knobs

Yahoo group: ham4sale (2007 — 2015)
Date: 2011-11-08 05:40:09 UTC
From: Pigman
Topic: 6760 Message: 6760

I have a basket case DX-100. I need one DX-100 red center knob and one gray knob which is concentric to the small red knob. (Such as the VFO/Crystals knobs). Is there soemone on here who could sell me these?
(I am slowly finding parts to totally rebuild a super basket case DX-100 a friend gave me, but this will be a long time project). (I plan to build it up as a new kit after having the chassis replated and making up a new wiring harness).

I mentioned this before, but if there is someone close bye to Houston with a DX-100, not a total basket case, I could restore? I'd like to discuss a purchase with you. I'm looking for a transmitter I could restore in a fairly short period of time unlike my basket case DX-100 restoration.

Thanks,

Lee, w0vt
Houston, Texas

6761. FT-857 For Sale

Yahoo group: ham4sale (2007 — 2015)
Date: 2011-11-09 22:51:26 UTC
From: kc4vg
Topic: 6761 Message: 6761

I have a Yaesu FT-857 (non D) in good condition for sale.
Options installed include:
- DSP-2 Digital Signal Processing Unit
- 2.3 kHz Collins SSB Filter
- TCXO High Stability Reference Oscillator

$600 shipped CONUS priority and insured mail. USPS money order only. No Checks. No PayPal.

6762. FS: Military VHF Amplifier

Yahoo group: ham4sale (2007 — 2015)
Date: 2011-11-09 17:35:11 UTC
From: Radio WC6W
Topic: 6160 Message: 6762

VHF Amplifier -- Late '70's vintage likely Military, probably airborne, VHF power amplifier assembly. It consists of 7 almost identical amplifier assemblies clustered around a central housing that has splitter combiner networks which are plugged onto each end with a bunch of SMB connectors. There are TNC's for the main in's & outs. I think it was originally configured as one amp, driving two, driving four boards. The complete assembly measures 7.5" x 5" x 3.5" overall -- the individual RF amp boards are 4.5" by 2". The outer covers are mostly missing. Each amplifier is a push pull design -- they appear to be 50 ohm in & out impedance with either PT6747 or PT6702 TRW transistors. I would guess this unit operates on 28VDC. I don't know what frequency range it covers nor the power level though, just guessing, it probably puts out at least 100W. And there is no manufacturer name -- probably went with the outer cover. Six of the modules are marked OK and one, the input stage I think, is marked NO Good. The individual amps have integral heat sink plates so, they could be removed from the assembly and used separately. Think of it as 7 amplifier boards @ $10 ea -- Bare PCB's would cost as much! -- $75

6763. Aerial filters FS

Yahoo group: ham4sale (2007 — 2015)
Date: 2011-11-09 20:07:17 UTC
From: BenG4BXD
Topic: 6763 Message: 6763

Antenna filters.

One with cutoff at 35Mhz,
one with cutoff at 85Mhz.

Scan is 0-100Mhz, left is HF filter (ignore blip at 65Mhz), right is
80MHz filter.
scan of filters responses: www.qsl.net/g4bxd/filter2.jpg

Ideal for antenna's etc. Connectors are odd so best changed to 239 or
such. £10 each.

Ben.

Looking for an Eagle RF Bridge to put on an IFR to use in Cable Fault mode (actually want 2!).Would prefer one that covers MW (500kHz) to 1GHz if possible.

But would consider one that covers up t UHF (500MHz) only.

Please contact me in direct email if you have one.

Thanks!

Chris

6768. NOS National Radio Dial FS

Yahoo group: ham4sale (2007 — 2015)
Date: 2011-11-10 20:09:14 UTC
From: W4RON@carolina.rr.com
Topic: 6768 Message: 6768

I was cleaning in my work shop this morning and I ran
across a National Radio dial that I've had for many
years. I've been meaning to get it out and see if anyone
could use it in a National radio that their restoring.

I have no idea for sure what radio is goes
on, it sorta reminds me of a Sky Buddy dial...

It is MINT original in the original box with the original
national tissue wrapping paper.

You can see lots of close up photos of it here;
http://radioheaven.homestead.com/National-Dial.html

It can be yours for the nominal price of $20 plus
Priority Mail postage.

From: Daniel Hileman
Topic: 6769 Message: 6769

Hi Everyone,

I offer for sale a Heathkit SB-220 Amplifier. Pretty much rebuilt from the ground up. Newly painted Chassis, New faceplate, NOS Tubes with about 20hr on them. Harbach mods! I have an original Manual for it, plus receipts and info on the mods done. This is a GREAT amp! But, I am saving up for a Flex-3000. LOOKS awesome! Pics available. Just email me off list. Asking $750 it, Local Pick-up in the Dallas area, I can not ship this beast!

Thanks and 73,
Daniel N9WX

6770. Japanese 903 to 905 CB Radios

Yahoo group: ham4sale (2007 — 2015)
Date: 2011-11-11 00:16:01 UTC
From: kb6uda
Topic: 6770 Message: 6770

Hi,

The Japanese use to manufacture radios for 903 to 905 Mhz (i.e Clarin JC 310) They were manufactured by Alinco, Kenwood and Icom and a number of other companies. Production was discontinued I understand in the 90's but they are still available there on the second hand market. This is Japanese CB radio even though they do not officially have CB radio there. If U bought one of these radios there before they went out of production U are grandfathered in and can continue to renew your lic.

Thanks and 73

Audio Transformers

Atlantic Transformer #8629-2, 300/600ohm - 2500 ohms, +15dBm, sealed round metal case 250-3.5KC, used -- $15

Argonne AR-115, 2K ohm CT - 8K ohm CT, NOS -- $10

Argonne AR-162, NOS -- $10

Chicago Standard AMS-6, 4800/7600ohm - 4/8/16 ohms 2 watts 200-10KC, sealed square metal case, used -- $25

General Transformer FT-2391, 600ohm - 10000 ohms 0dBm 300-3.5KC sealed round metal case, used -- $15

Microtran T1104, 600ohm-600ohm, +7dBm, pc mount, NOS-- $2ea

Stancor A-3850 universal output transformer 4K-14K ohms center tapped primary / 5 tap secondary. 8 watts (similar to Triad S-53X), NOS -- $20

Stancor A-3878 output transformer, 7000ohm - 4 ohms, 5 watts, 200-20KC, used -- $15

Triad A-1X, 100 ohm - 98.5K, NOS -- $15

Triad A-53X output transformer, 18K ohm center tapped primary - 600/250/50 ohm secondary, 70-7000 KC, 2 watts, NOS -- $20

Triad A-81X driver transformer, 2.66-1 ratio, used, one lead cut somewhat short but, accessable. -- $7

Triad T-1X, 50K ohm - 600/250/50 ohm, NOS -- $10

Triad T-22X output transformer, 25K ohm - 8 ohm CT, NOS -- $10ea

Triad TY-47X, 2000 ohm CT - 4/8/16 ohm, NIB -- $15

UTC SO-14, 80 ohm CT - 16 ohm / 16 ohm, NOS -- $10ea

UTC SO-11 audio transformer, NOS -- $10

House numbered 600 ohm (w/ 250 & 50 ohm split, I believe), 130 ohm DCR - 60K ohm, 3.6K DCR, audio transformer, same physical size as T-1X above, NOS -- $5 ea

---

Power Transformers

Stancor (Chicago Standard) Transformers

FH-210 115/230V Primary 50/60 Hz -- 2.5 VCT@10A Secondary, sealed square metal case, used -- $15

P-6134 117V Primary 50/60 Hz -- 6.3 V @ 1.2 A Secondary, used -- $4 ea

P-6375 115/230V Primary 50/60 Hz -- 6 V @ 2A or 12V @ 1A Secondary, NIB -- $10

F-106 115/230V Primary 50/60 Hz -- 10 VCT @ 6.5A Secondary, S case Used $20

F-610 115/230V Primary 50/60 Hz -- 6.3 VCT @ 10A Secondary, S case Used $20

Triad Transformers -- all 115V 60CPS Primary

F21A 6.3VCT @ 10A Secondary, Used -- $20

F28U 6.3/7.5 VCT @ 25A Secondary, NOS -- $40

UTC (United Transformer Corporation)

FT10 115V Pri 50/60 Hz -- 24 VCT @ 2A or 12 V @4A Secondary, NIB $15

Chokes

Triad

HS-331 -- 4Hy 40mA DC 375 Ohms NIB -- $10

C-4X -- 4Hy 50mA DC 360 Ohms NOS -- $10

C-6X -- 5Hy 65mA DC 330 Ohms NOS -- $10

Emcor -- Epoxy cased toroids 1" diameter by 1/2" high

240 mHy RFE -- $7 ea

720 mHy NOS -- $7 ea

Merit C-2993 10.5H, 110mA, 220ohms, used -- $10

Centralab rotary switches & parts

PA3007N7 Four Pole, 2-17 Position, rotary switch, used -- $20 ea

PA4001 Single Pole 2-23 Position rotary switch, NOS -- $10 ea

PA4007 Four Pole, 2-23 Position, rotary switch, used -- $20

Type AD 1 pole 6 pos. wafer NIB $4 (1 only)
Type DD 3 pole 3 pos. wafer NIB $4 ea

PA-1000 series parts NIB
PA-301 Switch frames $4 ea
PA-2 2 pole 6 pos. wafer $3 ea
PA-33 2 pole 5 pos. wafer $2 ea

PS-100 series wafers NIB -- $3 ea
PS-21 1 pole 11 pos.
PS-23 2 pole 5 pos.

Dialight 570-31 3PDT miniature toggle switch with 5/8" long handle -- 5A 125 VAC NOS $3 ea

Grayhill 46YY2159 Sealed Pushbutton switches, RFE -- These were SPDT but,the NC lead has been cut off flush with housing. The NO & COM terminals are cut short like they were removed from a PCB. Nice metal shaft has about .2" travel. No button nor hardware, 1/4" mounting thread. And there are a bunch of them -- 10/$1

Grayhill rotary switches

•44H30-01-2-6N, 2 pole, 6 position, NOS -- $10
•44H30-04-2-2N, 8 pole, 2 position, NOS -- $15
•44H30-10-2-2N, 20 pole, 2 position, NOS -- $25
•57M22-02-2-16N-C, 2 pole, 16 position, NOS -- $20
Mallory rotary switches
13124L 2 pole 12 pos. NOS -- $10
4M21611 6 pole 2-11 positions NIB -- $20

T-Bar 803-8C 8PDT Momentary Push Button NIB -- $10

Switchcraft lever switches -- all have black round knobs unless noted

•8PDT (#60024L) New in box -- $10
•Three pos. 2 form B momentary (#3035) New (2 pieces) -- $2ea
•Three pos., 2 form F momentary (3000 series) used (2 pieces) -- $2ea
•Three pos., 3 form A momentary each side (3000 series) New, white rect. knob) -- $2
•Three pos., 2 form C momentary (#130312) New) -- $2

•Three pos., 2 form C (#130312L) New) -- $2
•Three pos., 3 form A momentary each side (13000 series) New, red rect. knob) -- $2
•Three pos., 2 fom C (DPDT) each side (#160312) New) -- $2
•Three pos. 6PDT contacts on each side; lightly used -- $10 ea.

Relays

C.P. Clare HG-1003 Mercury wetted relays. SPDT with two contacts on each side. Dual coils: 700 ohms @ 32 V / 3300 ohms @ 81V, octal plug in style. Used, checked, $15 ea.

Crystal Can DPDT relays with 28V, 600 ohm, coils and 2A 28V contacts made by Leach, Datron and other manufacturers. They have small solder hook pins for connection and a pair of ears on the sides to mount the relay. These are from the 1960's but, as they are hermetically sealed, they should be like new inside! NOS $10 ea (a dozen or so available)

Half Size Crystal Can DPDT relays with 28V, 700ohm, coils and 2A 28V contacts made by Leach and other manufacturers. These have straight pin terminals. They are from the 1960's but, as they' re hermetically sealed, they should be like new inside! NOS $10 ea (a dozen or so available)

PL Tone generator -- Wein Bridge Oscillator powered by two 9 volt batteries (not included). - $1

Touch Tone Encoder -- Western Electric Touch Tone Dial mounted in a 4"x4"x2" metal enclosure with power switch. Has a 4 pin DIN connector plus matching cable terminated in a 1/8" mini plug. -- $2

NE556 Oscillator Circuit -- Two pots with anodized gold (colored) knobs, pwr. sw., LED,. & Banana jack outputs -- $3

1 Mhz Oscillator -- built on a small piece of perfboard with an HC-6 crystal on the back. Checked and seems to run on about 15-20 volts. There are a few of these. -- $4 ea.

PPG Electronics project #880-CB -- 13.5V 2 Amp, power supply kit, unbuilt. Most parts are under shrink wrap. Power transformer & main filter cap are missing.-- $2

HF Harmonic Filter -- built in a 5" x 2.25" x 2.25" LMB Aluminum box. UHF connectors. Probably good for 100W. -- $5

VHF thing mostly complete -- Double sided circuit board with 3 Motorola MWA120 amplifiers, 5 coils, mounted in Bud 4" x 2-1/4" x 1.5" aluminum box with a BNC connector (unwired). Looks to be finished except for power & I/O -- $15

435 MHz power splitter -- N connectors (3). This is made out of brass sheet stock and is about 15" long by 1" square.-- $10

VHF thing just started -- Pomona 4" x 2.5" x 1.5" cast box with a couple 160-104 capacitors, BNC connectors, a miniature 50K bourns pot., 6 capacitors mounted to gold plated terminals with a very pretty gold flashed internal shield structure. Nothing is soldered -- this was just started. -- $10

Two Meter to 24-28 MHz receiving converter -- At least I think that's what it is... -- 5" x 4" x 1.75" -- $10

Transistor Tester -- per July 76 Ham Radio, p.40. Aluminum case. NPN/PNP select switch is broken but, a replacement is included along with a copy of the article. Nice sealed Weston 50uA meter.-- $12

NOS Potentiometers

Linear taper unless otherwise noted

---

25 ohms, Clarostat 3/4" diameter metal cased PC mount trimmer. $2 ea.

50 ohms, Clarostat 3/4" diameter metal cased PC mount trimmer. $2 ea.

75 ohms, .58 amps, Ohmite LH, 1.5" dia., 3/8" bushing, 1/2" long 1/4" shaft. $10

100 ohms, Clarostat 3/4" diameter metal cased PC mount trimmer. $2 (one only)

500 ohms, 25W, Dejur, 1.75" dia. 3/8" bushing, 5/8" long 1/4" dia. shaft. $10

1K ohms, .9" dia., 3/8" bushing, 1-1/2" long 1/4" shaft. $2 ea

7.5K ohms, .9" dia., horizontal PC mount trimmers. $1 ea

10K Bourns 3862C, 1/2" dia., 1/4" bushing trimmers. $2 ea

10K ohms, .9" dia., 3/8" bushing, 3/4" long 1/4" plastic shaft which also pulls to operate rear mounted DPDT switch. $5 ea

15K Alps audio taper, 5/8" dia., .43" bushing, 3/4" long 3/16" shaft, w/3A switch. $4 ea

15K Ohmite Type E 7/8" dia., 10 watt, 1/4" bushing screw adj. $10

100K ohms, Clovern CLR4239/22S, 1-5/8" dia., 3/8" bushing, 1" long 1/4" dia. shaft -- $5

250K CTS Vertical PC mount trimmers -- 4/$1

20M (5W?) IRC Type 69 2" dia., 3/8" bushing, 1/2" long 1/4" shaft, 2 available -- $10 ea.

NOS Allen-Bradley Type J assortment

Values from 50 ohms to 1000 Meghoms. Mostly linear taper, some log & audio, a few reverse log. Mostly 1/2" shafts, a few are longer. A few duals, pads, dual concentric, triples, & some with switches. Typically 5-10 pieces of each value, with a few single exemplars.

Approximately 150 different types / way over 1000 pieces total. $2500

Used Resistors

General Radio precision wirewound potentiometers
•973N, 10K, 6 watts -- $10 ea.
•973P, 20K, 6 watts -- $10ea.
•975N, 10K, 11 watts, -- $15 ea.
Pots

8.5 ohm Clarostat 20 watt? pot, 1-1/2" dia. 3/8" bushing, 1/4" dia shaft 1/2" long - $5

10 ohm, 100 ohm, 1K ohm -- Clarostat 58C1, 3W pots, S taper -- $3 ea.

60 ohm Ward Leonard 20 watt?, 2 terminal rheostat, 1-1/2" dia. 3/8" bushing, screw adj. - $5

65 ohm Ohmite Type J pot, 50 watt, 2-1/4" dia., 3/8" bushing, 1/4" dia shaft 1/2" long - $10

3.5K ohm, Ohmite Type H pot, 25 watt, 1-9/16" dia., 3/8" bushing, 1/4" dia shaft 1/2" long - $7

500K ohm Carter Radio rheostat with 2" diameter skirted knob, calibrated 0-100 over 270 degrees -- $5

Power Resistors

1.5K Two 200W (or so -- 10" long) 1.5K ohm 10 tap (every 150 ohms) power resistors. $10 pair

1.5K Dale, 225 Watt power resistors. $15 for all three

2K Ohmite, 225 Watt power resistors w/mounting clips -- $6 ea or 4 for $20 (10 left)

3K Ohmite, 225 Watt power resistors w/mounting clips -- $6 ea or 4 for $20 (8 left)

Carborundum -- type SP resistors -- $10 each

30 watt parts (2.5" long) 75 ohms

100 watt parts (6" long) 1 ohm

The numbers have partially worn off some of these units so, some of the above numbers are measured values.

125+ used Potentiometers

Good assortment from 10 ohms to 2.5M. 50 or so Allen-Bradley Type J's, mostly 3/8" bushings with approx. 1/2" long, 1/4" dia. shafts on the rotary parts, a few are longer. A few duals, a few with switches, perhaps 25 trimmers, mostly metal cased except for about 15 sliders. A few appear to be unused. $50 all.

Old Radio Knobs

These are all used, most have set screws,
with nothing worse than minor scuffs and smudges and fit 1/4" shafts, unless noted.

Note: I'll take $100 for the lot of old Radio Knobs... plus shipping

---

Dakaware -- $20 all
1-1/16" Knurled Knob (3)
1-1/16" Knurled Knob w/ 1.5" skirt w/ white indicator line (2)
1-1/16" Knurled Knob w/ 2" skirt marked 0-10 (1)
1-5/8" Knurled Knob w/ 2-1/16" skirt & unfilled indicator line (1)
2-3/8" Knurled Knob w/ white vinyl pointer at skirt level (2)
2-3/8" Knurled Knob w/ 3" skirt & unfilled indicator line (1)
2-1/16" skirt only

Harry Davies
#1206 1-3/8" knobs 5 for $10
Short (1-3/16")pointer knob unfilled indicator line -- Not sure if this is Davies... There are a box of these -- 2/$1

Kurz-Kasch-- 300 series, 30+ parts, $50 for all --
#308 1-1/8" knob (5)
#385 1-3/8" knob (4)
#309 1-5/8" knob (8)
#310 2-3/8" knob w/metal spinner shaft (3)
#310 2-3/8" knob -- hub drilled out to 3/8"
#380 1-1/8" skirted knob (4)
#308 1-1/8" knob w/vinyl pointer
#308 1-1/8" knob w/ 1-3/4" black metal skirt w/ 100 graduations over 180 degrees
#308 1-1/8" knob w/ 1-3/4" brite metal skirt w/ 100 graduations over 360 degrees
#309 1-5/8" knob w/ metal spinner and 2-1/4" black metal dial with 100 graduations
#309? (may not be KK) 1-5/8" knob w/ plastic spinner and 2-1/4" metal dial with 100 graduations
#311 2-1/16" skirted knob (some of the white lines are need refilling on these) (5)

Kurz-Kasch-- 600 series, $20 for all -- These look like what was on some 1950's Hammarlund, Eico & Knight Kit stuff
#642 1.5" skirted knob (1)
#S-645 .75" skirted knob w/indicator line (1)
#647 1" skirted knob w/indicator line (3)
#S-647 1" skirted knob w/indicator line (9)
#653 1.5" skirted knob w/indicator line (5)

Not quite as old Radio Knobs

Kenwood 5cm diameter knobs that look like they are from a Kenwood TS-830 (main tuning knob) or similar
One that's been backfilled with shot to give it some heft -- $7
The plastic spinner version -- $15

National type HRT, Black, 2-1/16" diameter. Chrome plated trim rings somewhat tarnished -- $5 ea

---

Other Knobs

Beckman model 901 Duodial for a 10 turn potentiometer NIB -- $10

Tycobrahe Guitar Pedal Knobs -- Used on the Octavia, Parapedal, Pedalflanger & Direct Box -- New, $25 ea.

There are also many knobs from 1960's Tektronix and Hewlett Packard oscilloscopes plus a few General Radio knobs. If anyone has any need, please inquire.

Yahoo group: ham4sale (2007 — 2015)
Date: 2011-11-13 10:16:50 UTC
From: W4RON@carolina.rr.com
Topic: 6780 Message: 6780

Hi gang, I'm wondering if anyone can help me find a
packet modem that'll work with an old Commodore 64.
I have a very rare version of the 64 and I'd like to
put it to some use.
Packet is kind of a vintage mode and the 64 is a vintage
computer.
along this same line are there any Commodore users in
this group?

Thanks a bunch for any help you can provide.

6785. Trade for FT-817

Yahoo group: ham4sale (2007 — 2015)
Date: 2011-11-16 17:54:44 UTC
From: VE3FAL
Topic: 6758 Message: 6785

I have 2 rigs I would like to swap for an FT817.

I need one more 817 to complete my go-kit and the two rigs listed get very little use but are lots of fun.

1) K1 Serial#00863 (not built by me) with 80/40 module in it and I have extra band module for 2 more bands 20/17/15, your choice, rig has wooden panel sides and wooden tuning dimple on tuning knob, 9.8/10 for looks and performance. -Picture available

2) Index Labs QRP rig cw/ssb with speaker microphone, rig also works well on both cw and ssb. Serial #1334. Very slight scratches on chassis. Fold out leg on front, EMS=2 microphone. 9/10 for chassis (probably more actually) and 9.5/10 for performance.

Pictures available upon request..

Would like to rid of both for one FT-817...

Thanks

Fred

From: greg_zenger
Topic: 6789 Message: 6789

I have for sale a Prosistel Rotator Control box, Model "C" for older AC motor driven Prosistel Rotators.

Asking prices is $220 including shipping to 48 states.

Unit tested in manual mode with my broken rotator. Motor spins as expected. Position indication tested with a potentiometer. Works fine.

I will include a mating connector for the back of the controller.

This Rotator Controller has the following features:
· Voice synthesizer
· Keypad command entry
· 9 memories
· Selectable soft start and soft stop
· +70° and □70° rotation overlap (total rotation range of 500°)
· Manual command with reverse delay
· RS232 computer control compatible
· Selectable north or south stop

More information on it can be found here:
http://www.arraysolutions.com/Products/bigboycontrollers.htm

Manual is here (Model "C" information is at the end):
http://www.arraysolutions.com/images/Prosistel%20Manual%20rev%202001_12A.pdf

6798. Need AMPHENOL 80 series male connector

Yahoo group: ham4sale (2007 — 2015)
Date: 2011-11-29 22:36:44 UTC
From: Don Lewis
Topic: 6798 Message: 6798

I was hoping someone might have an old mic connector they would like to get rid of, cheap.

Mine is bad, ...similar connectors were used on older Heathkits, Collins, and other ham rigs.

- - AMPHENOL 80 Series, male two-pin, the cable ends that screws to the set. - -

They are listed on eBay, other places, ... for ~$20. ...I was hoping to find one much less.

Thanks for looking, ..

Don Lewis
Austin, TX

6799. 4 Sale-RC210

Yahoo group: ham4sale (2007 — 2015)
Date: 2011-12-01 04:10:44 UTC
From: Charles Rader
Topic: 6799 Message: 6799

My loss your gain. Need money and hobbies are the first to go.

RC210 Repeater controller purchased new last year and has been sitting in my house on my bench. Has the RTC, rackmount and the lastest firmware installed. Purchased complete from Arcom. Has been installed in a rack so the only thing wrong cosmetically is the paint scuffed where the screws was that held it in the rack. $350.00

Motorola GM300, model number M04GMC29C3AA, Currently used as a receiver on my 440 repeater. $50
Motorola Maxtrac, model number D34MJA7JA5AK, Currently the transmitter on my 440 repeater. Turned down to drive Micor UHF 100 PA. $40
Motorola Maxtrac, model number ??????????????, Think the same model number as above. Will have to read with software (sticker gone) if interested. Spare for above. $40
Motorola Micor 100watt PA, for above Repeater, I bypassed the last stage so I am getting 40watts out. Yes it still does 100+watts. $Reasonable Offer
Motorola T1500 UHF Duplexer, 4 can, Bandpass. Rough shape still works good. $Reasonable Offer
2 Low Band Maratracs modified and tuned for 6 meter repeater. Will get model numbers and pics if interested. $60 for both.
1 Low Band mid range Maratrac. Purchased by mistake before purchasing the above two. Complete. $30
Motorola CDM1550, model number AAM25KKF9AA5AN, 40 watt-128 channel-remote mount kit. Complete. Used as remote base. $150

DMK URI, Purchased new last Dec. Used on Allstar. Worked great. $40

All the above items work and meet factories specs when I last tested with my service monitor before I sold it too. No way off testing the stuff now except for a cheap MFJ SWR meter.
All prices doesn’t include shipping. So shipping will be added. Paypal accepted. Email off list for inquires. Oh and just plain old donations are accepted too. HIHI

Thank you,
Charles (kc5dgc)

From: Ken Simpson, W8EK
Topic: 6690 Message: 6805

Yaesu Items For Sale -- HF transceiver,
microphones, cables, HT accessories, and more

Heath SB1400 HF Transceiver (similar to Yaesu FT-747):

This is a 100 watt multimode HF transceiver covering 160 to
10 meters (including WARC bands). It operates on SSB, CW,and
AM. The receiver is very sensitive. This rig has noise blanker,
squelch, adjustable AGC and attenuator, as well as memories
and two VFOs. A narrow CW filter is included. It even has a
computer interface and is very similar to the Yaesu FT-747.

This one works 100% and looks very, very nice.
It includes power cord and paper work for $300.

Heath SB-1400-2 hand microphone
This hand mic is basically the same as a Yaesu MH-1, but with a
Heath label. Use it with the SB-1400 above, or with Yeasu rigs
with the round 8 pin connector. Like new for $40.

Heath HN-31 "Cantenna" RF Dummy Load:

This is the traditional Heath dummy load that will handle a
kilowatt. It has a derating curve both printed in the manual
and on the can.

It is in good shape both electrically and cosmetically. The
cantenna has no rust, dents or dings.

I can ship it either with or without oil. The cost to purchase
is the same, but of course the shipping will be higher with
the oil.

Paper work is included for $40.

Heath SB-634 Station Console with Wattmeter:

The Heathkit SB-634 station console is a multifunction unit.
It contains a 24 hour digital clock (6 large digits, including
seconds), 10 minute interval timer (3 digits -- minutes and
seconds), phone patch and an SWR/Power meter. The large
wattmeter reads either 200 watts or 2000 watts full scale,
in addition to SWR. It matches the Heath SB series of equipment
(Heath green), and is powered by 115 V AC.

This unit works on all of its functions. It looks extremely
nice. I can not find a scratch on it, but there is very slight
(and I emphasize very slight) wear on the 2000 watt push button.

With paper work for $150.

HF and VHF SWR Bridges:

All of these cover from 3 to 150 MHz, covering HF, 6 meters,
and 2 meters. SO-239 connectors.

Quement SWB-2
This unit features two separate meters -- one for reading
forward power and another for reading SWR. This permits one
to easily monitor both the power going out, and the SWR on
the antenna at the same time.
It works fine and looks great. With paper work for $37.

Carter Craft 90-300
Single Meter SWR Bridge / Field Strength Meter
This one works fine. I am 99% certain it has not been used,
except for my testing it.
In its original box with original instructions and little
field strength antenna. $30

Royce 2-100 Single Meter SWR Bridge / Field Strength Meter
This one works fine, and looks extremely nice. I do not see
any scratches on it, but it does have a previous owners name
on it. In its original box with original instructions. $28

Astron RS-20A Power Supply:

The RS-20A is a DC Power Supply producing 13.8 V DC (internally
adjustable from 11 to 15 V DC) at up to 16 amps continuous and
20 amps ICS. The RS-20 features crowbar over voltage protection
and fold-back current limiting to protect your equipment.

This particular supply works fine, and looks very close to new.
I do not find a scratch on it.

With paper work for $60.

Cables for Heil (and other) Microphones:

Heil CC-1 XLR 4
4 pin XLR Female to 3 pin XLR Male $25

3 pin XLR to stripped ends
About 10 feet of quality rubber covered mic cable with a 3 pin
XLR connector on one end. Ideal to add your own connector.
Can be used with the CC-1 XLR-4 above. $20

Microphone Stands:

Regular round desk stand
Round 6 inch diameter heavy black / dark grey base, with
a 3 inch chrome tube coming up from the middle.
Standard 5/8 inch threaded. $15

Microphone holders:

Electro Voice Mic Holder
Gray colored EV, designed to hold 5/8 to 3/4 inch diameter mics, and go into a stand with standard 5/8 inch threads. $5

Chrome Mic holder
Similar to EV holder, but chrome metal with a green felt on the inside to protect the mic. For 1/2 inch to 5/8 inch diameter microphones. Standard 5/8 inch threads. $5

Yaesu MH-1 Hand Microphone:
The Yaesu MH-1 b8 is the hand mic that is used on most of the Yaesu HF and some of the Yaesu VHF rigs. It is a hand mic that has a switch on the back with two audio frequency responses -- one for rag chewing, and one for more punch for DX. It has up and down switches, in addition to a "fast" switch. Of course it also has the normal PTT switch. It has a round 8 pin mic connector, wired for Yaesu.
This particular microphone looks like it might not have ever been used. I think it was probably put in a drawer when new, and left there. Of course it works fine. $38

Yaesu MH-31 B 8 dynamic hand microphone:
This is the Yaesu hand microphone that has the round 8 pin connector on it. It will go with virtually any Yaesu rig that uses the round 8 pin connector. It has up, down, and fst switches, and well as a tone switch, in addition to the PTT switch.
This particular unit works 100%, and appears to be unused. $40

Yaesu YM-31 hand microphone
The Yaesu YM-31 is a hand mic with a round 6 pin connector. Apparently it is either similar or the same as the MH-25A6j (not the MH-25 with the 8 pin connector). It is a 600 ohm impedance hand microphone, and has a Monitor on-off switch on the back. It should be compatible with any of the Yaesu rigs that uses the round 6 pin connector. It looks very similar to the Yaesu MH-1.
This one works fine and looks extremely nice. $25

Yaesu YM-22 DTMF Condenser Microphone
This mic has a 16 digit touch tone (DTMF) pad on the front. There are up and down buttons on the top, in addition to the PTT switch.
Stripped and tinned ends. Great condition. $40

Speaker Microphones:

Yaesu MH-34 b 4 b speaker microphone
This is the one that fits the Yaesu VX-8, VX-7, VX-6, VX-5, VX-3, VX-2, VX-1, and that series of HTs. I think it also fits the FT-50 and FT-60, and maybe others. It has a single 4 conductor, 3.5 mm plug on it. This one is just like new. $35

Yaesu YM-24 A speaker mic.
Fits FT-207, 208, plus many others. It has the odd little round connector on it like Yaesu, Wilson, and others used in the 1970s and 80s. This particular unit works fine, and looks great also. $20

Pryme Speaker Microphone
This is the equivalent of the Yaesu MH-34 (above). It has the 4 conductor 1/8 inch plug on it. It works 100% and looks like it has not been used. $28

Azden SDX-316
This is the rounder style speaker mic that fits nicely in the palm of your hand. Has 3.5 mm and 2.5 mm plugs for Azden, Icom, some Yaesu, and others. $ 20

Pryme Speaker Microphone
This speaker mic has the 2.5 mm and 3.5 mm molded connector as used by Icom, Alinco, Radio Shack, some Yaesu, and others. It works fine and look line new. $20

MFJ-287 Speaker Microphone
This fits the TH-21/31/41 series HTs, TH-205, TH-215, TH-415, as well as others. It has a 3 conductor 3.5 mm plug and a 2 conductor 2.5 mm plug.
It works fine, and looks close to new. $15

Yaesu HT Accessory Items:

Battery pack for Yaesu VX-2 or VX-3 HT
Lithium Ion Battery Pack fits both the VX-2 and the VX-3. 3.7 volts, 1200 mahr, works great, and holds a charge like new. $15

Yaesu NC-18 B Charger
Provides 14.5 V DC at 50 ma to charge many different HTs, including the Yaesu FT-411, FT-811, FT-911, FT-23, FT-209, FT-415, FT-410, FT-470, FT-727, FT-530, FT-703, and more. Small 2.5 mm male plug. $10

Belt Clip for Yaesu FT-207, with hardware. $8

Wrist Strap for Yaesu FT-209, and probably others $4

Prices do not include shipping from Florida.

I also have many other accessories available such as many different types of HTs, VHF and UHF rigs, HF and VHF/UHF antennas, etc.
Just too many to list here. Please e-mail your requests.

Thanks.

HF Rig, Power Supplies, Dummy Load, Station Console,
Wattmeters/SWR Bridges, Coax Antenna Switch,
Microphones, HT Speaker Mics, DTMF Touch Tone
Microphones, Accessories for Kenwood HTs, original
Kenwood Manuals, and other Kenwood items For Sale:

Kenwood TS-130 HF rig, and PS-30 Power Supply:

Kenwood TS-130 HF SSB / CW transceiver
This rig covers 80 thru 10 meters, including the WARC bands.
It has about 100 watts out, with slightly lower on 12 and 10
meters. Of course it has IF shift, speech processor, and other
features. It is all solid state.
This one works fine, and looks fine. With paper work for $350.

Kenwood PS-30, 20 amp (at 13 V DC) power supply:
This power supply will furnish up to 20 amps at 13 V DC to power
most 100 W output HF transceivers. It also has auxiliary
terminals on the back to power an additional rig, such as a
2 m rig. The main connector is the 6 pin molex connector
that will match most Kenwood, Icom, and Alinco HF radios,
as well as some Yaesu.
This particular unit works 100% and looks very nice.
Paper work included for $90.

Buy both of the above for $425.

Pyramid PS-25 Power Supply:

The Pyramid PS-25 is a 13 Volt DC power supply with both a
voltmeter and an ammeter built in. The output voltage is
adjustable over a range from about 11.5 to 15.5 volts DC.
There is also an adjustment to set the current limiting,
up to 25 amps. This means it can be set so that it will
protect the finals of a solid state rig. In addition, a
buzzer is activated if it goes into over current limiting.
This power supply has the features you want!

This particular unit works fine, and looks extremely nice.

With paper work for $80.

Heath HN-31 "Cantenna" RF Dummy Load

This is the traditional Heath dummy load that will handle a
kilowatt. It has a derating curve both printed in the manual
and on the can.

It is in good shape both electrically and cosmetically. The cantenna has no rust, dents or dings.

I can ship it either with or without oil. The cost to purchase is the same, but of course the shipping will be higher with the oil.

Paper work is included for $40.

Heath SB-634 Station Console:

The Heathkit SB-634 station console is a multifunction unit. It contains a 24 hour digital clock (6 large digits, including seconds), 10 minute interval timer (3 digits -- minutes and seconds), phone patch and an SWR/Power meter. The large wattmeter reads either 200 watts or 2000 watts full scale, in addition to SWR. It matches the Heath SB series of equipment (Heath green), and is powered by 115 V AC.

This unit works on all of its functions. It looks extremely nice. I can not find a scratch on it, but there is very slight (and I emphasize very slight) wear on the 2000 watt push button.

With paper work for $150.

Heath HM-2140 A, dual meter Wattmeter / SWR Bridge:

The HM-2140 A uses two separate meters to measure power and SWR (forward and reflected power). It will measure either average power, or peak power (PEP) with a 9 volt battery. Power ranges are 200 and 2000 watts. Frequency range is from 160 thru 10 meters. It has a remote sensor, which permits the meter to be separated from the coax connection by up to 3 feet. This is the "A" model of this meter, which is the Heath Brown color (not the green), and has more features.

More details can be found at
http://www.radiomuseum.org/r/heath_wattmeter_hm_2140a_hm2140.html

This particular unit works fine, and looks very close to new. With paper work for $100.

HF and VHF SWR Bridges:

All of these cover from 3 to 150 MHz, covering HF, 6 meters, and 2 meters. SO-239 connectors.

Quement SWB-2
This unit features two separate meters -- one for reading forward power and another for reading SWR. This permits one to easily monitor both the power going out, and the SWR on the antenna at the same time.
It works fine and looks great. With paper work for $37.

Carter Craft 90-300
Single Meter SWR Bridge / Field Strength Meter
This one works fine. I am 99% certain it has not been used, except for my testing it.
In its original box with original instructions and little field strength antenna. $30

Royce 2-100 Single Meter SWR Bridge / Field Strength Meter
This one works fine, and looks extremely nice. I do not see any scratches on it, but it does have a previous owners name on it. In its original box with original instructions. $28

MFJ "Strip Line" Coaxial antenna switch:

This antenna switch is in a heavy diecast housing that utilizes "stripline" construction to keep the impedance very close to 50 ohms. This means it permits good operation at higher frequencies up to 500 MHz, and gives over 50 db isolation. Unused antennas are grounded, with an additional position to ground all antennas. SO-239 connectors.

MFJ 1702 B Coax Switch
Switches 2 antennas. This one works 100% and looks great also. $24

Deluxe Desk Microphone w/ Kenwood 8 pin connector:

This is a great looking and great performing low impedance desk mic. It has a quality Shure 600 ohm cartridge in it (the cartridge alone is over $40 new), with a very nice black die case base and neck, with a chrome grill. It looks somewhat like a Shure 444, but no plastic on this one -- all metal!

This one looks like new, and works the same. It has a long (approx 6 foot) cord, with a round 8 pin connector for Kenwood. $75

Astatic Model 810-6 Gooseneck Microphone:

This mic is on a 12 inch gooseneck. The mic is a brushed metal about 5 1/4 inches long, and is actually part of the gooseneck. The cable goes thru the gooseneck. This has a 2 conductor shielded cable, so it is a quality balanced microphone with about a 4000 ohm impedance. The gooseneck terminates in a standard 5/8 inch threaded connector.

This one works fine and looks good. $45

Kenwood Hand Microphone with round 8 pin plug:

This hand mic works great on most Kenwood rigs with the round 8 pin connector, such as the TS-430, TS-440, TS-570, TM-241, TM-2530, TW-4000, and others.

It only says "Electret Condenser Mic" on it, with no model number.

Basically, this mic is like an MC-43, only with a couple more features. Of course it has the mic and PTT switch; it also has up/down switches on the top. There are four "extra" buttons labeled Call, VFO, MR, and PF. What these four buttons do depends on the rig that it is attached to. They will function on some rigs, and are completely useless on others. There is also a "Lock" switch on the back.

Regardless if you use the four extra buttons or not, you still have a mic that works like an MC-43.

This mic works fine, and looks like new. I am guessing it came with a rig, and was immediately put in the drawer. $30

Speaker Microphones:

All of these have the 3.5 mm and 2.5 mm plugs on them, as used by Kenwood, Icom, Alinco, Radio Shack, some Yaesu, and other HTs.

Azden SDX-316
This is the rounder style speaker mic that fits nicely in the palm of your hand. $ 20

Pryme Speaker Microphone
It works fine and look line new. $20

MFJ-287 Speaker Microphone
This fits the TH-21/31/41 series HTs, TH-205, TH-215, TH-415, as well as others. It has a 3 conductor 3.5 mm plug and a 2 conductor 2.5 mm plug.
It works fine, and looks close to new. $15

DTMF Touch Tone Microphones:

CES 610 L DTMF Touch Tone Mic
Can manually dial a number, or automatically store it in the mic, and "speed dial". 12 digit touch tone pad on the front. 8 pin modular plug (like computer LAN).
Looks to be new. $38

KDK Model TM-2 DTMF Mic
With touch tone pad and up-down switches. It presently has a round 8 pin connector wired for Kenwood.
Nice condition. $40

Johnson 250-0761-010 / CES 655 L DTMF Mic
It has a 12 digit pad on the front, and is a rugged mic. Presently with 4 pin plug. Looks to be unused. $38

Yaesu YM-22 DTMF Condenser Microphone
This mic has a 16 digit touch tone (DTMF) pad on the front.
There are up and down buttons on the top, in addition to
the PTT switch.
Stripped and tinned ends. Great condition. $40

Cables for Heil (and other) Microphones:

Heil CC-1 XLR 4
3 pin XLR Male to 4 pin XLR Female $25

3 pin XLR to stripped and tinned ends
About 10 feet of quality rubber covered mic cable with a 3 pin
XLR connector on one end, and nothing on the other end. Ideal
to add your own connector. Can be used with the CC-1 XLR-4
above. $20

Heil round 8 pin connector to 8 pin modular connector for Icom
Not positive of the number, but it might be HSTA-IM or HSTA-706
$15

Microphone Stands and holders:

Microphone Stands:

Regular round desk stand
Round 6 inch diameter heavy black / dark grey base, with
a 3 inch chrome tube coming up from the middle. This one has
a 1/4 inch hole in the base, half way between the center and
the edge, where I think someone might have had a PTT switch
in the past.
Standard 5/8 inch thread. $15

Microphone holders:

Electro Voice Mic Holder
Gray colored EV, designed to hold 5/8 to 3/4 inch diameter mics,
and go into a stand with standard 5/8 inch threads. $5

Chrome Mic holder
Similar to EV holder, but chrome metal with a green felt on the
inside to protect the mic. For 1/2 inch to 5/8 inch diameter
microphones. Standard 5/8 inch threads. $5

Cables for CW keyers and keys:

Cable for paddles
About 3 feet long, and with a 1/8 inch (3.5 mm) stereo
connector on the end, like used by most rigs. $8
As above, but 1/4 inch plug. $8
As above, with 1/4 inch GOLD plated plug. $15

Cable for straight key
About 3 feet long, with a mono 1/8 inch (3.5 mm) phone

plug on it, as used with a straight key. $5
As above, but 1/4 inch plug. $5
Vintage cotton covered cord, with brass PL-55-A
(1/4 inch) plug (probably from WW2) $10

Accessories for Kenwood TH-205, TH-215, TH-225, TH-415,
and other HTs in this series:

Original Kenwood Rubber Duck antenna from TH-215. $10

Kenwood BC-2 Charger for PB-2 batteries. $12

MFJ-287 Speaker Microphone
Fits same HTs as the MFJ 286 above, but is a smaller more
compact speaker mic. It works fine, and looks close to new. $15

Kenwood Wrist Strap for TH-215, plus many other HTs. $4

BNC to PL-259 antenna adapter $5

Accessories for the Kenwood TH-21 / 31 / 41 series HTs:

Original Operating manual for TH-21 HT for 2 meters $8

Kenwood BH-3 belt clip and hardware for Kenwood TH-21/31/41
series HTs. $8

MFJ-287 Speaker Microphone
Fits same HTs as the MFJ 286 above, but is a smaller more
compact speaker mic. It works fine, and looks close to new. $15

Kenwood W09-0315 charger
This charger is used to charge the larger PB-21 H batteries
for the TH-21 series, and also on other Kenwood radios.
It produces 10.5 V DC at 42 ma, with a standard 2.1 mm
coaxial connector. $12

Kenwood Rubber duck antenna for the TH-21 HT
Shorter "Stubby Duck" from Kenwood. $20

Operator's Manual for Kenwood (Trio) TS-440 S:

This is a quality reproduction with a "comb" binding
that has been done by one of the professional reproduction
houses. W7FG I think.

This one has a plastic protector on the front, and is
in very nice condition. It includes schematic diagrams.
$18

Original Manuals for Kenwood equipment:
New ones have been added.

All manuals are in very nice condition, for Kenwood equipment.
All are original manuals only.

Operating manual for TM-2570/2550/2530 2 m xcvr $15
Operating manual for TW-4000 dual bander $15
Service manual for TW-4000 dual bander $20
Operating manual for TW-4100 dual bander $15
Operating manual for TH-21 HT for 2 m $8
Operating manual for TH-225, 2 m HT $12
Operating manual for TM-221/421 mobile $15
Operating manual for TH-241/441/541 mobile FM transceivers
...For 2 m, 440 MHz, & 1200 MHz. $12
Operating manual for TR-2400, 2 m HT $12
Service manual for TR-2600, 2 m HT $12
Operating manual for TR-7400, 2 m xcvr $8

Kenwood TM G-707 operating manual in Spanish:
Spanish version of the Operating Manual
for the TM G-707 dual band transceiver. New $10
All other manuals are English.

LF-30A Low Pass Filter $5
MC-30 & MC-35 hand microphones $5
MC-85 desk microphone $4
PB-1, PB-2, PB-3, & PB-4 battery packs $3
PS-6 power supply $6
SMC-24 speaker mic $4
SMC-25 speaker mic $4
SP-430 speaker $2
SP-820 Speaker $2

These are original Kenwood manuals only.

HT Belt Clips and Wrist Straps:

Belt Clips:
All include the hardware with the belt clip and are $6 each.
Kenwood BH-3 for Kenwood TH-21 / 31 / 41 series HTs
Motorola
Yaesu FT-207

Wrist Straps for various HTs - $4 each
Kenwood TH-215 / 225 / 415, TR-2500, etc.
Kenwood TR-2400
Yaesu FT-209

I also have many other accessories available such as many
different types of microphones, HTs, HF, VHF and UHF rigs, HF
and VHF/UHF antennas, and many miscellaneous accessories.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

Topic: 6810 Message: 6810

Hi,

Im studying some of the old tube radio technology and would like to get a hold of a 220 and 440 tube radio.

I don't care if they work. I just need them in good enough condition to identify the parts and how its put together.

I was thinking of 25 dollars per radio.

Best Regards
Ted

Microphones and Vintage Publications For Sale:

Astatic Model 810-6 Gooseneck Microphone:

This mic is on a 12 inch gooseneck. The mic is a brushed metal about 5 1/4 inches long, and is actually part of the gooseneck. The cable goes thru the gooseneck. This has a 2 conductor shielded cable, so it is a quality balanced microphone with about a 4000 ohm impedance. The gooseneck terminates in a standard 5/8 inch threaded connector.

This one works fine and looks good. $45

Deluxe Desk Microphone - Kenwood round 8 pin:

This is a great looking and great performing low impedance desk mic. It has a quality Shure 600 ohm cartridge in it (the cartridge alone is over $40 new), with a very nice black die case base and neck, with a chrome grill. It looks somewhat like a Shure 444, but no plastic on this one -- all metal! This one has a round 8 pin connector wired for Kenwood on it, but that can be changed.

This one looks like new, and works the same. It has a long (approx 6 foot) cord. $75

Cables for Heil (and other) Microphones:

Heil CC-1 XLR 4
3 pin XLR Male to 4 pin XLR Female $25

3 pin XLR to stripped and tinned ends
About 10 feet of quality rubber covered mic cable with a 3 pin XLR connector on one end, and nothing on the other end. Ideal to add your own connector. Can be used with the CC-1 XLR-4 above. $20

Heil round 8 pin connector to 8 pin modular connector for Icom
Not positive of the number, but it might be HSTA-IM or HSTA-706
$15

Microphone Stands and holders:

Microphone Stand:

Regular round desk stand
Round 6 inch diameter heavy black / dark grey base, with a 3 inch chrome tube coming up from the middle.

Standard 5/8 inch threaded. $15

Microphone holders:

Electro Voice Mic Holder
Gray colored EV, designed to hold 5/8 to 3/4 inch diameter mics,
and go into a stand with standard 5/8 inch threads. $5

Chrome Mic holder
Similar to EV holder, but chrome metal with a green felt on the
inside to protect the mic. For 1/2 inch to 5/8 inch diameter
microphones. Standard 5/8 inch threads. $5

Hand Microphone with round 8 pin plug for Kenwood:

This hand mic works great on most Kenwood rigs with the
round 8 pin connector, such as the TS-430, TS-440, TS-570,
TM-241, TM-2530, TW-4000, and others.
It only says "Electret Condenser Mic" on it, with no
model number.

Basically, this mic is like an MC-43, only with a couple
more features. Of course it has the mic and PTT switch;
it also has up/down switches on the top. There are four
"extra" buttons labeled Call, VFO, MR, and PF. What these
four buttons do depends on the rig that it is attached to.
They will function on some rigs, and are completely useless
on others. There is also a "Lock" switch on the back.

Regardless if you use the four extra buttons or not, you
still have a mic that works like an MC-43.

This mic works fine, and looks like new. I am guessing it
came with a rig, and was immediately put in the drawer. $28

Kenwood Mic with modular connector:

This mic is basically the same as the one with the round
8 pin connector above, except it has the modular plug on it,
as used by the TM-261, TM-271, and many others.
It looks like new. $30

Yaesu Hand Microphones:

Yaesu MH-1 Hand Microphone
The Yaesu MH-1 b8 is the hand mic that is used on most of
the Yaesu HF and some of the Yaesu VHF rigs. It is a hand
mic that has a switch on the back with two audio frequency
responses -- one for rag chewing, and one for more punch
for DX. It has up and down switches, in addition to a
"fast" switch. Of course it also has the normal PTT
switch. It has a round 8 pin mic connector, wired for
Yaesu.

This particular microphone looks like it might not have ever been used. I think it was probably put in a drawer when new, and left there. Of course it works fine. $40

Yaesu MH-31 B 8 dynamic hand microphone:
This is the Yaesu hand microphone that has the round 8 pin connector on it. It will go with virtually any Yaesu rig that uses the round 8 pin connector. It has up, down, and fst switches, and well as a tone switch, in addition to the PTT switch.
This particular unit works 100%, and appears to be unused. $40

Yaesu YM-31 hand microphone
The Yaesu YM-31 is a hand mic with a round 6 pin connector. Apparently it is either similar or the same as the MH-25A6j (not the MH-25 with the 8 pin connector). It is a 600 ohm impedance hand microphone, and has a Monitor on-off switch on the back. It should be compatible with any of the Yaesu rigs that uses the round 6 pin connector. It looks very similar to the Yaesu MH-1.
This one works fine and looks extremely nice. $25

Yaesu YM-22 DTMF Condenser Microphone
This mic has a 16 digit touch tone (DTMF) pad on the front. There are up and down buttons on the top, in addition to the PTT switch.
Stripped and tinned ends. Great condition. $40

DTMF Touch Tone Microphones:

Yaesu YM-22 DTMF Condenser Microphone
This mic has a 16 digit touch tone (DTMF) pad on the front. There are up and down buttons on the top, in addition to the PTT switch.
Stripped and tinned ends. Great condition. $40

CES 610 L DTMF Touch Tone Mic
Can manually dial a number, or automatically store it in the mic, and "speed dial". 12 digit touch tone pad on the front. 8 pin modular plug (like computer LAN).
Looks to be new. $38

KDK Model TM-2 DTMF Mic
With touch tone pad and up-down switches. It presently has a round 8 pin connector wired for Kenwood.
Nice condition. $40

Johnson 250-0761-010 / CES 655 L DTMF Mic
It has a 12 digit pad on the front, and is a rugged mic. Presently with 4 pin plug. Looks to be unused. $38

ARRL Handbooks and other Publications:

ARRL Handbooks:

1973 - 50th edition - This one is in the smaller format.
It is in very nice condition, although the pages have
yellowed some. $14

1988 - 65th edition - Hard bound
This one is a couple inches thick.
Very close to new condition. $22

ARRL Antennas Books:

1970 - 12th edition
Nice condition - $12

1984 - 14th edition
Great condition - $12

ARRL Radio Amateur's VHF Manual
1966, 11th edition, $12

ARRL How to Become a Radio Amateur,
1970, 26th edition
Extremely nice, close to new condition,
with many vintage ads in the back, $15

Single Sideband for the Radio Amateur
1970, Fifth edition, $12

Specialized Communications Techniques
1975, First Edition, $15

ARRL "FCC Rulebook"
1986, Seventh edition, $3
1988, Eighth Edition, $4
As above, but "Newly Revised to include Codeless Technician" $6
2004, 13th edition $10

I also have many other accessories available such as many
different types of microphones, HTs, HF, VHF and UHF rigs, HF
and VHF/UHF antennas, etc.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

6818. PCB holder you can build

Yahoo group: ham4sale (2007 — 2015)
Date: 2011-12-23 15:46:26 UTC
From: Ken
Topic: 6818 Message: 6818

I came up with this after I got tired of chasing around pcb's on the bench top during construction and testing. I have one of those gimbaled pcb vises, but it takes up too much room on the bench.

This is perfect for secure holding of PCB's during soldering, prototyping, and testing. A dovetail groove prevents any slipping of the board from the fixture, with minimal clamping pressure. The jaw opening will easily accommodate and securely hold boards from 1/4" to 5", easily extended with longer rods. The jaws are fabricated from UHMW, (ultra-high-molecular-weight polyethylene), rods are Nylon. Easily replaceable elastic band for many years of service.

All the details are here for anyone wanting to build one, or there is a complete kit of machined parts ready for assembly.

6823. WTB: 1920s parts

Yahoo group: ham4sale (2007 — 2015)
Date: 2011-12-20 17:38:14 UTC
From: N1BUG
Topic: 6823 Message: 6823

This is probably a long shot at best, but I am looking for some really old parts. Please drop me a line if you have any of these items.

Cardwell type B variable capacitor, 1700, 1500, or 1000 pf. Must have black (not brown) insulating strips and full size plates (not tapered at one side)

Thordarson R-196 filter choke

1920s filter capacitors: will consider anything from 1 uf and up, 800V or more. Ideally I'd like something around 4 uf & up, 1000V & up. Dead is acceptable if re-stuffing & restoration possible. Also looking for some lower voltage types.

Sangamo mica capacitor (old flat-sided oval type), .0005 uf (500 pf)

Grid leak clips for that style Sangamo capacitor

Jewell pattern 54 panel meters, 0-1000VDC, 0-50, 0-100, or 0-150 mA DC.

I am also interested in 1920s era binding posts or modern ones with similar appearance, but only in sets of 8 or more of the same type.

I have pictures to help identify most of these parts on my web site:

http://www.n1bug.com/29wishlist.shtml

Thanks & 73,
Paul N1BUG

6824. FS: Assorted AXIAL PARTS

From: J.Gordon Beattie, Jr., W2TTT
Topic: 6834 Message: 6835

Hi Folks!

I have for sale an ICOM IC-746PRO HF/6m/2m Radio,

matching IC-21 Speaker and PS-125 Power Supply packaged to provide a complete station.

I am also including the factory hand microphone, a Heil ProSet adapter, and a spare DC power cable.
$1,200 plus shipping. Photos available on request.

This rig has only been used in a smoke-free environment and features the "transmit anywhere" mod to allow for flexible use on MARS and with transverters. I am the second owner and have had no troubles with the rig.

The original factory box will be used for shipping the radio double boxed.

Payment can be via PayPal, check or Postal Money Order.

Thanks & 73,
Gordon Beattie, W2TTT

From: Ken Simpson, W8EK
Topic: 6839 Message: 6839

This may be a long shot, but I am looking for a SCSI cable.

It needs to be at least 10 feet long, and would be better if 12 or 15 feet long. It needs to be for SCSI "1" (original 8 bit external). It has a male DB-25 connector on one end, and a Male Centronics 50 pin connector on the other end (sort of like a parallel printer connector, but with 50 pins instead of 37).

Any one have one laying around collecting dust?

Thanks.

Hello everyone,

I Just passed my technician test for Ham and I am going to need some equipment and some assistance. Any help on what not to use, what works best for new operators, etc would be greatly appreciated.

Also, if you have any old equipment you want to get rid of (cheap because I am unemployed but in school) would help also. I believe I want to start in the 2 meter and 70cm band if this helps.

I will be taking my General test soon so anything would help.

Thanks in advance for the assistance and if you know of any ham clubs in the Henderson area, please let me know.

Paul in Henderson Ky

Hello-

We are a new club starting out and we were coordinated for our 2m repeater frequency pair, we purchased our repeater, duplexers, power supply, and antenna and are currently operating off of a 25' pole at the moment. We would really like to be a lot taller. We are already in affiliation with the emergency groups in the area and are pending agreements based on our tower height. Anyone interested in helping out a club that is just starting out would be greatly appreciated. We have limited funds, but are entertaining any offers for a 50-60' freestanding fold over tower. Thank you for your help.

I am looking for a Yaesu FT100D HF/VHF/UHF radio. Need the mic and power cord with it, and would take other accessories if you have them-but they are not needed. I am looking for a 2002 or 2003 model (serial number startes with 2 or 3) that has had the SWR/grounding mod done at the factory. I will pay with paypal for an instant payment for you. Anyone have one available?

From: kc4vg
Topic: 6868 Message: 6868

I am selling my very complete FT-817 (non-ND) transceiver.

The FT-817 is loaded with the following W4RT installed options:
- One Board Filter (Collins SSB and CW filters mounted on a single board)
- BHI Ltd DSP Module
- W4RT Microphone modifications - One Big Punch (speech compression) with Super Punch - switchable Heil HC-4 (OBP active) and Heil HC-5 (OBP not active) microphone elements. Note: this version of the One Big Punch with the Super Punch is no longer available from W4RT as Heil no longer will make its microphone elements available to others)

Other extras - Case, Wall Charger and NiMH Battery Pack

The FT-817 is in great shape and fully operational.

Price: $650.00 Priority Mail Delivered CONUS only. Accept US Postal Money Order or Personal Check (radio held until check clears). No PayPal.

Radios will be programmed to your frequencies w/ PL and/or DPL Tones as specified
.
-a PROGRAMMING KIT will also be included with each set of 5 for future changes
Cost is $300.00 shipped for ANY 5 radios (VHF or UHF mix or match)
SHIPPING to CONUS addresses only via UPS ground--adult signature/ID required-NO
PAYPAL--USPO Money order or check OK -but checks must clear bank before shipping-
.
Great deal for a club needing good inexpensive radios for members
.
Please E-MAIL for additional info--include your Phone Number and I will call you-

6877. FS: P&H AFC-2 Audio Compressor

Yahoo group: ham4sale (2007 — 2015)
Date: 2012-02-21 00:31:01 UTC
From: cr88a
Topic: 6877 Message: 6877

I'm selling my P&H AFC-2 Audio Compression Amplifier. I used it for about fifteen years from the late 70's through the early 90's, mostly on AM. P&H Electronics was located in Lafayette, Indiana and besides this made linear amplifiers and transverters.

One of the issues with many of the old compressors is they don't really compress sufficiently to be useful but this one does. Designed in 1959, it uses two inverse feedback networks through the stages to reduce distortion. The cleverest part is the use of a 7B8 pentagrid tube as the compression control stage. The microphone audio input is fed to grid #4. A portion of the output, taken from the anode, is rectified and fed to grids #1 and 2. I would never have thought of that! It's not a limiter and it's not a clipper.

It has a broad/medium/sharp bandwidth control, the low cutoff being 90Hz, the highs 6000/3500/2000Hx. There's a gain control that is a pot tied to the grid of the last output stage. The unit has high (1 meg on input) and low input and high/low output connectors and output is from an output transformer. It's also relatively small at 7" X 5" X7" HWD.

This is perfect for anyone who wants a good example of "tube sound". This unit has all the original electrolytics installed, and I'm pretty sure the Planet Lyticaps' one year warranty has expired. I'd put in new caps immediately.

I've made a 2 minute mp3 audio demo, which you can download (1.5 megabytes) or listen to at:

http://radio.freeshell.org/sources/phdemo.mp3

If you'd like to see the manual, it's on BAMA:

http://bama.edebris.com/manuals/ph/afc1-2

And a photo I took is at:

http://radio.freeshell.org/sources/ph_front.jpg

Only mod I see is that someone replaced the Amphenol single button connector with a 1/4" TRS jack.

Price is $150 each plus shipping, as-is of course. The original manual will be included. My shipping preference is FedEx Ground but can do it some other way if you like. Or you may pick it up in the Milwaukee - Chicago area.

Thanks.
-Pete

6878. Service Manuals For Sale

Yahoo group: ham4sale (2007 — 2015)
Date: 2012-02-22 23:09:42 UTC
From: k4idc
Topic: 6878 Message: 6878

I have a small inventory of service manuals for commercial two-way gear commonly used in amateur service. Brands include Motorola, G.E., others.

I can email a .pdf file of the inventory if you're interested; please inquire via email off list.
The manuals are $20 each, shipped CONUS.

6879. FS: Kenwood TM251A 2m (70cm receive) radio

Yahoo group: ham4sale (2007 — 2015)
Date: 2012-02-23 00:33:40 UTC
From: John Geiger
Topic: 6879 Message: 6879

I have for sale a Kenwood TM251A 50 watt 2m FM radio. This radio also receives on 70cm as well as public service frequencies in that range. It also does one-way crossband repeat from 70cm to 2m, and has a built in voice recorder so it will function as a simplex repeater as well. It transmits and receives fine, but will need the memory battery replaced. It will generally hold memories as long as you leave the PS turned on. Disconnect it from 12v entirely and it loses its memories and resets itself. It comes with the mic, power cable, and a copy of the manual. I am asking $70 plus shipping for it. Replace the memory battery (or just leave the PS on) and you a great almost dualbander.

6887. FS: Comdel CSP 11 Speech Processor

Yahoo group: ham4sale (2007 — 2015)
Date: 2012-03-06 15:20:41 UTC
From: cr88a
Topic: 6887 Message: 6887

Here's a very nice Comdel CSP 11 RF speech processor that significantly improves the talk power of an ssb transmitter, by 10db says Comdel.

In contrast to all the rigs that use audio processing or DSP based rf compression, the Comdel uses a method of rf clipping that is, according to Comdel, "distortion free". That's not really the case but there is less objectionable distortion than with most other analog systems, I believe. Comdel was arguably the first to use an RF processing accessory for ham applications that did not require modifications to the internal circuits of the transmitter.

The basic idea is that a microphone is plugged into it, and the Comdel is plugged into the microphone input of the transmitter. Inside there is an SSB generator, filter, limiter and demodulator which effectively clips the signal but filters out the harmonics which are generated by clipping. It is effective and was revolutionary in 1968 when this came out and the same technique is used in the current Ten-Tec 715 processor. Clipping has traditionally been the way to achieve the highest modulation density.

The Comdel is all solid state and runs on 9 or 12 volts which may be supplied from the rear panel or provided by 6 D cells inside the unit. With 18ma draw they lasted 300 to 500 hours back then, longer I'm sure with today's cells. There's a clever arrangement such that it only draws power when the PTT is actuated, if you wish.

Here are photos...they're not building them like this anymore:

http://radio.freeshell.org/sources/csp_front.jpg
http://radio.freeshell.org/sources/csp_inside.jpg
http://radio.freeshell.org/sources/csp_rear_a.jpg

And here's a two minute mp3 voice demo:

http://radio.freeshell.org/sources/comdel.mp3

The manual and schematic is available on BAMA:

http://bama.edebris.com/manuals/comdel/

Price is $100 plus shipping if needed; you may pick it up in the Milwaukee-Chicago area. As is, not returnable. PayPal preferred, otherwise USPS Money Order. Email to petef@...

Thanks.

6888. Power Supplies FS

Yahoo group: ham4sale (2007 — 2015)
Date: 2012-03-06 20:23:26 UTC
From: Ken Simpson, W8EK
Topic: 6888 Message: 6888

Power Supplies For Sale:

Astron VS-35 M Power Supply:

Astron power supplies feature solid-state electronic regulation, EMI filter, fold back current limiting for protection from excessive current and shorted output. Crowbar over-voltage protection is also provided.

This supply is rated for provide 35 amps ICAS, or 25 amps continuous at 13.8 V DC, so it is more than enough for all of the 100 watt rigs. This model has the voltage adjustable from the front panel from about 5 volts to 15 volts. Current limiting is also adjustable from the front panel, permitting one to set it to protect your solid state rig. Voltmeter and ammeter are included.

This particular unit works 100%, and looks really great. I can not find any scratches on it, although there is one very small defect on the top that one can see if the light is just right.

These sell for about $250 new. Buy this one, with the paper work, for $145.

Kenwood PS-30, 20 amp (at 13 V DC) power supply:
This power supply will furnish up to 20 amps at 13 V DC to power most 100 W output HF transceivers. It also has auxiliary terminals on the back to power an additional rig, such as a 2 m rig. The main connector is the 6 pin molex connector that will match most Kenwood, Icom, and Alinco HF radios, as well as some Yaesu.
This particular unit works 100% and looks very nice.
Paper work included for $90.

TenTec 25 amp switching power supply:

"Switcher / 25" 25 amp switching power supply

This is a 25 amp switching power supply in a case that matches the early Omni series case, with the metal bezel around it. It is in a case that is the same size as a 243 remote VFO. It has an ammeter on the front, along with Switch, TenTec logo, and output bulb. The front panel basically looks like a 280 power supply with a metal bezel, but says "Switcher/25" on it. It is electrically very quiet, and well shielded. It does not produce any electrical noise

that I could find.

Of course it works fine, and looks fine also. $175

Pyramid PS-25 Power Supply (25 amps at 13 V DC):

The Pyramid PS-25 is a 13 Volt DC power supply with both a voltmeter and an ammeter built in. The output voltage is adjustable over a range from about 11.5 to 15.5 volts DC. There is also an adjustment to set the current limiting, up to 25 amps. This means it can be set so that it will protect the finals of a solid state rig. In addition, a buzzer is activated if it goes into over current limiting. This power supply has the features you want!

This particular unit works fine, and looks extremely nice.

With paper work for $80.

Kepco Variable Bench Power Supply:

This variable power supply is a Kepco Model CK 18-3, which means that it will produce up to 18 V DC at up to 3 amps. This is an ideal bench power supply!

The voltage is adjustable with a 10 turn pot from close to zero, up to almost 20 volts. There is a fairly large analog meter that reads the voltage. Built in current limiting is adjustable with a 10 turn pot from a few ma to up to about 3 amps. A separate meter reads the current, so both voltage and current can be read at the same time. Also, there are connections on the back to allow remote sensing and remote programming. This is a quality regulated power supply!

This particular unit works 100%, and looks extremely nice. $160

Kepco Variable Bench Power Supply:

This is an ideal bench power supply! It is a Kepco Model ABC 40-0.5, which means that it will produce from zero up to 40 V DC at up to 1/2 amp. Great for the bench.

The voltage is adjustable with a 10 turn pot from close to zero, up to about 40 volts. There is a fairly large analog meter that reads the voltage. There is also current limiting built in that is adjustable from about 100 ma to up to about 700 ma. The same meter that reads voltage can be switched to read current, or short circuit current (the point that the current limit is set). In addition, there are connections on the back to allow remote sensing and remote programming. This is a quality regulated power supply!

This particular unit works 100%, and looks extremely nice.

These normally sell for $125 to $150 (plus shipping).
Buy this one for $90.

Radio Shack 22-124 Regulated Power Supply
This supply is regulated and will furnish 13 V DC at up
to 2.5 amps. It works fine and looks extremely nice.
I do not find a scratch on it. $20

Olson RA-472 Bench Type Power Supply
This power supply is suitable for low current bench use.
It provides a variable voltage source from about 5 V DC
up to about 15 V DC. It has one knob for course voltage
that is labeled 6 V, 9 V and 12 V. An additional knob
will fine tune the voltage. I do not have specs on this
supply, but I would guess that it is good for maybe 1/3
to 1/2 amp current. It has an analog meter that seems
to be fairly accurate; at least it compares favorably
to my lab type DMM.
This unit is is a utility type power supply. $15

AEA AC-1 "Wall Wart" Power Supply

This "Wall wart" power supply will supply 12 V DC at
up to 1 amp.
It can be used with the AEA PK-232, PK-88 or others.

This unit has a 2.1 mm coaxial power plug, with the
center positive, so it can be used on many different
things that require about 12 V DC at up to an amp,
such as keyers, antenna tuners, etc.

This is a "regular" wall wart -- not the new switching
type that creates all sort of noise in your receiver.
Get this one, and leave the noise behind. $14

Yaesu NC-18 B Charger
Provides 14.5 V DC at 50 ma to charge many different HTs,
including the Yaesu FT-411, FT-811, FT-911, FT-23, FT-209,
FT-415, FT-410, FT-470, FT-727, FT-530, FT-703, and more.
Small 2.5 mm male plug. $10

Kenwood W09-0315 charger
This charger is used to charge the larger PB-21 H batteries
for the TH-21 series, and also on other Kenwood radios.
It has a standard 2.1 mm coaxial connector. $12

Icom DC-25 DC adapter :
This is a pack that is used on the Icom µ2AT, Icom µ4AT, and
on other HTs that use the BP-20, BP-21, BP-22, BP-23 and
BP-24 battery packs. It takes 13 V DC (such as from a
cigarette lighter), and converts it to the 9.4 V DC voltage
needed for the HT. It is used in place of a battery.
This one works fine and looks fine. $18

Icom BC-127 A, Battery Charger for Icom IC-Q7A
Dual Band HT:
This charger charges two AA NiCads (or NiMH) for the
IC-Q7 A Dual band HT, and Icom R-2 receiver, and probably
others.
This one appears to be new, unused, still in its bag.
Icom lists them at $21.
Buy this one for $12.

I also have many other accessories available such as many
different types of microphones, HTs, VHF and UHF rigs, HF
and VHF/UHF antennas, etc.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

6889. Antennas and related items FS

Yahoo group: ham4sale (2007 — 2015)
Date: 2012-03-10 15:18:46 UTC
From: Ken Simpson, W8EK
Topic: 5416 Message: 6889

Antennas and related items For Sale:

Doublet Antenna and "Window Line":

Doublet antenna consisting of about 110 feet of wire, with
center insulator, 2 end insulators, and 2 center supporting
insulators. This antenna is made to be fed with "open wire"
450 ohm transmission line, and used with an antenna tuner.
It should be able to tune from 80 thru 10 meters, with the
proper tuner. $20

"Windows Line" 450 ohm transmission line
This is similar to "open wire" transmission line, but has
some plastic insulation on it instead of being open, so it
is protected more. The openings look like windows, hence
the name. I have three lengths available. Two are about
50 feet long, and are $15 each. The third is over 80 feet
long, and is $25.

Hustler 4BTV HF Vertical Antenna:

The 4BTV is a vertical antenna that covers 10, 15, 20, and 40
meters. It can also cover 75/80 meters by using an RM-75
resonator.

This one is in extremely good shape. It actually still shines!
No corrosion evident. The actual base shows very minor signs
of being out in the weather, but the silent key who used it
was in a restricted community, and took the top part out of
the garage only when he wanted to get on the air.

Paper work is included for $120.

Hustler RM-75 resonator - standard version
(can be used to add 75 meters to 4BTV above) $19

I would prefer pickup near Ocala, Florida, just off of I-75.
It will easily fit inside a car. It is possible to ship it,
but the cost is high due to it being oversize. Obviously,
shipping is not included in the price.

MFJ 989, 3000 Watt rated, HF Antenna Tuner:

The 3 KW MFJ-989 features two massive transmitting capacitors
and a roller inductor with a three digit counter. You won't
have arcing problems with this roller inductor, because firm
springs put considerable pressure on a plated contact wheel.

You can tune your SWR down to the absolute minimum from 1.8 to 30 MHz, including MARS and the WARC bands. It has a super heavy duty balun for balanced lines.

You can select two coax antennas direct or through the tuner, balanced line or random wire, plus a built-in 50 ohm 300 watt dummy load. A wattmeter is also included.

This one works fine, and looks good, although there is some slight wear. The meter light has burned out. Paper work included for $175.

TenTec 229 HF antenna tuner:

This roller inductor tuner will handle full legal power. It uses an "L" match instead of a "T" match, which means there is only one spot that will give the correct match. The "L" match is also more efficient. Electrically, it is the same as the 238 series, 229 A, 229 B, and 4229.

There is also a built in wattmeter with full scale reading of 200 and 2000 watts. It also has an SWR bridge with lighted meter, plus a 4 position antenna switch.

It can be used on any HF frequency, including the WARC bands, as it is continuously adjustable. It has a built in internal balun, so open wire can be used.

Cosmetically, this unit is the color of the earlier Omni series (Omni 546, series A, B, and C) with the black vinyl covering, and nice aluminum trim around the front.

This particular unit functions 100%, and looks perfect. I can not find a scratch on it. Paper work is included for $325.

W2AU "Big Signal" 1 to 1 balun:

W2AU baluns operate at a low VSWR from 1.8 to 40 mHz, and handle powers up to 2 KW PEP (at SWRs of less than 3:1). W2AU Baluns are transformer designs with ferrite cores to provide 95% minimum coupling efficiency. Each has a built-in lightning arrestor, hang up hook, and 600 lbs of pull-apart strength in a weatherized, rugged package using only stainless steel hardware and quality materials.

This is the 1 to 1 model.
It appears that this one was never used. W2AU sells these for about $30. Buy this one for only $20.

MFJ 207 HF Antenna Analyzer:

The MFJ-207 10-160 Meter Antenna SWR Analyzer gives you a direct readout of your antennas SWR without the need for

formulas or indirect readings. The MFJ-207 can also be used
to adjust a tuner to match your antenna without the need
for transmitting. Its frequency coverage is approximately
from 1.75 MHz to 30 MHz in five bands.
The bands and coverage are approximately:
BAND A: 1.75 - 3.00 MHz
BAND B: 3.00 - 5.00 MHz
BAND C: 6.50 - 11.70 MHz
BAND D: 11.65 - 20.00 MHz
BAND E: 18.00 - 30.00 MHz

The MFJ-207 uses a 9V battery or 110VAC from a wall wart
power supply.

This one works fine, and looks fine. It is in its original box,
with paper work for $60.

Wall Wart power supply for use with the MFJ 207. $12

Buy both of the above for $70.

Heath HN-31 "Cantenna" RF Dummy Load:

This is the traditional Heath dummy load that will handle a
kilowatt. It has a derating curve both printed in the manual
and on the can.

It is in good shape both electrically and cosmetically. The
cantenna has no rust, dents or dings.

I can ship it either with or without oil. The cost to purchase
is the same, but of course the shipping will be higher with
the oil.

Paper work is included for $40.

Heath SB-634 Station Console, with Wattmeter and more:

The Heathkit SB-634 station console is a multifunction unit.
It contains a 24 hour digital clock (6 large digits, including
seconds), 10 minute interval timer (3 digits -- minutes and
seconds), phone patch and an SWR/Power meter. The large
wattmeter reads either 200 watts or 2000 watts full scale,
in addition to SWR. It matches the Heath SB series of equipment
(Heath green), and is powered by 115 V AC.

This unit works on all of its functions. It looks extremely
nice. I can not find a scratch on it, but there is very slight
(and I emphasize very slight) wear on the 2000 watt push button.
With paper work for $150.

HF and VHF SWR Bridges:

All of these cover from 3 to 150 MHz, covering HF,
6 meters,and 2 meters. SO-239 connectors.

Quement SWB-2
This unit features two separate meters --
one for reading forward power and another for reading SWR.
This permits one to easily monitor both the power going
out, and the SWR on the antenna at the same time. It works
fine and looks great. With paper work for $37.

Carter Craft 90-300
Single Meter SWR Bridge / Field Strength Meter
This one works fine. I am 99% certain it has not been used,
except for my testing it. In its original box with original
instructions and little field strength antenna. $30

Royce 2-100 Single Meter SWR Bridge / Field Strength Meter
This one works fine, and looks extremely nice. I do not see
any scratches on it, but it does have a previous owners name
on it. In its original box with original instructions. $28

Heath HM-2102 VHF Wattmeter:

Heath HM-2102 VHF wattmeter, covering 50 to 160 MHz.
Similar to the HM-102, but for VHF frequencies, with
250 and 25 watt scales. It can also be used to check SWR,
and has a remote sensor that can either be left inside
the meter, or separated from the actual meter by about
3 feet. SO-239 connectors in and out.

This particular meter works great, looks really great,
and includes paper work for $50.

Mobile Antenna Mounts:

Large, heavy duty magnetic mount
This large mag mount will take any antenna with a standard
3/8 inch 24 thread connector. It is very heavy duty, about
5 inches in diameter, with a long coax for $25.

Larsen NMO "Button" Mount
This mount fits into a 3/4 inch hole, and will then take any
of the many NMO types of antennas. Coax included.
It is in close to new condition. $15

Larsen NLA Type VHF Mobile Antenna for 2 meters:

This antenna fits the Larsen NLA mobile mount, which is
a special mount made by Larsen.

Larsen NLA-150, 2 meter antenna, for Larsen NLA mount
Has about 3 db gain on 2 meters.

This one works fine and looks fine also.

Coil only, without whip (whip is hard to ship). $10
With four foot whip. $19

Avanti "On Glass" mobile antenna for 440 MHz:

This antenna was made by Avanti to mount on a windshield, or other glass. It does not require a ground plane, as it is a 1/2 wave antenna, rated to have 3 db gain. It is ideal for places where a ground plane is not available, such as a boat or motor home, in addition to cars. A special tuning box is included to match to your particular situation.

This one is still in its original tube, unopened. $33

Rubber Duck antennas for your HT:

All are for 2 meters, are in good condition, and are $10 each, unless stated otherwise.

BNC - Original from Kenwood TH-215, about 5 inches long

BNC - Stubby about 4.5 inches long

5/16 inch threaded, as used by Motorola and others
Stubby - 4 inches long

Type F connector - 6.5 inches long

PL-259 connector - 6.5 inches long
HyGain 275, still in original packaging

PL-259 connector - Stubby - 4.6 inches long
Centurion, still in original package

Special for Kenwood TH-21 HT threaded connector
Stubby, about 4.5 inches long - $20

BNC Stubby for 440 MHz, 3 inches long

Low Pass TVI Filters:

A low pass TVI filter is added to the transmitter to reduce harmonic interference. All have SO-239 connectors, are 50 ohm filters, and include paper work.

Bencher YA-1, high power, low pass TVI filter
If you need a more heavy duty filter for the output of your amplifier, this one is ideal. It will take full legal power plus, and has at least 80 db signal attenuation at TV channel 2.This one works great, and looks close to new. Bencher currently sells these for about $90. Only $60.

Drake TV-3300-LP Low Pass Filter
This modern low pass filter has been optimized to have more

attenuation in the 40 MHz region, where many TVs have their
IF. It is good for 1000 Watts "average" according to the manual,
and has over 80 db attenuation at 41 MHz. This one looks great,
and includes the paper work. $30

Drake TV-1000-LP Low pass TVI filter
This is the filter that may also be used on the low end of six
meters, as well as HF. It is good for 1000 W "average" below
30MHz, and about 200 W up to 52 MHz. $30.

Drake TV-1000
LP Filter as above, which functions fine electrically, but
looks ugly. With paper work. $25

B & W FL-10/1500
This filter cuts off just above 10 meters, and handles 1500
Watts. It is the latest model B&W filter.In very nice condition,
it looks close to new. $40

Para Dynamics PDC 1089
This filter is rated at a full Kilowatt, up to 30 MHz.
5 x 6 x 2 inch black box, instead of the more familiar long
enclosure. It looks like new. $25

1970 ARRL Antenna Book
This is the 12th edition of this classic ARRL publication.
This one is in the older, smaller size, and is in very
nice condition. $12

ARRL Radio Amateur's VHF Manual
1966, 11th edition, $12

Coax connectors and adapters:

Prices are per connector. Several of each are available.
It looks like these have not been used.

"N" Connector - Double Male $8

BNC male for coax cables
tandard type $2
crimp on type $3

Chassis mount BNC female
square mount (uses 4 screws) $3
screw in type $3

BNC "T" - two female and one male $3

Antenna adapter to fit the BNC connector on the HT
and provide an SO-239 connector that will permit
a PL-259 to be attached. (BNC male to UHF female) $5

UHF Male (PL-259) to BNC female (opposite of above) $5

UHF double female "Barrel connector" (two SO-239 together) $3

UHF "Bulkhead Connector" - Double female, as above, but for mounting thru a window, siding, etc. about 3 inches long $6

UHF double male connector (two PL-259's together) $3

UHF "T" connector with two female (SO-239) and one male (PL-259) connection $5

I also have many other accessories available such as many different types of microphones, HTs, VHF and UHF rigs, HF and VHF/UHF antennas, etc.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

6907. FS: Signalink USB

Yahoo group: ham4sale (2007 — 2015)
Date: 2012-03-22 22:03:58 UTC
From: kv7gbud
Topic: 6907 Message: 6907

Signalink USB in excellent condition, no marks or blemishes.
With both 8 pin Kenwood mic cable and 13 pin Kenwood cable to acc. socket.
Have been using with my TS-2000, works fine but I decided to try the Navigator.
$85.00 delivered to lower 48.

6908. Microphones FS

A large variety of microphones For Sale -- Desk Mics,
Hand Mics, DTMF Touch Tone mics, speaker mics, etc.

Kenwood MC50 / MC-60 Desk Microphone:

I know. How can the mic be an MC-50 and also an MC-60?
Actually, it is an MC-50 desk mic, configured like an MC-60.
It is an MC-50, but to the right of the main stem coming
from the base, a bat handle toggle switch has been added
for Up / Down selection. This has been done very neatly,
and it looks good, as well as functioning well. In
addition, the connector has been changed to a round 8 pin,
wired for Kenwood. So it functions like an MC-60.
Of course the MC-50 can have the connector to the mic
reversed for either high or low impedance.

This one works fine and looks fine also. I will include
both MC-50 and MC-60 paper work with it for $60.

Deluxe Desk Microphone:

This is a great looking and great performing low impedance
desk mic. It has a quality Shure 600 ohm cartridge in it
(the cartridge alone is over $40 new), with a very nice
black die case base and neck, with a chrome grill. It
looks somewhat like a Shure 444, but no plastic on this
one -- all metal!

This one has stripped and tinned ends on it, which means
any connector can easily be added.

This one looks like new, and works the same. It has a
long (approx 6 foot) cord. $70

Astatic Model 810-6 Gooseneck Microphone:

This mic is on a 12 inch gooseneck. The mic is a brushed
metal about 5 1/4 inches long, and is actually part of the
gooseneck. The cable goes thru the gooseneck. This has a
2 conductor shielded cable, so it is a quality balanced
microphone with low impedance. The gooseneck terminates
in a standard 5/8 inch threaded connector.

This one works fine and looks good. $45

Kenwood MC-30 noise canceling hand microphone:

The Kenwood MC-30S noise cancelling mic is used on many of
the older Kenwood rigs, including the TS-120, TS-130, TS-520,
TS-820, and many, many more.

Most had a 4 pin connector, but this one has a 5 pin connector
on it. It looks original. Apparently this was the original mic
on the Kenwood TR-7600/7625, and maybe others. The 5 pin
connector also matches some of the 10 meter ham rigs.
Of course the connector can be changed.

The mic works fine and looks very close to new.

Paper work included for $35.

Hand Microphone with round 8 pin plug for Kenwood / Alinco / ADI

This hand mic works great on most Kenwood rigs with the
round 8 pin connector, such as the TS-430, TS-440, TS-570,
TM-241, TM-2530, TW-4000, and others, including Alinco and
ADI. It says "Electret Condenser Mic" on it, with no
model number.

Basically, this mic is like an MC-43, with a couple
more features. It has the mic and PTT switch; it also has
up/down switches on the top. There are four "extra" buttons
labeled Call, VFO, MR, and PF. What these four buttons do
depends on the rig. They will function on some rigs, and
are completely useless on others. There is also a "Lock"
switch on the back.

Regardless if you use the four extra buttons or not, you
still have a mic that works like an MC-43.

This mic works fine, and looks like new. I am guessing it
came with a rig, and was immediately put in the drawer. $28

As above, but with 8 pin modular connector. $30

Shure EM-33D, controlled magnetic hand microphone:

The Shure EM-33D was used by GE on many of their rigs.
This mic has a controlled magnetic cartridge, similar to
the Shure 444 desk microphone, but this one is a hand mic.
Apparently it is tailored for voice communications "punch"
like the 444's.

This one works fine and looks OK, although it does show some
use. It presently has a 1/4 inch stereo connector on it as
used by early TenTec, Swan, and many others.

The cartridge alone is worth $40. Buy this entire mic for $40.

Yaesu Hand Microphones:

Yaesu YM-31 hand microphone
The Yaesu YM-31 is a hand mic with a round 6 pin connector. Apparently it is either similar or the same as the MH-25A6j (not the MH-25 with the 8 pin connector). It is a 600 ohm impedance hand microphone, and has a Monitor on-off switch on the back. It should be compatible with any of the Yaesu rigs that uses the round 6 pin connector. It looks very similar to the Yaesu MH-1.
This one works fine and looks extremely nice. $25

Yaesu YM-22 DTMF Condenser Microphone
This mic has a 16 digit touch tone (DTMF) pad on the front. There are up and down buttons on the top, in addition to the PTT switch. Stripped and tinned ends. Great condition. $40

DTMF Touch Tone Microphones:

CES 610 L DTMF Touch Tone Mic
Can manually dial a number, or automatically store it in the mic, and "speed dial". 12 digit touch tone pad on the front. 8 pin modular plug (like computer LAN).
Looks to be new. $38

KDK Model TM-2 DTMF Mic
With touch tone pad and up-down switches. It presently has a round 8 pin connector wired for Kenwood.
Nice condition. $40

Johnson 250-0761-010 / CES 655 L DTMF Mic
It has a 12 digit pad on the front, and is a rugged mic. Presently with 4 pin plug.
Looks to be unused. $38

Yaesu YM-22 DTMF Condenser Microphone
This mic has a 16 digit touch tone (DTMF) pad on the front. There are up and down buttons on the top, in addition to the PTT switch.Stripped and tinned ends. Great condition.
$40

Speaker Microphone / Antenna Extender:

Niche MS-105 Speaker Microphone, plus extender for BNC Rubber Duck antenna. This is the speaker mic that is often clipped up high on the shoulder by police and fire personnel. In addition to being a speaker mic, it has a BNC connector on both the speaker mic end, and on the opposite end, so that the BNC rubber duck can be raised to a higher location. The speaker mic connection is the 2.5 mm and 3.5 mm combo connector as used in most Icom, Alinco, some Yaesu, and many others.

This one works fine and looks very close to new. $30

Speaker Microphone for Yaesu VX-1, VX-2, VX-3, VX-5, etc.

Pryme Speaker Microphone
This is the Pryme equivalent of the Yaesu MH-34. It has
the 4 conductor 1/8 inch plug on it. It works 100% and
looks like it has not been used. $25

HT Speaker Microphones:

All of these have the 3.5 mm and 2.5 mm plugs on them,
as used by Icom, Alinco, Radio Shack, some Yaesu, and
other HTs.

Azden SDX-316
This is the rounder style speaker mic that fits nicely in
the palm of your hand. $20

Pryme Speaker Microphone
It works fine and look line new. $20

MFJ-284 Speaker Microphone
Fits most Icom, Yaesu, Alinco 560, Santec ST-20, and others.
It works great, and looks like new. $15

MFJ-287 Speaker Microphone
This fits the TH-21/31/41 series HTs, TH-205, TH-215, TH-415,
as well as others. It has a 3 conductor 3.5 mm plug and a 2
conductor 2.5 mm plug.It works fine, and looks close to new. $15

Cables for Heil (and other) Microphones:

Heil CC-1 XLR 4
3 pin XLR Male to 4 pin XLR Female $25

3 pin XLR to stripped and tinned ends
About 10 feet of quality rubber covered mic cable with a 3 pin
XLR connector on one end, and nothing on the other end. Ideal
to add your own connector. Can be used with the CC-1 XLR-4
above. $20

Heil round 8 pin connector to 8 pin modular connector for Icom
Not positive of the number, but it might be HSTA-IM or HSTA-706
$15

I also have many other items available such as many
different types of various ham accessories, microphones,
HTs, VHF and UHF rigs, HF and VHF/UHF antennas, etc.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

6910. Tubes

Yahoo group: ham4sale (2007 — 2015)
Date: 2012-03-25 11:04:41 UTC
From: Fred
Topic: 557 Message: 6910

You need tubes I might have what you need. My old mentor that has been into ham radio for 60+ years let go of pickup bed of his old tubes. This is all receiving tubes, rectifier tubes, old vibrator tubes, and old metal military tubes. Tubes from 20's, 30's and up. Some hard to find tubes now a days. Some are still in original boxes. There are new ones and used ones. He checked them to see if they were good before he kept them. He repaired the old table top and the stand up radios in his later years so have tubes from those eras. Have plastic tubs full of small tubes if you want a grab box of tubes. I will not sort through them. Have some metal shields that fit over tubes for different applications. If you have a need for an old tube give me a description or a picture of what it looks like so I know what to look for. Or I might spend hours looking for tube in a haystack. Also have books on the old antique radios and old car radios. The car radio books have the schematics for them if you are a collector of old electronic books. Have some old military radio books too. If I don't have right one I might have a substitute for it. I have a reference book or you might know what will work for your needs. E-mail me with your wants. Good on QRZ. Fred N5WBK

6915. FS: SX-99 and R-44

Yahoo group: ham4sale (2007 — 2015)
Date: 2012-03-25 16:42:05 UTC
From: ROBERT
Topic: 6915 Message: 6915

For Sale: Hallicrafters SX-99 and matching R-44 speaker from the 1950's.

Cometically the SX-99 is in very good shape. Just some missing letters near the standby switch. The receiver works althought it should be resotred. I received some SW broadcast stations and some 20 meter CW. All the controls seem to work OK. The tuning dials both work. The volume control is scratchy. Turning on the AVC causes the S meter to jump to S9+20 and the speaker terminal strip is broken.

The R-44 speaker is in rougher shape. The cabnet paint could use a good scrub. Ther is some paint missing from the speaker grill.

Pictures available at www.k2qpn.ham-radio-op.net/sx99

BTW, the equipment is owned by a local ham's widow. All the money goes to her. Asking $150.00.

VHF and UHF (2 meter and 440 MHz) Equipment For Sale -
2 meter HT, dual band HT, 2 m mobile rig for parts,
HT accessories such as speaker mics, rubber ducks, etc.,
SWR Bridges, mobile antennas and mounts, DTMF Touch
Tone and regular Microphones, and more:

Kenwood TH-235 Two Meter FM HT:

The Kenwood TH-235A Two meter HT has a large easy-to-read
LCD, 60 channel memories with scanning and ten DTMF
memories. Extended receive is 136-174 MHz so it includes
the weather frequencies. When used on external DC power
you will get a full 5 watts output. With the included
PB36 battery pack, it produces 1.5 watts. The low power
setting is 0.5 watts.

Features
Backlit LCD Display
60 Memories
Scanning
Battery Saver
Built-In CTCSS Encode
Extended Receive

This particular unit works 100% and looks like it just came
out of the box new. It came from a silent key who I don't
think ever used it. This one includes the desk charger,
rubber duck antenna, belt clip, and paper work for $115.
I added a new PB-36 battery, as the old one had been in
the drawer long enough that it is not in good condition.

Cigarette lighter power cord for TH-235 above. $12

Alinco DJ-580 dual band (2m and 440 MHz) HT:

This HT receives from 110 to 174 MHz in the VHF position,
which includes the AM Aircraft band. 440 to over 480
MHz in the UHF position. Of course it transmits in the
2 meter and 440 MHz ham bands. It is my understanding
that it can also be modified to receive into the 800
and 900 MHz region. It will also cross band repeat,
and is an extremely rugged radio.

Power output has 3 different levels. With the
7.2 V battery packs, it has 0.25 W / 1 W / 2.5 W.
If used with the larger 12 V batteries, it will
produce 0.25 W / 1.2 W / 5 W.

This particular unit is in very good shape, both
electrically and cosmetically. The keyboard has very
crisp and clear lettering. It includes desk charger,
rubber duck antenna, belt clip, wrist strap, battery,
and paper work. $130

Alinco Protective Battery Plate
This is a "dummy" plate that slides on to the HT in place
of the battery. It is used when powering the HT from an
external power source (such as the EDC-36), to
prevent the battery terminals from being exposed and
causing accidents. $10

Alinco Carrying strap - Like new. $4

Speaker Microphone for Yaesu VX-1, VX-2, VX-3, VX-5, etc.

Pryme Speaker Microphone
This is the Pryme equivalent of the Yaesu MH-34. It has
the 4 conductor 1/8 inch plug on it. It works 100% and
looks like it has not been used. $25

Other HT Speaker Microphones:

All of these have the 3.5 mm and 2.5 mm plugs on them,
as used by Icom, Alinco, Radio Shack, some Yaesu, and
other HTs.

Azden SDX-316
This is the rounder style speaker mic that fits nicely in
the palm of your hand. $20

Pryme Speaker Microphone
It works fine and look line new. $20

MFJ-284 Speaker Microphone
Fits most Icom, Yaesu, Alinco 560, Santec ST-20, and others.
It works great, and looks like new. $15

MFJ-287 Speaker Microphone
This fits the TH-21/31/41 series HTs, TH-205, TH-215, TH-415,
as well as others. It has a 3 conductor 3.5 mm plug and a 2
conductor 2.5 mm plug.It works fine, and looks close to new. $15

HF and VHF SWR Bridges:

All of these cover from 3 to 150 MHz, covering HF,
6 meters,and 2 meters. SO-239 connectors.

Quement SWB-2
This unit features two separate meters --
one for reading forward power and another for reading SWR.
This permits one to easily monitor both the power going
out, and the SWR on the antenna at the same time. It works

fine and looks great. With paper work for $37.

Carter Craft 90-300
Single Meter SWR Bridge / Field Strength Meter
This one works fine. I am 99% certain it has not been used, except for my testing it. In its original box with original instructions and little field strength antenna. $30

Royce 2-100 Single Meter SWR Bridge / Field Strength Meter
This one works fine, and looks extremely nice. I do not see any scratches on it, but it does have a previous owners name on it. In its original box with original instructions. $28

Larsen NLA Type VHF Mobile Antenna for 2 meters:

This antenna fits the Larsen NLA mobile mount, which is a special mount made by Larsen.

Larsen NLA-150, 2 meter antenna, for Larsen NLA mount
Has about 3 db gain on 2 meters.

This one works fine and looks fine also.

Coil only, without whip (whip is hard to ship). $10
With four foot whip. $19

Mobile Antennas for 440 MHz band:

"On Glass" mobile antenna for 440 MHz:
This antenna was made by Avanti to mount on a windshield, or other glass. It does not require a ground plane, as it is a 1/2 wave antenna, rated to have 3 db gain. It is ideal for places where a ground plane is not available, such as a boat or motor home, in addition to cars. A special tuning box is included to match to your particular situation.
This one is still in its original tube, unopened. $33

Larsen NLA Type Mobile Antenna:
This antenna fits the Larsen NLA mobile mount, which is a special mount made by Larsen.
Larsen NLA-UHF coil for 440 MHz
This is the coil only for use on the amateur 440 MHz band and UHF public service bands. Good condition. $10

Mobile Antenna Mounts:

Large, heavy duty magnetic mount
This large mag mount will take any antenna with a standard 3/8 inch 24 thread connector. It is very heavy duty, about 5 inches in diameter, with a long coax for $22.

Mag mount with 1/4 inch stud
Male 1/4 inch 20 thread stud sticking out the top, with
about 15 feet of RG-58 coax. $12

NMO "Luggage rack mount"
This NMO mount will attach to a luggage rack. The bracket
is made so it can attach to either a vertical or horizontal
portion. It is heavy chrome plated, with stainless steel
hardware, and is quite heavy duty for NMO. With 17 feet coax
and PL-259. It looks to be new. $18

NMO "Button" Mount
This mount fits into a 3/4 inch hole, and will then take any
of the many NMO types of antennas. Coax included.
It is in close to new condition. $12

Rubber Duck antennas for your HT:

All are for 2 meters, are in good condition,
and are $10 each, unless stated otherwise.

BNC - Original from Kenwood TH-215, about 5 inches long

BNC - Stubby about 4.5 inches long

5/16 inch threaded, as used by Motorola and others
Stubby - 4 inches long

Type F connector - 6.5 inches long

PL-259 connector - 6.5 inches long
HyGain 275, still in original packaging

PL-259 connector - Stubby - 4.6 inches long
Centurion, still in original package

Special for Kenwood TH-21 HT threaded connector
Stubby, about 4.5 inches long - $20

BNC Stubby for 440 MHz, 3 inches long

DTMF Touch Tone Microphones:

Yaesu YM-22 DTMF Condenser Microphone
This mic has a 16 digit touch tone (DTMF) pad on the front.
There are up and down buttons on the top, in addition to
the PTT switch.Stripped and tinned ends. Great condition.
$40

CES 610 L DTMF Touch Tone Mic
Can manually dial a number, or automatically store it in
the mic, and "speed dial". 12 digit touch tone pad on the
front. 8 pin modular plug (like computer LAN).
Looks to be new. $38

KDK Model TM-2 DTMF Mic
With touch tone pad and up-down switches. It presently
has a round 8 pin connector wired for Kenwood.
Nice condition. $40

Johnson 250-0761-010 / CES 655 L DTMF Mic
It has a 12 digit pad on the front, and is a rugged mic.
Presently with 4 pin plug.
Looks to be unused. $38

Hand Microphone with round 8 pin plug for Kenwood / Alinco / ADI

This hand mic works great on most Kenwood rigs with the
round 8 pin connector, such as the TS-430, TS-440, TM-241,
TM-2530, TW-4000, and others, including Alinco and
ADI. It says "Electret Condenser Mic" on it, with no
model number.

Basically, this mic is like an MC-43, with a couple
more features. It has the mic and PTT switch; it also has
up/down switches on the top. There are four "extra" buttons
labeled Call, VFO, MR, and PF. What these four buttons do
depends on the rig. They will function on some rigs, and
are completely useless on others. There is also a "Lock"
switch on the back.

Regardless if you use the four extra buttons or not, you
still have a mic that works like an MC-43.

This mic works fine, and looks like new. I am guessing it
came with a rig, and was immediately put in the drawer. $28

As above but with 8 pin modular connector. $30

Yaesu Hand Microphones:

Yaesu YM-31 hand microphone
The Yaesu YM-31 is a hand mic with a round 6 pin
connector. Apparently it is either similar or the
same as the MH-25A6j (not the MH-25 with the 8 pin
connector). It is a 600 ohm impedance hand microphone,
and has a Monitor on-off switch on the back. It should
be compatible with any of the Yaesu rigs that uses the
round 6 pin connector. It looks very similar to the
Yaesu MH-1.
This one works fine and looks extremely nice. $25

Yaesu YM-22 DTMF Condenser Microphone
This mic has a 16 digit touch tone (DTMF) pad on the front.
There are up and down buttons on the top, in addition to
the PTT switch. Stripped and tinned ends. Great condition. $40

Small Power Supplies:

Radio Shack 22-124 Regulated Power Supply
This supply is regulated and will furnish 13 V DC at up
to 2.5 amps. It works fine and looks extremely nice.
I do not find a scratch on it. $20

Olson RA-472 Bench Type Power Supply
This power supply is suitable for low current bench use.
It provides a variable voltage source from about 5 V DC
up to about 15 V DC. It has one knob for course voltage
that is labeled 6 V, 9 V and 12 V. An additional knob
will fine tune the voltage. I do not have specs on this
supply, but I would guess that it is good for maybe 1/3
to 1/2 amp current. It has an analog meter that seems
to be fairly accurate; at least it compares favorably
to my lab type DMM.
This unit is is a utility type power supply. $15

Accessories for Kenwood TH-205, TH-215, TH-225, TH-415,
and other HTs in this series:

MFJ 287 Speaker Microphone
This was used on a Kenwood TH-225 HT, but it also fits the
TH-21/31/41 series HTs, TH-205, TH-215, TH-415, as well as
others. It works fine, and looks close to new. $15

Kenwood Wrist Strap for TH-215, plus many other HTs. $4

Original Kenwood Rubber Duck antenna from TH-215. $10

Kenwood BC-2 Charger for PB-2 batteries. $12

BNC to PL-259 antenna adapter
Antenna adapter to fit the BNC connector on the HT and provide
an SO-239 connector that will permit a PL-259 to be attached.
This adapter can be used on any HT with a BNC connector. $5

Accessories for the Kenwood TH-21 / 31 / 41 series HTs:

Original Operating manual for TH-21 HT for 2 meters $8

Kenwood BH-3 belt clip and hardware for Kenwood
TH-21/31/41series HTs. $6

MFJ 287 Speaker Microphone
This was used on a Kenwood TH-225 HT, but it also fits the
TH-21/31/41 series HTs, TH-205, TH-215, TH-415, as well as
others. It has a 3 conductor 3.5 mm plug and a 2 conductor
2.5 mm plug. It works fine. $15

Kenwood W09-0315 charger
This charger is used to charge the larger PB-21 H batteries
for the TH-21 series, and also on other Kenwood radios.
It has a standard 2.1 mm coaxial connector. $12

Kenwood Rubber duck antenna for the TH-21 HT
Shorter "Stubby Duck" from Kenwood. $20

Yaesu HT Accessory Items:

Pryme Speaker Mic
This is the equivalent of the Yaesu MH-34.
It fits the Yaesu HTs with the 4 conductor 1/8 inch
(3.5 mm) plug, such as the VX-1, VX-3, VX-5, etc.
It looks like it has not been used. $28

Belt Clip for Yaesu FT-207, with hardware. $8

Wrist Strap for Yaesu FT-209, and others $4

Santec HT Accessories:

Leather Case for Santec HT
This is a real Bianchi Leather case -- not a vinyl case.
It fits most of the Santec HTs, such as the HT-1200, ST-142,
ST-144, ST-440, etc. The real leather case includes a built
in belt clip, plus a removable leather shoulder strap.
The case itself is in very nice shape. The leather
shoulder strap has not been used. $25

Santec ST-142/144 "Service Pack"
This is similar to a service manual, but Santec calls it a
service pack. It has schematics, circuit explanations,
voltages, etc. $18

Antenna adapter to fit the BNC connector on the HT and provide
an SO-239 connector that will permit a PL-259 to be attached.
This adapter can be used on any HT with a BNC connector. $5

Accessories for the Azden PCS-300 HTs:

Azden SDX-316
This is the rounder style speaker mic that fits nicely in
the palm of your hand. Has 3.5 mm and 2.5 mm plugs for
Azden, Icom, some Yaesu, and others. It works great, and
looks great also. $20

Battery charge adapter for Azden PCS-300 HT
This is an adapter that permits one to charge the battery
of the Azden PCS-300, 2 meter HT, outside of the HT itself.
Usually, one must have the battery inside the HT, but this
lets you charge a second battery outside of the HT. The
original charger is used. If you have a PCS-300 HT, you
need this adapter.
It works fine, and looks like new. $3

Antenna adapter to fit the BNC connector on the HT and provide
an SO-239 connector that will permit a PL-259 to be attached.
This adapter can be used on any HT with a BNC connector. $5

Icom BC-127 A, Battery Charger for Icom IC-Q7A
Dual Band HT:

This charger charges two AA NiCads (or NiMH) for the
IC-Q7 A Dual band HT, and Icom R-2 receiver, and probably
others.

This one appears to be new, unused, still in its bag.
Icom lists them at $21.
Buy this one for $12.

Icom DC-25 DC adapter:

This is a pack that is used on the Icom µ2AT, Icom µ4AT, and
on other HTs that use the BP-20, BP-21, BP-22, BP-23 and
BP-24 battery packs. It takes 13 V DC (such as from a
cigarette lighter), and converts it to the 9.4 V DC voltage
needed for the HT. It is used in place of a battery.

This one works fine and looks fine. $18

HT Belt Clips and Wrist Straps:

Belt Clips:
All include the hardware with the belt clip and are $6 each.
Kenwood BH-3 for Kenwood TH-21 / 31 / 41 series HTs
Motorola
Yaesu FT-207

Wrist Straps for various HTs - $4 each
Kenwood TH-215 / 225 / 415, TR-2500, etc.
Kenwood TR-2400
Yaesu FT-209

Crystals for 2 meter ham rigs:

Does anyone have an older two meter ham rig and need crystals?

Maybe I can help. I have some 2 meter crystals available -- both
transmit and receive. Most are in the 146 and 147 MHz band segments,
with very, very few in the 145 MHz segment, and none in the 144 MHz
segment. These are for ham rigs only, and not commercial rigs.

These are all the small HC-25 crystals, like are used in most of the
solid state 2 meter mobiles and HTs. Please e-mail the operating
frequency you need. I have them listed by operating frequency and
rig,and not by actual xtal frequency. Send the frequencies you need
(transmit or receive), and the rig that you have, and I will see if
I can help. I have cross references for the various rigs, so I will
know what you need if you give the rig.
Crystals are $6 each.

I also have many other accessories available such as many
different types of microphones, HTs, VHF and UHF rigs, HF

and VHF/UHF antennas, etc.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

6920. MeterBuilder MB-1 RF Power/SWR Meter

Yahoo group: ham4sale (2007 — 2015)
Date: 2012-04-01 00:32:28 UTC
From: phil_ad5x
Topic: 6920 Message: 6920

Up for sale is my assembled, tested and calibrated MB-1 programmable RF power/SWR meter. See eHam reviews at www.eham.net/reviews/detail/10094, and my detailed review in the "Equipment Reviews" section of my website at www.ad5x.com. More information is available at www.meterbuilder.com, including overview and operation videos.

This MB-1 was calibrated with my NIST-traceable test equipment. It includes the optional expansion IC and external expansion components, a compact 12VDC 2-amp stand-alone power supply, a separate DC interface cable with PowerPole connector for powering from your station supply if desired, and two calibrated MB1-HF 160-6 meter couplers with interface cables. I set up the two couplers on the COUPLER 1 and COUPLER 2 MB-1 inputs (four coupler inputs are available) to monitor two separate transceiver outputs. Price is $425 shipped/insured in the US. PayPal, check or money order.

Vintage Ham Publications For Sale:
Mainly ARRL, but some others

ARRL Handbooks

1973 - 50th edition -
This one is in the smaller format, which means it has
tube charts and vintage ads.
It is in very nice condition, although the pages have
yellowed slightly. $14

1985 - 62nd edition
This one is in the larger format. It has been "well used"
and has some loose pages, but I think they are all there.
The binding has duct tape on it, but the important info
is still there. $7

1988 - 65th edition - Hard bound
This one is a couple inches thick.
Very close to new condition. $22

1992 - 69th edition - Hard Bound
Several inches thick with a lot of information.
This one looks like new, except for a previous owner's
call sign on the inside cover. $22

Other Vintage ARRL Publications:

These are in the smaller 6.5 x 9.5 inch format.
Most have some very nice vintage ads in them.
All are very pristine, in close to new condition.

ARRL Radio Amateur's VHF Manual
1966, 11th edition, $12

ARRL Hints and Kinks for the Radio Amateur
1968, Close to new condition, Collectible. $12

ARRL Single Sideband for the Radio Amateur
1970, Fifth edition, $12

ARRL Specialized Communications Techniques
1975, First Edition, $15

The next two are in the larger 8.5 x 11 inch format.

ARRL Understanding Amateur Radio
1977, no edition number listed, $8

ARRL Learning to Work with Integrated Circuits, First edition $10

ARRL Books about Operating your ham station:

ARRL "Radio Amateurs Operating Manual"
2nd edition, $8
5th edition, over an inch thick, $12

ARRL "Operating an Amateur Radio Station"
1972 - 53rd edition $4
1976 - 57th edition $3
1978 - 58th edition $3
1983 - 61st edition $3

ARRL "Public Service Communications Manual"
1985 - 9th edition - $3
No date listed, $3

ARRL Amateur Radio Field Resources Directory
First edition, $7

CQ: The Packet Radio Operators Manual
By Buck Rogers, K4ABT, Close to new condition, $14

Vintage ARRL Licensing materials:

Check and see what the FCC tests were like in the past!

All books are in excellent condition, with some in very
close to new condition.

ARRL Tune in the World with Amateur Radio
1976, First Edition $3

ARRL Now You're Talking
1993, 2nd edition $10

ARRL Tech Q & A, 1997, First Edition $8

ARRL License Manuals - $3 each
1977, 76th edition, All classes
1984, 80th edition, All classes

Technician Class
1989, First Edition
1993, Second Edition

General Class
1989, First Edition

Advanced Class
1985, First Edition
1990, Third Edition
1996, Fourth Edition

Extra Class, 1988, Third edition

Vintage Ameco Ham Licensing Publications:

These are all Ameco Publications that are in
extremely nice, close to new, condition.

Ameco "Complete Technician Radio Amateur FCC Test Manual"
1992 $3

Ameco "General Class Radio Amateur FCC Test Manual"
1984, Like new $4
As above, but includes 1988 questions and answers $4

Ameco "Advanced Class Radio Amateur License Guide"
First Edition, 1981, like new $5

Ameco "Advanced Class Radio Amateur FCC Test Manual"
Copyright 1987, with added 1991 material
First Edition, Like New $6

Miscellaneous Licensing material:

General Class License Manual by Gordon West, WB6NOA
Second Edition - Like New - $3
Fifth Edition - Like new - $5

Upgrade to General Class by Don Stoner, W6TNS
1992 - $4

Advanced Class License Manual by Gordon West, WB6NOA
"New Edition" - Second Edition - 1995 - $4

Radio Amateur "Flying Horse" Callbooks:

All are in extremely nice condition, close to new.

1981 Foreign "DX" Callbook - $5

1994 International "DX" Callbook - $8

1995 North American "US" Callbook with over
700,000 listings, including Canadian - $10

Digital and Satellite Books:

Your Packet Companion by Steve Ford, WB8IMY
ARRL, 1995, First Edition, $5

The Radio Amateur's Digital Communications Handbook
By KR3T, J Mayo, Published by Tab, Hardback Book,
Like New, 208 pages, 1992, $12

The Packet Radio Operators Manual published by CQ
By Buck Rogers, K4ABT, 1995, Close to new condition, $12

Tab Books:
"Oscar: The Ham Radio Satellites"
by recent silent key Dave Ingram, K4TWJ
First Edition, Hardback, Like new, $14

FCC Rule Books and other ham publications:

ARRL "FCC Rulebook"
Seventh edition, $3
Eighth Edition, $4
As above, but "Newly Revised to include Codeless
.....Technician" - Like New, $6
13th edition $10

W5YI
"Ham Operator Education Package" $4
"Rules and Regulations - Part 97 Amateur Radio Service"
Fourth Edition $3
17th Revised Edition $4

ARRL Public Service Communications
Ninth edition, $3
no edition number listed, but fairly recent $3

World Atlas, World Map, and DXCC List:

Radio Amateur World Atlas - 13th edition
Includes many different maps of the world with
ham prefixes on them.
Nice condition $8

The Radio Amateur World Map by Yaesu
This wall map is approx 34 x 24 inches in size.
It includes the ham prefixes on the various countries.
It appears to never have been used. $8

ARRL DXCC Countries List
This is a large check list for working the various
countries, and also includes other information such
as prefixes, applications, etc. New condition $4

Ham CDs:

Set of Extra Class CDs
This is a set consisting of six CDs. I am not certain who
made them or where they came from, other than they came
from the drawer of a silent key. They simply say "Extra
Class, Volume 1", "Extra Class Volume 2", etc. on them.
$18 for the set of six.

ARRL Morse Code Exam
5 WPM version, sent at 15 WPM, but spaced for 5 WPM, with
750 hz tone $7

Prices do not include shipping from Florida.

I also have many other accessories available such as many different types of HTs, VHF and UHF rigs, HF and VHF/UHF antennas, etc.
Just too many to list here. Please e-mail your requests.

Thanks.

6922. Icom 746PRO for trade

Yahoo group: ham4sale (2007 — 2015)
Date: 2012-04-01 21:14:05 UTC
From: John G.
Topic: 6922 Message: 6922

I have an Icom 746PRO that is a nice rig but doesn't quite fit into my station plans, so I am looking to trade it for something else. The Icom 746PRO is an all mode radio that covers from 160-2m, doing 100 watts on all band, including 100 watts on 2m! It has IF level Digital Signal Processing for noise reduction and filtering, so no optional filters are needed. It also has a built in autotuner and memory keyer. Most of you are probably familiar with this radio by now.

I would be interested in a radio that does dual receive, like an Icom 756 or 756PRO or Kenwood TS950, or a radio with 432mhz on it like a Kenwood TS2000 or Yaesu FT847 or FT897D. I am always open to other offers, though. You never know what I will take. Maybe a ham bands only rig with a good noise blanker like an Icom 740 or Ten Tec Omni or Corsair II.

Of course I would always trade it for cash also!

Anyone interested in a trade?

John AF5CC

6923. Comet CMX-2300 Twin Cross Needle SWR/Wattmeter-One Day Old!

Yahoo group: ham4sale (2007 — 2015)
Date: 2012-04-02 00:43:46 UTC
From: Pete Ferrand
Topic: 6923 Message: 6923

Went to the AES Superfest in Milwaukee yesterday and won this as a door prize…been thirty years since I've won a door prize. I don't want to seem ungrateful to AES, which sells this meter for $224.99, but I can't use it due to a visual handicap. So you can have it for $185 plus shipping if needed.

There are two meters, the left for 1.8 to 200 MHz, covers three ranges up to 3000 watts. The right meter covers 140 to 525 MHz in three ranges to 200 watts. Being cross needle, both forward and reverse are displayed at the same time. These meters can be used at the same time.

Plus, the meter can be switched to read either average or peak. There are two BNC connectors for 30 db attenuated signal outputs for scope or modulation monitoring.

Meter LEDs for the multi-color display require 11-15 vdc and the cable with connector is included. Dimensions (approx.) 10" W x 5.25" D x 3.75" H Weight 3.5 pounds. You get the meter, box, manual, and power cord.

Here's the manual:

http://radio.freeshell.org/sources/CMX-2300T_man.pdf

It's brand new in the box, no point in a photo when there are nice ones on the web:

http://tinyurl.com/bortmpw

· In-person pickup in the Chicago-Milwaukee area welcome
· Payment by PayPal or USPS MO in U.S. funds only
· Shipment will be within 2 days of receiving payment
· Tracking number will be sent when issued by carrier
· Shipping charges will be what I pay the carrier
· As-is-as-described and not returnable

Thanks!

6927. homebrew IRLP compatible interfaces for sale

Yahoo group: ham4sale (2007 — 2015)
Date: 2012-04-02 04:13:15 UTC
From: Kyle
Topic: 6927 Message: 6927

Hello,

I have two homebrew fully-compatible IRLP interfaces for sale. Units are built in an enclosure, not designed for mounting in a PC.

Has DB25 connector for parallel port, +12-18v input, a DB9 for PTT, COS and 4 RCA connectors for Aux 1,2,3 and DTMF input.

Features a MT8870 hardware DTMF decoder, and selectable negative/positive PTT keying and negative/positive COS.

Contact me off list if interested.

This type of interface can be used with Asterisk (app_rpt), IRLP, Thelinkbox or RtpDir software to interface your radios for Echolink, IRLP, Asterisk or perhaps other VOIP type systems.

I have a Yeasu Ft-990 that has been dropped on its face breaking the readout and pushing the VFO back through three pc boards. I am looking for a compete faceplate that includes the VFO, all the buttons, knobs, pc boards etc. Please email me at jimmydunahoo@... or call at ph#: 517-285-1496.

6939. Kenwood TS790A for trade or sale

Yahoo group: ham4sale (2007 — 2015)
Date: 2012-04-10 17:02:01 UTC
From: John
Topic: 6939 Message: 6939

I have available a Kenwood TS790 dualband (2m/70cm) all mode satellite radio for
trade or sale. This is one of the best all mode radios ever built. It does dual
receive, and full duplex for the satellites as well. Check out the eham.net reviews on it, and QST also loved it for weak signal work.

It does 45 watts on 2m and 35 watts on 70cm. You can also add a 1.2ghz module
if you like for triband coverage. It also has tone encode installed for repeater and SO50 satellite operation. This is a great radio but it is a little
big for my current setup.

It comes with the hand mic and a copy of the operating manual. I am looking for
something like a HF/VHF/UHF radio (Yaesu FT100D/FT857D/Icom 706MKIIG) in trade, or a Yaesu FT450AT
but am also always open to other trade offers.
Of course, cash is also a great trade. Would take a 70cm all mode like a Kenwood TR851A or TM455A plus cash in trade.

Anyone interested? What do you have for trade?

73 John AF5CC

6940. For Sale additonal info

Yahoo group: ham4sale (2007 — 2015)
Date: 2012-04-11 00:49:54 UTC
From: Christopher W. Boone
Topic: 6940 Message: 6940

To all who inquired:

Two Kenwood TKR820 and one TKR750-1
The 820s are desktop models....UHF and require a programmer (there is a hack for it some where on the Internet)

The TKR750-1 will do 146-174 (have tried to see if it will go to 145 or not)..It is a Version 1. I will see if it takes the programming..if it does, should tune there ok

Asking 350 each for the 820s

And 800 for the 750..it is in mint shape with power supply included

I can haggle a little...costs do not include shipping

Chris

Topic: 6942 Message: 6942

FOR SALE - Bird Model 43 Wattmeter, in great condition. Was taken well care of in a non-smoking environment and stored in a padded Pelican case(not included). The meter movement was replaced with factory meter in 2007. Case shows some signs use but it's the usual minor scratches. I upgraded to a newer model and do not need this one. No elements included, but does come with the solid dampen slug. Sell for $135 plus $12 for USPS Priority shipping - PayPal welcome - no additional charge. These sell for much more on E-bay and don't look nearly as good. Can supply photo if requested. As with all electronic items I can not offer a warranty and it is sold as-is - it was tested and working great and found exactly the same readings as my newer meter. Send me an e-mail off the list if interested - n4gvk@...

Thanks,
Tom, N4GVK

6944. WANTED: Gonset Super 12 HF Converter

Yahoo group: ham4sale (2007 — 2015)
Date: 2012-04-13 00:21:35 UTC
From: qrv@kd4e.com
Topic: 6944 Message: 6944

I'm looking for a Gonset Super 12 HF mobile converter.

It needs to be in decent cosmetic condition (not pristine,
just not abused) and working (needing minor attention OK).

Please send your asking price and pics.

6946. FS: Ten-Tec Omni C 546 WARC with 255 Deluxe PS

Yahoo group: ham4sale (2007 — 2015)
Date: 2012-04-15 15:50:40 UTC
From: Pete Ferrand
Topic: 6946 Message: 6946

This is an exceptionally nice late model Omni C which includes the 1.8 and .5 kHz filters and all three WARC crystals for 30, 17, and 12 meters. The stock noise blanker that comes with all C's is of course included.

You also get the 255 Deluxe 20 Amp supply that includes the 3" x 5" speaker and the 0 - 25 ampere ammeter. It operates on either 117 or 235 vac.

I've had Ten-Tecs since the PM-3 days and this has the smoothest PTO I've used. You can also see why many people have praised the receiver for its quietness and ease of pulling stations out of the ether.

For a set that has been operated and not stored in a carton it's in very clean condition, puts out specified power, and though I can't measure lab type specs, I've had it on the air many times and everything seems in order. The power supply has been recapped and the input filter cap on the rig has been replaced.

Photos are here:

http://radio.freeshell.org/sources/255_546.jpg
http://radio.freeshell.org/sources/546_rear.jpg
http://radio.freeshell.org/sources/supply_rear.jpg

Manuals for both units are included.

You're welcome to pick it up in the Chicago-Milwaukee area and you can see it in action.

Price $475 plus shipping if needed in two separate boxes. Payment in cash, PayPal, or USPS money order. As-is, not returnable.

Please email me directly at petef@...

Thank you.
-Pete

6948. MFJ-706 Portable EMCOMM package for IC-706/7000

Yahoo group: ham4sale (2007 — 2015)
Date: 2012-04-15 23:08:28 UTC
From: phil_ad5x
Topic: 6948 Message: 6948

Up for sale is my MFJ-706 portable package as shown in the "Product Reviews" section of my web-site at www.ad5x.com. The MFJ-706 is a grab-and-go hand-carried EMCOMM-type package for IC-706 transceivers, and is easily modified for the IC-7000 as shown in my website article by changing the DC/transceiver connector in the MFJ-706. I've added the internal PowerPole interface as shown in the article, and also have included a PowerPole pigtail so you can add your IC-7000 connector. The MFJ-706 includes a carrying handle, long-wire and coax HF connectors, VHF/UHF connector, and an internal wide-range antenna tuner. It also includes an internal voltage conditioner that provides over-voltage, reverse voltage and transient protection, and unique filtering that permits operation from poor or under-powered voltage sources ☐ even an auto accessory socket. Some eHam reviews can be found here: www.eham.net/reviews/detail/8501. This MFJ-706 includes the modifications detailed in my website review: front-cover thumb-screws, improved internal wiring, PowerPole chassis connector, PowerPole-to-Accessory Plug adapter, a 6-ft PowerPole power cable, CW key jack, and a ground lug. Everything works great. Price is $275 shipped/insured in the US. PayPal, check or money order accepted.

6949. Nte Viking Straight Keys (2)

Hello all....for sale is a loaded TS-820....Has the following options...Digital display (DG-1)...
CW Crystal filter unit (YG-88c) and the DC-DC unit (DS-1A).....This radio is unmodified other than the Kenwood options...Fully Tested in my station for over a month...with no issues...comes with original manual and MC-50 desk mic....some scuffs but no dents....very good overall condition...strong unit ready for everyday service....No- CB hacks !! Original !!
I would be happy to send pics for anyone interested that will show minor cosmetic flaws...
TS-820...Loaded....MC-50 Mic....manual.....$330.00 + shipping

Thankyou ....Wes....VA6DWH

6951. HF Antennas and related items FS

Yahoo group: ham4sale (2007 — 2015)
Date: 2012-04-17 13:22:55 UTC
From: Ken Simpson, W8EK
Topic: 6198 Message: 6951

HF Antennas and related items For Sale -- Dipoles,
Verticals, Dummy Load, SWR Bridges, Antenna Tuner,
Low Pass TVI Filters, and Connectors

B & W Broadband HF Dipole Antenna:

B & W states that this broadband dipole will tune from 3.5
thru 30 MHz. From their web site: "Our field proven
broadband HF antennas operate all frequencies continuously
from 1.8 to 30 Mhz without an antenna tuner, plus 6 meters.
If you are participating in various programs such as MARS,
ARES, RACES or CAP these antennas will work all of your
frequencies all the time. If your frequencies get reassigned,
it does not matter."

This particular antenna is the AC 3.5-30, which is also
called the BWD-65. It does not cover 160 meters. It is
about 65 feet long, and has a special balun and loading
coil, plus the wire and spreaders.

This particular antenna works fine, and looks very close
to new. It was installed inside an attic, so has not been
exposed to the weather.

These sell for over $300 new. Buy this one that is close
to new, with paper work, for only $175.

Broadband Dipole Antennas:

These antennas are sometimes call "Bazooka" dipoles, but
also go by other names. They are made from RG-8 coax
instead of just wire. They are fed differently, with
both halves of the coax used. The result is an antenna
that is more broad banded than a regular wire dipole,
permitting one to cover all, or most, of a ham band with
a reasonable SWR. Of course these can be put into an
inverted V configuration as well. They have been described
in the ARRL Handbook and ARRL antenna book at various times.

I have antennas for two different bands:

40 meter antenna as described above (approx 66 feet long)
with about 25 feet of RG-8 coax feedline attached, terminated
in a PL-259 connector. $50

10 meter version, about 16 feet long. No feedline on this
one, but there is a place for you to attach your own coax.

$15

Buy both of the above for $60.

MFJ 1796 Halfwave Vertical Antenna:

The MFJ 1796 covers the 40, 20, 15, 10, 6, and 2 meter bands,
with no radials needed.

It is only 12 feet high and can be mounted anywhere -- ground
level to tower top -- apartments, small lots, trailers.
Perfect for vacations, field day, DXpedition, camping.

Efficient end-loading, with no lossy traps
Full size halfwave on 2 & 6 Meters
High power air-wound balun eliminates feedline radiation
Adjusting 1 band has minimum effect on others
Automatic band switching
Low radiation angle for great DX
Omnidirectional
Handles 1500 watts PEP
Low SWR
Stainless steel hardware

This antenna was used in a restricted community, and only
put outside when being used, so it is in terrific shape.
Paper work included.

These sell for over $300 new. Buy this one for only $175.
Pick up near Ocala FL, just off of I-75.

Doublet Antenna:

Doublet antenna consisting of about 110 feet of wire, with
center insulator, 2 end insulators, and 2 center supporting
insulators. This antenna is made to be fed with "open wire"
450 ohm transmission line, and used with an antenna tuner.
It should be able to tune from 80 thru 10 meters, with the
proper tuner. $20

Hustler 4BTV HF Vertical Antenna:

The 4BTV is a vertical antenna that covers 10, 15, 20, and 40
meters. It can also cover 75/80 meters by using an RM-75
resonator.

This one is in extremely good shape. It actually still shines!
No corrosion evident. The actual base shows very minor signs
of being out in the weather, but the silent key who used it
was in a restricted community, and took the top part out of
the garage only when he wanted to get on the air.

Paper work is included for $120.

Hustler RM-75 resonator - standard version
(can be used to add 75 meters to 4BTV above) $19

I would prefer pickup near Ocala, Florida, just off of I-75.
It will easily fit inside a car. It is possible to ship it,
but the cost is high due to it being oversize. Obviously,
shipping is not included in the price.

Hustler Resonators for Hustler Mobile HF Antenna Systems:

"Standard" Hustler resonators (400 Watt):
75 meter resonator RM-75 $19
40 meter resonator RM-40
This resonator has tape on the bottom. I assume the
tape was used to tell the silent key which frequency
the RM-40 was tuned to, being he had two of them. $15

Dentron "Big Dummy" RF Dummy Load:

This is Dentron's equivalent to the the traditional Heath
"Cantenna" dummy load that will handle a kilowatt. It has
a derating curve with it.

It is in good shape both electrically and cosmetically.
It has no rust, dents nor dings.

I measured the resistor and it is 53 ohms, so obviously it
is in good shape. I have never seen any others this close
to 52 ohms!

I can ship it either with or without oil. The cost to
purchase is the same, but of course the shipping will be
higher with the oil.

With derating curve paper work for $45.

Heath HM-15 SWR Bridge:

This is an HF SWR Bridge, with SO-239 connectors on
the back. The front has the meter on the left, and two
knobs to the right. It is the same size as the HD-15
phone patch.

This one works fine and is in nice cosmetic shape.
I can not find a scratch on it.

Paper work included for $20.

HF and VHF SWR Bridges:

All of these cover from 3 to 150 MHz, covering HF,
6 meters,and 2 meters. SO-239 connectors.

Quement SWB-2
This unit features two separate meters --

one for reading forward power and another for reading SWR. This permits one to easily monitor both the power going out, and the SWR on the antenna at the same time. It works fine and looks great. With paper work for $37.

Carter Craft 90-300
Single Meter SWR Bridge / Field Strength Meter
This one works fine. I am 99% certain it has not been used, except for my testing it. In its original box with original instructions and little field strength antenna. $30

Royce 2-100 Single Meter SWR Bridge / Field Strength Meter
This one works fine, and looks extremely nice. I do not see any scratches on it, but it does have a previous owners name on it. In its original box with original instructions. $28

TenTec 229 HF antenna tuner:

This roller inductor tuner will handle full legal power. It uses an "L" match instead of a "T" match, which means there is only one spot that will give the correct match. The "L" match is also more efficient. Electrically, it is the same as the 238 series, 229 A, 229 B, and 4229.

There is also a built in wattmeter with full scale reading of 200 and 2000 watts. It also has an SWR bridge with lighted meter, plus a 4 position antenna switch.
-
It can be used on any HF frequency, including the WARC bands, as it is continuously adjustable. It has a built in internal balun, so open wire can be used.

Cosmetically, this unit is the color of the earlier Omni series (Omni 546, series A, B, and C) with the black vinyl covering, and nice aluminum trim around the front.

This particular unit functions 100%, and looks perfect. I can not find a scratch on it.

Paper work is included for $325.

Low Pass TVI Filters:

A low pass TVI filter is added to the transmitter to reduce harmonic interference. All have SO-239 connectors, are 50 ohm filters, and include paper work.

Bencher YA-1, high power, low pass TVI filter
If you need a more heavy duty filter for the output of your amplifier, this one is ideal. It will take full legal power plus, and has at least 80 db signal attenuation at TV channel 2.This one works great, and looks close to new. Bencher currently sells these for about $90. Only $60.

Bud LF-601 low pass filter
This filter is adjustable for best attenuation in your particular situation, and also to more closely match your specific impedance. It cuts off at about 52 MHz (if adjusted as such) so it can be used on 6 meters, and will handle 1500 watts. $35

Drake TV-1000-LP Low pass TVI filter
This is the filter that may also be used on the low end of six meters, as well as HF. It is good for 1000 W "average" below 30MHz, and about 200 W up to 52 MHz. With paper work for $30.

Drake TV-1000
LP Filter as above, which functions fine electrically, but looks ugly. With paper work. $25

Drake TV-3300-LP Low Pass Filter
This modern low pass filter has been optimized to have more attenuation in the 40 MHz region, where many TVs have their IF. It is good for 1000 Watts "average" according to the manual, and has over 80 db attenuation at 41 MHz. This one looks great, and includes the paper work. $30

B & W FL-10/1500
This filter cuts off just above 10 meters, and handles 1500 Watts. It is the latest model B&W filter.In very nice condition, it looks close to new. $40.

Johnson 250-20 Low Pass Filter
This is a 52 ohm cylindrical low pass filter with a cut off frequency of 45 MHz and 75 db of attenuation. It is rated to take 1000 Watts of AM, or 5000 Watts PEP SSB. With mounting bracket. $30

Para Dynamics PDC 1089
This filter is rated at a full Kilowatt, up to 30 MHz. 5 x 6 x 2 inch black box, instead of the more familiar long enclosure. It looks like new. $25

Coax connectors and adapters:

Prices are per connector. Several of each are available. It looks like these have not been used.

UHF Male (PL-259) to BNC female (opposite of above) $5

UHF double female "Barrel connector" (two SO-239 together) $3

UHF "Bulkhead Connector" - Double female, as above, but for mounting thru a window, siding, etc. about 3 inches long $6

UHF double male connector (two PL-259's together) $3

UHF "T" connector with two female (SO-239) and one male (PL-259) connection $5

"N" Connector - Double Male $8

BNC male for coax cables
standard type $2
crimp on type $3

Chassis mount BNC female
square mount (uses 4 screws) $3
screw in type $3

BNC "T" - two female and one male $3

Antenna adapter to fit the BNC connector on the HT
and provide an SO-239 connector that will permit
a PL-259 to be attached. (BNC male to UHF female) $5

I also have many other accessories available such as many
different types of microphones, HTs, VHF and UHF rigs, HF
and VHF/UHF antennas, etc.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

Date: 2012-04-19 16:52:06 UTC
From: John
Topic: 6953 Message: 6953

I have for sale an Icom 706MKIIG HF/6m/2m/70cm all mode radioin very nice condition, with the mic, box, and
a photocopy of the manual. It works fine, and looks very good with a couple of
light marks on the top of the case, and some very light scratches where the mobile bracket was once attached to it around the holes on the sides. I don't
have a power cord with it, but those are readily available. It has a later serial number so it has the newer finals in it.

I am asking $610 shipped in the US and can take paypal/check/MO.

6956. Power Supplies FS

Yahoo group: ham4sale (2007 — 2015)
Date: 2012-04-23 19:09:26 UTC
From: Ken Simpson, W8EK
Topic: 6888 Message: 6956

Power Supplies and related items For Sale:

Pyramid PS-25 Power Supply (25 amps at 13 V DC):

The Pyramid PS-25 is a 13 Volt DC power supply with both a
voltmeter and an ammeter built in. The output voltage is
adjustable over a range from about 11.5 to 15.5 volts DC.
There is also an adjustment to set the current limiting,
up to 25 amps. This means it can be set so that it will
protect the finals of a solid state rig. In addition, a
buzzer is activated if it goes into over current limiting.
This power supply has the features you want!

This particular unit works fine, and looks extremely nice.

With paper work for $80.

TenTec 25 amp switching power supply:

"Switcher / 25" 25 amp switching power supply

This is a 25 amp switching power supply in a case that
matches the early Omni series case, with the metal bezel
around it. It is in a case that is the same size as a 243
remote VFO. It has an ammeter on the front, along with
Switch, TenTec logo, and output bulb. The front panel
basically looks like a 280 power supply with a metal bezel,
but says "Switcher/25" on it. It is electrically very quiet,
and well shielded. It does not produce any electrical noise
that I could find.

Of course it works fine, and looks fine also. $175

Astron RS-20A Power Supply:

The RS-20A is a DC Power Supply producing 13.8 V DC (internally
adjustable from 11 to 15 V DC) at up to 16 amps continuous and
20 amps ICS. The RS-20 features crowbar over voltage protection
and fold-back current limiting to protect your equipment.

This particular supply works fine, and looks very close to new.
I do not find a scratch on it.

With paper work for $60.

Kepco Variable Bench Power Supply:

This is an ideal bench power supply! It is a Kepco Model ABC 40-0.5, which means that it will produce from zero up to 40 V DC at up to 1/2 amp. Great for the bench.

The voltage is adjustable with a 10 turn pot from close to zero, up to about 40 volts. There is a fairly large analog meter that reads the voltage. There is also current limiting built in that is adjustable from about 100 ma to up to about 700 ma. The same meter that reads voltage can be switched to read current, or short circuit current (the point that the current limit is set). In addition, there are connections on the back to allow remote sensing and remote programming. This is a quality regulated power supply!

This particular unit works 100%, and looks extremely nice.

These normally sell used for $125 to $150 (plus shipping). Buy this one for $88.

Kepco Variable Bench Power Supply:

This variable power supply is a Kepco Model CK 18-3, which means that it will produce up to 18 V DC at up to 3 amps. This is an ideal bench power supply!

The voltage is adjustable with a 10 turn pot from close to zero, up to almost 20 volts. There is a fairly large analog meter that reads the voltage. Built in current limiting is adjustable with a 10 turn pot from a few ma to up to about 3 amps. A separate meter reads the current, so both voltage and current can be read at the same time. Also, there are connections on the back to allow remote sensing and remote programming. This is a quality regulated power supply!

This particular unit works 100%, and looks extremely nice. $160

Radio Shack 22-124 Regulated Power Supply

This supply is regulated and will furnish 13 V DC at up to 2.5 amps. It is ideal for the lower powered 2 meter rigs, or to get rid of that huge collection of wall warts.

This one works fine and looks extremely nice.
I do not find a scratch on it. $20

Olson RA-472 Bench Type Power Supply:

This power supply is suitable for low current bench use. It provides a variable voltage source from about 5 V DC up to about 15 V DC. It has one knob for course voltage that is labeled 6 V, 9 V and 12 V. An additional knob will fine tune the voltage.

I do not have specs on this supply, but I would guess
that it is good for maybe 1/3 to 1/2 amp current. It
has an analog meter that seems to be fairly accurate;
at least it compares favorably to my lab type DMM.

This unit is a great utility type power supply. $15

"Wall Wart" Power Supplies:

All of these are "regular" wall warts -- not the new
switching type that create all sort of noise in your
receiver. Get one of these, and leave the noise behind.

MFJ 1312 B
This unit provides 12 V DC at 300 ma. It has a 2.1 mm
coaxial plug with the center positive, and is often used
for keyers, lighting tuner lights, and other small misc
jobs where 12 V DC at low current is needed. $12

9 Volt DC at 500 ma
This one was used on a MFJ 422 keyer, but will also power
other items needing 9 V DC at low current. It has a
2.5 mm male plug on it. $12

AEA AC-1
This unit supply 12 V DC at up to 1 amp.
It can be used with the AEA PK-232, PK-88 or others.
It has a 2.1 mm coaxial power plug, with the center
positive, so it can be used on many different
things that require about 12 V DC at up to an amp,
such as keyers, antenna tuners, etc. $14

Kenwood MS-1 charger / DC power supply:

The MS-1 is designed to be used with the Kenwood TR-2500
and TR-2600 HTs. The HT slips into the unit, and will
charge the battery, or power the unit, or both. The HTs
use 9.6 volts DC to operate. This unit converts 13 V DC
down to the required 9.6 V DC. It also functions as a
holder for the HT in the car, and as a light to illuminate
the LCD display on the HT.

This one works fine, and looks OK.
With paper work for $20.

Kenwood BC-2 Charger for PB-2 batteries.
In Original box for $12.

Icom DC-25 DC adapter:

This is a pack that is used on the Icom µ2AT, Icom µ4AT, and
on other HTs that use the BP-20, BP-21, BP-22, BP-23 and
BP-24 battery packs. It takes 13 V DC (such as from a
cigarette lighter), and converts it to the 9.4 V DC voltage

needed for the HT. It is used in place of a battery.

This one works fine and looks fine. $18

Icom BC-127 A, Battery Charger for Icom IC-Q7A
Dual Band HT:

This charger charges two AA NiCads (or NiMH) for the
IC-Q7 A Dual band HT, and Icom R-2 receiver, and probably
others.

This one appears to be new, unused, still in its bag.
Icom lists them at $21. Buy this one for $12.

I also have many other accessories available such as many
different types of microphones, HTs, HF, VHF and UHF rigs, HF
and VHF/UHF antennas, and many miscellaneous accessories.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

6959. For Sale: Radio Shack PRO-84, 200 channel scanner with headphones

Yahoo group: ham4sale (2007 — 2015)
Date: 2012-04-27 18:33:01 UTC
From: kcszjerseyham
Topic: 6959 Message: 6959

The Radio Shack PRO-84 Scanner comes with belt clip, short bnc duckey antenna, headphones, original manual, cd manual, and original box. The scanner features 200 channels with 10 banks of 20 channels, Frequency coverage: 25-54, 108-136.9875, 137-174, 406-512, 806-823.9375, 851-868.9875, and 896.1125-956 MHZ (excluding cellular), Steps of 5, 6.25, 12.5KHZ, Scan rate 40cps, Signal stalker which allows stalking and scanning simultaneously, and Service search which makes it easy to explore preset frequencies for police, fire, weather, aircraft, marine and amateur radio. This model scanner comes factory programmed with the NASCAR racing frequencies (the memory number is the NASCAR or Busch car #) and is painted candy apple red and has the NASCAR logo on the face plate. (The race frequencies are programmed into the 200 available memory channels and can be reprogrammed to any frequency you like.) The scanner and accessories are in like new condition. I am asking $80.00 which includes shipping to continental U.S.A. Contact Jim KC2SZ via email jameslhiggins0527@...

6964. Coax cable and connectors, HF antennas and related FS

Yahoo group: ham4sale (2007 — 2015)
Date: 2012-04-29 21:20:56 UTC
From: Ken Simpson, W8EK
Topic: 6964 Message: 6964

It is "Antenna Season."

HF Antennas and related items For Sale -- Coaxial
Cable, Connectors, Dipoles, Verticals, SWR Bridges,
Antenna Tuner, Low Pass TVI Filters, etc.

Coaxial Cable:

I accumulated a fairly large amount of miscellaneous
lengths of coaxial cable. Most of the cable is RG-8
(.405 inches in diameter) or equivalent. Most has a
PL-259 on at least one end, and most on both ends.

All of the coax over 20 feet has been checked with an
analyzer, and its loss has been confirmed to be within
10% of new specs which is as close as I can measure.
Lengths under 20 feet have been checked for continuity,
because loss is almost impossible to measure for lengths
this short.

I have a large amount in many different lengths, varying
from 1 foot to 160 feet. To put it another way, I have
jumpers for in your shack, and lengths to run up your
tower. I can not list all of the lengths. Please let
me know what you need, and I will see how close I can come.

The coax is 3 feet for a dollar (33 cents a foot), plus
$2 for each installed PL-259.

Coax connectors and adapters:

Prices are per connector. Several of each are available.
Most are unused.

UHF Right angle 90 degree elbow connector $3

UHF double female "Barrel connector" (two SO-239 together) $3

UHF "Bulkhead Connector" - Double female, as above, but for
mounting thru a window, siding, etc. about 3 inches long $6

UHF double male connector (two PL-259's together) $3

UHF "T" connector with two female (SO-239) and one male
(PL-259) connection $5

Antenna adapter to fit the BNC connector on the HT
and provide an SO-239 connector that will permit

a PL-259 to be attached. (BNC male to UHF female) $5

UHF Male to BNC female (opposite of above) $5

BNC male for coax cables
standard type $2
crimp on type $3
-
Chassis mount BNC female
square mount (uses 4 screws) $3
screw in type $3

BNC "T", two female and one male $3

"N" Connector, Double Male $8

Broadband Dipole Antennas:

These antennas are sometimes call "Bazooka" dipoles, but
also go by other names. They are made from RG-8 coax
instead of just wire. They are fed differently, with
both halves of the coax used. The result is an antenna
that is more broad banded than a regular wire dipole,
permitting one to cover all, or most, of a ham band with
a reasonable SWR. Of course these can be put into an
inverted V configuration as well. They have been described
in the ARRL Handbook and ARRL antenna book at various times.

I have antennas for two different bands:

40 meter antenna as described above (approx 66 feet long)
with about 25 feet of RG-8 coax feedline attached, terminated
in a PL-259 connector. $50

10 meter version, about 16 feet long. No feedline on this
one, but there is a place for you to attach your own coax.
$15

Buy both of the above for $60.

MFJ 1796 Halfwave Vertical Antenna:

The MFJ 1796 covers the 40, 20, 15, 10, 6, and 2 meter bands,
with no radials needed.

It is only 12 feet high and can be mounted anywhere -- ground
level to tower top -- apartments, small lots, trailers.
Perfect for vacations, field day, DXpedition, camping.

Efficient end-loading, with no lossy traps
Full size halfwave on 2 & 6 Meters
High power air-wound balun eliminates feedline radiation
Adjusting 1 band has minimum effect on others
Automatic band switching

Low radiation angle for great DX
Omnidirectional
Handles 1500 watts PEP
Low SWR
Stainless steel hardware

This antenna was used in a restricted community, and only
put outside when being used, so it is in terrific shape.
Paper work included.

These sell for over $300 new. Buy this one for only $175.
Pick up near Ocala FL, just off of I-75.

Hustler 4BTV HF Vertical Antenna:

The 4BTV is a vertical antenna that covers 10, 15, 20, and 40
meters. It can also cover 75/80 meters by using an RM-75
resonator.

This one is in extremely good shape. It actually still shines!
No corrosion evident. The actual base shows very minor signs
of being out in the weather, but the silent key who used it
was in a restricted community, and took the top part out of
the garage only when he wanted to get on the air.

Paper work is included for $120.

Hustler RM-75 resonator - standard version
(can be used to add 75 meters to 4BTV above) $19

I would prefer pickup near Ocala, Florida, just off of I-75.
It will easily fit inside a car. It is possible to ship it,
but the cost is high due to it being oversize. Obviously,
shipping is not included in the price.

Hustler Resonators for Hustler Mobile HF Antenna Systems:

"Standard" Hustler resonators (400 Watt):
75 meter resonator RM-75 $19
40 meter resonator RM-40
This resonator has tape on the bottom. I assume the
tape was used to tell the silent key which frequency
the RM-40 was tuned to, being he had two of them. $15

Heath HM-15 SWR Bridge:

This is an HF SWR Bridge, with SO-239 connectors on
the back. The front has the meter on the left, and two
knobs to the right. It is the same size as the HD-15
phone patch.

This one works fine and is in nice cosmetic shape.
I can not find a scratch on it.

Paper work included for $20.

HF and VHF SWR Bridges:

All of these cover from 3 to 150 MHz, covering HF,
6 meters,and 2 meters. SO-239 connectors.

Quement SWB-2
This unit features two separate meters --
one for reading forward power and another for reading SWR.
This permits one to easily monitor both the power going
out, and the SWR on the antenna at the same time. It works
fine and looks great. With paper work for $37.

Carter Craft 90-300
Single Meter SWR Bridge / Field Strength Meter
This one works fine. I am 99% certain it has not been used,
except for my testing it. In its original box with original
instructions and little field strength antenna. $30

Royce 2-100 Single Meter SWR Bridge / Field Strength Meter
This one works fine, and looks extremely nice. I do not see
any scratches on it, but it does have a previous owners name
on it. In its original box with original instructions. $28

TenTec 229 HF antenna tuner:

This roller inductor tuner will handle full legal power.
It uses an "L" match instead of a "T" match, which means
there is only one spot that will give the correct match.
The "L" match is also more efficient. Electrically, it is
the same as the 238 series, 229 A, 229 B, and 4229.

There is also a built in wattmeter with full scale reading
of 200 and 2000 watts. It also has an SWR bridge with
lighted meter, plus a 4 position antenna switch.
-
It can be used on any HF frequency, including the WARC
bands, as it is continuously adjustable. It has a built
in internal balun, so open wire can be used.

Cosmetically, this unit is the color of the earlier Omni
series (Omni 546, series A, B, and C) with the black vinyl
covering, and nice aluminum trim around the front.

This particular unit functions 100%, and looks perfect.
I can not find a scratch on it.

Paper work is included for $325.

Low Pass TVI Filters:

A low pass TVI filter is added to the transmitter to reduce
harmonic interference. All have SO-239 connectors, are 50

ohm filters, and include paper work.

Bencher YA-1, high power, low pass TVI filter
If you need a more heavy duty filter for the output of
your amplifier, this one is ideal. It will take full legal
power plus, and has at least 80 db signal attenuation at
TV channel 2.This one works great, and looks close to new.
Bencher currently sells these for about $90. Only $60.

Bud LF-601 low pass filter
This filter is adjustable for best attenuation in your particular
situation, and also to more closely match your specific impedance.
It cuts off at about 52 MHz (if adjusted as such) so it can be
used on 6 meters, and will handle 1500 watts. $35

Drake TV-1000-LP Low pass TVI filter
This is the filter that may also be used on the low end of six
meters, as well as HF. It is good for 1000 W "average" below
30MHz, and about 200 W up to 52 MHz. With paper work for $30.

Drake TV-1000
LP Filter as above, which functions fine electrically, but looks ugly.
With paper work. $25

Drake TV-3300-LP Low Pass Filter
This modern low pass filter has been optimized to have more
attenuation in the 40 MHz region, where many TVs have their
IF. It is good for 1000 Watts "average" according to the manual,
and has over 80 db attenuation at 41 MHz. This one looks great,
and includes the paper work. $30

B & W FL-10/1500
This filter cuts off just above 10 meters, and handles 1500
Watts. It is the latest model B&W filter.In very nice condition,
it looks close to new. $40.

Johnson 250-20 Low Pass Filter
This is a 52 ohm cylindrical low pass filter with a cut
off frequency of 45 MHz and 75 db of attenuation.
It is rated to take 1000 Watts of AM, or 5000 Watts
PEP SSB. With mounting bracket. $30

Para Dynamics PDC 1089
This filter is rated at a full Kilowatt, up to 30 MHz.
5 x 6 x 2 inch black box, instead of the more familiar long
enclosure. It looks like new. $25

I also have many other accessories available such as many
different types of microphones, HTs, VHF and UHF rigs, HF
and VHF/UHF antennas, etc.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

From: Craig Pitcher
Topic: 6968 Message: 6969

There is a guy on eBay who sells the long version of these. I think it is the OPC 587. They are not cheap, but it's something you can get quickly. He may also make up the shorter cables.

I've been looking for someone selling a longer sep cables, used.but they tend to be sold with the radios.

From: Ken Simpson, W8EK
Topic: 6975 Message: 6975

VHF and UHF (2 meter and 440 MHz) Equipment For Sale -
2 meter HT, dual band HT, HT accessories such as
speaker mics, rubber ducks, SWR Bridge, mobile
antennas and mounts, DTMF Touch Tone and regular
Microphones, and more:

Alinco DJ-580 dual band (2m and 440 MHz) HT:

This HT receives from 110 to 174 MHz in the VHF position,
which includes the AM Aircraft band. 440 to over 480
MHz in the UHF position. Of course it transmits in the
2 meter and 440 MHz ham bands. It is my understanding
that it can also be modified to receive into the 800
and 900 MHz region. It will also cross band repeat,
and is an extremely rugged radio.

Power output has 3 different levels. With the
7.2 V battery packs, it has 0.25 W / 1 W / 2.5 W.
If used with the larger 12 V batteries, it will
produce 0.25 W / 1.2 W / 5 W.

This particular unit is in very good shape, both
electrically and cosmetically. The keyboard has very
crisp and clear lettering. It includes desk charger,
rubber duck antenna, belt clip, wrist strap, battery,
and paper work. $130

Alinco Protective Battery Plate
This is a "dummy" plate that slides on to the HT in place
of the battery. It is used when powering the HT from an
external power source (such as the EDC-36), to
prevent the battery terminals from being exposed and
causing accidents. $10

Alinco Carrying strap - Like new. $4

Kenwood TH-235 Two Meter FM HT:

The Kenwood TH-235A Two meter HT has a large easy-to-read
LCD, 60 channel memories with scanning and ten DTMF
memories. Extended receive is 136-174 MHz so it includes
the weather frequencies. When used on external DC power
you will get a full 5 watts output. With the included
PB36 battery pack, it produces 1.5 watts. The low power
setting is 0.5 watts.

Features
Backlit LCD Display
60 Memories
Scanning
Battery Saver
Built-In CTCSS Encode
Extended Receive

This particular unit works 100% and looks like it just came out of the box new. It came from a silent key who I don't think ever used it. This one includes the desk charger, rubber duck antenna, belt clip, and paper work for $115. I added a new PB-36 battery, as the old one had been in the drawer long enough that it is not in good condition.

Cigarette lighter power cord for TH-235 above. $12

Kenwood MS-1 charger / DC power supply:

The MS-1 is designed to be used with the Kenwood TR-2500 and TR-2600 HTs. The HT slips into the unit, and will charge the battery, or power the unit, or both. The HTs use 9.6 volts DC to operate. This unit converts 13 V DC down to the required 9.6 V DC. It also functions as a holder for the HT in the car, and as a light to illuminate the LCD display on the HT.

This one works fine, and looks OK. With paper work for $20.

Speaker Microphone for Yaesu VX-1, VX-2, VX-3, VX-5, etc.

Pryme Speaker Microphone
This is the Pryme equivalent of the Yaesu MH-34. It has the 4 conductor 1/8 inch plug on it. It works 100% and looks like it has not been used. $25

Other HT Speaker Microphones:

All of these have the 3.5 mm and 2.5 mm plugs on them, as used by Icom, Alinco, Radio Shack, some Yaesu, and other HTs.

Azden SDX-316
This is the rounder style speaker mic that fits nicely in the palm of your hand. $20

Pryme Speaker Microphone
It works fine and look line new. $20

MFJ-284 Speaker Microphone
Fits most Icom, Yaesu, Alinco 560, Santec ST-20, and others. It works great, and looks like new. $15

MFJ-287 Speaker Microphone
This fits the TH-21/31/41 series HTs, TH-205, TH-215, TH-415, as well as others. It has a 3 conductor 3.5 mm plug and a 2 conductor 2.5 mm plug.It works fine, and looks close to new. $15

Coaxial Cable For Sale:

I accumulated a fairly large amount of miscellaneous lengths of coaxial cable. Most of the cable is RG-8 (.405 inches in diameter) or equivalent. Most has a PL-259 on at least one end, and most on both ends.

All of the coax over 20 feet has been checked with an analyzer, and its loss has been confirmed to be within 10% of new specs which is as close as I can measure. Lengths under 20 feet have been checked for continuity, because loss is almost impossible to measure for lengths this short.

I have a large amount in many different lengths, varying from 1 foot to 160 feet. To put it another way, I have jumpers for in your shack, and lengths to run up your tower. I can not list all of the lengths. Please let me know what you need, and I will see how close I can come.

The coax is 3 feet for a dollar (33 cents a foot), plus $2 for each installed PL-259, plus shipping from Florida.

HF and VHF SWR Bridges:

All of these cover from 3 to 150 MHz, covering HF, 6 meters,and 2 meters. SO-239 connectors.

Royce 2-100 Single Meter SWR Bridge / Field Strength Meter
This one works fine, and looks extremely nice. I do not see any scratches on it, but it does have a previous owners name on it. In its original box with original instructions. $28

VHF Triband Mobile Mag Mount Antenna:

This mobile antenna is a VHF Triband antenna covering the 6 meter, 2 meter, and 440 MHz ham bands. This makes it ideal for some of the newer multiband and dual band rigs available today.

The antenna is about 3 feet long and has a very strong magnet. It has a long coax cable with a PL-259 connector.

It works great, and looks very close to new. $75

Larsen NLA Type VHF Mobile Antenna for 2 meters:

This antenna fits the Larsen NLA mobile mount, which is a special mount made by Larsen.

Larsen NLA-150, 2 meter antenna, for Larsen NLA mount
Has about 3 db gain on 2 meters.

This one works fine and looks fine also.

Coil only, without whip (whip is hard to ship). $10
With four foot whip. $19

Mobile Antennas for 440 MHz band:

"On Glass" mobile antenna for 440 MHz:
This antenna was made by Avanti to mount on a windshield,
or other glass. It does not require a ground plane, as
it is a 1/2 wave antenna, rated to have 3 db gain. It is
ideal for places where a ground plane is not available,
such as a boat or motor home, in addition to cars. A
special tuning box is included to match to your particular
situation.
This one is still in its original tube, unopened. $33

Larsen NLA Type Mobile Antenna:
This antenna fits the Larsen NLA mobile mount, which is
a special mount made by Larsen.
Larsen NLA-UHF coil for 440 MHz
This is the coil only for use on the amateur 440 MHz
band and UHF public service bands. Good condition. $10

Mobile Antenna Mounts:

Large, heavy duty magnetic mount
This large mag mount will take any antenna with a standard
3/8 inch 24 thread connector. It is very heavy duty, about
5 inches in diameter, with a long coax for $22.

Mag mount with 1/4 inch stud
Male 1/4 inch 20 thread stud sticking out the top, with
about 15 feet of RG-58 coax. $12

NMO "Luggage rack mount"
This NMO mount will attach to a luggage rack. The bracket
is made so it can attach to either a vertical or horizontal
portion. It is heavy chrome plated, with stainless steel
hardware, and is quite heavy duty for NMO. With 17 feet coax
and PL-259. It looks to be new. $18

NMO "Button" Mount
This mount fits into a 3/4 inch hole, and will then take any
of the many NMO types of antennas. Coax included.
It is in close to new condition. $12

Rubber Duck antennas for your HT:

All are for 2 meters, are in good condition,
and are $10 each, unless stated otherwise.

BNC - Original from Kenwood TH-215, about 5 inches long

BNC - Stubby about 4.5 inches long

5/16 inch threaded, as used by Motorola and others
Stubby - 4 inches long

Type F connector - 6.5 inches long

PL-259 connector - 6.5 inches long
HyGain 275, still in original packaging

PL-259 connector - Stubby - 4.6 inches long
Centurion, still in original package

Special for Kenwood TH-21 HT threaded connector
Stubby, about 4.5 inches long - $20

BNC Stubby for 440 MHz, 3 inches long

DTMF Touch Tone Microphones:

CES 610 L DTMF Touch Tone Mic
Can manually dial a number, or automatically store it in
the mic, and "speed dial". 12 digit touch tone pad on the
front. 8 pin modular plug (like computer LAN).
Looks to be new. $38

Johnson 250-0761-010 / CES 655 L DTMF Mic
It has a 12 digit pad on the front, and is a rugged mic.
Presently with 4 pin plug.
Looks to be unused. $38

Hand Microphone with round 8 pin plug for Kenwood / Alinco / ADI

This hand mic works great on most Kenwood rigs with the
round 8 pin connector, such as the TS-430, TS-440, TM-241,
TM-2530, TW-4000, and others, including Alinco and ADI.
It says "Electret Condenser Mic" on the back, and Kenwood
on the front, with no model number.

Basically, this mic is like an MC-43, with a couple
more features. It has the mic and PTT switch; it also has
up/down switches on the top. There are four "extra" buttons
labeled Call, VFO, MR, and PF. What these four buttons do
depends on the rig. They will function on some rigs, and
are completely useless on others. There is also a "Lock"
switch on the back.

Regardless if you use the four extra buttons or not, you
still have a mic that works like an MC-43.

This mic works fine, and looks like new. I am guessing it
came with a rig, and was immediately put in the drawer. $28

As above but with 8 pin modular connector. $30

Yaesu Hand Microphones:

Yaesu YM-31 hand microphone
The Yaesu YM-31 is a hand mic with a round 6 pin connector. Apparently it is either similar or the same as the MH-25A6j (not the MH-25 with the 8 pin connector). It is a 600 ohm impedance hand microphone, and has a Monitor on-off switch on the back. It should be compatible with any of the Yaesu rigs that uses the round 6 pin connector. It looks very similar to the Yaesu MH-1.
This one works fine and looks extremely nice. $25

Small Power Supplies:

Radio Shack 22-124 Regulated Power Supply

This supply is regulated and will furnish 13 V DC at up to 2.5 amps. It is ideal for the lower powered 2 meter rigs, or to get rid of that huge collection of wall warts.

This one works fine and looks extremely nice.
I do not find a scratch on it. $20

Micronta 22-120 A Regulated power supply:

This supply is rated at 2.5 amps at 13 V DC. It is well regulated. It has a switch and LED power light on the front, with a circuit breaker and output terminals on the back. The case (left and right side and top) is basically all a heat sink, so it should cool the regulator well.

This one works fine and looks like new. No scratches. $30

Olson RA-472 Bench Type Power Supply
This power supply is suitable for low current bench use. It provides a variable voltage source from about 5 V DC up to about 15 V DC. It has one knob for course voltage that is labeled 6 V, 9 V and 12 V. An additional knob will fine tune the voltage. I do not have specs on this supply, but I would guess that it is good for maybe 1/3 to 1/2 amp current. It has an analog meter that seems to be fairly accurate; at least it compares favorably to my lab type DMM.
This unit is is a utility type power supply. $15

Accessories for Kenwood TH-205, TH-215, TH-225, TH-415, and other HTs in this series:

MFJ 287 Speaker Microphone
This was used on a Kenwood TH-225 HT, but it also fits the

TH-21/31/41 series HTs, TH-205, TH-215, TH-415, as well as
others. It works fine, and looks close to new. $15

Kenwood Wrist Strap for TH-215, plus many other HTs. $4

Original Kenwood Rubber Duck antenna from TH-215. $10

Kenwood BC-2 Charger for PB-2 batteries. $12

BNC to PL-259 antenna adapter
Antenna adapter to fit the BNC connector on the HT and provide
an SO-239 connector that will permit a PL-259 to be attached.
This adapter can be used on any HT with a BNC connector. $5

Accessories for the Kenwood TH-21 / 31 / 41 series HTs:

Special Antenna adapter that fits the TH-21 series HTs,
and has a BNC on the other end. $10

Kenwood Rubber duck antenna for the TH-21 HT
Shorter "Stubby Duck" from Kenwood. $20

Original Operating manual for TH-21 HT for 2 meters $8

Kenwood BH-3 belt clip and hardware for Kenwood
TH-21/31/41series HTs. $6

MFJ 287 Speaker Microphone
This was used on a Kenwood TH-225 HT, but it also fits the
TH-21/31/41 series HTs, TH-205, TH-215, TH-415, as well as
others. It has a 3 conductor 3.5 mm plug and a 2 conductor
2.5 mm plug. It works fine. $15

Kenwood W09-0315 charger
This charger is used to charge the larger PB-21 H batteries
for the TH-21 series, and also on other Kenwood radios.
It has a standard 2.1 mm coaxial connector. $12

Yaesu HT Accessory Items:

Pryme Speaker Mic
This is the equivalent of the Yaesu MH-34.
It fits the Yaesu HTs with the 4 conductor 1/8 inch
(3.5 mm) plug, such as the VX-1, VX-3, VX-5, etc.
It looks like it has not been used. $28

Belt Clip for Yaesu FT-207, with hardware. $8

Wrist Strap for Yaesu FT-209, and others $4

Santec HT Accessories:

Leather Case for Santec HT
This is a real Bianchi Leather case -- not a vinyl case.

It fits most of the Santec HTs, such as the HT-1200, ST-142, ST-144, ST-440, etc. The real leather case includes a built in belt clip, plus a removable leather shoulder strap. The case itself is in very nice shape. The leather shoulder strap has not been used. $25

Santec ST-142/144 "Service Pack"
This is similar to a service manual, but Santec calls it a service pack. It has schematics, circuit explanations, voltages, etc. $18

Antenna adapter to fit the BNC connector on the HT and provide an SO-239 connector that will permit a PL-259 to be attached. This adapter can be used on any HT with a BNC connector. $5

Accessories for the Azden PCS-300 HTs:

Azden SDX-316
This is the rounder style speaker mic that fits nicely in the palm of your hand. Has 3.5 mm and 2.5 mm plugs for Azden, Icom, some Yaesu, and others. It works great, and looks great also. $20

Battery charge adapter for Azden PCS-300 HT
This is an adapter that permits one to charge the battery of the Azden PCS-300, 2 meter HT, outside of the HT itself. Usually, one must have the battery inside the HT, but this lets you charge a second battery outside of the HT. The original charger is used. If you have a PCS-300 HT, you need this adapter.
It works fine, and looks like new. $3

Antenna adapter to fit the BNC connector on the HT and provide an SO-239 connector that will permit a PL-259 to be attached. This adapter can be used on any HT with a BNC connector. $5

Icom BC-127 A, Battery Charger for Icom IC-Q7A
Dual Band HT:

This charger charges two AA NiCads (or NiMH) for the IC-Q7 A Dual band HT, and Icom R-2 receiver, and probably others.

This one appears to be new, unused, still in its bag.
Icom lists them at $21.
Buy this one for $12.

Icom DC-25 DC adapter:

This is a pack that is used on the Icom µ2AT, Icom µ4AT, and on other HTs that use the BP-20, BP-21, BP-22, BP-23 and BP-24 battery packs. It takes 13 V DC (such as from a cigarette lighter), and converts it to the 9.4 V DC voltage

needed for the HT. It is used in place of a battery.

This one works fine and looks fine. $18

HT Belt Clips and Wrist Straps:

Belt Clips:
All include the hardware with the belt clip and are $6 each.
Kenwood BH-3 for Kenwood TH-21 / 31 / 41 series HTs
Motorola
Yaesu FT-207

Wrist Straps for various HTs - $4 each
Kenwood TH-215 / 225 / 415, TR-2500, etc.
Kenwood TR-2400
Yaesu FT-209

Crystals for 2 meter ham rigs:

Does anyone have an older two meter ham rig and need crystals?

Maybe I can help. I have some 2 meter crystals available -- both transmit and receive. Most are in the 146 and 147 MHz band segments, with very, very few in the 145 MHz segment, and none in the 144 MHz segment. These are for ham rigs only, and not commercial rigs.

These are all the small HC-25 crystals, like are used in most of the solid state 2 meter mobiles and HTs. Please e-mail the operating frequency you need. I have them listed by operating frequency and rig,and not by actual xtal frequency. Send the frequencies you need (transmit or receive), and the rig that you have, and I will see if I can help. I have cross references for the various rigs, so I will know what you need if you give the rig.
Crystals are $6 each.

I also have many other accessories available such as many different types of microphones, HTs, VHF and UHF rigs, HF and VHF/UHF antennas, etc.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

From: Dave Cole
Topic: 6981 Message: 6981

Hi all,

I have a B&W 6100 in 7 or 8 out of 10 condition for sale, with a pickup only stipulation. I can drive up to 300 miles to meet someone, I live in Oregon. The rig developes High Voltage, and Bias, but I have no idea if it transmits. If interested write me off list for photos. This is a collector rig, and only 300 of them were made. Trades considered for ham gear. $700.00.

6987. Coax Switches, Wattmeter, SWR Bridges FS

Yahoo group: ham4sale (2007 — 2015)
Date: 2012-05-15 23:54:41 UTC
From: Ken Simpson, W8EK
Topic: 6987 Message: 6987

Coax Switches, Wattmeter, and SWR Bridges For Sale:

Daiwa CS-401 Stripline 4 Position Coax Switch:

Daiwa switches utilize professionally engineered all metal cavity construction for maximum efficiency, high isolation and minimum resistance. Isolation is better than 60 dB at 300 MHz. Insertion losses are less than 0.2 dB. The Daiwa CS-401 permits the selection of up to four antennas. Unused antenna positions are grounded.

Freq. Limit 800MHz
Power Rating 2.5 kW PEP 1 kW CW
VSWR below 1:1.2
Insertion Loss < 0.2dB
Isolation 60 dB at 300 MHz
Connectors SO239

This one works fine with great switching action. $70

Heath HD-1234 Coaxial Antenna Switch:

This coax switch has SO-239 connectors arranged so the coax comes out like the spokes of a wheel. It will switch up to 4 antennas, and also ground all of the antennas. It will handle full legal power.

This particular switch works 100% and looks fine also.

With paper work for $35.

Heath HM-2141 Dual Meter VHF Wattmeter / SWR Bridge:

The HM-2141 is the VHF version of the more popular HM-2140 wattmeter and SWR Bridge, and has the same features, except it covers from 50 to 175 MHz.

This is the wattmeter that has two meters on it, so it reads both forward and reflected power at the same time. It also has a "Peak" position, so it can capture the peak power, in essence reading PEP output. Forward scales are 30 or 300 Watts, and reverse are 10 W or 100 W, plus SWR scale. It covers 50 to 175 MHz. It needs a 9 volt battery for "peak" operation. It has a remote sensor with about 3 feet of cable.

This particular meter works 100%. The outer case (top and sides) has been repainted black hammertone, and looks

very nice.

With paper work for $100.

Heath HM-15 SWR Bridge:

This is an HF SWR Bridge, with SO-239 connectors on
the back. The front has the meter on the left, and two
knobs to the right. It is the same size as the HD-15
phone patch.

This one works fine and is in nice cosmetic shape.
I can not find a scratch on it.

Paper work included for $20.

HF and VHF SWR Bridges:

Both of these cover from 3 to 150 MHz, covering HF,
6 meters,and 2 meters. SO-239 connectors.

Monarch FSI-5
This unit features two separate meters --
one for reading forward power and another for reading SWR.
This permits one to easily monitor both the power going
out, and the SWR on the antenna at the same time. It works
fine and looks great. With paper work for $37.

Royce 2-100 Single Meter SWR Bridge / Field Strength Meter
This one works fine, and looks extremely nice. I do not see
any scratches on it, but it does have a previous owners name
on it. In its original box with original instructions. $28

I also have many other accessories available such as many
different types of microphones, HTs, VHF and UHF rigs, HF
and VHF/UHF antennas, etc.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

6989. FS: Icom 451A UHF all mode radio

Yahoo group: ham4sale (2007 — 2015)
Date: 2012-05-17 15:06:01 UTC
From: John
Topic: 6989 Message: 6989

I have for sale an Icom 451A 430-440mhz all mode transceiver. This does not cover the FM portion of 70cm in the US, so it won't work on your local repeater. It does 10 watts out, has a built in PS, hand mic, and a jack for a power cord if you want to run it on 12 volts. You will have to make up a power cord for it, though.

It is in very good condition for its age. The face looks very nice. The case is also in very good condition except for a little rust on the trap door on the top which you remove to get at some of the set and forget controls. It works on both transmit and receive in the brief testing I did with it. It does not come with a manual, but you can find those on the internet.

I am asking $185 shipped in the US and can take paypal/check/MO. This would make a good weak signal and satellite rig.

Topic: 6992 Message: 6992

I am looking for a Yaesu FT100D HF/VHF/UHF radio. Need the mic and power cord with it, and would take other accessories if you have them-but they are not needed.

I am looking for a late 2001 (1L or later SN), 2002 or 2003 model (serial number startes with 2 or 3) that has had the SWR/grounding mod done at the factory.

I will pay with paypal for an instant payment for you. Anyone have one available? Let me know the price shipped to zip 73507

I am downsizing my station to move into a condo so I am offering the following equipment for sale.

For Sale:

Kenwood TS-2000 in great condition $995
Cushcraft AS148 2M, 10 element Yagi $75
HyGain AV-640 vertical Used 1 year $220
Astron RS-50M power supply $199
Kenwood TH-D7 Handheld $175

Everything is in better than average condition. I would prefer pickup, but can ship at buyers expense.

I have much more that I will be posting on my website http://www.w3pv.org/ham so please check out my list there.

6996. MFJ-998 Autotuner for sale

Yahoo group: ham4sale (2007 — 2015)
Date: 2012-05-19 01:22:47 UTC
From: phil_ad5x
Topic: 6996 Message: 6996

For sale is my MFJ-998 autotuner. I now have a MFJ-998RT remote tuner at my antenna and no longer need my desk-top MFJ-998. This unit works perfectly and has the latest firmware installed. Besides the amp-disable feature, I've also added a separate solid-state output for amp muting for those amplifiers with this feature (I use this with my Elecraft KPA500 amplifier). See my review of the MFJ-998 in the "Reviews" section of my website at www.ad5x.com, as well as the solid-state amp-muting modification in the "Equipment Modifications" section of my website. You can also find reviews on eHam at www.eham.net/reviews/detail/6804. Price is $425 shipped via UPS ground (US only).

6997. MFJ-201 Dip Meter for sale

Yahoo group: ham4sale (2007 — 2015)
Date: 2012-05-19 01:23:44 UTC
From: phil_ad5x
Topic: 6997 Message: 6997

For sale is my MFJ-201 Dip Meter in excellent condition. The MFJ-201 can be used for checking circuits and components in receivers, transmitters, antennas, etc from 1.5-250 MHz in 6-bands. It has a multi color coded thumb-wheel tuning knob whose colors are associated with specific coupling coils and frequency read-out. With the MFJ-201 you can determine the resonant frequency of antennas or tuned circuits, and determine the electrical length of ¼- and ½-wave coax lines. You can also use the MFJ-201 as a wave meter, a field strength meter, an RF test oscillator with or without AM modulation, a crystal oscillator (with FT-243 crystals), and even a 2KHz audio oscillator. The User Manual and all coils are included. Price is $69 shipped in the US. PayPal, check or money order.

Dual band (2 m and 440 MHz) transceivers (Mobile and
HT), 2 meter FM transceivers (mobile and HT), HF
transceiver, HF Linear amplifier, Power Supplies,
Coaxial antenna switch, coaxial cable, and related items
For Sale:

Icom IC-2350 dual band FM transceiver:

The Icom IC-2350H features large dual LCD displays,
simultaneous dual-band receive, simultaneous two
frequency reception on the same band, built-in
duplexer, separate volume and squelch controls,
high power output, built-in programmable tone encoder,
auto repeater shift function and compact size. This
radio supports sub band mute, three output levels,
tone encode, built-in duplexer and dual volume and
squelch. Enjoy extended receive on the 2 meter band
from 118 to 174 MHz. Includes DTMF hand mic and DC
power cable.

Features:
Two Call Channel
Tone Scan
110 Memories
Scanning
Time-Out Timer
Multi Function Mic
50/10/5 Watts Output 2 M
35/10/5 Watts Output 440
Two Call Channels
Priority Watch
Extended receive
Auto-repeater Function
Air band Receive [AM]

This particular unit works 100% and looks the same.
I can not find a scratch on it. With paper work for $275.

Alinco DR-610 dual band FM Transceiver w/ cross band repeat:

The Alinco DR-610TQ dual-band FM transceiver (144/440 MHz)
combines a Hi-Tech rugged design with exceptional user
friendliness. The front panel can be separated from the
main body for custom installation. Full duplex cross-band
operation and cross-band repeater function are standard.
It has two VFOs, 120 memories plus split channel, call

channel and program scan mem. The DR-610 also utilizes Alinco's advance channel scope display with real time monitor to give you a visual indication of activity on up to 11 frequencies. Mono band dual receive is also supported, along with aircraft receive.

Power output on VHF is 50/10/5 watts and on UHF is it 35/10/5 watts. Receive range: 108-173.995 MHz and 420-470 MHz. Size: 5.5 x 1.6 x 6.4 inches 2.4 Lbs

Features:
120 Memories
Encode/Decode
DSQ
TOR and APO
Bell Function
Cross Band Repeat
Air band Receive [AM]
5 Channel Auto Dialer
Remote Front Panel
9600 bps I/O Jack

This one works 100% and looks very close to perfect. With paper work for $275.

Alinco DJ-580 dual band (2m and 440 MHz) HT:

This HT receives from 110 to 174 MHz in the VHF position, which includes the AM Aircraft band. 440 to over 480 MHz in the UHF position. Of course it transmits in the 2 meter and 440 MHz ham bands. It is my understanding that it can also be modified to receive into the 800 and 900 MHz region. It will also cross band repeat, and is an extremely rugged radio.

Power output has 3 different levels. With the 7.2 V battery packs, it has 0.25 W / 1 W / 2.5 W. If used with the larger 12 V batteries, it will produce 0.25 W / 1.2 W / 5 W.

This particular unit is in very good shape, both electrically and cosmetically. The keyboard has very crisp and clear lettering. It includes desk charger, rubber duck antenna, belt clip, wrist strap, battery, and paper work. $130

Yaesu FT-227 RA "Memorizer" 2 meter FM transceiver:

The FT-227 is an FM rig with about 12 watts output (1.5 W in low power) covering the entire 2 meter band. This is the "A" model that has four memories. It has provisions for installing a CTCSS subaudible tone module.

This rig was used on packet, and will make an excellent
APRS or packet rig. It works fine and looks fine. Since
it was used on packet, there is no microphone included,
but it does include power cord and paper work for $40.

Kenwood TR-7730, 2 meter FM Transceiver:

The Kenwood TR-7730 is 2 meter mobile transceiver that has
CTCSS subaudible tone capability (tone board not installed).
It has 25W or 5W output, with 5 memories and scan functions
(band & memory).
This is an easy to operate radio! It is a great radio for
APRS or packet.

This one works 100% and looks OK, but certainly not mint.
It does have some scratches. Paper work is included.

I will sell it one of two ways.
With the MC-46 DTMF touch tone mic (which works fine and
looks really great), it is $80.
With a generic, non DTMF touch tone, regular mic, it is $50.

Kenwood TH-235 Two Meter FM HT:

The Kenwood TH-235A Two meter HT has a large easy-to-read
LCD, 60 channel memories with scanning and ten DTMF
memories. Extended receive is 136-174 MHz so it includes
the weather frequencies. When used on external DC power
you will get a full 5 watts output. With the included
PB36 battery pack, it produces 1.5 watts. The low power
setting is 0.5 watts.

Features
Backlit LCD Display
60 Memories
Scanning
Battery Saver
Built-In CTCSS Encode
Extended Receive

This particular unit works 100% and looks like it just came
out of the box new. It came from a silent key who I don't
think ever used it. This one includes the desk charger,
rubber duck antenna, belt clip, and paper work for $115.
I added a new PB-36 battery, as the old one had been in
the drawer long enough that it is not in good condition.

Cigarette lighter power cord for TH-235 above. $12

Yaesu FT-990 Deluxe HF Transceiver:

The Yaesu FT-990 features multiple direct digital synthesizers
for pure local signals and high performance. It has an
automatic antenna tuner. A 500 Hz CW filter is built in.

It has keypad entry. Power output is adjustable up to 100 watts output (25W AM). A power supply for operation from 120 V AC is built in, or it can be powered by 13 V DC at about 22 amps.

Features:
General coverage receiver, tunes continuously from 100 kHz to 30 MHz
Modes: AM, USB, LSB, CW, FM, FSK
Iambic CW keyer
Automatic Antenna Tuner
Notch filter, IF shift, noise blanker, and a digitally switched capacity audio filter
Multi-function illuminated analog S-meter
90 Memories
Dual VFOs
Built-in AC Power Supply
Noise Reduction
Digital Filtering
IF Notch
Manual and Auto AGC

This particular unit works fine, and looks very close to perfect. This is a terrific radio. $895

Ameritron AL-84 HF Amplifier:

The Ameritron AL-84 is a grounded grid linear amplifier using four 6MJ6 tubes driven thru an impedance matching and power swamping network. It has a pi net output, and an illuminated meter that reads plate current and voltage. There is a connector on the back that will furnish 12 V DC at low current for such things as lights on an antenna tuner, powering a keyer, etc. The AL-84 is rated to deliver 400 watts when driven with a 100 watt rig.

This particular unit has had the 10 meter mod done, so it covers 160 thru 10 meters. It works fine, producing rated power, and looks almost perfect.

With paper work for $400.

Pyramid PS-25 Power Supply (25 amps at 13 V DC):

The Pyramid PS-25 is a 13 Volt DC power supply with both a voltmeter and an ammeter built in. The output voltage is adjustable over a range from about 11.5 to 15.5 volts DC. There is also an adjustment to set the current limiting, up to 25 amps. This means it can be set so that it will protect the finals of a solid state rig. In addition, a buzzer is activated if it goes into over current limiting. This power supply has the features you want!

This particular unit works fine, and looks extremely nice.

With paper work for $80.

Astron RS-20A Power Supply:

The RS-20A is a DC Power Supply producing 13.8 V DC (internally adjustable from 11 to 15 V DC) at up to 16 amps continuous and 20 amps ICS. The RS-20 features crowbar over voltage protection and fold-back current limiting to protect your equipment.

This particular supply works fine, and looks very close to new. I do not find a scratch on it.

With paper work for $60 plus shipping from Florida.

Daiwa CS-401 Stripline 4 Position Coax Switch:

Daiwa switches utilize professionally engineered all metal cavity construction for maximum efficiency, high isolation and minimum resistance. Isolation is better than 60 dB at 300 MHz. Insertion losses are less than 0.2 dB. The Daiwa CS-401 permits the selection of up to four antennas. Unused antenna positions are grounded.

Freq. Limit 800MHz
Power Rating 2.5 kW PEP 1 kW CW
VSWR below 1:1.2
Insertion Loss < 0.2dB
Isolation 60 dB at 300 MHz
Connectors SO239

This one works fine with great switching action. $70

Heath HM-2141 Dual Meter VHF Wattmeter / SWR Bridge:

The HM-2141 is the VHF version of the more popular HM-2140 wattmeter and SWR Bridge, and has the same features, except it covers from 50 to 175 MHz.

This is the wattmeter that has two meters on it, so it reads both forward and reflected power at the same time. It also has a "Peak" position, so it can capture the peak power, in essence reading PEP output. Forward scales are 30 or 300 Watts, and reverse are 10 W or 100 W, plus SWR scale. It covers 50 to 175 MHz. It needs a 9 volt battery for "peak" operation. It has a remote sensor with about 3 feet of cable.

This particular meter works 100%. The outer case (top and sides) has been repainted black hammertone, and looks very nice.

With paper work for $100.

Coaxial Lightning Arresters:

These lightning arresters are made to be inserted in to
your coaxial feedline, to help reduce lightning damage.

Cushcraft LAC-2
Still in the original blister pack, unused.
This one has an SO-239 (female UHF) connector on each end,
so that a PL-259 can be screwed into it. $15

Cushcraft LAC-1 ??
No markings on this to confirm the model number, but it
looks like the Cushcraft "Blitz Bug".
It has an SO-239 on one end and a PL-259 on the other end
(female UHF on one end and male on the other). $10

Coaxial Cable:

I accumulated a fairly large amount of miscellaneous
lengths of coaxial cable. Most of the cable is RG-8
(.405 inches in diameter) or equivalent. Most has a
PL-259 on at least one end, and most on both ends.

All of the coax over 20 feet has been checked with an
analyzer, and its loss has been confirmed to be within
10% of new specs which is as close as I can measure.
Lengths under 20 feet have been checked for continuity,
because loss is almost impossible to measure for lengths
this short.

I have a large amount in many different lengths, varying
from 1 foot to 80 feet. To put it another way, I have
jumpers for in your shack, and lengths to run up your
tower. I can not list all of the lengths. Please let
me know what you need, and I will see how close I can come.

The coax is 3 feet for a dollar (33 cents a foot), plus
$2 for each installed PL-259, plus shipping from Florida.

Coax connectors and adapters:

Prices are per connector. Several of each are available.
Most are unused.

UHF Right angle 90 degree elbow connector $3

UHF double female "Barrel connector" (two SO-239 together) $3

UHF "Bulkhead Connector" - Double female, as above, but for
mounting thru a window, siding, etc. about 3 inches long $6
-
UHF double male connector (two PL-259's together) $3

UHF "T" connector with two female (SO-239) and one male
(PL-259) connection $5

Antenna adapter to fit the BNC connector on the HT
and provide an SO-239 connector that will permit
a PL-259 to be attached. (BNC male to UHF female) $5

UHF Male to BNC female (opposite of above) $5

BNC male for coax cables
standard type $2
crimp on type $3

Chassis mount BNC female
square mount (uses 4 screws) $3
screw in type $3

BNC "T", two female and one male $3

"N" Connector, Double Male $8

Power Cord:

This is a two pin power cord that is used on some 2 meter,
and other VHF/UHF rigs. The connector looks very similar
to a round 2 pin female mic connector.

This type cord was used by KDK, Kenwood, Yaesu and probably
others, typically back in the 1990's. I know it was used
on the KDK 2015 and 2016, Kenwood TR-9000 and others, Yeasu
FT-720 and 727 series, plus many others.

This cable works fine, and looks fine. $15

I also have many other accessories available such as many
different types of microphones, HTs, VHF and UHF rigs, HF
and VHF/UHF antennas, etc.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

7005. WTD: Telegraph Key Knob (NAVY style)

Yahoo group: ham4sale (2007 — 2015)
Date: 2012-05-23 20:29:18 UTC
From: w6adv
Topic: 7005 Message: 7005

Hi Guys,

I am restoring an old Lowenstein military spark key and need a Navy style knob to finish it off. This would be the kind that looks like a typical straight key knob with a larger circular plate on the bottom.

If you have one, or have a junker key with a good Navy knob that you would sell me at a reasonable shipped price, please let me know.

Thanks,

Craig

7008. Kendricks TwoFer Transmitter Assembled

Yahoo group: ham4sale (2007 — 2015)
Date: 2012-05-26 00:30:24 UTC
From: phil_ad5x
Topic: 7008 Message: 7008

For sale is my Kendricks TwoFer transmitter. This was built for 20 meters. It has a 14.060 MHz crystal installed, and the tuning permits about a 3KHz swing in frequency. This is fully built, tested, and installed in a nice metal case. I built-in a 10V low drop-out regulator which limits the output power to 1-watt. However, you can easily bypass this regulator and get over 2-watts out at 12VDC. Email me for internal and external photos. Price is $25 shipped US. PayPal, check or money order.

Phil - AD5X

Six meter solid state amplifier capable of well over 1 kw. Has 57 Amp 50 Volt PS and fans for cooling if run 1kw or more. Approximately 4 watts drive can get 400 watts out of this amplifier. About 15 watts should yield about 1500 watts.

To view pictures and download the PDF describing the linear and how to set it up:

Go to W5UQ.com and click on:

"Please Click here for pictures of Gear For Sale as of June 2011"

The Harris Amp pictures are what you need to see. I have sold all of the Motorola VHF amps.

Interested persons please contact me off list.

W5UQ@... or call me at 281-259-7877 between 9am and 6pm CDT.

We can make a deal.

7014. wanted: HC49 or similar AT-cut crystal 22.928 or 23.567 MHz (or close)

Yahoo group: ham4sale (2007 — 2015)
Date: 2012-05-29 01:05:06 UTC
From: murrayatuptowngallery
Topic: 7014 Message: 7014

I suppose 22.93 or 23.57 are close enough, but it goes into a tripler followed by another tripler, so that is about as far off as I'm interested in.

This is a long shot, but maybe someone took something apart & has one...

Otherwise, any suggestions on the cheapest way to have one made to order would be appreciated - there are plenty of places that will make one, but if I choose one one blindly, I would have no idea who makes it weasy to order 1-off parts.

Thanks

Murray

7015. FS MP-1 Antenna

Yahoo group: ham4sale (2007 — 2015)
Date: 2012-05-30 13:23:47 UTC
From: Jack Stegall
Topic: 7015 Message: 7015

have for sale an MP-1 portable vertical antenna. It can be adjusted to work from 40M up to 440 mhz. Its in good shape except the counterpoise wire is broken where it clips on. This was a mickey mouse arrangement anyway and you would probably want to change the way its attached. $75 shipped via US parcel post to lower 48. Can e-mail picture.

7016. FOR SALE: RARE COMMANDER II 2 METER 144-148 MHz KW + VHF AMPLIFIER

Yahoo group: ham4sale (2007 — 2015)
Date: 2012-05-30 22:13:24 UTC
From: n3dg
Topic: 7016 Message: 7016

High Power 2 Meter Amplifiers are quite rare for serious DX, Moonbounce, EME, E Skip, Tropo, Aurora, Moonbounce, Contests, or ragchewing long-distance on SSB or FM.

Made by renown Command Technologies of Bryant, Ohio, Commander II is a Very Rare & Rugged 1 KW+ All Mode 2 Meter Linear Amplifier supporting 144-148 MHz.
Only 10-15 watts drive nominal is needed and 30 watts will yield 1 KW SSB/CW with its reliable Eimac 3CX800A7 Final and with all Silver-Plated RF Components, Stripline Tank Circuit, Dow Key Relay all in a compact attractive cabinet measuring only 14.75"W x 14.75"D x 6"H and powered by either 120 Volts AC or 240 Volts AC (now wired for 240 Volts AC, easy to change to 120 Volts AC).

Specifications and Manual at:
http://www.palstar.com/manual_CommanderII_old.pdf

Commander II is absolutely Mint, Like New, just sat on the shelf not used and now need the room for HF gear.
Includes Original Commander II Shipping Cartons (double-boxes for RF Deck), Owners Manual and 240 Volt @ 20 Amp AC Plug.
Photographs upon request.

New list price is over $3000, yours for $2300 plus shipping.

7017. WTB: power cord

Yahoo group: ham4sale (2007 — 2015)
Date: 2012-05-30 22:44:34 UTC
From: Doug
Topic: 7017 Message: 7017

I'd like to obtain a power cord that fits a Lafayette cassette recorder,
model RK-86A.
This is a 2-wire AC cord with a SMALL modified "Mickey-Mouse" connector
at the
recorder. The connector on the recorder has 2 pins, ~0.2" apart. The
housing
is ~0.3" x 0.5", with a switch tab coming down about 0.05" from one of
the wide
sides. Therefore, the cord connector has to be just about flat on one
broad side,
not real Mickey Mouse, so as to actuate the switch when connected.

Doug, WA2SAY

7022. Kenwood Items FS

Yahoo group: ham4sale (2007 — 2015)
Date: 2012-06-03 12:48:57 UTC
From: Ken Simpson, W8EK
Topic: 5777 Message: 7022

Kenwood Items For Sale
Two meter FM HT, 440 MHz HT "Tech Special", chargers
and other HT accessories, desk and hand microphones,
cable for switching linear amp, power cord, coaxial
cable, coax switch, original Kenwood manuals, etc.:

Kenwood TH-235 Two Meter FM HT:

The Kenwood TH-235A Two meter HT has a large easy-to-read
LCD, 60 channel memories with scanning and ten DTMF
memories. Extended receive is 136-174 MHz so it includes
the weather frequencies. When used on external DC power
you will get a full 5 watts output. With the included
PB36 battery pack, it produces 1.5 watts. The low power
setting is 0.5 watts.

Features
Backlit LCD Display
60 Memories
Scanning
Battery Saver
Built-In CTCSS Encode
Extended Receive

This particular unit works 100% and looks like it just came
out of the box new. It came from a silent key who I don't
think ever used it. This one includes the desk charger,
rubber duck antenna, belt clip, and paper work for $110.
I added a new PB-36 battery, as the old one had been in
the drawer long enough that it is not in good condition.

Cigarette lighter power cord for TH-235 above. $12

Kenwood TH-41 BT HT for 440 MHz:

The Kenwood TH-41 BT is an easy-to-use and compact 440
MHz HT. Frequency selection is via thumbwheel switches
on the top of the radio. There is a DTMF touch tone pad
on the front, along with DIP switches for selection of
the built in PL subaudible tone.

This HT is a "Tech Special" or could be used for parts.
It could also be used to get subaudible PL tone if you
have one of the older "AT" models that lack the tones.
Basically, this unit transmits fine. On receive it sounds
like it is working (squlech action is OK, it has audio,
etc.) but a signal is not received. It acts like the

receiver may be off frequency. Of course it could also
be used for "fox hunts" since the transmitter works fine.

I am selling the HT only, with no accessories.
Cosmetically it is nice. I will include both operating
and service manuals on CD. $25

Accessories for the Kenwood TH-21 / 31 / 41 series HTs:

Special Antenna adapter that fits the TH-21 series HTs,
and has a BNC on the other end. $10

Kenwood SC-8 T "Soft Case" for any of the TH-21 series HTs
great condition $12

Original Operating manual for TH-21 HT for 2 meters $8

MFJ 287 Speaker Microphone
This was used on a Kenwood TH-225 HT, but it also fits the
TH-21/31/41 series HTs, TH-205, TH-215, TH-415, as well as
others. It has a 3 conductor 3.5 mm plug and a 2 conductor
2.5 mm plug. It works fine. $15

Kenwood W09-0315 charger
This charger is used to charge the larger PB-21 H batteries
for the TH-21 series, and also on other Kenwood radios.
It has a standard 2.1 mm coaxial connector. $12

Kenwood MS-1 charger / DC power supply:

The MS-1 is designed to be used with the Kenwood TR-2500
and TR-2600 HTs. The HT slips into the unit, and will
charge the battery, or power the unit, or both. The HTs
use 9.6 volts DC to operate. This unit converts 13 V DC
down to the required 9.6 V DC. It also functions as a
holder for the HT in the car, and as a light to illuminate
the LCD display on the HT.

This one works fine, and looks OK. With paper work for
$20.

Accessories for Kenwood TH-205, TH-215, TH-225, TH-415,
and other HTs in this series:

MFJ 287 Speaker Microphone
This was used on a Kenwood TH-225 HT, but it also fits the
TH-21/31/41 series HTs, TH-205, TH-215, TH-415, as well as
others. It works fine, and looks close to new. $15

Kenwood Wrist Strap for TH-215, plus many other HTs. $4

Original Kenwood Rubber Duck antenna from TH-215. $10

Kenwood BC-2 Charger for PB-2 batteries.
In Original box for $12.

BNC to PL-259 antenna adapter
Antenna adapter to fit the BNC connector on the HT and provide an SO-239 connector that will permit a PL-259 to be attached. This adapter can be used on any HT with a BNC connector. $5

Deluxe Desk Microphone w/ Kenwood 8 pin connector:

This is a great looking and great performing low impedance desk mic. It has a quality Shure 600 ohm cartridge in it (the cartridge alone is over $40 new), with a very nice black die case base and neck, with a chrome grill. It looks somewhat like a Shure 444, but no plastic on this one -- all metal!

This one looks like new, and works the same. It has a long (approx 6 foot) cord, with a round 8 pin connector for Kenwood. $75

Kenwood Hand Microphone with round 8 pin plug:

This hand mic works great on most Kenwood rigs with the round 8 pin connector, such as the TS-430, TS-440, TS-570, TM-241, TM-2530, TW-4000, and others.
It only says "Electret Condenser Mic" on it, with no model number.

Basically, this mic is like an MC-43, only with a couple more features. Of course it has the mic and PTT switch; it also has up/down switches on the top. There are four "extra" buttons labeled Call, VFO, MR, and PF. What these four buttons do depends on the rig that it is attached to. They will function on some rigs, and are completely useless on others. There is also a "Lock" switch on the back.

Regardless if you use the four extra buttons or not, you still have a mic that works like an MC-43.

This mic works fine, and looks like new. I am guessing it came with a rig, and was immediately put in the drawer. $30

Hand Microphone with 8 pin modular plug for Kenwood:

This hand mic says "Electret Condenser Mic" on it, with no model number.

This mic has the mic and PTT switch; it also has up/down switches on the top. There are four "extra" buttons labeled Call, VFO, MR, and PF. What these four buttons do depends on the rig. They will function on some rigs, and are completely useless on others. There is also a "Lock" switch on the back.

This mic has the 8 pin modular plug (like a computer LAN)
on it, as used by the Kenwood TM-261, TM-271 and others.
It has been tested on a TM-261, but probably works on
many others.

This mic works fine, and looks like new. I am guessing it
came with a rig, and was immediately put in the drawer. $30

Coaxial Cable:

I accumulated a fairly large amount of miscellaneous
lengths of coaxial cable. Most of the cable is RG-8
(.405 inches in diameter) or equivalent. Most has a
PL-259 on at least one end, and most on both ends.

All of the coax over 20 feet has been checked with an
analyzer, and its loss has been confirmed to be within
10% of new specs which is as close as I can measure.
Lengths under 20 feet have been checked for continuity,
because loss is almost impossible to measure for lengths
this short.

I have a large amount in many different lengths, varying
from 1 foot to 80 feet. To put it another way, I have
jumpers for in your shack, and lengths to run up your
tower. I can not list all of the lengths. Please let
me know what you need, and I will see how close I can come.

The coax is 3 feet for a dollar (33 cents a foot), plus
$2 for each installed PL-259.

Coaxial Lightning Arrestors:

These lightning arrestors are made to be inserted in to
your coaxial feedline, to help reduce lightning damage.

Cushcraft LAC-2
Still in the original blister pack, unused.
This one has an SO-239 (female UHF) connector on each end,
so that a PL-259 can be screwed into it. $15

Cushcraft LAC-1 ??
No markings on this to confirm the model number, but it
looks like the Cushcraft "Blitz Bug".
It has an SO-239 on one end and a PL-259 on the other end
(female UHF on one end and male on the other). $10

Daiwa CS-401 Stripline 4 Position Coax Switch:

Daiwa switches utilize professionally engineered all
metal cavity construction for maximum efficiency, high
isolation and minimum resistance. Isolation is better
than 60 dB at 300 MHz. Insertion losses are less than
0.2 dB. The Daiwa CS-401 permits the selection of up

to four antennas. Unused antenna positions are grounded.

Freq. Limit 800MHz
Power Rating 2.5 kW PEP 1 kW CW
VSWR below 1:1.2
Insertion Loss < 0.2dB
Isolation 60 dB at 300 MHz
Connectors SO239

This one works fine with great switching action. $70

Linear Amp Switching Cable for Kenwood Rigs:

This cable goes from a Kenwood transceiver to a
linear amplifier to switch the amp from transmit
to receive.

One end has a DIN connector, as is used with most
Kenwood rigs. The other end has an RCA phono plug,
as used by most linear amplifiers.

Before using this cable, please check the switching
capabilities of your transceiver.

This cable has one coax for switching the relay. $15

Power Cord:

This is a two pin power cord that is used on some 2 meter,
and other VHF/UHF rigs. The connector looks very similar
to a round 2 pin female mic connector.

This type cord was used by KDK, Kenwood, Yaesu and probably
others, typically back in the 1990's. I know it was used
on the KDK 2015 and 2016, Kenwood TR-9000 and others, Yeasu
FT-720 and 727 series, plus many others.

This cable works fine, and looks fine. $15

Operator's Manual for Kenwood (Trio) TS-440 S:

This is a quality reproduction with a "comb" binding
that has been done by one of the professional reproduction
houses. W7FG I think.

This one has a plastic protector on the front, and is
in very nice condition. It includes schematic diagrams.
$18

Original Manuals for Kenwood equipment:

All manuals are in very nice condition, for Kenwood equipment.
All are original manuals only.

Operating manual for TS-130 S/V HF xcvr $20
Operating manual for TM-2570/2550/2530 2 m xcvr $15
Operating manual for TW-4000 dual bander $15
Service manual for TW-4000 dual bander $20
Operating manual for TW-4100 dual bander $15
Operating manual for TH-21 HT for 2 m $8
Operating manual for TH-225, 2 m HT $12
Operating manual for TH-235, 2 m HT $15
Operating manual for TH-241/441/541 mobile FM transceivers
...For 2 m, 440 MHz, & 1200 MHz. $12
Operating manual for TM-221/421 mobile $15
Operating manual for TR-2400, 2 m HT $12
Service manual for TR-2600, 2 m HT $12
Operating manual for TR-7400, 2 m xcvr $8

Kenwood TM G-707 operating manual in Spanish:
Spanish version of the Operating Manual
for the TM G-707 dual band transceiver. New $10
All other manuals are English.

LF-30A Low Pass Filter $5
MC-30 & MC-35 hand microphones $5
MC-85 desk microphone $4
PB-1, PB-2, PB-3, & PB-4 battery packs $3
PS-6 power supply $6
SMC-24 speaker mic $4
SMC-25 speaker mic $4
SP-430 speaker $2
SP-820 Speaker $2

These are original Kenwood manuals only.

I also have many other accessories available such as many
different types of microphones, HTs, HF, VHF and UHF rigs, HF
and VHF/UHF antennas, and many miscellaneous accessories.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

Frequency band: 140-160 150-170MHz VHF 400-420 410-430 430-450
450-470 470-490 490-510 MHz

Channel space: 25/12.5KHz W/N

Output TX power: 8W

IIt costs 550USD only (Shipping to USA, Canada, Mexico, UK, Germany,
Australia, France, Spain included and other EU)!!!!

BF-2000 Repeater with duplexer and 110/220V

Channel spacing: 25/12.5KHz W/N

Output TX power 25W

Frequency band: 140-160 150-170MHz VHF 400-420 410-430 430-450
450-470 470-490 490-510 MHz UHF

It costs 800USD only (Shipping to USA, Canada, Mexico, UK, Germany,
Australia, France, Spain included and other European Union countries)!!!!

External Mic, User manual, programming software, programming cable is
included!!!!

Order will be shipped via DHL Worldwide Express.

Skype: NISTRU78

Yahoo MSN: NISTRU78

PayPal and Moneybookers (Skrill) are accepted!

NOTE: If you want to purchase any of listed repeaters, you must tell
RX/TX frequency!!!!

ALL REPEATERS ARE ABSOLUTELY NEW, FACTORY SEALED!!!!

BUYER IS RESPONSIBLE FOR CUSTOMS AND OTHER LOCAL TAX!

7030. MAGNUM 1012 CB/HAM HF HANDHELD TRANSCEIVER

Yahoo group: ham4sale (2007 — 2015)
Date: 2012-06-11 16:16:06 UTC
From: Vitalie Ucrainciuc, ER1UVL
Topic: 7030 Message: 7030

MAGNUM 1012 CB/HAM HF HANDHELD TRANSCEIVER

10M / 11M / 12M MULTIMODE HANDHELD AM/FM/LSB/USB 27/81 CEPT

A) Already modified so that you can choose what block of channels directly from the radio. You dont need to solder it or short anything or take it to bits to get into the programming mode. Select from the eleven blocks as shown below straight from the radio!!
B) Fully tested & correctly set up
C) These 1012s are the latest version with no VCO/ SSB warble / FM'ing

Details:

NEW MAGNUM 1012 CB / HAM / 10M / 11M / 12M MULTISTANDARD MULTIMODE HANDHELD AM/FM/LSB/USB 27/81 CEPT
LATEST VERSION!!

Latest version 10m multimode handheld that can be expanded to cover any of the following bands:

Code 1: 10 Meter Band (28.000 - 29.690MHz), AM/FM/SSB < Default
Code 2: 12 Meter Band (24.890 - 24.990MHz), AM/FM/SSB
Code 3: 454 channels (25.165 - 29.655MHz), AM/FM/SSB
Code 4: 454 channels PL (25.160 - 29.650MHz, '0' Raster), AM/FM/SSB
Code d: German 80 channel CB (26.565 - 27.405MHz), AM (1W)/FM/SSB
Code EU: 40 channel CB (26.965 - 27.405MHz), AM(1W)/FM/SSB
Code E: 40 channel CB (26.965 - 27.405MHz), AM/FM/SSB
Code PL: 40 channel CB (26.960 - 27.400MHz, '0' Raster), AM/FM/SSB
Code U1: UK 40 channel CB (27.601 - 27.991MHz), AM/FM/SSB
Code U2: UK 40 channel CB (26.965 - 27.405MHz), AM/FM/SSB
Code US: USA 40 channel CB (26.965 - 27.405MHz), AM/SSB

The Magnum 1012 features memory channels, frequency scan, a dual fine/course clarifier and a 6 digit frequency display.

Complete with a blue LED display, this is the best and sharpest looking 10 meter handheld currently available.

Requires 9 AA batteries. If NiCad batteries are used, you will need an AC wall charger to charge the batteries inside the radio.

MAGNUM1012 Specifications:

Dual Band: 10 Meters (24.8900~24.9900) 12 Meters (28.000~29.6995) Export (25.165 - 29.655)
Modes: USB / LSB / AM / FM
RF Output Power: USB/LSB 5 Watts / AM/FM 4 Watts Carrier 10 Watts PeP

MAGNUM1012 Features:

Microphone Gain Control: Provides variable modulation
RF Gain Control: Variable Receive Gain
Squelch Control: Used to eliminate background noise
Frequency Display: 6-Digit, Blue Backlit
Clarifier Control: Adjustable range of +/- 600 Hz
Frequency Resolution: 500 Hz Step
Memory Channels: 5
Memory Channel Scan
Frequency Scan
Split Frequency Offset for Repeater Use
CH 9/19
Hi/Low power output
Lock
MARS / CAP Compatible
1 Year MFG Warranty

WARNING: Best to use Rechargeable NiMH Batteries, type AA. This allows you to charge the batteries in the battery holder as if it is a Battery Pack. When using NON Rechargeable Batteries (Alkaline or other types) in the Battery Holder do not put the radio in a battery charger or connect charger or adaptor to the battery holder.

Included in the box:

* Magnum 1012 multimode handheld

* Battery case: Slide on battery case. Accepts 9 x "AA" batteries not included

* Rubber Duck Antenna

* Battery Pack

* Belt Clip

Telescopic push - up heavy duty steel masts

Three sizes in stock all have 1.25 inch top section

* 30 FOOT 9M STEEL HEAVY DUTY 4 SECTION WITH 4 x GUY PLATES WEIGHT 15 KG ?139.99 GALVANISED STEEL

* 40 FOOT 12M STEEL HEAVY DUTY 5 SECTION WITH 5 x GUY PLATES WEIGHT 21 KG ?169.99 GALVANISED STEEL

* 50 FOOT 15M STEEL HEAVY DUTY 5 SECTION WITH 5 x GUY PLATES WEIGHT 31 KG ?229.99 GALVANISED STEEL

Introductory Special Offer Price

* All Metal, No Plastic Fittings!

* 1.5MM Wall Thickness on all sections

* Metal Locking Mast Clamps (Not Plastic !)

* Each Mast Shipped With 1pc 5 Hole Metal Guy Plates per section & Metal Locking Mast Collars

* These Masts Are Very Substantial! Do Not Compare To Cheaper Masts

* Have Been used Guyed With Beams, Hexbeams, Verticals And All Wire Aerials

Specification

1.MAST30(9M)

* First section

* Diameter:?51mm

* Length:2639mm

* Thickness:1.5mm 1pc

* Second section

* Diameter:?45mm

* Length:2670mm

* Thickness:1.5mm 1pc

* Third section

* Diameter:?38mm

* Length:2710mm

* Thickness:1.5mm 1pc

* Forth section

* Diameter?32mm

* Length:2800mm

* Thickness:1.5mm 1pc

*

* CLOSED LENGTH 2800mm = 9 FEET

* WEIGHT: 15 KGs = 33lbs

2.MAST40(12M)

* First section

* Diameter:?57mm

* Length:2590mm

* Thickness:1.5mm 1pc

* Second section

* Diameter:?51mm

* Length:2639mm

* Thickness:1.5mm 1pc

* Third section

* Diameter:?45mm

* Length:2670mm

* Thickness:1.5mm 1pc

* Forth section

* Diameter:?38mm

* Length:2710mm

* Thickness:1.5mm 1pc

* Fifth section

* Diameter?32mm

* Length:2800mm

* Thickness:1.5mm 1pc

* CLOSED LENGTH 2800mm = 9 FEET

* WEIGHT: 21 KGs = 46lbs

3.MAST50(15M)

* First section

* Diameter:?57mm

* Length:3140mm

* Thickness:1.5mm 1pc

* Second section

* Diameter:?51mm

* Length:3179mm

* Thickness:1.5mm 1pc

* Third section

* Diameter:?45mm

* Length:3218mm

* Thickness:1.5mm 1pc

* Forth section

* Diameter:?38mm

* Length:3257mm

* Thickness:1.5mm 1pc

* Fifth section

* Diameter?32mm

* Length:3350mm

* Thickness:1.5mm 1pc

* CLOSED LENGTH 3350mm = 11 FEET

* WEIGHT: 31 KGs = 68lbs

7033. VHF and UHF Antennas and related items FS

Yahoo group: ham4sale (2007 — 2015)
Date: 2012-06-12 12:26:44 UTC
From: Ken Simpson, W8EK
Topic: 7033 Message: 7033

VHF and UHF Antennas (2 m and 440 MHz) and related equipment
For Sale:

VHF Triband Mobile Mag Mount Antenna:

This mobile antenna is a VHF Triband antenna covering the
6 meter, 2 meter, and 440 MHz ham bands. This makes it
ideal for some of the newer multiband and dual band rigs
available today.

The antenna is about 3 feet long and has a very strong
magnet. It has a long coax cable with a PL-259 connector.

It works great, and looks very close to new. $75

Larsen NLA Type Mobile Antennas:

These antennas fit the Larsen NLA mobile mount, which is
a special mount made by Larsen.

Larsen NLA-150, 2 meter antenna, for Larsen NLA mount
Has about 3 db gain on 2 meters.

This one works fine and looks fine also.

Coil only, without whip (whip is hard to ship). $10
With four foot whip. $19

Larsen NLA-UHF coil for 440 MHz
This is the coil only for use on the amateur 440 MHz
band and UHF public service bands. Good condition. $10

Mobile Antennas for 440 MHz band:

"On Glass" mobile antenna for 440 MHz:
This antenna is made to mount on a windshield,
or other glass. It does not require a ground plane, as
it is a 1/2 wave antenna, rated to have 3 db gain. It is
ideal for places where a ground plane is not available,
such as a boat or motor home, in addition to cars. A
special tuning box is included to match to your particular
situation.
This one is still in its original tube, unopened. $33

Larsen NLA Type Mobile Antenna:
This antenna fits the Larsen NLA mobile mount, which is
a special mount made by Larsen.
Larsen NLA-UHF coil for 440 MHz

This is the coil only for use on the amateur 440 MHz
band and UHF public service bands. Good condition. $10

Mobile Antenna Mounts:

NMO "Luggage rack mount"
This NMO mount will attach to a luggage rack. The bracket
is made so it can attach to either a vertical or horizontal
portion. It is heavy chrome plated, with stainless steel
hardware, and is quite heavy duty for NMO. With 17 feet coax
and PL-259. It looks to be new. $18

NMO "Button" Mount
This mount fits into a 3/4 inch hole, and will then take any
of the many NMO types of antennas. Coax included.
It is in close to new condition. $12

Rubber Duck antennas for your HT:

All are for 2 meters, are in good condition,
and are $10 each, unless stated otherwise.

BNC - Original from Kenwood TH-215, about 5 inches long

BNC - Stubby about 4.5 inches long

5/16 inch threaded, as used by Motorola and others
Stubby - 4 inches long

Type F connector - 6.5 inches long

PL-259 connector - 6.5 inches long
HyGain 275, still in original packaging

PL-259 connector - Stubby - 4.6 inches long
Centurion, still in original package

BNC Stubby for 440 MHz, 3 inches long

Heath HM-2141 Dual Meter VHF Wattmeter / SWR Bridge:

The HM-2141 is the VHF version of the more popular
HM-2140 wattmeter and SWR Bridge, and has the same
features, except it covers from 50 to 175 MHz.

This is the wattmeter that has two meters on it, so it
reads both forward and reflected power at the same time.
It also has a "Peak" position, so it can capture the peak
power, in essence reading PEP output. Forward scales
are 30 or 300 Watts, and reverse are 10 W or 100 W,
plus SWR scale. It covers 50 to 175 MHz. It needs a 9
volt battery for "peak" operation. It has a remote
sensor with about 3 feet of cable.

This particular meter works 100%. The outer case (top
and sides) has been repainted black hammertone, and
looks very nice.

With paper work for $100.

HF and VHF SWR Bridge:

Royce 2-100 Single Meter SWR Bridge / Field Strength Meter

This unit covers from 3 to 150 MHz, covering HF,
6 meters,and 2 meters. SO-239 connectors in and out.

This one works fine, and looks extremely nice. I do not see
any scratches on it, but it does have a previous owner's
name on it.

In its original box with original instructions. $25

Coaxial Lightning Arresters:

These lightning arresters are made to be inserted in to
your coaxial feedline, to help reduce lightning damage.

Cushcraft LAC-2
Still in the original blister pack, unused.
This one has an SO-239 (female UHF) connector on each end,
so that a PL-259 can be screwed into it. $15

Cushcraft LAC-1
No markings on this to confirm the model number, but it
looks like the Cushcraft "Blitz Bug".
It has an SO-239 on one end and a PL-259 on the other end
female UHF on one end and male on the other). $10

High Power HF 1 to 1 Balun:

This is Palomar's very high power 1 to 1 HF balun. I am
not sure if it is rated at 3000 watts or 5000 watts, but
it is the big one. It is 4 inches in diameter and about
3 1/2 inches high. It has an SO-239 connector on the
bottom, that has a gold plated center pin, and silver
plated outer. It has "pigtails" coming out of the top
to connect to your balanced antenna.

It is designed so that it can easily be used with a beam.
It has a bracket from each side, and then a U bolt that
can attach to up to a 2 1/2 inch diameter mast or boom.
All hardware is stainless steel. This is a quality balun!

This one works fine and looks fine. $60

Coaxial Cable:

I accumulated a fairly large amount of miscellaneous lengths of coaxial cable. Most of the cable is RG-8 (.405 inches in diameter) or equivalent. Most has a PL-259 on at least one end, and many on both ends.

All of the coax over 20 feet has been checked with an analyzer, and its loss has been confirmed to be within 10% of new specs which is as close as I can measure. Lengths under 20 feet have been checked for continuity, because loss is almost impossible to measure for lengths this short.

I have a large amount in many different lengths, varying from 1 foot to 80 feet. Most long lengths are gone. I have jumpers for in your shack, and lengths to run up your tower. I can not list all of the lengths. Please let me know what you need, and I will see how close I can come.

The coax is 3 feet for a dollar (33 cents a foot), plus $2 for each installed PL-259, plus shipping from Florida.

Coax connectors and adapters:

Prices are per connector. Several of each are available. Most are unused.

UHF Right angle 90 degree elbow connector $3

UHF double female "Barrel connector" (two SO-239 together) $3

UHF "Bulkhead Connector" - Double female, as above, but for mounting thru a window, siding, etc. about 3 inches long $6

UHF double male connector (two PL-259's together) $3

UHF "T" connector with two female (SO-239) and one male (PL-259) connection $5

Antenna adapter to fit the BNC connector on the HT and provide an SO-239 connector that will permit a PL-259 to be attached. (BNC male to UHF female) $5

UHF Male to BNC female (opposite of above) $5

BNC male for coax cables
standard type $2
crimp on type $3

Chassis mount BNC female
square mount (uses 4 screws) $3
screw in type $3

BNC "T", two female and one male $3

"N" Connector, Double Male $8

Low Pass TVI Filters:

A low pass TVI filter is added to the transmitter to reduce harmonic interference. All have SO-239 connectors, and are 50 ohm filters.

This first one works on 6 meters as well as HF:

Drake TV-1000-LP Low pass TVI filter
This is the filter that may also be used on the low end of six meters, as well as HF. It is good for 1000 W "average" below 30 MHz, and about 200 W up to 52 MHz. With paper work for $30.

Drake TV-1000
LP Filter as above, which functions fine electrically, but looks ugly. With paper work. $25

Others for HF:

B & W FL-10/1500
This filter cuts off just above 10 meters, and handles 1500 Watts. It is the latest model B&W filter.
In very nice condition, it looks very close to new. $40.

Johnson 250-20 Low Pass Filter
This is a 52 ohm cylindrical low pass filter with a cut off frequency of 45 MHz and 75 db of attenuation.
It is rated to take 1000 Watts of AM, or 5000 Watts PEP SSB. With mounting bracket. $30

Para Dynamics PDC 1089
This filter is rated at a full Kilowatt, up to 30 MHz.
5 x 6 x 2 inch black box, instead of the more familiar long enclosure. It looks like new. $25

Bencher YA-1, high power, low pass TVI filter
If you need a more heavy duty filter for the output of your amplifier, this one is ideal. It will take full legal power plus, and has at least 80 db signal attenuation at TV channel 2.This one works great, and looks close to new.
Bencher currently sells these for about $90. Only $60.

I also have many other accessories available such as many different types of microphones, HTs, VHF and UHF rigs, HF and VHF/UHF antennas, etc.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

Hello people!

Here for sale:

Wouxun KG-UV6D Dualband Two way Radio.

Comes with below accessories included:

Extra battery

Battery Eliminator

Programming Kit

Car charger

SMA-K to BNC-K or SMA-K to SL16-K

Stubby antenna

Dual Slot charger.

External Microphone.

THIS CONFIG IS OFFERED FOR SALE!!!!!!

PayPal and Moneybookers accepted.

Here's an oldie, but a goodie that I found while cleaning out the deep recesses beneath the operating bench. It works too,
but I have no need for it. Thought I'd offer it here first ...

It's a Regency Whamo 10 Model ACT-W10 frequency synthesized monitor/scanner.

It covers 30 to 50, 146-174, and 440 to 512 mhz.

It's programmed by using "programming combs" which are multipin metal combs. You determine the frequency range you want to
cover and break off certain pins from the comb, and insert it into a socket inside the radio.

I have the programming directory and also the smaller instruction manual. Comes with a telescopic whip that screws in through the
top of the cabinet. I also have about a dozen and a half of the programming combs for the unit.

If you want something to play with, or something to set up to monitor a certain frequency range, this would be the one for you.

Asking a flat $50 SHIPPED to your address. If Paypal, then add an extra $5 for their fees. Will also accept a money order or personal check.
I think I can fit it into a flat rate priority mail box. If not, I'll do what I have to as far as packaging.

Ray WA7ITZ

7043. Many Miscellaneous Items FS

Yahoo group: ham4sale (2007 — 2015)
Date: 2012-06-16 12:55:44 UTC
From: Ken Simpson, W8EK
Topic: 7043 Message: 7043

I have a variety of "new" miscellaneous items that
are now available --
Rotor Control Box, Rotor cable, HF Balun, Lightning
Arresters, Wattmeter, 2 m FM Rig, Linear Amp Switching
Cable, Scope Probes, Variac, and other miscellaneous things:

Alliance HD-73 Rotor Control Box:

This is the control box only for an Alliance HD-73 rotor.

It has been checked and works fine. It looks extremely nice.

With paper work for $60.

Heavy Duty 8 conductor Rotor Cable:

I have approximately 45 to 50 feet of heavy duty 8
conductor rotor cable. I think that all 8 conductors
are number 18 wire; at least it is much heavier than
the standard cable. $25

High Power HF 1 to 1 Balun:

This is Palomar's very high power 1 to 1 HF balun. I am
not sure if it is rated at 3000 watts or 5000 watts, but
it is the big one. It is 4 inches in diameter and about
3 1/2 inches high. It has an SO-239 connector on the
bottom, that has a gold plated center pin, and silver
plated outer. It has "pigtails" coming out of the top
to connect to your balanced antenna.

It is designed so that it can easily be used with a beam.
It has a bracket from each side, and then a U bolt that
can attach to up to a 2 1/2 inch diameter mast or boom.
All hardware is stainless steel. This is a quality balun!
$60

Coaxial Lightning Arresters:

These lightning arresters are made to be inserted in to
your coaxial feedline, to help reduce lightning damage.

Cushcraft LAC-2
Still in the original blister pack, unused.
This one has an SO-239 (female UHF) connector on each end,
so that a PL-259 can be screwed into it. $15

Cushcraft LAC-1
No markings on this to confirm the model number, but it
looks like the Cushcraft "Blitz Bug".
It has an SO-239 on one end and a PL-259 on the other end
(female UHF on one end and male on the other). $10

Small Wattmeter:

This wattmeter is made by Gold Line, and is designed for
27 MHz. It reads 5 watts full scale. It is small --
only about 3 x 2 x 2 inches, with SO-239 connectors on
each end.

This one works, but I can not vouch for its accuracy
on all frequencies. I would think it should be fine
for 10 or 12 meters, if not more. It looks fine. $8

Yaesu FT-227 RA "Memorizer" 2 meter FM transceiver:

The FT-227 is an FM rig with about 12 watts output (1.5 W
in low power) covering the entire 2 meter band. This is
the "A" model that has four memories. It has provisions
for installing a CTCSS subaudible tone module.

This rig was used on packet, and will make an excellent
APRS or packet rig. It works fine and looks fine. Since
it was used on packet, there is no microphone included,
but it does include power cord and paper work for $40

Linear Amp Switching Cable for Kenwood Rigs:
This cable goes from a Kenwood transceiver to a
linear amplifier to switch the amp from transmit
to receive.

One end has a DIN connector, as is used with most
Kenwood rigs. The other end has an RCA phono plug,
as used by most linear amplifiers.

Before using this cable, please check the switching
capabilities of your transceiver.

This cable has one coax for switching the relay. $15

Tektronix Oscilloscope Probes:

Both work fine and look fine.

Tektronix P 6008 Probe
10 X, 10 Meg ohm, 7 pf
$20

Tektronx P 6101 A Probe
Direct, 60 MHz. 1 Meg ohm, 32 pf
$20

"Electronic Variac":

Technically, this is not a variac. It is not made by the
Variac Corporation, and it is not a physical autotransformer.
But the function of this device is the same as what most of
us call a variac.

This unit has about 8 feet of heavy power cord, going to a
small enclosure (about 4 x 2 x 2 inches), and then another
foot of heavy power cord. The box has a dial on it that
permits one to go from essentially zero voltage output,
to full line voltage. There is a large bat handle switch
that has a center off position, with a normal position
(full voltage, bypassing the unit) or "On", using the control.

This unit works fine and looks fine. $20

AC to DC power supply unit:

This is sort of an unusual unit. It is in a gray hammer
tone box that measures 7 x 5 x 3 inches. It has an AC
input (lamp cord with alligator clips). The output is
red and black binding posts. Inside is a full wave
bridge rectifier, a huge filter cap, and bleeder resistor.
I think the SK probably used it with a Variac to give
him a variable DC power supply for testing things. It
has a maximum output voltage of 100 V DC, as that is the
rating of the filter cap. $5

"Y" Cable for AEA PK-232 Digital Controller

This is the cable that came with the original PK-232's.
One end plugs into the serial port of your computer.
There are two other connectors at the opposite end.
One goes to the PK-232, and the other has a connector
for a parallel printer.
This cable is like new. $20

AEA AC-1
This unit supply 12 V DC at up to 1 amp.
It can be used with the AEA PK-232, PK-88 or others.
It has a 2.1 mm coaxial power plug, with the center
positive, so it can be used on many different
things that require about 12 V DC at up to an amp,
such as keyers, antenna tuners, etc. $14

KemTronics Power Supply:

This power supply is in a slopped enclosure that is made
to set your rig on top, at an angle for good viewing and
sound. It is good for about 3 amps, or to put it another
way, would be great for powering 2 meter rigs in the 10
to 15 watt category.

This one is a "Tech Special". It produces no output
voltage. It looks fine, however. $5

Books about DXing:

All are in "like new" condition.
It appears they have never been read!

Secrets of Ham Radio DXing
by Dave Ingram, K4TWJ - Tab Books
Hardbound First Edition $12

DX Power - Effective Techniques for the Radio Amateur
by Eugene Tilton, K5RSG - Tab Books and ARRL
First Edition $10

Where do we go Next?
by Marti Laine, OH2BH $10

Repeater Directories:

ARRL Repeater Directory
1985-86 edition
Like New Condition. $4

US Repeater Map Book
by Art Sci, Inc.
1992-93 Edition
Instead of listing the repeaters,
this book shows them on a map.
Like New. $6

I also have many other accessories available such as many
different types of microphones, HTs, various transceivers,
HF and VHF/UHF antennas, etc.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

73,

Ken, W8EK

7044. HT-37, SX101, HT-41

Yahoo group: ham4sale (2007 — 2015)
Date: 2012-06-17 13:57:00 UTC
From: Jack
Topic: 7044 Message: 7044

I have these items up for sale in the Kansas City area. Offers for individual items or package will be considered. Prefer local pickup. All three are functional. SX-101 recapped and repainted. HT-37 functional -- solid state rectifiers 5 volt leads disconnected, some recapping. HT-41 operational with solid state rectifiers, caps haven't been swapped out yet. Will provide photos and other info on email request. 9artus <<-->> gmail.com

7045. Heathkit stuff

Yahoo group: ham4sale (2007 — 2015)
Date: 2012-06-17 18:22:19 UTC
From: ve5mjb
Topic: 7045 Message: 7045

2 each HW ☐20 complete with mics. The lunch box 2 meter am radios.
1 each cb-1 (no mic) lunch box series, not tested.
1 HD ☐ 20 calibrator
1 HP-23B power supply
1 HM-102 SWR / power meter (works great)
1 SB-600 Speaker
1 SB-102 transceiver, nice working condition with original mic.
1 SB-650 frequency display
1 Speaker / power supply origin unknown, I think some one put the Heathkit stuff into one cabinet. Works great (tested)
2 each SSB Transceivers mono banders not working, I do not know the model as it is not stamped on the case any where, but I think they are the HW-12 and HW-32.
(one of these has the mobile adaptor bracket, AND the HRA-10 calibrator)
All manuals for the working SB-102 station.
They include the SB-102, SB-650, SB-600 and
HM-102. I ALSO have the HDP-21A microphone, with the instruction booklet.
I have the original Heathkit glossy sell sheets (two different ads) for the
SB 101 series (pic complete with mic and speaker) and the SB-102. (sadly
the original owner made some notes on the 102 page.)

Looking for offers. I am in Saskatchewan Canada

7049. Johnson Kilowatt Matchbox 250-30

Yahoo group: ham4sale (2007 — 2015)
Date: 2012-06-20 19:02:42 UTC
From: Pete Ferrand
Topic: 7049 Message: 7049

Used as my main shack tuner for over 25 years. For that entire period it worked flawlessly and is in clean condition, with all screws and rear decal intact. My home has always been non-smoking. Original paint. Never more than 700 watts through it.

Someone added an SO-239 input connector on the rear. This goes to another tap on the coil and is actually useful to increase the range of the unit. The T/R relay has been bypassed. There are two small bumps and paint damage on the right side panel. Fortunately in most setups this won't be prominent, see the picture. Original manual included.

Photos are here:
http://home.sprynet.com/~petef/350-30_aafront.jpg
http://home.sprynet.com/~petef/350-30_rear.jpg
http://home.sprynet.com/~petef/350-30_left.jpg
http://home.sprynet.com/~petef/350-30_right.jpg
http://home.sprynet.com/~petef/350-30_top.jpg

You're welcome to pick it up in the Chicago-Milwaukee area and you can see it in action. Otherwise It'll go FedEx Ground/Home. Price $300 plus shipping if needed. Thank you!

7050. FOR SALE: RARE COMMANDER II VHF-144 2 METER 144-148 MHz KW + VHF AMPLIFIER

Yahoo group: ham4sale (2007 — 2015)
Date: 2012-06-21 22:29:57 UTC
From: n3dg
Topic: 7050 Message: 7050

High Power 2 Meter Amplifiers are quite rare for serious DX, Moonbounce, EME, E Skip, Tropo, Aurora, Moonbounce, Contests, or ragchewing long-distance on SSB or FM.

Made by renown Command Technologies of Bryant, Ohio, Commander II is a Very Rare & Rugged 1 KW+ All Mode 2 Meter Linear Amplifier supporting 144-148 MHz.
Only 10-15 watts drive nominal is needed and 30 watts will yield 1 KW SSB/CW with its reliable Eimac 3CX800A7 Final and with all Silver-Plated RF Components, Stripline Tank Circuit, Dow Key Relay all in a compact attractive cabinet measuring only 14.75"W x 14.75"D x 6"H and powered by either 120 Volts AC or 240 Volts AC (now wired for 240 Volts AC, easy to change to 120 Volts AC).

Specifications and Manual at:

http://www.palstar.com/manual_CommanderII_old.pdf

Commander II is absolutely Mint, Like New, just sat on the shelf not used and now need the room for HF gear.
Includes Original Commander II Shipping Cartons (double-boxes for RF Deck), Owners Manual and 240 Volt @ 20 Amp AC Plug.
Photographs upon request.

New list price is over $3000, yours for $2100 plus shipping.

7051. Yaesu Items -- 440 rig, 2 m rig, speakers, HF rig, and more FS

Yahoo group: ham4sale (2007 — 2015)
Date: 2012-06-22 20:04:33 UTC
From: Ken Simpson, W8EK
Topic: 7051 Message: 7051

Yaesu Items For Sale:
440 MHz FM Transceiver, Two meter FM transceiver,
Communications Speakers, HF transceiver, Coax Jumpers,
Microphones, HT accessories, and more

Yaesu FT-720, UHF 440 MHz FM Transceiver:

The FT-720 is a synthesized rig covering 440 to 450 MHz
FM. It has about 10 watts out, with a good receiver. It is
especially immune to intermod. This unit is built like a
tank. Of course it has memories, memory scan, etc. The
mic has up/down buttons.

The FT-720 came in several configurations. A VHF (2 meter)
version, a UHF (440 MHz) version, and a dual band version
that used the first two units, plus a switch box. This is
the UHF unit only.

The rig includes a connector for PL subaudible tones. This
unit has a Comm Specs SS-32 attached to it, with the DIP
switches replaced with toggle switches, so that the tone
can be set, and changed easily.

This one works fine, and looks great. It includes the
chrome bail and paper work for $100.

Yaesu FT-227 RA "Memorizer" 2 meter FM transceiver:

The FT-227 is an FM rig with about 12 watts output (1.5 W
in low power) covering the entire 2 meter band. This is
the "A" model that has four memories. It has provisions
for installing a CTCSS subaudible tone module.

This rig was used on packet, and will make an excellent
APRS or packet rig. It works fine and looks fine. Since
it was used on packet, there is no microphone included,
but it does include power cord and paper work for $40.

Communications Speakers:

All have 3.5 mm (1/8 inch) mono plugs.

Realistic 40-1280
About 4 inch cube, this wood grain speaker is rated for up
to 7 watts, and has a 8 ohm impedance. It works fine,
sounds good, and looks nice. $18

Realistic 21-549 A
This one is about 4 inches square but only about 2 inches deep. It is rated for 5 watts, has an 8 ohm impedance, and is listed as a 300 to 3000 Hz frequency response, making it ideal for communications. It is black in color, looks great, and sounds great. $18

General Electric
This speaker is about 6 by 4 inches, and about 3 inches deep. It is black with a gimbal mount. 4 ohm impedance. $15

Poly Planar MB-41
This cream colored 4 inch square speaker is about 2 inches thick and is rated at 10 watts. It has a mobile mounting bracket. $15

Yaesu FT-990 Deluxe HF Transceiver
The Yaesu FT-990 features multiple direct digital synthesizers for pure local signals for high performance. The triple-conversion, general coverage receiver tunes from 100 kHz to 30 MHz. It has an automatic antenna tuner. A 500 Hz CW filter is built in. It has keypad entry. Power output is adjustable up to 100 watts output (25W AM). The top panel provides access for special user adjustments. A power supply for operation from 120 V AC is built in, or it can be powered by 13 V DC at about 22 amps.

Features:
General coverage receiver, tunes continuously from 100 kHz to 30 MHz
Modes: AM, USB, LSB, CW, FM, FSK
Iambic CW keyer
Automatic Antenna Tuner
Multi-function illuminated analog S-meter
Computer Aided Transceiver (CAT) allows computer control via a serial cable with a DIN jack
Notch filter, IF shift, noise blanker, and a digitally switched capacity audio filter
90 Memories
Dual VFOs
Built-in AC Power Supply
100 Watts Power
Noise Reduction
Digital Filtering
IF Notch
Manual and Auto AGC

This particular unit works fine, and looks very close to perfect. This is a terrific radio. $900

Deluxe Desk Microphone:

This is a great looking and great performing low impedance desk mic. It has a quality Shure 600 ohm cartridge in it

(the cartridge alone is over $40 new), with a very nice black die case base and neck, with a chrome grill. It looks somewhat like a Shure 444, but no plastic on this one -- all metal!

This one has stripped and tinned ends on it, which means any connector can easily be added.

This one looks like new, and works the same. It has a long (approx 6 foot) cord. $70

Coaxial Cable "Jumpers" for your shack:

I have a good quantity of coaxial cable "jumpers" available. These are short lengths of RG-8 coax, with a PL-259 connector on both ends. I have a variety of lengths from under a foot to about 5 feet long. Send me the lengths that you would like, and I will see how close I can come.

Although most are RG-8 (the larger, approximately 0.4 inch coax that takes full legal power), I also have some that are RG-8 X (the medium coax approximately 1/4 inch in diameter). Please ask for RG-8 X, if that is what you would like.

All jumpers are $6 each.

Coaxial Lightning Arresters:

These lightning arresters are made to be inserted in to your coaxial feedline, to help reduce lightning damage.

Cushcraft LAC-2
Still in the original blister pack, unused.
This one has an SO-239 (female UHF) connector on each end, so that a PL-259 can be screwed into it. $15

Cushcraft LAC-1
No markings on this to confirm the model number, but it looks like the Cushcraft "Blitz Bug".
It has an SO-239 on one end and a PL-259 on the other end (female UHF on one end and male on the other). $10

High Power HF 1 to 1 Balun:

This is Palomar's very high power 1 to 1 HF balun. I am not sure if it is rated at 3000 watts or 5000 watts, but it is the big one. It is 4 inches in diameter and about 3 1/2 inches high. It has an SO-239 connector on the bottom, that has a gold plated center pin, and silver plated outer. It has "pigtails" coming out of the top to connect to your balanced antenna.

It is designed so that it can easily be used with a beam.
It has a bracket from each side, and then a U bolt that
can attach to up to a 2 1/2 inch diameter mast or boom.
All hardware is stainless steel. This is a quality balun!

This one works fine and looks fine. $60

Antennas West "Maxi-J" 2 meter antenna:

The "Maxi-J" is a specialized version of the J pole antenna,
and is made by Antennas West. It is made to be used for
portable applications, although it could be used in a more
permanent situation. Basically, the antenna needs only one
support; a suction cup is included so that it can be attached
in many places. Of course it can also be hung from a tree
limb in a portable situation. It is very versatile. It
provides a significant amount of gain, compared to the
normal rubber duck antenna used on an HT.

The radiating portion of the antenna is just under six feet
long, with an additional six feet of coax, that terminates
in a BNC connector.

This particular antenna works fine and looks very close to
new. It includes paper work, plus a carrying case, for $25.

Yaesu YM-31 hand microphone
The Yaesu YM-31 is a hand mic with a round 6 pin
connector. Apparently it is either similar or the
same as the MH-25A6j (not the MH-25 with the 8 pin
connector). It is a 600 ohm impedance hand microphone,
and has a Monitor on-off switch on the back. It should
be compatible with any of the Yaesu rigs that uses the
round 6 pin connector. It looks very similar to the
Yaesu MH-1.
This one works fine and looks extremely nice. $25

Cariole Headphones:
This is a nice pair of headphones of the type that
completely cover your ear. These are true monophonic
headphones, and not a pair of stereo headphones that
have been converted to mono. They have a molded mono
1/4 inch plug on them.
These work fine, and look extremely nice. $20

Yaesu HT Accessory Items:

Pryme Speaker Mic
This is the equivalent of the Yaesu MH-34.
It fits the Yaesu HTs with the 4 conductor 1/8 inch
(3.5 mm) plug, such as the VX-1, VX-3, VX-5, etc.
It looks like it has not been used. $28

Belt Clip for Yaesu FT-207, with hardware. $8

Wrist Strap for Yaesu FT-209, and others $4

Small Power Supplies:

Radio Shack 22-124 Regulated Power Supply

This supply is regulated and will furnish 13 V DC at up
to 2.5 amps. It is ideal for the lower powered 2 meter
rigs, or to get rid of that huge collection of wall warts.

This one works fine and looks extremely nice.
I do not find a scratch on it. $20

Micronta 22-120 A Regulated power supply:

This supply is rated at 2.5 amps at 13 V DC. It is
well regulated. It has a switch and LED power light
on the front, with a circuit breaker and output terminals
on the back. The case (left and right side and top) is
basically all a heat sink, so it should cool the
regulator well.

This one works fine and looks like new. No scratches. $30

I also have many other accessories available such as many
different types of microphones, HTs, HF, VHF and UHF rigs, HF
and VHF/UHF antennas, and many miscellaneous accessories.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

7057. HENRY 6N2 KILOWATT AMPLIFIER For Sale

Yahoo group: ham4sale (2007 — 2015)
Date: 2012-06-29 02:18:06 UTC
From: Richard Solomon
Topic: 7057 Message: 7057

FOR SALE: HENRY TEMPO 6N2 KILOWATT AMPLIFIER

Uses a pair of 3CX400A7's to develop over a Kilowatt out on 6 and 2 Meters. The combination of Push-Pull on 2 and Parallel on 6 requires no bandswitch. There are separate Inputs and Outputs for each band.

I purchased this Amp from an Estate back East and have spent many hours in cleaning it and checking out the Amp. The only problem is that the tubes are toast. I cannot get any Plate Current even though I have checked that the Filaments are good.

I put together a 150 cfm Blower System since the original (and marginal) Blower had been removed. I also have a DPDT Coax Relay for the T/R switch. Also included is a copy of the Manual.

I have given up on trying to find reasonable cost replacement Tubes, so I will let it go for basically what I have in it. Price is $650 and it is PICK-UP ONLY in Vail, Arizona (20 miles SSE of Tucson).

Trades considered; Heath SB-220 or similar Amp.

73, Dick, W1KSZ

7059. FS: FT-817 Package

Yahoo group: ham4sale (2007 — 2015)
Date: 2012-06-30 22:25:54 UTC
From: Bob - K2KI
Topic: 7059 Message: 7059

Good day all...

I have a Yaesu FT-817 All band, all mode QRP transceiver package that I HAVE to sell!
It comes with the narrow CW filter, LDG Z11 auto-tuner and the W4RT One Touch Tune (OTT).

The 817 has had brand new Final board installed.

I used this entire setup during Field Day and made 180 contacts with little effort!
I hate to sell this but I must!

Asking $700 for the entire package plus shipping from Vermont 05459. I take PayPal and it is the preferred method for payment.

I must sell that! To coin a phrase from the movie Oh Brother Where Art Thou: "We're in a tight spot"!

Thanks es 73
Bob de k2ki
PS... Please reply offlist to avoid list congestion or call me on my cell 802-752-7225.

7062. Looking for a robust radio for a simplex IRLP node

Yahoo group: ham4sale (2007 — 2015)
Date: 2012-07-05 23:50:16 UTC
From: John Murphy
Topic: 7062 Message: 7062

I am looking for a robust radio (MASTR II was recommended) as in the next 6-7 months I am putting up a simplex IRLP node and wish to connect to the WIN System, which is a very busy system. The radio should have apprx 50 watts out and be completely usable out of the box (with the exception of frequency setting I am planning on using 147.550). Price should be reasonable as I will only have 200-300 dollars to spend.

Thanks in advance for any help

7074. Radio magazines free in UK

Yahoo group: ham4sale (2007 — 2015)
Date: 2012-07-12 06:08:48 UTC
From: Bob Sayers
Topic: 7074 Message: 7074

As part of a house clearance, I have a large quantity of radio magazines I need to part with.

There's quite a variety, but leaning towards the "monitoring" side of the hobby, and including RadioUser, Monitoring Monthly, SWM, Radcom, PW, Monitoring Times, Popular Communications, and a few QSTs, plus a few professional comms periodicals.

They need to be collected from my home about 12 miles South of Birmingham ASAP, and are basically free but I'm asking a nominal £5 towards a charity which I support.

Bob, G8IYK

Date: 2012-07-13 21:23:53 UTC
From: Fred VE3FAL
Topic: 7076 Message: 7076

Guys I have a well used but working Kenwood TS-120S that has been sitting in a box for way to long and looking for a good home and some TLC.

I acquired this radio in a trade some time ago and used it for JOTA and few other outings.

The radio works but needs an alignment and some cleaning.

The case does have some scratches on it the 3 knobs for the VOX controls were missing when I got it.

Still puts out full power and receives well but like I said it could use an alignment. I do not have the cw filter in unit and do have power cord and manual might be here as well(somewhere)..

Asking $150.00 plus shipping..

Cheers

Fred VE3FAL

Date: 2012-07-14 17:19:42 UTC
From: w6adv
Topic: 7078 Message: 7078

Hello,

I have a Hallicrafter S-95 (FM 130-150 MC) that I will be selling "as is", or parting out. Everything is there except the knobs and the cardboard back cover. I also have a copy of the photofax for this radio.

I tested the radio and the tubes light up and the tuning turns freely, but there is just a soft hum. Front face is good, but rest of cabinet need to be repainted.

Also have a Hallicrafters Continental model 5R37 art deco AM & SW Bakelite table radio (Cute) Complete except for knobs and that pesky cardboard back cover.

Plug cut off so have not tested cabinet need to be repainted.

Prefer to sell each as is, or will part out.

Have photos.

Make offers.

Craig

Date: 2012-07-16 18:13:17 UTC
From: mmjd01
Topic: 7082 Message: 7082

I have several of these transformers that I got at a hamfest, and want to unload them quickly as I'm moving.

Pri: 120 V
Sec 1: 110 V
Sec 2: 110 V
Sec 3: 28 V
Sec 4: 5.5 V

They are large (4" x 4.5" x 5") and heavy.

I placed a 200 W load on each of the 110 V secondaries and they dropped to 105 V, so using the 5.5 V secondary you should be good to go. They are marked "hi current"... sorry, but I have no other info.

I don't know what the specs are on the transformers, nor do I have my bench test equipment available. Markings are as follows:

WABASH 4027 897681 5247920

Price: $ 23.00 shipped USPS Priority Mail (US only)

From: Daniel Hileman
Topic: 7084 Message: 7084

Hi Everyone,

I have an FT-897 that the 2m finals went out of...all other bands work great! (Yes, they have different finals.) Also, the clarifier knob broke off in shipping, but Cal at Ham repaired it to functionality (the knob is on it, just not perfectly straight)....2m finals can probably be replaced by Cal for around $150.00! That would mean you would have an FT-897 for $650 +/- if 2m is important to you! I just want to try something else. Pics available upon request, and could arrange a contact on HF or 6m. That's a great deal for an HF-6m, and 440mhz all-mode rig!

73,
Dan N9WX

7086. MFJ and related items FS

Yahoo group: ham4sale (2007 — 2015)
Date: 2012-07-17 20:58:02 UTC
From: Ken Simpson, W8EK
Topic: 7086 Message: 7086

MFJ and related Items For Sale
Wall Wart power supplies, Speakers, speaker
microphones, Coaxial cable, connectors, and more

"Wall Wart" Power Supplies:

All of these are "regular" wall warts -- not the new
switching type that create all sort of noise in your
receiver. Get one of these, and leave the noise behind.

MFJ 1312 B
This unit provides 12 V DC at 300 ma. It has a 2.1 mm
coaxial plug with the center positive, and is often used
for keyers, lighting tuner lights, and other small misc
jobs where 12 V DC at low current is needed. $12

Heathkit "Converter Charger"
9 Volts DC at up to 100 ma.
No Heath number on this, and I don't know what it was used
on. It has a 2.5 mm male plug on it, with the tip positive,
so it can be used on many devices. $10

9 Volt DC at 500 ma
This one was used on a MFJ 422 keyer, but will also power
other items needing 9 V DC at low current. It has a
2.5 mm male plug on it. $12

AEA AC-1
This unit supply 12 V DC at up to 1 amp.
It can be used with the AEA PK-232, PK-88 or others.
It has a 2.1 mm coaxial power plug, with the center
positive, so it can be used on many different
things that require about 12 V DC at up to an amp,
such as keyers, antenna tuners, etc. $14

Communications Speakers:

All have 3.5 mm (1/8 inch) mono plugs.

Realistic 40-1280
About 4 inch cube, this wood grain speaker is rated for up
to 7 watts, and has a 8 ohm impedance. It works fine,
sounds good, and looks nice. $18

Realistic 21-549 A
This one is about 4 inches square but only about 2 inches
deep. It is rated for 5 watts, has an 8 ohm impedance, and

is listed as a 300 to 3000 Hz frequency response, making it ideal for communications. It is black in color, looks great, and sounds great. $18

General Electric
This speaker is about 6 by 4 inches, and about 3 inches deep. It is black with a gimbal mount. 4 ohm impedance. $15

HT Speaker Microphones:

All of these have the 3.5 mm and 2.5 mm plugs on them, as used by Icom, Alinco, Radio Shack, some Yaesu, and other HTs.

MFJ-284 Speaker Microphone
Fits most Icom, Yaesu, Alinco 560, Santec ST-20, and others. It works great, and looks like new. $15

MFJ-287 Speaker Microphone
This fits the TH-21/31/41 series HTs, TH-205, TH-215, TH-415, as well as others. It has a 3 conductor 3.5 mm plug and a 2 conductor 2.5 mm plug.It works fine, and looks close to new. $15

Coaxial Lightning Arresters:

These lightning arresters are made to be inserted in to your coaxial feedline, to help reduce lightning damage.

Cushcraft LAC-1
No markings on this to confirm the model number, but it looks like the Cushcraft "Blitz Bug".
It has an SO-239 on one end and a PL-259 on the other end (female UHF on one end and male on the other). $10

Coaxial Cable "Jumpers":
I have a good quantity of coaxial cable "jumpers" available. These are short lengths of RG-8 coax, with a PL-259 connector on both ends. I have a variety of lengths from under a foot to about 3 feet long. Send me the lengths that you would like, and I will see how close I can come.
All jumpers are $6 each.

Coax connectors and adapters:

Prices are per connector. Several of each are available. Most are unused.

UHF Right angle 90 degree elbow connector $3

UHF double female "Barrel connector" (two SO-239 together) $3

UHF "Bulkhead Connector" - Double female, as above, but for mounting thru a window, siding, etc. about 3 inches long $6

UHF double male connector (two PL-259's together) $3

UHF "T" connector with two female (SO-239) and one male
(PL-259) connection $5

Antenna adapter to fit the BNC connector on the HT
and provide an SO-239 connector that will permit
a PL-259 to be attached. (BNC male to UHF female) $5

UHF Male to BNC female (opposite of above) $5

BNC male for coax cables
standard type $2
crimp on type $3

Chassis mount BNC female
square mount (uses 4 screws) $3
screw in type $3

BNC "T", two female and one male $3

"N" Connector, Double Male $8

I also have many other accessories available such as many
different types of microphones, HTs, HF, VHF and UHF rigs, HF
and VHF/UHF antennas, etc.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

73,

Ken, W8EK

7087. FOR SALE: RARE COMMANDER II VHF-144 2 METER 144-148 MHz KW + VHF AMPLIFIER

Yahoo group: ham4sale (2007 — 2015)
Date: 2012-07-18 14:15:20 UTC
From: n3dg
Topic: 7050 Message: 7087

High Power 2 Meter Amplifiers are quite rare for serious DX, Moonbounce, EME, E Skip, Tropo, Aurora, Moonbounce, Contests, or ragchewing long-distance on SSB or FM.

Made by renown Command Technologies of Bryant, Ohio, Commander II is a Very Rare & Rugged 1 KW+ All Mode 2 Meter Linear Amplifier supporting 144-148 MHz.
Only 10-15 watts drive nominal is needed and 30 watts will yield 1 KW SSB/CW with its reliable Eimac 3CX800A7 Final and with all Silver-Plated RF Components, Stripline Tank Circuit, Dow Key Relay all in a compact attractive cabinet measuring only 14.75"W x 14.75"D x 6"H and powered by either 120 Volts AC or 240 Volts AC (now wired for 240 Volts AC, easy to change to 120 Volts AC).

Specifications and Manual at:
http://www.palstar.com/manual_CommanderII_old.pdf

Commander II is absolutely Mint, Like New, just sat on the shelf not used and now need the room for HF gear.
Includes Original Commander II Shipping Cartons (double-boxes for RF Deck), Owners Manual and 240 Volt @ 20 Amp AC Plug.
Photographs upon request.

New list price is over $3000, yours for $2000 plus shipping.

7092. ROHN 25 TOP TOWER SECTION 25AG2

Yahoo group: ham4sale (2007 — 2015)
Date: 2012-07-20 15:29:51 UTC
From: n3dg
Topic: 7092 Message: 7092

ROHN 25AG2 Ten Foot Top Tower Section in Excellent Condition just kept in garage storage. ROHN R-25AG 25G standard top section features the same 12 ½-in face and 5/16-in solid serpentine Zig-Zag bracing as the standard 25G tower sections and it also comes with a tapered top and integrated mounting pipe. The pipe, measured from the apex of the side rails, is 2 ¼ inches OD x 18 inches.

It consists of 16 gauge walls with 5 bays of bracing and swaged, double-bolted connections. The Pinnacle of this Section is Capped with a 14 AWG (2.25 inches O.D.) Tube, protruding 18.00 inches above apex of side rails. This Rohn section is used to top off the 25G tower. The 25AG2 is available in the standard 9 foot 9 inch section length. This tower uses double bolted joints which are proven to be the best method of joining tower sections for sturdiness and dependability. Featuring a 12-1/2" equilateral triangular design, the 25AG is constructed of extra heavy duty 1-1/4" steel tubing side rails with continuous solid steel rod bracing. Each 9' section is shipped containing all required nuts and bolts inside one leg.

You can connect the 10 foot long R-25AG2 to any standard ROHN 25G tower section and the entire section has been completely hot-dip galvanized for years of worry-free corrosion protection and it can be used in guyed, self-supporting and bracketed tower configurations

Specifications at:
http://www.3starinc.com/manuals/25G-11.pdf

New list price $300, yours for $100 Cash & Carry in near Philadelphia.

Topic: 7093 Message: 7093

I'm selling this Zenith A600 which I purchased several years ago in working condition. I've had it in my collection, but am moving and need to downsize.

It's in excellent condition, cord retractor working, excellent telescoping antenna, & operating without hum (it's original as far as I can tell). It has gold-colored owners manual, product brochure with string, schematic and "The World at your Fingertips" guide (all original). This radio looks close to new...

I can supply photos and answer all questions off-line.

Please contact me directly at: mmjd01@yahoo. com

I live near Rochester, NY, and would welcome dealing locally, but I would be willing to ship also.

Thank you,
Dave KE2GE mmjd01@...

7094. FS: EICO 710 grid dip oscillator

Yahoo group: ham4sale (2007 — 2015)
Date: 2012-07-22 15:07:45 UTC
From: N6OHS
Topic: 7094 Message: 7094

I have an EICO 710 GDO for sale.

Good condition - power cord grommet needs replacing.
Photos on email request.
All coils.
Seems to work well, but I don't use it anymore.

$30 plus shipping.

73 - Mike, N6OHS

7101. Yaesu Items FS

Yahoo group: ham4sale (2007 — 2015)
Date: 2012-07-25 18:41:00 UTC
From: Ken Simpson, W8EK
Topic: 6690 Message: 7101

Yaesu Items For Sale:
Two meter FM transceiver, 440 MHz FM Transceiver,
HF transceiver, Communications Speakers, Microphones,
HT accessories, and more

Yaesu "Landliner" SP-101 P Speaker and Phone Patch:

This is a nice speaker that has a phone patch added
to it. Its styling matches the FT-101 line, but it looks
nice with most any rig. It has a VU meter on it, as well
as controls for both transmit and receive gain.
I realize many people do not use a phone patch much any
more, but even if you do not use the phone patch portion,
you still have an excellent speaker.

This particular unit works fine, and looks extremely nice
as well. It is in its original box.

With paper work for $90.

Yaesu FT-227 RA "Memorizer" 2 meter FM transceiver:

The FT-227 is an FM rig with about 12 watts output (1.5 W
in low power) covering the entire 2 meter band. This is
the "A" model that has four memories. It has provisions
for installing a CTCSS subaudible tone module.

This rig was used on packet, and will make an excellent
APRS or packet rig. It works fine and looks fine. Since
it was used on packet, there is no microphone included,
but it does include power cord and paper work for $40.

Yaesu FT-720, UHF 440 MHz FM Transceiver:

The FT-720 is a synthesized rig covering 440 to 450 MHz
FM. It has about 10 watts out, with a good receiver. It is
especially immune to intermod. This unit is built like a
tank. Of course it has memories, memory scan, etc. The
mic has up/down buttons.

The FT-720 came in several configurations. A VHF (2 meter)
version, a UHF (440 MHz) version, and a dual band version
that used the first two units, plus a switch box. This is
the UHF unit only.

The rig includes a connector for PL subaudible tones. This
unit has a Comm Specs SS-32 attached to it, with the DIP
switches replaced with toggle switches, so that the tone

can be set, and changed easily.

This one works fine, and looks great. It includes the chrome bail and paper work for $100.

Yaesu FT-990 Deluxe HF Transceiver
The Yaesu FT-990 features multiple direct digital synthesizers for pure local signals for high performance. The triple-conversion, general coverage receiver tunes from 100 kHz to 30 MHz. It has an automatic antenna tuner. A 500 Hz CW filter is built in. It has keypad entry. Power output is adjustable up to 100 watts output (25W AM). The top panel provides access for special user adjustments. A power supply for operation from 120 V AC is built in, or it can be powered by 13 V DC at about 22 amps.

Features:
General coverage receiver, tunes continuously from 100 kHz to 30 MHz
Modes: AM, USB, LSB, CW, FM, FSK
Iambic CW keyer
Automatic Antenna Tuner
Multi-function illuminated analog S-meter
Computer Aided Transceiver (CAT) allows computer control via a serial cable with a DIN jack
Notch filter, IF shift, noise blanker, and a digitally switched capacity audio filter
90 Memories
Dual VFOs
Built-in AC Power Supply
100 Watts Power
Noise Reduction
Digital Filtering
IF Notch
Manual and Auto AGC

This particular unit works fine, and looks very close to perfect. This is a terrific radio. $875

Communications Speakers:

All have 3.5 mm (1/8 inch) mono plugs.

Realistic 40-1280
About 4 inch cube, this wood grain speaker is rated for up to 7 watts, and has a 8 ohm impedance. It works fine, sounds good, and looks nice. $18

Realistic 21-549 A
This one is about 4 inches square but only about 2 inches deep. It is rated for 5 watts, has an 8 ohm impedance, and is listed as a 300 to 3000 Hz frequency response, making it ideal for communications. It is black in color, looks great,

and sounds great. $18

General Electric
This speaker is about 6 by 4 inches, and about 3 inches deep.
It is black with a gimbal mount. 4 ohm impedance. $15

Deluxe Desk Microphone:

This is a great looking and great performing low impedance
desk mic. It has a quality Shure 600 ohm cartridge in it
(the cartridge alone is over $40 new), with a very nice
black die case base and neck, with a chrome grill. It
looks somewhat like a Shure 444, but no plastic on this
one -- all metal!

This one has stripped and tinned ends on it, which means
any connector can easily be added.

This one looks like new, and works the same. It has a
long (approx 6 foot) cord. $70

Yaesu YM-31 hand microphone:
The Yaesu YM-31 is a hand mic with a round 6 pin
connector. Apparently it is either similar or the
same as the MH-25A6j (not the MH-25 with the 8 pin
connector). It is a 600 ohm impedance hand microphone,
and has a Monitor on-off switch on the back. It should
be compatible with any of the Yaesu rigs that uses the
round 6 pin connector. It looks very similar to the
Yaesu MH-1.
This one works fine and looks extremely nice. $25

Cariole Headphones:
This is a nice pair of headphones of the type that
completely cover your ear. These are true monophonic
headphones, and not a pair of stereo headphones that
have been converted to mono. They have a molded mono
1/4 inch plug on them.
These work fine, and look extremely nice. $20

Yaesu HT Accessory Items:

Pryme Speaker Mic
This is the equivalent of the Yaesu MH-34.
It fits the Yaesu HTs with the 4 conductor 1/8 inch
(3.5 mm) plug, such as the VX-1, VX-3, VX-5, etc.
It looks like it has not been used. $28

Belt Clip for Yaesu FT-207, with hardware. $8

Wrist Strap for Yaesu FT-209, and others $4

Surge Station and Noise Filter:

This unit is still in its Radio Shack (#61-2327) box, never used. It says it is for a notebook computer, but it can be used with anything. It has connections for a computer network (LAN, RJ-45 connector), the AC power, and for phone lines (RJ-11 connector), and provides noise filtering and surge suppression on each. It even includes $25,000 insurance against surges. Maximum power rating is 1875 Watts, or 15 amps. Noise filtering is listed at 40 db.

This unit is new, in its original box, with its original paper work. $12

Small Power Supplies:

Radio Shack 22-124 Regulated Power Supply

This supply is regulated and will furnish 13 V DC at up to 2.5 amps. It is ideal for the lower powered 2 meter rigs, or to get rid of that huge collection of wall warts.

This one works fine and looks extremely nice.
I do not find a scratch on it. $20

Micronta 22-120 A Regulated power supply:

This supply is rated at 2.5 amps at 13 V DC. It is well regulated. It has a switch and LED power light on the front, with a circuit breaker and output terminals on the back. The case (left and right side and top) is basically all a heat sink, so it should cool the regulator well.

This one works fine and looks like new. No scratches. $30

A R R L Handbooks:

All of these are in the larger format.

1984 - 61st edition
It looks close to new. $15

1988 - 65th edition - Hard bound
This one is a couple inches thick.
Very close to new condition. $22

1992 - 69th edition - Hard Bound
Several inches thick with a lot of information.
This one looks like new, except for a previous owner's call sign on the inside cover. $22

I also have many other accessories available such as many different types of microphones, HTs, HF, VHF and UHF rigs, HF and VHF/UHF antennas, and many miscellaneous accessories. Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

7103. FS: Astron RS70m 70amp power supply

Yahoo group: ham4sale (2007 — 2015)
Date: 2012-07-30 20:15:16 UTC
From: John G.
Topic: 7103 Message: 7103

I have for sale or trade an Astron RS70M 13.8v power supply. This PS will handle just about anything you throw at it-rated at 57amps continuous and 70amps intermittant. It will easily handle a 200 watt rig, or just about any VHF or HF amplifier you hook to it. This will probably be the last PS you need to buy. It is a linear PS so there is no RF hash with it either.

This is the M version with the separate voltage and current meters on it. It is not in mint condition, or even near it It has several scratches on the front and case, but does work fine. That is what is important.

These sell new for $339 from Gigaparts. I am asking $170 for it. I would take a smaller linear power supply like an Astron RS20A plus cash, or would also take a memory keyer plus cash for it.

Don't want to ship it due to the weight but I will be going between Oklahoma City and Des Moines shortly on I-35 and could arrange an in person deal along that route.

7128. Great FT-101z and FV-101 VFO

Yahoo group: ham4sale (2007 — 2015)
Date: 2012-08-22 01:24:33 UTC
From: Dave Leisman
Topic: 7128 Message: 7128

Selling for a friend. This radio is in excellent condition. Receiver challenges my FT-950, and a full output transmitter (100w - 120w) using the popular 6146 final amplifier tubes. Cosmetically both units look as good as the day they were new. The plastic has been removed from the faceplate of both but there are no marks, dents or dings anywhere on either. Asking $550 or best offer, plus shipping costs for both radio and the vfo (they can be shipped spearately if desired). The owner is NOT willing to separate the transceiver from the outboard vfo unless someone wants the transceiver alone. But, here's the kicker: Although I'm sure one can be had through any number of sources I do NOT have a power cord I can sell with the transceiver. The package comes with copies of the original manuals, transceiver to vfo cable, and original vfo shipping box.

Thanks in advance,

Dave, W8QW

7129. Yaesu Stuff 4 sale

7134. WANTED: Antenna, Tube Rx for IF, WRT54GL, etc

Yahoo group: ham4sale (2007 — 2015)
Date: 2012-08-24 00:07:22 UTC
From: qrv@kd4e.com
Topic: 7134 Message: 7134

WANTED
---

1. 2 or 2/440 beam, 5el or more.

2. 2.4GHz high gain mag mount mobile antenna.

3. WRT54GL router (or model WRT54G3G-ST)

4. Small HF receiver w/BFO - OK if dial not working or
looks rough (not rusted) as it will be used as
a fixed 1430 IF for a Gonset converter.

5. Power supply for a Western Digital WD2500B012 external
HDD. 5v 2.2A & 12v 1.5A w/PS-2 type connector.

I'd prefer to meet-up at the Swainsboro, GA Hamfest this
Saturday, August 25th - to buy or trade.

What I have to SWAP

A. Zenith Transoceanic H500 w/tubes & spares.

B. 6m Delta loop (copper refrigeration tubing & PVC
(21' of copper tunes up 40-10m as well.)

C. Panasonic Toughbook CF-28/28 DockCF-WEB273

D. Panasonic Toughbook CF-28/29 replacement keyboard.

E. Pair of 2J1G1 Selsyns (General Railway Signal/GE)

F. General Electric Mobile Speaker

G. Midland 77-117 Weather Max Mini Mobile CB/Weather

I. Misc hardline coax jumpers, 12vdc power supply chassis,
transformers from UPS units, etc.

7135. WANTED: BC-454 or other Command Receiver

Yahoo group: ham4sale (2007 — 2015)
Date: 2012-08-24 21:15:43 UTC
From: qrv@kd4e.com
Topic: 7135 Message: 7135

For use as an IF with my Gonset converter.

BC-454 would be fine as would any of the HF receivers
as I would modify the front end as a fixed receiver.

Cash or trade for one reasonably priced in decent condition.

Will consider other small tube-type receivers that could be
modified as a 1430 KHz IF w/BFO and audio section.

I'd prefer to save the shipping and meet for at the Fest
in Swainsboro, GA tomorrow - Saturday, August 25th.

7137. Commander HF-2500 Amp. QSK, grid over current protection, legal limit out. $2950

Yahoo group: ham4sale (2007 — 2015)
Date: 2012-08-25 21:38:19 UTC
From: Les
Topic: 7137 Message: 7137

I have a Commander HF-2500 for sale, built by Patrick Stein, the original owner of Command Technologies, not by Palstar.
This amplifier uses a pair of 3CX800A7 tubes and produces full legal limit output on 160M-10M.
The amp is built like a tank and will handle key down conditions, all day long.

Installed in this amp are QSK and grid trip out over current protection for the finals.
The 3CX800A7s are in excellent shape and will produce 1KW out at 15-20 watts of drive and full legal output at 35-40 watts of drive.
The case and electronics are in like new condition and I have an analysis of the amplifier performance done by Patrick Stein, the designer, and all documentation.

This amp is my backup and has seen very little service since I have owned it and it needs a new home.
I can deliver or meet within 75 miles of New Paltz, NY or Kingston, NY.
I have the original cartons and can ship at your expense. $2950.

Les W2LK at arrl dot net

7149. ROHN 25 TOP TOWER SECTION 25AG2

Yahoo group: ham4sale (2007 — 2015)
Date: 2012-08-28 02:03:23 UTC
From: n3dg
Topic: 7092 Message: 7149

ROHN 25AG2 Ten Foot Top Tower Section in Excellent Condition just kept in garage storage.

You can use this section:
☐ Atop your ROHN 25 Tower
☐ As a Mini-Tower in your backyard, or alongside the fence, RV, etc.
☐ Atop your roof as a Super-Rugged Compact Tower
ROHN R-25AG 25G Standard Ten Foot Top Tower Section features the same 12.5" face and 5/16" solid serpentine Zig-Zag bracing as the standard 25G tower sections and it also comes with a tapered top and integrated mounting pipe. The pipe, measured from the apex of the side rails, is 2.25" OD x 18".
It consists of 16 gauge walls with 5 bays of bracing and swaged, double-bolted connections. The Pinnacle of this Section is Capped with a 14 AWG (2.25" OD) Tube, protruding 18" above apex of side rails. This Rohn section is used to top off the 25G tower. The 25AG2 is available in the standard 9 foot 9 inch section length. This tower uses double bolted joints which are proven to be the best method of joining tower sections for sturdiness and dependability. Featuring a 12.5" equilateral triangular design, the 25AG is constructed of extra heavy duty 1.25" steel tubing side rails with continuous solid steel rod bracing.

You can connect the 10 foot long R-25AG2 to any standard ROHN 25G tower section and the entire section has been completely hot-dip galvanized for years of worry-free corrosion protection and it can be used in guyed, self-supporting and bracketed tower configurations

Specifications at:
http://www.3starinc.com/manuals/25G-11.pdf

ROHN 25AG2 New List Price is $300, is in Very Good to Excellent Condition with a fresh coat of Aluminum Paint, no rust, dents, bends, pings or pits.

$100 Cash & Carry Pickup near Philadelphia.

Hi Folks!

I have several aluminum dishes for sale.

8 ft Andrew solid dish with steel mounting hardware for a pole mount that just needs U-bolts

6 ft Andrew solid dish with a 2 inch mounting mast

6 ft tubular grid dish with a mounting mast

4 ft solid dish with tripod mount that has azimuth and elevation controls and markings (I have two of these)

It breaks my heart, but my lot is just too small to make good use of these dishes. Reasonable offers are welcome!

Thanks & 73,
Gordon Beattie, W2TTT

I have several hardware kits from the old White Box 10GHz. project
that Jeff Kruth made available years ago. In those kits are heavy
duty anodized aluminum V-blocks with mating stainless steel 3/8"
diameter U-bolts for putting the white box onto 3-4" posts. The kits
include nuts & washers, V-blocks & U-bolts. These would make a nice
compliment to Gordon's dishes..$40, shipped CONUS.

7156. TK-2100 VHF pair for sale

Yahoo group: ham4sale (2007 — 2015)
Date: 2012-08-31 22:51:08 UTC
From: hitekgearhead
Topic: 7156 Message: 7156

I have a pair of TK-2100 two channel VHF radios for sale.

They work well and are currently programmed for the first two MURS frequencies.

They come with chargers, antennas, two high-capacity aftermarket NiMH battery packs, and two original NiCd battery packs, and belt clips.

The radios would rate an 8 out of 10 cosmetically. The only noticible defects in their appearance is the missing rubber cover over their accessory port and a couple cracks in the antennas.

Price is $115 shipped via USPS flat rate box in the continental US.

Feel free to drop me a line with any questions.

Thanks,
Albert
KI4ORI

Greetings all....just in is a huge tech estate....boxes and boxes of supplies for the ham tech...all your electronic components...probably many that are now hard to find...some test equipment...transformers....connectors...etc....I did try to have a quick look in the boxes as they were being unloaded....so I have a idea whats available....if you are looking for a part to repair some thing you have.....send me an email off this post....and I will check it out....
Thanks...Wes....VA6DWH

7159. FS: MFJ 2 position coax switch

Yahoo group: ham4sale (2007 — 2015)
Date: 2012-09-01 20:06:40 UTC
From: John G.
Topic: 7159 Message: 7159

I have for sale a MFJ 1702C 2 position coax switch (SO239 connectors on each jack). The case is somewhat rough with some scratches, but it works fine. This is a heavy duty switch that covers up through UHF frequencies. They sell new for $40 plus shipping, I am asking $26 shipped for it,and can take paypal/check/MO.

7160. KENWOOD equipment for sale

Yahoo group: ham4sale (2007 — 2015)
Date: 2012-09-02 02:31:24 UTC
From: jparker1019
Topic: 7160 Message: 7160

My father was an avid ham radio enthusiast (Ed at WA5NIL) until he passed away several months ago. He was on the air almost every morning until the day he passed away, and recently Mom asked me to try to sell his equipment to help her out and free up some room. Therefore, the following equipment is for sale as a package deal:

Kenwood TS 820S Transceiver excellent condition except the frequency readout doesn't work
Kenwood VFO-820
Genave Model PSI/10 AC Power Supply
Simpson Model 260 Voltmeter
HP 5302A 50 MHZ Universal Counter
Fisher Research M-Scope
Heathkit VTVM vacuum tube voltmeter
Redco RFC-50 frequency counter

This is a package deal for $200 firm. Cpntact me by phone at 601-594-0854 or e-mail me at jparker1019@....

7164. FS: 1/4" and 1/8" adaptors of various sizes

Yahoo group: ham4sale (2007 — 2015)
Date: 2012-09-02 18:31:16 UTC
From: John G.
Topic: 7164 Message: 7164

Still cleaning out the shack here, and today I found 15 different adaptor jacks of various sizes. Several 1/8" stereo to 1/4" stereo jacks. Some other stereo to mono jacks, a couple of 2 jack in, one jack out Y adaptors, etc. Maybe someone could use all of these in their junkbox. I am asking $16 shipped for all of them, and can take paypal/check/MO.

7167. FS: Goode's world atlas-great tool for DXing

Yahoo group: ham4sale (2007 — 2015)
Date: 2012-09-03 16:51:52 UTC
From: John G.
Topic: 7167 Message: 7167

I have for sale a Goode's World Atlas (17th edition), which would be a great tool to see where the ham you just worked on the other side of the world is. It is a hardcover atlas, with some wear on the cover, and it has some very detailed maps in it showing the different cities of foreign countries. Probably 150 pages or so of maps. It is also of historical interest, as it was published in 1986. See what used to be the Soviet Union and Yugoslavia. Towns and locations haven't changed that much recently-still a useful tool.

I am asking $12 shipped for it and can take paypal/check/MO.

From: mwallred
Topic: 7173 Message: 7173

[Moderator here. This isn't an ad, but it's good advice to everyone here, so I approved it. A couple extra seconds could save you some time selling the unit.]

If you really want to sell an item, you might want to consider saying something more about it than just the model number.

I've only been doing the ham thing for a few years, so maybe as the years go by I'll know exactly what a <insert model number here> is without having to google it. For now, though, if everyone would at least say what their item is along with the model number it would be greatly appreciated.

It can be something really basic like "2m HT" or "HF Transceiver" or "UHF Amplifier". I'm sure you get the idea.

You'll be helping yourself as well as everyone reading your listing.

Thanks!

Marty

7175. FS: "third hand" type soldering/homebrewing aid

Yahoo group: ham4sale (2007 — 2015)
Date: 2012-09-05 15:19:11 UTC
From: John G.
Topic: 7175 Message: 7175

I have for sale today a device made up of several clamps to hold two wires or other parts for you while you solder them. I have seen these called a "Third Hand" or something like that. Bought it new a few years ago at a hamfest. It consists of a cast metal base, a short vertical bar built into the base, a horizontal bar attached to the vertical bar with some clamps, and then alligator clamps on the end of the horizontal bar. The maximum spacing between alligator clamps is 10 inches. Plenty of ball joints and such built in for moving it in all sorts of different directions.

The XYL has the digital camera at work, will try to get a picture when she gets home (if she remembers to bring it!). I am asking $14 shipped for it, and can take paypal/check/.MO. Great tool to have for holding things if you do a lot of soldering.

7176. Commander HF-2500 Amp. QSK, grid current protection.

Yahoo group: ham4sale (2007 — 2015)
Date: 2012-09-05 20:41:52 UTC
From: Les
Topic: 7176 Message: 7176

Commander HF-2500 for sale. Excellent mechanical and electrical condition built by Patrick Stein, the original owner of Command Technologies, not by Palstar.
This contest grade amp is built like a tank and will handle key down conditions, all day long.
It uses a pair of 3CX800A7 tubes and produces full legal limit output on 160M-10M.

The amp has QSK and grid over current protection for the finals.
The tubes are in excellent shape and will produce 1KW out at 15-20 watts of drive and full legal output at 35-40 watts of drive.
The case and electronics are in like new condition and includes all documentation.

This amp is my backup and has seen very little service recently and it needs a new home.
I can deliver or meet within 100 miles of Kingston, NY.
I have the original cartons and can ship at your expense. $2500.

Les W2LK

7177. FS: Wallwort PS (various voltages)

Yahoo group: ham4sale (2007 — 2015)
Date: 2012-09-05 21:39:55 UTC
From: John G.
Topic: 7177 Message: 7177

Today straight from the spare items drawer I have for sale 5 different wallwort power supplies. Here are the specs on them:

12 volts, 2 amps
9 volts, 1 amp
6 volts, 700 milliamp
6 volts, 280 milliamp
3 volts, 150 milliamp

THey also have different types of connectors on the end, but you can always replace those with what you need. With this package I will throw in a few other spare things, like a USB cord, some Radio Shack universal wall wort adaptors, and some ring terminals which are perfect for putting on power cords.

I am asking $14 for the lot, and can take paypal/check/MO.

7184. Many Misc Items FS

Yahoo group: ham4sale (2007 — 2015)
Date: 2012-09-11 16:00:53 UTC
From: Ken Simpson, W8EK
Topic: 7184 Message: 7184

Miscellaneous Items For Sale:
Power Supplies, Speakers, Headphones, 440 MHz
transceiver, 2 meter transceiver, Lightning
Arrestors, Wattmeters, Linear Amp Switching
Cable, and many other miscellaneous things:

Yaesu "Landliner" SP-101 P Speaker and Phone Patch:

This is a nice speaker that has a phone patch added
to it. Its styling matches the FT-101 line, but it looks
nice with most any rig. It has a VU meter on it, as well
as controls for both transmit and receive gain.
I realize many people do not use a phone patch much any
more, but even if you do not use the phone patch portion,
you still have an excellent speaker.

This particular unit works fine, and looks extremely nice
as well. It is in its original box.

With paper work for $90.

Communications Speaker:

Realistic 21-549 A
This one is about 4 inches square but only about 2 inches
deep. It is rated for 5 watts, has an 8 ohm impedance, and
is listed as a 300 to 3000 Hz frequency response, making it
ideal for communications. 3.5 mm (1/8 inch) mono plug. It
is black in color, looks great, and sounds great. $18

Cariole Headphones:

This is a nice pair of headphones of the type that
completely cover your ear. These are true monophonic
headphones, and not a pair of stereo headphones that
have been converted to mono. They have a molded mono
1/4 inch plug on them.

These work fine, and look extremely nice. $20

Yaesu FT-720, UHF 440 MHz FM Transceiver:

The FT-720 is a synthesized rig covering 440 to 450 MHz FM.
It has about 10 watts out, with a good receiver. It is
especially immune to intermod. This unit is built like a
tank. Of course it has memories, memory scan, etc. The
mic has up/down buttons.

The FT-720 came in several configurations. A VHF (2 meter) version, a UHF (440 MHz) version, and a dual band version that used the first two units, plus a switch box. This is the UHF unit only.

The rig includes a connector for PL subaudible tones. This unit has a Comm Specs SS-32 attached to it, with the DIP switches replaced with toggle switches, so that the tone can be set, and changed easily.

This one works fine, and looks great. It includes the chrome bail and paper work for $100.

Yaesu FT-227 RA "Memorizer" 2 meter FM transceiver:

The FT-227 is an FM rig with about 12 watts output (1.5 W in low power) covering the entire 2 meter band. This is the "A" model that has four memories. It has provisions for installing a CTCSS subaudible tone module.

This rig was used on packet, and will make an excellent APRS or packet rig. It works fine and looks fine. Since it was used on packet, there is no microphone included, but it does include power cord and paper work for $40

Linear Amp Switching Cable for Kenwood Rigs:
This cable goes from a Kenwood transceiver to a linear amplifier to switch the amp from transmit to receive.

One end has a DIN connector, as is used with most Kenwood rigs. The other end has an RCA phono plug, as used by most linear amplifiers.

Before using this cable, please check the switching capabilities of your transceiver.

This cable has one coax for switching the T/R relay. $15

Coaxial Lightning Arrestors:

These lightning arrestors are made to be inserted in to your coaxial feedline, to help reduce lightning damage.

Cushcraft LAC-1
No markings on this to confirm the model number, but it looks like the Cushcraft "Blitz Bug".
It has an SO-239 on one end and a PL-259 on the other end (female UHF on one end and male on the other). $10

HF and VHF SWR Bridge:

Royce 2-100 Single Meter SWR Bridge / Field Strength Meter

This unit covers from 3 to 150 MHz, covering HF,
6 meters,and 2 meters. SO-239 connectors in and out.

This one works fine, and looks extremely nice. I do not see
any scratches on it, but it does have a previous owner's
name on it.

In its original box with original instructions. $25

Heath HM-2141 Dual Meter VHF Wattmeter / SWR Bridge:

The HM-2141 is the VHF version of the more popular
HM-2140 wattmeter and SWR Bridge, and has the same
features, except it covers from 50 to 175 MHz.

This is the wattmeter that has two meters on it, so it
reads both forward and reflected power at the same time.
It also has a "Peak" position, so it can capture the peak
power, in essence reading PEP output. Forward scales
are 30 or 300 Watts, and reverse are 10 W or 100 W,
plus SWR scale. It covers 50 to 175 MHz. It needs a 9
volt battery for "peak" operation. It has a remote
sensor with about 3 feet of cable.

This particular meter works 100%. The outer case (top
and sides) has been repainted black hammertone, and
looks very nice.

With paper work for $100.

Small Wattmeter:

This wattmeter is made by Gold Line, and is designed for
27 MHz. It reads 5 watts full scale. It is small --
only about 3 x 2 x 2 inches, with SO-239 connectors on
each end.

This one works, but I can not vouch for its accuracy
on all frequencies. I would think it should be fine
for 10 or 12 meters, if not more. It looks fine. $8

Icom HM-4 Hand Microphone:

The Icom HM-4 is a 600 ohm dynamic hand microphone that can
be used on most rigs requiring a low Z mic. It is a dark
gray color, with "Icom" on the front.

This one works fine, and looks great. It has stripped
and tinned ends, so that any connector can easily be added.
$22

20 meter trap:

This is an LC "Trap" to eliminate 20 meter interference.
Nominal frequency is 14.250 MHz, but it has a variable

capacitor to adjust it for best signal rejection. It
is in a minibox about 5 x 2 1/2 x 2 1/2 inches, with
an SO-239 connector on each end. It looks as if it
would handle 100 watts, but not a linear amplifier.

A note on it says "14.250 MHz Trap. Use on 10 m and 15 m"
$10

"Y" Cable for AEA PK-232 Digital Controller

This is the cable that came with the original PK-232's.
One end plugs into the serial port of your computer.
There are two other connectors at the opposite end.
One goes to the PK-232, and the other has a connector
for a parallel printer.
This cable is like new. $20

AEA AC-1
This unit supply 12 V DC at up to 1 amp.
It can be used with the AEA PK-232, PK-88 or others.
It has a 2.1 mm coaxial power plug, with the center
positive, so it can be used on many different
things that require about 12 V DC at up to an amp,
such as keyers, antenna tuners, etc. $14

Low Pass TVI Filters:

A low pass TVI filter is added to the transmitter to reduce
harmonic interference. All have SO-239 connectors, and are 50
ohm filters.

This first one works on 6 meters as well as HF:

Drake TV-1000-LP Low pass TVI filter
This is the filter that may also be used on the low end of six
meters, as well as HF. It is good for 1000 W "average" below 30
MHz, and about 200 W up to 52 MHz. With paper work for $30.

Drake TV-1000
LP Filter as above, which functions fine electrically, but looks
ugly. With paper work. $25

Others for HF:

B & W FL-10/1500
This filter cuts off just above 10 meters, and handles 1500
Watts. It is the latest model B&W filter.
In very nice condition, it looks very close to new. $40.

Johnson 250-20 Low Pass Filter
This is a 52 ohm cylindrical low pass filter with a cut
off frequency of 45 MHz and 75 db of attenuation.
It is rated to take 1000 Watts of AM, or 5000 Watts

PEP SSB. With mounting bracket. $30

Para Dynamics PDC 1089
This filter is rated at a full Kilowatt, up to 30 MHz.
5 x 6 x 2 inch black box, instead of the more familiar long
enclosure. It looks like new. $25

Bencher YA-1, high power, low pass TVI filter
If you need a more heavy duty filter for the output of
your amplifier, this one is ideal. It will take full legal
power plus, and has at least 80 db signal attenuation at
TV channel 2.This one works great, and looks close to new.
Bencher currently sells these for about $90. Only $60.

Small Power Supplies:

Radio Shack 22-124 Regulated Power Supply

This supply is regulated and will furnish 13 V DC at up
to 2.5 amps. It is ideal for the lower powered 2 meter
rigs, or to get rid of that huge collection of wall warts.

This one works fine and looks extremely nice.
I do not find a scratch on it. $20

Micronta 22-120 A Regulated power supply:

This supply is rated at 2.5 amps at 13 V DC. It is
well regulated. It has a switch and LED power light
on the front, with a circuit breaker and output terminals
on the back. The case (left and right side and top) is
basically all a heat sink, so it should cool the
regulator well.

This one works fine and looks like new. No scratches. $30

KemTronics Power Supply:

This power supply is in a slopped enclosure that is made
to set your rig on top, at an angle for good viewing and
sound. It is good for about 3 amps, or to put it another
way, would be great for powering 2 meter rigs in the 10
to 15 watt category.

This one is a "Tech Special". It produces no output
voltage. It looks fine, however. $5

Repeater Directories:

ARRL Repeater Directory
1985-86 edition
Like New Condition. $4

US Repeater Map Book
by Art Sci, Inc.
1992-93 Edition
Instead of listing the repeaters,
this book shows them on a map.
Like New. $6

I also have many other accessories available such as many
different types of microphones, HTs, various transceivers,
HF and VHF/UHF antennas, etc.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

7187. FS: Used audio tapes

Yahoo group: ham4sale (2007 — 2015)
Date: 2012-09-12 01:57:05 UTC
From: John G.
Topic: 7187 Message: 7187

I have between 20 and 25 used cassettes which have recordings on them that can be erased that I am looking to sell.Most are 90 minutes, some 60 minutes. All still in good shape. Some high bias, and some normal bias. They all have cases and inserts with them. Can't ship them media mail, but could ship by fedex or priority mail. How does $21 shipped sound? I can take paypal/check/MO.

7188. WTB: RF Detector Probes for Wiltron/ Anritsu 560A Scalar Network Analyzer

Yahoo group: ham4sale (2007 — 2015)
Date: 2012-09-12 23:45:09 UTC
From: raj_narayan@yahoo.com
Topic: 7188 Message: 7188

I am looking to buy a couple of RF Detector Probes for the Wiltron/ Anritsu 560A Scalar Network Analyzer.

Prefer the 18 GHz/ 26 GHz or the 40 GHz Probes.

Part Nos. as below:
560-7N50 10MHz - 18.5 GHz RF Detector
560-7S50 10MHz - 26.5 GHz RF Detector
560-7K50 10MHz - 40.0 GHz RF Detector

I am wanting to buy two detector probes (preferably of the same type).

Please email me with details & price if you have any for sale.

73's Raj

7189. WTB power cord

Yahoo group: ham4sale (2007 — 2015)
Date: 2012-09-13 01:18:48 UTC
From: Doug
Topic: 7189 Message: 7189

Hello, all--

I'm looking for an AC power cord that fits a Lafayette portable AC/battery cassette recorder, model RK-86A, from the 60s or 70s or so. Also would fit a portable Sony. Recorder end of cord is two parallel round female pins, approximately 0.200" apart, in a rectangular hard rubber connector body about 0.35" x 0.5" The male pins in the recorder that the cord would mate with are approximately 0.060" diameter. (Cannot actually measure in the connector socket. Compared to small drill bit.)

I have looked at all the cord sets available from a whole slew of places, and there is nothing like this. (There are larger things that look similar.) It must be a discontinued Japanese special.

I'm in eastern Long Island, NY.

7190. VHF and UHF Antennas and related items FS

Yahoo group: ham4sale (2007 — 2015)
Date: 2012-09-15 18:25:34 UTC
From: Ken Simpson, W8EK
Topic: 7033 Message: 7190

VHF and UHF Antennas (6 m, 2 m and 440 MHz) and
related equipment For Sale:

Comet "Impulse" Z-780 dual band mobile antenna:

The Comet Z-780 dual band is a 2 meter and 440 MHz mobile
antenna. It is 5/8 wave center loaded on 2 meters providing
4.5 dB gain and 5/8 x 3 wave on 440 MHz providing 7.2 dB
gain. VSWR 1.5 : 1 or less. This antenna can handle up to
150 watts.

The antenna is 5 feet high. The connector type is gold-plated
UHF PL-259 (for PO mount).

This particular antenna works fine and looks very close to
new. $60

Larsen PO-MM mobile magnetic mount:

This is a mobile mount that takes antennas with a PL-259 (such as
the Z-780 above). Coax is included. This one works great. $25

Buy both of the above for $80.

Mobile Magnetic Mount Antenna for 6 and 2 Meters:

There are no markings on this antenna indicating who made it,
but it has an extremely strong magnetic mount, complete with
coax and PL-259 connector. The antenna is about 4 feet long,
with a spring at the base of the antenna. It does not appear
that the coil at the base is removable.

Since there are no markings, I put it on the antenna analyzer.
The SWR is below 1.1 to 1 with no reactance at both 52 MHz,
and at 146.5 MHz, so apparently it is a dual band 6 and 2
meter antenna. Probably a 5/8 wave on two meters (which
would have about 3 db gain), and a quarter wave on 6 meters.

$30

VHF Triband Mobile Mag Mount Antenna:

This mobile antenna is a VHF Triband antenna covering the
6 meter, 2 meter, and 440 MHz ham bands. This makes it
ideal for some of the newer multiband and dual band rigs
available today.

The antenna is about 3 feet long and has a very strong magnet. It has a long coax cable with a PL-259 connector.

It works great, and looks very close to new. $75

Metz 214, 2-Meter Mobile Antenna, with Mag Mount:

This is a very high quality two meter antenna. It is a half wave antenna, which means it does not require a ground plane, and would have about 3 db gain. The magnetic mount includes 20 feet of quality RG-8 X coax (not the smaller, more lossy RG-58), with a PL-259 connector. Apparently Metz is well known for its marine antennas designed to hold up well in a salt water environment.

Features:
Stainless Steel 17-7ph Whip
Stainless Steel Housing
Silver Plated Brass Whip Post
UV resistant Cap
All connections soldered
Compression Whip retainer

Technical Specifications:
SWR Less than 1.2:1
1/2 Wavelength, Shunt Fed
Frequency Range 144-148 Mhz
Whip length 37 inches
No Ground plane required

This particular antenna works extremely well. It looks really great -- close to new.

HRO sells these for a discounted price of about $70. Marine dealers sell the marine equivalent for well over $100. Buy this one for only $50.

Larsen NLA Type Mobile Antennas:

These antennas fit the Larsen NLA mobile mount, which is a special mount made by Larsen.

Larsen NLA-150, 2 meter antenna, for Larsen NLA mount
Has about 3 db gain on 2 meters.

This one works fine and looks fine also.

Coil only, without whip (whip is hard to ship). $10
With four foot whip. $19

Larsen NLA-UHF coil for 440 MHz
This is the coil only for use on the amateur 440 MHz band and UHF public service bands. Good condition. $10

Mobile Antennas for 440 MHz band:

"On Glass" mobile antenna for 440 MHz:
This antenna is made to mount on a windshield,
or other glass. It does not require a ground plane, as
it is a 1/2 wave antenna, rated to have 3 db gain. It is
ideal for places where a ground plane is not available,
such as a boat or motor home, in addition to cars. A
special tuning box is included to match to your particular
situation.
This one is still in its original tube, unopened. $33

Larsen NLA Type Mobile Antenna:
This antenna fits the Larsen NLA mobile mount, which is
a special mount made by Larsen.
Larsen NLA-UHF coil for 440 MHz
This is the coil only for use on the amateur 440 MHz
band and UHF public service bands. Good condition. $10

Mobile Antenna Mounts:

Large, heavy duty magnetic mount
This large mag mount will take any antenna with a standard
3/8 inch 24 thread connector. It is very heavy duty, about
5 inches in diameter, with a long coax for $22.

BNC Magnetic Mount
This mag mount has a BNC connector on the top of it, and a
BNC connector on the coax. Among other things, it can be
used to put a BNC rubber duck outside on the roof of your
car, instead of using it inside the car on your HT. I think
this is really what it was designed for. It is in nice
condition. $20

Larsen PO-MM mobile magnetic mount:
This is a mobile mount that takes antennas with a PL-259 (such as
the Z-780 above). Coax is included. This one works great. $25

NMO "Button" Mount
This mount fits into a 3/4 inch hole, and will then take any
of the many NMO types of antennas. Coax included.
It looks to be in new condition. $12

Rubber Duck antennas for your HT:

All are for 2 meters, are in good condition,
and are $10 each, unless stated otherwise.

BNC - Original from Kenwood TH-215, about 5 inches long

BNC - Stubby about 4.5 inches long

5/16 inch threaded, as used by Motorola and others
Stubby - 4 inches long

Type F connector - 6.5 inches long

PL-259 connector - 6.5 inches long
HyGain 275, still in original packaging

PL-259 connector - Stubby - 4.6 inches long
Centurion, still in original package

BNC Stubby for 440 MHz, 3 inches long

Heath HM-2141 Dual Meter VHF Wattmeter / SWR Bridge:

The HM-2141 is the VHF version of the more popular
HM-2140 wattmeter and SWR Bridge, and has the same
features, except it covers from 50 to 175 MHz.

This is the wattmeter that has two meters on it, so it
reads both forward and reflected power at the same time.
It also has a "Peak" position, so it can capture the peak
power, in essence reading PEP output. Forward scales
are 30 or 300 Watts, and reverse are 10 W or 100 W,
plus SWR scale. It covers 50 to 175 MHz. It needs a 9
volt battery for "peak" operation. It has a remote
sensor with about 3 feet of cable.

This particular meter works 100%. The outer case (top
and sides) has been repainted black hammertone, and
looks very nice.

With paper work for $100.

HF and VHF SWR Bridge:

Royce 2-100 Single Meter SWR Bridge / Field Strength Meter

This unit covers from 3 to 150 MHz, covering HF,
6 meters,and 2 meters. SO-239 connectors in and out.

This one works fine, and looks extremely nice. I do not see
any scratches on it, but it does have a previous owner's
name on it.

In its original box with original instructions. $25

Coax connectors and adapters:

Prices are per connector. Several of each are available.
Most are unused.

UHF Right angle 90 degree elbow connector $3

UHF double female "Barrel connector" (two SO-239 together) $3

UHF "Bulkhead Connector" - Double female, as above, but for
mounting thru a window, siding, etc. about 3 inches long $6

UHF double male connector (two PL-259's together) $3

UHF "T" connector with two female (SO-239) and one male
(PL-259) connection $5

Antenna adapter to fit the BNC connector on the HT
and provide an SO-239 connector that will permit
a PL-259 to be attached. (BNC male to UHF female) $5

UHF Male to BNC female (opposite of above) $5

BNC male for coax cables
standard type $2
crimp on type $3

Chassis mount BNC female
square mount (uses 4 screws) $3
screw in type $3

BNC "T", two female and one male $3

Prices do not include shipping from Florida.

Thanks.

Yahoo group: ham4sale (2007 — 2015)
Date: 2012-09-27 11:35:05 UTC
From: Petr
Topic: 7204 Message: 7204

Hello,

I have for sale new Industrial grade ESD mat complete set for ham radio repairing, mods, homebrewing and kitchen lab properties.

Description:
Durable and highest quality ESD mat set including cables, wrist strap and grounding cord have superior heat, chemical and wear resistance. Excellent performance is available thanks to best quality 2-layers material dedicated for the professional industrial usage. Features two layers rubber where the top layer is dissipative and the bottom layer is conductive.

Two layers, oil, grease and solvent resistant, high temp resistant, acid proof and knife cut proof material with excellent wear hardness.

Parameters:
- thickness: 2mm
- RTG = 10^6 ☐ 10^8 Ohms

Datasheet and pictures upon email request.

Reviews on eHam here:
http://www.eham.net/reviews/detail/10661

The price is $25 for complete set + $14 s/h worldwide (including the paypal fee, insurance, packaging, handling). Paypal accepted.

From: cowbaybook
Topic: 7209 Message: 7209

For parts, power transformer possibly shorted. Still overheats with rectifiers pulled. Suspect it was powered with shorted capacitors. If interested I can get a shipping estimate from Vancouver Island BC.

* Mint Condition including SSB and CW filters.
* Original Manual Available.
* Prefer to deliver locally but will ship anywhere worldwide with all tubes removed and packed separately.
* Please check the very broad specifications of this unit online that was originally designed for specialized Amateur and Military communications environments.
* Definitely most useful to Advanced Licensed FCC Amateur Radio Operators for worldwide communications on High Frequency (HF); not casual local VHF/UHF entertainment use.
* Also have matching KWS-1 HF Transmitter to consider listing later date.
* Asking $900.00 obo Cash, Check, Credit/Debit Cards.
* Call or text 602-301-6660 anytime 24/7 (Se Habla Espanol)

7214. FS: Pierson KE-93 w/PS

Yahoo group: ham4sale (2007 — 2015)
Date: 2012-10-08 14:25:41 UTC
From: qrv@kd4e.com
Topic: 7214 Message: 7214

Anyone looking for a Pierson KE-93 w/PS?

I've discovered that in my new duties as AEC I need
a better HF transceiver than my venerable Alinco
DX-70TH.

I'm looking at getting a Yaesu FT-450D and need to
raise the funds somehow.

Here's lots of information about the Pierson - I made
this site back when I owned a couple of them:

http://kd4e.com/pierson.html
<http://kd4e.com/pierson.html>

I will also be posting my WRL SB-175 Meteor (no PS),
Alinco DX-70TH, TenTec 234, and either my j-Com
Magic-Notch or Datong FL3 (I need an auto-notch for
heterodynes for LIDS tuning-up on top of Nets & QSOs -
none of the compact rigs contain auto-notch even
though the technology is decades old).

7215. WTB: Anritsu/ Wiltron RF Detector Probes for 560A Scalar Network Analyzer

Yahoo group: ham4sale (2007 — 2015)
Date: 2012-10-09 01:55:40 UTC
From: raj_narayan@yahoo.com
Topic: 7215 Message: 7215

I am looking to buy a couple of RF Detector Probes for the Wiltron/ Anritsu 560A Scalar Network Analyzer.

Prefer the 18 GHz, 26 GHz or the 40 GHz Probes.

Part Nos. are as below:
560-7N50 10MHz - 18.5 GHz RF Detector
560-7S50 10MHz - 26.5 GHz RF Detector
560-7K50 10MHz - 40.0 GHz RF Detector

I am wanting to buy any two of these detector probes.

Please email me direct (off list) with details & price.

Thanks/ Raj

7217. FS: ALINCO DX-70TH HF+6m

Yahoo group: ham4sale (2007 — 2015)
Date: 2012-10-09 21:54:11 UTC
From: qrv@kd4e.com
Topic: 7217 Message: 7217

Alinco DX-70TH HF +6m transceiver.

This is my main HF rig - it receives and transmits fine and looks good. I use it regularly and get good reports.

Some of the buttons were sticky and the fine tuning a little erratic, so I bought a new replacement faceplate assembly and a replacement pot from Alinco - but I have not yet installed them.

Includes the rig, mic, power cable, original manual, PDF service manual, and new replacement Alinco parts.

Asking $395. with the parts, $475. if I install them.

I will double-box and charge only what USPS or UPS charges me to ship & insure to you.

Zenith Transoceanic H-500 Classic 50's Portable AM-SW Receiver

Includes 3V4, 1U4, 1U4, 1U5, 1U5, 1U5 1R5, tubes plus a 1R5
(sub for 1L6 See: http://www.pacifictv.ca/cartridg.htm)
Also, one unmarked tube that came with it.

Info: http://www3.telus.net/radiomuseum/projects/ZenithH500/

Untested as I did not want to risk damage from old electrolytics.

Minor scuffs are easily covered with black polish - it's as I bought it
(I've not tried to cover anything up, only removed a little dust).

Asking $75. plus the actual cost to ship - or pick up in
Statesboro-Savannah, GA area.

Parting out Johnson 6N2 Transverter. If there is some part you want, drop us an email, maybe we still have it.
Mostly RF Parts, including the 5894 and plate caps, 6360, 6U8, ALL of the RF plumbing, Meter movement, chassis, shaft extensions, panel bushings, RF output connector, B+ filter choke, a bunch of variable caps including the Butterfly PA tuning.
Case is also avaialble. This thing was partially stripped when we got it, but all we wanted were the knobs. Warning ! This thing is LOADED with nicotine from a smoking environment !! This stuff will go very inexpensively, and mostly USPS flat rate box shipping (except for the case and chassis assembly) We can take the thing apart and harvest RF parts if needed.

Thank You

7232. F.S. Elecraft K1 Fully Loaded SN#2855

Yahoo group: ham4sale (2007 — 2015)
Date: 2012-10-26 15:44:55 UTC
From: Bill Cotter
Topic: 7224 Message: 7232

Greetings,

I have for sale a late model, deluxe, mint condition, fully-loaded Elecraft
K1-4 with the antenna tuner, noise blanker, LCD backlight, internal battery option, multi-way stand, N0SS tune LED kit, and finger dimple. The radio is set 80kHz tuning and for 40/30/20/15M bands. It can easily be changed to 17M with the included parts. Late S/N 002855 purchased Feb 2010. Professionally built, about 40hrs all together. No issues or problems whatsoever. No scratches, chips, scuffs, etc.

I have used this radio at our beach house for around 100hrs during two three-week vacations at Sullivan's Island, SC. With the antenna I use (DK9SQ 33ft fiberglass pole and loop) I have logged 91 countries in EU, AF and SA (mostly 15/20M), plus many stateside contacts. The 5W is adequate and the exceptional receiver have been more than gratifying for many QSO's.

Here are the prices I offer:

K1-4, KAT1, KNB1, K1LCD, FDIMP & manual for $395 plus shipping.
Include KBT1, KTS1 and N0SS tune LED kit with the above for $435 plus shipping.

73 es tnx bill n4lg

==========

Original purchase prices:

K1-4 Four-Band 5W CW Xcvr $400
KAT1 Internal ATU for the K1 $120
KNB1 Noise Blanker $50
TKIT-X K1LCD Backlight Mod Kit $20
FDIMP Finger Dimple for K1 & K2 $7
KBT1 Internal Battery Adapter $50
KTS1 Wide Range Tilt Stand $40

Elecraft K-1 $680

N0SS Elecraft K-1 Tuning Indicator kit $20

From: w7boz
Topic: 7235 Message: 7235

Hi group,

A few local friends of mine are wanting to get on HF. So I am looking for them used HF rigs. Must be very low priced. As long as they work, or can be repaired cheap and easy let me know. I would like to see them get on the air.

Thanks, Kevin

*Detailed Product Description *

CB Radio Luiton LT-268 functions and features:

1. 4W RF power

2. 40 AM/FM channels

3. Channel 9 and channel 19 switch

4. Mode AM/FM switch

5. RSSI indication (4 PCS LED indication)

5. 2 Digit channel indicator

6. RF gain control

7. Volume with power ON/OFF control

8. TX/RX LED indicator

9. Up/Down microphone

10. Front microphone plug

11. Jack for external speaker

12. Manual Squelch

13. ANT Connetor

14. FREQ. expanding (A, B, C, D, E, F, POLAND and NZ band)

Specifications:

GENERAL

Channels 40 AM/FM

Frequency range 25.615 - 28.305 MHz

Frequency control P.L.L.

Operating temperature -10°/+55°C

DC input voltage 13.8Vdc ±15%

Size 115 (L) x 38 (A) x 150 (P) mm

Weight 0.8 kg

RECEIVER

System CPU controlled Double conversion super

IF 1° 10.7 MHz / 2° 450 KHz

Sensitivity -120dBm for 12dB SINAD (FM)

-107dBm for 12dB SINAD (AM)

Audio output @10% THD 2.5W at 8 ohm

Audio distortion <8% at 1 KHz

Image rejection 65dB

Adjacent channel 85dB

Signal ise ratio 45dB

Current drain 220mA (stand-by)

TRANSMITTER

System CPU controlled P.L.L. synthesizer

Maximum RF power 4W at 13.8Vdc

Modulation 85% to 90% (AM)

1.8 KHz ±0.2 KHz (FM)

ANT impedance 50 ohm unbalanced

Current drain 1000mA (at no modulation)

7241. Drake TR-3

Yahoo group: ham4sale (2007 — 2015)
Date: 2012-10-30 17:52:02 UTC
From: jcowens1@comcast.net
Topic: 7241 Message: 7241

I have a pristine Drake TR-3 that I purchased new around 1963 which I have been hanging on to for nostalgic reasons. I have the AC and DC power supplies and owner/operator manual for it and it was working just fine the last time I had it turned on.

I want it to be in the hands of someone who will take care of it and give it the respect it deserves. I probably should go to the Drake Boat Anchor website for this sale as I think it deserves a top dollar offer for an antique like this, but thought I would try to sell it here first. There should be some payback for carting this rig around for 60 years. Anyone interested??

I have a brand new never used FL-232 350hz narrow filter.

It has the rubber spacer in package.

Will fit IC73,IC706 and not sure what else it will fit into.

I already have a filter in the 703 so do not require this one.

$110.00 and this includes shipping from Thunder Bay, ON

7252. Elecraft K1-4 plus KAT1, KNB1, K1LCD, etc

Yahoo group: ham4sale (2007 — 2015)
Date: 2012-11-05 22:17:16 UTC
From: Bill
Topic: 7252 Message: 7252

FOR SALE: Deluxe, mint condition, fully-loaded Elecraft K1-4 with the antenna tuner, noise blanker, LCD backlight, internal battery option, multi-way stand, N0SS tune LED kit, and finger dimple. The radio is set 80kHz tuning and for 40/30/20/15M bands. Included are magnets mounted inside for attaching Palm Paddles (not included). It can easily be changed to 17M with the included parts. Late S/N 002855. Professionally built, about 40hrs all together. No issues or problems whatsoever. No scratches, chips, scuffs, etc.

I have used this radio at our beach house for around 100hrs during two three-week vacations at Sullivan's Island, SC. With the antenna I use (DK9SQ 33ft fiberglass pole and loop) I have logged 91 countries in EU, AF and SA (mostly 15/20M), plus many stateside contacts. The 5W is adequate and the exceptional receiver have been more than gratifying for many QSO's.

K1-4, KAT1, KNB1, K1LCD, FDIMP & manual for $395 plus shipping.

All the above plus: Include KBT1 (internal battery & cover), KTS1 (Tilt Stand) and N0SS tune LED kit for $455 plus shipping.

73 es tnx Bill N4LG

==========

Original purchase prices:

K1-4 Four-Band 5W CW Xcvr $400
KAT1 Internal ATU for the K1 $120
KNB1 Noise Blanker $50
TKIT-X K1LCD Backlight Mod Kit $20
FDIMP Finger Dimple for K1 & K2 $7
KBT1 Internal Battery Adapter $50
KTS1 Wide Range Tilt Stand $40

Elecraft K-1 $680

N0SS Elecraft K-1 Tuning Indicator kit $20

7254. Wattmeters FS

Yahoo group: ham4sale (2007 — 2015)
Date: 2012-11-07 16:39:13 UTC
From: Ken Simpson, W8EK
Topic: 3619 Message: 7254

Various Wattmeters For Sale:
Peak reading, average reading, Cross needle,
regular meter, HF, VHF, UHF, and more

Daiwa CN-101 L cross needle Wattmeter:

The Daiwa CN-101 L cross-needle meter displays both forward and reflected power over a frequency range of 1.8-150 MHz so it will cover all of the HF bands, plus 6 and 2 meters. The power range is 15/150/1500 watts forward and 5/50/500 watts reflected. With the cross needle meter, it also reads SWR. Minimum power for SWR detection accuracy is 4 watts. Accuracy is ±10% at full scale. There are SO-239 connectors on the rear panel.

This meter will read either peak or average power at the flip of a switch. Back lighting is provided when using a 12 V power source.

This meter works 100% and looks very close to new.
With paper work for $65.

Daiwa CN-465m Cross Needle 140 to 450 MHz Wattmeter:

The Daiwa CN-460M compact cross-needle meter displays both forward and reflected power over a frequency range of 140 to 450 MHz in ranges of 15 and 150 watts forward and 5/50 watts reflected. Accuracy is ±15% at full scale. SO-239 connectors. This meter includes a mobile mounting bracket and meter illumination. 12 V is required for the light.

This particular meter works 100% and looks close to new. It is in its original box, with the styrofoam packing, and includes paper work for $50.

Heath Wattmeters / SWR Bridges:

Heath HM-2102 VHF Wattmeter / SWR Bridge:
Heath HM-2102 VHF wattmeter, covering 50 to 160 MHz. Similar to the HM-102, but for VHF frequencies, with 250 and 25 watt scales. It can also be used to check SWR, and has a remote sensor that can either be left inside the meter, or separated from the actual meter by about 3 feet. SO-239 connectors in and out.

This particular meter works great, looks great, and includes paper work for $45.

Heath HM-2141 Dual Meter VHF Wattmeter / SWR Bridge:

The HM-2141 is the VHF version of the more popular
HM-2140 wattmeter and SWR Bridge, and has the same
features, except it covers from 50 to 175 MHz.

This is the wattmeter that has two meters on it, so it
reads both forward and reflected power at the same time.
It also has a "Peak" position, so it can capture the peak
power, in essence reading PEP output. Forward scales
are 30 or 300 Watts, and reverse are 10 W or 100 W,
plus SWR scale. It covers 50 to 175 MHz. It needs a 9
volt battery for "peak" operation. It has a remote
sensor with about 3 feet of cable.

This particular meter works 100%. The outer case (top
and sides) is black hammertone, and looks very nice.

With paper work for $90.

Heath HM-102/HM-2102 Wattmeter Parts:

Outer clam shell cabinet (left and right sides plus top)
that fits either of these wattmeters. This one is in
extremely nice condition, with no scratches or blemishes.
$12

Front panel and bottom of HM-2102 VHF Wattmeter
Great condition with no blemishes, and very nice crisp
lettering. $12

Reflectometer Assembly for HM-2102 VHF Wattmeter
This is the complete reflectometer assembly, including
the aluminum case, and the cable. $15

HF and VHF SWR Bridge:

Royce 2-100 Single Meter SWR Bridge / Field Strength Meter

This unit covers from 3 to 150 MHz, covering HF,
6 meters,and 2 meters. SO-239 connectors in and out.

This one works fine, and looks extremely nice. I do not see
any scratches on it, but it does have a previous owner's
name on it.

In its original box with original instructions. $25

Small Wattmeter:

This wattmeter is made by Gold Line, and is designed for
27 MHz. It reads 5 watts full scale. It is small --
only about 3 x 2 x 2 inches, with SO-239 connectors on
each end.

This one works, but I can not vouch for its accuracy
on all frequencies. I would think it should be fine
for 10 or 12 meters, if not more. It looks fine. $8

Keithley Model 179 A True RMS DMM:

The 179A is a 4 1/2 digit True RMS reading DMM that
runs off of 115 V AC. It has DC voltage ranges
up to 1200 volts, with AC voltage ranges to 1000
volts. Ohms readings go up to 20 Meg, with both
DC and AC current ranges up to 2000 ma. This is
a true precision DMM, designed for bench/lab use.

This particular unit works 100% and looks extremely
nice. Probes are included, as is the paper work for
$100.

I also have many other accessories available such as many
different types of microphones, HTs, various transceivers,
HF and VHF/UHF antennas, etc.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

73,

Ken, W8EK

7257. Rohn HDBX 40' Tower, Spaulding X64BO screw base, CDE Rotor & Control

Yahoo group: ham4sale (2007 — 2015)
Date: 2012-11-08 16:48:05 UTC
From: The Observer
Topic: 7257 Message: 7257

For Sale or trade, Rohn HDBX 40' Tower, Spaulding X64BO screw base, CDE Rotor &
Control.

I have a 40' Rohn HDBX tower (sections 8/base, 7, 6, 5, 4) that evidently
started as a 64' but it was already down to 40' when I got
it. The tower is down, disassembled, and needs painting but is in good shape
otherwise. This also includes the Schedule 80 steel mast, bearings, and mounting
plates. There is also a rotor mount in the bottom section (section 8).

The Spaulding X64BO screw base is complete and in good shape but would have to
be removed. The base is held in place by 3 screw anchors and I have the wrench
to remove them. I have the documentation for the base and can scan and send
along if desired.

I would like to sell the tower and base as a set and am asking $200 for both.

The CDE Rotor is in good shape but hasn't been used in about 20 years. I also
have a spare position rheostat for the rotor.

I'm asking $50 for for the rotor and control head.

Please contact me via email (aerodec at comcast dot net) or Callbook
address and we can discuss particulars on shipping, transport, etc. I would
discuss trade for other ham related items if that works better.

I am open to negotiation for trade as I particularly am looking for a
dual band HT to carry in my truck.

Thanks

Al
WD9AGT

From: davidnapier1966
Topic: 7260 Message: 7260

Hi,I am in the need of a good Antenna Tuner 0-300 watts range or even a 0-100 watts range would be alright,I need it to have power/Swr meter,if anybody has one that is excess,and at reasonable price,let me know VIA Email,Thanks es 73's David/Ka4zuc

7261. For Sale: Kenwood TH-F6A Tri-band HT with extra goodies

Yahoo group: ham4sale (2007 — 2015)
Date: 2012-11-09 06:32:40 UTC
From: J.Gordon Beattie, Jr., W2TTT
Topic: 7260 Message: 7261

Kenwood TH-F6A Triband 144/220/440 MHz Handheld FM Radio Transceiver

Original battery, with Diamond SRH-320A antenna $50 value, Wall Charger, Original carton.

Features
LCD Dot Matrix Display
435 Memories (3 Call)
Selectable Squelch Configuration
Memory Shift
Tone and DCS Encode/Decode, Key Lock
Time-Out Timer and APO
Auto Simplex Checker
DTMF Keypad
Internal VOX
Battery Indicator
Dual Frequency Receive
Receives and transmits on the 144/222/440 MHz Amateur bands and has dual receive capability. Also receives AM Broadcast, Shortwave Broadcast, FM Broadcast, Aviation, 50/902/1200 MHz Amateur Radio bands. Receive modes include FM/AM/WFM/LSB/USB/CW.

Full 5 watts output on 144/222/440 MHz bands while operating with the supplied 7.4 volt 2000 mA-H lithium-ion battery (or external 13.8 VDC power). A low power setting of 0.5 watts and an extra low power output of 0.05 watts is featured. The controls are easy to use and the LCD informs you of the exact status of the radio.

This radio offers sophisticated wideband communications reception. The special "B" band has reception from 100 kHz in to 1300 MHz (less some restricted frequencies) in F2D, F3E (FM), A3A (AM), A1A (CW) and J3E (SSB). That's right, Morse code and single sideband. A built-in Ferrite bar antenna ensures reception of medium wave and long wave even without the detachable antenna. There is even a special ten channel weather station memory bank. The TH-F6A is ready to add your 1200/9600 TNC (no adapter required).

$250 by PayPal or Postal Money Order

Thanks & 73,

Gordon Beattie, W2TTT

7271. FOR SALE: RadioShack Pro-2004 scanner

Yahoo group: ham4sale (2007 — 2015)
Date: 2012-11-12 02:35:26 UTC
From: N2DUP
Topic: 7271 Message: 7271

RadioShack Realistic Pro-2004 (part number 20-119) classic full coverage scanner ☐ This radio is very clean and in excellent condition. I'm the original owner and I will include the following with this scanner: original box and packaging, antenna, owner's manual AND the rare service manual (as well as cellular modification directions in case you wish to unmodify it easily). I have modified this radio so that it has full cell coverage in the 800-MHz band and also has 400 channels instead of 300 channels. This radio offers a very hot receiver that picks up signals great. I'm really not sure I wanted to part with this radio, but it's now for sale ☐ before I change my mind. Lastly, I will throw in one last bonus ☐ a Key Research S-45 Search and Store module that is new and not installed. This will give you even more options with this scanner in your shack. This scanner offers full coverage on NFM, AM and WFM from 25-520 and 760-1300 MHz with no gaps. It's the ultimate classic scanner. Scanner is in excellent condition, well taken care of ☐ in a non-smoking residence. I've never had any problems with this radio. It originally sold for about $400, as I recall. Photo of scanner can be seen at: https://sites.google.com/site/scancomm/photos/Pro-2004.JPG - $100 firm plus $22 shipping and insurance via USPS. Paypal accepted if you pay any fees in the transaction, or will accept personal or business check (holding for shipment until check clears).

Note: This is a great scanner for the ham shack because it covers the 10M, 6M, 2M, 222-225, 420-450, 902-928 MHz and 1.2 GHz bands.

73, Chuck, N2DUP

7272. FOR SALE: Regency MX7000 scanner

Yahoo group: ham4sale (2007 — 2015)
Date: 2012-11-12 03:42:26 UTC
From: N2DUP
Topic: 7272 Message: 7272

FOR SALE: Regency MX7000 classic full coverage scanner ☐ Covers AM, NFM, WFM with 20 channels from 25-550 MHz and 800 MHz to 1.2 GHz. No gaps at all in this classic scanner (full cellular coverage). It comes with the original box and packaging, power supply, plastic covering still protecting the front panel (but you may remove it), owner's manual and unused mobile mounting bracket. This radio is very clean and in excellent condition and I'm the original owner. This radio offers a very good receiver that picks up signals great. I'm really not sure I wanted to part with this radio, but it's now for sale ☐ before I change my mind. Scanner is in excellent condition, well taken care of ☐ in a non-smoking residence. I've never had any problems with this radio. It originally sold for about $350. Asking $200 plus $20 shipping and insurance via USPS. Photo of scanner can be seen at: https://sites.google.com/site/scancomm/photos/MX-7000.JPG - Paypal accepted if you pay any fees in the transaction, or will accept personal or business check (holding for shipment until check clears).

NOTE: This is a good ham shack scanner as it covers the following bands: 10M, 6M, 2M, 222-225, 420-450 and 902-928 MHz as well as the 1.2 GHz band.

From: George Lawrence Storm
Topic: 7273 Message: 7273

Before it goes to flea bay?

Sinclair F201-G
Range: 132-174 MHz
Currently tuned around 169MHz
Power Rating: 350 Watts
In its own rack cabinet (complete with a little rust at the bottom of the cabinet - not the cavities)
This thing is huge, it will need special shipment, I would love if someone in the Seattle area could use it.
Asking $650

I also have a 10" cavity, 22.5" high tuned somewhere around the same frequency, don't know much about it, make an offer.

Photos available upon request.

Regards,
- George Lawrence Storm, WA3REX, Maltby, Washington (North East of Seattle)

MFJ-901B Versa Tuner, Good shape $ 55.00 or Best offer

Vo-Com Mobile linear model # 2cogo-2... 2 watts on 60 watts out. $60.00 or Best offer..

Yaesu VX-5R HT, with 2 extra battery packs, Speaker Mic, drop in charger.$155.00

The Yaesu VX-5R is a triple band (6M, 2M & 440 MHz) HT with extensive receive coverage, and leading-edge features. It receives the AM and FM broadcast bands, shortwave (AM) to 16 MHz, VHF and UHF TV audio, VHF Air and public service frequencies. The specific ranges covered are: 0.5-16, 47-729 and 800-999 (less cellular). The die-cast aluminum housing, augmented by an extensive gasketing system sets a new standard for water resistance among amateur HTs. This robust construction has earned it a MIL-STD 810 rating.

The supplied FNB-58LI 7.2 V 1100 mAh Lithium-ion battery provides 5 watts out on 6M and 2M and 4.5 watts on 440 MHz. Features include: 16 digit 9 memory DTMF autodialer, CTCSS/DCS, 220 memories, aluminum die-cast case and 8 character alphanumeric display.

At only 2.3 x 3.4 x 1.1 inches (58x87x28 mm) it will go with you everywhere. Hikers and mountain climbers may connect the optional SU-1 Barometric Sensor for direct air pressure readings. The VX5R comes with SMA Antenna, FNB-58LI Lithium Ion Battery and a couple other rechargable battery packs as well The VX5R is black,

All above are plus shipping Conus..

7288. FT-450 for Sale

Yahoo group: ham4sale (2007 — 2015)
Date: 2012-11-23 21:50:20 UTC
From: wb4u2002
Topic: 7288 Message: 7288

I have for sale a Yaesu FT-450 that is surplus to my needs. The radio is NOT the "D" version and it does not have the internal antenna tuner.
Comes with box, manual, hand mic and power cord. The power cord already has Anderson Power Poles on the end, so it's ready to plug into your system.
Include also is an LDG AT-100Pro tuner with the radio. The tuner comes with box and manual.
Both radio and tuner are in excellent condition both
cosmeticly and electronicly. No issues with either 160 thru 6 meters 100 watts. Radio was my backup unit, but I have replaced it with a Kenwood TS-590S.
If interested reply to me at wb4u@.... Price is $675 and I will pay shipping. Radio has lived in a non smoking environment and has never been
mobile, but it has survived a few pile-ups.

Johnny

* Excellent Condition Electrically/Mechanically with some very minor cosmetic side & rear wear as can seen from very detailed images available. Absolutely ZERO wear on front panel screening.
* Includes AM/SSB and CW filters.
* Original Manual (not copy) INCLUDED.
* Please check the very broad specifications of this unit online that was originally designed for specialized Amateur and Military communications environments. Definitely most useful to Advanced Licensed FCC Amateur Radio Operators for worldwide communications on High Frequency (HF).
* Also have matching KWS-1 HF Transmitter & matching speaker to consider listing later date.
* Prefer to deliver locally but will ship anywhere worldwide.
* All payment types accepted including Cash, Check, Credit/Debit Cards, etc.
* Call or Text 602-301-6660 anytime 24/7/ (Se Habla Espanol)

I am looking for a small 2 element tribander antenna like the Mosley TA32 or Mini 32, or the HyGain TH-2, something along those lines that I can turn with a light duty rotor. Only need the 2 element version of these antennas. Let me know if you have one you are selling, its condition, and price shipped to Lawton, OK.

7298. FS Zenith Trans-Oceanis Royal 1000D

Yahoo group: ham4sale (2007 — 2015)
Date: 2012-11-28 18:21:17 UTC
From: alfordsantee@ymail.com
Topic: 7298 Message: 7298

I have a Zenith Trans-Oceanic Royal 1000d for sale. It is in great shape and works as it should. It was made in 1962 and is all transistors. The antenna and handle are both good with no issues It covers LW/AM/SW It has a factory installed BFO that makes it a very rare item.
I am asking 200 or offer
Pictures by request and please reply direct!

7299. Johnson VIKING II Transmitter for sale

Yahoo group: ham4sale (2007 — 2015)

E.F. Johnson VIKING II Transmitter for sale

Decent condition, complete. Contact me if you would like pictures or to discuss. We can talk
about the price or possible trades etc. If you are interested in a solid EFJ Transmitter for AM
and CW this would be it. Not fully restored but in decent shape. Front panel is better than most you will find.

From: phil_ad5x
Topic: 7301 Message: 7301

For Sale is my HP5383A 10Hz-512Mhz Counter. Though it is spec'd to 512MHz, this unit works great up to 615 MHz. It is in very good cosmetic condition. The unit comes with the Operating/Service manual on CD (or I can email it to you) and the 120VAC power cord. Price is $150 shipped/insured UPS Ground.

Phil - AD5X

7302. EF JOHNSON VIKING RANGER ONE TRANSMITTER - "Basket Case"

Yahoo group: ham4sale (2007 — 2015)
Date: 2012-11-29 22:52:52 UTC
From: Roland
Topic: 7302 Message: 7302

This unit ws dismantled some years ago and had the entire VFO section rebuilt & refurbished. The sale includes entire case including front panel, all knobs, switches, meters, etc. The reason it remains dissembled it because I loaned out my example working Ranger One to another ham eventually trading him for a Viking II and cash. I seriously do not recommend purchasing my unit for other than parts without having an example working unit to follow for reassembly. Pictures available. Will ship anywhere. Please make reasonable offer for this fantastically designed AM/CW Transmitter.

7305. For Sale Motorola UHF MCS2000 FLASHport

Yahoo group: ham4sale (2007 — 2015)
Date: 2012-12-02 16:21:12 UTC
From: James
Topic: 7305 Message: 7305

I just received the above mentioned radio from E-Bay. I have two other MCS2000 Radios that are different from this Flashport Radio. I have it set to conventional however it works differently as I didn't know it would. Although it doesn't work like the standard MCS2000 I believe it is OK for this Trunking Mode and all the bells I don't need or want.

Motorola Type: MR503AB
Model M01RFM9PW5BN
The radio appears to be in like new condition.
The previous owner took the accessory plug and wired it into a speaker base. This comes with the unit. Also a new looking Heavy Duty Motorola Mike. No bracket.

$100.00 Shipped before it goes on E-Bay. I would even consider a trade to a regular MCS2000 UHF in similar condition.

FOR SALE: Alinco DJ-580T dual band VHF/UHF handheld amateur radio. It has been modified to go out of band on commercial frequencies, for air band reception and for 800 MHz reception. It's also one of the rare handheld radios that will do cross-band repeat. Comes with antenna, two W&W Assoc. battery packs that aren't holding charges, stock charger, stock battery (not holding charge), W&W Assoc. MasterCharger II and MasterCharger IIa charging stands, owners manual and notes, and original box and packaging. Worked great when last used with working batteries. $125 for entire package. Will ship via USPS for $22. Photo can be seen here: https://sites.google.com/site/scancomm/photos/DJ-580T.JPG

Contact Chuck, N2DUP, at N2DUP at arrl . net

I have a Crusader 321 Base AMP. This is a TUBE AMP, and has three and one, which means there is one tube in the back and three in the front. The AMP is in full functioning mode, and puts out 200 watts on low and 400 watts on high.
It has brand new 6LF6 tubes in it, and a new motor for the fan. I am looking to sell it or take a good trade for a nice working 10 meter Galaxy or President.
I also have a rebuilt and restored Johnson Messanger 223 Base Radio. THis base does only have 23 channels, and it also has benn restored and with brand new tubes.
If interested, then please email me?

7325. IC-735 and TS-50 For sale

Yahoo group: ham4sale (2007 — 2015)
Date: 2012-12-13 01:26:46 UTC
From: Daniel Hileman
Topic: 7325 Message: 7325

Hi Everyone, I have a an IC-735 and TS-50 for Sale or trade. Would like to trade one (plus I'd throw in some cash) of these for a little bigger rig... The IC-735 includes a power cord and icom hand-mic...it has a few "dead spots," in the receiver, but has never failed...just as you tune by certain frequencies it is dead for a few Khz. Transmits great. The TS-50 includes power cord and hand-mic...it's a little rough (has scratches) but makes a great mobile or back-up rig. Will sell either for about $400 or trade towards an HF rig such as, IC-765, TS-940/850, FT-990...etc, etc...what rig do you have? Any interest before I put them on Craig's list? Pics available upon request. Dan N9WX

7326. FOR SALE: NEW AMERITRON AL-811 160-10 METER HF LINEAR AMPLIFIER

Yahoo group: ham4sale (2007 — 2015)
Date: 2012-12-13 02:16:00 UTC
From: n3dg
Topic: 7326 Message: 7326

NEW Ameritron AL-811 HF Linear Amplifier delivers 600 Watts PEP Output on all HF bands, 160 thru 10meters, with no compromise on WARC and MARS bands, you get 100% rated output. You can operate the AL-811 on all modes including SSB & CW, and even demanding continuous modes like RTTY, SSTV, FM and AM.

Ameritron AL-811 uses three very rugged and very low cost 811A tubes which resist failure and are assured for long life, even when your amplifier is mis-tuned, and she also has a very rugged power supply.

Features at:
http://www.ameritron.com/Product.php?productid=AL-811

Manual at:
http://www.ameritron.com/support.php?productid=AL-811

She was purchased a few months ago as a backup amplifier and only tested, not used, just sat in the closet and I now have no need, so she must go to a new caring owner who will enjoy using her.
New List Price is $800 + Shipping, I will ship and insure with original manual and warranty form and information for $650 to Continental USA.

7338. WANTED! Icom all mode radio or Kenwood, Yaesu

Yahoo group: ham4sale (2007 — 2015)
Date: 2012-12-18 15:58:27 UTC
From: Mountain Man
Topic: 7338 Message: 7338

I am looking to trade for an older Icom all mode radio that does fm/ssb/2m etc. I am looking for a base radio. must have the power supply and mic. I would like to find one that the person would hopefully be willing to trade.
I would even accept a Kenwood all mode radio or a Yaesu

I have a 10 meter Galaxy DX99V, it comes with added features and is in excellent condition with nice amplified mic.
Please message me if you have something I might be looking for.

7339. G.E. & Motorola VHF & UHF Manuals Available

Yahoo group: ham4sale (2007 — 2015)
Date: 2012-12-18 18:26:29 UTC
From: k4idc
Topic: 7339 Message: 7339

Hello to the group,
I have a small scad of various General Electric & Motorola commercial two-way radio manuals available, both in VHF & UHF. I'd like to sell the manuals for $25 each, shipped CONUS via USPS.
I've put two files in a folder called "
K4IDC GE- Moto Service Manuals" which lists the manuals I have available, divided between G.E. & Motorola.

NOTE in the quantity column, no number means I have a quantity of one of that manual, not none of that manual.
Contact me via email: K 4 I D C at comcast dot net (no spaces)

7340. FOR SALE: NEW AMERITRON AL-811 160-10 METER HF LINEAR AMPLIFIER

Yahoo group: ham4sale (2007 — 2015)
Date: 2012-12-19 01:22:12 UTC
From: n3dg
Topic: 7326 Message: 7340

NEW Ameritron AL-811 HF Linear Amplifier delivers 600 Watts PEP Output on all HF bands, 160 thru 10 meters (already modified for 12 & 10 Meters), with no compromise on WARC and MARS bands, you get 100% rated output. You can operate the AL-811 on all modes including SSB & CW, and even demanding continuous modes like RTTY, SSTV, FM and AM.

Ameritron AL-811 uses three very rugged and very low cost 811A tubes which resist failure and are assured for long life, even when your amplifier is mis-tuned, and she also has a very rugged power supply.

Features at:
http://www.ameritron.com/Product.php?productid=AL-811

Manual at:
http://www.ameritron.com/support.php?productid=AL-811

She was purchased a few months ago as a backup amplifier and only tested, not used, just sat in the closet and I now have no need, so she must go to a new caring owner who will enjoy using her.
New List Price is $800 + Shipping, Holiday Special Price at $575.

7341. For Sale/Trade GE AXA9MZTR-102A, HTs 450Mhz

Yahoo group: ham4sale (2007 — 2015)
Date: 2012-12-19 05:33:45 UTC
From: shalopt
Topic: 7341 Message: 7341

Have two GE AXA9MZTR-102A, HTs, 450-512 Mhz (403-512 Mhz per service manual) 2 channel radios, crystaled for 466.675 mhz and 461.675 mhz. has Channel Guard no idea what tone, 2 watt output per manual . With antenna, charger, wall wart and battery pack, the Ni-Cads died and have been replaced with 6 AAA NI-MH cells. I have no equipment for detailed testing, but sounds fine on my Pro-34 monitor and have received a local repeater and my Bird 43 indicates output. I have a pdf of the service manual (5.6 Mb). USPS shipping will be approx
$12.00 insured for one or both units. If any interest PM with a reasonable offer.

7343. Galaxy DX99V 10 meter CB/HAM radio

Yahoo group: ham4sale (2007 — 2015)
Date: 2012-12-19 16:11:45 UTC
From: Mountain Man
Topic: 7343 Message: 7343

I have a Galaxy DX99V 10 meter CB/HAM radio. The radio put out 35 watts, and has many features. I built in 2 switches on the bottom, one is for talk back and the other is to control the fan I attached on the back for cooling the radio down during use.
On top of the radio is a built in Mr. Briggs Box, which is only to use when you first key up. I have a COBRA amplified mic that has noise control and a volume on it that is included. The radio I mainly use for upper and lower sideband. However, I am selling so I can buy an Icom all mode radio on Ebay.
I would like to get $150 for the radio, and that will include shipping. If anyone is interested, then please message me rightaway.

7350. FOR SALE: M2 6M9KHW

Yahoo group: ham4sale (2007 — 2015)
Date: 2012-12-26 20:57:53 UTC
From: Martin Maynard
Topic: 7350 Message: 7350

I am selling an antenna I bought several months ago but have decided I am not going to be able to put it up as a matter of fact it is still in box it was shipped in. It is a 6 meter 9 element yagi.

I am asking $500.00 or best offer

Here is description from texas towers:

Overview:

Beam antenna
covers 6m
9 elements
14.8 dBi gain
handles 3000 watts
50-foot boom

Details

The M2 6M9KHW is a 9-element beam antenna for 6m operation. Countless hours of computer optimization, range confirmation and on the air testing have resulted in a truly remarkable antenna. Capable of producing moon echoes when pointed at rising or setting moon and running the legal power limit. If you can hear your own moon echoes over a one half million mile path, just think what it could do for your signal on long haul tropo, meteor scatter or just an ordinary E or F2 opening. Boom center sections are 2.5? diameter and the rest of the sections all telescope in 1/2? or 1/4? increments. Fed with a new hairpin design to optimize VSWR and new 1:1 balun designed more rugged than the previous feed. Rugged 1/2? X 40? element center sections and 3/8? diameter tips mounted on machined, ?slip on? element-to-boom clamps.

I have qty 2 AR-5000 (not 5000A or +3 models) coming up shortly for sale on Ebay. If anyone in this group is interested please email me before I place them for a buy now sale. I paid well for each. Both are in excellent condition. One has the CTCSS option and is a cosmertic 10 and a 10 electrically. Both have been completely tested and meet or exceed AOR's specifications. I have a host of Rohde & Schwarz calibrated test equipment and have gone through them extensively for sensitivity, selectivity and overall performance. These receivers are regarded by many as the best receiver ever made by any manufacture and extremely hard to find . The 5001D has risen by over $1000.00 just in the last several months. You may also call me at 931-498-4339 to discuss each one or both or for pictures. Try finding one as it's just about impossible.

7356. FOR SALE: YAESU FT-847 TRANSCEIVER & FC-20 AUTOMATIC ANTENNA TUNER

Yahoo group: ham4sale (2007 — 2015)
Date: 2012-12-30 02:48:15 UTC
From: n3dg
Topic: 7356 Message: 7356

Yaesu FT-847 is really three radios in one: HF, VHF/UHF and Satellite and she delivers 100 watts output on HF and 6 Meters, and 50 watts output on both 2 Meters and 430 MHz bands. Additional features include: Cross-band Full Duplex operation, Normal/Reverse Tracking, CTCSS/DCS Encode and Decode, 0.1 Hz tuning steps, DSP Notch, DSP NR and DSP BPF, Shuttle Jog Tuning Dial, Keypad Entry and 1200/9600 bps Packet ready.

She just sat boxed in the closet as a backup transceiver, never used and like new with DC Power Cable and Original Owners Manual at $1200 Shipped to Continental USA.

MINT YAESU FC-20 HF & 6 METER AUTOMATIC ANTENNA TUNER

Yaesu FC-20 External Automatic Tuner is designed for the FT-100, FT-100D, FT-847, FT-857, FT-897 operating on all HF ham bands plus 6 meters. It is ideal for tuning out SWR variations in your antenna system present at the radio end of your coax. Utilizing fixed inductances and variable capacitors controlled by precision stepper motors, the FC-20 can accommodate and resolve SWRs of up to 3:1 on HF and up to 2:1 on 50 MHz. The Yaesu FC-20 also provides 100 memories for tuning data, so you will instantly be ready to transmit on your favorite frequencies and it includes a convenient Auto-Start feature in case the antenna system impedance suddenly changes.

Specifications:
* Coverage: 1.8 to 54 MHz Amateur Bands
* Power rating: 150 Watts
* Memories: 100 Total
* Tuning time: <30 seconds
* Antenna matching impedance: 17 to 150 Ohms

She just sat boxed in the closet for my backup transceiver, never used and like new, and I now have no need, so she must go to a new caring owner who will enjoy using her at $185 Shipped to USA.

7362. FS: Federal Signal - Voice Command Receiver

Yahoo group: ham4sale (2007 — 2015)
Date: 2013-01-01 04:22:56 UTC
From: train_radio_guy
Topic: 7362 Message: 7362

For sale is one Voice Command Receiver, originally designed & manufactured by the Federal Signal Corporation, as an alerting receiver. They were used in local schools, hospitals, government offices, etc.. as a means to notify the public of impending bad weather, natural disaster, or danger. Typically set on a specific frequency, and controlled by a pair of sequential tones; much like voice pagers used by a local fire department.

Most states have migrated away from this means of alerting the public, with the proliferation of NOAA Weather Radios

Specifications:
- Model: VCRL
- Frequency: 42.500 MHz (VHF - Lowband)
- Tone Frequencies: 2440.0 Hz (F18) + 1780.0 (F14) Hz

- Includes: Voice Command Receiver & Power Cord
- Missing: Antenna
- Condition: Used, As-Is
- Condition: Used, As-Is

--> Price: $ 25.00 obo

See it on Craigs List:

7363. FS: Rohn 25GBRM non-penetrating ballast mounts

Yahoo group: ham4sale (2007 — 2015)
Date: 2013-01-01 18:19:26 UTC
From: Jeff DePolo
Topic: 7363 Message: 7363

I have two Rohn 25GBRM non-penetrating ballast mounts for 25G tower sections. Each will take up to two 10' 25G sections for an overall height of about 22'. The tower sections are self-supported, but guy wires from the tower to the ballast trays can be used for additional support (included). They are in very good condition, galvanizing is good, etc. Disassembled and ready for pickup in the Philly area. These sell for about $1500 each street price (Tessco, Hutton), will sell them individually for $700 each, or buy both of them and I'll throw in a few 25G tower sections as well. I'm not interested in selling the 25G sections separately. Pickup only, please don't ask about shipping.

7367. Atlas 215X and console for sale

Yahoo group: ham4sale (2007 — 2015)
Date: 2013-01-06 01:19:07 UTC
From: Fred VE3FAL
Topic: 7367 Message: 7367

I have a Atlas 215X and desk console for sale. As stated started to work on unit but have ran out of time and other projects have got in my way as well as work.

The unit seems to be receiving ok now with help from some who are familiar with the unit. I have not got around to the transmit side yet and pulling all the boards and cleaning them.

This is a heavy unit with the console.

Asking $300.00 plus shipping of the unit.

Pictures available upon direct request.

Fred

7368. Mobile Antennas FS

Yahoo group: ham4sale (2007 — 2015)
Date: 2013-01-06 01:06:18 UTC
From: Ken Simpson, W8EK
Topic: 7368 Message: 7368

Mobile Antennas For Sale:

HF, VHF, UHF, and multiband antennas,
plus a variety of antenna mounts

Hustler HF Mobile Antennas:

"Standard" Hustler resonators (400 Watt):
75 meter resonator RM-75 $19
15 meter resonator RM-15 $14

Hustler mobile mast:
Hustler MO-3.5 mobile mast.
Hustler makes the MO-3 mast for use with their series of mobile HF resonators. They also make an MO-4. The MO-3 is 54 inches long, and the MO-4 is a "shorty" only 22 inches long. This particular mast has been modified and is between the two -- it is 34 inches long. It would be ideal if you have the room for slightly more length than the MO-4, but not enough for the MO-3. Of course this one would result is more efficiency than the MO-4. $18

Mobile Antenna Mounts:

Large, heavy duty magnetic mount
This large mag mount will take any antenna with a standard 3/8 inch 24 thread connector. It is very heavy duty, about 5 inches in diameter, with a long coax for $22.

BNC Magnetic Mount
This mag mount has a BNC connector on the top of it, and a BNC connector on the coax. Among other things, it can be used to put a BNC rubber duck outside on the roof of your car, instead of using it inside the car on your HT. I think this is really what it was designed for. It is in nice condition. $20

Larsen PO-MM mobile magnetic mount:
This is a mobile mount that takes antennas with a PL-259. Coax is included. This one works great. $25

NMO "Button" Mount
This mount fits into a 3/4 inch hole, and will then take any of the many NMO types of antennas. Coax included.
It looks to be in new condition. $12

NMO-MM Magnetic Mount
For use with any of the Larsen, Motorola, and many others that use the NMO Mount. This is a magnetic mount with a good strong magent, coax, and PL-259 connector. $18

NMO-TLM Trunk Lip Mount
For use with any of the NMO type of antennas, this is a trunk lip mount, with a short coax. $10

Ten Meter Mobile Antennas:

All of these are vertical mobile antennas for the 10 meter band. Unless listed otherwise, all are for what is normally called an "Antenna Specialists" mount, which is sort of a reversed PL-259 type of connection. All have a spring just above the coil, at the bottom of the whip. All are about 3 to 3.5 feet long. I have checked each with an antenna analyzer, to determine resonant frequency. I am sure that mounting and surrounding objects might shift this frequency slightly, but they are adjustable.

Antenna Incorporated - 28.8 MHz - $15

Unknown brand (might be Antenna Specialists) 28 MHz
$15

Unknown brand (might be Antenna Specialists) 29.2 MHz
$15

Magnetic Mount, with antenna, coil, and mag mount as one unit.
About 18 feet of coax, with PL-259 connector.
Breaker brand, 28.35 MHz, $25

VHF Triband Mobile Mag Mount Antenna:

This mobile antenna is a VHF Triband antenna covering the 6 meter, 2 meter, and 440 MHz ham bands. This makes it ideal for some of the newer multiband and dual band rigs available today.

The antenna is on the order of 3 feet long and has a very strong magnet. It has a long coax cable with a PL-259 connector.

It works great, and looks very close to new. $75

Comet "Impulse" Z-780 dual band mobile antenna:

The Comet Z-780 dual band is a 2 meter and 440 MHz mobile antenna. It is 5/8 wave center loaded on 2 meters providing 4.5 dB gain and 5/8 x 3 wave on 440 MHz providing 7.2 dB gain. VSWR 1.5 : 1 or less. This antenna can handle up to 150 watts.

The antenna is 5 feet high. The connector type is gold-plated
UHF PL-259 (for PO mount).

This particular antenna works fine and looks very close to
new. $60

Larsen PO-MM mobile magnetic mount:

This is a mobile mount that takes antennas with a PL-259 (such as
the Z-780 above). Coax is included. This one works great. $25

Buy both of the above for $80.

Larsen NMO type antennas
These provide about 3 db gain over a quarter wave, and are a
very rugged antenna. About 4 feet long.

NMO-150 - for use on 2 meters
This has been the standard of the industry for a very long time.
Coil only $12
Coil with whip $19

NMO-150 B for use on 2 meters
Same as NMO-150 above, but Black in color,
Coil only $15
Coil with whip $24

NMO-Q - Quarter wave whip for 2 meters
about 19 inches long. $10

NMO-50 for use on six meters
Quarter wave loaded antenna.
Coil only $12
Coil with whip $19

LM-150 for 2 meters
Similar to the NMO-150, but for the LM "Larsen Mount"
5/16 inch stud
Coil only $12
Coil with whip $19

Larsen NLA Type Mobile Antennas:

These antennas fit the Larsen NLA mobile mount, which is
a special mount made by Larsen.

Larsen NLA-150, 2 meter antenna, for Larsen NLA mount
Has about 3 db gain on 2 meters.

This one works fine and looks fine also.

Coil only, without whip (whip is hard to ship). $10
With four foot whip. $19

Larsen NLA-UHF coil for 440 MHz
This is the coil only for use on the amateur 440 MHz
band and UHF public service bands. Good condition. $10

Antenna Specialists 2 meter antenna
This is a 5/8 wave antenna with a "Gutter clip" type
mount. This is ideal for more portable or temporary
installations. Includes mount, coil, whip, and coax
with a PL-250 connector. $25

Mobile Magnetic Mount Antenna for 6 and 2 Meters:

There are no markings on this antenna indicating who made it,
but it has an extremely strong magnetic mount, complete with
coax and PL-259 connector. The antenna is about 4 feet long,
with a spring at the base of the antenna. It does not appear
that the coil at the base is removable.

Since there are no markings, I put it on the antenna analyzer.
The SWR is below 1.1 to 1 with no reactance at both 52 MHz,
and at 146.5 MHz, so apparently it is a dual band 6 and 2
meter antenna. Probably a 5/8 wave on two meters (which
would have about 3 db gain), and a quarter wave on 6 meters.
$30

Rubber Duck antennas for your HT:

All are for 2 meters, are in good condition,
and are $10 each, unless stated otherwise.

BNC - Original from Kenwood TH-215, about 5 inches long

5/16 inch threaded, as used by Motorola and others
Stubby - 4 inches long

Type F connector - 6.5 inches long

PL-259 connector - 6.5 inches long
HyGain 275, still in original packaging

PL-259 connector - Stubby - 4.6 inches long
Centurion, still in original package

BNC Stubby for 440 MHz, 3 inches long

Coax connectors and adapters:

Prices are per connector.
Several of each are available.
Most are unused.

SPECIAL: Buy 5 and take 10% off.
Buy 10 or more and take 20% off.

UHF Right angle 90 degree elbow connector $3

UHF double female "Barrel connector" $3

UHF "Bulkhead Connector" - Double female, as above, but for
mounting thru a window, siding, etc. about 3 inches long $6

UHF double male connector $3

UHF "T" connector with two female (SO-239) and one male
(PL-259) connection $5

Antenna adapter to fit the BNC connector on the HT
and provide an SO-239 connector that will permit
a PL-259 to be attached. (BNC male to UHF female) $5

UHF Male to BNC female $5

BNC male for coax cables
standard type $2
crimp on type $3

Chassis mount BNC female
square mount (uses 4 screws) $3
screw in type $3

BNC "T", two female and one male $3

I also have many other accessories available such as many
different types of microphones, HTs, HF, VHF and UHF rigs, HF
and VHF/UHF antennas, etc.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

From: cowbaybook
Topic: 7374 Message: 7374

Looking for an MFJ 1025 in working condition available to Vancouver Island BC. Will gladly pay shipping (of course, unless it is on Southern Vancouver Island where I can pick up).

A 1026 would work but I would use it with an external antenna.

Just got my HST rebate check and it is burning a hole in my wallet.

I have for sale 4 Motorola Visar microphones, all in near new shape, when our police service gave our club radios I bought up a bunch of microphones and have a few left over.

Description:

Motorola speaker microphone, model number NMN6196A. This mic fits the Visar series of radios. This is a water resistant compact speaker microphone; it has a push to talk button and clothing clip.

$35.00 each plus shipping or if you take all 4 will sell for $110.00 which will include shipping.

Please contact me directly at: flesnick@...

Thanks

Fred

I recently was reminded that I have 100+ feet of Rohn 25G in storage. There are one or two pointed top 9' sections in the mix. All of it is used & in decent shape.
The tower is located in middle Tennessee, near Lebanon (EM66). I can deliver within a reasonable distance of Lebanon.
Asking $500 for the lot, or trade for a Yaesu FT-857 or a late model Icom IC-706.

Thanks,

7378. Yaesu 301 D Radio Station and back Up radio 4 sale

Yahoo group: ham4sale (2007 — 2015)
Date: 2013-01-10 03:23:24 UTC
From: Walt Wilson
Topic: 7378 Message: 7378

I want to mention that I have a Station for sale with a backup radio. I will list the components for this now Vintage Radio Station in case anyone is interested.
Two each: Yaesu 301D 10-160 meter radios solid state with Digital Displays
Two Each: Matching Yaesu 301 Power supplies- one with Digital Clock
One each: Yaesu 301 External VFO
One Each: Yaesu 301 Antenna Tuner good for 500 watts RF
One Each :Yaesu Phone patch and wiring box
Two Each: Yaesu Desk Mics Model YD 844A
I have had all of it tested except the external VFO and the Phone patch.
This is at least one complete station minus the YO-301 D Oscilliscope . Plus you would have a spare radio and power supply with Desk Mic. At current real world selling prices for non perfect items cosmetically, this is easily a $1000 system. Discounted for those pieces not verified I would consider selling all of this for $600.00. Reasonable offers will be considered.
Thanks
KK4FAL

http://www.alibaba.com/product/nistru78-132972833-0/2012_digital_repeater_radio_mobile_repeater_BF_R1000_for_walkie_talkie.html

7387. FS: G.E. MPI Portable Radios

Yahoo group: ham4sale (2007 — 2015)
Date: 2013-01-15 02:24:11 UTC
From: train_radio_guy
Topic: 7387 Message: 7387

For sale are three General Electric MPI Portables, along with three drop-in chargers, & one leather case. The radios are capable of two channels, but only have one channel installed. They operate on UHF, and transmit at roughly two watts.

Although the NiCad batteries are no longer functioning, replacement batteries are available online. All three radios appear to be operating, when connected to an external 7.5v power supply. They will transmit to & receive from one another.

Since these radios are nearly 30 years old, they are being sold as-is.

Spec's:

- Band-split: UHF (403-512 MHz)
- Transmit Power: 2 watts
- Channel Capacity: 2 (1 installed)
- Battery Pack: 7.5v @ 600mAh (NiCad)

- Condition: Used, As-Is

--> Price: $ 30.00 obo

See it on Craigs List:
- http://rockford.craigslist.org/ele/3546295015.html

- -

- All prices are negotiable

Hello people!

For sale is presented Wouxun KG-UV6D GOLD EDITION for Sale!
You will not find on EBAY, and other marketplace!

The Gold edition package of Wouxun KG-UV6D consist of:

*1X Wouxun KG-UV6D transceiver(base unit) *****
2X 1700mAh baterypack
1X Dual slot charger 110V NA, 220V Euro, 240 Oceania, 220V UK (at customer choise)
1X Antenna Adapter(BNC)
1X Antenna Adapter(SL16)
1X Dual Band Antenna
1X External Microphone
1X Programming CD with USB cable
1X Car charger
**1X User manual, warranty card.

* ***
*Frequency Range Can Be Suitable For Different Countries or Areas**

Icom IC-7000; AT-200 pro auto tuner; Icom PS-125 power supply; Bencher CW key black base; Signalink USB for RTTY and PSK. Asking $1395.00 for all shipped lower 48. Every thing is in like new condition. This station was installed because with my medical conditions I could not go up or down stairs to the main base. I have worked the world just setting in the lazy chair in the living room with just 100 watts and a dipole. JV Staples KT4U

WIRELESS HEADSET for HAM RADIO FOR SALE
I have a JABRA Model GN9330e, BRAND NEW in box, Wireless Headset, with nesting docking station and charger for sale. This unit is converted to Ham Radio use. Resulting audio is outstanding, has W4GIW approval. Unit has one earphone and a noise canceling microphone and noise reduction receive. It operates on 1.9 GHz, DECT 6.0 encryption with 300 foot range. Some features are: headband style change, on-line indicator, battery charge indicator, battery replacement ability, mute switch, receive and transmit volume control and base visual indicator. Comes with manual, wall wort power supply, and additional instructions for ham radio use. Comes with cable for connection to your rig (YOU MUST TELL ME WHAT RADIO YOU ARE USING). Asking $230.00 including shipping. USPS MO or PayPal is OK. Contact me for cable data, additional questions, pictures or on the air demo. I love mine and would not do without it. 73,
Dan, W8KMX

7392. FS: New coils - 50 cents each

Yahoo group: ham4sale (2007 — 2015)
Date: 2013-01-20 20:39:55 UTC
From: Bry Carling
Topic: 7392 Message: 7392

FOR SALE - attention homebrewers QRPers and experimenters....

$10.00 package deal on 20 brand new coils and IF transformers. New in their original plastic
boxes and looking like they should as brand new coils in the package. These are mostly WORKMAN BRAND coils. Many of them are adjustable. While some are listed as video coils, they usually have an inductanc ethat is suitable for any type of RF signal.

I have over 200 of these coils and parts as listed at:
http://af4k.com/coils.htm

I don't have time to go through them all and pick specific coils for any buyer. Please don't ask. First come first served on the IFTs. Therefore the price is way below cost. They are priced to move and I don't have much ability or time to pick and choose. I will try where
possible, but you will not be disappointed.

Sincerely,

Bry AF4K

I'm doing some shack cleaning. Email me for photos of these keys (ad5x at arrl dot net).

TE-NE-KEY FT-817 Key: Plugs directly into the FT-817 microphone jack and uses the "up/down" lines for keying the radio. $29 shipped.

TE-NE-KEY Plug-In Key: Plugs directly into a 1/8" stereo key jack on any transceiver. $25 shipped.

TE-NE-KEY Mini-Key: This paddle is designed to hold with one hand while keying with the other hand. $22 shipped.

Arizona ScQRPion Paddle, assembled: $22 shipped US.

BullDog key: This is the original triangular-base version. Suction cups assure the key can be mounted on just about any surface. $18 shipped US.

From: Ken Simpson, W8EK
Topic: 7396 Message: 7396

Icom and related items For Sale --
HF transceiver, Power Supply, Clock, Speaker
Microphones, Speakers, Charger and DC Adapter,
Manuals, cables, and other Miscellaneous Items

Icom IC-738 HF transceiver:

This all band HF transceiver features a 500 kHz to 30
MHz general coverage receiver, and a built-in automatic
antenna tuner. 10 to 100 watts full duty RF output
SSB/CW/FM (40W AM). Double band stacking registers
store 2 frequencies along with modes in each band so
it can be used like 2 VFO's in one band. Ten electronic
'memo pads' are available for DX hunting or contests.
The frequency tuning resolution is 1 Hz. This is
particularly useful when dealing with AMTOR, PACTOR
and other digital modes. Other enhancements include:
PBT (Passband Tuning), Notch, RIT and XIT.
Requires 12 VDC at 20 amps.

Features:
All Mode
Analog S/RF Meter
160-10 Meters
1 Hz Tuning
All Mode Squelch
IF Notch
10 Hz Display
Automatic Antenna Tuner
Electronic Keyer
101 Memories

This one works 100%, and looks very close to new. Immaculate.
Paper work and original box are included for $575.

Icom PS-30 Deluxe Metered Power Supply:

The Icom PS-30 power supply is a deluxe supply that delivers
13.8 VDC at 25 amps. This power supply features a meter which
can be set to display amperage or voltage. Four outputs are
provided on the rear panel. Output 1 is a hard wired, high
amperage cable with the Icom standard 6 pin Molex plug.
Outputs 2, 3 and 4 provide low amperage 13.8 VDC output.
This power supply has a snap-out tilt bracket.
Size: 9.5 x 5 x 12.5 inches.

This particular supply works fine, and looks very close to new.

With paper work for $200.

MFJ 815 B Cross Needle Peak Reading HF Wattmeter:

The MFJ-815B cross-needle meter allows you to monitor both forward and reflected power, and SWR simultaneously. There are buttons to select either Peak or Average reading and power ranges of 200/2000 watts forward and 50/500 watts reflected. Frequency coverage is 1.8 to 60 MHz, so it covers 6 meters in addition to the HF bands, making it ideal for some of the new rigs that include 6 meters.
The peak reading function of this meter and meter light require external 12 V DC.

This particular unit works fine, and looks very close to new.
With paper work for $65.

HT Speaker Microphones:

All of these have the 3.5 mm and 2.5 mm plugs on them, as used by Icom, Alinco, Radio Shack, some Yaesu, and other HTs.

Radio Shack 19-310 speaker mic
This speaker mic fits most HTs that require the 3.5 mm and 2.5 mm plugs, such as Icom, Alinco, Radio Shack, some Yaesu, and others.
This one works fine and looks very close to new. $15

MFJ-284 Speaker Microphone
Fits most Icom, Yaesu, Alinco 560, Santec ST-20, and others.
It works great, and looks like new. $15

MFJ-287 Speaker Microphone
This fits the TH-21/31/41 series HTs, TH-205, TH-215, TH-415, as well as others. It has a 3 conductor 3.5 mm plug and a 2 conductor 2.5 mm plug.
It works fine, and looks close to new. $15

Communications Speaker:

Realistic 21-549 A
This one is about 4 inches square but only about 2 inches deep. It is rated for 5 watts, has an 8 ohm impedance, and is listed as a 300 to 3000 Hz frequency response, making it ideal for communications. 3.5 mm (1/8 inch) mono plug. It is black in color, looks great, and sounds great. $18

Icom Battery Charger:

Icom BC-127 A, Battery Charger for Icom IC-Q7A Dual Band HT:
This charger charges two AA NiCads (or NiMH) for the IC-Q7 A Dual band HT, and Icom R-2 receiver, and probably others.

This appears to be new, unused, still in its bag.
Icom lists them at $21. Buy this one for $12.

Icom DC adapter:

Icom DC-25
This is a pack that is used on the Icom µ2AT, Icom µ4AT, and
on other HTs that use the BP-20, BP-21, BP-22, BP-23 and BP-24
battery packs. It takes 13 V DC (such as from a cigarette
lighter), and converts it to the 9.4 V DC voltage needed for
the HT. It is used in place of a battery. This one works
fine and looks fine. $18

CW Key and Keyer cables:

Cable for straight key
About 3 feet long, with a mono 1/8 inch (3.5 mm) phone
plug on it, as used with a straight key. $5
As above, but 1/4 inch plug. $5

Cable for paddles
About 3 feet long, and with a 1/8 inch (3.5 mm) stereo
connector on the end, like used by most rigs. $8
As above, but 1/4 inch plug. $8
As above, with 1/4 inch GOLD plated plug. $15

ORIGINAL Icom operating manuals:

Please note that all of these are original Icom manuals
and are not copies. All are in very good condition.
These are original manuals only.

Mobile transceiver manuals:
IC-22 S, 2 m FM transceiver $12
IC-28 H, 2 m FM transceiver $12
IC-281 H, 2 m FM Transceiver $12
IC-2350 H, Dual Band FM transceiver $15
IC-3200 A/E, Dual Band FM Transceiver $15

Other Icom manuals:
BC-30 Desk Charger $5
BC-35 Desk Charger $7
BP-2, BP-3, BP-4, BP-5 battery packs $3
BP-21, BP-22, BP-23, and BP-24 Batteries $3
DC-1 DC pack for IC-2 AT series HTs $4
HM-8 Hand Microphone, w/schematic $5
IC-3 PA Power supply / speaker $10
UT-16 Voice Synthesizer $5

These are original manuals only.

I also have many other accessories available such as many
different types of microphones, HTs, HF, VHF and UHF rigs, HF

and VHF/UHF antennas, etc.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

7398. FS: Military Comms Crystal Box

Yahoo group: ham4sale (2007 — 2015)
Date: 2013-01-25 11:44:45 UTC
From: Bry Carling
Topic: 7398 Message: 7398

For Sale:

Signal Corps crystal boxes - will hold up to 120 type FT243 or FT241 radio crystals
in a convenient, oirganized case that lets you find them quickly and easily.

The piano hinges and all aspects of the case are in excellent shape. These have latching
covers and felt pad liners in good condition.

First type is the familiar CS137 crystal case - excellent condition.
The dimensions are 11" x 4.35" x 3". A picture of a similar one may be found here:

http://www.bwgsurplus.com/web/sc_misc/cs137.jpg

Second type is a more flat-looking BX40 crystal case also in excellent condition. It has
one
flat tray of crystals. This is a rather rare and military excellent case. The lid and piano
hinge
and all other aspects of this case are in excellent shape.
Dimensions are: 11" X 8" X 2"
Picture of a similar one can be found at this web site:

http://af4k/com/imag/ham/bx40.jpg

E-mail me to arrange purchase or see:
http://www.af4k.com/miscpart.htm

7400. FS: Pair of nice CBS 6L6GC tubes

Yahoo group: ham4sale (2007 — 2015)
Date: 2013-01-25 14:54:30 UTC
From: Bry Carling
Topic: 7400 Message: 7400

FS: Pair of nice 6L6GC tubes

CBS - Made in USA. These work fine and they test at over 100% on my Sencore TC142 tube tester. They look like new except the pin locators on the bottom are broken off. This is no big
deal. You just take care to line them up properly when plugging thenm in and they will do fine. They will be carefully packed for safe shipment.

Will sell the pair for $12.00 plus shipping.

Regards - Brian Carling

7401. Mobile antennas FS

Yahoo group: ham4sale (2007 — 2015)
Date: 2013-01-26 13:01:44 UTC
From: Ken Simpson, W8EK
Topic: 510 Message: 7401

Mobile Antennas For Sale:

HF, VHF, UHF, and multiband antennas,
plus a variety of antenna mounts

Hustler HF Mobile Antennas:

"Standard" Hustler resonators (400 Watt):
75 meter resonator RM-75 $19
20 meter resonator RM-20 $16
15 meter resonator RM-15 $14

Hustler mobile mast:
Hustler MO-3.5 mobile mast.
Hustler makes the MO-3 mast for use with their series of
mobile HF resonators. They also make an MO-4. The MO-3
is 54 inches long, and the MO-4 is a "shorty" only 22
inches long. This particular mast has been modified and
is between the two -- it is 34 inches long. It would be
ideal if you have the room for slightly more length than
the MO-4, but not enough for the MO-3. Of course this
one would result is more efficiency than the MO-4. $18

Mobile Antenna Mounts:

Large, heavy duty magnetic mount
This large mag mount will take any antenna with a standard
3/8 inch 24 thread connector. It is very heavy duty, about
5 inches in diameter, with a long coax for $22.

BNC Magnetic Mount
This mag mount has a BNC connector on the top of it, and a
BNC connector on the coax. Among other things, it can be
used to put a BNC rubber duck outside on the roof of your
car, instead of using it inside the car on your HT. I think
this is really what it was designed for. It is in nice
condition. $20

Larsen PO-MM mobile magnetic mount:
This is a mobile mount that takes antennas with a PL-259.
Coax is included. This one works great. $25

NMO "Button" Mount
This mount fits into a 3/4 inch hole, and will then take any
of the many NMO types of antennas. Coax included.
It looks to be in new condition. $12

NMO-MM Magnetic Mount
For use with any of the Larsen, Motorola, and many others that use the NMO Mount. This is a magnetic mount with a good strong magent, coax, and PL-259 connector. $18

NMO-TLM Trunk Lip Mount
For use with any of the NMO type of antennas, this is a trunk lip mount, with a short coax. $10

Ten Meter Mobile Antennas:

All of these are vertical mobile antennas for the 10 meter band. Unless listed otherwise, all are for what is normally called an "Antenna Specialists" mount, which is sort of a reversed PL-259 type of connection. All have a spring just above the coil, at the bottom of the whip. All are about 3 to 3.5 feet long. I have checked each with an antenna analyzer, to determine resonant frequency. I am sure that mounting and surrounding objects might shift this frequency slightly, but they are adjustable.

Antenna Incorporated - 28.8 MHz - $15

Unknown brand (might be Antenna Specialists) 28 MHz
$15

Unknown brand (might be Antenna Specialists) 29.2 MHz
$15

Magnetic Mount, with antenna, coil, and mag mount as one unit.
About 18 feet of coax, with PL-259 connector.
Breaker brand, 28.35 MHz, $25

VHF Triband Mobile Mag Mount Antenna:

This mobile antenna is a VHF Triband antenna covering the 6 meter, 2 meter, and 440 MHz ham bands. This makes it ideal for some of the newer multiband and dual band rigs available today.

The antenna is on the order of 3 feet long and has a very strong magnet. It has a long coax cable with a PL-259 connector.

It works great, and looks very close to new. $75

Comet "Impulse" Z-780 dual band mobile antenna:

The Comet Z-780 dual band is a 2 meter and 440 MHz mobile antenna. It is 5/8 wave center loaded on 2 meters providing 4.5 dB gain and 5/8 x 3 wave on 440 MHz providing 7.2 dB gain. VSWR 1.5 : 1 or less. This antenna can handle up to 150 watts.

The antenna is 5 feet high. The connector type is gold-plated
UHF PL-259 (for PO mount).

This particular antenna works fine and looks very close to
new. $60

Larsen PO-MM mobile magnetic mount:

This is a mobile mount that takes antennas with a PL-259 (such as
the Z-780 above). Coax is included. This one works great. $25

Buy both of the above for $80.

Larsen NMO type antennas
These provide about 3 db gain over a quarter wave, and are a
very rugged antenna. About 4 feet long.

NMO-150 - for use on 2 meters
This has been the standard of the industry for a very long time.
Coil only $12
Coil with whip $19

NMO-150 B for use on 2 meters
Same as NMO-150 above, but Black in color,
Coil only $15
Coil with whip $24

NMO-Q - Quarter wave whip for 2 meters
about 19 inches long. $10

NMO-50 for use on six meters
Quarter wave loaded antenna.
Coil only $12
Coil with whip $19

LM-150 for 2 meters
Similar to the NMO-150, but for the LM "Larsen Mount"
5/16 inch stud
Coil only $12
Coil with whip $19

Larsen NLA Type Mobile Antennas:

These antennas fit the Larsen NLA mobile mount, which is
a special mount made by Larsen.

Larsen NLA-150, 2 meter antenna, for Larsen NLA mount
Has about 3 db gain on 2 meters.

This one works fine and looks fine also.

Coil only, without whip (whip is hard to ship). $10
With four foot whip. $19

Larsen NLA-UHF coil for 440 MHz
This is the coil only for use on the amateur 440 MHz
band and UHF public service bands. Good condition. $10

Antenna Specialists 2 meter antenna
This is a 5/8 wave antenna with a "Gutter clip" type
mount. This is ideal for more portable or temporary
installations. Includes mount, coil, whip, and coax
with a PL-259 connector. $25

Mobile Magnetic Mount Antenna for 6 and 2 Meters:

There are no markings on this antenna indicating who made it,
but it has an extremely strong magnetic mount, complete with
coax and PL-259 connector. The antenna is about 4 feet long,
with a spring at the base of the antenna. It does not appear
that the coil at the base is removable.

Since there are no markings, I put it on the antenna analyzer.
The SWR is below 1.1 to 1 with no reactance at both 52 MHz,
and at 146.5 MHz, so apparently it is a dual band 6 and 2
meter antenna. Probably a 5/8 wave on two meters (which
would have about 3 db gain), and a quarter wave on 6 meters.
$30

Rubber Duck antennas for your HT:

All are for 2 meters, are in good condition,
and are $10 each, unless stated otherwise.

BNC - Original from Kenwood TH-215, about 5 inches long

5/16 inch threaded, as used by Motorola and others
Stubby - 4 inches long

Type F connector - 6.5 inches long

PL-259 connector - 6.5 inches long
HyGain 275, still in original packaging

PL-259 connector - Stubby - 4.6 inches long
Centurion, still in original package

BNC Stubby for 440 MHz, 3 inches long

Coax connectors and adapters:

Prices are per connector.
Several of each are available.
Most are unused.

SPECIAL: Buy 5 and take 10% off.
Buy 10 or more and take 20% off.

UHF Right angle 90 degree elbow connector $3

UHF double female "Barrel connector" $3

UHF "Bulkhead Connector" - Double female, as above, but for
mounting thru a window, siding, etc. about 3 inches long $6

UHF double male connector $3

UHF "T" connector with two female (SO-239) and one male
(PL-259) connection $5

Antenna adapter to fit the BNC connector on the HT
and provide an SO-239 connector that will permit
a PL-259 to be attached. (BNC male to UHF female) $5

UHF Male to BNC female $5

BNC male for coax cables
standard type $2
crimp on type $3

Chassis mount BNC female
square mount (uses 4 screws) $3
screw in type $3

BNC "T", two female and one male $3

I also have many other accessories available such as many
different types of microphones, HTs, HF, VHF and UHF rigs, HF
and VHF/UHF antennas, etc.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

7402. FS: Yaesu FL2100Z

Yahoo group: ham4sale (2007 — 2015)
Date: 2013-01-26 13:06:03 UTC
From: Bry Carling
Topic: 7402 Message: 7402

FOR SALE: YAESU FL2100Z Linear Amplifier.

This is an HF linear amplifier rated for 1200W PEP input, and using two 572B triode tubes
Matches the FT-101Z and FT101ZD models and also the FT901, FT901DM, FT902 etc.
Will work great with any typical HF transceiver. I typically see 500-600 watts output on CW and 700 - 750 watts p.e.p. on SSB. All the advantages of a tube final in a compact package with built in AC power supply. Set for 120V AC.

Very few of these are still available, and many think of them as having some improvements over the older FL2100B etc. Very few of these excellent model amp are available.

Covers all 160m - 10m amateur bands including WARC. Working 100% and looks excellent inside and out. Has been cared for very well, in a non-smoking environment.

Has a brand new set of 572B tubes recently installed in it. They have about 2 hours on them.
Has full output per the manufacturer's specifications on all bands. You won't find a better example of this amplifier to go with your station. Clean as a whistle. If you have ever considered one of these now is your chance.

Pictures available on request.

Available for $595.00 plus shipping.

Brian Carling, AF4K

FOR SALE: Yaesu Landliner Speaker / Patch

Goes with the FT101 / FT101B or FT101E / EE / F series radios. Works fine and
can also be easily used with other Yaesu radios. It has built-in controls and a level meter
which is kind of cool.

Pictures are available on my web site (or will be later this evening)

http://af4k.com/radios.htm

Available for $75.00 plus shipping.

NO TIRE KICKERS, No PAYPAL or Western Union SCAMS PLEASE just good ol' cash or postal money orders only!
Will ship to N.America, shipping to be paid by Buyer, NO EXCEPTIONS So DONT ASK. All equipment is located in Canada. Package deals possible, only trade of interest might be a Panasonic CF-30 MK 3 Toughbook laptop computer. Thanks for reading my post.

7407. FS: BAGS of BNC connectors and adapters

Yahoo group: ham4sale (2007 — 2015)
Date: 2013-01-29 12:11:51 UTC
From: Bry Carling
Topic: 7407 Message: 7407

For Sale:
Three bags of BNC connectors and adapters.

Each bag contains 25 items - some new, some used, all in good usable condition.
There are 3 or 4 BNC T-adapters in each bag. There are also 3 or 4 terminators.
You will get a mix of plugs and also adapters to go to things like "F" connectors, PL259, sma etc. Cable end, chasis mount etc. There may also be one or two "F" splitters and other unlisted item,s but the vast majority of these items are BNC adapters and connectors.
A few are brand new, bagged or carded items still in their package. Several of the others are unused but not in a package. Some are used but in very good condition.

The three bags of BNC items are available for $12.50 per bag plus $6.50 for USA shipping.
Reply by e-mail if you would like to have one, or all of them.

Best regards - Brian Carling, AF4K

7408. Electric Radio magazine

Yahoo group: ham4sale (2007 — 2015)
Date: 2013-01-29 17:47:32 UTC
From: <W4RON@...>
Topic: 7408 Message: 7408

I have about 12 or 15 years of Electric Radio magazine
I'm thinking about selling.
I have 1998 through 2012 missing I think one issue.
There are several other years scattered through the
early 90s.
The book shelves are getting full and something has to go.
I also have a bunch of Antique Radio Classified but
I'm not sure anyone would be interested in them.

If you have any interest I'd really like to find
a new home for these, especially the issues of ER.
I know the magazine wants $3.75 for back issues, I'll
be much much cheaper than that.
Contact me directly if you're interested.

7412. FS: Hefty 50V AC at 13A transformer

Yahoo group: ham4sale (2007 — 2015)
Date: 2013-01-31 02:38:41 UTC
From: Bry Carling
Topic: 7412 Message: 7412

For sale:

Power Transformer. Wired for 120V AC primary, but can be rewired for 240V AC.

Secondary 1: 50V AC at 13A continuous. Comes with a bridge rectifier that produces 70V DC under no-load conditions. About 65 - 68V DC with a load. Also available - a suitable,
high-grade 9800 uF at 100V DC capacitor. Makes a complete, unregulated 68V DC supply with plenty of power.

Secondary 2: 120V AC at about 2 amps, unregulated. (isolated)

The above are conservative ratings. Weight is 34 pounds.
Dimensions approx: 7" X 6.5" X 5.25"
Clean, excellent condition. Comes with all mounting hardware.

QTY 1 available for $35.00 plus shipping.
Capacitor available for $4.00 with transformer.

7415. For Sale or Trade: Ameritron AL-800H HF Amplifier

Yahoo group: ham4sale (2007 — 2015)
Date: 2013-02-01 04:59:41 UTC
From: K F 5 O K T
Topic: 7415 Message: 7415

Ameritron AL-800H linear amplifier in outstanding condition, physically and electrically.

The top of the Ameritron line, in terms of power and value, this compact desktop powerhouse has been in regular use in my station and easily makes full legal limit (1,500 w +) with about 65 W of exciter drive.

This AL-800H has two matched 3CPX800-A7 pulse-rated power triodes which easily deliver legal limit (plus).

This amplifier has many great features, but best of all, outstanding power with reasonable `overhead' in a small `footprint'

I will sell this for $2,500.00 or I will trade for a good HF setup...

I am looking for a HF or HF/6m rig to use while my main one is off getting some service done. Let me know if you have an extra one for sale, I might end up keeping it around also if I like it better than my main one now.Would prefer one with a built in keyer, but that is not crucial.

Let me know the price shipped to Lawton, OK. I prefer to pay with paypal.

Motorola MT-1000 Modified UHF

* A very clean UHF 08/16 Channels 430 - 470Mhz *

. Unit has been bench tested and cleaned.

. Radio has been used previously, and may show some cosmetic wear but is fully operational. Great for Ham 440 and GMRS

. Included with radio, 1- Antenna, 1-Battery, 1- Charger . Battery condition/capacity is unknown.

* ***Thanks for reading. $55 Shipped CONUS ***Paypal Preferred*** * *

Thanks

Date: 2013-02-16 00:04:22 UTC
From: af5cc
Topic: 7437 Message: 7437

I have a Yaesu FT450AT (2008 model) in good condition that works fine. It comes with the power cord, hand mic, manual and box. I am looking to trade it for a Yaesu FT857D/897D/FT100D (late serial number) or Icom 706MKIIG. Let me know if you are interested, and we can work out the specifics. ALways taking cash offers as well.

7438. FS: McMurdo Silver 905-A sig tracer

Yahoo group: ham4sale (2007 — 2015)
Date: 2013-02-16 15:05:21 UTC
From: Bry Carling
Topic: 7438 Message: 7438

FOR SALE: McMurdo SIlver 905-A "SPARX" signal tracer from
1947. Includes probe. Fair to good condition. It's all there. Case handle is torn up.

I found an article available on this unusual goodie, with schematic if anyone is interested.
It's basically a small 3-tube audio amplifier with built-in speaker and 120V AC supply.

Not bad for $12.00 plus shipping.

7439. FS: MULTI-ELMAC AF67 Transmitter AM-CW

Yahoo group: ham4sale (2007 — 2015)
Date: 2013-02-16 18:37:58 UTC
From: Bry Carling
Topic: 7439 Message: 7439

FOR SALE: Multi-Elmac 60 Watts AM-CW, TUBE TRANSMITTER, Model AF67.

THE MULTI-ELMAC AF-67 Trans-Citer is a ten-tube variable frequency or crystal controlled seven band transmitter or exciter. It uses a really good "push-pull" plate modulation scheme with two 5881 modulator tubes.

All circuits are simultaneously switched to the desired band by a single bandswitch lever. Designed as a complete transmitter for mobile or fixed installations, or an exciter to drive a higher power transmitter. When used as an exciter the 500 ohm tap on modulation transformer can be used to drive the higher power modulators. The AF-67 Trans-citer employs a variable frequency oscillator with output on wither 1.75 to 2.0 Mc. or 3.5 to 4.0 Mc. In addition to the V.F.O. feature, two crystal positions are included for operation on two spot frequencies. Any crystal that will work straight through, double of quadruple to the desired frequency may be used. The oscillator circuit employs a voltage regulator tube to maintain the plate voltage at a constant level.
The multiplier stages are broad tuned with a front panel control for peaking the final grid, insuring best performance on all bands. The audio circuit is designed to use either a carbon microphone or a low output microphone such as a crystal or dynamic. A slide switch on the rear apron on the AF-67 Trans-citer sets up the circuit for use with either type of microphone. A reactance tube modulator is incorporated in the variable frequency oscillator circuit for narrow-band-frequency-modulation. The variable frequency oscillator dial scale is directly calibrated in megacycles for each of the amateur bands. The AF-67 Trans-citer is supplied complete with all tubes, viz: 6AK6 Oscillator, 6BJ6 Reactance Modulator, 6AG5 Buffer-multiplier, 6AQ5 RF Driver, 6146 Final RF Amplifier, 6AU6 Speech amplifier, 12AU7 AF Driver, Two 5881 PP Modulators, OB2 Voltage regulator

The AF-67 is designed for use with a resonant antenna coupled to its output with a transmission line of 50 to 300 ohms impedance. Other impedance or balanced lines can be coupled through the use of an antenna tuning device. When used as an exciter the coupling link of the high powered final can be directly connected to the AF-67 with a suitable length of coaxial cable. The MULTI-ELMAC AF-67 is designed for a maximum plate power input of 60 watts. Maximum ratings for this Trans-citer are 600 volts at 100 milliamperes; or 500 volts at 120

milliamperes. Full 100% modulation occurs when the modulator plate current swings to about 60% of the final plate current with normal voice frequencies.

The modulation transformer is provided with a 500 ohm output tap brought to the power plug for driving the grids of high powered modulators. The 5881's will deliver approximately 40 watts of audio with a plate supply of 500 volts.

Dimensions: 11 1/4 inches wide, 7 inches high, and 8 1/2 inches deep.
Weight: 18 pounds.

There are some good articles on maintaining and modifying the AF67 at some web sites. This one is unmodified as far as I know. Fairly good condition for its age, and is complete, with all original knobs etc.

One of these sold recently on eBay for $181.00

Will sell for only $99.00 plus shipping. Or next stop eBay.

Picture and details at:

http://af4k.com/radios.htm#AF67

7441. FS: GONSET VHF POWER AMPLIFIER 50 MHz

Yahoo group: ham4sale (2007 — 2015)
Date: 2013-02-17 19:10:28 UTC
From: Bry Carling
Topic: 7441 Message: 7441

For Sale: GONSET VHF POWER AMPLIFIER 50 MHz, model 3065.

Give your Six Meter Band Gooney Box / Communicator, or other radio a boost.

With 3 to 6 watts of drive power, it will run 90 - 100 watts when using AM, FM or CW modes, according to the manual. Uses two 826 power tubes and also has two 5U4GB rectifier tubes. Should you ever need them replacement tubes are easy to fin on eBay for anout $5 - 10 each. Has a built-in 120V AC power supply. AC power cord in great shape, and has all the original knobs. Will include a copy of the manual with schematic diagram. This amplifier is in
great condition, and works properly.

Pictures and details at:
http://af4k.com/radios.htm

One recently sold on the bay for $224.50

For the complete amplifier and manual, I'm asking $195.00 or best offer plus shipping.

7442. FS: Yaesu FT450 HF/6m radio

Yahoo group: ham4sale (2007 — 2015)
Date: 2013-02-17 20:40:36 UTC
From: John G.
Topic: 6061 Message: 7442

I have a Yaesu FT450 I am looking to sell. Bought it to use while my Icom 706 was going to be repaired, but the repair will cost too much so I will just use it as is.

The Yaesu FT450 is a 100 watt HF and 6m rig that does it all. It has IF-DSP so there are no filters to buy. The narrow CW and SSB filters are built in with the DSP A TCXO is standard for increased frequency stability. It has a built in voice keyer-just imagine hearing your melodious voice over and over again as it calls CQ for you! It also has a built in transmit monitor so you can hear how your transmitted voice will sound. Interfacing it for the digital modes is very easy due to the digital VOX that the rig has.

The 450 comes with the standard accessories-hand mic, power cord, box, and manual. I am the third owner of this rig, and it works fine. There are some scratches on the top and a couple on each side, but overall it looks ok and the faceplate looks good. Think how much fun you will have on HF with this, and on 6m once the summer Es season starts.

How much would you expect to pay for such a feature laden rig? $1000? Not even close! $750? No, still not that much. I am asking $480 plus shipping for it. It is a good think I teach Psychology because I must be insane to sell such a great rig for such a little amount. If you are interested, send me an email direct and I am sure we can always work out a deal. Trade offers are always welcome as well!

7443. HTs and HT Accessories FS

Yahoo group: ham4sale (2007 — 2015)
Date: 2013-02-18 17:00:21 UTC
From: Ken Simpson, W8EK
Topic: 7443 Message: 7443

HTs and HT accessories For Sale:

Yaesu VX-7 RS TriBand HT:

The Yaesu VX-7R is a triple band (6M, 2M & 440 MHz) HT with extensive receive coverage, and leading-edge features. The American version even transceives with 300 mW on the 220 band. Power output on 6 meters, 2 meters and 440 MHz is 5/2.5/1/0.5 watts. It receives the AM and FM broadcast bands, shortwave (AM), VHF and UHF TV audio, VHF Air and public service frequencies. This model features a rugged magnesium case with rubber bumpers and gaskets. Only 2.5 x 4 x 1.2 inches.

Features:
24 hour clock
900 Memories
changeable icons
weather alert
AM/FM
BCB AM band and full SW to 30 MHz
CTCSS/DCS
European Tone Burst
Wideband Receive
True Dual Receive
ARTS-Automatic In-Range Transponder
Backlit Keypad & LCD
Internet Key for Access to WIRES?

This one works 100%, looks very nice and includes the rubber duck with the 6 m extension, good battery, charger and paper work for $275.

Kenwood TH-235 Two Meter FM HT:

The Kenwood TH-235A Two meter HT has a large easy-to-read LCD, 60 channel memories with scanning and ten DTMF memories. Extended receive is 136-174 MHz so it includes the weather frequencies. When used on external DC power you will get a full 5 watts output. With the included PB36 battery pack, it produces 1.5 watts. The low power setting is 0.5 watts.

Features
Backlit LCD Display
60 Memories
Scanning

Battery Saver
Built-In CTCSS Encode
Extended Receive

This particular unit works 100% and looks like it just came out of the box new. It came from a silent key who I don't think ever used it. I added a new PB-36 battery, as the old one had been in the drawer long enough that it is not in good condition. This one includes the desk charger, rubber duck antenna, belt clip, and paper work for $95.

Cigarette lighter power cord for TH-235 above. $12

Heath HM-2141 Dual Meter VHF Wattmeter / SWR Bridge:

The HM-2141 is the VHF version of the more popular HM-2140 wattmeter and SWR Bridge, and has the same features, except it covers from 50 to 175 MHz.

This is the wattmeter that has two meters on it, so it reads both forward and reflected power at the same time. It also has a "Peak" position, so it can capture the peak power, in essence reading PEP output. Forward scales are 30 or 300 Watts, and reverse are 10 W or 100 W, plus SWR scale. It covers 50 to 175 MHz. It needs a 9 volt battery for "peak" operation. It has a remote sensor with about 3 feet of cable.

This particular meter works 100%. The outer case (top and sides) is black hammertone, and looks very nice.

With paper work for $85.

Icom BC-127 A, Battery Charger for Icom IC-Q7A Dual Band HT:

This charger charges the NiCads or NiMH for the IC-Q7 A Dual band HT, and Icom R-2 receiver, and probably others.

This one appears to be new, unused, still in its bag. Icom lists them at $21. Buy this one for $10.

Accessories for Kenwood TH-205, TH-215, TH-225, TH-415, and other HTs in this series:

MFJ 287 Speaker Microphone This was used on a Kenwood TH-225 HT, but it also fits the TH-21/31/41 series HTs, TH-205, TH-215, TH-415, as well as others. It works fine, and the mic itself looks close to new, but there is SLIGHT deterioration of the cord from the Florida sun. $8

Kenwood Wrist Strap for TH-215, plus many other HTs. $4

Original Kenwood Rubber Duck antenna from TH-215. $10

BNC to PL-259 antenna adapter
Antenna adapter to fit the BNC connector on the HT and provide an SO-239 connector that will permit a PL-259 to be attached. This adapter can be used on any HT with a BNC connector. $5

Accessories for the Kenwood TH-21 / 31 / 41 series HTs:

Antenna adapter that fits the TH-21 series HTs, and has a BNC on the other end. $10

Kenwood SC-8 T "Soft Case" for any of the TH-21 series HTs great condition $12

Original Operating manual for TH-21 HT for 2 meters $8

MFJ 287 Speaker Microphone
This was used on a Kenwood TH-225 HT, but it also fits the TH-21/31/41 series HTs, TH-205, TH-215, TH-415, as well as others. It has a 3 conductor 3.5 mm plug and a 2 conductor 2.5 mm plug. It works fine, and the mic itself looks close to new, but there is SLIGHT deterioration of the cord from the Florida sun. $8

Kenwood W09-0315 charger This charger is used to charge the larger PB-21 H batteries for the TH-21 series, and also on other Kenwood radios. It has a standard 2.1 mm coaxial connector. $12

Accessories for Realistic HTX-202, 2 meter HT:

DC cigarette lighter cord for the HTX-202. $12

Radio Shack 19-310 speaker mic
This speaker mic fits most HTs that require the 3.5 mm and 2.5 mm plugs, such as Icom, Alinco, Radio Shack, some Yaesu, and others. This one works fine and looks very close to new. $15

Rubber Duck antennas for your HT:

All are for 2 meters, are in good condition, and are $10 each, unless stated otherwise.

BNC - Original from Kenwood TH-215, about 5 inches long

5/16 inch threaded, as used by Motorola and others
Stubby - 4 inches long

Type F connector - 6.5 inches long

PL-259 connector - 6.5 inches long HyGain 275, still in original packaging

PL-259 connector - Stubby - 4.6 inches long Centurion,
still in original package

BNC Stubby for 440 MHz, 3 inches long

ANLI AL-800 dual band HT antenna

This is a telescoping antenna that pulls out to about a 3
foot length. If covers both 2 meters and 440 MHz, and has
a BNC connector on it. It is rated to have 3.2 dbi gain on
2 meters and 5.6 dbi gain on 440 MHz.
It appears close to new. These are $39 on Amazon.
Get this one for only $25.

HT Belt Clips and Wrist Straps:

Belt Clips:
All include the hardware with the belt clip and are $6 each.
Motorola
Yaesu FT-207

Wrist Straps for various HTs - $4 each
Kenwood TH-215 / 225 / 415, TR-2500, etc.
Kenwood TR-2400 Yaesu
FT-209

MFJ-287 Speaker Microphone
This fits the TH-21/31/41 series HTs, TH-205, TH-215, TH-415,
as well as others. It has a 3 conductor 3.5 mm plug and a 2
conductor 2.5 mm plug.It works fine, and looks close to new. $15

Communications Speaker:

Realistic 21-549 A

This speaker is about 4 inches square and about 2 inches
deep. It is rated for 5 watts, has an 8 ohm impedance,
and is listed as a 300 to 3000 Hz frequency response,
making it ideal for communications. It has a 3.5 mm
(1/8 inch) mono plug, as used by most modern rigs. It
is black in color, looks great, and sounds great. $17

Crystals for 2 meter ham rigs:

Does anyone have an older two meter ham rig and need crystals?

Maybe I can help. I have some 2 meter crystals available --
both transmit and receive. Most are in the 146 and 147 MHz
band segments, with very, very few in the 145 MHz segment,
and none in the 144 MHz segment. These are for ham rigs only,
and not commercial rigs.

These are all the small HC-25 crystals, like are used in most
of the solid state 2 meter mobiles and HTs. Please e-mail the
operating frequency you need. I have them listed by operating

frequency and rig,and not by actual xtal frequency. Send the frequencies you need (transmit or receive), and the rig that you have, and I will see if I can help. I have cross references for the various rigs, so I will know what you need if you give the rig.

Crystals are $6 each.

Two position coax switch:

B & W 550 A 2 Coax Switch

This coax switch will switch between two different coaxial cables, such as two antennas, or switch one antenna between two rigs. It has SO-239 connectors.

Although this one is an older switch, it is also more heavy duty, and will easily handle 1500 watts.

This one is in its original box, and obviously works well and looks great also. $22

HF and VHF SWR Bridge:

Royce 2-100 Single Meter SWR Bridge / Field Strength Meter

This unit covers from 3 to 150 MHz, covering HF, 6 meters,and 2 meters. SO-239 connectors in and out.

This one works fine, and looks extremely nice. I do not see any scratches on it, but it does have a previous owner's name on it.

In its original box with original instructions. $25

Coaxial Lightning Arrestor:

This lightning arrestor is made to be inserted in to your coaxial feedline, to help reduce lightning damage.

Cushcraft LAC-1
No markings on this to confirm the model number, but it looks like the Cushcraft "Blitz Bug". It has an SO-239 on one end and a PL-259 on the other end (female UHF on one end and male on the other).
Simply unscrew the PL-259 on your coax, insert this lightning arrestor, and you are all set. $10

Coax connectors and adapters:

Prices are per connector. Several of each are available. Most are unused.

SPECIAL: Buy 5 and take 10% off. Buy 10 or more and take 20% off.

UHF Right angle 90 degree elbow connector $3

UHF double female "Barrel connector" $3

UHF "Bulkhead Connector" -
Double female, as above, but for mounting thru a window,
siding, etc. about 3 inches long $6

UHF double male connector $3

UHF "T" connector with two female (SO-239) and one male
(PL-259) connection $5

Antenna adapter to fit the BNC connector on the HT and provide
an SO-239 connector that will permit a PL-259 to be attached.
(BNC male to UHF female) $5

UHF Male to BNC female $5

BNC male for coax cables standard type $2 crimp on type $3

Chassis mount BNC female square mount (uses 4 screws) $3
screw in type $3

BNC "T", two female and one male $3

I also have many other ham items available. Please e-mail
me if you have specific needs. I might be able to help you.

Prices do not include shipping from Florida.

Thanks.

7448. FS: Yaesu FT450 (revised ad and price)

Yahoo group: ham4sale (2007 — 2015)
Date: 2013-02-21 23:37:37 UTC
From: John
Topic: 7448 Message: 7448

I have a Yaesu FT450 I am looking to sell. Bought it to use while my Icom 706 was going to be repaired, but the repair will cost too much so I will just use it as is.

The Yaesu FT450 is a 100 watt HF and 6m rig that does it all. It has IF-DSP so there are no filters to buy. The narrow CW and SSB filters are built in with the
DSP. A TCXO is standard for increased frequency stability. It has a built in voice keyer-just imagine hearing your melodious voice over and over again as it calls CQ for you! It also has a built in transmit monitor so you can hear how your transmitted voice will sound. Interfacing it for the digital modes is very easy due to the digital VOX that the rig has. For you CW ops it has a built in memory keyer with 3 memories.

The 450 comes with the standard accessories-hand mic, power cord, and manual. Think how much fun you will have on HF with this, and on 6m once the summer Es season starts.

The top has some scratches on it that a previous owner tried to cover up with black paint. There are also some scratches on the sides from the mobile bracket. Everything works fine except for the headphones jack. It doesn't work. You can use the speaker jack for headphones, though, and the internal speaker works fine.

How much would you expect to pay for such a feature laden rig? $1000? Not even close! $750? No, still not that much. I am asking $450 plus shipping for it. It is a good think I teach Psychology because I must be insane to sell such a great rig for such a little amount. If you are interested, send me an email direct and I am sure we can always work out a deal. Trade offers are always welcome as well!

7449. a lot of equipment for sale

Yahoo group: ham4sale (2007 — 2015)
Date: 2013-02-24 04:26:11 UTC
From: John Miller
Topic: 7449 Message: 7449

Tough times force sale, this is a very short list of what's to come as I'm listing pretty much everything for sale selling down until I have just enough left to stay active with what I do. Prices do not include shipping, offers considered, can't trade at this time.

First, Kenwood TS-450SAT. It works fine, has been used mobile so has some scratches, has a minor display problem but doesn't effect operation or usability. Comes with power cord, $450 It works perfect I'd say it looks about a 7 or 8 out of 10, it's my backup HF rig for a couple years and I am the original owner who sold it a while back and it came back to me.

2 motorola GP300 hand helds, UHF, batteries are questionable at best, come with radio, speaker mic and desk chargers for each. One radio the internal speaker doesn't seem to work so it needs the speaker mic I haven't had a chance to check it. Asking $40 offers considered, the speaker mics alone should be worth that.

Kenwood TR-7850 2 meter mobile, works great but doesn't have the PL tone board in it. I bought one to wire in to it but never got a chance, looking at the manuals for the radio and comspec board I'll include it shouldn't be hard at all. Radio comes with mic and power cord, radio puts out full power. I even have the mobile bracket for it and believe it or not, if you can wait about a week, I have a second mobile mounting bracket I can throw in if you want it when I clean out my rented storage unit. Asking $65 for this. Would be a great project if you want to put the PL board in it, you could use it simplex with no PL board as I have, packet/APRS. Receive audio is great I can't remember hearing it from the transmit side but it's Kenwood it must sound great.

Kenwood TK-380 UHF hand held. This radio has wear, probably a 7 out of 10 in looks, works perfect. No battery, I can program if asked for $90.

LDG break out box, this box will take the accessory connectors on your Icom, Kenwood, Yaesu and probably other radios and give them RCA connectors instead so you can connect multiple accessories to them easily. I bought this brand new a few years ago and opened the box to look at it, other than that it's never been actually out of the box, never used and I don't even remember why I bought it now. $30

Kantronics KPC-3 Plus TNC, was in my go kit, go kit is being disassembled unfortunately, also had ideas of setting up a winlink gateway with this but budget killed that idea. TNC looks great, works great, I might even have the box for it in my storage unit which I'll be cleaning out later this week. The cables haven't even been made up, I used other cables from the past when I used this one. it's version 7.0. Asking $90. If bought with the TR-7850 above I may be persuaded to include the cable to connect the KPC-3 to it.

Primary equipment to be listed later and I'm sure more backups but I'm tired for now, if you know me and what I have and want something ask, want to take a shot in the dark that I have something ask I'm not in a position right now to refuse much though trades are definitely out.

7453. 8873 linear

Yahoo group: ham4sale (2007 — 2015)
Date: 2013-02-27 15:43:02 UTC
From: First L
Topic: 7453 Message: 7453

This is more an inquiry than an offer for sale. I will do that pending the results. I have a linear built with two, 8873 conduction cooled triodes. It is the one described in the ARRL handbook from many years ago.
It was built by an SK,(before becoming an SK!! [:))]), WA2CRI. He had a tendency to make stuff exactly like the article. I have never used it and it has been sitting in a basement for many years. It is dirty, but intact, and complete with power supply. As far as I know it works, with a little TLC.

The power supply is very heavy. So it would require local pick up from Brooklyn NY. I can make a formal posting for sale if there is an interest.
I'm not saying this is what I want, but the tubes alone would be worth a grand. I'd really love to see this in the hands of someone that can use it.
Thanks for reading this post:
AF2RF

I have four Motorola MT 1000 ht's for sale. They work fine but the batteries are shot. They also need antennas. I have a bank charger for them but it does not seam to be working right. It can be repaired!

I also have two Motorola Mocom 70 VHF low band radios. They can be connected together to build a very strong six meter repeater. The heads are there but need rewiring.

I am taking to the Elk City Hamfest in Elk City Oklahoma tomorrow March 2nd. I will let these go very cheap. Just need to clean out the shack.

7461. FOR SALE: MFJ 209 ANTENNA ANALYZER

Yahoo group: ham4sale (2007 — 2015)
Date: 2013-03-02 02:53:09 UTC
From: n3dg
Topic: 7461 Message: 7461

MFJ-209 SWR Analyzer is an easy to operate, versatile, metered test instrument for analyzing nearly any 50 Ohm RF System on frequencies between 1.8 and 170 MHz (160 thru 2 Meters) and can also be used as signal source.

The MFJ-209 combines three basic circuits: a wide range oscillator, a 50 Ohm RF Bridge, and a calibrated bridge unbalance indicator to synergistically allow measurement of the SWR (referenced to 50 ohms) of any load connected to the ANTENNA connector.

MFJ-209 is extremely versatile especially for measuring antenna, tuner, amplifier and tuned circuit resonance and can also be used to adjust or measure:

Antennas: SWR, Resonant Frequency, Bandwidth, Efficiency
Antenna Tuners: SWR, Frequency
Amplifiers: Input and Output Networks
Coaxial Transmission Lines: SWR, Velocity Factor, Losses, Resonance
Balanced transmission lines: Impedance, Velocity Factor, Resonance
Matching or tuning stubs: SWR, Resonant Frequency, Bandwidth
Traps: Resonant Frequency
Tuned Circuits: Resonant Frequency
Small Capacitors: Value
RF Chokes and Inductors: Self Resonance, Series Resonance, Value
Transmitters and Oscillators: Frequency

MFJ-209 is in Nice, Clean Condition at ONLY $100 (New Price is $160+).

7462. Yaesu FT-107M Station

Yahoo group: ham4sale (2007 — 2015)
Date: 2013-03-02 06:23:58 UTC
From: joseph.cawood
Topic: 7462 Message: 7462

I have a Yaesu FT-107M transceiver with matching FP-107E power supply, and comes with a YM-38 desktop microphone. The radio covers 160 to 10 meters (WARC included) in SSB, CW, AM and FSK modes. I will include the original service manual, and a printed copy of the operational manual. The radio was recently cleaned internally, and each control board was checked for component ware. Cosmetically the outside is a 9 / 10, and has a few scratches on the power supply trim. Overall the radio is a great piece for any shack.

The reason for the sale: I posted this radio earlier, but the sale fell through, and want to save up for a KX3. I am looking to get $500.00 for the station ($300.00 for the FT-107m, $150.00 for the FP-107E, and $50.00 for the YM-38). Good luck to all of interest.

Trades may be considered, depending on what is offered.

Joseph, KF7LPU
Blessings, 73s

7463. Heath and related items FS

Yahoo group: ham4sale (2007 — 2015)
Date: 2013-03-02 17:36:17 UTC
From: Ken Simpson, W8EK
Topic: 7463 Message: 7463

Heath Items For Sale - Code Practice Oscillator,
Vintage SWR Bridge, Wattmeters, Desk Mic, Phone
Patch, Speaker, Miscellaneous Parts, power supplies,
original manuals, and other miscellaneous items:

Additional original manuals have been added.

Heath HD-1416 code practice oscillator For Sale:

This is a small code practice oscillator that is
powered by a 9 volt battery. It has an internal
speaker, but also provisions for headphones.
The volume is adjusted on the front panel, with
the tone adjustable by an internal control. The
key connects to binding posts on the front panel.

This one works fine, and looks fine also. Paper
work is included for $20.

Heath AM-2 HF SWR Bridge:

This HF SWR Bridge matches the DX-40, although it can be
used with any HF transmitter. It is about 8 inches wide
and 4.5 inches high, with the meter in the middle, and a
gray colored knob at each side near the bottom. It covers
160 thru 2 meters and will handle full power.

This particular unit works fine and is in very good shape.

Paper work is included for $25.

Heath HM-2141 Dual Meter VHF PEP Wattmeter / SWR Bridge:

The HM-2141 is the VHF version of the more popular
HM-2140 wattmeter and SWR Bridge, and has the same
features, except it covers from 50 to 175 MHz.

This is the wattmeter that has two meters on it, so it
reads both forward and reflected power at the same time.
It also has a "Peak" position, so it can capture the peak
power, in essence reading PEP output. Forward scales
are 30 or 300 Watts, and reverse are 10 W or 100 W,
plus SWR scale. It covers 50 to 175 MHz, and also has
a battery test position (9 volt battery needed for "peak"
operation). It has a remote sensor with about 3 feet
of cable.

This particular meter works 100%. The outer case (top and sides) has been repainted black hammertone, and looks very nice.

With paper work for $90.

Heath HM-2102 VHF Wattmeter /SWR Bridge:

Heath HM-2102 VHF wattmeter, covering 50 to 160 MHz. Similar to the HM-102, but for VHF frequencies, with 250 and 25 watt scales. It can also be used to check SWR, and has a remote sensor that can either be left inside the meter, or separated from the actual meter by about 3 feet. SO-239 connectors in and out.
This particular meter works great, looks great, and includes paper work for $45.

Heath HM-102/HM-2102 Wattmeter Parts:

Outer clam shell cabinet (left and right sides plus top) that fits either of these wattmeters. This one is in extremely nice condition, with no scratches or blemishes. $12

Front panel and bottom of HM-2102 VHF Wattmeter
Great condition with no blemishes, and very nice crisp lettering. $12

Reflectometer Assembly for HM-2102 VHF Wattmeter
This is the complete reflectometer assembly, including the aluminum case, and the cable. $15

Heath HD-15 phone patch / digital interface:

This unit can be used to interface a sound card in a PC to your transceiver. It was originally designed to be used as a phone patch, but many have converted them to a digital interface.

This is the unit with the VU meter on the left and 3 knobs that match the SB series to the middle and right. Low or high Z output to the transmitter. The meter makes it great for setting levels.

This one is all original. It is in great condition. Paper work included for $22.

I also have parts from a Heath HD-15 phone patch available. Outer cover and knobs are gone. What do you need?

Communications Speakers:

Realistic 21-549 A
This one is about 4 inches square but only about 2 inches deep. It is rated for 5 watts, has an 8 ohm impedance, and

is listed as a 300 to 3000 Hz frequency response, making it ideal for communications. 3.5 mm (1/8 inch) mono plug. It is black in color, looks great, and sounds great. $18

Vanco SPB-5
Appears to be the same at above, but with a Vanco label. Also includes gimbal mount. $15

Astatic D-104 "Lollypop" Desk Microphone:

The D-104 is a high impedance microphone that matches many of the older rigs, and is often seen pictured with them. It looks somewhat like a giant chrome plated lollypop, stuck into a gray base. The chrome PTT switch is a bar that is parallel to the "stick" of the lollypop.

This particular D-104 works fine and is in good condition. With paper work for $60.

Coaxial Lightning Arrestor:

This lightning arrestor is made to be inserted in to your coaxial feedline, to help reduce lightning damage.

Cushcraft LAC-1
No markings on this to confirm the model number, but it looks like the Cushcraft "Blitz Bug".
It has an SO-239 on one end and a PL-259 on the other end (female UHF on one end and male on the other).
Simply unscrew the PL-259 on your coax, insert this lightning arrestor, and you are all set. $10

Miscellaneous Heath Parts:

I have many Heath SB-630 Station Console parts available. Most of the internal parts are available, but no clock. Front panel and outer case are gone, but reflectometer assembly, switches, etc. are still available.
Please let me know what you need.

I also have parts from a Heath HD-15 phone patch available. What do you need?

"Wall Wart" Power Supplies:

All of these are "regular" wall warts - not the new switching type that create all sort of noise in your receiver. Use one of these, and leave the noise behind.

Heathkit "Converter / Charger"
9 Volts DC at 100 ma.
No Heath number on this, and I don't know what it was used on originally. It can be used either as a 9 Volt DC "power

pack" or as a charger. It has a 2.5 mm male plug on it, with the tip positive, so it can be used on many devices. $10

9 Volt DC at 500 ma
This one was used on a MFJ 422 keyer, but will also power other items needing 9 V DC at low current. It has a 2.5 mm male plug on it, tip positive. $12

AEA AC-1
This unit supplies 12 V DC at up to 1 amp.
It has a 2.1 mm coaxial power plug, with the center positive, so it can be used on many different things that require about 12 V DC at up to an amp. $14

Power Supplies:

Radio Shack 22-124 Regulated Power Supply

This supply is regulated and will furnish 13 V DC at up to 2.5 amps. It is ideal for the lower powered 2 meter rigs, or to get rid of that huge collection of wall warts.

This one works fine and looks extremely nice.
I do not find a scratch on it. $20

Surge Station and Noise Filter:

This unit is still in its Radio Shack (#61-2327) box, never used. It says it is for a notebook computer, but it can be used with anything. It has connections for a computer network (LAN, RJ-45 connector), the AC power, and for phone lines (RJ-11 connector), and provides noise filtering and surge suppression on each. It even includes $25,000 insurance against surges. Maximum power rating is 1875 Watts, or 15 amps. Noise filtering is listed at 40 db.

This unit is new, in its original box, with its original paper work. $20

ORIGINAL Heath manuals:

These are original manuals only, for Heath equipment.
They are in very nice condition. Schematic is in the book.

Brochure "Heathkit Specials" featuring the
Twoer, Sixer, SB series, and others. $4

How to Understand and use your VTVM
Spiral Bound Educational series, $8

GD-600 Photoelectric Light Switch, 1972, $5

HD-1234 Coaxial Switch, 1972, $5

HD-1426 Relative Field Strength Meter, 1977, $5

HD-1481 Remote Coax Switch, 1984, $8

HM-15 Reflected Power and SWR Bridge, 1965, $5

HM-102, HF Wattmeter, $8

HW-2021 2 meter HT, 1975, No check marks $9

ID-1290 Weather Station, $10

IM-11 VTVM, $8

IM-36 Transistor Tester, $6

IM-5284 Multimeter, 1977, $8

These are original Heath manuals only.

Rubber Duck antennas for your HT:

All are for 2 meters, are in good condition,
and are $10 each, unless stated otherwise.

BNC - Original from Kenwood TH-215, about 5 inches long

5/16 inch threaded, as used by Motorola and others
Stubby - 4 inches long

Type F connector - 6.5 inches long

PL-259 connector - 6.5 inches long
HyGain 275, still in original packaging

PL-259 connector - Stubby - 4.6 inches long
Centurion, still in original package

BNC Stubby for 440 MHz, 3 inches long

ANLI AL-800 dual band HT antenna
This is a telescoping antenna that pulls out to about a 3
foot length. If covers both 2 meters and 440 MHz, and has
a BNC connector on it. It is rated to have 3.2 dbi gain on
2 meters and 5.6 dbi gain on 440 MHz.
It appears close to new. These are $39 on Amazon.
Get this one for only $25.

Radio Shack 20-006 A
This antenna is just over 2 feet in length when fully
extended. Radio Shack does not give it any gain rating,
and I don't know if I would trust those ratings anyhow.
It is safe to say it performs better than a rubber duck
antenna. This one will cover 6 m, 2 m , 220 MHz and
440 MHz. BNC connector. It is actually in its original
bag with original paper work. $15

I also have many other accessories available such as many different types of microphones, HTs, VHF and UHF rigs, HF and VHF/UHF antennas, etc.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

7464. National NCX-5 Station Working , NCX-A, Original Box + Calibrator + Mike + Manua

Yahoo group: ham4sale (2007 — 2015)
Date: 2013-03-02 18:56:45 UTC
From: w6adv
Topic: 7464 Message: 7464

I have a nice restored National NCX-5 station with NCX-A power supply, original box, mike, bracket and calibrator. Condition is excellent.

This was a dream radio with very accurate mechanical digital readout. Having digital readout in 1964 was a fantasy of most hams, who typically worked with radios with 5 KC dila markings. It was very expensive in its day, so production was limited.

Having the original box from 1964 amazing, so I am not giving the station away to someone who is just looking to flip it.

The items are packed for shipping.

Asking $500 OBO

Email me for photos

Thanks,

Craig

FS: Yaesu FT-450D (dsp & internal atu) HF+ 6

Selling my lightly-used FT-450D because it's lightly used!

It includes what came new, the rig in excellent condition, mic,
manual, box.

This is a really nice rig, check the reviews. They are nine-hundred
twenty-nine new at universal radio.

Asking $825. plus the actual cost to ship (Or, I can deliver to the
Charlotte, NC fest this weekend or the Greater Houston/BVARC Fest the
end of the month.)

7473. FS: Pair of Cetron 572B Tubes

Yahoo group: ham4sale (2007 — 2015)
Date: 2013-03-08 14:09:03 UTC
From: Bry Carling
Topic: 7473 Message: 7473

FOR SALE: Pair of Cetron 572B / T160L Tubes

These are older tubes but they continue to last and last. Made in USA power tubes are getting hard to find. These are tested, working used tubes. They come with tube boxes that will protect them during shipping and will be packed very carefully for safe trans-shipment.
I ran them in a FL2100Z with minimum 350 watts carrier out from the pair on all HF bands.
I guarantee you will get good owrking tubes. Pictures are available on request.

There is a pair on the Bay right now for $165.00 which seems excessive.
Will sell the pair for $99.00 plus shipping.

73 - Brian Carling, AF4K

7474. Kenwood and related items FS

Yahoo group: ham4sale (2007 — 2015)
Date: 2013-03-08 00:14:48 UTC
From: Ken Simpson, W8EK
Topic: 7474 Message: 7474

Kenwood and related Items For Sale:

Two meter FM HT, DTMF Microphone, speakers, chargers
and other HT accessories,desk and hand microphones,
original Kenwood manuals, Coax connectors, etc.:

Kenwood TH-235 Two Meter FM HT:

The Kenwood TH-235A Two meter HT has a large easy-to-read
LCD, 60 channel memories with scanning and ten DTMF
memories. Extended receive is 136-174 MHz so it includes
the weather frequencies. When used on external DC power
you will get a full 5 watts output. With the included
PB36 battery pack, it produces 1.5 watts. The low power
setting is 0.5 watts.

Features
Backlit LCD Display
60 Memories
Scanning
Battery Saver
Built-In CTCSS Encode
Extended Receive

This particular unit works 100% and looks like it just came
out of the box new. It came from a silent key who I don't
think ever used it. This one includes the desk charger,
rubber duck antenna, belt clip, and paper work for $100.
I added a new PB-36 battery, as the old one had been in
the drawer long enough that it is not in good condition.
So you get the HT with the normal accessories, plus a
desk charger, plus a new battery for $100.

Cigarette lighter power cord for TH-235 above. $12

Kenwood MC-48 B, DTMF Touch Tone Microphone:

This is a DTMF Touch Tone microphone with a 16 digit pad.
It works with most Kenwood rigs with the round, 8 pin
connector, such as TM-201, TM-211, TM-221, TM-231, TM-241,
TM-2530, TS-50, TS-430, TS-440, TS-570, TS-850, TS-870,
TS-930, TS-940, TS-950, TW-4000, etc. It will also work
with most Alinco and many Radio Shack rigs with the round
8 pin plug.

It has UP and DOWN switches and PTT, along with 16 digit
touch tone pad.

This one works 100%, looks great, and includes paper work
for $50.

Astatic D-104 "Lollypop" Desk Microphone:

The D-104 is a high impedance microphone that matches many
of the older rigs, and is often seen pictured with them.
It looks somewhat like a giant chrome plated lollypop,
stuck into a gray base. The chrome PTT switch is a bar
that is parallel to the "stick" of the lollypop.

This particular D-104 works fine and is in good condition.
With paper work for $60 plus shipping from Florida.

Accessories for the Kenwood TH-21 / 31 / 41 series HTs:

Special Antenna adapter that fits the TH-21 series HTs,
and has a BNC on the other end. $10

Kenwood SC-8 T "Soft Case" for any of the TH-21 series HTs
great condition $12

Original Operating manual for TH-21 HT for 2 meters $8

MFJ 287 Speaker Microphone
This was used on a Kenwood TH-225 HT, but it also fits
the TH-21/31/41 series HTs, TH-205, TH-215, TH-415, as
well as others. It has a 3 conductor 3.5 mm plug and a
2 conductor 2.5 mm plug. It works fine, and the mic
itself looks close to new, but there is SLIGHT
deterioration of the cord from the Florida sun. $8

Kenwood W09-0315 charger
This charger is used to charge the larger PB-21 H batteries
for the TH-21 series, and also on other Kenwood radios.
It has a standard 2.1 mm coaxial connector. $12

Accessories for Kenwood TH-205, TH-215, TH-225, TH-415,
and other HTs in this series:

MFJ 287 Speaker Microphone
This was used on a Kenwood TH-225 HT, but it also fits
the TH-21/31/41 series HTs, TH-205, TH-215, TH-415, as
well as others. It has a 3 conductor 3.5 mm plug and a
2 conductor 2.5 mm plug. It works fine, and the mic
itself looks close to new, but there is SLIGHT
deterioration of the cord from the Florida sun. $8

Kenwood Wrist Strap for TH-215, plus many other HTs. $4

Original Kenwood Rubber Duck antenna from TH-215. $10

BNC to PL-259 antenna adapter
Antenna adapter to fit the BNC connector on the HT and provide
an SO-239 connector that will permit a PL-259 to be attached.

This adapter can be used on any HT with a BNC connector. $5

Kenwood Hand Microphone with round 8 pin plug:

This hand mic works great on most Kenwood rigs with the
round 8 pin connector, such as the TS-430, TS-440, TS-570,
TM-241, TM-2530, TW-4000, and others.
It only says "Electret Condenser Mic" on it, with no
model number.

Basically, this mic is like an MC-43, only with a couple
more features. Of course it has the mic and PTT switch;
it also has up/down switches on the top. There are four
"extra" buttons labeled Call, VFO, MR, and PF. What these
four buttons do depends on the rig that it is attached to.
They will function on some rigs, and are completely useless
on others. There is also a "Lock" switch on the back.

Regardless if you use the four extra buttons or not, you
still have a mic that works like an MC-43.

This mic works fine, and looks like new. I am guessing it
came with a rig, and was immediately put in the drawer. $30

DTMF Touch Tone Microphones:

CES 610 L DTMF Touch Tone Mic
Can manually dial a number, or automatically store it in
the mic, and "speed dial". 12 digit touch tone pad on the
front. 8 pin modular plug (like computer LAN).
Looks to be new. $38

Johnson 250-0761-010 / CES 655 L DTMF Mic
It has a 12 digit pad on the front, and is a rugged mic.
Presently with 4 pin plug.
Looks to be unused. $38

Communications Speakers:

Realistic 21-549 A
This one is about 4 inches square but only about 2 inches
deep. It is rated for 5 watts, has an 8 ohm impedance, and
is listed as a 300 to 3000 Hz frequency response, making it
ideal for communications. It is black in color, looks great,
and sounds great. 3.5 mm (1/8 inch) mono plugs. $18

Vanco SPB-5
Appears to be the same at above, but with a Vanco label.
Also includes gimbal mount. $15

Coaxial Lightning Arrestors:

These lightning arrestors are made to be inserted in to
your coaxial feedline, to help reduce lightning damage.

Cushcraft LAC-1
No markings on this to confirm the model number, but it
looks like the Cushcraft "Blitz Bug".
It has an SO-239 on one end and a PL-259 on the other end
(female UHF on one end and male on the other). $10

Operator's Manual for Kenwood (Trio) TS-440 S:

This is a quality reproduction with a "comb" binding
that has been done by one of the professional reproduction
houses. W7FG I think.

This one has a plastic protector on the front, and is
in very nice condition. It includes schematic diagrams.
$18

Original Manuals for Kenwood equipment:

All manuals are in very nice condition, for Kenwood equipment.
All are original manuals only.

Operating manual for TS-130 S/V HF xcvr $20
Operating manual for TM-2570/2550/2530 2 m xcvr $15
Operating manual for TW-4000 dual bander $15
Service manual for TW-4000 dual bander $20
Operating manual for TW-4100 dual bander $15
Operating manual for TH-21 HT for 2 m $8
Operating manual for TH-225, 2 m HT $12
Operating manual for TH-235, 2 m HT $15
Operating manual for TH-241/441/541 mobile FM transceivers
...For 2 m, 440 MHz, & 1200 MHz. $12
Operating manual for TM-221/421 mobile $15
Operating manual for TR-2400, 2 m HT $12
Service manual for TR-2600, 2 m HT $12
Operating manual for TR-7400, 2 m xcvr $8

Kenwood TM G-707 operating manual in Spanish:
Spanish version of the Operating Manual
for the TM G-707 dual band transceiver. New $10
All other manuals are English.

LF-30A Low Pass Filter $5
MC-30 & MC-35 hand microphones $5
MC-85 desk microphone $4
PB-1, PB-2, PB-3, & PB-4 battery packs $3
PS-6 power supply $6
SMC-24 speaker mic $4
SMC-25 speaker mic $4
SP-430 speaker $2
SP-820 Speaker $2

These are original Kenwood manuals only.

Coax connectors and adapters:

Prices are per connector.
Several of each are available.
Most are unused.

SPECIAL: Buy 5 and take 10% off.
Buy 10 or more and take 20% off.

UHF Right angle 90 degree elbow connector $3

UHF double female "Barrel connector" $3

UHF "Bulkhead Connector" - Double female, as above, but for
mounting thru a window, siding, etc. about 3 inches long $6

UHF double male connector $3

UHF "T" connector with two female (SO-239) and one male
(PL-259) connection $5

Antenna adapter to fit the BNC connector on the HT
and provide an SO-239 connector that will permit
a PL-259 to be attached. (BNC male to UHF female) $5

UHF Male to BNC female $5

BNC male for coax cables
standard type $2
crimp on type $3

Chassis mount BNC female
square mount (uses 4 screws) $3
screw in type $3

BNC "T", two female and one male $3

I also have many other accessories available such as many
different types of microphones, HTs, HF, VHF and UHF rigs, HF
and VHF/UHF antennas, and many miscellaneous accessories.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

7475. REDUCED - TWO GONSET 6m AM RIGS

Yahoo group: ham4sale (2007 — 2015)
Date: 2013-03-08 14:39:11 UTC
From: Bry Carling
Topic: 7475 Message: 7475

REDUCED GONSET 6 Meter Amplifier AND ADDED Collector Condition Gonset G50 AM TRANSCEIVER

1) First the new offering - a really nice clean Gonset G50 VHF AM-CW Transmitter-Receiver. A much sought-after base rig for antique radio lovers! EXCELLENT CONDITION. Restored and tested. Supplied with a PDF manual.

Frequency Range: 50.00 - 54.00 MHz (VFO or crystal (f/6) controlled)

Mode: AM with RF power output of 27W (48W DC input)

Selectivity: 6db at 7kc

S+N/N: 6db with 2uV input

12 Tubes:
V1 6AU6 Transmitter VFO tripler
V2 6AQ5 Transmitter frequency doubler
V3 6146 Transmitter power amplifier
V4 12AX7 Transmitter microphone amplifier & transmitter/receiver audio amplifier
V5,V6 6L6GB Transmitter modulator & receiver audio power amplifier
V7 6BZ6 Receiver RF amplifier
V8 6U8 Receiver 1st mixer & oscillator
V9 6BE6 Receiver 2nd converter
V10 6BH6 Receiver 455 kc IF amplifier
V11 6AV6 Receiver 2nd detector, AVC protector, and receiver 1st audio amplifier
V12 6AL5 ALC, squelch limiter
Power source: 117V AC

Full details and picture at web link below.
Available for $175.00 plus shipping

ALSO -

2) REDUCED: GONSET VHF POWER AMPLIFIER 50 MHz, model 3065.

Give your Six Meter Band Gooney Box / Communicator, or other radio a boost.

With 3 to 6 watts of drive power, it will run 90 - 100 watts when using AM, FM or CW modes, according to the manual. Uses two 826 power tubes and also has two 5U4GB rectifier tubes. Should you ever need them replacement tubes are easy to find on eBay for anout $5 - 10.00 each. Has a built-in 120V AC power supply. AC power cord in great shape, and has all the original knobs. Will include a copy of the manual with schematic diagram. This amplifier is in great condition, and works properly.

One recently sold on the bay for $224.50 - Was asking $179.00 for this one previously.

REDUCED PRICE for Gonset 6m Amplifier and manual, I'm asking $125.00 plus shipping.

Pictures and details of both pieces of Gonset gear at:
http://af4k.com/radios.htm

FJ-267 1.5KW Dry Dummy Load with SWR/Wattmeter DC to 60 Mhz

Asking $125.00 Including Shipping to standard US addresses (some locations may be extra).

Barely-used, as-new, includes an ac adapter & original dc cable.
(Change of plans. Getting a MFJ-998 so don't need this.)
"Precision, true peak-reading SWR/Wattmeter switchable to external antenna!
World's most versatile 1.5 kW dummy load has a built-in true peak reading SWR/Wattmeter that you can switch and use independently!
Tune up your transceiver, linear amplifier, or antenna tuner into a safe 50 Ohm dummy load at full power. Then instantly switch to your antenna and monitor SWR, forward, and reflected power.
Use for testing/tuning transmitters, transceivers, amplifiers, antenna tuners, baluns, transformers, filters, matching networks, coax, stubs, transmission lines, and antennas."

7484. Icom IC-901A

Yahoo group: ham4sale (2007 — 2015)
Date: 2013-03-13 17:56:04 UTC
From: k4idc
Topic: 7484 Message: 7484

I have an IC-901A with all the band modules (2m/70cm, 10m, 6m, 2m all mode, 1.25m, 23cm, wide band receiver) for sale.

Description: The display is in good condition, the buttons show some age. I think some of the buttons (key caps) are still available from Icom. Sometimes the M/S switch is intermittent. If that switch is still available from Icom I'd replace it prior to selling the rig.
The fiber optic cable doesn't work but I *believe* the fiber interfaces are fine. I bypassed the fiber optic cable with flat 6 conductor (as I recall) phone cable; works just fine. Some years ago I had to replace the 70cm antenna port cable. I used double shielded Teflon dielectric coax for that repair; no problems since. Another change I made was to splice a length of ribbon cable into one of the band module jumpers in order to be able to install the modules in a side by side stack of two.

If you're familiar with this radio, you know that the factory issued power distribution module did not come with enough outputs to supply all the band modules. A friend with another complete 901A & I modified our power distribution modules to accommodate a fully loaded 901, using the proper power connectors from Icom.

I have original packaging for most of the rig, and the owner's manual and service manual, and probably a spare band module jumper or two.

I'm not interested in splitting up the rig, would rather sell the whole thing as a unit. $1000, bottom line. Shipping will be at the buyer's expense. Would consider trading toward semi-auto pistols in .22 long rifle, 9mm or .45ACP.
Email any questions to me via K4IDC at comcast dot net.

7485. tower, Tilt, Aluma 50', 2 Yaesu rotators standoff area code 321 remainder below

7487. FOR SALE: MFJ 209 ANTENNA ANALYZER

Yahoo group: ham4sale (2007 — 2015)
Date: 2013-03-14 10:41:09 UTC
From: n3dg
Topic: 7461 Message: 7487

MFJ-209 SWR Analyzer is an easy to operate, versatile, metered test instrument for analyzing nearly any 50 Ohm RF System on frequencies between 1.8 and 170 MHz (160 thru 2 Meters) and can also be used as signal source.

The MFJ-209 combines three basic circuits: a wide range oscillator, a 50 Ohm RF Bridge, and a calibrated bridge unbalance indicator to synergistically allow measurement of the SWR (referenced to 50 ohms) of any load connected to the ANTENNA connector.

MFJ-209 is extremely versatile especially for measuring antenna, tuner, amplifier and tuned circuit resonance and can also be used to adjust or measure:

Antennas: SWR, Resonant Frequency, Bandwidth, Efficiency
Antenna Tuners: SWR, Frequency
Amplifiers: Input and Output Networks
Coaxial Transmission Lines: SWR, Velocity Factor, Losses, Resonance
Balanced transmission lines: Impedance, Velocity Factor, Resonance
Matching or tuning stubs: SWR, Resonant Frequency, Bandwidth
Traps: Resonant Frequency
Tuned Circuits: Resonant Frequency
Small Capacitors: Value
RF Chokes and Inductors: Self Resonance, Series Resonance, Value
Transmitters and Oscillators: Frequency

MFJ-209 is in Nice, Clean Condition at ONLY $90 (New Price is $160+).

7488. Kenwood TS-680S

Date: 2013-03-14 13:35:01 UTC
From: George
Topic: 7488 Message: 7488

Read the description- receiver works great- transmitter only puts out about 30-40 watts according to the front panel meter when the transceiver is connected to a Heathkit Cantenna. It does not seem to make any difference where the power control is set. Could be used for lower power operation or you could fix it. Has a new looking microphone and new looking power cable.

Shipping by FedEx or UPS only.

I had intended to fix it but my health just won't let me now.

Email me at haynes.george@gmail for pictures.

Price $175.00 plus shipping.

US shipping ONLY !

If it doesn't sell in a week or so, it will go on evil-bay.

73,

george

7489. Yaesu FR-101 Receivers For Sale

Yahoo group: ham4sale (2007 — 2015)
Date: 2013-03-14 13:52:46 UTC
From: George
Topic: 7489 Message: 7489

I have Three- ASK Questions- I want you to be happy not disappointed. Tell me what pictures you would like to see. I bought all three without power cords so their condition was unknown. They all have scratches on the cases- use them as they are or re-paint them.

A:
First one is for parts or repair. Analog display-Powers up but no output. If you inject an IF signal after the first mixer, it seems to work. Power cord is not original. This one has a green case except for the bottom which is grey.

$75.00 plus shipping

Email me for pictures and with questions- haynes.george@...

B:
Second one is also analog- works- Power cord is not original. You may want to do an alignment.

$175.00 plus shipping

Email me for pictures and with questions- haynes.george@...

C:
Third one has the Digital Display and also works. Again power cord is not original. You may want to do an alignment.

$225.00 plus shipping.

Email me for pictures and with questions- haynes.george@...

Shipping is your choice- USPS Parcel Services, UPS, or FedEx. They are heavy!

US Shipping ONLY!

I will try to answer emails within one day.

If you don't like the price, make me an offer I can't refuse.

You pay shipping if you return any of them.

73,

george

Thanks for the interest,

George

7494. Icom 706 original used value or offers

Yahoo group: ham4sale (2007 — 2015)
Date: 2013-03-18 15:46:32 UTC
From: John G.
Topic: 7494 Message: 7494

I have an Icom 706 original (HF/6m 100 watts, 2m 10 watts) in decent physical shape with a couple of issues. The meter doesnt work on transmit, but works fine on receive. Also, on 12m and 15m the receive level sometimes drops down. It seems like a dirty relay. You click the mic button or key and it comes back to the normal level. It seems ok on the other bands. I have worked 223 countries with it in the past 2 years.

It has the hand mic, a short power cord with power pole connectors on it, and a copy of the manual.

Anyone care to guess about what such a rig is worth, or to make an offer on it?
73 John AF5CC

7495. For Sale Motorola Handie Talkie

Yahoo group: ham4sale (2007 — 2015)
Date: 2013-03-19 20:12:31 UTC
From: kd8mw
Topic: 7495 Message: 7495

Being sold is a vintage Motorola Handie Talkie FM Radiophone Model FHTRUIDL, Serial # 2360 with original carry case. TX Frequency 154.57 MHz. Included is radiophone, handset, antenna and carry case. There is rust in the battery compartment and may require some work, Pictures are available upon request off group. Best suited for Collectors. This is used vintage electronics sold as is and untested. $40 OBO plus shipping.

7496. Two meter and 440 MHz rigs and related items FS

Yahoo group: ham4sale (2007 — 2015)
Date: 2013-03-20 15:42:58 UTC
From: Ken Simpson, W8EK
Topic: 7496 Message: 7496

Two meter and 440 MHz rigs and associated items For Sale:

HTX-242 Two meter FM transceiver:

The HTX-242 Two-Meter Mobile Transceiver is a great
two meter rig, with many features.

Features include:
Auto Memory Store
45 Watt and 10 watt power settings
True FM Modulation
41 Memory Channels
Priority Memory Channel
Individually Programmable Repeater Offsets
Subaudible Tone on both Transmit and Receive (CTCSS)
DTMF Page with Group Calling
DTMF Transmit and Memory
Programmable Frequency Steps
Extended Band Coverage, receiving from 136 to 174 MHz
Dual VFO and Duplex Modes

This one works 100%, and looks extremely nice. It does have
tape around the mic cord near the connector to reinforce a
potential weak point. It is in its original box.

It includes the rig, power cord, DTMF touch tone mic, and
miscellaneous hardware, in the original box.
With paper work for $95.

Yaesu VX-7 RS TriBand HT:

The Yaesu VX-7R is a triple band (6M, 2M & 440 MHz) HT
with extensive receive coverage, and leading-edge features.
This American version even transceives with 300 mW on the
220 band. Power output on 6 meters, 2 meters and 440 MHz
is 5/2.5/1/0.5 watts. It receives the AM and FM broadcast
bands, shortwave (AM), VHF and UHF TV audio, VHF Air and
public service frequencies. This model features a rugged
magnesium case with rubber bumpers and gaskets.
Only 2.5 x 4 x 1.2 inches.

Features:
24 hour clock
900 Memories
changeable icons
weather alert
AM/FM BCB

AM band and full SW to 30 MHz
CTCSS/DCS
European Tone Burst
Wideband Receive
True Dual Receive
ARTS-Automatic In-Range Transponder
Backlit Keypad & LCD
Internet Key for Access to WIRES?

This one works 100%, looks very nice and includes the rubber duck with the 6 m extension, good battery, charger and paper work for $275.

Yaesu VX-5 R tri-band HT:

The VX-5 will cover the 6m, 2m, and 440 MHz ham bands, with receive almost from DC to light. Actually receive starts at the AM broadcast band, and goes to about 1000 MHz, so that means it includes all of the public service bands outside of the ham bands, weather, FM commercial, commercial TV, SW bands, and much more. Power output is up to about 5 watts, in 4 steps. Of course PL tones (encode and decode) are included, plus much, much more.

Features:
220 Memories
AM/FM BCB
CTCSS/DCS
Wideband Receive
Dual Watch
ARTS-Automatic In-Range Transponder
Backlit Keypad

This particular unit is in nice shape. It includes the things that came with it originally, including charger and Lithium Ion battery that seems to last forever. The rubber duck antenna is complete with the 6 meter "extension" that is often lost and not included. Of course it works fine.

With paper work for $190.

Kenwood TH-235 Two Meter FM HT:

The Kenwood TH-235A Two meter HT has a large easy-to-read LCD, 60 channel memories with scanning and ten DTMF memories. Extended receive is 136-174 MHz so it includes the weather frequencies. When used on external DC power you will get a full 5 watts output. With the included PB36 battery pack, it produces 1.5 watts. The low power setting is 0.5 watts.

Features
Backlit LCD Display
60 Memories
Scanning
Battery Saver
Built-In CTCSS Encode
Extended Receive

This particular unit works 100% and looks like it just came out of the box new. It came from a silent key who I don't think ever used it. I added a new PB-36 battery, as the old one had been in the drawer long enough that it is not in good condition. This one includes the desk charger, rubber duck antenna, belt clip, and paper work for $95.

Cigarette lighter power cord for TH-235 above. $12

Icom MB-17 A, Quick Release Mobile Mounting Bracket:

The Icom MB-17A "Quick Release" mobile mounting bracket fits the Icom 207, 281, 481, 800, 2100, 2200, 2340, 2350, 2410, 2700, 2710, 2800, and likely other rigs that are about 5 1/2 inches wide.

Since it is the "quick release" type where the rig just slides in, it likely can be used with many other rigs, made by many different manufacturers. This means you can use it with a Kenwood, Yaesu, Alinco, etc. in addition to Icom.

This particular unit is new, in its original box, complete with all hardware. $30

Radio Shack PRO 2051 Trunking Scanner:

This scanner will do it all! It has 1000 memories, and covers from 25 MHz thru 1300 MHz, and includes "Signal Stalker" and triple trunking. It can also function as a weather radio with full alerting capabilities. There are more scanning and searching facilities than one can imagine! Of course it covers the 6 meter, 2 meter, 220 MHz, and 440 MHz ham bands, but it does so much more.

This particular radio is in its original box. It appears that it was not used, but that the manual was examined. I have tested it and everything seems to work perfectly, although it has so many features I was not able to test everything. This is a terrific immaculate scanner!

Only $125.

Heath Wattmeters/SWR Bridges:

Heath HM-2102 VHF Wattmeter/SWR Bridge:
The HM-2102 is similar to the HM-102, but covering
50 to 160 MHz., with 250 and 25 watt scales. It can
also be used to check SWR, and has a remote sensor
that can either be left inside the meter, or separated
from the actual meter. SO-239 connectors in and out.
This particular meter works great, looks great, and
includes paper work for $45.

Heath HM-2141 Dual Meter VHF Wattmeter / SWR Bridge:

The HM-2141 is the VHF version of the more popular
HM-2140 wattmeter and SWR Bridge, and has the same
features, except it covers from 50 to 175 MHz.

This is the wattmeter that has two meters on it, so it
reads both forward and reflected power at the same time.
It also has a "Peak" position, so it can capture the peak
power, in essence reading PEP output. Forward scales
are 30 or 300 Watts, and reverse are 10 W or 100 W,
plus SWR scale. It covers 50 to 175 MHz. It needs a 9
volt battery for "peak" operation. It has a remote
sensor with about 3 feet of cable.

This particular meter works 100%. The outer case (top
and sides) is black hammertone, and looks very nice.

With paper work for $85.

Antennas for your HT:

All rubber ducks are for 2 meters, are in good condition,
and are $10 each, unless stated otherwise.

BNC - Original from Kenwood TH-215, about 5 inches long

BNC Connector about 7 inches long

5/16 inch threaded, as used by Motorola and others
Stubby - 4 inches long

Type F connector - 6.5 inches long

PL-259 connector - 6.5 inches long
HyGain 275, still in original packaging
-
PL-259 connector - Stubby - 4.6 inches long
Centurion, still in original package

BNC Stubby for 440 MHz, 3 inches long

ANLI AL-800 dual band HT antenna

This is a telescoping antenna that pulls out to about a 3
foot length. If covers both 2 meters and 440 MHz, and has

a BNC connector on it. It is rated to have 3.2 dbi gain on
2 meters and 5.6 dbi gain on 440 MHz.
It appears close to new. These are $39 on Amazon.
Get this one for only $25.

Radio Shack 20-006 A
This antenna is just over 2 feet in length when fully
extended. Radio Shack does not give it any gain rating,
and I don't know if I would trust those ratings anyhow.
It is safe to say it performs better than a rubber duck
antenna. This one will cover 6 m, 2 m , 220 MHz and
440 MHz. BNC connector. It is actually in its original
bag with original paper work. $15

I also have many other ham items available. Please e-mail
me if you have specific needs. I might be able to help you.

Prices do not include shipping from Florida.

Thanks.

7503. 10 meter equipment FS

Yahoo group: ham4sale (2007 — 2015)
Date: 2013-03-24 01:11:51 UTC
From: Ken Simpson, W8EK
Topic: 7503 Message: 7503

10 meter equipment For Sale:

Transceiver, antennas and related items

With 10 meters opening up more now, it is time to get
on the band!

Uniden President HR-2600 10 meter all mode transceiver:

Uniden’s Model HR2600 President 10-meter transceiver
features CW, LSB, USB, AM and FM modes for Amateur Radio
use, plus programmable CTCSS control tones for accessing
repeaters. Although it was designed primarily as a mobile
unit, it can also be used as a base station with a 5 amp
power supply.

This unit covers the entire 10 meter band, so you can operate
CW on the low end of the band, SSB a bit higher, or AM or
even FM. PL (subaudible) tones are included for FM repeater
use. Basically, this unit will do anything you want to do
on 10 meters.

This particular unit has no modifications. It functions just
as it should. Everything works 100%. It looks very good,
but does have a couple very minor scratches. It includes
the mobile mount which looks like new (possibly never used),
microphone with up/down switches, power cord, and paper work,
in its original box. It even has a pack of hardware with it,
just like a new one. There is even a CD with additional information
(service manual, etc.) on it. This is a terrific unit!

All of this for only $140.

Astatic D-104 "Lollypop" Desk Microphone:

The D-104 is a high impedance microphone that matches many
of the older rigs, and is often seen pictured with them.
It looks somewhat like a giant chrome plated lollypop,
stuck into a gray base. The chrome PTT switch is a bar
that is parallel to the "stick" of the lollypop.

This particular D-104 works fine and is in good condition.
With paper work for $60.

Ten Meter Mobile Antennas:

All of these are vertical mobile antennas for the 10 meter
band. Unless listed otherwise, all are for what is normally

called an "Antenna Specialists" mount, which is sort of a reversed PL-259 type of connection. All have a spring just above the coil, at the bottom of the whip. All are about 3 to 3.5 feet long. I have checked each with an antenna analyzer, to determine resonant frequency. I am sure that mounting and surrounding objects might shift this frequency slightly, but they are adjustable.

Antenna Incorporated - 28.8 MHz - $15

Unknown brand (might be Antenna Specialists) 28 MHz
$15

Unknown brand (might be Antenna Specialists) 29.2 MHz
$15

Magnetic Mount, with antenna, coil, and mag mount as one unit.
About 18 feet of coax, with PL-259 connector.
Breaker brand, 28.35 MHz, $25

HF Mobile Antennas:

All work fine and are in great cosmetic condition.

"Hamstick" Antennas:
Each antenna, when fully assembled and tuned, is about 7 feet long, in a slim design that does not catch much wind.
Each has a 3/8 inch, 24 thread stud on the base, so they fit a standard ball mount. No mast is required. Simply screw the antenna into the standard ball mount.
Each antenna covers a single band only.
These are true Lakeview original hamsticks and not one of the clones.
With paper work for only $20 each.
20 meter
10 meter
6 meter

Hustler HF Mobile Antennas:

"Standard" Hustler resonators (400 Watt):
10 meter resonator RM-10 $ 12

Hustler mobile masts:
MO-1 (folds about 14 inches above ball) $22
MO-2 (folds about 27 inches above ball) $22

Larsen 10 meter NMO type mobile antenna:

NMO-28 for use on ten meters
Quarter wave loaded antenna.
Coil only $12
Coil with whip $19

Larsen NMO-TLM Trunk Lip Mount
For use with any of the NMO type of antennas. This is a trunk lip mount, with a short coax. $10

Joymatch "Lo-z 500" Antenna Tuner:

This antenna tuner is manufactured by Partridge Electronics Ltd in England. It appears to be an "L" network with a 12 tap inductor and a single tuning capacitor. Apparently back in the 1960's or 70's Partridge made an antenna they called the Joystick. This is an antenna tuner that could be used with it, but of course it can be used with other antennas as well. It would appear to work on 80 thru 10 meters (including WARC bands). L networks only match impedances one direction, i.e. only lower than 50 ohms, or only higher than 50 ohms. You can change the direction of match by swapping the coax cables between the two SO-239 connectors.

I don't think the 500 means 500 watts. It looks more like it would handle 100 watts.

This tuner works fine and looks great. $50

MFJ 815 B Cross Needle Peak Reading HF Wattmeter:

The MFJ-815B cross-needle meter allows you to monitor both forward and reflected power, and SWR simultaneously. There are buttons to select either Peak or Average reading and power ranges of 300/3000 watts forward and 60/600 watts reflected. Frequency coverage is 1.8 to 60 MHz, so it covers 6 meters in addition to the HF bands, making it ideal for some of the new rigs that include 6 meters.
The peak reading function of this meter and meter light require external 12 V DC.

This particular unit works fine, and looks very close to new. With paper work for $65 plus shipping from Florida.

HF and VHF SWR Bridges:

All of these cover from 3 thru 150 MHz, covering HF, 6 meters, and 2 meters. SO-239 connectors in and out on all.

Royce 2-100 Single Meter SWR Bridge / Field Strength Meter
This one works fine, and looks extremely nice. I do not see any scratches on it, but it does have a previous owner's name on it.
In its original box with original instructions. $25

Monarch FSI-3
Appears to be the same SWR Bridge as above, but with a different faceplate and model number. Extremely nice condition. $18

Heath AM-2 SWR Bridge:
This SWR Bridge matches the DX-40, although it can be used with any HF or VHF transmitter. It is about 8 inches wide and 4.5 inches high, with the meter in the middle, and a gray colored knob at each side near the bottom. This particular unit works fine and is in very good shape. Paper work is included for $25.

Coax switches:

Homebrew Coaxial Antenna Switch
This coax switch has one common SO-239 on one side and six switched SO-239 connectors on the other side. It has been constructed in what appears to be a heavy solid copper box, about 3 1/4 inches wide X 2 high and 4 1/4 deep, plus knob and connectors. The switching is by three ganged ceramic rotary switches.
It does have one peculiarity, however. It appears that the way it is presently wired, one SO-239 is selected twice, and another one is not selected at all. $15

Workman CX-3, three position coax switch
Switch one rig to up to three antennas.
With SO-239 connectors.
It looks new, and is in its original box. $15

GC 2 position coax switch
This coax switch will switch between two different coaxial cables, such as two antennas, or switch one antenna between two rigs. It has SO-239 connectors.
This one looks like new. $12

Communications Speakers:

Realistic 21-549 A
This speaker is about 4 inches square and about 2 inches deep. It is rated for 5 watts, has an 8 ohm impedance, and is listed as a 300 to 3000 Hz frequency response, making it ideal for communications. It has a 3.5 mm (1/8 inch) mono plug, as used by most modern rigs. Gimbal mount included. It is black in color, looks great, and sounds great. $15

Vanco SPB-5
Appears to be the same at above, but with a Vanco label. Also includes gimbal mount. $15

Radio Shack PRO 2051 Trunking Scanner:

This scanner will do it all! It has 1000 memories, and covers from 25 MHz thru 1300 MHz, and includes "Signal Stalker" and triple trunking. It can also function as a weather radio with full alerting capabilities. There are more scanning and searching facilities than one can

imagine! Of course it covers the 6 meter, 2 meter, 220 MHz, and 440 MHz ham bands, but it does so much more.

This particular radio is in its original box. It appears that it was not used, but that the manual was examined. I have tested it and everything seems to work perfectly, although it has so many features I was not able to test everything. This is a terrific immaculate scanner!

Only $125 plus shipping from Florida.

I also have many other accessories available such as many different types of microphones, wattmeters, keyers, and many other ham accessories. Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

7505. FOR SALE SX-100 MK II Works

Yahoo group: ham4sale (2007 — 2015)
Date: 2013-03-25 23:29:57 UTC
From: w6adv
Topic: 7505 Message: 7505

I have a nice Hallicrafters SX-100 Mark II that has been collecting dust on my bench. I intended to recap it over the winter months, but never got around to it.

It currently works on all bands, however the pitch control needs to be fixed.

Cosmetically the front panel is perfect and the cabinet is 8/10. All knobs are correct and undamaged. (photos available)

I'd like $150 + shipping from Morgan Hill, CA 95037

Please email direct to: cpitcher@...

7506. FOR SALE: MFJ 209 ANTENNA ANALYZER

Yahoo group: ham4sale (2007 — 2015)
Date: 2013-03-26 23:36:31 UTC
From: n3dg
Topic: 7461 Message: 7506

MFJ-209 SWR Analyzer is an easy to operate, versatile, metered test instrument for analyzing nearly any 50 Ohm RF System on frequencies between 1.8 and 170 MHz (160 thru 2 Meters) and can also be used as signal source.

The MFJ-209 combines three basic circuits: a wide range oscillator, a 50 Ohm RF Bridge, and a calibrated bridge unbalance indicator to synergistically allow measurement of the SWR (referenced to 50 ohms) of any load connected to the ANTENNA connector.

MFJ-209 is extremely versatile especially for measuring antenna, tuner, amplifier and tuned circuit resonance and can also be used to adjust or measure:

Antennas: SWR, Resonant Frequency, Bandwidth, Efficiency
Antenna Tuners: SWR, Frequency
Amplifiers: Input and Output Networks
Coaxial Transmission Lines: SWR, Velocity Factor, Losses, Resonance
Balanced transmission lines: Impedance, Velocity Factor, Resonance
Matching or tuning stubs: SWR, Resonant Frequency, Bandwidth
Traps: Resonant Frequency
Tuned Circuits: Resonant Frequency
Small Capacitors: Value
RF Chokes and Inductors: Self Resonance, Series Resonance, Value
Transmitters and Oscillators: Frequency

MFJ-209 is in Nice, Clean Condition at ONLY $90 (New Price is $160+).

7507. FOR SALE: MINT YAESU FT-847 HF VHF UHF TRANSCEIVER

Yahoo group: ham4sale (2007 — 2015)
Date: 2013-03-26 23:37:17 UTC
From: n3dg
Topic: 7371 Message: 7507

Yaesu FT-847 is really three radios in one: HF, VHF/UHF and Satellite and she delivers 100 watts output on HF and 6 Meters, and 50 watts output on both 2 Meters and 430 MHz bands. Additional features include: Cross-band Full Duplex operation, Normal/Reverse Tracking, CTCSS/DCS Encode and Decode, 0.1 Hz tuning steps, DSP Notch, DSP NR and DSP BPF, Shuttle Jog Tuning Dial, Keypad Entry and 1200/9600 bps Packet ready.

She just sat boxed in the closet as a backup transceiver, later model with CAT support, never used and like new with DC Power Cable and Original Owners Manual at $1000.

7508. FOR SALE: YAESU ATAS 100 HF & VHF MOBILE & PORTABLE ANTENNA

Yahoo group: ham4sale (2007 — 2015)
Date: 2013-03-26 23:52:02 UTC
From: n3dg
Topic: 7508 Message: 7508

Yaesu ATAS-100 Active Tuning Antenna System provides HF/VHF/UHF coverage with automatic motorized tuning. Utilizing control signals from the transceivers microprocessor received via the coaxial cable, the ATAS-100's internal motor adjusts the radiator length for best SWR and is approximately 5.25 feet. The ATAS-100 covers the 7, 14, 21, 28, 50, 144 and 430 MHz amateur bands and is integrated with the FT-857, FT-897, FT-100 and FT-847 etc. with single button automatic tuning. Also, MFJ has a controller for this antenna that allows it to be used with other radios (not included). Never used outside, just stored in a box, new price at $350+, selling Like New for Only $200.

7509. FS: Yaesu FC-757 Autotuner

Yahoo group: ham4sale (2007 — 2015)
Date: 2013-03-27 19:46:53 UTC
From: qrv@kd4e.com
Topic: 7509 Message: 7509

I bought a nice Yaesu FT-757GXii & FC-757 Autotuner
set but have a larger autotuner already so this needs
a new home.

The autotuner includes the interconnect cable and it
works fine as tested here.

Asking $175. double-boxed, insured, and shipped to standard
USA addresses (some locations may be extra).

Picture sent on request.

Topic: 7512 Message: 7512

hi there,i would like to purchase a small qrp transceiver to get on air as i am a new ham,recently received my ticket,,
qrp with .5 to 1 watts of output power seems to be a nice kit to start with,,
any transceiver in small size and upto .5 to 2 watts of rf out put will work for me,

any transceiver kit--

high mite
rock mite
dc20 or 40
homebrew transceiver
even a homebrew transceiver in deadbug or ugly construction style is or,but it should work.

i am not looking for a very sophisticated costly transceiver..just need a simply robust design to start cw..

anyone who can donate or wish to sell please kindly contact me..
thanks

7515. Yaesu and related items FS

Yahoo group: ham4sale (2007 — 2015)
Date: 2013-03-29 13:47:55 UTC
From: Ken Simpson, W8EK
Topic: 7515 Message: 7515

Yaesu and related Items For Sale:
Automatic Antenna Tuner, Multi-Band HT, Communications
Speakers, Desk Microphones, HT accessories, and more

Yaesu FC-757 AT, Automatic HF Antenna Tuner:

The Yaesu FC-757 AT is a automatic antenna tuner designed
to be used on 160 thru 10 meters, including the WARC bands.
It is designed to work with the FT-757GX, FT-757GXII and
FT-747GX transceivers, but can work with virtually any HF rig.

The frequency range of this tuner is: 1.8-2, 3.5-4, 7-7.5,
10-10.5, 14-14.5, 18-18.5, 21-21.5, 24.5-25 and 28-29.9 MHz.
The maximum RF power is 150 watts. The built in wattmeter
has ranges of 15 and 150 watts. There is a 4-bit microprocessor
which allows for fast, accurate automatic tuning. Two SO-239
connectors are provided, and it includes a built-in dummy
load. It requires 13 V DC at 300 ma.

This unit works fine. Cosmetically it is not perfect;
it shows some use, but it is not bad.

With paper work for $190.

Joymatch "Lo-z 500" Antenna Tuner:

This antenna tuner is manufactured by Partridge Electronics
Ltd in England. It appears to be an "L" network with a 12
tap inductor and a single tuning capacitor. Apparently back
in the 1960's or 70's Partridge made an antenna they called
the Joystick. This is an antenna tuner that could be used
with it, but of course it can be used with other antennas
as well. It would appear to work on 80 thru 10 meters
(including WARC bands). L networks only match impedances
one direction, i.e. only lower than 50 ohms, or only higher
than 50 ohms. You can change the direction of match by
swapping the coax cables between the two SO-239 connectors.

I don't think the 500 means 500 watts. It looks more like
it would handle 100 watts.

This tuner works fine and looks great. $50

Yaesu VX-7 RS TriBand HT:

The Yaesu VX-7R is a triple band (6M, 2M & 440 MHz) HT
with extensive receive coverage, and leading-edge features.
The American version even transceives with 300 mW on the

220 band. Power output on 6 meters, 2 meters and 440 MHz
is 5/2.5/1/0.5 watts. It receives the AM and FM broadcast
bands, shortwave (AM), VHF and UHF TV audio, VHF Air and
public service frequencies. This model features a rugged
magnesium case with rubber bumpers and gaskets.
Only 2.5 x 4 x 1.2 inches.

Features:
24 hour clock
900 Memories
changeable icons
weather alert
AM/FM BCB
AM band and full SW to 30 MHz
CTCSS/DCS
European Tone Burst
Wideband Receive
True Dual Receive
ARTS-Automatic In-Range Transponder
Backlit Keypad & LCD
Internet Key for Access to WIRES?

This one works 100%, looks very nice and includes the
rubber duck with the 6 m extension, good battery, charger
and paper work for $275.

Accessory Items for the Yaesu "VX series" HTs, including
the VX-1, VX-3, VX-5, etc.:

Yaesu MH-34 b 4 b speaker microphone
This is the one that fits the Yaesu VX-8, VX-7, VX-6,
VX-5, VX-3, VX-2, VX-1, and that series of HTs. I
think it also fits the FT-50 and FT-60, and maybe
others. It has a single 4 conductor, 3.5 mm plug on
it. This one is just like new. $25

Yaesu CT-44 Adapter
This adapter cable converts to 4 pin, 3.5 mm speaker mic plug on the
VX HTs to a more standard 3.5 mm and 2.5mm jacks as used on many
speaker mics. Like new. $10

Yaesu CD-15 Desk Charger
Fast desk charger used for the VX-5, etc.
Like new condition. $25

Yaesu FBA-23 "Empty" battery pack
This pack takes two AA cells (Alkaline, NiCad, or NiMH)
and lets you use them on yur VX-5, VX-7, etc. $25

Yaesu EDC-6 DC Cord
Provides power to the VX series HTs. $6

VX-5 Pocket Reference
Has most of the commands that everyone always forgets.
Permits one to have the info close at hand without needing
to carry the entire operating manual. Spiral bound.
Like new. $8

VX-7 Nifty Mini Manual
Similar to the VX-5 Pocket Reference above, but for the
VX-7 and slightly larger. Spiral bound. $18

Programming cable
This cable has the threaded connector as used by the VX-7,
but it can also be used on the VX-6, 5, 3, etc. Uses USB port.
It works great with the free "Chirp" program. I have not
tried it with others. $18

Yaesu YD-148 Dual Impedance Desk Microphone:

The Yaesu YD-148 is a very nice "gooseneck" type desk microphone.
It has both high and low impedances, which can be selected by a
switch. This means it can be used on some of the older rigs
requiring a high impedance mic, or with the more modern rigs
needing a low impedance mic.

This particular mic has had the mic element replaced with a
Heil HC-4 element, which is the "DX" element that Heil
designed for superior audio punch to get thru pileups.
These elements are no longer available, but are worth
$50 for just the element.

This particular mic is in very nice condition. It works 100%.
At the present time, it has an 8 pin connector, wired for
Kenwood, on it, which of course can be changed. $85

Astatic D-104 "Lollypop" Desk Microphone:

The D-104 is a high impedance microphone that matches many
of the older rigs, and is often seen pictured with them.
It looks somewhat like a giant chrome plated lollypop,
stuck into a gray base. The chrome PTT switch is a bar
that is parallel to the "stick" of the lollypop.

This particular D-104 works fine and is in good condition.
With paper work for $60.

Communications Speakers:

Realistic 21-549 A
This one is about 4 inches square but only about 2 inches
deep. It is rated for 5 watts, has an 8 ohm impedance, and
is listed as a 300 to 3000 Hz frequency response, making it
ideal for communications. 3.5 mm (1/8 inch) mono plug. It
is black in color, looks great, and sounds great. $18

Vanco SPB-5
Appears to be the same at above, but with a Vanco label.
Also includes gimbal mount. $15

Yaesu YM-31 hand microphone:
The Yaesu YM-31 is a hand mic with a round 6 pin
connector. Apparently it is either similar or the
same as the MH-25A6j (not the MH-25 with the 8 pin
connector). It is a 600 ohm impedance hand microphone,
and has a Monitor on-off switch on the back. It should
be compatible with any of the Yaesu rigs that uses the
round 6 pin connector. It looks very similar to the
Yaesu MH-1.
This one works fine and looks extremely nice. $25

Low Pass TVI Filters:

A low pass TVI filter is added to the transmitter to reduce
harmonic interference. All have SO-239 connectors, and are
50 ohm filters.

The first one works on 6 meters as well as HF:

Drake TV-1000
This filter may also be used on the low end of six meters,
as well as HF. It is good for 1000 W "average" below 30MHz,
and about 200 W up to 52 MHz. It works fine, but looks ugly.
With paper work for $22.

Bencher YA-1, high power, low pass TVI filter
If you need a heavy duty filter for the output of your amplifier,
this one is ideal. It will take full legal power plus, and has at
least 80 db signal attenuation at TV channel 2. This one works
great, and is in its original box.
Bencher currently sells these for about $90. Only $60.

Bencher YA-1
As above, not in original box. $45

B & W FL-10/1500
This filter cuts off just above 10 meters, and handles 1500
Watts. It is the latest model B&W filter.In very nice condition,
it looks close to new. $40

Johnson 250-20 Low Pass Filter
This is a 52 ohm cylindrical low pass filter with a cut
off frequency of 45 MHz and 75 db of attenuation.
It is rated to take 1000 Watts of AM, or 5000 Watts
PEP SSB. With mounting bracket. $30

Para Dynamics PDC 1089
This filter is rated at a full Kilowatt, up to 30 MHz.
5 x 6 x 2 inch black box, instead of the more familiar long
enclosure. It looks like new. $25

Yaesu HT Accessory Items:

Belt Clip for Yaesu FT-207, with hardware. $8

Wrist Strap for Yaesu FT-209, and others $4

Radio Shack PRO 2051 Trunking Scanner:

This scanner will do it all! It has 1000 memories, and
covers from 25 MHz thru 1300 MHz, and includes "Signal
Stalker" and triple trunking. It can also function as
a weather radio with full alerting capabilities. There
are more scanning and searching facilities than one can
imagine! Of course it covers the 6 meter, 2 meter, 220
MHz, and 440 MHz ham bands, but it does so much more.

This particular radio is in its original box. It appears
that it was not used, but that the manual was examined.
I have tested it and everything seems to work perfectly,
although it has so many features I was not able to test
everything. This is a terrific immaculate scanner!
Only $125.

Rubber Duck antennas for your HT:

All are for 2 meters, are in good condition,
and are $10 each, unless stated otherwise.

BNC - regular rubber duck

BNC - Original from Kenwood TH-215, about 5 inches long

5/16 inch threaded, as used by Motorola and others
Stubby - 4 inches long

Type F connector - 6.5 inches long

PL-259 connector - 6.5 inches long
HyGain 275, still in original packaging

PL-259 connector - Stubby - 4.6 inches long
Centurion, still in original package

BNC Stubby for 440 MHz, 3 inches long

Multi Band BNC Telescoping Antennas:

Two telescoping antennas are available. Both are in very
nice, close to new condition, and have BNC connectors.

ANLI AL-800 dual band HT antenna
This is a telescoping antenna that pulls out to about
a 3 foot length. If covers both 2 meters and 440 MHz,
and has a BNC connector on it. It is rated to have
3.2 dbi gain on 2 meters and 5.6 dbi gain on 440 MHz.

It appears close to new. These are $39 on Amazon.
Get this one for only $25.

Radio Shack 20-006 A
This antenna is just over 2 feet in length when fully
extended. Radio Shack does not give it any gain rating,
and I don't know if I would trust those ratings anyhow.
It is safe to say it performs better than a rubber duck
antenna. This one will cover 6 m, 2 m , 220 MHz and
440 MHz. BNC connector. It is actually in its original
bag with original paper work. $15

I also have many other accessories available such as many
different types of microphones, HTs, HF, VHF and UHF rigs, HF
and VHF/UHF antennas, and many miscellaneous accessories.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

Date: 2013-03-29 14:48:12 UTC
From: Jon
Topic: 7516 Message: 7516

Up for sale is a used Yaesu FC-20 automatic antenna tuner for HF/6 meters. I sold my 847 so it is excess to my needs. It will work with the FT-847, FT-857, FT-897 and possibly others. It does have a few very light scuffs on the case but nothing that affects performance and is otherwise in very good cosmetic condition. It will come with the control cable only. Asking $200 shipped. Pictures are available.

Icom AH-2 Long Wire Antenna Tuner.
The AH-2 HF Automatic antenna tuner incorporates a 8-bit microcomputer to digitally detect optimum matching conditions between antenna and transceiver.
Unit is now set up to work with NEW STYLE Icom radio that has 4 pin plug on back like the Icom 706.
Frequency range:10-80 m
Voltage:13.8 VDC
Current drain: Max 2A
Max feed through RF power:120W

Unit was tested and works as it should.
However there are NO RETURNS, do the nature of electronics.
Please e-mail me any questions.
Asking $170.00 plus $25.00 shipping

7525. ClearSpeech Base for sale

Yahoo group: ham4sale (2007 — 2015)
Date: 2013-04-02 20:37:41 UTC
From: Peter
Topic: 7525 Message: 7525

Very clean, practically unused noise filter intended primarily for SSB but also usable on CW. Small scratch on front.
I've tried it on both SSB and CW, either by itself, or cascaded with the noise reduction system and narrow filter on my IC=706MkIIG.
I was amazed, really, at how well it works -- I tuned to 40M at midday, and it managed to bring through a station that I couldn't even hear through the noise otherwise.
Needs 12V. Has a mini-plug for input, and a mini-jack for output.

$22.95, shipping (USPS) free.

7527. Anyone parting out an Icom 706 original

Yahoo group: ham4sale (2007 — 2015)
Date: 2013-04-04 02:10:14 UTC
From: John G.
Topic: 7527 Message: 7527

I have an Icom 706 original, and need a new filter board for it, as the one I have has some problems with the bandpass filter relays. Anyone parting out an Icom 706 that has this filter board for sale? If so, let me know the price shipped to Lawton, OK.

73 John AF5CC

For sale brand new in original packing RF Power Transistor for making 1KW RF amplifiers

1.RF Power Field Effect Transistors

N--Channel Enhancement--Mode Lateral MOSFETs

Model number -- MRF6VP41KHR6 or MRF6VP41KHSR6

10--500 MHz, 1000 W, 50 V

LATERAL N--CHANNEL

BROADBAND

RF POWER MOSFETs

Quantity – 2pieces

And

2.RF Power Field Effect Transistor

N--Channel Enhancement--Mode Lateral MOSFET

Model number -- MRF6VP2600HR6

2--500 MHz, 600 W, 50 V

LATERAL N--CHANNEL

BROADBAND

RF POWER MOSFET

Quantity – 2pieces

datasheet and market price details have being attached above ,the cost will be comparatively low ..

7539. Yaesu Radio's For Sale and more

Yahoo group: ham4sale (2007 — 2015)
Date: 2013-04-09 03:12:32 UTC
From: Fred VE3FAL
Topic: 7539 Message: 7539

I have for sale the following radio's:

Yaesu FRDX400 Amateur Band Receiver, this unit is very clean and very stable on the bands for its age. Asking $150.00 plus shipping

Rare Yaesu FT-301SD QRP Transceiver and microphone , one digit in the display is acting up and I am sure a good alignment and cleaning would have this radio back up to par. $250.00 plus shipping.

Atlas 215x, unit receives but ran out of time to get transmit up and running. $175.00 plus shipping

Alda 103 HF Transceiver, 100 watts on 80,40 and 20 meters cw, same with this unit, a bit of cleaning and tweaking I am sure it can be back up to snuff again, includes microphone and power cable. $200.00 plus shipping

Figured I would offer here before I put on the you know where site.

Pictures are available upon request

Please email me direct at : flesnick@...

Thanks

Fred

7542. FOR SALE: MFJ 209 ANTENNA ANALYZER

Yahoo group: ham4sale (2007 — 2015)
Date: 2013-04-10 04:09:34 UTC
From: n3dg
Topic: 7461 Message: 7542

MFJ-209 SWR Analyzer is an easy to operate, versatile, metered test instrument for analyzing nearly any 50 Ohm RF System on frequencies between 1.8 and 170 MHz (160 thru 2 Meters) and can also be used as signal source.

The MFJ-209 combines three basic circuits: a wide range oscillator, a 50 Ohm RF Bridge, and a calibrated bridge unbalance indicator to synergistically allow measurement of the SWR (referenced to 50 ohms) of any load connected to the ANTENNA connector.

MFJ-209 is extremely versatile especially for measuring antenna, tuner, amplifier and tuned circuit resonance and can also be used to adjust or measure:

Antennas: SWR, Resonant Frequency, Bandwidth, Efficiency
Antenna Tuners: SWR, Frequency
Amplifiers: Input and Output Networks
Coaxial Transmission Lines: SWR, Velocity Factor, Losses, Resonance
Balanced transmission lines: Impedance, Velocity Factor, Resonance
Matching or tuning stubs: SWR, Resonant Frequency, Bandwidth
Traps: Resonant Frequency
Tuned Circuits: Resonant Frequency
Small Capacitors: Value
RF Chokes and Inductors: Self Resonance, Series Resonance, Value
Transmitters and Oscillators: Frequency

MFJ-209 is in Nice, Clean Condition at ONLY $85 (New Price is $160+).

7543. FOR SALE: YAESU ATAS 100 HF & VHF MOBILE & PORTABLE ANTENNA

Yahoo group: ham4sale (2007 — 2015)
Date: 2013-04-10 04:10:05 UTC
From: n3dg
Topic: 7508 Message: 7543

Yaesu ATAS-100 Active Tuning Antenna System provides HF/VHF/UHF coverage with automatic motorized tuning. Utilizing control signals from the transceiver's microprocessor received via the coaxial cable, the ATAS-100's internal motor adjusts the radiator length for best SWR and is quite slender at approximately 5.25 feet long. The ATAS-100 covers the 40-10 Meters HF bands, 6 Meters, as well as the 144 and 430 MHz amateur bands, and is integrated with the FT-857, FT-897, FT-100 and FT-847 etc. with single button automatic tuning. Also, MFJ has a controller for this antenna that allows it to be used with other radios (not included). She was never used outside, just stored in the box, newly price at $350+, selling Like New for Only $190.

7544. Trade: 3 solid state HF amps for 1

Yahoo group: ham4sale (2007 — 2015)
Date: 2013-04-10 22:22:28 UTC
From: qrv@kd4e.com
Topic: 7544 Message: 7544

I have three marine surplus (Skanti) 28v eight MRF422
(1200w) HF amps, two power supplies, and lots of docs.

I would like to trade them for one 12vdc (600-1200w) HF amp
(prefer 160-10m, will consider 80-10m) with bandswitched
filters.

I would like an amp that is suitable for mobile use.

Examples of amps include the Henry SS750HF (even trade),
Worth-More WM1200+ (model w/filters, plus $200. cash),
SGC SG-500 (with 2SC2290's not MRF454's, plus $200. cash).

Will accept other 12vdc amps if they are 600w (real output,
or better), have switched filters, & use commonly available
devices.

Details:

Two of the three amps are complete, one needs two MRF422's
replaced in one module.

The amps & power supplies are in Skanti rack-mount chassis
and will need a little TLC (and proper filters) to be OK
on the air - thus the trade offer of 3-for-one (plus the
two power supplies are included as well).

Or, will sell the lot for $1,000. picked up at Dayton,
Atlanta, or in SE-GA.

Topic: 7552 Message: 7552

I have a West mountain Radio RIGrunner RR4012/C for sale. The power distribution panel has never been used. I did use the power supply cable and several of the Anderson Power Pole connectors (5 pairs remaining) along with 4 rubber feet. See manufacture specs below. Asking $65.00 plus how you want it shipped. Paypal or Postal Money Order.

Fritz WD8E

RIGrunner Features
Anderson Powerpole® Connectors Provide Interoperability for Emergency Communications
* Our Powerpole® configuration conforms to the ARES, RACES, RSGB standard, and ARRL recommendation for high current 12 VDC connectors.
* Safe secure, HOT CONNECT, polarized, color keyed, genderless connector system.
* No messy binding posts, frayed wire connections, black tape or short circuits!
* A full array of quick change Powerpole® power supply, extension and adapter cables available
High Current Capability
* High current! More than enough 12 V power for your station. Pick the appropriate model
* Each outlet may be used at full ratings: transceivers, amplifiers or any accessory
* The 8012 is conservatively rated at 80 A total with any outlet good to 40 A
* Models 40xx are conservatively rated at 40 A total with any outlet good to 40 A
* 4004, 4005, 4008 & 4012 models can use any output jack as the power input with full ratings
Protected with Electronic Solid State Fuses or Readily Available ATC/ATO Fuses
* 4005i features electronic fuses with user configurable trip points, 1 to 40 A
* Each outlet is individually fused with automotive ATC/ATO fuses on other models. Shipped with appropriate fuses installed
* Fuses are quick change; accessible from the outside using high quality fuse holders
* ATC/ATO auto fuses are easy to get and are available in 10 values from 1 to 40 A
Power Monitoring and Alerts
* Precision window comparator quick status power monitor, makes a voltage problem obvious
* LED over and under voltage indicators instantly indicate a problem, without interpretation
* An audio alert is configurable to alarm on overvoltage or under voltage (both on 4010, 8012, 4012 & 4008 only) or may be disabled.
* Each fuse has a handy blown fuse LED illuminator to show short circuit problems instantly
* 4005i can issue alarm emails
RF Suppression
* RF suppression on each outlet suppresses RF leakage between equipment. Keeps your power supply in regulation

7553. FS; Avcom MSA-4570D Spectrum Analyzer parts unit.

Yahoo group: ham4sale (2007 — 2015)
Date: 2013-04-13 15:36:02 UTC
From: Tom B
Topic: 7553 Message: 7553

I have for sale a damaged Avcom MSA-4570D spectrum analyzer parts unit.
It has the color LCD. It was made for satellite use and covers
950-2150 MHz and 40-90 MHz in two bands. It operates on 12V DC.
The equipment has some damage to LCD display and the Span pot and band
select toggle switch are broken. I has a dual 19" rackmount adapter
but I don't think it is correct for this unit because the length of the
case is too long.

The unit power up and all controls that are not damaged seem to work.
The LCD works but has a big blotch on it. It is not cracked. Because
of the damage I am selling it as-is for parts. Price is $75 plus shipping.

Photos are available.

Thank you for reading my ad.

I have for sale like new, but used T-50H Aluma Tower, all aluminum, 50' tall about 26' nested, it tilts for easy antenna access. Comes with the MP2 post that you simply bury (no concrete) in the ground 6' deep and your good to go, it worked great for me, very stable. Super excellent condition! $1800.00 takes all! A great deal at this price and won't last long! Cash only, pick up only, 30 minutes South of Nashville, Tn. Sorry, no trades.

Check out the Aluma Tower website; http://www.alumatower.com/

7563. HF Antenna Tuners FS

Yahoo group: ham4sale (2007 — 2015)
Date: 2013-04-18 14:30:47 UTC
From: Ken Simpson, W8EK
Topic: 7563 Message: 7563

HF Antenna Tuners For Sale:

From very high power to lower power

Nye Viking MB-V Heavy Duty Antenna Tuner:

This antenna tuner is a "brute". Apparently it will take
on the order of 5000 watts -- at least far more power than
you should be running.

This tuner features a heavy-duty silver-plated variable
inductor with a 25:1 vernier dial, 7,000 volt variable
capacitor and 15,000 volt switch selected capacitors. The
frequency range is 1.8 to 30 MHz continuously.
Dual-metering provides for hands free SWR monitoring. The
backlit dual meters show SWR and power continuously.
You get push button antenna switching from the front panel.
The rear panel has inputs for 4 antennas (2 coax, single
wire and twin lead). There is a tuner bypass position for
the coax antenna input.

A 3kW triple core balun is included.
The extra heavy gauge aluminum cabinet provides effective
shielding.

This one works 100% and looks very close to new.

With paper work for $450.

MFJ 984 Versa Tuner IV Antenna Tuner:

MFJ says this will handle 3000 Watts PEP. Since the legal
limit is half of that, you will be fine at legal power.

It covers 1.8 to 30 MHz with 250 pf 6kv caps and matches
anything you want to throw at it, or so it seems.
It also includes an RF ammeter at the output of the tuner
so you know how much actual RF current you are putting
into the antenna. There's a wattmeter/swr bridge built
in along with a small dummy load.

It has rugged heavy-duty construction. Switches are rated
for 2KV and 17 amp carry capacity. There's a 4:1 balun
and real ceramic feed through insulators.

This particular unit works fine. The case looks very nice.
There is slight wear on the front panel, and one small
scratch that you can see if the light is just right.

Paper work is included for $200.

MFJ 962 B, 1500 Watt Antenna Tuner:

This HF antenna tuner is rated for 1500 Watts from 160
thru 10 meters. It features a cross needle wattmeter
that will read forward and reverse power, and SWR
simultaneously. Full scale readings are 2000/200 watts
forward, and 500/50 watts reverse. An antenna switch
is built in, as is a balun. The meter has a back light
that may be turned on or off. You need 12 V DC to
power the light.

This tuner works fine, the meter works fine, and it
lights properly. The cosmetics are good. The case
looks great. The front panel shows some wear.
Wear, but not scratches.

With paper work for $160.

Joymatch "Lo-z 500" Antenna Tuner:

This antenna tuner is manufactured by Partridge Electronics
Ltd in England. It appears to be an "L" network with a 12
tap inductor and a single tuning capacitor. Apparently back
in the 1960's or 70's Partridge made an antenna they called
the Joystick. This is an antenna tuner that could be used
with it, but of course it can be used with other antennas
as well. It would appear to work on 80 thru 10 meters
(including WARC bands). L networks only match impedances
one direction, i.e. only lower than 50 ohms, or only higher
than 50 ohms. You can change the direction of match by
swapping the coax cables between the two SO-239 connectors.

I don't think the 500 means 500 watts. It looks more like
it would handle 100 watts.

This tuner works fine and looks great. $50

I also have many other accessories available such as many
different types of microphones, HTs, HF, VHF and UHF rigs, HF
and VHF/UHF antennas, etc.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

73,

Ken, W8EK

7565. New in Box Eimac 3CX3000A7, Astron RS-70M, VS-70M Power Supplies

Yahoo group: ham4sale (2007 — 2015)
Date: 2013-04-18 22:53:04 UTC
From: K0DD
Topic: 7565 Message: 7565

This is the tube used in the Henry 8K Ultra and other amplifiers. It is past the Eimac warranty period, I can't remember the code date but could look. The tube was tested in an 8K and returned to the box.
$650.00 plus shipping. Pickup is available in Sioux Falls, SD No Returns. I've been through that before with tubes, insure them if you ship them.

I have an Astron RS-70M metered power supply, (voltage internally adjustable)this unit is like new condition. I just don't have the original box any longer. They make 70amps ICAS and 55amps cont. I powered virtually 1/2 of my contest station with this unit which included all of the UHF-VHF 100Watt intermediate driver amps and the IC-756PROIII's and Yaesu 736 rigs. They are trading new around $369.00 out on the bay, you could buy this one for $225.00 plus packaging and shipping, pickup is preferred due to the weight. I've seen stuff like this destroyed by a well meaning delivery worker. Located in Sioux Falls.

I have an Astron VS-70M, the difference in this unit from the RS-70M is the output is variable up to pegging the meter at 15V, there's a pair of controls on the front. It also has adjustable current limiting. I powered an SGC Powercube mobile amp in my shack with this bad boy and on HF could get 800Watts dead carrier out of the Powercube with the V turned up all the way 15. The Powercube was rated to 18V if I remember correctly. The PS didn't complain at all. This unit is of the same vintage and also in immaculate condition as everything out of the K0DD shack is. $250.00 plus packaging and shipping or pickup in Sioux Falls.

I also have a pair of rack shelves that totally support the power supply and allow rack mounting. That's how I did it. $25.00 each

Sincerely, K0DD

7567. Yaesu FT100D for trade

Yahoo group: ham4sale (2007 — 2015)
Date: 2013-04-19 13:18:17 UTC
From: John G.
Topic: 7567 Message: 7567

I have a Yaesu FT100D HF/6m/2m/70cm radio I am looking to make a trade on. This is the mobile sized rig that does 100 watts on HF and 6m, 50 watts on 2m, and 20 watts on 70cm, CW/SSB/AM/FM. It comes with the mic and power cord. It is a 3C serial number, meaning it was one of the last FT100Ds made-in January of 2003. Being the D model it comes with the 500hz CW filter and TCXO installed as standard, and is a late enough serial number that it has had all of the needed factory mods done to it. It was recently checked out at Innovative Circuits in Toronto, ON and received a clean bill of health.

The only unusual thing about the radio is that one of the previous
owners drilled some small holds in the bottom of the case to increase the airflow from the fans in the rear of the radio. Doesn't look real bad and doesn't affect the operation of the radio in any way, except to keep it a little cooler.

I would be interested in a trade for a Yaesu FT450, FT857D, or FT897D. Would also consider an Alinco DX70TH or Icom 706 original or MKII plus some cash to make up the difference. I would always consider other offers as well. Let me know what you might have available if you are interested in this rig, and I am sure we can work something out.

7568. Icom and related items FS

Yahoo group: ham4sale (2007 — 2015)
Date: 2013-04-19 14:59:23 UTC
From: Ken Simpson, W8EK
Topic: 7568 Message: 7568

Icom and related items For Sale --
2 meter HT, HT Accessories, Power Supply, Speaker
Microphone, Wattmeters, Speakers, Charger and DC
Adapter, High Power Antenna Tuner, Mobile Mounting
Bracket, Scanner, Manuals, and other
Miscellaneous Items

Icom IC-2 AT, 2 meter HT:

The Icom IC-2 AT is a fairly generic HT for the 2 meter band.
It is fully synthesized, with the frequency controlled by thumb
wheel switches on the top; it has a touchtone pad on the front.
For a long time, this was the "standard", since it is such a
well built HT.

The HT has about 3 watts output in high power and just under a
watt in low. Instead of a NiCad pack that would likely be dead
anyhow, this HT has the "empty" battery pack that takes six AA
cells. You can use NiMHs in this, and then recharge the
batteries outside of the pack, or you can use alkaline cells.
Using this type battery pack is the only reasonable way to go.

This particular unit works 100% and looks very, very nice.

Rubber duck and paper work included for $35.

Icom DC-1, 13 V DC adapter for many Icom HTs:
This adapter slides on the HT, in place of the battery pack.
If 13 V DC is applied, it converts the voltage to the proper
voltage for the HT. It can be used with the IC-2, IC-3, IC-4,
IC-02, IC-03, IC-04, and others. This one works fine, and
looks very nice. With paper work for $18.

Icom CP-1 DC cord
This cord will work with the DC-1 above, plus many other items needing
the 2.1 mm coaxial power plug. The opposite end has a cigarette
lighter plug on it. $10

Multi Band BNC Telescoping Antennas:

Two telescoping antennas are available. Both are in very
nice, close to new condition, and have BNC connectors.

ANLI AL-800 dual band HT antenna
This is a telescoping antenna that pulls out to about
a 3 foot length. If covers both 2 meters and 440 MHz,
and has a BNC connector on it. It is rated to have

3.2 dbi gain on 2 meters and 5.6 dbi gain on 440 MHz.
It appears close to new. These are $39 on Amazon.
Get this one for only $25.

Radio Shack 20-006 A
This antenna is just over 2 feet in length when fully
extended. Radio Shack does not give it any gain rating,
and I don't know if I would trust those ratings anyhow.
It is safe to say it performs better than a rubber duck
antenna. This one will cover 6 m, 2 m , 220 MHz and
440 MHz. BNC connector. It is actually in its original
bag with original paper work. $15

Icom PS-30 Deluxe Metered Power Supply:

The Icom PS-30 power supply is a deluxe supply that delivers
13.8 VDC at 25 amps. This power supply features a meter which
can be set to display amperage or voltage. Four outputs are
provided on the rear panel. Output 1 is a hard wired, high
amperage cable with the Icom standard 6 pin Molex plug.
Outputs 2, 3 and 4 provide low amperage 13.8 VDC output.
This power supply has a snap-out tilt bracket.
Size: 9.5 x 5 x 12.5 inches.

This particular supply works fine, and looks very close to new.

With paper work for $200.

MFJ 815 B Cross Needle Peak Reading HF Wattmeter:

The MFJ-815B cross-needle meter allows you to monitor both
forward and reflected power, and SWR simultaneously. There
are buttons to select either Peak or Average reading and
power ranges of 200/2000 watts forward and 50/500 watts
reflected. Frequency coverage is 1.8 to 60 MHz, so it covers
6 meters in addition to the HF bands, making it ideal for
some of the new rigs that include 6 meters.
The peak reading function of this meter and meter light
require external 12 V DC.

This particular unit works fine, and looks very close to new.
With paper work for $65.

Diawa CN-101 L Peak Reading Cross Needle Wattmeter:

The CN-101 L covers frequencies from 1.8 thru 150 MHz, which
means it covers all of the way from 160 meters thru 2 meters
-- much more than most wattmeters. It has a cross needle meter,
so it will read forward power, reverse power, and SWR all
simultaneously. It has a switch for reading either peak or
average power. In addition, it has a very nice back lit
meter, if 13 V DC is applied.

This particular meter works 100% and looks very close to new.
It even has the rubber "bumpers" on the left and right ends.
It is pristine!

With paper work for $80.

HT Speaker Microphone:

MFJ-284 Speaker Microphone
Fits most Icom, Yaesu, Alinco 560, Santec ST-20, and others.
It works great, and looks like new. $15

Communications Speakers:

Realistic 21-549 A
This one is about 4 inches square but only about 2 inches
deep. It is rated for 5 watts, has an 8 ohm impedance, and
is listed as a 300 to 3000 Hz frequency response, making it
ideal for communications. 3.5 mm (1/8 inch) mono plug. It
is black in color, looks great, and sounds great. $18

Vanco SPB-5
Appears to be the same at above, but with a Vanco label.
Also includes gimbal mount. $15

Icom Battery Charger:

Icom BC-127 A, Battery Charger for Icom IC-Q7A Dual Band HT:
This charger charges two AA NiCads (or NiMH) for the
IC-Q7 A Dual band HT, and Icom R-2 receiver, and probably
others.
This appears to be new, unused, still in its bag.
Icom lists them at $21. Buy this one for $12.

Icom MB-17 A, Quick Release Mobile Mounting Bracket:

The Icom MB-17A "Quick Release" mobile mounting bracket
fits the Icom 207, 281, 481, 800, 2100, 2200, 2340, 2350,
2410, 2700, 2710, 2800, and likely other rigs that are
about 5 1/2 inches wide.

Since it is the "quick release" type where the rig just
slides in, it likely can be used with many other rigs,
made by many different manufacturers. This means you
can use it with a Kenwood, Yaesu, Alinco, etc. in
addition to Icom.

This particular unit is new, in its original box,
complete with all hardware. $30

Radio Shack PRO 2051 Trunking Scanner:

This scanner will do it all! It has 1000 memories, and
covers from 25 MHz thru 1300 MHz, and includes "Signal
Stalker" and triple trunking. It can also function as

a weather radio with full alerting capabilities. There are more scanning and searching facilities than one can imagine! Of course it covers the 6 meter, 2 meter, 220 MHz, and 440 MHz ham bands, but it does so much more.

This particular radio is in its original box. It appears that it was not used, but that the manual was examined. I have tested it and everything seems to work perfectly, although it has so many features I was not able to test everything. This is a terrific immaculate scanner!

Only $125.

Astron RS-35 A, 35 amp power supply:

Very heavy duty 13 V DC power supply ideal for powering HF rigs, with reserve for your 2 meter and other gear.

This one works sets at 13.8 Volts DC with no load, or with a load. Very well regulated.
It looks close to new, with no scratches, dents, or dings.
$100

Reference Data for Radio Engineers:

This book published by Sams / ITT is somewhat similar to an ARRL Handbook, but in much more depth and detail, since it is designed for engineers.

This book covers the fields of research, development, production, operation and education for radio engineers. It is loaded with tables and charts necessary in communications. Excellent resource book when looking for data,from the acoustic spectrum to radio wave propagation.

This one is the Sixth Edition printed in 1978, but the basic information has not changed much.

This one is hardback, and it is in excellent condition, close to new. The cover does not even appear to be worn. This exact book in this condition is selling on Amazon from between $123 and $338. Buy this one for only $80.

ORIGINAL Icom operating manuals:

Please note that all of these are original Icom manuals and are not copies. All are in very good condition. These are original manuals only.

Mobile transceiver manuals:
IC-22 S, 2 m FM transceiver $12

IC-28 H, 2 m FM transceiver $12
IC-281 H, 2 m FM Transceiver $12
IC-2350 H, Dual Band FM transceiver $15
IC-3200 A/E, Dual Band FM Transceiver $15

Other Icom manuals:
BC-30 Desk Charger $5
BC-35 Desk Charger $7
BP-2, BP-3, BP-4, BP-5 battery packs $3
BP-21, BP-22, BP-23, and BP-24 Batteries $3
DC-1 DC pack for IC-2 AT series HTs $4
HM-8 Hand Microphone, w/schematic $5
IC-3 PA Power supply / speaker $10
UT-16 Voice Synthesizer $5

These are original manuals only.

I also have many other accessories available such as many different types of microphones, HTs, HF, VHF and UHF rigs, HF and VHF/UHF antennas, etc.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

7570. Rack Mount TESystems VHF/ UHF SS power amplifiers CW/SSB contest, Bird metering

Yahoo group: ham4sale (2007 — 2015)
Date: 2013-04-19 19:49:34 UTC
From: K0DD
Topic: 7570 Message: 7570

I have for sale my TESystems CW/SSB contest driver amplifiers.

These are the big heat sink rack mount units, hardly used. These take up a one foot high chunk of rack space each. I built a custom desk unit to hold all the gear. I no longer have the desk, but I have the upper rack units where the amps and radios were located.

My contest operations and EME attempts put a heavy load on the standard mobile amps normally used for this purpose and I found myself putting huge fans on them to keep them from cooking themselves. I cured that problem by going to TE for a custom set of linears. These are biased as linears not class C FM amps though they will amplify a carrier/FM. They are also optimized for the CW/SSB weak signal portion of the dial.

All these amps are transmit only and have no switching inside. They run in idle current which is low all the time. You need to run a separate RCV coax from your switched tower mount preamp. You repeater guys with cavities know all about separate XMT/RCV lines if you run duplexers.

The first is my 144 unit, I'd have to read the exact model number off the unit but it takes 15-25 watts and turns it into 100 Watts out continuous. Which was perfect for driving my 8877 final to more than full output.

This unit was hardly used at all as I was transitioning from a 736 driver to transverters to use with the 7800 and was using my 100W Icom XCVR in the interim. So I'd say it had demo use only. The 736 ran it right up to 100W and of course the 8877 had more than enough power. The thing during VHF runs on SSB or CW just warmed to a very comfortable operating temp. I had made a great selection.

This is a $650 amplifier, in immaculate condition, still currently mounted with its brothers in the desk rack. I'll part with it for $500.00 plus packaging, shipping from Sioux Falls, SD pickup available.

The second is my 222Mhz unit, same setup and the last to be bought. I only tested this guy into the dummy load as I never had the new tower preamp mounted for 222. It also takes 15-25 watts or so to make 100 watts. This is a $750.00 specimen, and it can be had for $550.00 plus shipping and packaging.

The third is my baby, and the most welcome box to the shack, the 432Mhz unit. 432 is brutal on driver amps. They burn up about 50% of the input power in heat. This unit is wonderful! This one is 10 or so watts input, the 736 drove it wonderfully and it provides a solid 100Watts output; which would power the 8938 to really scary power levels. I had that thing into the dummy load and wound it all the way up and it ran over 2KW. Scared me to death even sitting next to it, let alone running 1500 out to the antennas! My last station was under my antennas. Again, this one cruises, heats some but just enough to warm your hand during contest or EME ops. These are $865.00 amps and I'd let it go for $550.00.

Even if my numbers are off, these amps are easily worth what I'm asking for them. If somebody bought all three units for $1500.00 I'd let them take the rack unit that houses all of them. I have photos of the system.

I just wanted to mention, I constructed quite a wattmeter system, dual element Bird sections that all connected to my lightning panel and a custom built three Bird meter panel with selector could monitor, HF, 6, 2, 222, 432,1296 just by selecting the band.

The three meters were driver power, intermediate driver power and the final/reflected power. This I also mounted a peak reading unit in there so you could select average or PEP reading. If I remember correctly I had upwards of $3000 in that monitoring system, including the slugs. Once I find it all (boxed in storage) I'll put it up for sale. That was one of the crowning achievements of the shack.

I have pics of the system.

Sincerely, K0DD

FS: HP 8640B 0.5-525MHz Sig Gen w/323

Actually is the AN/USM-323 Military Version w/protective case.

Asking $375. delivered to Dayton or Atlanta, picked up in SE-GA, or plus ship (70lbs 7.8 x 19.5 x 22.4")

Working but no warranty. Faceplate cover not shown, is included.

"0.5 to 512 Mhz. All solid state, offering a level output range of +19 to -144 dBm (2v to 0.01 microvolts). This output is calibrated, metered, and leveled to within + or - 0.5 dB across the full frequency range of the instrument. It also provides AM, FM, and pulse modulation for a wide range of receiver test applications. Internal modulation is available in three fixed steps of 400 hz, 1 khz, and 5 khz. Pulse: 0.05 - 5 khz. This modulation is calibrated and metered for direct readout under all operating conditions. Also allows modulation with another signal from an outside source. An internal 6-digit counter displays the output frequency. Resolution: To 10 hz (.5 to 4 Mhz.), 100 Hz (4-64 Mhz), 1 khz (64-512 Mhz.) 103-127/207-242 vac, 48-440 hz." From max-gain page.

7576. Kenwood TK-380 hand held for sale, must sell

Yahoo group: ham4sale (2007 — 2015)
Date: 2013-04-23 15:52:56 UTC
From: John Miller
Topic: 7576 Message: 7576

I have a Kenwood TK-380 UHF commercial radio, it will go to the ham 440 MHz band. It has some scratches and engraving on it from previous owners probably many before me. The hand held works great, I bought it for race track crew communications, used it once for that and can't afford to go to the track anymore anyway. I can program it for you, comes with antenna and belt clip I need the batteries for another radio but they're easy enough to find. Asking $75 for the radio, if you want a speaker mic, add $15. Money's tighter than I thought it would be this next couple weeks this is the first thing on the list of what I can get rid of. I can take money order but paypal's preferred.

7581. FS: CDE TR-2 rotor controller with capacators (make offer)

Yahoo group: ham4sale (2007 — 2015)
Date: 2013-04-25 18:55:16 UTC
From: John
Topic: 7581 Message: 7581

I have for sale a CDE TR-2 rotor controller that needs a little service, plus a set of spare capacators for the controller. When hooked to the rotor, the control box won't make the rotor turn, but you do hear a humming noice coming from the rotor. Might be an easy fix. The capacators themselves have to be worth something. Make an offer including shipping.

I can take paypal/check/MO/cash.

My Ameritron AL-1200 loafs at 1500 watts, quick warm up and all the power you need to break that heavy pileup or to reach around the world. I am the second non smoking owner and cannot use it in my new home. So it is now surplus to my needs, and a bargain at $1800. Can deliver within a reasonable distance of Nashville, Tn. I can ship if you prefer.
Please pay in cash or a United States Postal Money order. I don't know how to use Pay Pal and really don't trust anything I don't know how to use.
True full power HF

Best Wishes

7597. Heathkit HW-32 Transceiver w/Manual & Mobile Mount

Yahoo group: ham4sale (2007 — 2015)
Date: 2013-05-03 16:48:48 UTC
From: john
Topic: 7597 Message: 7597

This classic Heathkit HW-32 Transceiver was built by an engineering friend of mine in the early 60s and I bought it from him in 1967. The Heathkit recommended mods have been made. It comes with the original construction/operation manual and the mobile mount.

This unit has been in storage since 1995 and I only recently got it out and fired it up. I have no antenna that I can transmit with but everything seemed to work ok. I could hear 20m signals.

Upon receipt of your email I will forward pictures.

I'm asking $55.00 and the shipping weight should be about 15 lbs and should run about $26.00 (Florida to the Midwest). Any differences in shipping costs will be discussed.

Thanks for looking. WA9ENO "Hoss" thehossmanxx@...

HEATHKIT HD-1481 REMOTE COAX ANTENNA SWITCH

Ultra-Convenient Mast or Tower Mounted Remote Antenna Switch lets you use just one coax feedline to switch and control up to four remote antennas supporting 1.8 thru 50 MHz (easily modified to up to 150 MHz) and supporting up to 2 KW without any AC/DC power required (simply gets its power through the antenna coax).

You Save Money & Time with this device.
You'll Save 75% in Coax Costs by just having to install one Great Coax Feedline to support up to four antennas.
And, if you ever need to replace or upgrade coax feedlines, with this device, you just upgrade one (not 2, 3 or 4).

FOR SALE: Collection of air wound coils

Some are Airdux, and some are B&W according to the boxes they are in anyway.
There are 10 coils total. 6 still have the boxes. Most of them look very decent.
A couple could use a bath...

BW3014, AD 408T, 808T etc.

Example 1" diameter 2-3/4" long, about 45 turns. A couple of them look to be
more like 1/2" diameter. These are not all perfect, but most look to be very
serviceable. I would like $8.00 each for them if sold individually, but will sell the whole
collection for $49.00 plus shipping.

Topic: 7618 Message: 7618

I have a few things I have to sell unfortunately in order to feed the family the rest of the month.
First, a Kenwood TS-450SAT, it's probably been mobile at some stage of it's life but works well. In looks it's probably a 8, it works 100% my primary radio broke and it's my backup, I've been running it for a week now, I like it I just need to decide between radio and feeding my family, the primary TS-2000 can be fixed for free so if I have to choose I'd rather keep that one but at this point for the right offer I suppose I'd let it go. Asking $450 for the TS-450, I have a short power cord, it's what I got with it, no mic, price does not include shipping but I'll talk.

Next, a Kenwood TK-380 UHF hand held, rated for 450-490 MHz but will go to the ham bands, $65 or I can throw in a speaker mic for $15 more, also plus shipping but again will talk. no battery with this radio, I have one that needs a rebuild I can throw in, I'll never get to it. Radio has some engraving on the front, it works fine probably an 8.5-9 out of 10 in looks has antenna and belt clip.

I have a Motorola MTS2000 for 900 MHz, it's one of the newer ones with the display problem, I'm told it can be fixed for $50, including probably shipping. Either way, $25 takes that plus shipping, no battery, I have several of these and this is the nicest looking one by far, even getting it fixed, that's a good deal over all.

I take paypal or money orders, if there's anything you're looking for I may have let me know. Pretty much everything's available for the right price in the current situation.

7621. HEATH HD-1481 COAXIAL REMOTE ANTENNA SWITCH

Yahoo group: ham4sale (2007 — 2015)
Date: 2013-05-19 15:28:00 UTC
From: n3dg
Topic: 7621 Message: 7621

Ultra-Convenient Mast or Tower Mounted Remote Antenna Switch lets you use just one coax feedline to switch and control up to four remote antennas supporting 1.8 thru 50 MHz (easily modified to up to 150 MHz) and supporting up to 2 KW without any AC/DC power required (simply gets its power through the antenna coax).

You Save Money & Time with this device.
You'll Save 75% in Coax Costs by just having to install one Great Coax Feedline to support up to four antennas.
And, if you ever need to replace or upgrade coax feedlines, with this device, you just upgrade one (not 2, 3 or 4).

Details at:
http://pdf.textfiles.com/manuals/SCANNERS-F-R/Heathkit-HD-1481.pdf

Reviews at:
http://www.eham.net/reviews/detail/6884

Indoor Control Unit and Outdoor Remote Unit included at $100.

7622. BIG SCREEN DAIWA CN-720B HF & VHF SWR POWER METER

You'll never need another HF & VHF SWR Power Meter again. . .only $85.

7623. FS: Military Crystals Box

Yahoo group: ham4sale (2007 — 2015)
Date: 2013-05-20 11:09:38 UTC
From: Bry Carling
Topic: 7623 Message: 7623

FOR SALE: Military Crystals Box

Hold all of your crystals in one place for easy access and a tidy shack.

This Model BX40 crystals box has a hinged lid and holds 120 Type FT243 crystals or similar. This is for crystals with 1/2 inch pin spacing. It is in excellent condition. Unlike some of the
other cases that have four compartments and separate panels and lids to open, it only has one hinged lid and is in excellent condition. Military drab olive color.

Pictures may be found at:
http://af4k.com/imag/ham/BX40_1.jpg
http://af4k.com/imag/ham/BX40_2.jpg

Available for only $25.00 plus $13.00 for shipping.

Reply via e-mail off-list with questions or to arrange purchase.

7629. New Custom made Swan/Siltronix S-Meters

Yahoo group: ham4sale (2007 — 2015)
Date: 2013-05-23 03:53:07 UTC
From: Walt Wilson
Topic: 7629 Message: 7629

Found a source for New Siltronix meters. Question is, are they worth it? Brand new meter for internal mount in the Siltronix will cost at least $70 each, if as many as 10 units are orderded. These are custom made all new meters. New meter graduations made specifically for the Siltronix are installed with new meter movements. If enough people pre order these units I can get them made. Due to buying and making the meter faces inside, it takes several weeks. Give me an idea if your interested. I am not making any money on this, just providing the information.

7634. Need: IF Board for TS-690s - X48-3090-xx

Yahoo group: ham4sale (2007 — 2015)
Date: 2013-06-01 14:54:00 UTC
From: Bob - K2KI
Topic: 7634 Message: 7634

Hi to all and thanks for reading this post.

I have a TS-690S that has a completely butchered IF board (X48-3090-XX). Seems that a cap leeched it's contents onto the board and ate a lot of traces. There are conductive qualities to the board where there are no traces and all efforts to remedy this have failed. It also looks as if the previous owner used a chisel tipped iron to make repairs and caused much damage.

If you have the board or a donor radio for sale, please drop me a note.

Note: an IF board from a TS-450 will be just as suitable!

Side note... The Mic gain pot and knob is missing also. Will need those too.

7641. Hello everyone, I have a complete 33cm Repeater, ready to go on the air.

Yahoo group: ham4sale (2007 — 2015)
Date: 2013-06-05 01:55:20 UTC
From: TimB
Topic: 7641 Message: 7641

Hello everyone,

I have a complete 33cm Repeater, ready to go on the air that I am wanting to sell due to lack of interest in this area. It is a 300wt Motorola PURC5000 with the Advanced controller. It has a Motorola Maxtrac for the receiver along with a receive preamp. It has a Sinclair duplexer and includes a 12db base antenna.

This repeater is a full duty cycle monster. It has 2 24v power supplies that run the PA and a 12v supply that run the Controller and tx drawer. It has the High Stability Oscilator drawer also.

I am including a spare PA, spare TX drawer, Spare 24v power supply, Spare 12v power supply, Spare Fuse/power distribution panel and a Spare digital controller.

This machine has been on the air for 3 years without a hiccup, but there are only 2 of us left that use it.

This repeater is close to 300 pounds and is in a 7' tall cabinent. With the other parts we are looking at over 600 pounds of equipment.

I will help with delivery and meet anyone part way. I believe that shipping would be out of the realm of reason.

I am asking $500 for the complete system with everything you need minus the coax and a tower.

For another $200, I will include a Kenwood TK-931 mobile with the alphanumeric display and a Kenwood TK-481 portable.

If you would like more information, or pictures, please email.

Thank you,

Tim B.

Surplus to my needs is my Ameritron RS-10 remote coax switch, used it with my Cubex Quad MK-II 5 element Quad. Both are for sale together or separate, makes a great pair.

The RS-10 is 3 years old and works great, comes will 100' control cable

Quad, Cubex Quad, MKII 5 Band kit with new elements in shipping pkg.
New cost over $700.00 with 5 band add on kit http://www.cubex.com/mark.htm

Quad asking $475 including 5 band add on kit, pick up preferred but will ship at buyers expense.

Remote Coax Switch, Ameritron, RS-10 works great, paired with the Quad will take $575.00 for all.

Separate, will take $150.00 shipped Remote coax switch.

7650. FS: 2m9SSB 2 meter yagi

Yahoo group: ham4sale (2007 — 2015)
Date: 2013-06-06 23:48:18 UTC
From: John Geiger
Topic: 7650 Message: 7650

I have for sale a M squared 2M9SSB yagi, which has a boom length of around 13 feet and 9 elements. One of the best performing 2 meter yagis for its size. It is in good condition and it works fine. These sell new for $230, I am asking $115 for it plus a few bucks for shipping if needed.

7651. HF Antenna Tuners and Wattmeters FS

Yahoo group: ham4sale (2007 — 2015)
Date: 2013-06-07 15:27:19 UTC
From: Ken Simpson, W8EK
Topic: 7651 Message: 7651

HF Antenna Tuners and Wattmeters For Sale:

From very high power to lower power,
manual and automatic

Drake MN-2700 HF Antenna Tuner:

The Drake MN-2700 is a precision instrument covering 160
through 10 meters. It matches antennas fed with coax,
balanced line, or random wire. Front panel controls
allow for adjustment of resistive and reactive tuning,
antenna switching (with by-pass), and band switching.
A very nice wattmeter is build in, with calibration for
200 W and 2000 W.

This device can handle 2000 watts PEP, 1000 watts average.
Although this tuner matches the Drake "7 line" it can be
used with any HF rig.

This particular unit is immaculate. It does not have the
sticky paint. It includes the "riser feet" and is in its
original box and looks perfect. Of course it works 100%
as well.

With paper work for $300.

MFJ 984 Versa Tuner IV Antenna Tuner:

MFJ says this will handle 3000 Watts PEP. Since the legal
limit is half of that, you will be fine at legal power.

It covers 1.8 to 30 MHz with 250 pf 6kv caps and matches
anything you want to throw at it, or so it seems.
It also includes an RF ammeter at the output of the tuner
so you know how much actual RF current you are putting
into the antenna. There's a wattmeter/swr bridge built
in along with a small dummy load.

It has rugged heavy-duty construction. Switches are rated
for 2KV and 17 amp carry capacity. There's a 4:1 balun
and real ceramic feed through insulators.

This particular unit works fine. The case looks very nice.
There is slight wear on the front panel, and one small
scratch that you can see if the light is just right.

Paper work is included for $200.

MFJ 962 B, 1500 Watt Antenna Tuner:

This HF antenna tuner is rated for 1500 Watts from 160 thru 10 meters. It features a cross needle wattmeter that will read forward and reverse power, and SWR simultaneously. Full scale readings are 2000/200 watts forward, and 500/50 watts reverse. An antenna switch is built in, as is a balun. The meter has a back light that may be turned on or off. You need 12 V DC to power the light.

This tuner works fine, the meter works fine, and it lights properly. The cosmetics are good. The case looks great. The front panel shows some wear. Wear, but not scratches.

With paper work for $160.

Yaesu FC-757 AT, Automatic HF Antenna Tuner:

The Yaesu FC-757 AT is a automatic antenna tuner designed to be used on 160 thru 10 meters, including the WARC bands. It is designed to work with the FT-757GX, FT-757GXII and FT-747GX transceivers, but can work with virtually any HF rig.

The frequency range of this tuner is: 1.8-2, 3.5-4, 7-7.5, 10-10.5, 14-14.5, 18-18.5, 21-21.5, 24.5-25 and 28-29.9 MHz. The maximum RF power is 150 watts. The built in wattmeter has ranges of 15 and 150 watts. There is a 4-bit microprocessor which allows for fast, accurate automatic tuning. Two SO-239 connectors are provided, and it includes a built-in dummy load. It requires 13 V DC at 300 ma.

This unit works fine. Cosmetically it is not perfect; it shows some use, but it is not bad.

With paper work for $190.

Joymatch "Lo-z 500" Antenna Tuner:

This antenna tuner is manufactured by Partridge Electronics Ltd in England. It appears to be an "L" network with a 12 tap inductor and a single tuning capacitor. Apparently back in the 1960's or 70's Partridge made an antenna they called the Joystick. This is an antenna tuner that could be used with it, but of course it can be used with other antennas as well. It would appear to work on 80 thru 10 meters (including WARC bands). L networks only match impedances one direction, i.e. only lower than 50 ohms, or only higher than 50 ohms. You can change the direction of match by swapping the coax cables between the two SO-239 connectors.

I don't think the 500 means 500 watts. It looks more like it would handle 100 watts.

This tuner works fine and looks great. $50

MFJ 815 B Cross Needle Peak Reading HF Wattmeter:

Cross needle reads forward and reverse power simultaneously
SWR displayed also
300/3000 Watt forward and 60/600 Watt reverse
peak or average reading meter
160 thru 6 meters
12 V DC needed for lighted meter

This particular unit works fine, and looks very close to new.
With paper work for $65.

Daiwa CN-520 "Cross Needle" wattmeter:

This wattmeter covers 1.8 to 60 MHz, and is the "cross needle"
type, so it reads SWR at the same time it reads forward and
reflected power.

Forward scales of 2000 W or 200 W; reflected 400 W and 40 Watts.

This one looks very nice and works like new,
with the paperwork for $65.

Coaxial antenna switch:

Homebrew Coaxial Antenna Switch
This coax switch has one common SO-239 on one side and
six switched SO-239 connectors on the other side. It
has been constructed in what appears to be a heavy solid
copper box, about 3 1/4 inches wide X 2 high and 4 1/4
deep, plus knob and connectors. The switching is by
three ganged ceramic rotary switches. $15

I also have many other accessories available such as many
different types of microphones, HTs, HF, VHF and UHF rigs, HF
and VHF/UHF antennas, etc.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

7652. Antenna hardware for sale

Yahoo group: ham4sale (2007 — 2015)
Date: 2013-06-07 23:28:53 UTC
From: konecc
Topic: 7652 Message: 7652

Here's an updated list of antenna hardware I'm selling:

1) Boom material

--- 2 1/2" x 24' x 3/32" boom (2-piece) -- $75
--- 2" x 25'3" x 1/8" boom (2-piece with center reinforcement) -- $60
--- 3" x 15' KLM boom (1-piece) -- $60
--- 3" x 20' KLM boom with 21" of inner splice tubing extending on one end (1-piece), add any of the other KLM booms to make longer boom -- $80
--- 3" x 19'10" KLM boom (1-piece) -- $80
--- 3" x 16' KLM boom (1-piece) -- $60
--- 3" x 16' KLM boom (1-piece) -- $60

Buy them all for $350

2) 2" x 15'9" galvanized water pipe (~3/16" wall) (Schedule 40 1.5" pipe) -- $50

3) Lots of assorted masts (aluminum and steel, long and short lengths, good for antennas or for trusses) -- Make offer

4) 600 ft of 3/4" sheathed 75 ohm hardline (CommScope brand) -- 40 cents/ft

5) 900 ft of 3/4" sheathed 75 ohm hardline (TFC brand) -- 40 cents/ft

6) Pile of short pieces of guy wire with antenna insulators ☐ Free

7) 215 ft RG-59U 75 ohm coax, perfect for feeding beverages -- Best offer

8) Rotor and control cables

--- 90 ft 6-pair individually shielded control cable -- Best offer
--- 80 ft 8-conductor rotor cable, outer insulation jacket taped in one spot but no damage to any conductors -- Best offer
--- 54 ft 16-conductor (8 pairs) control cable -- Best offer
--- 90 ft 8-conductor rotor cable -- Best offer
--- 40 ft heavy duty 8-conductor rotor cable -- Best offer
--- 33 ft 8-conductor rotor cable -- Best offer
--- 26 ft 8-conductor rotor cable -- Best offer
--- 52 ft 12-conductor cable with ground drain -- Best offer
--- 13 ft 8-conductor control cable -- Best offer
--- 58 ft Belden 8778 6-pair individually shielded (12 conductors total) control cable with ground drain -- Best offer
--- 1 ft (8) lengths of RG-58A/U (Mil-spec 07145 Times Wires & Cable) bundled together with BNC connectors on both ends, total of 400 ft -- Best offer

9) Cushcraft 10-4CD 4el 10m monobander -- $125

10) Hy-Gain T2X Tailtwister rotator (the real one, not the newer poor quality MFJ), completely refurbished and checked out by N4TB. $475

11) Custom heavy duty steel bracket, use for mast to boom, sidemount, truss or what have you, saddle is for 2.5" pipe or you can adapt. $25

12) Two center insulators for dipoles, work fine -- $8 for both

13) Hy-Gain Ham-IV and earlier rotor lower mast support, includes new mast plates (51415-10),
new U-bolts and hardware. Would make a nice boom to mast clamp to mount an antenna at the very top of a mast. $50

14) Aluminum heavy wall tube 3 1/2" dia x 1/2" wall x 24" long - Best offer

15) (2) custom aluminum struts with welded end plates, 22" long x 2" dia. Your use for this is only
imited by your imagination and ingenuity (boom support, tower side arm, etc.) -- Best offer

16) Center insulator for dipole -- $5

17) Section of Rohn 25 (?), I think this a tiltover tower piece. $20

18) Turnbuckle 1/2 x 12 -- Best offer

19) Thrust bearing made by Crown Controls Model GR-2. Unusual design, could also be used as guy ring for a rotating mast. $30

20) Rohn 25 side arm mount - Best offer

21) Misc guy wire

--- 40 ft 1/4" EHS guy wire, some rust in one section -- $4
--- 44 ft 1/4" EHS guy wire -- $10
--- 30 ft 1/4" EHS guy wire -- $8
--- Pile of assorted short guy wire lengths -- Free, pickup only

More guy wire available, please inquire. All ¼" EHS

22) Miller 6490W full body harness, XL size, never used -- $50

23) Miller climbing belt, M size -- $25

See http://konecc.wix.com/ham-radio-for-sale for pictures.

Hello,

I have a US Tower #5 T-Base for sale. It is new, and comes with the three anchor bolts, and SS nuts for a three legged tower.

See: http://www.hamradio.com/detail.cfm?pid=H0-002290 for a diagram. This is new, unused, and up to a few weeks ago has been stored inside.

$125.00 picked up in Eugene, Oregon... If shipped, buyer pays ACTUAL packing and shipping charges. Paypal or cash only. It is available for viewing if anyone wants to see it. It is brand new, unused, and now sitting outside.

7660. FS: DATONG FL-3

Yahoo group: ham4sale (2007 — 2015)
Date: 2013-06-15 18:34:43 UTC
From: qrv@kd4e.com
Topic: 7660 Message: 7660

DATONG FL-3 - The gold standard of external audio filters.

"Twelve poles of tunable active filtering, independent low and high-pass filters, and a built-in independent notch filter. It can remove "monkey chatter" or "splatter" to SSB signals, remove heterodyne interference to AM and SSB signals, optimize bandwidth for RTTY, FAX and SSTV reception. Simple push-button selection of the four main operating modes: SSB, SSB+NOTCH, SSB+PEAK and CW. Connects to any receiver's headphone or speaker output."

PLUS "the auto-notch function - intended for removing unwanted tones or whistles from speech signals. The auto-notch will track, then lock onto the signal. Then the LED will light, and the offending tone will disappear!"

Exceptional performance w/o DSP artifacts. Includes manual.

Asking $95. including standard USA shipping.

29 FOOT BROADBAND 6 - 80 METER STEALTH HOA MULTIBAND VERTICAL ANTENNA

Very nice used condition quality Zero-Five antenna.
Excellent reviews on eHam.

We will be using this for some Field Day tests then selling it.

"These new HIGH QUALITY Broadband multiband vertical antenna's are perfect for HOA and deed restricted hams. Uses our special high power high performance double core transformer. No more wasted power from broadband binocular core transformers that have high loss for low SWR. This vertical antenna has no lossy traps or coils to burn out. Super wide bandwidth means more time operating ,and less time stuck on a frequency your trap vertical is tuned for. Our broadband vertical antenna's put the power on the air where you want it. Handles full legal limit all day, and tunes with your rig's internal tuner. Slips over a 1 5/8 inch od mast."

"GROUND OR ELEVATED MOUNTING
PERFECT FOR DEED RESTRICTED HAMS
USE WITH OR WITHOUT RADIALS
SPECIAL 2KW DOUBLE CORE TRANSFORMER
NO LOSSY TRAPS OR COILS TO BURN UP.
HIGH POWER DELRIN BASE INSULATOR.
VERTICAL ELEMENT MADE FROM T832 AIRCRAFT TUBING
HEAVY DUTY 6061-T6 ALUMINUM BASE TUBE SLIPS OVER MAST
MAST SIZE --- UP TO 1 5/8 INCH
HEIGHT --- 29 FEET
WIND RATING 92 MPH NO ICE
BANDS --- 6 THROUGH 80 METERS
POWER --- LEGAL LIMIT
SWR --- 1.5 WITH A WIDE RANGE TUNER"

Asking $225. picked up in Statesboro Field Day afternoon (after 4pm), can bring to the SARA Fest August 24th in Swainsboro, GA, OR, plus the cost to ship 16 lbs in a 39" x 9" x 8" box.

EV N/D767a dynamic mic (new/unused).
Review:
http://themodernvocalistworld.com/2011/01/23/smooth-operator-ev-nd767a-dynamic-vocal-mic-review/
Top-class vocal microphone
Multi-stage shock mount
Dynamic, high-sensitivity neodymium element
Tight-mesh Memraflex™ grille
Condenser-like performance
VOB™ technology
Supercardioid polar pattern
Audio Frequency Response 35 - 22,000 Hz
Case Material Metal
Connector Type 3-pin XLR
Diameter (Max) 52 mm (2.05")
Element Dynamic
Finish Non-reflecting Black
Impedance, Low-Z balanced 300 Ω
Mic Type Handheld
Open Circuit Voltage 3.1 mV/Pascal
Polar Pattern Supercardioid
Power Requirement Passive
In original box with extra foam wind pop filter, Audio Technica shock
mount model at8410a, 5' cable (XLR both ends).
Asking $85.00 including standard shipping.

From: qrv@kd4e.com
Topic: 7666 Message: 7666

Works fine but I have finally acquired a rig that does it
as well.

It's a rare rig that reliably notches carriers/heterodynes
like the j-com

Requires a 12vdc source and cables to insert it between
the speaker output of your rig and your external speaker.

Manual: http://www.ve3sun.com/MagicNotch/

Asking $35. including standard shipping.

Topic: 7668 Message: 7668

Hi there everyone,

I'm looking for a DSTAR radio...The radio I'm looking for is the Icom IC-880H. Becuase this is the summer and I am in between jobs owner would have to be open to payment arrangements.

if you have an 880 or 2 you are looking to part with let's talk.

take care,

Ben, KØBLR

I have the following items for sale or Trade.
Things I am interesting in as far as trades are, Handheld 2 Meter radios, Handheld 2 Meter/70cm radios, Mobile dual band antennas, HF Radios,
Mobile 2 meter radios, Dual Band mobile radios, Digital Police scanners. Laptop computers..
Also interested in other items??? What you got to trade?

MFJ -751 "Signal Enhancer" tunable CW/SSB filter

This unit is very similar to the Autek QF-1. It has
provisions for being a notch filter, a peaking filter, or
a low pass filter.

The width of the filter can be varied
(making it useful on both CW and SSB), and the
frequency of the notch, peak, or low pass function can
be selected. It is quite versatile.

It requires 9 to 18 VDC, and has an input jack, output jack, and a
headphone jack on the back. Comes with the MFJ Wall wart.

$45.00 OBO + Shipping CONUS

MFJ-901B ANTENNA TUNER, 200 WATTS, 1.8-30 MHZ, BALUN

ANTENNA TUNER, 200 WATTS, 1.8-30 MHZ, BALUN
The MFJ-901B is a small (5 x 2 x 6 inch) and affordable 200 watt PEP versa tuner. You can operate anywhere in a band and get low SWR.
You will get maximum power out for your rig and it will run cooler and last longer.

The MFJ-901B matches dipoles, vees, random wires, verticals, mobile whips, beams, balanced and coax lines continuously from 1.8 to 30 MHz.

It is excellent for matching solid state rigs to linears. Efficient airwound inductor gives you lower losses and more power.
You get SO-239 connectors for transmitter and coax, binding posts for random wire or balanced lines and a wing-nut ground connection.
A 4:1 balun for balanced lines is also built into this sturdy, compact tuner. Works with solid state and tube rigs.
The 901B will fit into your station and your car.

$65.00 + Shipping CONUS

MFJ-1278 MultiMode Data Controller, Packet, Amtor, RTTY, ASCII, CW, Memory Keyer

MFJ-1278 Multi-Mode Data Controller With Multi-Gray Level Modem
This tnc interface is capable of receiving, decoding, and transmitting in CW, RTTY, HF and VHF PACKET,
PACTOR, AMTOR, NAVTEX, ASCII, and WEFAX.

This TNC/Controller can have 2 different radios plugged into it at the same time. HF & VHF ...
VHF and UHF ... whatever.
Manual is located at:
http://gmcotton.com/Ham_Radio/MISC%20Manuals/MFJ/MFJ%201278%20Manual.pdf

Includes the MFJ 12v Wall Wart power cube

$75.00 OBO + Shipping CONUS

VoCom 2CO60-Z Mobile Power Amplifier (linear)

2 watts in gets 60 Watts out, This is a nice 2 Meter mobile power amplifier.
In pretty good condition, great for handhelds to get that much needed output power.

Topic: 7672 Message: 7672

The C-3 SS is a 3-band Yagi, 20-15-10 with shortened 20m elements 24'

It's not advertised to include 6m but many users report good results and
others on 17m (with tuner) as well.

This beam has seen service in DXpeditions and some smaller elements have
been replaced. It is complete. I've had it for 2+ years.

ASKING $425. plus shipping (or picked up in SE-GA).

This is as-new, only a couple of months old, and has only
seen 100 watts.

Plans to acquire a solid state HF amp have changed so this
needs a new home.

Asking $525. including shipping to standard USA addresses.

Details here:

http://www.universal-radio.com/catalog/hamtune/4971.html

"The MFJ-998 instantly matches impedances from 12-1600 ohms"

"A large analog Cross-Needle SWR/Wattmeter displays selectable 300/60
watt or 3000/600 watt forward/reflected full-scale ranges. You can even
select automatic power ranging -- the best power range is automatically
selected for you. A two-line, 16-character backlit LCD meter displays
SWR, forward/reflected power, frequency, antenna selected, an
autoranging bargraph power indication, and much more."

"MFJ new VirtualAntenna? Memory system gives you 4 antenna memory banks
for each of 2 switchable antenna connectors. Select up to 4 antennas on
each antenna connector. Each antenna has 2500 memories, 20,000 total.
Has two coax connectors and a binding post for end-fed long wire antennas."

"You can even download and upgrade remotely. The 998 has field
upgradeable firmware via the serial port -- download so you can
upgrade your MFJ-998 as new features are introduced! This tuner requires
12-15 VDC at 1.3 amps."

7678. Antenna hardware for sale

Yahoo group: ham4sale (2007 — 2015)
Date: 2013-06-27 16:00:12 UTC
From: Rich Assarabowski
Topic: 7652 Message: 7678

Here's an updated list of antenna hardware I'm selling:

1) Boom material

--- 2 1/2" x 24' x 3/32" boom (2-piece) -- $75
--- 2" x 25'3" x 1/8" boom (2-piece with center reinforcement) -- $60
--- 3" x 15' KLM boom (1-piece) -- $60
--- 3" x 20' KLM boom with 21" of inner splice tubing extending on one end
(1-piece),
add any of the other KLM booms to make longer boom -- $80
--- 3" x 19'10" KLM boom (1-piece) -- $80
--- 3" x 16' KLM boom (1-piece) -- $60
--- 3" x 16' KLM boom (1-piece) -- $60

Buy them all for $350

2) 2" x 15'9" galvanized water pipe (~3/16" wall) (Schedule 40 1.5" pipe) --
$50

3) Lots of assorted masts (aluminum and steel, long and short lengths, good
for antennas
or for trusses) -- Make offer

4) 215 ft RG-59U 75 ohm coax, perfect for feeding beverages -- Best offer

5) Rotor and control cables

--- 90 ft 6-pair individually shielded control cable -- Best offer
--- 40 ft heavy duty 8-conductor rotor cable -- Best offer
--- 33 ft 8-conductor rotor cable -- Best offer
--- 26 ft 8-conductor rotor cable -- Best offer
--- 52 ft 12-conductor cable with ground drain -- Best offer
--- 13 ft 8-conductor control cable -- Best offer
--- 58 ft Belden 8778 6-pair individually shielded
(12 conductors total) control cable with ground
drain -- Best offer
--- 1 ft (8) lengths of RG-58A/U (Mil-spec 07145 Times Wires & Cable)
bundled together
with BNC connectors on both ends, total of 400 ft -- Best offer

6) Cushcraft 10-4CD 4el 10m monobander -- $125

7) Custom heavy duty steel bracket, use for mast to boom, sidemount, truss
or what
have you, saddle is for 2.5" pipe or you can adapt. $25

8) Two center insulators for dipoles, work fine -- $8 for both

9) Hy-Gain Ham-IV and earlier rotor lower mast support, includes new mast plates (51415-10),
new U-bolts and hardware. Would make a nice boom to mast clamp to mount an antenna
at the very top of a mast. $50

10) Aluminum heavy wall tube 3 1/2" dia x 1/2" wall x 24" long - Best offer

11) (2) custom aluminum struts with welded end plates, 22" long x 2" dia. Your use for this is only
limited by your imagination and ingenuity (boom support, tower side arm, etc.) -- Best offer

12) Center insulator for dipole -- $5

13) Section of Rohn 25 (?), I think this a tiltover tower piece. $20

14) Turnbuckle 1/2 x 12 -- Best offer

15) Thrust bearing made by Crown Controls Model GR-2. Unusual design, could also be used as
guy ring for a rotating mast. $30

16) Rohn 25 side arm mount - Best offer

17) Misc guy wire

--- 40 ft 1/4" EHS guy wire, some rust in one section -- $4
--- 44 ft 1/4" EHS guy wire -- $10
--- 30 ft 1/4" EHS guy wire -- $8
--- Insulated guy wire set, (1) pc 68 ft with 2 insulators, (1) pc 90 ft with 3 insulators, (7 pcs from
25 to 35 ft long. All 1/4" EHS with 504 insulators (the larger ones) with preforms. $50

18) Miller 6490W full body harness, XL size, never used -- $50

19) Miller climbing belt, M size -- $25

See http://konecc.wix.com/ham-radio-for-sale for pictures.

7688. Looking for a Swan 117-X or 203-X power supply

Yahoo group: ham4sale (2007 — 2015)
Date: 2013-07-01 18:21:40 UTC
From: Ray, W4BYG
Topic: 7683 Message: 7688

I recently purchased a fairly nice Swan 250. I am going to refurb it
and use it 6 meters. I have a Heath PS-23 supply which may work OK, but
I would like to find a matching Swan supply.

Anyone have one they would
sell?

Your attention is appreciated.
73,
Ray, W4BYG

7689. FS: Heathkit DX100 Parts

Yahoo group: ham4sale (2007 — 2015)
Date: 2013-07-04 03:10:06 UTC
From: Bry Carling
Topic: 7689 Message: 7689

FOR SALE:

Many parts for the DX100 bandswitching AM and CW transmitter. Tested and in first class condition.

Several transformers, tube sockets, chokes, switches, coils, coils, RF final inductor, variable
capacitors etc. are currently available.

Example: Modulation transformer (1 only) at $75.00
AF Driver Transformer $25.00
Drive potentiometer with all mounting hardware including shaft and bushing $15.00
Ceramic 1625 tube sockets - $10.00 for the pair.
Ceramic 6146 tube sockets - $10.00 for the pair.
DX100 Chassis, with many small parts - $25.00
shipping additional.

For pricing and a complete list with details please see:

7691. WANTED: Tilt-Base for 2 1/2" Rohn Push-Up Pole/Mast

Yahoo group: ham4sale (2007 — 2015)
Date: 2013-07-04 00:44:50 UTC
From: qrv@kd4e.com
Topic: 7691 Message: 7691

I need a heavy-duty tilt-base for a Rohn push-up pole/mast
that is 2 1/2" at the base.

It doesn't have to be Rohn-brand just sturdy.

It will be used with a 90' model (they discontinued that model
years ago) with sections nested to make a stronger mast at
about 45'.

I could also use a medium-duty tilt base for a shorter pole,
1 1/2" or 2" diameter at the base I believe.

Thanks! David KD4E

7693. Mobile Antennas FS

Yahoo group: ham4sale (2007 — 2015)
Date: 2013-07-05 00:15:05 UTC
From: Ken Simpson, W8EK
Topic: 7368 Message: 7693

Mobile Antennas For Sale:

HF, VHF, UHF, and multiband antennas, plus
a variety of antenna mounts and connectors

Hustler HF Mobile Antennas:

"Standard" Hustler resonators (400 Watt):
10 meter resonator RM-10 $ 12

Hustler 54 inch mobile masts:
MO-1 (folds about 14 inches above ball) $22
MO-2 (folds about 27 inches above ball) $22

Mobile Antenna Mounts:

BNC Mag Mount
Has BNC connector on the mag mount so you can add the
rubber duck from your HT.
Coax has BNC connector for your HT.
It permits one to get the HT rubber duck out of the
car for better performance. $25

Antenna Specialists Mag Mount
with short coax $15

Trunk Lip Mount
Male 3/8 inch stud, with coax. $12

Generic Mag Mount
has female 1/4 inch threaded connection, with coax $12

Mobile Antenna Springs:

I found several mobile antenna springs that appear to
be new. They are the chrome plated type, and designed
for light to medium duty use, i.e. use on VHF type antennas,
and not for heavy duty HF use.

These are about 3 inches long. I have some that are
for 1/4 inch diameter antenna mounts and some for 3/8 inch.

These appear to be new, or at least unused.
They are $5 each.

Ten Meter Mobile Antennas:

All of these are vertical mobile antennas for the 10 meter
band. Unless listed otherwise, all are for what is normally

called an "Antenna Specialists" mount, which is sort of a
reversed PL-259 type of connection. All have a spring just
above the coil, at the bottom of the whip. All are about
3 to 3.5 feet long. I have checked each with an antenna
analyzer, to determine resonant frequency. I am sure that
mounting and surrounding objects might shift this frequency
slightly, but they are adjustable.

Antenna Incorporated - 28.8 MHz - $15

Unknown brand (might be Antenna Specialists) 28 MHz
$15

Unknown brand (might be Antenna Specialists) 29.2 MHz
$15

Magnetic Mount, with antenna, coil, and mag mount as one unit.
About 18 feet of coax, with PL-259 connector.
Breaker brand, 28.35 MHz, $25

VHF Triband Mobile Mag Mount Antenna:

This mobile antenna is a VHF Triband antenna covering the
6 meter, 2 meter, and 440 MHz ham bands. This makes it
ideal for some of the newer multiband and dual band rigs
available today.

The antenna is on the order of 3 feet long and has a
very strong magnet. It has a long coax cable with a
PL-259 connector.

It works great, and looks very close to new. $75

Larsen VHF (2 meter) mobile antennas:

The first two provide about 3 db gain over a quarter wave,
and are very rugged antennas. About 4 feet long.

NMO-150 - for use on 2 meters
About 4 feet long.
This has been the standard of the industry for a very long time.
Coil only $18
Coil with whip $25

LM-150 for 2 meters
Similar to the NMO-150, but for the LM "Larsen Mount"
5/16 inch stud
Coil only $12
Coil with whip $19

NMO-Q - Quarter wave whip for 2 meters
Obviously no gain on this one.
about 19 inches long. $10

Larsen NLA Type Mobile Antennas:

These antennas fit the Larsen NLA mobile mount, which is
a special mount made by Larsen.

Larsen NLA-150, 2 meter antenna, for Larsen NLA mount
Has about 3 db gain on 2 meters.

This one works fine and looks fine also.

Coil only, without whip (whip is hard to ship). $10
With four foot whip. $19

Larsen NLA-UHF coil for 440 MHz
This is the coil only for use on the amateur 440 MHz
band and UHF public service bands. Good condition. $10

Antenna Specialists 2 meter antenna
This is a 5/8 wave antenna with a "Gutter clip" type
mount. This is ideal for more portable or temporary
installations. Includes mount, coil, whip, and coax
with a PL-259 connector. $25

Rubber Duck antennas for your HT:

All are for 2 meters, are in good condition,
and are $10 each, unless stated otherwise.

BNC - Original from Kenwood TH-215, about 5 inches long

5/16 inch threaded, as used by Motorola and others
Stubby - 4 inches long

Type F connector - 6.5 inches long

PL-259 connector - 6.5 inches long
HyGain 275, still in original packaging

PL-259 connector - Stubby - 4.6 inches long
Centurion, still in original package

BNC Stubby for 440 MHz, 3 inches long

Coax connectors and adapters:

Prices are per connector.
Several of each are available.
Most are unused.

SPECIAL: Buy 5 and take 10% off.
Buy 10 or more and take 20% off.

UHF Right angle 90 degree elbow connector $3

UHF double female "Barrel connector" $3

UHF "Bulkhead Connector" - Double female, as above, but for
mounting thru a window, siding, etc. about 3 inches long $6

UHF double male connector $3

UHF "T" connector with two female (SO-239) and one male
(PL-259) connection $5

Antenna adapter to fit the BNC connector on the HT
and provide an SO-239 connector that will permit
a PL-259 to be attached. (BNC male to UHF female) $5

UHF Male to BNC female $5

BNC male for coax cables
standard type $2
crimp on type $3

Chassis mount BNC female
square mount (uses 4 screws) $3
screw in type $3

BNC "T", two female and one male $3

I also have many other accessories available such as many
different types of microphones, HTs, HF, VHF and UHF rigs, HF
and VHF/UHF antennas, etc.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

7695. FS; Avcom MSA-4570D Spectrum Analyzer parts unit.

Yahoo group: ham4sale (2007 — 2015)
Date: 2013-07-05 22:30:55 UTC
From: Tom B
Topic: 7553 Message: 7695

I have for sale a damaged Avcom MSA-4570D spectrum analyzer parts unit.
It has the color LCD. It was made for satellite use and covers
950-2150 MHz and 40-90 MHz in two bands. It operates on 12V DC.
The equipment has some damage to LCD display and the Span pot and band
select toggle switch are broken. I has a dual 19" rackmount adapter
but I don't think it is correct for this unit because the length of the
case is too long.

The unit power up and all controls that are not damaged seem to work.
The LCD works but has a big blotch on it. It is not cracked. Because
of the damage I am selling it as-is for parts. Price is $50 plus shipping.

Photos are available.

7700. HTs and HT accessories FS

Yahoo group: ham4sale (2007 — 2015)
Date: 2013-07-06 16:50:10 UTC
From: Ken Simpson, W8EK
Topic: 7700 Message: 7700

HTs and HT accessories For Sale:

Azden PCS-300, 2 meter FM HT:

The PCS-300 HT covers the 2 meter band, and has 3 watts in
high power or 1 watt in low. It has a very good receiver.

Of course it has memories, and scan features as one would
expect. The LCD display is larger than some.

This particular HT is in its original box, and in pristine
condition. It includes the desk stand charger, and the
earphone is still in the box with it. It includes its
manual, with the original warranty card.

All of this for only $60

Yaesu FT-209, 2 meter HT:

The Yaesu FT-209R operates on 2 meters from 144-148
MHz with 2.5 watts. The controls are easy to use.
High/Low power and VOX on/off is selectable from
the top panel of the radio. 19 soft rubber, dual-
function keys provide flexible control. There is
an analog meter and digital LCD display, along
with 10 memories.

This particular radio is in need of repair, or it
can be used for parts. It is dead. It does nothing
when turned on. No display, no audio, nothing.

This is the HT only with no accessories for $10

Yaesu VX-7 Reference Manual and Programming cable:

VX-7 Nifty Mini Manual
Has most of the commands that everyone always forgets.
Permits one to have the info close at hand without needing
to carry the entire operating manual. Spiral bound with
laminated pages. Like new. $18

Programming cable
This cable has the threaded connector as used by the VX-7,
but it can also be used on the VX-6, 5, 3, etc. Uses USB port.
It works great with the free "Chirp" program. I have not
tried it with other programs. $18

HT Speaker Microphone:

This HT speaker microphone was made for the
Baofeng UV-3 dual band HTs, but it should fit
many other HTs as well. It has a single 4
conductor connector on it.

This one works fine and is still in its original
box. $8

MFJ-284 HT Speaker Microphone:

This speaker mic has the 3.5 mm and 2.5 mm plugs on
it, as used by Icom, Alinco, Radio Shack, some Yaesu,
and many other HTs.

It works with the following:

YAESU 109, 209, 709, 23, 73, 33, 727 and other YAESU
radios which are pin compatible with the above rigs.

ICOM 2AT, 02AT, 3AT, 03AT, 4AT, 04AT, 12AT, u2A, u2AT,
u4AT and other ICOM radios which are pin compatible
with the above rigs.

ALINCO DJ-560 and other ALINCO radios which are pin c
ompatible with the DJ-560

RADIO SHACK - most

SANTEC ST-20

It works great, and looks like new.

With paper work for $15.

Accessories for the Kenwood TH-21 / 31 / 41 series HTs:

Antenna adapter that fits the TH-21 series HTs, and has
a BNC on the other end. $10

Kenwood SC-8 T "Soft Case" for any of the TH-21 series HTs
great condition $12

Original Operating manual for TH-21 HT for 2 meters $8

Kenwood W09-0315 charger
This charger is used to charge the larger PB-21 H batteries
for the TH-21 series, and also on other Kenwood radios.
It has a standard 2.1 mm coaxial connector. $12

Icom BC-127 A, Battery Charger for Icom IC-Q7A
Dual Band HT:

This charger charges the NiCads or NiMH for the IC-Q7 A
Dual band HT, and Icom R-2 receiver, and probably
others.

This one appears to be new, unused, still in its bag.
Icom lists them at $21.
Buy this one for $10.

HT Belt Clips and Wrist Straps:

Belt Clips:
All include the hardware with the belt clip and are $6 each.
Icom IC-2 AT
Motorola
Yaesu FT-207
Yaesu FT-209

Wrist Straps for various HTs - $4 each
Kenwood TH-215 / 225 / 415, TR-2500, etc.
Kenwood TR-2400
Yaesu FT-209

Antennas for your HT:

All rubber ducks are for 2 meters, are in good
condition, and are $10 each, unless stated otherwise.

BNC - Original Alinco EA0024 - 4 inches long

BNC - Original from Kenwood TH-215, about 5 inches long

BNC Connector about 7 inches long

Type F connector - 6.5 inches long

PL-259 connector - Stubby - 4.6 inches long
Centurion, still in original package

BNC Stubby for 440 MHz, 3 inches long

Optoelectronics Model 7010.1 Precision Frequency
Counter:

The Opto 7010.1 freq counter is a really deluxe
unit. It operates up to 600 MHz. This particular
model features an extra precision TCXO, guaranteed
at 0.1 ppm. Most of these counters came with a
"standard" TCXO that was 1 ppm.

This unit has three frequency ranges -- 10 hz to
12 MHz, 10 MHz to 50 MHz, and 25 to 600 MHz. It
also has three time base counting periods of .1
second, 1 second, and 10 seconds.
This permits extreme precision!

This unit functions flawlessly, and looks like it
has never been used, other than for my testing of
it. It is in its original box, complete with power
cube, the original manual, the original warranty

card (not filled out), and certificate of calibration.

All of this for only $125.

Crystals for 2 meter ham rigs:

Does anyone have an older two meter ham rig and need crystals?

Maybe I can help. I have some 2 meter crystals available -- both transmit and receive. Most are in the 146 and 147 MHz band segments, with very, very few in the 145 MHz segment, and none in the 144 MHz segment. These are for ham rigs only, and not commercial rigs.

These are all the small HC-25 crystals, like are used in most of the solid state 2 meter mobiles and HTs. Please e-mail the operating frequency you need. I have them listed by operating frequency and rig,and not by actual xtal frequency. Send the frequencies you need (transmit or receive), and the rig that you have, and I will see if I can help. I have cross references for the various rigs, so I will know what you need if you give the rig.

Coax connectors and adapters:

Prices are per connector.
Several of each are available.
Most are unused.

SPECIAL: Buy 5 and take 10% off.
Buy 10 or more and take 20% off.

UHF Right angle 90 degree elbow connector $3

UHF double female "Barrel connector" $3

UHF "Bulkhead Connector" - Double female, as above, but for mounting thru a window, siding, etc. about 3 inches long $6

UHF double male connector $3

UHF "T" connector with two female (SO-239) and one male (PL-259) connection $5

Antenna adapter to fit the BNC connector on the HT and provide an SO-239 connector that will permit a PL-259 to be attached. (BNC male to UHF female) $5

UHF Male to BNC female $5

BNC male for coax cables
standard type $2crimp on type $3

Chassis mount BNC female
square mount (uses 4 screws) $3
screw in type $3

BNC "T", two female and one male $3

I also have many other accessories available such as many different types of microphones, HTs, HF, VHF and UHF rigs, HF and VHF/UHF antennas, etc.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

7702. FS: MFJ-998 1.5KW HF Autotuner as-new

Yahoo group: ham4sale (2007 — 2015)
Date: 2013-07-06 20:48:16 UTC
From: qrv@kd4e.com
Topic: 7702 Message: 7702

MFJ-998 1.5KW HF Autotuner

As-New condition, only used briefly at 100w

160-10M
Rated 1.5KW
Tunes almost anything.
Surprisingly quiet.

INCLUDES:
"SSB/CW/Digital & Analog SWR/WattMeter
All features of MFJ IntelliTuners;
Ultra-fast, Safe Automatic Tuning,
Wide Tuning Range (12-1600 Ohms from 1.8 to 30 MHz)
Radio Interfaces
Built-in Antenna Switch for two coax/long wire
Automatic Bypass protects your amplifier
Field Upgradeable Software"

Only used at 100w due to amplifier project being abandoned.

Purchased March 2013. Looks like new in original box w/manual.

Asking $519. including shipping to standard USA addresses (some
locations may be extra).

This is *$100. less than new* and no added shipping or tax.

7703. HENRY 2K AMPLIFIER For Sale

Yahoo group: ham4sale (2007 — 2015)
Date: 2013-07-06 21:38:42 UTC
From: factortim
Topic: 7703 Message: 7703

Henry 2k amplifier in excellent condition. This amplifier was stored for 5 years and used in a non smoking environment. Two 3-500Z tubes will require gettering to degas. It was working as designed prior to being put into storage due to relocation. My current QTH is too small for this amplifier. What I want is a new Ameritron 811H. Will consider trade. Wired for 220vac. Original Operating Manual included. I will not ship. Pick up at my Newport Beach, CA. QTH.
Pictures available upon request.

Price $1800. PayPal, Cash or Cashier's check

7704. Estate of K0ETC, Joplin, MO

Yahoo group: ham4sale (2007 — 2015)
Date: 2013-07-07 22:47:54 UTC
From: Ray Brown
Topic: 7704 Message: 7704

I'm making this post on behalf of the wife of the late Jay Rupar, K0ETC,
of suburban Joplin, MO. I have seen the equipment and have pictures of
everything I'm listing here.

Two Alliance rotor controls and one rotor;
Yaesu FT-736R CAT, covering 6m, 220 MHz, 2m, and 432 MHz all modes;
Kenwood TS-690S;
Mirage B1016G 2m amplifier;
Astron RS-35M power supply;
Heathkit linear amplifier, 10 to 80m, 240V
(has 2 # 572B tubes);
Heathkit SB 200 amplifier, 10 to 80m;
Tektronix 465B oscilloscope, with Option 4;
Heathkit HL2200 amplifer, 2KW, 240v, 15 to 80M
(plaque says built by "James R Wilson");
homemade QRP transmiter with "325" crystal;
Command Set transmitter with book and D104 microphone;
Heathkit QF1 tuner;
Halicrafter S-20E Sky Champion reciever;
Bioscience microscope;
Heathkit HM-2102 SWR meter;
Heathkit HW-202 6 frequency 2m crystal mobile,
with "13" and "52" crystals and a Midland microphone;
Heathkit SB-102 amplifier, 10 to 80 meter;
Collins 75A-2 reciever;
Yaesu MD-1 microphone;
National NCX-3 transmitter;
Two Heath DX 100 transmitters, 11 to 160 meter;
CTT Tools drill press;
Systron Donner signal generator;
Exact Model 121 sweep function generator;
Tektronix 465 oscilloscope;
Tripplet 601 volt-ohm meter;
Global Specialties MAX-500 frequency counter;
Monsanto 8510 50 MHz counter/timer;
PowerStat variac.

Antennas: *
Two Cushcraft 5 element 6m beams;
A 10-element 1.25m beam;
A 13-element 2m beam;
A 40+ element beam on 432 MHz.

(* All antennas and the rotor are still mounted on the roof
of the house, but can be easily taken down.)

Also, oodles and oodles of components, books, magazines,
and other rf-related items too numerous to count.

I have pictures of all of the above items, but they are still located
four miles south of downtown Joplin. Barbara Rupar is not a ham and
cannot answer any technical questions about the gear. She does need
to get rid of it all, and would like interested persons to contact her directly
at 417 623-8219 (leave a message) and make offers on the gear or
arrange to see it.

Otherwise the items will be at the 2013 Joplin Hamfest in a few weeks.

Thanks for the time to look, spread this around, and 73.

From: Chris Boone
Topic: 7709 Message: 7709

For sale (most below local pickup preferred or YOU ship; contact me direct for details and pricing...taking SERIOUS offers):
It sells by the end of the month or its gone to the scrap heap..

16-20 Midland 70-530B UHF radios..with brackets, power cables and mics
Make great link radios in the 430 range with them.

Knight T 60 transmitter

National NC300 receiver with speaker and 6/2/220 convertors (all untested) Local pickup or you ship

Heathkit HA10 Warrior HF 1KW amplifier (tested and works with tubes; needs external antenna relay) Pickup only OR you ship (it is heavy)

GE UHF MII receivers (rack mounts remote receivers)

GE Lowband MII rackmount receiver on 29.6

GE MII UHF 45w repeater

GE MII UHF 75w repeater already on 444 range

Midland UHF Base Tech repeater (100w) in excellent condition

2 UHF circulators

GE MII VHF 100w repeater

FT 690R MKI all mode 6m portable complete with antenna, pouch, etc.

Comtronix FM 200 6m FM only 52-54 rcv with -MHz offsets and additional user option (no tone board)

DB 201 ground plane antennas (on 48MHz now)

DB 212 trombone style side mount antennas (same as above)

WP604 WACOM low band duplexer (48MHz) - modifiable to 6m

GE MSTR IIs and MVPs on lowband 42-50MHz; just xtal on 6 and retune or still usable on lowband (since the NarrowBand rules did not affect lowband)

GE EXEC II on 26.xx MHz...perfect for 10m remote base or rptr (split unit with UHF/VHF radio)

A number of Midland SYNTECH IIs on lowband..can be programmed for 6 FM and make the best 6m FM mobile or base anywhere. Also have some XTRs on verious bands (also some 1526 and 1336 8 channel models).

RLC 3 repeater controller with 4 radio cards. V 2.15 installed.

RLC DVR for above controller. Fully loaded with memory

ACC DVR for RC-xx controllers. All 3 channels loaded with memory. In factory rack mount chassis

LOTS OF HELIAX.....(have a spool already spoken for but plenty more off spool for sale).. 1/2in, 7/8in and one 125-150 foot run of 1 5/8 with NEW in plastic connectors..ALL pickup only...
Contact for pricing and lengths.

Topic: 6888 Message: 7712

Several Power Supplies For Sale
From high current to low current

Icom PS-30 Deluxe Metered Power Supply:

The Icom PS-30 power supply is a deluxe supply that delivers
13.8 VDC at 25 amps. This power supply features a meter which
can be set to display amperage or voltage. Four outputs are
provided on the rear panel. Output 1 is a hard wired, high
amperage cable with the Icom standard 6 pin Molex plug.
Outputs 2, 3 and 4 provide lower current 13.8 VDC output.
This power supply has a snap-out tilt bracket.
Size: 9.5 x 5 x 12.5 inches.

This particular supply works fine, and looks very close to new.
Absolutely pristine. It is in its original box, with paper work.
$200

TenTec 25 amp switching power supply:

"Switcher / 25" 25 amp switching power supply

This is a 25 amp switching power supply in a case that
matches the early Omni series case, with the metal bezel
around it. It is in a case that is the same size as a 243
remote VFO. It has an ammeter on the front, along with
Switch, TenTec logo, and output bulb. The front panel
basically looks like a 280 power supply with a metal bezel,
but says "Switcher/25" on it. It is electrically very quiet,
and well shielded. It does not produce any electrical noise
that I could find.

Of course it works fine, and looks fine also. $140

Astron RS-20A Power Supply:

The RS-20A is a DC Power Supply producing 13.8 V DC (internally
adjustable from 11 to 15 V DC) at up to 16 amps continuous and
20 amps ICS. The RS-20 features crowbar over voltage protection
and fold-back current limiting to protect your equipment.

This particular supply works fine, and looks very close to new.
There is one very small scratch that can be seen if the light
is just right, but is not normally visible.

With paper work for $60.

Kepco Variable Bench Power Supply:

This is an ideal bench power supply! It is a Kepco Model ABC 40-0.5, which means that it will produce from zero up to 40 V DC at up to 1/2 amp. Great for the bench.

The voltage is adjustable with a 10 turn pot from close to zero, up to about 40 volts. There is a fairly large analog meter that reads the voltage. There is also current limiting built in that is adjustable from about 100 ma to up to about 700 ma. The same meter that reads voltage can be switched to read current, or short circuit current (the point that the current limit is set). In addition, there are connections on the back to allow remote sensing and remote programming. This is a quality regulated power supply!

This particular unit works 100%, and looks extremely nice.

Only $85.

Micronta 22-120 A Regulated power supply:

This supply is rated at 2.5 amps at 13 V DC. It is well regulated. It has a switch and LED power light on the front, with a circuit breaker and output terminals on the back. The case (left and right side and top) is basically all a heat sink, so it should cool the regulator well.

This one works fine and looks like new. No scratches. $30

KemTronics Power Supply:

This power supply is in a slopped enclosure that is made to set your rig on top, at an angle for good viewing and sound. It is good for about 3 amps, or to put it another way, would be great for powering 2 meter rigs in the 10 to 15 watt category.

This one is a "Tech Special". It produces no output voltage. It looks fine, however. $5

"Wall Wart" Power Supplies:

All of these are "regular" wall warts - not the new switching type that create all sort of noise in your receiver. Use one of these, and leave the noise behind.

12 V DC at 625 ma
Many uses for the 12 volt variety! $14

Heathkit "Converter / Charger"
9 Volts DC at 100 ma.
No Heath number on this, and I don't know what it was used on originally. It can be used either as a 9 Volt DC "power pack" or as a charger. It has a 2.5 mm male plug on it, with

the tip positive, so it can be used on many devices. $10

9 Volt DC at 500 ma
This one was used on a MFJ 422 keyer, but will also power
other items needing 9 V DC at low current. It has a
2.5 mm male plug on it, tip positive. $12

I also have many other ham items available. Please e-mail
me if you have specific needs. I might be able to help you.

Prices do not include shipping from Florida.

Thanks.

7714. 6 meter all mode radio for sale

Yahoo group: ham4sale (2007 — 2015)
Date: 2013-07-12 17:11:38 UTC
From: af5cc
Topic: 7714 Message: 7714

I have a 6 meter all mode (CW/SSB/AM/FM) radio for sale if anyone is looking at getting on the magic band, or needs another radio for 6m. You can't have too many 6 meter radios, can you? . Right now is the best time of the year for 6 meters, so don't miss out. Ask any 6m operator how wonderful 6 is.

The radio I am selling is a Ranger 5054DX-100. It is in excellent condition and works fine. I have made quite a few nice contacts on it recently. It does 100 watts on SSB and 50 watts on CW/FM/AM. It comes with the power cable, microphone, mobile mounting bracket, manual, and box. It is a complete setup ready to go on 6m, you just need a power supply and antenna.

No menus on this radio for those of you who hate menus. Every button has only 1 function. Has a built in SWR meter and noise blanker as well. I am asking $250 plus shipping for it. When you see that the older 10 watt 6m rigs are going for $200 or so you really realize what a bargin this is.

I am always open to trade offers as well. My email is (my call) at FIDMAIL dot COM.

7717. HF Antenna Tuners and Wattmeters FS

Yahoo group: ham4sale (2007 — 2015)
Date: 2013-07-13 16:02:29 UTC
From: Ken Simpson, W8EK
Topic: 7651 Message: 7717

HF Antenna Tuners and Wattmeters For Sale:

From very high power to lower power,

MFJ 984 Versa Tuner IV, 3000 watt Antenna Tuner:

MFJ says this will handle 3000 Watts PEP. Since the legal
limit is half of that, you will be fine at legal power.

It covers 1.8 to 30 MHz with 250 pf 6kv caps and matches
anything you want to throw at it, or so it seems.
It also includes an RF ammeter at the output of the tuner
so you know how much actual RF current you are putting
into the antenna. There's a wattmeter/swr bridge built
in along with a small dummy load.

It has rugged heavy-duty construction. Switches are rated
for 2KV and 17 amp carry capacity. There's a 4:1 balun
and real ceramic feed through insulators.

This particular unit works fine. The case looks very nice.
There is slight wear on the front panel, and one small
scratch that you can see if the light is just right.

Paper work is included for $200.

MFJ 962 B, 1500 Watt Antenna Tuner:

This HF antenna tuner is rated for 1500 Watts from 160
thru 10 meters. It features a cross needle wattmeter
that will read forward and reverse power, and SWR
simultaneously. Full scale readings are 2000/200 watts
forward, and 500/50 watts reverse. An antenna switch
is built in, as is a balun. The meter has a back light
that may be turned on or off. You need 12 V DC to
power the light.

This tuner works fine, the meter works fine, and it
lights properly. The cosmetics are good. The case
looks great. The front panel shows some wear.
Wear, but not scratches.

With paper work for $160.

Joymatch "Lo-z 500" Antenna Tuner:

This antenna tuner is manufactured by Partridge Electronics
Ltd in England. It appears to be an "L" network with a 12

tap inductor and a single tuning capacitor. Apparently back
in the 1960's or 70's Partridge made an antenna they called
the Joystick. This is an antenna tuner that could be used
with it, but of course it can be used with other antennas
as well. It would appear to work on 80 thru 10 meters
(including WARC bands). L networks only match impedances
one direction, i.e. only lower than 50 ohms, or only higher
than 50 ohms. You can change the direction of match by
swapping the coax cables between the two SO-239 connectors.

I don't think the 500 means 500 watts. It looks more like
it would handle 100 watts.

This tuner works fine and looks great. $50

MFJ 815 B Cross Needle Peak Reading HF Wattmeter:

Cross needle reads forward and reverse power simultaneously
SWR displayed also
300/3000 Watt forward and 60/600 Watt reverse
peak or average reading meter
160 thru 6 meters
12 V DC needed for lighted meter

This particular unit works fine, and looks very close to new.
With paper work for $65.

Daiwa CN-520 "Cross Needle" wattmeter:

This wattmeter covers 1.8 to 60 MHz, and is the "cross needle"
type, so it reads SWR at the same time it reads forward and
reflected power.

Forward scales of 2000 W or 200 W; reflected 400 W and 40 Watts.

This one looks very nice and works like new,
with the paperwork for $65.

I also have many other accessories available such as many
different types of microphones, HTs, HF, VHF and UHF rigs, HF
and VHF/UHF antennas, etc.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

7720. FS: New 20m mini hamstick

Yahoo group: ham4sale (2007 — 2015)
Date: 2013-07-13 22:12:52 UTC
From: John Geiger
Topic: 7720 Message: 7720

I have for sale a MFJ mini hamstick for 20m. This one is the 3 foot tall version with the 3/8 x 24 adaptor on the one end, and works fine in one of MFJ's 5 inch mag mounts (not included). MFJ sent me the wrong band by mistake-supposed to be the 17m one, I already have one for 20, so I am offering it to someone who can use it.

Does a 3 foot tall mobile antenna work? Well a few weeks ago while mobile I worked Japan, England, Siberia, and Hungary using the 20m minihamstick and 40 watts, so yes they do work!

These sell new for $19 plus shipping at R and L electronics, but they are also out of them right now. I am asking $20 shipped for it and can take paypal/check/MO. This is brand new, never opened.

7721. Vintage TI Transistors FS

Yahoo group: ham4sale (2007 — 2015)
Date: 2013-07-13 23:26:33 UTC
From: Byron
Topic: 7721 Message: 7721

Hello-For sale are approx. 80 each Texas Instr. 2N1304 and approx. 80 each Texas Instr. 2N1305 transistors. Most of these devices are in the Texas Instr. paper sleeves, some are loose. All are NOS with gold leads. I am not sure of a date code, but they came out of a parts stocks from many years back. Plus, there are a handful of other older transistors thrown in bag. 100.00 plus shipping for all. Thank you.

7722. FT-857D and Accessories for sale or trade

Yahoo group: ham4sale (2007 — 2015)
Date: 2013-07-14 13:36:02 UTC
From: John W5JMC
Topic: 7722 Message: 7722

I have a Yaesu FT-857D for sale (or possibly trade). Electronically, the radio is in great shape; it was recently serviced by Burghardt Radio Repair Inc (had a 2m transmit issue that was fixed). The radio has been used mobile and shows some minor wear, scratches, etc. Mechanically, there are two issues. One is that the the volume/squelch knob is bent just a little. Both knobs operate, but you may have to use two hands (e.g. hold the squelch knob to turn the volume knob). The second issue is the little piece of plastic that locks the front control panel into the rig or the mounting bracket chipped off. Operationally, the radio works great. Pictures on request.

The radio comes with the original box, manual, microphone, power cable with Anderson Powerpole connectors and the following accessories:
- Collins SSB Filter
- LDG FT Meter
- LDG Z-100 Tuner with cables
- MH-59A8J DTMF mic
- Mobile mounting bracket
- Remote mount/separation cables
- Programming and data cables
- W2ENY headse

Taking into account the two mechanical issues described as well as the $200 plus in extras - I am asking $600 for the package. I would be interested in trades (plus cash as appropriate) for the following: SGC SG-500 amp, IC-706MK2G, IC-7000, FT-897D, FT-847, FT-920, a Uniden Homepatrol 1 digital scanner (+ cash). I am willing to entertain offers.

7723. FS: Yaesu FT857

Yahoo group: ham4sale (2007 — 2015)
Date: 2013-07-14 14:58:41 UTC
From: af5cc
Topic: 7723 Message: 7723

I have for sale a Yaesu FT857 in good condition with 1 issue. It works fine on HF (I have worked 75 countries on it in 2 months), 2m and 70cm (I have made some satellite QSOs with it). However, it is going into oscillation on 6m and is currently unusable on that band. So, if you need a HF, 2m and 70cm rig, here you go. It has the TCXO installed as well, which is a $110 options. It has some scratches on the case from being mobile. It does have the DSP unit installed. It comes with a power cord and manual, but no microphone.

The price is $400 plus shipping. This is an as-is purchase, as I have been up front about the 6m side of the radio not working.

7727. Yaesu MH-67 mic for parts

Yahoo group: ham4sale (2007 — 2015)
Date: 2013-07-14 19:25:13 UTC
From: af5cc
Topic: 7727 Message: 7727

I have for sale a Yaesu MH-67 that worked fine until this morning. I heard something rattling around in it (but it was still working) so I opened it up and a solder blob fell out. Now when I attach it to my FT450 it puts the rig in transmit. Not sure what happened, but it is a parts mic now. Cord still looks great on it.

I am asking $15 shipped for it and can take paypal/check/MO

7729. FS: HF 300w Antenna Tuner w/Meter, Switch, & DL

Yahoo group: ham4sale (2007 — 2015)
Date: 2013-07-15 01:13:35 UTC
From: qrv@kd4e.com
Topic: 7729 Message: 7729

"You can tune any real antenna from 1.8 to 30 MHz, including all MARS and WARC bands. Use verticals, dipoles, inverted vees, yagis, quads, long-wires, whips, G5RVs, etc."

"The VC-300D backlit Cross-Needle Meter displays SWR, forward and reflected power simultaneously. Reads both peak and average power on 30/300 Watt scales."

Asking $75. including standard USA shipping (some locations may be extra).

This came from an estate. I ran a couple of quick tests and it seems to work but I bought a Dentron AT-1K tuner so didn't need this one. Sold as-is.

"Includes 21 segment bargraph display that makes analyzing SSB power easy. LED meter shows peak reading and has fully adjustable level and delay controls."

"Vectronics exclusive Multi48? inductor gives you forty-eight inductance values -- you'll get precision tuning that rivals the most expensive roller inductors."

"The VC-300D either position antenna switch lets you select two coax fed antennas, random wire/balanced line or built-in dummy load for use through your tuner or direct to your transceiver. Bypass position bypasses your tuner but keeps your SWR Power meter in line."

"A built-in 50 Ohm dummy load makes tuning up your rig easy! Use it for testing and repairing your rig, setting power level adjusting your mic gain and more."

"Has 4:1 balun for balanced line antennas. Handles up to 300 Watts SSB PEP, 200 Watts continuous (150 Watts on 1.8 MHz)."

"Meter lamp has front panel switch and uses 12 VDC or 110 VAC with AC-12 adaptor (not Inc.)"

"A chemically treated aluminum case with durable baked-on paint and scratch proof multi-color Lexan front panel."

7731. FS: Coax pigtail and balun for MFJ 6 meter beam

Yahoo group: ham4sale (2007 — 2015)
Date: 2013-07-15 01:42:14 UTC
From: af5cc
Topic: 7731 Message: 7731

Here is something I found while cleaning out the ham drawer today. It is a coax balun and pigtail for the MFJ 3 element 6 meter beam, which makes it easy to connect your coax right to it. It consists of a 3 foot run of RG8X, which has been coiled into a coax balun. On one end are the solder lugs which attach to the feedpoint of the beam. On the other end is a PL259 which is attached to a SO239 double barrel connector. You just hook your feedline to the other end of the double barrel.

I am asking $14 shipped for it. Heck, the coax and double barrel is worth more than that. I can take paypal/check/MO.

7732. Yaesu FT450 HF/6m radio for sale

Yahoo group: ham4sale (2007 — 2015)
Date: 2013-07-16 02:08:13 UTC
From: af5cc
Topic: 7732 Message: 7732

I have for sale a nice condition Yaesu FT450 HF/6m radio. The FT450 does it all. It comes with a built in TCXO, IF-DSP so it has noise reduction and narrow filters for both CW and SSB , a CW memory keyer, a voice keyer, and a voice synthesizer to announce your frequency and mode. It comes with the MH-31 hand mic, manual, original box, and a short power cord terminated in Anderson powerpoles.

The MH-31 hand mic is much better than the stock MH-67 mic that comes with these rigs, as you can program the UP/DOWN/FAST buttons to control different functions of the radio. I was using the buttons to control the voice keyer during the IARU contest this past weekend. Also, the previous owner of this radio installed some longer feet on the front of the radio, so it tilts up like most other radios do, that was one of the big complaints of the FT450 was that it didn't have flip up feet or a tilt down bail. These feet could be removed if so desired.

I am asking $475 plus shipping for this rig, and can take paypal/MO/check. I will ship fedex ground unless you need to have it some other way. You can check my ebay feedback if you like under the username dxon6m. I know I will miss this radio, but I am replacing it with something that does 2m SSB as well. I am too much of a VHF nut to limit myself to 1 VHF/UHF band.

If I may suggest, join the groups 900MHz and AR902MHz - those groups focus on the use of that band. (I am a member there as well, since I operate a 900 repeater near Chicago.) You'll have a much better chance of finding someone local to you to be able to program that radio. I could do it for you, but I'm nowhere near Phoenix, AZ. (Phoenix, IL -- yes! hehehehe)

Just to let you know, those radios are known for being "finicky" on the Amateur portion of the band. They do NOT scan properly, and some exhibit power output control problems. It is fixable, but involves more than mere programming. I've used GTXs (both mobiles and HTs) on the band in the past, with mixed results.

Good luck and welcome to 900 MHz!

Mark - N9WYS

Date: 2013-07-17 01:30:34 UTC
From: John Geiger
Topic: 7736 Message: 7736

I have for sale a Yaesu CT-39A packet cable which is a 6 pin mini DIN plug on a cable with the other end terminated in bare wires. Great for interfacing your rig to a TNC or soundcard for digital modes. They sell new for $9.95 plus shipping (I think R and L charged me $6 for shipping it), I am asking $10 shipped for it. It will work with Icom rigs as well if they have a 6 pin mini DIN plug on them.

7738. Sell/Trade: Icom, etc BP-173 HT Batteries

Yahoo group: ham4sale (2007 — 2015)
Date: 2013-07-18 19:20:57 UTC
From: qrv@kd4e.com
Topic: 7738 Message: 7738

I have ten BP-173 rechargeable packs which I believe fit ICOM
IC-Z1A, IC-W31A, IC-W32A, IC-T22A, IC-T42A, IC-T7A, IC-T7H,
IC-T7E, IC-W32E radios etc.

I've decided to go with AA-packs only.

All packs take and hold a charge but are sold as-is.

The whole lot, batteries & chargers $89., shipped, or trade for
three new, or excellent condition used, BP-170L 6xAA cases.

Here's the list:
Icom (three - 9.6v 650 mAh)
Kendoo (one - 9.6v 600 mAh)
MAHA (one - 9,6v 650 mAh, one 7.2v 1000 mAh)
W & W (four - 9.6v 650 mAh)
ICOM BC-110A charger (two)
MAHA MH-101-I3 NiMH/NiCAD Drop-In Rapid Charger for ICOM (one)

I'll sell one BC-110A charger & the Kendoo 9.6v 600 mAh pack (it doesn't
fit the MAHA drop-in charger & must be charged while on the HT) for $20.
including shipping standard USA.

Then the rest for $75. incl. standard shipping USA (shipping costs are
rising)

Topic: 7748 Message: 7748

4 ft. Fiberglass Military Poles for Sale

These poles are great for permanent and temporary antennas!

They are great for HF, VHF and UHF antennas!

Experiment in the back yard, go portable, use on Field Day, or for EMCOM and even permanent installations, with or without guying depending on load. The sections are not tapered but have a fitting embedded in one end that slides inside the next section which enhances their strength and usefulness! I regularly go up 30 ft for wire and lightweight 2 meter antennas without guying.

Bundles of 5 poles $20 each + shipping

Please indicate how many bundles you are ordering..

Will ship by any regular carrier, but UPS or FEDEX are preferred.

Payment via PayPal to W2TTT@...

Inquires to Gordon W2TTT@... or 201.314.6964

Thanks & 73,

Gordon Beattie, W2TTT

7760. Kenwood TS-450SAT for sale

Yahoo group: ham4sale (2007 — 2015)
Date: 2013-07-27 02:31:57 UTC
From: John Miller
Topic: 7760 Message: 7760

I have a Kenwood TS-450SAT, covers 160-10 meters. Minor issue, the LSB light stays on no matter what the mode but it also shows the correct mode. Currently has the peixx company VS-2 voice board for frequency read out, if you don't want it I can pull that and cut the price. It would be a great beginner or backup radio, it's my backup now how ever a bill came up and I need to sell something. It has some minor scratches, a short power cord, I ran it for a month while the primary radio was in the shop a couple months ago. I don't have the mic for it but it takes the standard Kenwood 8 pin mic. asking $450 plus shipping but will consider anything remotely reasonable. I take paypal or money orders.

Date: 2013-07-27 17:36:44 UTC
From: J.Gordon Beattie, Jr., W2TTT
Topic: 7748 Message: 7761

4 ft. Fiberglass Military Poles for Sale

These poles are great for permanent and temporary antennas!

They are great for HF, VHF and UHF antennas!

Experiment in the back yard, go portable, use on Field Day, or for EMCOM and even permanent installations, with or without guying depending on load. The sections are not tapered but have a fitting embedded in one end that slides inside the next section which enhances their strength and usefulness! I regularly go up 30 ft for wire and lightweight 2 meter antennas without guying.

Bundles of 5 poles $20 each + shipping

Please indicate how many bundles you are ordering..

Will ship by any regular carrier, but UPS or FEDEX are preferred.

Payment via PayPal to W2TTT@...

Inquires to Gordon W2TTT@... or 201.314.6964

Thanks & 73,

Gordon Beattie, W2TTT

From: hankeyster
Topic: 7763 Message: 7763

Have owned this Q-Meter for years , and has been used only a few times per year. IT WAS FULLY OPERATIONAL AND JUST LOST THE THERMOCOUPLE , so now its a parts unit. Unit is in very good shape !

EVERYTHING WAS OPERATIONAL AND TUBES ARE IN GREAT SHAPE ACCORDING TO THE CAL. PROCEDURE.

Since its a large unit and heavy , can part out the unit (except for the failed thermocouple).

If you need a part or spares , please contact me off-forum.

Thanks
Hank

7764. Standard Repeater RP70 for sale or swap

Yahoo group: ham4sale (2007 — 2015)
Date: 2013-07-28 01:53:06 UTC
From: kb6gk@sbcglobal.net
Topic: 7764 Message: 7764

I have a Standard Repeater RP70 for sale or swap. It is untested. It powers up and lights up. Currently set up for 461.3875 with a 5Mhz offset and a PL of 173.8

I don't have any use for it and it may or may not work perfectly. If I can dig up a mic and dummy load or antenna I may be able to test it. I will look around. Is there any interest in this repeater? I am guessing it is synthesized but just found it today in the electronics recycling at the TV station I work at. I might be ableto check it out and play with it if I can find some time.

7765. FS: brand new 6 pin power cord

Yahoo group: ham4sale (2007 — 2015)
Date: 2013-07-29 22:03:59 UTC
From: John Geiger
Topic: 7765 Message: 7765

I have for sale a brand new, never used 6 pin molex power cord which is used on many HF radios. Has the fuses in line, and the molex plug is already attached. It uses zip cord which is attached together, which is much neater than some of the yaesu cords are. I am asking $20 shipped for it and can take paypal/check/MO.

From: Charles Rader
Topic: 7766 Message: 7766

Cleaning out some equipment and getting rid of projects stuff that I just don't have time for any more.

1) 2 year old Yaesu FT-8900 10m/6/2/440 quad band radio. Works great and was mobile since purchasing maybe had 2 hours total talk time since buying. Also comes with YSK-8900 separation kit, MLS-100 External speaker, USB programming cable and if I can find the software CD then it will come with it. $325 plus shipping.

2) Diamond CR-8900A Quad band mobile antenna for above radio $50.00 plus shipping.

3) Diamond V-2000 Tri-Band Base antenna, brand new never pulled out of package. Did pull the mounting hardware out and opened it to see if I could use it for another project but never used it. $100.00 plus shipping.

4) Comet CFX-514J Triplexer, brand new never out of package. Purchased for above but never used. $50.00 plus shipping

5) MFJ345 UHF Trunk Lip antenna mount 10' coax and ended in PL259. Wrongfully purchased for above but didn't work on my vehicle. $20.00 plus shipping.

6) VHF CDM1550 Used as remote base. AAM25KHF9DP6AN Remote mount kit included. 15 foot home made cable. $150 plus shipping

That's it for now.

7772. Icom IC-W21AT dual band HT for sale

Yahoo group: ham4sale (2007 — 2015)
Date: 2013-08-02 02:29:09 UTC
From: ky7hvh
Topic: 7772 Message: 7772

I have this Icom IC-W21AT dual band (144-148MHz and 440-450MHZ) handy for sale. It has a problem though, the keyboard is only partially working. Otherwise it works fine. This was Icoms' attempt to make a stylish HT. It didn't impress many Hams.

See here: http://www.universal-radio.com/catalog/ht/w21at.html

Comes with Cool looking dual band rubber ducky (original), Belt clip and a very dead battery. Also included is the 12DC power supply and charger (new). It is standard with ctcss encode and decode, 5 transmit power levels, and 10 settable tuning steps. See above link for all the specifications. The internal memory is working as it does retain the memory.

The receivers are independent and can be set as V/V, U/U or V/U. Has 2 volume and 2 squelch controls 1 for each band.

Asking $75 shipped in US.

I accept USPS M.O., Pay Pal and personal checks (with standard 10 day wait for clearance).

Dennis

KY7HVH.

7773. HF Linear Amplifiers FS

Yahoo group: ham4sale (2007 — 2015)
Date: 2013-08-03 16:41:13 UTC
From: Ken Simpson, W8EK
Topic: 7773 Message: 7773

HF Linear Amplifiers For Sale:

Amp Supply LK-500 Z A, HF Amplifier:

The LK-500 is an HF amp that runs a pair of 3-500 tubes, on the 160 thru 10 meter bands, producing close to the legal limit. On this amp, 30 watts of drive produces about 400 watts out of the amp; 50 watts gives about 650 Watts out; etc.

This amp has a MUCH heavier duty Peter Dahl power transformer, and covers 160 meters. It has a excellent tuned input matching circuit. It is a superior amplifier.

This particular amp works very well. It has a manual step start circuit added, and the electrolytic capacitors have been replaced. Cosmetically it looks very, very nice. I can not find a scratch on it. It looks like new.

Since this is heavy, I would much prefer pickup in the Ocala, FL area.

With paper work for $900.

Ameritron AL-572, HF Amplifier:

Ameritron's new class of Near Legal Limit Amplifiers give you nearly full legal SSB power output for a much lower price. You get 1300 Watts PEP SSB nominal power out on amateur bands 160-15M.

Two lighted Cross-Needle Meters
Grid current, plate current and forward PEP output power are continuously monitored to tell you of proper loading and alert you to abnormal conditions. A fourth scale switches among peak reflected power (and SWR), high voltage, ALC threshold and ALC output voltage.

It has a transmit LED, 12 VDC, 200 mA accessory jack, and 12 VDC keying relay for solid state/tube rigs.
It draws 16 amps at 120 VAC, but can also be used on 240 V AC.

Features:
Instantaneous RF Bias
Step-Start Inrush Protection
Heavy duty power supply
Pi/Pi-L network

Tuned input
Dual lighted Cross-Needle meters
6:1 vernier reduction drives
Four rugged 572 B Tubes

This particular amp is in extremely nice condition
both cosmetically and electrically. Everything works
100% and it looks very close to new.

Paper work included for $900.

TenTec Hercules II 420 HF Amplifier:

This is a fully solid state all-mode HF linear
amplifier covering 1.8 to 30 MHz continuously.
It requires 13.6 VDC at 100 A max. Drive power
is 50 to 80 W typical for 550 W output. Maximum
Power output on SSB/CW/RTTY is 550 W DC at 50%
duty cycle.

This amp features full QSK break in CW. It can
be remote controlled (bands switched remotely)
from many transceivers.

This particular amplifier looks extremely nice.
I can not find a scratch on it. Electrically, I
think all works fine. It requires a 13 V DC power
supply in the 80 to 100 amp category. I only have
a 35 amp supply to test it with. As a result, I
only get 250 watts out of it before the power supply
over current limit kicks off. But all of the QSK
and everything works fine, as long as I keep it low
enough for the power supply I have.

With paper work for $900.

Heath SB-200 HF Linear Amplifier:

The SB-200 uses a pair of 572B tubes, and operates
on 80 thru 10 meters. It may be used on SSB, CW,
or digital modes.

This particular amplifier puts out about 750 watts
on 20 meters, and has been tested for operation on
all bands.

Cosmetically, it is in extremely nice condition.
I can not find a scratch on it.

Paper work is included for $475.

In all cases, pick up of the amplifier is first choice.
The amplifiers are heavy and hard to ship. I am located

near Ocala FL, not far off of I-75.

Obviously, if it necessary to ship, the cost is not
included in the prices listed.

I also have many other accessories available such as many
different types of microphones, HTs, various transceivers,
HF and VHF/UHF antennas, etc.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

73,

Ken, W8EK

☐Rear panel DSUB9 computer connection
☐No need to remove mic for packet operation
☐CTCSS, DCS encode+decode, DTMF encode and Tone-burst are all standards
☐Clean, clear Alinco audio
☐A large, palm-fitting commercial-grade backlit microphone with a metal connector (not a modular plug) as well as direct frequency input and direct multi-function access such as monitor, call channel, power setting, memory to VFO plus more!
☐Stays in mode you select (voice/packet) through power off cycles
☐Ten autodial memories

Both radios were taken out of service and as far as I know works 100%.
However as with all electronics it is sold "AS IS" and there are NO RETURNS.
Please ask any and all questions.
Will ship to USA at a flat rate of $25.00 with full insurance.
Will ship to USA at a flat rate of $40.00 with full insurance for both units.
Please send address and information for shipping out side USA.

Send all questions to sawman02@...

7781. FS: New 6 pin power cord for HF rigs

Yahoo group: ham4sale (2007 — 2015)
Date: 2013-08-09 04:02:43 UTC
From: af5cc
Topic: 7781 Message: 7781

I have for sale a brand new, never used 6 pin molex power cord which is used on many HF radios. Has the fuses in both lines, and the molex plug is already attached. It uses zip cord which is attached together, which is much neater than some of the other power cords you see out there. I am asking $18 shipped for it and can take paypal/check/MO.

Topic: 7779 Message: 7782

I have several HF amplifiers available.

Which would you like?

Amp Supply LK-500 Z A, HF Amplifier:

The LK-500 is an HF amp that runs a pair of 3-500 tubes, on the 160 thru 10 meter bands, producing close to the legal limit. On this amp, 30 watts of drive produces about 400 watts out of the amp; 50 watts gives about 650 Watts out; etc.

This amp has a MUCH heavier duty Peter Dahl power transformer, and covers 160 meters. It has a excellent tuned input matching circuit. It is a superior amplifier.

This particular amp works very well. It has a manual step start circuit added, and the electrolytic capacitors have been replaced. Cosmetically it looks very, very nice. I can not find a scratch on it. It looks like new.

Since this is heavy, I would much prefer pickup in the Ocala, FL area.

With paper work for $900.

Ameritron AL-572, HF Amplifier:

Ameritron's new class of Near Legal Limit Amplifiers give you nearly full legal SSB power output for a much lower price. You get 1300 Watts PEP SSB nominal power out on amateur bands 160-15M.

Two lighted Cross-Needle Meters
Grid current, plate current and forward PEP output power are continuously monitored to tell you of proper loading and alert you to abnormal conditions. A fourth scale switches among peak reflected power (and SWR), high voltage, ALC threshold and ALC output voltage.

It has a transmit LED, 12 VDC, 200 mA accessory jack, and 12 VDC keying relay for solid state/tube rigs.
It draws 16 amps at 120 VAC, but can also be used on 240 V AC.

Features:
Instantaneous RF Bias
Step-Start Inrush Protection

Heavy duty power supply
Pi/Pi-L network
Tuned input
Dual lighted Cross-Needle meters
6:1 vernier reduction drives
Four rugged 572 B Tubes

This particular amp is in extremely nice condition
both cosmetically and electrically. Everything works
100% and it looks very close to new.

Paper work included for $900.

TenTec Hercules II 420 HF Amplifier:

This is a fully solid state all-mode HF linear
amplifier covering 1.8 to 30 MHz continuously.
It requires 13.6 VDC at 100 A max. Drive power
is 50 to 80 W typical for 550 W output. Maximum
Power output on SSB/CW/RTTY is 550 W DC at 50%
duty cycle.

This amp features full QSK break in CW. It can
be remote controlled (bands switched remotely)
from many transceivers.

This particular amplifier looks extremely nice.
I can not find a scratch on it. Electrically, I
think all works fine. It requires a 13 V DC power
supply in the 80 to 100 amp category. I only have
a 35 amp supply to test it with. As a result, I
only get 250 watts out of it before the power supply
over current limit kicks off. But all of the QSK
and everything works fine, as long as I keep it low
enough for the power supply I have.

With paper work for $900.

Heath SB-200 HF Linear Amplifier:

The SB-200 uses a pair of 572B tubes, and operates
on 80 thru 10 meters. It may be used on SSB, CW,
or digital modes.

This particular amplifier puts out about 750 watts
on 20 meters, and has been tested for operation on
all bands.

Cosmetically, it is in extremely nice condition.
I can not find a scratch on it.

Paper work is included for $475.

In all cases, pick up of the amplifier is first choice.
The amplifiers are heavy and hard to ship. I am located
near Ocala FL, not far off of I-75.

Obviously, if it necessary to ship, the cost is not
included in the prices listed.

I also have many other accessories available such as many
different types of microphones, HTs, various transceivers,
HF and VHF/UHF antennas, etc.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

7783. FS: Yaesu FT-8900 Quab Band Mobile

Yahoo group: ham4sale (2007 — 2015)
Date: 2013-08-09 18:40:33 UTC
From: Darren Mende
Topic: 7783 Message: 7783

I have for sale a nearly mint condition FT-8900 quad band mobile. This little radio is awesome and has more memories than you'll likely ever use. I am selling this in order to purchase a Yaesu FT-817. I am the second owner of this unit and purchased it as a base radio for local repeaters. The original owner purchased it as a backup for his other FT-8900, which is why it is still in pristine condition. It has never been mobile and has the wide-band mod completed. The radio includes the power cord, stock mic, seperation kit and the progamming software for Windows.

If you would like to see pictures or have any questions, send me an email and I'll get right back to you. The price for the radio is $375, plus shipping. I take PayPal, but add 3% for their fee.

Thanks for looking!

73,

Darren

7784. FS: Kenwood TS-120S

Yahoo group: ham4sale (2007 — 2015)
Date: 2013-08-09 18:55:41 UTC
From: Darren Mende
Topic: 7784 Message: 7784

I have for sale a Kenwood TS-120S 80-10M radio. The radio was built in the '80s and is a tank! Full advertised power out on all bands with no messy menus or confusing setup. This radio is a classic and is darn-near bullet proof. The radio works 100% and cosmetically it is 6/10, with some scratches and such on the outside. This radio was originally designed as a mobile radio and could easily be mounted in a vehicle. The bands include 80, 40, 20, 15, and 10 meters, so there are no WARC bands.

Included with the radio is an aftermarket hand mic and power cord. There is a SSB filter already installed, which I believe is 2.8 Khz crystal. This radio has awesome receive and equally great audio. I consistantly get great reports while on the air. This is my main radio and use it mostly on 40 and 20 meters. I am selling it in order to purchase a Yaesu FT-817 QRP radio for traveling. I will miss this radio!

The price for the radio, mic, and power cord is $325, plus shipping from Plano, TX. I will take PayPal, but add 3% for their fees. If you'd like pictures or have any questions, feel free to send me an email and I'll get right back to you.

Thanks for looking!

7786. Japan Radio Equipment FS

Yahoo group: ham4sale (2007 — 2015)
Date: 2013-08-10 20:32:44 UTC
From: Ken Simpson, W8EK
Topic: 7786 Message: 7786

Japan Radio Equipment For Sale:

Deluxe HF Transceiver, Matching Speaker, and Headphones

Japan Radio JST-245 Deluxe HF Transceiver:

The Japan Radio Company JST-245 is an extraordinary rig providing 160 to 10 meter amateur band coverage plus 6 meters in all modes (AM/FM/SSB/CW/RTTY).

The built-in automatic antenna tuner is provided as standard equipment. Tuner settings are automatically stored in memory for fast QSY. Three antenna connections are user selectable from the front panel and can be stored in memory.

The general coverage receiver tunes from 100 kHz to 30 MHz plus 48 to 54 MHz. Electronically tuned front-end filtering, quad FET mixer and quadruple conversion (triple on FM) ensures excellent dynamic range (> 100 dB) and third order ICP of +20 dBm. Excellent I.F. bandwidth flexibility is assured with the variable Bandwidth Control. This permits the standard 2.4 kHz filter to be narrowed continuously to 800 Hz.

Other interference rejection features include Passband Shift (PBS), dual noise blanker, three step attenuation, I.F. notch, selectable AGC and all-mode squelch. Notch tracking is automatic. Once tuned, the I.F. notch filter will track the offending heterodyne (? 10 kHz) if the VFO frequency is changed. Very low phase noise is achieved through a single crystal Direct Digital Synthesis system.

The keypad can be used for band selection or frequency input. The rear panel has three antenna inputs.

The serious CW operator will appreciate the full break-in, variable CW pitch, and built-in electronic keyer. Two separate VFOs are featured for split frequency operation.

Memory registers store most recent VFO frequency, mode, bandwidth and other important parameters for each band. Each of the 200 memories stores frequency,

mode, AGC and bandwidth. A built-in interface
facilitates computer control.

The heavy duty, built-in power supply insures reliable
and continuous use. The ergonomic layout, colored LCD
display and thoughtful placement of controls ensure
ease of operation.

For a complete technical review of this product please
see the September 1995 issue of QST magazine.

This unit works 100%, looks perfect, and is still in
its original box. With power cord, and paper work
including the original multicolor brochure for $1400.

NVA-88 M speaker

This speaker matches the JST-245 above, plus most of
the other Japan Radio rigs. It is a very good sounding
speaker. It looks great, with no scratches, and is in
its original box. $100

ST-3 Headphones

These are very nice, comfortable monophonic communications
headphones. They have a 1/4 inch mono plug on them.
They work fine and look great cosmetically - like new.
No box on these, however. $50

Buy all three of the above items for $1500.

I also have many other accessories available such as many
different types of microphones, HTs, HF, VHF and UHF rigs, HF
and VHF/UHF antennas, etc.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

7800. FS: Pair of MRF422's on board from HF amp

Yahoo group: ham4sale (2007 — 2015)
Date: 2013-08-16 19:30:52 UTC
From: qrv@kd4e.com
Topic: 7800 Message: 7800

This board came from a 1KW marine HF rack-mount system.

The board would be like one of the two pictured.

Only the board with the MRF422's is included for $75.

I also have a mostly-complete solid state 1KW HF amp.

(It will require switched output filters, unless used monoband,
& will also require a 24-28v 80a PS - PS will be heavy to ship).

I bought these a while back but decided to save up for a 12v amp
- sold as-is. Asking $250., $300. with PS. plus shipping.

(The amp is worth $300. just for the MRF422's but I'd rather
not hack it up. No more tire-kickers, please. If you are not
real comfortable working on KW SS amps this isn't for you.)

I do have many other parts from the disassembled amp, as well
as two 24-28vdc 80amp power supplies (one original, one homebrew).

These may be picked up at the SARA Fest in Swainsboro, GA on
August 24th. Info: http://kj4mks.com/

I have for sale a Kenwood VFO-120 that is in excellent condition. I used it with my TS-120S and it worked flawlessly. I am selling because I no longer own the TS-120. This is a great unit that works on a few different Kenwood models. I am willing to trade for a VHF/UHF mobile/HT, or sell for $150. Email for more pics or info. My info, including email, is good on QRZ.

7806. Collins Filter Questions

Yahoo group: ham4sale (2007 — 2015)
Date: 2013-08-20 13:30:52 UTC
From: Bry Carling
Topic: 7806 Message: 7806

I have a Collins Mechanical Filter F455-FB-21 (6W2) - it looks new.

Can anyone tell me what radio this was used in? What bandwidth is the filter?
I presume it is a 455 kHz filter.

Does anyone have any idea what this filter is worth? I have two crystals with it so presumably
it i was used as an SSB generator, or they were used as BFO crystals. 453.58 kc. and 456.43 kc.

Thanks for any helpful ideas.

Bry AF4K

7807. FS: 2 meter amplifier

Yahoo group: ham4sale (2007 — 2015)
Date: 2013-08-20 13:56:19 UTC
From: John Geiger
Topic: 7807 Message: 7807

I have for sale a 2 meter all mode amplifier by V-J enterprises of Palestine, TX. It is rated at 10 watts in for 90 watts out. I am getting about 45 watts out of it. It was a recent hamfest purchase. I replaced the power switch on it which was bad. Haven't done any additional tuning on it to try to get the power up to the rated specs. It has a FM/SSB switch on it, and a hard wired short power cord.

It gets good reports on SSB, just not making the full 90 watts out. I am asking $35 plus shipping for it and can take paypal/check/MO.

7808. FS: Icom 706MKII HF/6m/2m transceiver

Yahoo group: ham4sale (2007 — 2015)
Date: 2013-08-20 22:11:07 UTC
From: John Geiger
Topic: 7808 Message: 7808

I have for sale an Icom 706MKII HF/6m/2m transceiver with the UT-106 DSP unit installed. It does 100 watts on HF and 6m and around 25 watts on 2m. The case is in pretty good condition with a couple of rough spots near the SO239 connector on the rear. Also, some of the paint has worn off the metal rim around the back of the faceplate, but overall it looks pretty good. It has great receive and does full power out. It does act a little finicky on VOX at times, but other than that, works great. It comes with the HM-100N hand mic, a 3 foot long power cord terminated in Anderson power poles, and a copy of the manual. I have worked 45 countries with this rig in the past month, so it is doing great.

I am asking $415 plus shipping for it. I can take paypal/check/MO or cash. I like this rig alot but just replaced it with something that does UHF as well so I can get back on the satellites.

7810. FS: Icom FL101 250hz filter

Yahoo group: ham4sale (2007 — 2015)
Date: 2013-08-21 02:26:43 UTC
From: John Geiger
Topic: 7810 Message: 7810

I have for sale an Icom FL101 250hz CW filter for several models of Icom radios. Also makes a nice RTTY filter for RTTY contesting. It will work in the 706, 725, 726, 728, 729, 736, 737, 738, 746, 756, 761, 765, 775 and 781 series of radios. It will not work in the 703, 707, or 718 series, as those take the 455khz IF filters, and this is for the 9mhz IF.

I am asking $70 shipped and can take paypal/check/MO.
These sell new for $130 at Universal Radio.

7811. Kenwood TM642 triband radio (2m/222mhz/70cm) for trade or sale

Yahoo group: ham4sale (2007 — 2015)
Date: 2013-08-21 18:40:41 UTC
From: John Geiger
Topic: 7811 Message: 7811

I am helping a friend out with a possible trade. He has a Kenwood TM642 2/222 radio which has had the 440mhz module added as well, so it is now a triband radio! It has the TU-7 tone board installed, and comes with a power cord, hand mic, and separation kit.
You can do triple receive with this radio, and also do crossband repeat. These are still highly sought after radios because of their quality and the triple receive.

He is looking to trade it for a 2 meter all mode that does 25 watts or so and is small enough to take mobile, like a Kenwood TR751A, a Kenwood TM255A, an Icom 275A, or an Icom 706MKII.
Cash offers for the TM642 package would also be considered. If you are interested in a trade or buying the Kenwood outright, contact me and lets see what we can do.

7815. FS: Kenwood TM-642 triband (2m/222mhz/70cm) transceiver with options

Yahoo group: ham4sale (2007 — 2015)
Date: 2013-08-24 03:38:12 UTC
From: af5cc
Topic: 7815 Message: 7815

I have for sale a Kenwood TM642 which has 2m and 222mhz as standard, and it also has the 70cm unit installed making it a triband radio. It does 50 watts on 2m, 25 watts on 222mhz, and 35 watts on 70cm. It does triband receive (listen to all three bands at once) and crossband repeat. It comes with the mic, power cord, the TSU-7 tone board (which was an option) and the separation kit.

I am asking $425 shipped for it.

7817. FS - Low Noise Amplifier (1.7-2.4 GHz)

Yahoo group: ham4sale (2007 — 2015)
Date: 2013-08-24 22:30:26 UTC
From: n8oep_mike
Topic: 7817 Message: 7817

Mini-Circuits ZHL-1724MLN-SMA amplifier
Low Noise Amplifier - 50 Ohm 1700 to 2400 MHz
SMA input & output connecters, 15VDC operation -(apx 30dB gain)
Download the spec sheet from Mini-Circuits dot com

This unit was removed from an indoor re-broadcast / range extender.
None of my test gear can get into this frequency range.
With 15VDC input, it draws apx 120mA with no input.
I'll include a SMA rubber duckie antenna for the output load.

$60 + shipping; Pay-Pal is fine.

Shipping will be via USPS surface, in a priority flat rate box/padded envelope with tracking info for $6 to most USA locations.
If you need 'special' or desire other shipping, please contact me. I won't ship this amp out of the US.

Mike - N8OEP

7818. FS: Comet Triplexer CFX-324

Yahoo group: ham4sale (2007 — 2015)
Date: 2013-08-25 01:34:46 UTC
From: John Geiger
Topic: 7818 Message: 7818

I have for sale a Comet Triplexer CFX-324. The common feed is a SO239, and it has leads terminated in PL259 connectors for the 3 splits. One is for 1.3 to 150mhz, one is for 200 to 320mhz, and the third is for 390 to 500mhz. This is great for splitting apart 2m 222mhz andn 70cm. Of course you could use it as a duplexer also, just splitting apart 2m and 70cm.

It would work great with a Kenwood TM642 or TM742 with 222mhz unit, using 1 antenna to feed all three bands. It would also work fine with a Kenwood TH-F6A HT, or a Yaesu FTM-350, VX6R or VX8R, if you want to use them with different antennas.

These sell new for $89 plus shipping. I am asking $55 shipped for it, and can take paypal/check/MO.

7819. FS: Kenwood TSU-7 tone encode/decode board

Yahoo group: ham4sale (2007 — 2015)
Date: 2013-08-25 01:45:51 UTC
From: John Geiger
Topic: 7819 Message: 7819

I have for sale a new in the box, never used, Kenwood TSU-7 tone encode/decode board. This unit is used in the following radios:

TM-732
TM-641
TM-741
TM-941
TM-642
TM-742
TM-942

These units are discontinued, so I am not sure what exactly they are worth, but I think $30 sounds reasonable, and we can figure it out from there.

Topic: 7828 Message: 7828

DR135T 2 Meter Monoband Mobile/Base ASKING $125.00
☐50 watts, H/M/L power settings
☐100 memory channels
☐Front panel data port
☐Rear panel DSUB9 computer connection
☐No need to remove mic for packet operation
☐Ignition key on/off feature
☐CTCSS, DCS encode+decode, DTMF encode and Tone-burst are all standards
☐Clean, clear Alinco audio
☐A large, palm-fitting commercial-grade backlit microphone with a metal connector (not a modular plug) as well as direct frequency input and direct multi-function access such as monitor, call channel, power setting, memory to VFO plus more!
☐Stays in mode you select (voice/packet) through power off cycles
☐Ten autodial memories
It was taken out of service and as far as I know works 100%.
However as with all electronics it is sold "AS IS" and there are NO RETURNS.
Please ask any and all questions.
Will ship to USA at a flat rate of $25.00 with full insurance.
Please send address and information for shipping out side USA.

Dual Band Multimode transceiver, Desk Microphone,
Power Cord, VX-7 Accessories, several Microphones,
2 m HT, HT accessories, and more

Yaesu FT-736 R, Dual Band, Multimode Transceiver:

The Yaesu FT-736R all mode transceiver incorporates up to four band modules covering the 50, 144, 220, 440 and 1200 MHz amateur bands. It is supplied with 2 meters and 440 at 25 watts output. This radio has conveniences such as IF shift, IF notch, keypad entry, noise blanker, all mode VOX and three-speed AGC. The memory system includes 100 general purpose memories, 10 full duplex cross-band memories and 1 call channel, all of which store mode and frequency.

Features:
All Mode
Keypad Entry
100 Memories
IF Notch
IF Shift
Dual Digital VFO's
Semi Break-in CW
All Mode VOX
Built-in Power Supply
10 Duplex Memories

This particular unit works 100% and looks like new. It includes the optional tone unit for subaudible tone encode and decode, and the 600 Hz CW filter. It is still in its original box, with paper work for $775.

Yaesu MD-1 Desk Microphone:

The MD-1 desk mic is a deluxe, high quality desk mic. It features an UP-DOWN tuning function (assuming a compatible Yaesu model radio). Impedance may be selected at either 500 or 50,000 ohms. Round 8 pin connector. It can be used with most any of the Yaesu (and also TenTec) rigs that use the round 8 pin connector.

This particular mic is still in its original box. Not a scratch on it. It has been removed from the box, and verified that everything works 100%.

With paper work, in its original box for only $115.

Yaesu E-736 DC Power cord
The box says for the FT-736, but I am sure it will work
with others as well, as it is the standard 6 pin molex
connector used by many different rigs.
This one is new, still in its original box. $22

Yaesu NC-72 B
This is the wall charger that is used with the VX-5 series
HTs (VX-6, VX-7, etc.), and also the FT-817, and probably
others. It is also used to power the CD-15 desk chargers.
This one is in its original box, apparently unused. $15

Yaesu VX-7 accessories:

VX-7 Nifty Mini Manual
A pocket reference to all of those commands that no one
remembers! For the VX-7. Spiral bound. $18

Programming cable
This cable has the threaded connector as used by the VX-7,
but it can also be used on the VX-6, 5, 3, etc. Uses USB port.
It works great with the free "Chirp" program. I have not
tried it with others. $18

MFJ-284 HT Speaker Microphone:

This speaker mic has the 3.5 mm and 2.5 mm plugs on
it, as used by Icom, Alinco, Radio Shack, some Yaesu,
and many other HTs.

It works with the following:

YAESU 109, 209, 709, 23, 73, 33, 727 and other YAESU
radios which are pin compatible with the above rigs.

ICOM 2AT, 02AT, 3AT, 03AT, 4AT, 04AT, 12AT, u2A, u2AT,
u4AT and other ICOM radios which are pin compatible
with the above rigs.

ALINCO DJ-560 and other ALINCO radios which are pin c
ompatible with the DJ-560

RADIO SHACK - most

SANTEC ST-20

It works great, and looks like new.

With paper work for $15.

Yaesu FT-209, 2 meter HT:

The Yaesu FT-209R operates on 2 meters from 144-148 MHz with 2.5 watts. The controls are easy to use. High/Low power and VOX on/off is selectable from the top panel of the radio. 19 soft rubber, dual-function keys provide flexible control. There is an analog meter and digital LCD display, along with 10 memories.

This particular radio is in need of repair, or it can be used for parts. It is dead. It does nothing when turned on. No display, no audio, nothing.

This is the HT only with no accessories for $10.

World Map:
The Radio Amateur's World Map by Yaesu
This wall map is approx 34 x 24 inches in size.
It includes the ham prefixes on the various countries.
It appears to never have been used. $8

Yaesu MH-15 DTMF Touch Tone Microphone:
The MH-15 c6 is a hand microphone that features a 16 digit DTMF Touch Tone Pad on the back, along with a lock/unlock switch. The top has up/down buttons. Of course the PTT is on the side. This one has the round 6 pin connector. It works fine and looks close to new. $40

Yaesu YM-17 hand microphone:
The YM-17 is a hand microphone with up/down switches on the top corner. It has the round 6 pin connector. This one works fine and looks really great. $30

Yaesu YM-31 hand microphone:
The Yaesu YM-31 is a hand mic with a round 6 pin connector. Apparently it is either similar or the same as the MH-25A6j (not the MH-25 with the 8 pin connector). It is a 600 ohm impedance hand microphone, and has a Monitor on-off switch on the back.
It looks very similar to the Yaesu MH-1.
This one works fine and looks extremely nice. $25

Yaesu HT Accessory Items:

Belt Clip for Yaesu FT-207, with hardware. $8

Wrist Strap for Yaesu FT-209, and others $4

Antennas for your HT:

All rubber ducks are for 2 meters, are in good condition, and are $10 each, unless stated otherwise.

BNC - Original Alinco EA0024 - 4 inches long

BNC - Original from Kenwood TH-215, about 5 inches long

BNC "Stubby", about 4 1/2 inches long

BNC Connector, about 7 inches long

Type F connector - 6.5 inches long

BNC Stubby for 440 MHz, 3 inches long

Not a Rubber Duck, but can be used on your HT:
Telescoping Antenna w/ BNC about 19 inches long
can be used as a quarter wave antenna on
2 m, 220, or 450 MHz. $12

I also have many other accessories available such as many
different types of microphones, HTs, HF, VHF and UHF rigs, HF
and VHF/UHF antennas, and many miscellaneous accessories.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

7831. AEA Pakratt PK-232 for sale

Yahoo group: ham4sale (2007 — 2015)
Date: 2013-08-30 14:19:40 UTC
From: Ray, W4BYG
Topic: 7831 Message: 7831

I have an AEA PK-232 multi-mode modem for sale. It is in excellent condition, in the original box, includes a 12 VDC 1 amp power supply, interconnect cables and the original factory manual. On a 1 to 10 scale I would rate it a 9.5.

Pictures available on request. Price $100 plus shipping, personal check, USPS MO, or PayPal, is fine.

Please reply off list.

7833. FS: MFJ 812B 2m/222mhz power/SWR meter

Yahoo group: ham4sale (2007 — 2015)
Date: 2013-09-03 02:43:17 UTC
From: <af5cc@...>
Topic: 7833 Message: 7833

I have for sale a MFJ 812B wattmeter/SWR meter for 2m and 222mhz. It was a little out of calibration so I compared it to a Daiwa wattmeter (and a rig with a known output) and placed marks on the sensitivity control for the proper 30 watt and 300 watt settings. That's right, this wattmeter will measure up to 300 watts on 2m and 222mhz. It is in good physical condition as well. It doesn't come with a manual, but you can easily find it on line. It can also be used as a field strength meter.

I am asking $25 shipped for it and will throw in a coax jumper with it. I can take paypal/check/MO.

Date: 2013-09-03 10:34:22 UTC
From: Bry Carling
Topic: 7835 Message: 7835

10m sporadic E, trans-equatorial and other exotic modes can often be pretty hot during this time of year. Even with a few watts, contacts can often be made. Suitable crystals are available as follows:

I have a few each of these FT243s left (and numerous other 10m crystals that will work with almost any ham rig from the golden era of tube radio!)

29.000 MHz
29.010 MHz
29.020 MHz
29.040 MHz
29.100 MHz
29.120 MHz
29.160 MHz
29.172 MHz
29.180 MHz

Limited stock available - most of these are $14.00 each.

Some folks say not to expect much from 3 or 4 watts of AM on ten meters, but under the right
circumstances I have made QRP contacts into central Asia and other spots on the opposite side of the globe with decent R5 signal reports each way. Those were with a converted CB rig, so would be similar power levels...

YMMV

10m Crystals

Topic: 7840 Message: 7840

I have for sale a Yaesu G-800S medium duty rotor. It is rated at 17 square feet of wind load when mounted in a tower. The rotor is in very good condition, turns fine, and the control box tracks the movement of the rotor just fine.

It comes with around 50-60 feet of rotor cable with the connectors on each end. It also comes with the manual.

I am asking $250 for the rotor, cable, and control box, plus $40 for shipping. I can take paypal/check/MO.

7852. FS: 6 pin HF rig power cord

Yahoo group: ham4sale (2007 — 2015)
Date: 2013-09-12 17:32:45 UTC
From: John Geiger
Topic: 7852 Message: 7852

I have for sale a power cord for the HF rigs that use the 6 pin molex connectors. It is in 2 pieces, connected by Anderson power poles. The side with the connector is about 40 inches long, and is pretty heavy wire, probably 8 or 10 gauge. The other piece is 48 inches long, is 12 gauge wire, and does have ring terminals on the other end, which could be removed if necessary.

This cord will work fine with Alinco, Yaesu, and Kenwood rigs. It is not wired the same as the 6 pin connector is on the Ranger 5054DX-100. I also wouldn't recommend it for Icom rigs as their connectors take a slightly different size on the pins and this doesn't make as good of contact all of the time.

I am asking $12 shipped for this and can take paypal/check/MO.

Topic: 7748 Message: 7853

4 ft. Fiberglass Military Poles for Sale

These poles are great for permanent and temporary antennas!
They are great for HF, VHF and UHF antennas!

Experiment in the back yard, go portable, use on Field Day, hilltopping or for EMCOM and even permanent installations, with or without guying depending on load. The sections are not tapered but have a fitting embedded in one end that slides inside the next section which enhances their strength and usefulness! I regularly go up 30 ft for wire and lightweight 2 meter antennas without guying.

Bundles of 5 poles $20 each + shipping
Please indicate how many bundles you are ordering.

Will ship by any regular carrier, but FEDEX Ground or UPS are preferred.
Payment via PayPal to W2TTT@...

Inquires to Gordon W2TTT@... or 201.314.6964

Thanks & 73,
Gordon Beattie, W2TTT

7858. FS: MFJ 812B 2m/222 mhz wattmeter/SWR meter (revised price)

Yahoo group: ham4sale (2007 — 2015)
Date: 2013-09-15 19:32:00 UTC
From: John Geiger
Topic: 7858 Message: 7858

I have for sale a MFJ 812B wattmeter/SWR meter for 2m and 222mhz. It was a little out of calibration so I compared it to a Daiwa wattmeter (and a rig with a known output) and placed marks on the sensitivity control for the proper 30 watt and 300 watt settings. That's right, this wattmeter will measure up to 300 watts on 2m and 222mhz. It is in good physical condition as well. It doesn't come with a manual, but you can easily find it on line. It can also be used as a field strength meter.

These sell new for $40 plus shipping. I am asking $20 shipped for it and will throw in a coax jumper with it. I can take paypal/check/MO.

7861. microphones for sale

Yahoo group: ham4sale (2007 — 2015)
Date: 2013-09-19 23:45:39 UTC
From: John Miller
Topic: 7861 Message: 7861

I have a couple desk microphones for sale. One, a Kenwood MC-50. Mic worked great when I last used it, I haven't used it in a while and don't have any more of the older radios I used to run it on, nor do I have room for any more radios so it's just sitting. It's probably an 8.5 out of 10 in looks, I believe the rubber feet were replaced under it, not sure on the mic element, that has been taken apart and sounds like the original element. This is still wired as original for 4 pin Kenwood's but if you'd like to hear it on the air and we can work out the contact, I have an adapter to adapt it to the 8 pin radios, no I'm not including that in the sale it was hard enough to find it when I wanted it. Asking $50 plus shipping, will talk on that price if needed.

The other is a Turner plus 3, this is probably a 7 out of 10, I had one of these before which also sounded great on the older hybrid Kenwood's and radios close to that era, I haven't used this one I got it in an estate and haven't rewired it for anything, not sure what it's wired for now though probably unbidden/cobra CB's. I do know it worked for the last owner when was last used and sounded great but was stored for many years before I got my hands on it. Asking $20 plus shipping on that one.
I'll talk on all prices need the money more than the mics.

From: Ed WA4NJY
Topic: 7864 Message: 7864

I have a near perfect ICOM 746PRO for sale. High serial number (02073**). Includes original box, manual, ICOM hand mic.

Radio works as it should and receives excellent audio reports.

Prefer a local deal near Tampa, Fl. $850 firm.

Will consider trades for portable HF/6 rigs like Kenwood TS-480SAT.

Also looking for Drake 4 line radios.

Ed WA4NJY

Bradenton, Fl

941-920-6414

7865. Yaesu Mouse pad for sale

Yahoo group: ham4sale (2007 — 2015)

From: Ed WA4NJY
Topic: 7866 Message: 7866

1. ICOM 746PRO. Very nice, no flaws and works as it should. High serial number (02073**), Original box, hand mic, manual. $850 firm.

2. Johnson Valiant II AM/CW transmitter. Very nice condition with minor flaws. Works fine with good reports. See picture on my QRZ page. Includes original manual, extra NOS internal relay, TR relay, a good D-104 is available also. $475.

3. Hammarlund HQ-140X. recent re-cap and cleaning. Needs filter caps and finish tweeking. Works on upper bands and BC. Not a beauty, but can be a good project. $70.

4. Others for parts; Hallicrafters SX-99, S-53 both are all there. Antique regenerative radio parts.

Trades will be considered involving receivers like Drake 4 line, or others not too heavy.

NO shipping. Demo and pick up in Bradenton, Fl.

From: John Geiger
Topic: 7867 Message: 7867

I have for sale a Cushcraft A449-11S 70cm yagi in very good condition. This is an 11 element yagi on a 4 1/2 foot boom. You can read more about it here:

http://www.randl.com/shop/catalog/product_info.php?cPath=1320&products_id=4831

It is rated for 440-450mhz but it also has a flat SWR down at 432mhz for weak signal work, and the boom has been modified so it can be mounted horizontally or vertically. I just ordered a new insulator piece for the gamma match from Cushcraft and I will include that in the unopened package.

These sell new for $105 plus shipping, I am asking $68 shipped for it in the US, and can take paypal, check, or MO.

73 John AF5CC

7868. FS: Rubber VFO knob cover for FT77

7871. FS: Alinco DJ296 222mhz HT

Yahoo group: ham4sale (2007 — 2015)
Date: 2013-09-21 15:22:26 UTC
From: John Geiger
Topic: 7871 Message: 7871

I have for sale an Alinco DJ-296 222mhz HT in excellent condition. It does 4.5 watts on 222mhz, and has CTCSS tones as standard. It comes with the box, manual, other paper work, belt clip, battery and antenna. It is missing the battery wall charger but it is a common size plug. Also, some of the rubber on the antenna has began to crack, so you might want to put some tape over that part.

I am asking $65 shipped for it and can take paypal/check/MO. Great way to get on 222mhz without spending a lot of money.

73 John AF5CC

7872. FS: Yaesu GS232B computer-rotor interface

Date: 2013-09-20 16:16:17 UTC
From: John Geiger
Topic: 7872 Message: 7872

I have for sale a Yaesu GS-232B computer-Yaesu rotor interface. This allows you to do computer control of your Yaesu rotor, so you can use your logging program or radio control program to turn your rotor as well. It comes with a power cable (terminated in power poles) and the C-1000 cable which goes between this interface and the rotor.

The interface sells new for $580 at Ham Radio Outlet, and the C-1000 cable is $35 new. I am asking $350 shipped for this setup, and can take paypal/check/MO.

4 ft. Fiberglass Military Poles for Sale

These poles are great for permanent and temporary antennas!
They are great for HF, VHF and UHF antennas!

Experiment in the back yard, go portable, use on Field Day, hilltopping or for EMCOM and even permanent installations, with or without guying depending on load. The sections are not tapered but have a fitting embedded in one end that slides inside the next section which enhances their strength and usefulness! I regularly go up 30 ft for wire and lightweight 2 meter antennas without guying.

Bundles of 5 poles $20 each + shipping
Please indicate how many bundles you are ordering.

Will ship by any regular carrier, but FEDEX Ground or UPS are preferred.
Payment via PayPal to W2TTT@...

7879. FS: World atlas-great for DXers and County Hunters

Yahoo group: ham4sale (2007 — 2015)
Date: 2013-09-25 18:51:18 UTC
From: John Geiger
Topic: 7879 Message: 7879

I have for sale a Time magazine Hammond World Atlas from 1980. Now this does contain some countries that no longer exist (East Germany, Czechoslovakia, Yugoslavia) and doesn't have some that now exist (Eriteria) but overall it is a very nice atlas for DXing. It has many individual country maps, with different colors for each of the country's internal divisions (like states, regions, etc). It also has a map of each US state, with different colors for each county, which makes it very easy to distinguish between the different counties in that state-great for county hunters. It even contains the counties for the provinces in Canada that have counties. It also contains different facts about each country, like languages, population, area, and a picture of the flag. It is hard cover with 176 pages in all. Some damage to the bottom of the spine, but overall a very nice atlas.

I am asking $15 shipped by media mail for it and can take paypal/check/MO.

73 John AF5CC

7881. Icom 706 accessories for sale

Yahoo group: ham4sale (2007 — 2015)
Date: 2013-09-27 02:49:11 UTC
From: John Geiger
Topic: 7881 Message: 7881

I have for sale the following accessories for the Icom 706 series of radios. I can take paypal/check/MO, and prices include shipping in the US. Here is what I have available:

1. Better RF tuning control-plugs into the tuner jack on the back of the radio, and sends out a 10 watt carrier when you push the tune button on the radio. Perfect for using with a manual or autotuner. Sells new for $32 plus shipping, I am asking $23.

2. Separation kit, including the bracket for the faceplate, and the separation cable. Asking $40

3. Keypad that allows direct frequency entry, switching between VFOs, and split operation. It runs on a 9 volt battery. It is a homebrew job, but looks very nice. The keypad plugs into the CI-V port on the 706 and uses a programmed 16F84 PIC micro-controller. It allows for direct frequency entry, and gives you the SPLIT and A/B commands, plus several other programmable features. There have been numerous upgrades to this little box, and in fact it is now available in kit form for $55. G4FEV re-housed the PC board inside the numeric keypad from an old computer keyboard! You can read all about it in these two bitmap image files:

http://g4fev.atspace.com/706_pad1.bmp

http://g4fev.atspace.com/706_pad2.bmp

I am asking $23 for it.

Eimac SK-630A UHF sockets used pair, with integral screen capacitor, similar to Johnson 124-116, for 4X150, 4CX250, 4CX350, 8930 series tubes. These are physically the same size as SK-620A's but, have grounded cathode terminals that can be lifted, if desired, by drilling out the rivets. A bit tarnished from storage, one is almost unused except a single pin was once soldered. $80 pair.

From: John Geiger
Topic: 7887 Message: 7887

I have for sale a Yaesu FT100D HF/VHF/UHF radio in good condition that works excellent. It does 100 watts on HF and 6m, 50 watts on 2m and 20 watts on 70cm. There are a couple of light scuffs on the top of the radio, but other than that, it is in very good condition. IT is a 1H serial number and has had the grounding mod done to it at the factory.

It comes with the power cord (terminated in powerpoles), mic (with some tape due to the cord falling apart), manual, and original box.

I am asking $520 plus shipping for it.

From: Bry Carling
Topic: 7890 Message: 7890

FOR SALE:

Meissner Signal Shifter,

This is a beautiful example of one of the coolest little transmitter / VFO devices from the golden age of radio. It uses several tubes and has an 807 RF final! Rated at 5 watts.

Has a built-in power supply for 120V AC use. This is one of the nicest ones I have ever seen.
Let me know if you would like pictures and I can make some later on this evening.

Available for $125.00 plus shipping

Radio Switch Model 88, 2 pole 11 position bandswitch. This is the 13KV rated model. Standard index mechanism with screw set stops. Mostly unused as only two terminals on each wafer were ever wired, and neither wiper contact was ever connected. 50 year old silver plate is somewhat tarnished yet, should clean up nicely with Tarn-X. $125

More for sale may be seen at:

http://qsl.net/wc6w/wc6wfsw/index.html

Topic: 7897 Message: 7897

FOR SALE:

EL34B / 6CA7 Tubes $8.00 each (qty 4 available)

These rugged TUNGSOL tubes cost $45.00 per pair.

These are top quality TungSol tubes that are supplied in the boxes. They are used, tested tubes with only a few hours on them, that are working perfectly and have low hours. Were purchased recently from Tube Depot. These are brown-base tubes and can barely be distinguished from new ones.

Available for $8.00 each or take all four for $30.00 plus shipping.

Regards - Bry AF4K

7898. FS: Rigblaster interface-also set up for USB

Yahoo group: ham4sale (2007 — 2015)
Date: 2013-10-03 15:11:24 UTC
From: John Geiger
Topic: 7898 Message: 7898

I have for sale the West Mountain Radio rigblaster original model. This is the model that allows you to plug your microphone into the interface, and the interface plugs into your mic jack, and you can switch between the mic and digital modes with a switch on the interface. It comes with a power cord terminated in power poles, the mic cable which goes between the interface and your mic jack-it is for an 8 pin round mic, and the cable between the computer and interface to provide PTT switching. That is terminated in a serial plug, but this also has a USB to serial adaptor. You will need the 2 cables to go between the souncard and the Rigblaster. They are just two 1/8" plug cables.

I am asking $70 shipped for the setup and can take paypal/check/MO.

7903. Sale or Trade: Johnson Valiant II, Nice

Yahoo group: ham4sale (2007 — 2015)
Date: 2013-10-05 21:13:06 UTC
From: <wa4njy@...>
Topic: 7903 Message: 7903

I hate to let this one go, but I am tired of lifting and moving it. There is a picture on my
QRZ page showing the front panel up close.

The V2 is very clean and works good. Power is down on 20 meters. Includes original manual, extra NOS internal relay. A good D-104 and T/R relay are available.

Of course, there is no shipping on this. Can demonstrate here south of Tampa, Fl.

Will consider trades. Prefer a smaller AM transmitter or certain vintage radios. Otherwise the price is $475.

7904. for sale Kenwood TS-450SAT for sale

Yahoo group: ham4sale (2007 — 2015)
Date: 2013-10-07 18:07:03 UTC
From: John Miller
Topic: 7904 Message: 7904

need to pay outstanding bills, I have a ts-450SAT for sale. It works fine, has a couple scratches on it but works 100%, I'd say in looks it's about an 8.5 to a 9 but I'm critical. I have a short power cord for it, it has the VS-2 voice read out board in it so it can speak the frequency. I'll sell it as is for $425 plus shipping, or can take the VS-2 board out of it and let it go for 385 plus shipping. I don't have a mic I can include with it but any of the Kenwood 8 pin round plug mics work.

IC-706MKIIG, has voice chip in it, has been mobile, has mic, box, mobile bracket and separation kit. Since it's been mobile there are some scratches mostly from the mobile bracket on the sides, this is a 1 owner rig, hate to sell but have to if the other doesn't go. Asking $700 plus shipping on that one, can throw in an LDG AT200Pro auto tuner with ICOM cable with it for another $150. The tuner has never been mobile and has very little use on it.

Icom IT-t90A 6, 2 meter and 70CM HT with 2 batteries, aftermarket desk charger, all works fine for $200 plus shipping
Might talk on prices a little.

For the right price I might even consider selling my Kenwood TS-2000 with VS-3 voice read out module, or without it, and digital recorder unit but that's a last resort and needs the absolute right offer. Not selling everything, once I can pay the outstanding bill everything's off the market, probably until next time but I like to think things will get better someday.

7905. REDUCED: 160m and 80m $2 crystals, hc6u

Date: 2013-10-08 23:18:00 UTC
From: <jmarcel66@...>
Topic: 7909 Message: 7909

One each, MaxTrac and GM300 UHF radios.

GM300: 16-Channel, 25-Watt 438-470Mhz, 16-Pin
MaxTrac: 16-Channel, 25-Watt, UHF (See Note below), 16-Pin

I am unable to read the model number of the MaxTrac. It was originally programmed for 453Mhz; but was then reprogrammed and tested on 447Mhz without modification. Both were originally to be part of a 442/447Mhz Ham Repeater (I started working on something else instead). Both are in good working order.

Asking $125.00 each or $200.00 for both. Please e-mail me at jmarcel66@gmail.com if interested.

Thanks,
John

HF Antenna Tuner, Wattmeters, and HF Antenna
related items For Sale:

MFJ 984 Versa Tuner IV, 3000 watt Antenna Tuner:

MFJ says this will handle 3000 Watts PEP. Since the legal
limit is half of that, you will be fine at legal power.

It covers 1.8 to 30 MHz with 250 pf 6kv caps and matches
anything you want to throw at it, or so it seems.
It also includes an RF ammeter at the output of the tuner
so you know how much actual RF current you are putting
into the antenna. There's a wattmeter/swr bridge built
in along with a small dummy load.

It has rugged heavy-duty construction. Switches are rated
for 2KV and 17 amp carry capacity. There's a 4:1 balun
and real ceramic feed through insulators.

This particular unit works fine. The case looks very nice.
There is slight wear on the front panel, and one small
scratch that you can see if the light is just right.

Paper work is included for $200.

MFJ 815 B Cross Needle Peak Reading HF Wattmeter:

Cross needle reads forward and reverse power simultaneously
SWR displayed also
300/3000 Watt forward and 60/600 Watt reverse
peak or average reading meter
160 thru 6 meters
12 V DC needed for lighted meter

This particular unit works fine, and looks very close to new.
With paper work for $65.

Daiwa CN-520 "Cross Needle" wattmeter:

This wattmeter covers 1.8 to 60 MHz, and is the "cross needle"
type, so it reads SWR at the same time it reads forward and
reflected power.

Forward scales of 2000 W or 200 W; reflected 400 W and 40 Watts.

This one looks very nice and works like new,
with the paperwork for $60.

Balun / Antenna Center Insulators:

HyGain BN-86 Balun
The case of the BN-86 is constructed so that one can use
it to hang a dipole or inverted V, or a U-bolt can be added
to attach it to the boom of an HF beam antenna.
This particular balun works fine, but does show slight physical
use. It includes the paper work for $40.

VanGorden HiQ Balun
The Van Gorden HI-Q balun is designed to handle full legal
power with a low standing wave radio (SWR). It includes a
hanger for a dipole. Some rust on screw eyes. $10

W2AU ANsulator
The Unadilla W2AU ANsulatorÂ™ Antenna Center Insulator is handy
for many types of antennas. It features a top eye-bolt for
support (if needed). There are strong eye bolts and spade
lugs on either side for the antenna wire.
It looks to be new. $12

Hustler HF Mobile Antennas:

All work 100% and are in good condition.

Hustler 54 inch mobile masts:
MO-1 (folds about 14 inches above ball) $22
MO-2 (folds about 27 inches above ball)
..... NEW, still sealed in the package, $30

"Super" Hustler resonators (high power version):
75 meter RM-75 S, $35
40 meter RM-40 S, $25

Coax connectors and adapters:

Prices are per connector. Several of each are available.
Most are unused.

SPECIAL: Buy 5 and take 10% off. Buy 10 or more and take 20% off.

Amphenol PL-259
Still sealed in the original package. These are the silver
plated, teflon insulation variety. $3

Amphenol UG-176 reducing adapters for PL-259 connectors to
use with RG-8 X or RG-59. Still sealed in the package. $1

UHF Right angle 90 degree elbow connector $3

UHF double female "Barrel connector" $3

UHF "Bulkhead Connector" - Double female, as above, but for
mounting thru a window, siding, etc. about 3 inches long $6

UHF "T" connector with two female (SO-239) and one male
(PL-259) connection $5

BNC male to UHF female $5

UHF Male to BNC female $5

BNC male for coax cables
standard type $2
crimp on type $3

Chassis mount BNC female $3

BNC "T", two female and one male $3

I also have many other accessories available such as many
different types of microphones, HTs, HF, VHF and UHF rigs, HF
and VHF/UHF antennas, etc.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

FOR SALE:

Homebrew CW transmitter 6CL6 and 2E26 tubes. Approx.15 watts. Buiilt in AC power supply and relay switching for antenna nd high voltage all built in. Has meter for plate current and all
typical conveniences. 1/4" jack for CW key, and SO 239 connectors for Antenna AND receiver. Uses advanced grid block keying so you can also use it with your keyer. FT243 crystals may be plugged into the socket on the front. (added later after the picture below was taken.)

Standard PI network output to antenna. Stable, clean signal. Excellent and has made many contacts. Currently set up for 40m CW but may be easily changed to other bands such as 80m, 30m and 20m by swapping out one coil. 120V AC operation.

See:
http://www.af4k.com/imag/ham/2e26_5.jpg
More pictures and details on request... Available for $60.00 plus shipping

TUBE ERA AC power supply. Nicely built classic homebrew point-to-point wired supply wit switches and pilot lamps. Suitable for a medium sized or small sized transmitter up to about
100 watts+ input. Made for 120V AC primary and has outputs of 500V DC at 200 mA and 6.3V AC at 5 amps.
Pictures and details on request... Available for $40.00 plus shipping

CLEGG 99er 6m Transceiver - classic 5 watt AM Transceiver.
50 - 52 MHz. Has SO239 connector for antenna nad tunable receiver.
120V AC operation. Very clean looking for its age. Excellent condition with manual copy. See mic stand below... See video also:
http://www.youtube.com/watch?v=FDVAIVC_5pk
Pictures and details on request... Reduced to $75.00 plus shipping

Astatic Microphone stand UG type with cable. Has the 3-pin connection in top for a D104 or similar cartridge. Lovely flat black wrinkle paint base, clean and in superior condition. Cable
has connector for the CLEGG 99er listed above. Looks like this one:
http://forums.qrz.com/attachment.php?attachmentid=34264&stc=1&thumb=1&d=1288928395
(Stand only - no microphone is included)
Pictures and details on request... Available for $15.00 plus shipping

MEISSNER Signal Shifter VFO model EX. This is the bandswitching VFO that actually can be used as a cool tube QRP transmitter and produces more than 5 watts from an 807 RF final tube. This is a great looking example of one of the coolest little transmitter / VFO devices from the golden age of radio.

Has the normal, built-in power supply for 120V AC use. This is one of the nicest ones I have
seen. Pictures and details on request... REDUCED TO $95.00 plus shipping

YAESU FL2100B LINEAR AMPLIFIER - 80m through 10m ham bands
Uses two 572B Tubes. 1200 watts p.e.p. input on 80 through 10m. 120V AC operation.
Comes with a copy of the manual. Pictures and details on request
Available for $500.00 plus shipping

Several Power Supplies For Sale
From high current to low current
and also DC Power Distribution Strip

Icom PS-30 Deluxe Metered Power Supply:

The Icom PS-30 power supply is a deluxe supply that delivers
13.8 VDC at 25 amps. This power supply features a meter which
can be set to display amperage or voltage. Four outputs are
provided on the rear panel. Output 1 is a hard wired, high
amperage cable with the Icom standard 6 pin Molex plug.
Outputs 2, 3 and 4 provide lower current 13.8 VDC output.
This power supply has a snap-out tilt bracket.
Size: 9.5 x 5 x 12.5 inches.

This particular supply works fine, and looks very close to new.
Absolutely pristine. It is in its original box, with paper work.
$199

TenTec 25 amp switching power supply:

"Switcher / 25" 25 amp switching power supply

This is a 25 amp switching power supply in a case that
matches the early Omni series case, with the metal bezel
around it. It is in a case that is the same size as a 243
remote VFO. It has an ammeter on the front, along with
Switch, TenTec logo, and output bulb. The front panel
basically looks like a 280 power supply with a metal bezel,
but says "Switcher/25" on it. It is electrically very quiet,
and well shielded. It does not produce any electrical noise
that I could find.

Of course it works fine, and looks fine also. $140

Astron RS-20A Power Supply:

The RS-20A is a DC Power Supply producing 13.8 V DC (internally
adjustable from 11 to 15 V DC) at up to 16 amps continuous and
20 amps ICS. The RS-20 features crowbar over voltage protection
and fold-back current limiting to protect your equipment.

This particular supply works fine, and looks very close to new.
There is one very small scratch that can be seen if the light
is just right, but is not normally visible.

With paper work for $60.

MFJ 1118 DC Power Distribution Strip:

The MFJ-1118 is a versatile, high-current deluxe multiple DC power outlet. It lets you power two HF and/or VHF transceivers and six or more accessories from your transceiver's main 13 V DC power supply. You get two pairs of super heavy duty 30 amp 5-way binding posts for powering your transceivers. Each pair is individually fused and RF bypassed, capable of a total of 35 amps.

An LED indicates power "ON". Six pairs of heavy duty, RF bypassed 5-way binding posts lets you power your accessories. They handle a total of 15 amps and are protected by a master fuse, have an ON/OFF power switch and an LED power indicator.

You get 6 feet super heavy eight gauge color-coded cable with ring tongue terminals, plus a built-in 0 - 25 VDC monitor meter.

This unit sells new for around $85 plus shipping. This one is like new. Buy it for only $60.

Kepco Variable Bench Power Supply:

This is an ideal bench power supply! It is a Kepco Model ABC 40-0.5, which means that it will produce from zero up to 40 V DC at up to 1/2 amp. Great for the bench.

The voltage is adjustable with a 10 turn pot from close to zero, up to about 40 volts. There is a fairly large analog meter that reads the voltage. There is also current limiting built in that is adjustable from about 100 ma to up to about 700 ma. The same meter that reads voltage can be switched to read current, or short circuit current (the point that the current limit is set). In addition, there are connections on the back to allow remote sensing and remote programming. This is a quality regulated power supply!

This particular unit works 100%, and looks extremely nice.

Only $85.

10 amp, 13 V DC, Power Supply:

This is basically a generic 10 amp power supply made by Stabylex Electronics Corp., and is model 10 SR. It has automatic short circuit protection, and a very large heat sink.

Obviously a supply with a 10 amp rating is ideal for most 2 meter and dual band rigs.

This one works fine and looks great also. $35

Micronta 22-120 A Regulated power supply:

This supply is rated at 2.5 amps at 13 V DC. It is
well regulated. It has a switch and LED power light
on the front, with a circuit breaker and output terminals
on the back. The case (left and right side and top) is
basically all a heat sink, so it should cool the
regulator well.

This one works fine and looks like new. No scratches. $30

Homebrew Power Supply:

This power supply is in a very nice gray and black enclosure
with binding posts for the output on the front, along with
a pilot bulb and power switch. The back panel has a fuse
and the regulator. It looks to be good for 12 V DC at
about 1.5 amps.

It works fine and looks really great. No scratches or
defects on the cabinet. $15

"Wall Wart" Power Supplies:

All of these are "regular" wall warts - not the new
switching type that create all sort of noise in your
receiver. Use one of these, and leave the noise behind.

12 V DC at 625 ma
Many uses for the 12 volt variety! $14

Heathkit "Converter / Charger"
9 Volts DC at 100 ma.
No Heath number on this, and I don't know what it was used
on originally. It can be used either as a 9 Volt DC "power
pack" or as a charger. It has a 2.5 mm male plug on it, with
the tip positive, so it can be used on many devices. $10

9 Volt DC at 500 ma
This one was used on a MFJ 422 keyer, but will also power
other items needing 9 V DC at low current. It has a
2.5 mm male plug on it, tip positive. $12

I also have many other ham items available. Please e-mail
me if you have specific needs. I might be able to help you.

Prices do not include shipping from Florida.

Thanks.

7924. Icom 706MKIIG for trade

Yahoo group: ham4sale (2007 — 2015)
Date: 2013-10-24 16:58:02 UTC
From: John Geiger
Topic: 7924 Message: 7924

I have an Icom 706MKIIG HF/6m/2m/70cm transceiver I am looking to trade. This is the model with DSP as standard, backlit keys, and does 100 watts on HF and 6m, 50 watts on 2m, and 20 watts on 70cm. It comes with the mic, power cord, and the original box (missing one inside box, though). I am looking to trade it for a Yaesu FT857D or Yaesu FT100D as I am mainly a CW operator and the Yaesus have better DSP for CW. The 706MKIIG is a much better SSB rig with a real crystal stock SSB filter and compression that actually works.

The case on the MKIIG shows some wear from mobile use. It doesnt look too bad but does have some scratches on it. Radio works just fine.

Let me know if you have anything to trade. I will always entertain other offers besides the rigs mentioned above. I might consider a Yaesu FT450 also, or an Icom 706 original plus some cash.

7925. Mobile Tower Shack For Sale

Yahoo group: ham4sale (2007 — 2015)
Date: 2013-10-24 04:34:05 UTC
From: J.Gordon Beattie, Jr., W2TTT
Topic: 7925 Message: 7925

I am selling my beloved mobile ham shack with its unique 28 ft crankup tubular tower. The tower can be raised and lowered by hand using a 1/2 inch ratchet handle in about two minutes. The base of the tower is supported by a custom offset base bracket that is inserted into a two inch receiver and a heavy duty custom cargo roof rack on top. Just add a rotator and a suitable mast and you can get up to 45 or more feet with your antennas! This is a great vehicle for EMCOM, Field Day, Hilltopping and more!

It is based on a 1997 Ford E350XLT van with a 6.8l Triton V10 engine that has only 85K miles on it. The van has 385K miles, but it is in fairly good shape, with a bit of rust in spots and a need for a new rear section of the exhaust.

It has two front bucket seats with a bulkhead mount in the front console area for radios, computers and the like according to your preferences. The front console is fed by a piece of fused #4 cable from the battery.

Right behind the front seats, it has a single forward-facing bench seat that faces a large custom operating desk/workbench. It is really great for doing on-site bench work and operating. The bench is long enough to stretch out for a snooze while operating overnights and there is LOTS of cargo room in the rear behind the bench seat for all sorts of gear or even to sleep two or more operators!

It has heavy cabling to an inside electrical box mounted just inside the rear door of the van to provide access to 12V power or to provide a jump, should the need arise. It also features a custom steel ladder on the rear door and 2 inch receiver and electrical hookups for a trailer.

To take a look, please text or call me at 201 314 6964 or email me.
I am asking $3,500.

Thanks & 73,
Gordon Beattie, W2TTT at ARRL dot NET

7927. Icom 706s for sale

Yahoo group: ham4sale (2007 — 2015)
Date: 2013-10-25 23:01:12 UTC
From: <af5cc@...>
Topic: 7927 Message: 7927

I have a couple of the Icom 706 series radios for sale. Both work just fine. Both come with the mic and power cord, and I have one box I will include with the one that sells. Don't have a manual for either but they are available on line. Here is a description of each one:

1. An Icom 706MKIIG HF/6m/2m/70cm transceiver. This is the model with DSP as standard, back lit keys, and does 100 watts on HF and 6m, 50 watts on 2m, and 20 watts on 70cm. The case on the MKIIG shows some wear from mobile use. It doesnt look too bad but does have some scratches on the sides of it from the mobile bracket. There are also a couple of light scuffs on the top of it. The face looks pretty good, with a light scratch on the display, but it doesn't interfere with seeing anything. This is a great way to get on HF as well as 6m, 2m and 70cm SSB/CW-the main VHF contesting bands. I am asking $550 plus shipping.

2. An Icom 706MKII HF/6m/2m transceiver with DSP (this was an option for the MKII). It does 100 watts on HF and 6m, and 20 watts on 2m (No UHF on this model). This one is in very good shape physically, with just a light scuff on the top. This one is also a great performer on HF, 6m, and 2m, and still gets you on the most popular VHF bands. I am asking $440 plus shipping for it.

You can pick these up in Lawton, ok and save shipping charges also.

Hi Folks!

I am selling my beloved mobile ham shack with its unique 28 ft crankup tubular tower. This cable driven tower can be raised and lowered by hand using a 1/2 inch
ratchet handle in about two minutes. The base of the tower is supported by a custom offset base bracket that is inserted into a two inch trailer hitch receiver and a
heavy duty custom cargo roof rack on top. Just add a rotator and a suitable mast, and you can get up to 45 or more feet with your antennas! This is a great vehicle for EMCOM, Field Day, Hilltopping and more!

It is based on a 1997 Ford E350XLT van with a 6.8l Triton V10 engine that has only 85K miles on it. The van has 385K miles, but it is in fairly good shape, with a bit of rust in spots and a need for a new rear section of the exhaust.

It has two front bucket seats with a bulkhead mount in the front console area for radios, computers and the like according to your preferences. The front console is fed by a piece of fused #4 cable from the battery.

Right behind the front seats, it has a single forward-facing bench seat that faces a large custom operating desk/workbench. It is really great for doing on-site bench work and operating. The bench is long enough to stretch out for a snooze while operating overnights and there is LOTS of cargo room in the rear behind the bench seat for all sorts of gear or even to sleep two or more operators!

It has heavy cabling to an inside electrical box mounted just inside the rear door of the van to provide access to 12V power or to provide a jump, should the need arise. It also features a custom steel ladder on the rear door and 2 inch receiver and electrical hookups for a trailer.

Enclosed are two photos. The first photo shows the tower and how it fits on the

steel portion of the rack and custom bumper mount. This is a photo of the tower and

the cable conduit on the van when the steel rack was full length. The steel rack is now

a much shorter platform but has been extended with a more lightweight but sturdy

aluminum rack over the roof. It includes a solid aluminum mounting plate for

HF and VHF/UHF antennas running across aluminum rack.

The second photo shows the current roof rack layout but with the tower dismounted.

It takes about ten minutes to install or remove. It also shows a 96 inch rack box which

is no longer on the roof as I found it to be an impediment to carrying some antennas

and other goodies on the roof.

There is also a white PVC tube on the passenger side that I still have that can be used

to bring cables down the outside of the van and underneath to a rectangular hole with

grommet for cables to enter inside the side wall of the rear of the van. I

can give you that cable tube as well if you are interested.

To take a look, please text or call me at 201 314 6964 or email me.
I am asking $3,500.

Thanks & 73,
Gordon Beattie, W2TTT at ARRL dot NET

From: John Geiger
Topic: 7938 Message: 7938

I have for sale a Heil AD-1-KM headset adaptor to use with Kenwood rigs that have the 8 pin modular mic jack. This would be for rigs like the Kenwood TS480, TM255, TM455, and many of the FM rigs. It is not for rigs with the 8 pin round mic jack. It is new, in the unopened plastic bag. These sell new for $21 plus shipping. I am asking $18 shipped for it and can take paypal/check/MO.

From: John Geiger
Topic: 7939 Message: 7939

I have for sale a neat little item. It is a USB external virtual soundcard. Has a USB jack on one end and the soundcard line in and out jacks on the other end. Plugs into your USB jack and gives you another soundcard on your laptop or desktop computer. Would be great to use with the digital modes so you don't tie up your computer's soundcard. It looks like a big USB thumbdrive.

I am asking $10 for it and can take paypal/check/MO.

7949. Icom 706MKIIG for sale

Yahoo group: ham4sale (2007 — 2015)
Date: 2013-11-10 19:37:55 UTC
From: John Geiger
Topic: 7949 Message: 7949

I have an Icom 706MKIIG HF/6m/2m/70cm transceiver for sale. This is the model with DSP as standard, back lit keys, and does 100 watts on HF and 6m, 50 watts on 2m, and 20 watts on 70cm. The case on the MKIIG shows some wear from mobile use. It doesnt look too bad but does have some scratches on the sides of it from the mobile bracket. There are also a couple of light scuffs on the top of it. The face looks pretty good, with a light scratch on the display, but it doesn't interfere with seeing anything.

This is a great way to get on HF as well as 6m, 2m and 70cm SSB/CW-the main VHF contesting bands. It comes with the microphone, power cord, and original box. I am asking $550 plus shipping. You can pick these up in Lawton, OK and save shipping charges also.

7952. Mobile Tower Shack - $3,500 OBO; will sell tower & mobile shack separately

Yahoo group: ham4sale (2007 — 2015)
Date: 2013-11-12 12:03:10 UTC
From: J.Gordon Beattie, Jr., W2TTT
Topic: 7952 Message: 7952

Hi Folks!

I am selling my beloved mobile ham shack with its unique 28 ft crankup tubular tower. This cable driven tower can be raised and lowered by hand using a 1/2 inch ratchet handle in about two minutes. The base of the tower is supported by a custom offset base bracket that is inserted into a two inch trailer hitch receiver and a heavy duty custom cargo roof rack on top. Just add a rotator and a suitable mast, and you can get up to 45 or more feet with your antennas! This is a great vehicle for EMCOM, Field Day, Hilltopping and more!

It is based on a 1997 Ford E350XLT van with a 6.8l Triton V10 engine that has only 85K miles on it. The van has 385K miles, but it is in fairly good shape, with a bit of rust in spots and a need for a new rear section of the exhaust.

It has two front bucket seats with a bulkhead mount in the front console area for radios, computers and the like according to your preferences. The front console is fed by a piece of fused #4 cable from the battery.

Right behind the front seats, it has a single forward-facing bench seat that faces a large custom operating desk/workbench. It is really great for doing on-site bench work and operating. The bench is long enough to stretch out for a snooze while operating overnights and there is LOTS of cargo room in the rear behind the bench seat for all sorts of gear or even to sleep two or more operators!

It has heavy cabling to an inside electrical box mounted just inside the rear door of the van to provide access to 12V power or to provide a jump, should the need arise. It also features a custom steel ladder on the rear door and 2 inch receiver and electrical hookups for a trailer.

This photo shows the tower and how it fits on the steel portion of the rack and custom bumper mount. This is a photo of the tower and the cable conduit on the van when the steel rack was full length. The steel rack is now a much shorter platform but has been extended with a more lightweight but sturdy aluminum rack over the roof. It includes a solid aluminum mounting plate for HF and VHF/UHF antennas running across aluminum rack.

I have included photos of the full vehicle as it is currently configured.

The tower takes about ten minutes to install or remove. It also shows

a 96 inch rack box which is no longer on the roof as I found it to be an

impediment to carrying some antennas and other goodies on the roof.

I will say though, that it is very convenient for carrying "quick access" items,

cables, lighting and the like. It is a matter of taste!

There is also a white PVC tube on the passenger side that I still have that can be used to bring cables down the outside of the van and underneath to a rectangular hole with grommet for cables to enter inside the side wall of the rear of the van. I can give you that cable tube as well if you are interested.

To take a look, please text or call me at 201 314 6964 or email me.

I am asking $3,500 or best offer. I will sell the tower and mobile shack separately, but at a premium for either one.

Make an offer and I'll give it some consideration.

Thanks & 73,
Gordon Beattie, W2TTT at ARRL dot NET

7954. Wanted: HTX-10 or other FM-SSB 10m mobile

Yahoo group: ham4sale (2007 — 2015)
Date: 2013-11-14 02:29:21 UTC
From: qrv@kd4e.com
Topic: 7954 Message: 7954

The Uniden HR-2600 may be the best of the 10m repeater
friendly 10m mobiles but the Radio Shack/Realistic
HTX-10 is good as well.

I need 10m FM with repeater offsets and also 10m SSB.

I believe CTCSS is on the bottom of the HR-2600, that's a
huge nuisance, and only one tone is available in the HTX-10.

(I anticipate needing to add a CTCSS board to whatever rig I get,
with access via top or front tone select controls.)

If you have one of these in good operating condition for sale
at a reasonable price please email.

Thanks! & 73, David, KD4E

From: qrv@kd4e.com
Topic: 7956 Message: 7956

Looking for an Alinco DX-70T (100w 160-10m, 10w on 6m),
will consider a DX-70TH depending on price.

Must be in good operating condition - no display or
tuning encoder problems. Cosmetics are less important.

Prefer including mic, separation kit, mounting bracket,
manual, & original box but will consider a less complete
setup.

7957. Wanted: Icom IC-706 not Alinco

Yahoo group: ham4sale (2007 — 2015)
Date: 2013-11-16 03:03:44 UTC
From: qrv@kd4e.com
Topic: 7956 Message: 7957

I have been advised to look for an Icom IC-706 rather
than an Alinco DX-70T.

Anyone have one in good working order for sale?

From: Bry Carling
Topic: 7962 Message: 7962

FOR SALE
MEISSNER Signal Shifter VFO model EX. This cool bandswitching VFO that actually can be used as a vintage, tube-era QRP transmitter. It produces around 5 - 6 watts from an 807 RF final tube. This is the bandswitching version and it has all of the coil sets for full HF coverage, Unmodified.

This is a great example of one of the coolest little transmitter / VFOs from the golden era of
radio. Truly a fun boatanchor / QRP combo!

Has the normal, built-in power supply for 120V AC use. This is one of the nicest ones I have
seen. Pictures and details on request...

Available for only $95.00 plus shipping

Will post pictures and details soon on:
http://af4k.com/radios.htm

7964. FS: Giant Roller Inductor

Yahoo group: ham4sale (2007 — 2015)
Date: 2013-11-19 20:13:43 UTC
From: qrv@kd4e.com
Topic: 7951 Message: 7964

Both buyers bailed so this is available again ...

Labeled: "La Pointe 6029-0500-95 421-1" Good used condition.

Asking $175. including shipping to standard USA locations
(Less than 1/2 the new price.)

SurplusSales.com describes theirs "Roller inductor. Internal pinch roller design. 0.2 - 50 µH, 5 kw, 10 amps. Coil: 36 turns, 3/32" x 1/2" wide silver plated edgewound copper, 5-1/4" diameter. Coil is 0.094” thick. 5 turns per inch, 9" long. 4-1/2" diameter - 72XL037 sprocket on drive-end for motor. 3/8" shaft. 6" diameter x 15" long overall dimensions."

I was going to put this at the base of my 43' vertical to add inductance on 80 & 160m but I'm unlikely to get to that project. (The plan was to remotely tune it using a pair of selsyn/sychronous motors.)

Pictures on request.

7967. Wanted: Timewave DSP 9 or 9+

Yahoo group: ham4sale (2007 — 2015)
Date: 2013-11-21 16:59:53 UTC
From: Denise Hargreaves
Topic: 7967 Message: 7967

Hello all....Wanted is a DSP 9 or 9+ (Timewave) for a young friend that is just getting started with radio equipment.....He is at the "listening " stage of the hobby....I have lent him my FRG-7 for him to play with ....and installed an attic antenna in his QTH....So far he is very interested....maybe the first steps in being a ham ? I was fortunate enough to know some one that has another FRG-7 radio that is not being used....and purchased it as a gift for him at christmas.....I would really like to find one of these Timewave filters that someone is not using anymore to add to his gift.....He helps me so much here on the farm....Its the least I can do....

If you have one ...even if its a beater....thats fine....as long as it works...not looking to spend too much....Thankyou for your help and consideration...

Regards....Wes....VA6DWH

7968. FS: Unidilla W2AU 1:1 balun

Yahoo group: ham4sale (2007 — 2015)
Date: 2013-11-21 20:51:27 UTC
From: John Geiger
Topic: 7968 Message: 7968

I have for sale a Unidilla W2AU 1:1 balun, which is slightly used. I bought this recently off of ebay and then realized that I needed a different one for my use. Here are the specs on it:

The *Unadilla W2AU 1:1 balun* is designed to handle full 2000 watts power. It matches 50-75 ohms coax to 50-75 ohms balanced. It has 1 to 1 impedance ratio and covers 1.8 to 40 MHz. W2AU Baluns are transformer designs with ferrite cores to provide 95% minimum coupling efficiency. Each has a built-in lightning arrestor, hang up hook, and 600 lbs of pull-apart strength in a weatherized, rugged package using only stainless steel hardware and quality materials. It is small, rugged and weighs only 6.5 ounces and is 6 inches long with a 1.5 inch diameter.

These sell new for $29 plus shipping. I am asking $24 shipped, and can take paypal/check/MO. This is great to use with dipoles when connecting them to coax.

7969. Couple of Items

Yahoo group: ham4sale (2007 — 2015)
Date: 2013-11-23 02:43:42 UTC
From: Fred VE3FAL
Topic: 7969 Message: 7969

I have to part with a few items. With a few repairs coming up and too many radios it is time to clean a few more items up.

I have the following:

Manufacturer:

Elecraft

Model:

K2/100 with KAT100

Price:

$1500

I am not the original builder/owner of this radio but purchased this and have not used it as I am busy playing pedestrian mobile with my backpack rig and having more enjoyment outside.
This is an Elecraft K2/100 watt version fully loaded.
It also comes with the KAT100 autotuner.
This has the 160 meter add on, SSB add on, DSP, real time clock and much more.
KSB2 SSB adaptor
2.04 firmware
Split RIT/XIT mod
Temperature compensated PLL Upgrade
KAF2
KDSP2
KNB2 (Noise Blanker)
All kinds of mods and documentation to go with it.
Also CAT and RS232 cables for tuner/PC etc
Hand microphone as well
Has Anderson power pole connector mod on radio, and I made a cable to power tuner from radio instead of another source
Serial number 01967

Asking $1500 plus shipping.
Pictures are available upon request.
Item is not DOA, I may have left out a few of the additions to the rig as well

Manufacturer:

Tokyo Hy-Power

Model:

HL-45B

Price:

$300

I have a Tokyo Hy-Power HL-45B amp in near new condition with original box and manual. This was going to be a part of my pedestrian mobile manpack but then changed my mind. It is a perfect fit for the FT-817 if you need the extra power.
Pictures available upon request.
$300 plus shipping

Thanks for looking

Fred

7971. FS: Ham Rotator & Control Box

Yahoo group: ham4sale (2007 — 2015)
Date: 2013-11-24 17:04:14 UTC
From: qrv@kd4e.com
Topic: 7971 Message: 7971

Ham-type rotator with 8-pin trailer-type dongle for a waterproof connection (old screw-type strip on the base has been replaced with a sealed screw-on connector).

Rotator model is uncertain as prior owner had wire-brushed the base. I've been told it appears to be a Ham-3 or early Ham-IV. Was working when purchased and has been in climate-controlled shack for 2+ years. Sold as-is.

CDE (black & white model) Control Box. Should work fine but is sold as-is

Includes approx. 100' as-new 8-conductor USC rotor cable 6 x 18, 2 x 16 w/8 wire connector on one end for the control box & bare wires on the other (you may connect to the included female connector-dongle that matches the one on the rotator).

Also includes rotor mast support (complete with outer bracket and bolts).

Asking $245. plus the actual cost to ship.

10-15-20 plus 17, 12, & 6m using a tuner.

12' boom, 24' 20m elements, most efficient multi-band Yagi with minimal parts and no traps.

It's complete and ready to be used, including all small hardware.

I've been trying to get it in the air for 3+ years and that clearly is not going to happen. My loss, your gain ... literally.

This beam has a history of DXpeditions (prior owner) - so a couple of element sections have been replaced.

Includes original manual. Picture on request.

Asking $550. or reasonable offer. (The elements are pop-riveted together so it's not really practical to ship - it must be picked up in the Statesboro-Savannah, GA area.)

These are 1189. new, see Texas Towers for details:

7976. For Sale: Heavy Duty Mobile Tower

Yahoo group: ham4sale (2007 — 2015)
Date: 2013-11-28 01:50:56 UTC
From: J.Gordon Beattie, Jr., W2TTT
Topic: 7976 Message: 7976

Hi Folks!

I am selling my unique 28 ft heavy duty, military tubular tower.

This cable-driven tower can be raised and lowered by hand using a 1/2 inch ratchet handle in about two minutes. The base of the tower is supported by a custom offset base bracket that is inserted into a two inch trailer hitch receiver and a
heavy duty custom cargo roof rack to support the top.

Just add a rotator and a suitable mast, and you can get up to 45 or more feet with your antennas!

This is a great tower for EMCOM, Field Day, Hilltopping and more!

It will go on any vehicle but the roof rack piece is based on a van body with gutters..
Also included is a custom base that slides into a 2 inch receiver.

I will send you photos upon request.

To take a look, please text or call me at 201 314 6964 or email me.
I am asking $2,900 or best offer.

Thanks & 73,
Gordon Beattie, W2TTT at ARRL dot NET

I have for sale an Icom FL100 500hz CW filter. Works fine, just decided to use a FL101 in my 706MKII instead. This model works in the 706/725/726/728/729/736/737/738/746/756/761/765/775/781 series of radios. It will not work in the 703/707/718 models.

I am asking $75 shipped for it and can take paypal/check/MO.

73 John AF5CC

From: J.Gordon Beattie, Jr., W2TTT
Topic: 7976 Message: 7984

Hi Folks!

I am selling my unique 28 ft heavy duty, military tubular tower.

This cable-driven tower can be raised and lowered by hand using a 1/2 inch ratchet handle in about two minutes. The base of the tower is supported by a custom offset base bracket that is inserted into a two inch trailer hitch receiver and a
heavy duty custom cargo roof rack to support the top.

Just add a rotator and a suitable mast, and you can get up to 45 or more feet with your antennas!

This is a great tower for EMCOM, Field Day, Hilltopping and more!

It will go on any vehicle but the roof rack piece is based on a van body with gutters..
Also included is a custom base that slides into a 2 inch receiver.

I will send you photos upon request.

To take a look, please text or call me at 201 314 6964 or email me.
I am asking $2,900 or best offer.

Thanks & 73,
Gordon Beattie, W2TTT at ARRL dot NET

Rig is in excellent condition & may be heard on the
air by sked (propagation cooperating).

It is an awesome rig, amazing auto-notch filter, dual
PBT, continuously adjustable filtersm front panel keypad,
front panel speaker, important controls on the faceplate
and not buried in menus. It is the best rig I have owned.

It is nearly as-new w/original mic, manual, box, etc.

The handles are a $66.-$75. option.

Pictures on request.

I bought this (used as-new) as a backup to my other IC-7200,
which I am keeping.

I've acquired an Icom IC-706m2g, to add 10m FM and detachable
head for ARES purposes & as my backup rig, so this is extra.

Asking $775. including shipping to standard USA addresses
(some locations may be extra).

7995. MFJ Items FS

Yahoo group: ham4sale (2007 — 2015)
Date: 2013-12-19 14:00:15 UTC
From: Ken Simpson, W8EK
Topic: 6682 Message: 7995

MFJ Items For Sale:

Dual Audio Filter, Antenna Tuner, Wattmeter/SWR
Bridge, DC Power Distribution Strip, Speaker Mic,
and Wall Wart

MFJ 752 Dual Audio Filter

The MFJ 752 is a dual tunable audio filter that permits
one to zero in on a single sideband and Morse code signal
and notch out interference at the same time. It can also
be used for AM mode shortwave listening. The primary filter
has tunable peak, notch, low pass and high pass. The
auxiliary filter has peak and notch. The filter is
automatically bypassed when the unit is off. Speaker and
phone jacks are provided.
It requires 9-15 VDC @300 ma.

Two of these units are available.

One is a plain 752. It works fine and looks good, but
not perfect. With paper work for $45.

The second is the 752 C. The C model has an LED that
lights when power is applied. There are other minor
cosmetic changes. This one works fine and looks very
close to perfect. With paper work for $65.

MFJ 949 C HF Antenna Tuner / Wattmeter / Dummy Load:

This HF antenna tuner is rated by MFJ to handle 300 Watts,
although I really feel the standard 100 Watt rig is pretty
much the limit. It has an SWR bridge built in, along with
a cross needle wattmeter that reads 300 W and 30 W full
scale. This means it will read forward power, reverse
power, and SWR simultaneously.

It also will handle two coax antennas, which can be used
direct, or thru the tuner. A balun is included, as is a
separate antenna switch position for use with open wire
line. It has an internal dummy load that MFJ rates at
300 Watts, but again, 100 W is the practical limit.
This one measure 51 ohms, so it could not be much more
accurate.

This particular unit works fine, and looks good. I can
only find a very small scratch on the bottom that is not

normally visible. With paper work for $90.

MFJ 815 B Cross Needle Peak Reading Wattmeter:

This Wattmeter is a cross needle meter that reads forward and reverse power simultaneously, also displaying SWR. It has 300/3000 Watt forward and 60/600 Watt reverse scales, and is a peak or average reading meter that covers 160 thru 6 meters. It needs 13 V DC.

This particular unit works fine, and looks very close to new. With paper work for $60.

MFJ 1118 Heavy Duty DC Power Distribution Strip:

The MFJ-1118 is a versatile, high-current deluxe multiple DC power outlet. It lets you power two HF and/or VHF transceivers and six or more accessories from your transceiver's main 13 V DC power supply. You get two pairs of super heavy duty 30 amp 5-way binding posts for powering your transceivers. Each pair is individually fused and RF bypassed, capable of a total of 35 amps.

An LED indicates power "ON". Six pairs of heavy duty, RF bypassed 5-way binding posts lets you power your accessories. They handle a total of 15 amps and are protected by a master fuse, have an ON/OFF power switch and an LED power indicator.

You get 6 feet of super heavy eight gauge color-coded cable with ring tongue terminals, plus a built-in 0 - 25 VDC monitor meter.

This one is like new. Buy it for only $60 with paper work.

MFJ-284 HT Speaker Microphone:

This speaker mic has the 3.5 mm and 2.5 mm plugs on it, as used by Icom, Alinco, Radio Shack, some Yaesu, and many other HTs.

It works with the following:

YAESU 109, 209, 709, 23, 73, 33, 727 and other YAESU radios which are pin compatible with the above rigs.

ICOM 2AT, 02AT, 3AT, 03AT, 4AT, 04AT, 12AT, u2A, u2AT, u4AT and other ICOM radios which are pin compatible with the above rigs.

ALINCO DJ-560 and other ALINCO radios which are pin compatible with the DJ-560

RADIO SHACK - most

SANTEC ST-20

It works great, and looks like new.

With paper work for $10.

"Wall Wart" Power Supplies:

All of these are "regular" wall warts - not the new
switching type that create all sort of noise in your
receiver. Use one of these, and leave the noise behind.

12 V DC at 625 ma
Many uses for the 12 volt variety! $14

Heathkit "Converter / Charger"
9 Volts DC at 100 ma.
No Heath number on this, and I don't know what it was used
on originally. It can be used either as a 9 Volt DC "power
pack" or as a charger. It has a 2.5 mm male plug on it, with
the tip positive, so it can be used on many devices. $10

9 Volt DC at 500 ma
This one was used on a MFJ 422 keyer, but will also power
other items needing 9 V DC at low current, including the
MFJ 752 audio filters above. It has a 2.5 mm male plug
on it, tip positive. $12

I also have many other accessories available such as many
different types of microphones, HTs, HF, VHF and UHF rigs, HF
and VHF/UHF antennas, etc.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

Antenna Tuner, Wattmeter, and other HF Antenna related
items For Sale:

MFJ 949 C HF Antenna Tuner / Wattmeter / Dummy Load:

This HF antenna tuner is rated by MFJ to handle 300 Watts,
although I really feel the standard 100 Watt rig is pretty
much the limit. It has an SWR bridge built in, along with
a cross needle wattmeter that reads 300 W and 30 W full
scale. This means it will read forward power, reverse
power, and SWR simultaneously.

It also will handle two coax antennas, which can be used
direct, or thru the tuner. A balun is included, as is a
separate antenna switch position for use with open wire
line. It has an internal dummy load that MFJ rates at
300 Watts, but again, 100 W is the practical limit.
This one measure 51 ohms, so it could not be much more
accurate.

This particular unit works fine, and looks good. I can
only find a very small scratch on the bottom that is not
normally visible. With paper work for $90.

MFJ 815 B Cross Needle Peak Reading HF Wattmeter:

Cross needle reads forward and reverse power simultaneously
SWR displayed also
300/3000 Watt forward and 60/600 Watt reverse
peak or average reading meter
160 thru 6 meters
12 V DC needed for lighted meter

This particular unit works fine, and looks very close to new.
With paper work for $65.

HF and VHF SWR Bridges:

All cover from 3 thru 150 MHz and have SO-239
connectors in and out.

Royce 2-100 SWR Bridge / Field Strength Meter
This one works fine, and looks extremely nice. No scratches,
but it does have a previous owner's name on it.
In its original box with original instructions. $20

Heath AM-2 SWR Bridge
Matches the DX-40, although it can be used with any HF

or VHF transmitter. About 8 inches wide and 4.5 inches
high, with the meter in the middle, and a gray colored
knob at each side near the bottom.
This particular unit works fine and is in very good shape.
Paper work is included for $22.

"Window Line" 450 ohm transmission line:

This is similar to "open wire" transmission line,
but has some plastic insulation on it instead of
being open, so it is protected more. The openings
look like windows, hence the name.

I have two lengths available. Both are new, never used.
One is 50 feet long, and is $20.
The other is 100 feet long and is $35.

Copper Antenna Wire:

Both coils are new, unused, shiny.

Coil of 100 feet of #12 stranded copper wire $20

Coil of 50 feet of # 14 stranded copper wire $8

Balun / Antenna Center Insulators:

All baluns are 1:1 ratio, and handle full legal power.

Unadilla W2AU "Big Signal" Balun
Use this as a center insulator for a dipole, or on a beam.
Built in lightning arrestor.
This one is new, still in its original box, with paper work. $20

HyGain BN-86 Balun
The case of the BN-86 is constructed so that one can use
it to hang a dipole or inverted V, or a U-bolt can be added
to attach it to the boom of an HF beam antenna.
This particular balun works fine, but does show slight physical
use. It includes the paper work for $40.

VanGorden "HiQ" Balun
The Van Gorden HI-Q balun is designed to handle full legal
power with a low standing wave radio (SWR). It includes a
hanger for a dipole. Some rust on screw eyes. $10

W2AU ANsulator
The Unadilla W2AU ANsulator™ Antenna Center Insulator is handy
for many types of antennas. It features a top eye-bolt for
support (if needed). There are strong eye bolts and spade
lugs on either side for the antenna wire.
It looks to be new. $12

VanGorden "Hi Q" Antenna Center Insulator
No balun included in this one, but it is designed to act as the
center insulator for a dipole or inverted V antenna, similar to
the W2AU Ansulator above. This one appears to be unused. $12

B & W 591 Coax Switch:
This switch is designed to switch an auxiliary piece of
equipment in and out (For example, bypass a linear
amplifier, transverter, preamp, etc.). It is round and
has four SO-239 connectors coming out the back of it.
With paper work for $35.

Hustler HF Mobile Antennas:

All work 100% and are in good condition.

Hustler 54 inch mobile masts:
MO-1 (folds about 14 inches above ball) $22
MO-2 (folds about 27 inches above ball)
..... NEW, still sealed in the package, $30

"Super" Hustler resonators (high power version):
75 meter RM-75 S, $35
40 meter RM-40 S, $25

Coax connectors and adapters:

Prices are per connector. Several of each are available.
Most are unused.

SPECIAL: Buy 5 and take 10% off. Buy 10 or more and take 20% off.

Amphenol UG-176 reducing adapters for PL-259 connectors to
use with RG-8 X or RG-59.
Still sealed in the package. $1
No longer sealed in package. 50 cents

UHF double female "Barrel connector" $3

UHF "Bulkhead Connector" - Double female, as above, but for
mounting thru a window, siding, etc. about 2 inches long $6

UHF "T" connector with two female (SO-239) and one male
(PL-259) connection $5

BNC male to UHF female $5

UHF Male to BNC female $5

BNC male for coax cables
standard type $2
crimp on type $3

Chassis mount BNC female $3

BNC "T", two female and one male $3

I also have many other accessories available such as many different types of microphones, HTs, HF, VHF and UHF rigs, HF and VHF/UHF antennas, etc.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

Have a very nice pair of the original TWINS. The FR-101 is the receiver with the green digital readout. The FL-101 is analogue ,as were all the FL's. cosmetics on both rigs are easily 8.5/10,never been around smoke. Faces plates are near perfect. I have owned these for several years. The transmitter was just out to certified electronics and completely gone thru, Will be under warranty. full out on all bands. Have found no operational problems in 2 years.
Comes with the matching factory landline speaker.Will include all original manuals,cables and interconnect cables
the fl-101 sn# is 7D308270,RECEIVER IS 6A313186. The twins are easy to operate and are a lot of fun to use.. both have built in power supplies. Have lots of pictures-just ask
ASKING 850.00 SHIPPED FEDEX INSURED.

Topic: 8002 Message: 8002

I have no place to install this antenna nor will ever. It's a Hygain Explorer 14 HF beam antenna for 10 15 and 20 meters. there is a 40 meter add-on kit available for it. It had been disassembled and rolled up in a tarp for years. I checked it not long ago and everything is there and it's ready to go back in the air. I have no reason to hold onto it. It currently lists for around $500 but I well sell for $300 or best offer. I live in Altus Oklahoma and I will workout a meeting with anyone that wants it within reason. If you are interested, let me know. You cam reach me here or on the phone at 580-480-5419.

8003. Looking for a BEST OFFER For Sale: Heavy Duty Mobile Tower

Yahoo group: ham4sale (2007 — 2015)
Date: 2013-12-23 05:01:51 UTC
From: J.Gordon Beattie, Jr., W2TTT
Topic: 8003 Message: 8003

Hi Folks!

This tower could be used in a fixed or mobile environment. What I like about it, is that you can use a short A-frame ladder to put whatever you want on top (e. g. rotator and tall mast and then just use a 1/2 inch ratchet to raise it up in about 2 minutes to full height. The ability to put an antenna between 30-45 ft in the air, depending on antenna load without having to tip it up is a liberating capability. I mounted it on the back of my old van which I no longer have, and I would just go up on the platform built into the rack to drop in the rotator and mast. In fact, I would preinstall the rotator with its cabling into the van and then just drop in the mast, antennas and feed lines into the top of the rotator. I would then ratchet it up from the safety and ease of the ground.

The rack as it exists today, is only the rear 20% needed to support the tower and fits very well on a van. It allows access to the top and also provides for in-transit storage of gear. The key element is the 2 inch hitch fixture that supports the bottom of the tower.

Finally, this tower is REALLY STURDY and can support a whole bunch of antenna load. The limiting element will be the rotator. It was built for the U. S. Army by a German company (unknown) and does not require maintenance of seals for hydraulics or pneumatics or the use of a compressor to operate. This is unlike the surplus broadcast towers you see. Its internal cable-driven design is reliable and a pleasure to use. I have never seen another one on the market and I have searched through many military vehicle and radio web sites, lists and experts. My guess is that it was built to support a dish on an armored or heavy wheeled vehicle.

Please let me know of your interest. I will accept cash or PayPal to W2TTT@....

I am selling my unique 28 ft heavy duty, military tubular tower.

This cable-driven tower can be raised and lowered by hand using a 1/2 inch ratchet handle in about two minutes. The base of the tower is supported by a custom offset base bracket that is inserted into a two inch trailer hitch receiver and a
heavy duty custom cargo roof rack to support the top.

Just add a rotator and a suitable mast, and you can get up to 45 or more feet with your antennas!

This is a great tower for EMCOM, Field Day, Hilltopping and more!

It will go on any vehicle but the roof rack piece is based on a van body with gutters..

Also included is a custom base that slides into a 2 inch receiver.

I will send you photos upon request.

To take a look, please text or call me at 201 314 6964 or email me.
I am asking $2,900 or best offer.

Thanks & 73,
Gordon Beattie, W2TTT at ARRL dot NET

Topic: 8002 Message: 8004

I have one of these antennas about thirty feet up at my house. It has worked great for years. Mine has nearly a flat 1:1 SWR across all three bands. I love it. I am even able to load it up on 18 mhz in it's regular form without the add on kit. Of course, it doesnt give a flat swr on that band, but with my auto tuner, I am able to make a lot of contacts anyway.

I also have the 40 meter add on kit, which I never installed because I didnt want to the extra weight or have to put up the
extra overhead cable support for the sag that comes along with the addition.

I was lucky. I got mine from a nearby ham who was getting out of the hobby. He sold me the antenna for $40. He also threw
in all the traps for HyGain's five band trap dipole as well.

The only problem I've had with this antenna is that I have developed a sky high swr on 15 meters. 20 and 10 remain just fine.
I'm not sure if I have developed a bad trap or if I need to do some cleanup work on the connections after having it up in the
air for about 15 years. This coming spring I'm going to lower the tower, mounted on my carport, and disassemble it and clean
all the metal and see if that's the problem. If it is a trap, I know that MFJ still has replacement traps for this antenna.

All in all, a great antenna. Even running barefoot, I am able to snag just about anything I can hear. If I'm having real
difficulty, I just flip on the SB 200 and wait my turn. 500 watts into this antenna is just fantastic.

I need a Cinch-Jones 12-pin female inline power connector
for a recently acquired Yaesu FT-901D.

| | | |

| | | |
– – – –

I have three male 12-pin Cinch-Jones type connectors
(different pin orientation) to trade.

Or, can send Paypal, check, MO, etc.

Meanwhile, jumpers and wire connectors are getting it done ...

Thanks!

David

I have a Galaxy V power supply but need something
better matched to an Elmac AF-67.

It doesn't have to be an Elmac and some variation
from the specs is OK as I plan mods to the AF-67.

Otherwise I'll need to make major mods to this one.

I'm not in a huge hurry so if a meet-up at Hamcation
in Orlando in February is possible it could save
shipping costs - otherwise we can work out shipping.

Thanks!

David

8013. For Sale: ICOM IC-2820H Dual Band 2-Meter / 70-CM Complete Mobile Transceiver Package

Yahoo group: ham4sale (2007 — 2015)
Date: 2013-12-29 22:24:18 UTC
From: <w2gld@...>
Topic: 8013 Message: 8013

For Sale:

Practically brand new, ICOM IC-2820H 2-Meter/70-CM D-Star Digital dual band mobile transceiver, complete with UT-123 D-Star Digital Voice / GPS board installed. This radio is in mint condition and includes all original boxes, manuals, warranty card, mounting hardware, microphone, cables, and new DC power cord. The radio has been modified for MARS/CAP as well. This is a late model serial number, purchased in 2012 and has the latest firmware and hardware changes as noted in current revisions of the ICOM Service Manual. The radio was used in my spare vehicle, but I am selling it now, as we are no longer keeping this vehicle. It has also only been used a handful of times by me, a non-smoker.

The package will include the following: (1) ICOM IC-2820H mobile with UT-123 D-Star Digital Voice / GPS unit installed, all original accessories, manuals, etc. (1) Original ICOM CS-2820 OEM Programming Software CD-ROM & another CD-ROM with the latest release of the CS-2820 software, v1.2 (Works in Windows XP/Vista/7, and 8) and the PDF Service Manual. (1) ICOM OPC-1529R Serial Data Cable, and (2) ICOM SP-10 Speakers.

I am asking $700 shipped via U.S.P.S. Priority Mail, payment via U.S.P.S. Money Order Only…

Interested parties, please e-mail me directly at: W2GLD@arrl.net mailto:w2gld@arrl.net

Thanks,

Jerry, W2GLD

Hi there: Looking for a socket for Eimac 4-1000A, 8166 and/or 833,

Epay has some either Chinese junk or VERY expensive.

Does anyone have anything like that? Willing to buy or swap.

Kind Regards,

Jon Paul

8016. FS: Ranger 5054 100 watt model

Yahoo group: ham4sale (2007 — 2015)
Date: 2013-12-31 15:24:33 UTC
From: John Geiger
Topic: 8016 Message: 8016

I have for sale a Ranger 5054DX-100 6 meter all mode radio. This is the 100 watt model, and it has the newer display with the black background instead of the teal background that was used in earlier models. This rig does SSB/CW/AM/FM on 6m, truely making it an all mode rig. It comes with the power cord and mobile bracket. It also has a SS-64 tone encoder which was professionally installed on top of the radio to use for repeaters. You set the tones by dip switches. I do not have a microphone for the rig, but it uses a 6 pin Ranger mic which can probably be picked up at most truck stops.

I am asking $210 plus shipping for the radio, and can take paypal/check/MO.

From: John Geiger
Topic: 8017 Message: 8017

Cleaning out the junk drawer to start 2014 and found some audio cables I have salvaged from other things. I probably wont be using them anytime soon, so figured I would make them available to someone who might be able to use them. Here is what I have available:

1. A 54 inch cable with a 1/8" mono male plug on 1 end and a female 1/8" plug on the other end

2. 1 coiled up cable with a female 1/8" plug on 1 end, bare on the other end. It is approximately 24 inches as is, obviously much longer if you uncoil it. Very tight coils on it, so probably several feet long in total.

3. 28 inch cable with male 1/8" stereo on one end, bare on the other end

4. two cables that are 45 inches long, with male right angle 1/8" plug on 1 end, bare on the other end

5. 13 inch cable with female 1/8" mono plug on 1 end, bare on the other end

6. 10 inch cable with male 1/8" mono plug on 1 end, bare on the other end.

I am asking $16 shipped in the US for the set, and can take paypal/check/MO.

8022. [ham4sale] Elk River 19401 Wire Rope Grab with Carabineer

Yahoo group: ham4sale (2007 — 2015)
Date: 2014-01-05 00:56:56 UTC
From: Gregory Zenger [N2GZ]
Topic: 8022 Message: 8022

I have for sale several Elk River 19401 Wire Rope Grab with 3/8" Size Carabineer. They are new in original manufacturers packaging.

These cable grabs are cam actuated fall arresters, which slide freely up and down a stainless steel or galvanized steel wire cable of 3/8" (10mm) diameter (customer supplied) and locks on the cable to arrest fall.

The cable grab is connected to the sternal (chest) attachment point(s) on the harness via carabineer.

These are sold in original packaging: The wire rope grab is packaged in shrink wrap along with the instruction manual (folded 8.5x11 sheet of paper), and then placed inside a zip style bag along with the carabineer and labeled with the model number and UPC bar code. The packaging may have small tears as these were bulk packaged in a box from the manufacturer and large metal objects tend to poke their way through their bags.

Buyer assumes all liability for proper use of this product, including inspection prior to each use in accordance with the manufacturers manual.

I have several of these available for sale. $215 each, with free USPS priority mail shipping to USA. Payment via PayPal is prefered. If you want several, I can adjust the price due to the savings on shipping.

Greg Zenger

8026. VHF Items FS

Yahoo group: ham4sale (2007 — 2015)
Date: 2014-01-08 16:45:14 UTC
From: Ken Simpson, W8EK
Topic: 8026 Message: 8026

VHF related Items For Sale:

Antenna Tuner for 6 and 2 meters, VX-7 Accessories,
several Microphones, Wattmeters/ SWR Bridges,
Communications Speakers, Antenna connectors and
adapters, and more

Antenna Tuner for 6 meters and 2 meters:

This Comaire LM-62 tuner is different than any I
have ever seen!

Although the tuner is for 6 meters and two meters,
each tuner is completely separate, with no common parts,
other than the enclosure it is in, which is a nice black
hammertone enclosure with an off white / tan front panel.

The tuner has the standard SO-239 connector for an input,
but has dual outputs on each band for both balanced line
or for coax. This is where it is different. The balanced
line output does not use a balun, but instead is link
coupled. This is something not seen much any more, and
certainly indicates its age.

This arrangement is duplicated with the 6 meter tuner
on the left, and the 2 meter tuner on the right.

There is no indication of power handling capability on
it, but I would guess a couple hundred watts.

This one works fine and looks very nice. $100

Yaesu VX-7 accessories:

VX-7 Nifty Mini Manual
A pocket reference to all of those commands that no one
remembers! For the VX-7. Spiral bound. $18

Programming cable
This cable has the threaded connector as used by the VX-7,
but it can also be used on the VX-6, 5, 3, etc.
Uses USB port.
It works great with the free "Chirp" program. I have not
tried it with others. I am fairly sure it is Yaesu and
not aftermarket. $18

DTMF Touch Tone Microphones:

Yaesu MH-15 DTMF Touch Tone Mic:
The MH-15 c6 is a hand microphone that features a 16 digit DTMF Touch Tone Pad on the back, along with a lock/unlock switch. The top has up/down buttons. Of course the PTT is on the side. This one presently has the round 6 pin connector, which can be changed of course.
It works fine and looks close to new. $40

CES 810 L DTMF Mic
One can manually dial a number, or automatically store it in the mic, and "speed dial". It has a 12 digit touch tone pad on the front. With 8 pin modular plug (like computer LAN).
It looks to be unused. $38

Johnson 250-0761-010 / CES 655 L DTMF Mic
It has a 12 digit pad on the front, and is a rugged mic.
Presently with 4 pin connector. It looks to be unused. $38

Thrust Bearing Bracket for Alliance Rotors:

This is a thrust bracket used on most all of the Alliance brand antenna rotors except the HD-73. This includes the popular U-100, along with the C-225, U-98, U-110, and most any of the other rotors used for VHF and TV arrays. This bracket increases the capacity of the rotor considerably.

This particular thrust bracket is NEW, unused.
It includes the manual with installation instructions.

Only $25.

B & W 591 Coax "Transfer" Switch:

This switch is designed to switch an auxiliary piece of equipment in and out (For example, bypass a linear amplifier, transverter, preamp, etc.). It has four SO-239 connectors coming out the back.

It works fine and is in great shape.

With paper work for $35 plus.

HF and VHF SWR Bridges:

All cover from 3 thru 150 MHz and have SO-239 connectors in and out.

Royce 2-100 SWR Bridge / Field Strength Meter
This one works fine, and looks extremely nice. No scratches, but it does have a previous owner's name on it.
In its original box with original instructions. $20

Heath AM-2 SWR Bridge
Matches the DX-40, although it can be used with any HF or VHF transmitter. About 8 inches wide and 4.5 inches high, with the meter in the middle, and a gray colored knob at each side near the bottom.
This particular unit works fine and is in very good shape. Paper work is included for $22.

Heath Wattmeter/SWR Bridge:

Heath HM-2102 VHF Wattmeter/SWR Bridge:
The HM-2102 is similar to the HM-102, but covers 50 to 160 MHz., with 250 and 25 watt scales. It can also be used to check SWR, and has a remote sensor that can either be left inside the meter, or separated from the actual meter. SO-239 connectors in and out.
This particular meter works great, looks great, and includes paper work for $45.

Communications Speakers:

Realistic 21-549 A
This one is about 4 inches square but only about 2 inches deep. It is rated for 5 watts, has an 8 ohm impedance, and is listed as a 300 to 3000 Hz frequency response, making it ideal for communications. 3.5 mm (1/8 inch) mono plug. It is black in color, looks great, and sounds great. $18

Vanco SPB-5
Appears to be the same at above, but with a Vanco label. Also includes gimbal mount. $15

Vanco SPB-6
Similar to SPB-5 above, but is considered a noise cancelling speaker. 10 Watt rating. Still in original box, new. $18

10 amp, 13 V DC, Power Supply:

The Stabylex Electronics Corp., model 10 SR power supply has automatic short circuit protection, and a very large heat sink.

A 10 amp rating is ideal for most 2 meter and dual band rigs.

This one works fine and looks great also. $35

Low Pass TVI Filter:

A low pass TVI filter is added to the transmitter to reduce harmonic interference. All have SO-239 connectors, and are 50 ohm filters.

Drake TV-5200-LP Low pass TVI filter
This is the filter that may also be used on the low end of six meters, as well as HF. It is good for 1000 Watts "average" below 30MHz, and about 200 W up to 52 MHz. It is the newer version of the TV-1000. $30

MFJ 1118 DC Power Distribution Strip:

The MFJ-1118 is a versatile, high-current deluxe multiple DC power outlet. It lets you power two HF and/or VHF transceivers and six or more accessories from your transceiver's main 13 V DC power supply. You get two pairs of super heavy duty 30 amp 5-way binding posts for powering your transceivers. Each pair is individually fused and RF bypassed, capable of a total of 35 amps.

An LED indicates power "ON". Six pairs of heavy duty, RF bypassed 5-way binding posts lets you power your accessories. They handle a total of 15 amps and are protected by a master fuse, have an ON/OFF power switch and an LED power indicator.

You get 6 feet super heavy eight gauge color-coded cable with ring tongue terminals, plus a built-in 0 - 25 V DC monitor meter.

This one is like new. Buy it for only $60.

"Window Line" 450 ohm transmission line:

This is similar to "open wire" transmission line, but has some plastic insulation on it instead of being open, so it is protected more. The openings look like windows, hence the name.

I have two lengths available. Both are new, never used.
One is 50 feet long, and is $20.
The other is 100 feet long and is $35.

Coaxial Cable with "N" Connectors:

This cable has a male "N" connector on each end. It is about 60 feet long.

The coax is labeled 50-2 V, which obviously means it is 50 ohm cable, but I don't know what the 2 V means. It appears to be slightly larger in diameter than RG-8 X, but not quite as large as RG-8.

This piece is in good condition, with heat shrink around the connector for strain relief. $35

Coax connectors and adapters:

Prices are per connector.
Several of each are available.
Most are unused.

SPECIAL: Buy 5 and take 10% off.
Buy 10 or more and take 20% off.

UG-175 reducing adapters for PL-259 connectors to
use with RG-58. 50 cents each

UG-176 reducing adapters for PL-259 connectors to
use with RG-8 X or RG-59.
Still sealed in the package. $1
Out of package, 50 cents.

UHF double female "Barrel connector" $3

UHF "Bulkhead Connector" - Double female, as above, but for
mounting thru a window, siding, etc. about 2 inches long $6

UHF "T" connector with two female (SO-239) and one male
(PL-259) connection $5

Antenna adapter to fit the BNC connector on the HT
and provide an SO-239 connector that will permit
a PL-259 to be attached. (BNC male to UHF female) $5

UHF Male to BNC female $5

BNC male for coax cables
standard type $2
crimp on type $3

Chassis mount BNC female
square mount (uses 4 screws) $3
screw in type $3

BNC "T", two female and one male $3

I also have many other accessories available such as many
different types of microphones, HTs, HF, VHF and UHF rigs, HF
and VHF/UHF antennas, and many miscellaneous accessories.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

8027. FS - Male BNC/BNC patch cables

Yahoo group: ham4sale (2007 — 2015)
Date: 2014-01-09 00:12:12 UTC
From: n8oep_mike
Topic: 8027 Message: 8027

Offering:
Used Pomona 2249-K-120 (Male BNC/BNC patch cable(s)) (10' RG174/U)

Info:
BNC male to male patch / jumper cable
50 Ohm RG174/U cable 10 feet long w/ built in long strain relief on connecters.
Do search on the part number for more info.
Good clean condition and pass continuity tests and no oxidation on pins or shells.

Asking:
$3 per cable + shipping
These are about 2.5 oz (shipping weight) per cable.
I have several in this length.

If you are interested, let me know how many you want.
That will determine the shipping cost.
That is 6 of them for $18 + 16 ounces postage(about $6) = $24

US domestic shipping only. For international shipping, please see ebay for similar items.

Payment:
PayPal (preferred), cash, checks from ARRL or QRZ members accepted upon clearance.

Shorter cables will become available as more equipment is decommissioned.

Mike - N8OEP

8036. FS: Set of audio cables

Yahoo group: ham4sale (2007 — 2015)
Date: 2014-01-18 03:23:03 UTC
From: John Geiger
Topic: 8017 Message: 8036

Cleaning out the junk drawer to start 2014 and found some audio cables I probably wont be using them anytime soon. Here is what I have available:
1. A 54 inch cable with a 1/8" mono male plug on 1 end and a female 1/8" plug on the other end
2. 1 coiled up cable with a female 1/8" plug on 1 end, bare on the other end. It is approximately 24 inches as is, obviously much longer if you uncoil it. Very tight coils on it, so probably several feet long in total.
3. 28 inch cable with male 1/8" stereo on one end, bare on the other end
4. two cables that are 45 inches long, with male right angle 1/8" plug on 1 end, bare on the other end
5. 13 inch cable with female 1/8" mono plug on 1 end, bare on the other end
6. 10 inch cable with male 1/8" mono plug on 1 end, bare on the other end.
I am asking $14 shipped for all of them.

Topic: 8039 Message: 8039

Raising funds for a HF amp - rough band conditions make
extra power necessary for ARES & other comms. Reasonable
offers welcomed.

Morrow CM-1 AM-BC Conelrad receiver. Asking $75.

Drake UV-3 2m rig w/original manual. Asking $195.

Yaesu FT-901D with mic & 300Hz optional filter. Asking $495.
(Sherwood rates the 901D receiver better than a R-390.)

RCA StratoWorld (with a good & rare 1L6 tube). Asking $175.

Alinco DR-135 (was using it for APRS at home). Asking $115.

Yaesu FC-2 2M Converter for Yaesu FR-101 rx). Asking $75.

Yaesu FC-6 6M Converter for Yaesu FR-101 rx). Asking $95.

I have electronic or printed docs and can provide pictures
on request. I didn't plan to part with any of these but
having an amp available has become important here.

All asking prices include shipping to standard USA addresses.

Delivery to Hamcation-Orlando in February is possible - or
pick up here in SE-GA.

8040. FS: Icom 706MKII

Yahoo group: ham4sale (2007 — 2015)
Date: 2014-01-22 03:04:44 UTC
From: John Geiger
Topic: 5513 Message: 8040

I have for sale an Icom 706MKII HF/VHF rig in good condition overall. This is the model that does 100 watts on HF and 6 meters, and 20 watts on 2m. It works great, I have worked 50 countries and 23 zones on it since the beginning of 2014 for the CQ Magazine DX marathon. Ran it in the VHF contest this past weekend with good results also.

It comes with the power cord and a hand mic. The VFO knob shows some wear on it. The Sides and faceplate look excellent. There are a couple of scuffs on the top and bottom, but overall, it looks really good. You will appreciate having it in your shack. The only "issue" with it is that the original tilt down bail has been replaced with the bail from an Icom 7000. It works fine, but just doesn't snap into place like the original one would. I have had no problems using this bail.

I am asking $450 shipped in the US for it. I can take paypal/Check/MO/Cash. Might consider a trade for a Yaesu FT100D, FT450, or FT857D.

8041. Several scanners FS

Yahoo group: ham4sale (2007 — 2015)
Date: 2014-01-17 18:42:07 UTC
From: Ken Simpson, W8EK
Topic: 8041 Message: 8041

Several Scanners For Sale:

Realistic Pro-2023 Direct Entry Scanner:

The Pro-2023 is also called Model number 20-128.
It is a 20 channel scanner covering UHF, VHF Hi &
Lo and Air Bands.

Features & Specifications:
20 Programmable Channels With Memory Backup
Channel One Priority
Antenna and 3.5mm Earphone Jacks
Scan Delay Lets Your Hear The Return Calls
Automatic Weather Search
Telescoping Antenna
Search Function Finds New Unlisted Frequencies
Backlit LCD Display

Frequencies Automatically Scanned For Active Channels
29-29.7 MHz 10 Meter Ham Band
29.7-50 MHz VHF Lo Band
50-54 MHZ 6 Meter Ham Band
108-136 MHz Aircraft Band
136-144 MHz VHF Government Band
144-148 MHz 2 Meter Ham Band
148-174 VHF Hi-Band
406-420 MHz UHF Government Band
420-450 MHz 70cm Ham Band
450- 470 MHZ UHF-Lo Band
470-512 MHz UHF-T Hi Band

This one works fine and looks fine. It is in its original
box, complete with antenna and paper work for $35.

Regency Touch K100 Scanner:

The Regency Touch K100 is a programmable scanner that
covers the low VHF, Hi VHF, and UHF frequencies. Of
course this means it covers weather frequencies. It
has battery back up of the programmed frequencies and
also will do searches.

Frequencies covered include
30 - 50 MHz
144-148 MHz
148-174 MHz
440-450 MHz

450-470 MHz
470-512 MHz

More info can be found at
http://radiopics.com/Regency/Regency_Touch%20K100.htm

This one works fine and looks fine.

With telescoping antenna, power cord, and paper work
for $25.

Bearcat BC-560 XLT / PRO-2025 Scanner:

The Uniden Bearcat BC-560XLT 16 channel scanner (also known as
PRO-2025) covers VHF Low Band, VHF High Band and UHF. It has a
priority channel and channel lockout, plus weather search for
instant access to your local NOAA weather station.
Programming is easy. Just key in the desired frequency. You
can press the Review button to check each channel.

External jacks include: external antenna, external speaker
and 12 VDC power.
5.5 x 1.75 x 7 inches.

It covers
29-29.7 Amateur Band 10 Meters
29.7-50 VHF Low
50-54 Ham Band 6 Meters
136-144 Federal Government
144-148 Amateur Band 2 Meters
148-174 VHF High Band
406-420 Federal Government
420-450 Amateur Band 70 Cm
450-470 UHF Band
470-512 UHF "T" Band

This one works fine.
With paper work and power cord for $25.

Realistic PRO-56 Scanner:

The PRO-56 covers from 144 to 174 MHz and also 430
to 512 MHz. It is a small scanner with 8 channels,
and is powered by a 9 volt battery, or battery eliminator.

This one works fine and looks fine as well.

It includes a telescoping antenna for $15.

Regency Scanner:

I can not find a model number on this scanner.
It is a 10 channel, crystal control scanner,
for lo VHF, hi VHF, and UHF. There are jumpers

inside to select any of these three ranges.
There are no crystals installed. The audio
output is fine. The squelch is always open,
probably due to no crystals in it. It might
work fine, and it might not. Assume it does
not work and is for parts only. You may have
a pleasant surprise.

It runs off of 13 V DC. Power cord is included
for $5.

I also have many other accessories available such as many
different types of microphones, HTs, HF, VHF and UHF rigs, HF
and VHF/UHF antennas, etc.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

8047. FS: Icom IC-RM2 controller for Icom IC-211, IC-245 & IC-701 xceivers

Yahoo group: ham4sale (2007 — 2015)
Date: 2014-01-23 12:14:47 UTC
From: <N5SQK@...>
Topic: 8047 Message: 8047

The Icom IC-RM2 is a microprocessor controller for the Icom IC-211, IC-245 and IC-701 http://www.universal-radio.com/catalog/hamhf/701.html transceivers. It supports frequency control, duplex offset programming, 4 memories, scan memory function, programmable frequency step, touchtone generator and remote frequency readout.

I acquired this vintage item from a seasoned ham who owned an IC-211 many years ago. I believe he acquired the IC-RM2 new at the time and never used it. It is cosmetically in very good condition and appears to be un-used. Great item to complete your classic Icom IC-211, IC-245 or IC-701 rig. I have no way to test it, so I am selling it “AS IS”. No returns or warranty. $55.00 shipped CONUS.

Manual for this item is available from Icom at: http://www.icom.co.jp/world/support/download/manual/disp_down.php?SWT=&ID=20010101362&GNR=Options&TYPE=I&PDNM=IC-RM2&INQWORDSWT=No&INQWORD= http://www.icom.co.jp/world/support/download/manual/disp_down.php?SWT=&ID=20010101362&GNR=Options&TYPE=I&PDNM=IC-RM2&INQWORDSWT=No&INQWORD=

8048. FS: YAESU Amp Control Cable

Yahoo group: ham4sale (2007 — 2015)
Date: 2014-01-23 12:33:35 UTC
From: Bry Carling
Topic: 8048 Message: 8048

For Sale: Yaesu Linear Amplifier Control Cable

Cable to key a linear amplifier with your Yaesu FT450, FT450D or FT950 Transceivers etc.

Control any linear amplifier such as SB200, FL2100B, Ameritron AL80B, AL811 etc. to the best of their capability with this dual control cable.

This is the better cable with both the PTT line AND the ALC signal. It is clearly labeled and
plugs right into the small, round 10-pin DIN connector This is unused - brand new.
These sell for $25.00 or more on eBay. Will sell for $16.00 plus shipping.

8050. FS: Lots of Icom accessories

Yahoo group: ham4sale (2007 — 2015)
Date: 2014-01-24 04:09:11 UTC
From: John Geiger
Topic: 8050 Message: 8050

I have quite a few accessories for your Icom radio for sale. All prices include shipping in the US, and I can take paypal/check/MO/cash.

Here is what I have available:

1. FL223 1.9khz SSB filter ($130 new) $80
2. FL100 500hz CW filter ($120 new) $75
3. FL232 350hz CW filter ($120 new) $75
These filters will not work in the 703/707/718 radios.

4. UT-102 voice synthesizer ($85 new) $55

5. UT-106 DSP Unit ($150 new) $75
This works in the 706 series, 718, and R75 receiver

6. OPC-589 8 pin round to RJ45 adaptor, allows you to use desk mic with 703/706/7000 and FM radios ($40 new) $25

7. OPC OPC-599 13 pin ACC plug to 7 pin + 8 pin jack adaptor, good for using with amps and things like that ($75 new) $50
This would work with the 703/706/718/7000/7200 series

8. OPC-581 front panel separation cable for the Icom 706 series($60 new) $40
9. Heil mic adaptor to 8 pin round for Icom ($40 new) $25
10. Photocopy of Icom 706MKIIG service manual $6
11. Homebrew keying interface designed by W4ETN. Plugs into 13 pin ACC jack and allows you to key any amplier, including the old vintage ones. Asking $20

Let me know if you are interested in any of these and we can work out the details.

Reposting due to buyer changing his mind.
A piece of Cold War history it receives on AM-BC and includes the often
hard-to-find Potter & Brumsfield relay.
I will email the PDF manual. Needs usual cap, resistor, & tube checks -
too many projects here. Note the Universal Radio "Sold" prices.
More information here:
http://www.universal-radio.com/used/sold212.html
Picture on request.
Asking $75. shipped to standard USA addresses.

8053. FS: ALINCO EDX-2 HF Autotuner

Yahoo group: ham4sale (2007 — 2015)
Date: 2014-01-24 23:20:24 UTC
From: qrv@kd4e.com
Topic: 8053 Message: 8053

The Alinco EDX-2 autotuner was optimized for their HF rigs
but will work with most rigs.

3.5MHz - 30MHz (with an element over 3 meters)
1.6MHz - 30MHz (with an element over 12 meters)
Input power (max): 200 watts P.E.P.
Input impedance: 50 Ohms
Power needed for tuning line: 7 - 20 watts

Looks great and is in excellent condition. I'm saving up for an amp so
will have to upgrade my tuner as well.

Topic: 8054 Message: 8054

I have for sale a like new, Icom HM-154T TTP mic with the RJ45 plug on it. This mic is less than 6 months old and comes with the original box and plastic bag it fits in. It works with the 703/706/7000 series of radios, and many Icom VHF radios, allowing you to use IRLP or Autopatch (does anyone still do that?).

It sells new for $67 plus shipping. I am asking $50 shipped and can take paypal/check/MO.

8059. 6m FM Gear Available

Yahoo group: ham4sale (2007 — 2015)
Date: 2014-01-27 22:56:20 UTC
From: <K4IDC@...>
Topic: 8059 Message: 8059

I have a small load of 6m FM gear available for sale. There's a GE MASTRII repeater on 53.33/52.33, associated power supply & short rack cabinet. Also have a second MASTRII for parts. There are several MASTRII mobile radios that will go to the amateur 6m band.
I have a DB Products DB4032 duplexer, and a set of six 1/4 wavelength cans to make another duplexer with. There's likely a couple of folded dipole antennas that will cover the 6m FM band as well; would have to check the antenna stock for those. There's also an empty 6' rack cabinet with doors (no locks), some rust near the bottom, available.
I'm not likely to use any of this..would like a offer on the lot. This stuff is taking up space & not providing any fun. I'm in middle TN. Email me via K4IDC at comcast dot net. I can deliver within a reasonable distance of Nashville, TN.

8060. want to sell mc1496 and mc1350-- 8 pieces each only 35$ free shipping, accept paypal

want to sell mc1496 and mc1350-- 8 pieces each only 35$ free shipping, accept paypal

Want To sell,

MC1496 ---- 8 pieces, original from Motorola

These devices were designed for use where the output voltage is a product of an input voltage (signal) and a switching function (carrier). Typical applications include suppressed carrier and amplitude modulation,

Synchronous detection, FM detection, phase detection, and chopper applications.

☐ Excellent Carrier Suppression ☐65 dB typ @ 0.5 MHz

Excellent Carrier Suppression ☐50 dB typ @ 10 MHz

☐ Adjustable Gain and Signal Handling

☐ Balanced Inputs and Outputs

☐ High Common Mode Rejection ☐85 dB typical

and MC1350 ----- 8 pieces, original from Motorola.

The MC1350 is an integrated circuit featuring wide range AGC for use as an IF amplifier in radio and TV over an operating temperature range of 0° to +75°C.

☐ Power Gain: 50 dB Typ at 45 MHZ

Power Gain: 50 dB Typ at 58 MHZ

☐ AGC Range: 60 dB Min, DC to 45 MHz

☐ Nearly Constant Input & Output Admittance over the Entire AGC Range

☐ Y21 Constant (☐3.0 dB) to 90 MHz

☐ Low Reverse Transfer Admittance: < < 1.0 mmho Typ

☐ 12 V Operation, Single☐Polarity Power Supply

Description: Description: C:\Users\shubham tiwari\Desktop\components to sell\1000x1000.jpg

Asking only 35$ USD for both i.e. total 16 IC, with free shipping from registered post to anywhere in world except few places in Africa.

Will accept PAYPAL..

Email if interested -- vu3sxn@.....

8068. WTB

Yahoo group: ham4sale (2007 — 2015)
Date: 2014-02-04 04:14:41 UTC
From: Thomas Skinner
Topic: 100 Message: 8068

Hello, my first time here.

I am in the market for a transmitter. The following features are minimums, not absolutes.

CW only, multimode considered.

40 meters, 7.000 to around 7.125 KHz multiband considered.

QRP (10 watts), QRO considered if rig can safely be de-tuned.

VFO built in, external considered. Stability is a requirement in any event.

Older rig, trying to assemble a retro station.

Tubes preferred over solid state, but mixed construction OK.

Rig must be stable after a reasonable warm up. Clean signal, no chirps, clicks, etc.

Rig need not be mint or near-new, but I don't want a pile of trash, either. Cleanliness is not an absolute requirement so long as cleaning is possible.

Rig must be in working condition.

Prefer face to face sale in northern Virginia (I am in Orange county). I will travel or take a shipment if an acceptable accommodation can be reached.

Home brew OK, if a complete set of documentation accompanies rig.

As customary, please reply off-list to:

tom.ng3v@...

Tnx es 73

Tom

Topic: 8071 Message: 8071

Up for sale is a complete APRS unit including a Byonics TinyTrak3
(built and tested) along with a Delorme Tripmate GPS unit and the
HTKC power adapter cable from Byonics. The adapter works with Kenwood
HTs. Plugs into the Cigarette lighter socket and powers both the
TinyTrak and GPS units. The Delorme Tripmate has been modified to
work without the internal batteries and draw power from the HTKC
cable. The GPS unit is pretty good at acquiring satellites and the
combination works very well. The included cable works with any
Kenwood HTs and cables for other HTs can be bought from www.Byonics.com.
Asking $75 insured/shipped.
or $65 picked up in Tampa, FL or tomorrow [Friday] in Orlando during Hamcation

8077. Small Ham RAdio Antenna Business For Sale

Yahoo group: ham4sale (2007 — 2015)
Date: 2014-02-08 20:01:31 UTC
From: <kz3dx@...>
Topic: 8077 Message: 8077

This is a great opportunity for a licensed Ham Radio operator.

For the past 12 years I have been making and selling the Swiss Dipole antenna. I have sold thousands of these here in the US and worlewide.

During the next two years, I am going to be out of the country for 3 months at a time, so I will not be able to make and ship the antennas.

Therefore I have decided to sell the business.

This is a total "Turn Key Business". You get Everything necessary to begin making money next week.

If you send me an email, I will send you a detailed description of the product and the business.

The price of the business is $7,500, which you should easily be able to recoup the first year plus make a profit.

My email address is: kz3dx@yahoo.com

73,
Bill - KZ3DX

8079. Antenna tower sections 9 in Sw FL

Yahoo group: ham4sale (2007 — 2015)
Date: 2014-02-10 03:52:19 UTC
From: <shalopt@...>
Topic: 8079 Message: 8079

9 Antenna tower sections, unknown brand see photos,
<http://s231.photobucket.com/user/shalopt/library/Antenna%20Tower%20sections?sort=3&page=1
>
has been stored as seen for probably 20 years.
There are 6 straight sections and 2 top sections
I think 10 foot each, top sections maybe a bit shorter
as normal have not measured. The legs are approx.
1 inch diameter leg spacing is approx 12 inches,
the top pipe is 2 inch OD has a flange
inserted in the top as a bearing surface I am thinking.
There is no hardware.
There is one 10 foot stright section of Rohn type
tower it has a bent cross brace and one of the legs at
the top end where the next section would stack.
The sections are located on Bokeelia,Pine Island, FL
buyer to pickup easy access to tower sections.
Asking $250 or make and offer we want it gone.

From: Michael Goins
Topic: 8086 Message: 8086

Nice Ten Tec Scout 555 in very good condition with mike, noise blanker and two modules. $350 shipped with manual. Excellent appearance with some scuffing on the bottom only where it had been in the mobile mount in a fixed station. Front looks new and the sides and top are nearly as nice. Lots of pictures.

Planned to use it mobile here but the vehicle just isn't conducive to mobile operation.

Also have 10, 12, 17, 20, 40, 80 meter modules available as soon as the Scout is sold and the buyer picks the two they want. Some are new and none have been used much.

Hi everyone,

Marshall Electronics MXL V177 Low-noise, Large Diaghram Studio Microphone. This microphone requires 48v phantom power to operate.
Microphone comes with original box. Excellent condition and good working order and would make a great addition to a home studio
or DJ setup. This unit retails for $300, but this one can be gotten for $150 including the desk stand. The V177 can be used with any microphone
preamp or mixer board that can supply the 48 v phantom power. Search the internet for specifications and see the current pricing. No cable with the microphone,
I will ship via USPS. Shipping included in this price, picture attached. PayPal preferred

MXL 990 MICROPHONE Mike, desk stand, adjustable pop filter, and 48 volt phantom power supply. This is a professional condenser recording microphone and was bought to use here but it was never used. 30Hz to 20Khz response. When close talked it is warm sounding. Requires a 3-pin cable (Heil has them) for your rig. $90 shipped CONUS.
YAESU MD-100 DESK MIKE One of the best microphones I've ever used with my FT-1000. Worked superbly with the rig and only selling as I am now using a RE-320 mike on a desk-mounted boom. Lots of punch and great audio reports. Have pictures. $110.00 shipped CONUS..
TENTEC MOBILE-BASE STATION MOUNT TENTEC Mobile - Base Station Heavy duty Mounting Bracket. Matches the currently on on TENTEC's website at $49.75 shipped. This one is new in the plastic bag and unused. $35. shipped CONUS.
ICOM 281H 50 watts on FM and has 440 receive. Simply not a 2 meter guy here and took it as a trade for something else. Will consider best offer or trade. With mike.
CLEANING THE STATION Cleaning the station and have a multitude of mike adaptors from various mike combination sussed here in the past. Also have some hand switches and some other stuff. Pictures as needed. All plus $5 freight:

Two push button mike switches for Heil adaptors or similar. Very heavy duty, 1/4" plug. $25 each

8 pin yaesu to 1/8” mike and 1/8” PTT adaptor. $25

Yaesu RJ-45 to footswitch and headphone adaptor. $20

Herald Electronics CB-34A small inline edge meter wattmeter, 10 watt max. $20

UM United Microsystems XT-4 low power memory keyer, 4 memories, low power consumption. Battery powered, 8-45 wpm, $50

Heil CC-1-T Tentec 4 pin to 4 pin XLR with switch adaptor. $25

8 pin Kenwood to 4 pin XLR (no switch) adaptor. $15

SPDT footswitch unterminated end. Light duty. $20

8 pin yaesu plug to weird phone type RJ-45. New. $20

W2IHY to Kenwood 8 pin adaptor. $15

MFJ 461 pocket cw reader. $55

4 pin XLR to tentec 4 pin with PTT. $25

RS power/swr meter 21-534. New in slightly battered box. Best offer or trade.

8094. FS: Icom 2720 dualband radio

Yahoo group: ham4sale (2007 — 2015)
Date: 2014-02-24 02:26:01 UTC
From: John Geiger
Topic: 8094 Message: 8094

I have for sale an Icom 2720 dualband FM radio in very good condition. This radio does dual receive, including dual in band receive. It does 50 watts on 2m and 35 watts on 70cm, and will do crossband repeat.

It comes with the mic and power cord. The mic is a recent ebay purchase (made in China) that sometimes has low audio to it and sometimes sounds ok. The rig was recently serviced at Burghardt Radio, so it has been all checked over, and has had the MARS/CAP mod done by them. It also has the front panel separation cable with it.

I am asking $225 plus shipping and can take paypal/check/MO.

From: John Geiger
Topic: 8096 Message: 8096

I have for sale a Mirage B1016 2 meter amp. This is the original brown and white faced amp made in California. Like many of them, the preamp doesn't work on it. It is rated at 10 watts in, 160 watts out. I had it putting out full power around 146mhz, a little less on 144mhz but that might be my antenna. With 15 watts in I was getting 150 watts out on 144.200mhz.

Good condition overall, has a power cord hard wired into it, and come with the manual as well . I am asking $150 shipped in the US and can take paypal/check/MO/cash.

From: John Geiger
Topic: 8101 Message: 8101

I have for sale an Icom 746 HF/6m/2m transceiver. This is the model that does 100 watts on HF, 6m and 2m. It has a built in autotuner, memory keyer, DSP, notch filter, and audio peak filter for CW. It has had the driver chip mod and backlight mod done to it. It is in good condition, but looks slightly used-meaning it has a few marks on the case, but nothing bad.

It comes with the mic, power cord, and manual. This is an excellent radio to use if you are interested in both HF and VHF DXing and contesting. It works great and you will love having this rig in your shack.

I am asking $695 plus shipping for it. I can take paypal/check/MO/cash.

I have for sale the following brackets and programming software/cables for the Icom FM radios. Here is what I have available:

1. Icom MB-28H Universal mounting bracket for Amateur mobiles. Radio Width 141mm (5.5") screw spacing 50mm (2.0") One radio mounting hole fixed, one adjustable. 27/28/228H/229H/2350H/2710H/2720H/2200H/207H/208H.

2. Icom MB-85 This bracket mount is to fit IC-2720, IC-2710, IC-R2500, IC-2725 per Icom info., and is used to attach the faceplate to the body of these radios. It doesn't have the short cable to go between the faceplate and body, though.

3. Programming software for the Icom 2720 radio, includes the CD and the USB programming cable.

I am asking $25 shipped for each item. I can take paypal/check/MO.

From: <w2gld@...>
Topic: 8110 Message: 8110

For Sale:

Mint condition, ICOM IC-92AD 2-Meter (144) and 70-CM (440) Dual Band D-Star Digital Handheld radio package. This radio is complete with ALL original boxes, manuals, and accessories. The radio is about a year and a half old, used only by me, indoors and a non-smoker. The radio has also been modified for MARS/CAP operation. The package includes the ICOM IC-92AD radio, ICOM HM-1785GPS Speaker-Microphone, ICOM BC-177 Rapid Desktop Charger, ICOM BP-256 7.4v 1620mAh Spare Battery Pack, ICOM CP-12L Cigarette Lighter Cable with Noise Filter, and ICOM RS-92 Remote Control Software and software update to the latest release, version 1.1, which is compatible with Microsoft Windows XP, Vista, 7, 8, and 8.1 x86 or x64 versions. The RS-92 includes the serial data cable, so either a serial port or USB to Serial adapter will be required. The radio and all accessories are in mint condition and come in their original boxes, with all manuals, documentation, and assorted accessories.

The price is $500.00 shipped anywhere in the U.S. via U.S.P.S. Priority Mail. Payment is via U.S.P.S. Money Order Only!

Interested parties, please e-mail me directly at: W2GLD@arrl.net

Thanks,
Jerry, W2GLD

8111. FS: Rubber VFO cover for Yaesu FT-77

Yahoo group: ham4sale (2007 — 2015)
Date: 2014-03-05 17:13:48 UTC
From: John Geiger
Topic: 8111 Message: 8111

I have a brand new, VFO knob cover for the Yaesu FT77 radio. As those of you with FT77s know, the rubber over the knob tends to fall apart over time, so here is a replacement for you. The part number is the FT50, which I know is the model number of a dualband HT as well, but that is what the part number is.

I am asking $15 shipped for it, and can take paypal/check/MO.

73 John AF5CC

8112. WTB: 2 meter amp (75-100w)

Yahoo group: ham4sale (2007 — 2015)

Topic: 8112 Message: 8112

Looking for a 2 meter all mode amp that does 75 to 100 watts out. My PS can't handle much more than that. Let me know the price shipped to Lawton, OK 73507. Something like a Mirage B108 or a KLM 10-70 would be great.

John AF5CC

8113. WTB: TGM or Miniproducts Mini Quad

Yahoo group: ham4sale (2007 — 2015)
Date: 2014-03-05 17:03:24 UTC
From: John Geiger
Topic: 8113 Message: 8113

Well I bought one last year, and now want another! I am looking for a TGM or Miniproducts Mini Quad or Mini Beam. Would take either the MQ-1 (HQ-1) model that does 20, 15, 10 and 6, or the model that also covers the WARC bands. Don't have a lot of space for antennas, but these fit nicely into the space I have.

Let me know the price shipped to Lawton, OK. Spring break is coming up and I could travel to the Oklahoma City/Tulsa/SW Missouri/NW Arkansas/North Texas area to pick it up as well.

73 John AF5CC

8114. complete APRS unit

Yahoo group: ham4sale (2007 — 2015)
Date: 2014-03-06 18:41:59 UTC
From: Jack
Topic: 8071 Message: 8114

Up for sale is a complete APRS unit including a Byonics TinyTrak3
(built and tested) along with a Delorme Tripmate GPS unit and the
HTKC power adapter cable from Byonics. The adapter works with Kenwood
HTs. Plugs into the Cigarette lighter socket and powers both the
TinyTrak and GPS units. The Delorme Tripmate has been modified to
work without the internal batteries and draw power from the HTKC
cable. The GPS unit is pretty good at acquiring satellites and the
combination works very well. The included cable works with any
Kenwood HTs and cables for other HTs can be bought from www.Byonics.com.
Asking $65 insured/shipped.
or $55 picked up in Tampa, FL

8115. FS: Icom MB-85 faceplate bracket for Icom 2720

Yahoo group: ham4sale (2007 — 2015)
Date: 2014-03-08 03:02:18 UTC
From: <af5cc@...>
Topic: 8115 Message: 8115

I have for sale an Icom MB-85 This bracket mount is to fit IC-2720, IC-2710, IC-R2500, IC-2725 per Icom info., and is used to attach the faceplate to the body of these radios. It doesn't have the short cable to go between the faceplate and body, though.
I am asking $20 shipped for it. I can take paypal/check/MO.
73 John AF5CC

8117. Wtb: ic-746

Hi everyone, I am looking for an ic-746, original or pro.

Thanks,
Daniel n9wx

8118. WTB: TS-480HX or TS-2000

Yahoo group: ham4sale (2007 — 2015)
Date: 2014-03-10 17:46:38 UTC
From: Ben Ramler
Topic: 8118 Message: 8118

Hi there everyone,

I hope you all a good weekend. I don’t know if I can post here, but I am going to try. I am looking to buy another HF radio. What I am looking at is either a TS-480HX or a TS-2000. Due to my situation right now I wouldn’t be able to come with all the money upfront so the owner would have to be flexible on the payment.

73,

Ben KØBLR

8119. FS: Coaxial pigtail for HF beams

Yahoo group: ham4sale (2007 — 2015)
Date: 2014-03-11 18:29:37 UTC
From: John Geiger
Topic: 8119 Message: 8119

I have for sale a coaxial pigtail for HF beams that don't have a direct SO239 hookup, like the Hy-Gain and Mosley ones. It is about 5 feet of RG8, with lugs on the one end, and a PL-259 on the other end. It has been coiled into a choke balun of 4 or 5 turns as well. Used it with a Mosley beam with good results. I am asking $15 shipped for it and can take paypal/check/MO.

8120. Power Supplies and related items FS

Yahoo group: ham4sale (2007 — 2015)
Date: 2014-03-11 19:49:14 UTC
From: Ken Simpson, W8EK
Topic: 8120 Message: 8120

Power Supplies and Related Items For Sale:

Arranged from highest current to lower current.

MFJ 1118 Heavy Duty DC Power Distribution Strip:

The MFJ-1118 is a versatile, high-current deluxe
multiple DC power outlet. It lets you power two HF
and/or VHF transceivers and six or more accessories
from your transceiver's main 13 V DC power supply.
You get two pairs of super heavy duty 30 amp 5-way
binding posts for powering your transceivers. Each
pair is individually fused and RF bypassed, capable
of a total of 35 amps.

An LED indicates power "ON". Six pairs of heavy duty,
RF bypassed 5-way binding posts lets you power your
accessories. They handle a total of 15 amps and are
protected by a master fuse, have an ON/OFF power
switch and an LED power indicator.

You get 6 feet of super heavy eight gauge color-coded
cable with ring tongue terminals, plus a built-in
0 - 25 VDC monitor meter.

This one is like new. With paper work for only $60.

Astron RM-50 M
This supply have a separate voltmeter and ammeter, and is
rated for 50 amps ICAS, or 35 amps continuous. It is a
real brute! It works 100% and looks close to new. With
paper work for $175. Pickup near Ocala FL is preferred.

Alinco DM-330MV
This Alinco Switching Mode DC Regulated Power Supply is rated
at 30 amps continuous and 32 amps intermittent. It has a
meter (both ammeter and voltmeter), and also a cigarette
lighter socket.
This one works fine, and looks like new. It is still in its
original box. $125

TenTec 25 amp switching power supply:

"Switcher / 25" 25 amp switching power supply

This is a 25 amp switching power supply in a case that
matches the early Omni series case, with the metal bezel
around it. It is in a case that is the same size as a 243

remote VFO. It has an ammeter on the front, along with
Switch, TenTec logo, and output bulb. The front panel
basically looks like a 280 power supply with a metal bezel,
but says "Switcher/25" on it. It is electrically very quiet,
and well shielded. It does not produce any electrical noise
that I could find.

Of course it works fine, and looks fine also. $140

Clegg PS-20 A / Astron RS-20 A
This supply has an Astron name on it, but also has a Clegg
name added. It is rated 20 amps ICAS, and 16 amps continuous.
It works 100%. Cosmetically, it looks nice, but has a very
few droplets of "overspray" where a previous owner had it
too close to where he was spraying bronze colored paint.
With paper work for $65.

GSC 20 R, 20 amp supply
Although this supply is rated at 20 amps, it is not quite
as heavy duty as the Astron/Clegg 20 amp supply. A more
realistic rating would be 15 or 16 amps. This one works
fine, and looks fine, except for scratches on the bottom.
Made in USA. $50

10 amp, 13 V DC, Power Supply:

This is a basic 10 amp power supply made by
Stabylex Electronics Corp., and is model 10 SR.
It has automatic short circuit protection, and a
very large heat sink.

Obviously a supply with a 10 amp rating is ideal
for most 2 meter and dual band rigs.

This one works fine and looks great also. $35

TenTec Model 937 power supply
This supply is rated at 11 amps ICAS, and 7 amps continuous.
It is normally used the the "Scout" 555 HF transceiver,
although it certainly can be used with other rigs, including
VHF/UHF rigs.
This one works fine and looks close to new. It is still in
its original box, with paper work for $75.

Vintage Icom IC-3PA Power Supply / Speaker:

The Icom IC-3 PA was originally designed to be used
with Icom's 10 watt 2 meter rigs, such as the IC-22,
IC-230, IC-22 S, etc. It produces 13 V DC at 3 amps,
and shuts down at 4.5 amps.

In addition to being a power supply, it also has a front
facing speaker in the enclosure. It is designed so that

the 2 meter rig sets on top of the power supply. It has
four lights for power, normal, warning, and over current.

This particular unit is in extremely nice condition.
The normal and power lights work. I don't know about
"warning" and "Over current", but I expect that they
do. I do not find any scratches on it.

With the paper work for $40.

Micronta 22-120 A Regulated power supply:

This supply is rated at 2.5 amps at 13 V DC. It is
well regulated. It has a switch and LED power light
on the front, with a circuit breaker and output terminals
on the back. The case (left and right side and top) is
basically all a heat sink, so it should cool the
regulator well.

This one works fine and looks like new. No scratches. $30

Homebrew Power Supply:

This power supply is in a very nice gray and black enclosure
with binding posts for the output on the front, along with
a pilot bulb and power switch. The back panel has a fuse
and the regulator. It looks to be good for 13 V DC at
about 1.5 amps.

It works fine and looks really great. No scratches or
defects on the cabinet. $15

Bench Type Power Supply:

This power supply is completely adjustable
with a multiturn pot, up to about 20 Volts DC.
It appears to be good for about 3/4 of an amp.
The analog meter reads 0 to 15 Volts DC or
0 to 30 V, switch selected.

It is housed in a very nice eggshell and wood
grain cabinet. Of course it works fine. $20

"Wall Wart" Power Supplies For Sale:

All of these are "regular" wall warts - not the new
switching type that create all sort of noise in your
receiver. Use one of these, and leave the noise behind.

Many uses for the 12 volt variety!
Both have 2.1 mm coaxial connectors with center positive.
12 V DC at 625 ma $14
12 V DC at 500 ma $12

9 Volt DC at 500 ma
This one was used on a MFJ 422 keyer, but will also power
other items needing 9 V DC at low current. It has a
2.5 mm male plug on it, tip positive. $12

Kepco Variable Bench Power Supply:

This is an ideal bench power supply! It is a Kepco Model ABC
40-0.5, which means that it will produce from zero up to 40 V
DC at up to 1/2 amp. Great for the bench.

The voltage is adjustable with a 10 turn pot from close to zero,
up to about 40 volts. There is a fairly large analog meter that
reads the voltage. There is also current limiting built in that
is adjustable from about 100 ma to up to about 700 ma. The same
meter that reads voltage can be switched to read current, or
short circuit current (the point that the current limit is set).
In addition, there are connections on the back to allow remote
sensing and remote programming. This is a quality regulated
power supply!

This particular unit works 100%, and looks extremely nice.
Only $85.

Large 150 Volt AC Weston Analog Meter:

Weston Model 1934, 150 Volt AC meter
This meter is a nice large 3.5 inch modern meter.
The AC scale is expanded, so that 120 volts is
easier to read. This meter is new, never used,
still in its original box, complete with hardware.
$35

Weston Model 1931, 150 Volt DC Meter
This meter is similar to the one above, except
it is for DC instead of AC.
It is also new, in its original box, with hardware.
$20

Surge Stations and Noise Filters:

APC "Pro 7" Noise Filter and Surge Suppressor:

This unit has 7 outlets, with a 6 foot cord, and provides
surge suppressor for your equipment. It also provides
noise filtering / EMI / RFI suppression of 60 db. There
is $75,000 worth of insurance included. It comes with a
lifetime warranty, and I think this is APC's "Top of the
line" unit.

Detailed specs can be found at
http://www.apc.com/products/resource/include/techspec_index.cfm?base_sku=PRO7

This one appears to be new, unused, in its original box.
Only $18.

This unit is still in its Radio Shack (#61-2327) box, never used. It says it is for a notebook computer, but it can be used with anything. It has connections for a computer network (LAN, RJ-45 connector), the AC power, and for phone lines (RJ-11 connector), and provides noise filtering and surge suppression on each. It even includes $25,000 insurance against surges. Maximum power rating is 1875 Watts, or 15 amps. Noise filtering is listed at 40 db.

This unit is new, in its original box, with its original paper work. $15

I also have many other accessories available such as many different types of microphones, HTs, HF, VHF and UHF rigs, HF and VHF/UHF antennas, etc.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

8122. FS - Receiving & Transmitting Tubes

Yahoo group: ham4sale (2007 — 2015)
Date: 2014-03-13 01:02:07 UTC
From: Mike Pawlukiewicz
Topic: 8122 Message: 8122

FS - Receiving & Transmitting Tubes

I'm helping the family with a SK's old radio gear.

Before I post these on ebay, (and go through the effort of taking pictures of each tube) is there any interest in them in the 'actual user' community?

I was handed +80 unboxed "radio tubes" in a laundry basket.

Having identified / sorted +50 'viable' vacuum tubes.
I removed the obvious HazMat stuff, selenium rectifiers etc. and other chaff.
Most of them are 'run of the mill' receiving tubes; but there is a smattering of moderate power transmitting tubes in the mix.
Since I gave my tube tester to another ham long ago, so I have no way of testing them for gain, leakage etc.

As a brief list;
807, 811, 03A, 2A3, 5U4, 6L6 and a lot of 12A, 12K, 12S tubes.

I can e-mail you the full list, just ask.

So if you are interested in a 'pig in a poke', make me an offer.

Due to the glass / fragile nature of these tubes, I'll have to 'over pack' them.

I don't want to deal with customs and export regulations. ebay will do, and has done that for me before.

This is for domestic US sale / delivery only.

Shipping:
1) Priority Mail® United States Postal Service 'Flat Rate' in one of their 'Large Boxes' for $17.45 flat rate postage to wherever they will deliver for that rate.
2) United States Postal Service Parcel Post - actual cost - box will be about 8-9 pounds from 48331.

You will need look it up shipping cost to your QTH.
3) Local pick up - free

N8OEP - Mike

B & W Coax Switches, Coax Cable, and many
coax connectors and adapters For Sale:

Two position "Strip Line" Coax Switches:

These switches utilize professionally engineered all
metal cavity construction for maximum efficiency and
high isolation. Isolation is typically better than
50 dB at 300 MHz with insertion loss less than 0.2 dB.
All are two position and use SO-239 connectors, are
50 ohm impedance, are typically rated for 2.5 KW PEP,
and good to 600 MHz.

All work fine and look extremely nice.

Diawa CS-201 - $22

Opek CX-201 - $22

MFJ 1702 B
With Center position that grounds both antennas. $18

MFJ 1702 C
As 1702 B, but with added lightning protection. $25

B & W Coaxial Antenna Switches:

All have SO-239 connectors, and will handle full legal power.

B & W Model 550 A coax switch
This model will switch up to 5 antennas, and does NOT
ground unused antennas. It has the coax coming out the
sides like spokes of a wheel.
This one works fine and looks fine as well. $40

B & W 592 two position coax switch
This switch has the coax coming out the back, and it does
NOT ground the unused antenna.
This one is in nice electrical and mechanical shape. $30

B & W CS-3 G three position coax switch
This switch DOES ground all of the unused positions.
It has the coax coming out the rear of a rectangular box.
It works and looks fine. $40

Coaxial Cable with "N" Connectors:

This cable has a male "N" connector on each end.
It is about 60 feet long.

The coax is labeled 50-2 V, which is slightly
larger in diameter than RG-8 X, but not quite
as large as RG-8.

This piece is in extremely good condition, with heat
shrink around the connectors for strain relief. $35

MFJ 260 "Dry" Dummy Load:

The MFJ 260 Dummy load is rated to handle up to 300 Watts
for 30 seconds, or 100 watts for just over a minute. It
is rated to be good up to 650 MHz.(SWR: 1.1:1 to 30 MHz,
1.5:1 30-650 MHz)
SO-239 input connector accepts a PL-259. 2¼ x 2¼ x 7 inches

This one works fine. It measures 55 ohms, so it is an extremely
good match for a 52 ohm load. Of course it looks fine as well.

With paper work for $25.

Coax connectors and adapters:

Prices are per connector. Several of each are available.
Most are unused.

SPECIAL: Buy 5 and take 10% off.
Buy 10 or more and take 20% off.

I just got an assortment of "N Connectors" in.
Please let me know what you need.

UG-175 reducing adapters for PL-259 connectors to
use with RG-58 $.50

UG-176 reducing adapters for PL-259 connectors to
use with RG-8 X or RG-59.
Amphenol, still sealed in the package $1

Amphenol crimp type PL-259, sealed in package $3

UHF double female "Barrel connector" $3

UHF "Bulkhead Connector" with mounting hardware
Double female, about 2 inches long $6

UHF "T" connector with two female (SO-239) and one male
(PL-259) connection $5

BNC HT to PL-259 adapter.(BNC male to UHF female) $5

BNC male for coax cables
standard type $2

crimp on type $3

Chassis mount BNC female
square mount (uses 4 screws) $3
Amphenol screw in type, sealed in package $4

BNC "T", two female and one male $3

I also have many other accessories available such as many
different types of microphones, HTs, HF, VHF and UHF rigs,
HF and VHF/UHF antennas, HF linear amplifiers, and many
other accessories.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

From: Ken Simpson, W8EK
Topic: 8126 Message: 8126

Wanted: Icom BP-90 "Empty" Battery Case

I am looking for an Icom BP-90 battery case.
This takes six AA cells, and is used on a variety
of Icom HTs, including the IC- 2SAT, 3SAT, 24AT,
W2/A, 2SRA, 4SRA, R1, and others.

Do you have one in good usable condition?

VHF related Items For Sale:

Yaesu VX-5 tri band HT, "Strip
line" constant Z coax switches, several Microphones,
Wattmeters, Communications Speakers, Chargers and
power supplies, VX-7 "Nifty Manual", Scanners,
Antenna connectors and adapters, and much more

Yaesu VX-5 R S tri-band HT:

The VX-5 will cover the 6m, 2m, and 440 MHz ham bands,
with receive almost from DC to light. Actually receive
starts at the AM broadcast band, and goes to about 1000
MHz, so that means it includes all of the public service
bands, weather, commercial FM, and much more.

It provides 5 watts out on 6M and 2M and 4.5 watts on 440 MHz,
at three power levels.

Features include 16 digit 9 memory DTMF autodialer, CTCSS/DCS,
220 memories, aluminum die-cast case and 8 character alphanumeric
display. It is a compact 2.3 x 3.4 x 1.1 inches.

This is the silver "R S" version of the VX-5.

To say that this is better quality and has more features than the
Chinese HTs would be an understatement!

This particular unit works 100%, and is in very nice condition.
It includes charger, a good Lithium Ion battery, rubber duck with
the 6 meter extension, and paper work for $145.

Two position "Strip Line" Coax Switches:

These switches utilize professionally engineered all
metal cavity construction for maximum efficiency and
high isolation. Isolation is typically better than
50 dB at 300 MHz with insertion loss less than 0.2 dB.
All are two position and use SO-239 connectors, are

50 ohm impedance, are typically rated for 2.5 KW PEP,
and good to 600 MHz.

All work fine and look extremely nice.

Diawa CS-201 - $22

Opek CX-201 - $22

MFJ 1702 B
With Center position that grounds both antennas. $18

MFJ 1702 C
As 1702 B, but with added lightning protection. $25

DTMF Touch Tone Microphones:

Yaesu MH-15 DTMF Touch Tone Mic:
The MH-15 c6 is a hand microphone that features a 16 digit
DTMF Touch Tone Pad on the back, along with a lock/unlock
switch. The top has up/down buttons. Of course the PTT
is on the side. This one presently has the round 6 pin
connector, which can be changed of course.
It works fine and looks close to new. $40

CES 810 L DTMF Mic
One can manually dial a number, or automatically store it in
the mic, and "speed dial". It has a 12 digit touch tone pad
on the front. With 8 pin modular plug (like computer LAN).
It looks to be unused. $38

Johnson 250-0761-010 / CES 655 L DTMF Mic
It has a 12 digit pad on the front, and is a rugged mic.
Presently with 4 pin connector. It looks to be unused. $38

VHF Wattmeters:

Drake WV-4 Watt Meter
This wattmeter covers from 20-200 MHZ, up to 1000 watts
input continuous. Full scale readings of 100 W and 1000 W.
It has the type N input and output connectors, although
adapters are available, if you want.
This one works fine and looks like new. No scratches.
With paper work for $80.

Adapters from Type N connector to PL-259. $8 each

Heath Wattmeter/SWR Bridge:

Heath HM-2102 VHF Wattmeter/SWR Bridge:
The HM-2102 is similar to the HM-102, but covers
50 to 160 MHz., with 250 and 25 watt scales. It can
also be used to check SWR, and has a remote sensor
that can either be left inside the meter, or separated

from the actual meter. SO-239 connectors in and out.
This particular meter works great, looks great, and
includes paper work for $45.

Communications Speakers:

Realistic 21-549 A
This one is about 4 inches square but only about 2 inches
deep. It is rated for 5 watts, has an 8 ohm impedance, and
is listed as a 300 to 3000 Hz frequency response, making it
ideal for communications. 3.5 mm (1/8 inch) mono plug. It
is black in color, looks great, and sounds great. $18

Vanco SPB-5
Appears to be the same at above, but with a Vanco label.
Also includes gimbal mount. $15

Vanco SPB-6
Similar to SPB-5 above, but is considered a noise
cancelling speaker. 10 Watt rating. Still in original
box, new. $18

10 amp, 13 V DC, Power Supply:

The Stabylex Electronics Corp., model 10 SR
power supply has automatic short circuit protection,
and a very large heat sink.

A 10 amp rating is ideal for most 2 meter and
dual band rigs.

This one works fine and looks great also. $35

Low Pass TVI Filter:

A low pass TVI filter is added to the transmitter to reduce
harmonic interference. All have SO-239 connectors, and are
50 ohm filters.

Drake TV-5200-LP Low pass TVI filter
This is the filter that may also be used on the low end of six
meters, as well as HF. It is good for 1000 Watts "average" below
30MHz, and about 200 W up to 52 MHz. It is the newer version
of the TV-1000. $30

VX-7 Nifty Mini Manual
A pocket reference to all of those commands that no one
remembers! For the VX-7. Spiral bound. $18

Scanners:

Regency Touch K100 Scanner:

The Regency Touch K100 is a programmable scanner that covers the low VHF, Hi VHF, and UHF frequencies. Of course this means it covers weather frequencies. It has battery back up of the programmed frequencies and also will do searches.

Frequencies covered include
30 - 50 MHz
144-148 MHz
148-174 MHz
440-450 MHz
450-470 MHz
470-512 MHz

More info can be found at
http://radiopics.com/Regency/Regency_Touch%20K100.htm

This one works fine and looks fine.

With telescoping antenna, power cord, and paper work for $25.

Uniden Bearcat BC-50 XL Scanner:

The BC-50 is a handheld programmable scanner that covers the low VHF, high VHF and UHF bands. It can run off of five AA cells, or external 7.5 volts DC. It has a BNC antenna connector.

Frequency coverage:
66 - 88 MHz
136-174 MHz
406-512 MHz

More info at
http://www.rigpix.com/bearcat/bc50xl.htm

This one works fine with an external speaker, but not with the internal speaker. This could just be dirty connections, as the SK who had it stored it in his garage. It could stand some cleaning, but it does work.

With paper work for $10.
If you desire a rubber duck antenna with it, add $10.

Realistic PRO-56 Scanner:

The PRO-56 covers from 144 to 174 MHz and also 430 to 512 MHz. It is a small scanner with 8 channels, and is powered by a 9 volt battery, or battery eliminator.

This one works fine and looks fine as well.

It includes a telescoping antenna for $15.

Coaxial Cable with "N" Connectors:

This cable has a male "N" connector on each end.
It is about 60 feet long.

The coax is labeled 50-2 V. It is slightly larger
in diameter than RG-8 X, but not quite as large
as RG-8.

This piece is in good condition, with heat shrink
around the connector for strain relief. $35

Coax connectors and adapters:

Prices are per connector.
Several of each are available.
Most are unused.

SPECIAL: Buy 5 and take 10% off.
Buy 10 or more and take 20% off.

I have quite a few different variety of "N" connectors.
Please send your request.

UG-175 reducing adapters for PL-259 connectors to
use with RG-58. 50 cents each

UG-176 reducing adapters for PL-259 connectors to
use with RG-8 X or RG-59.
Amphenol, still sealed in the package. $1

UHF double female "Barrel connector" $3

UHF "Bulkhead Connector" - Double female, as above, but for
mounting thru a window, siding, etc. about 2 inches long $6

UHF "T" connector with two female (SO-239) and one male
(PL-259) connection $5

Antenna adapter to fit the BNC connector on the HT
and provide an SO-239 connector that will permit
a PL-259 to be attached. (BNC male to UHF female) $5

UHF Male to BNC female $5

BNC male for coax cables
standard type $2
crimp on type $3

Chassis mount BNC female
square mount (uses 4 screws) $3
screw in type $3

BNC "T", two female and one male $3

I also have many other accessories available such as many different types of microphones, HTs, HF, VHF and UHF rigs, HF and VHF/UHF antennas, and many miscellaneous accessories. Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

8131. FT-817ND Trade for IC-703+

Yahoo group: ham4sale (2007 — 2015)
Date: 2014-03-21 17:35:57 UTC
From: Fred VE3FAL
Topic: 8131 Message: 8131

Manufacturer:

Yaesu

Model:

FT-817ND

Price:

Trade

I would like to trade a Yaseu FT-817ND for a Icom-703 Plus. The FT-817ND has peg legs, strap mounts and a used W4RT 2500mAh battery pack (not sure if it works and do not have charger for it. I will also throw in a LDG Z-100 autotuner. Hand microphone also with radio.

Radio has working Alaska Emergency Frequency and pre-set 60 meter frequencies' which I think mat need to be changed. No MARS mod done to radio, no filters installed that I am aware of when tested.

Looking to trade for the Icom 703 plus to have a backpack radio all in one unit instead of a additional tuner, also difficult to mount FT-817 in a usable configuration on pack.

Please let me know if you have a IC-703+ for trade.

Selling from my Short Wave radio Collection. This radio is in excellent working order and one of the cleanest radios I have seen. Made in Germany in 1962. Black leather case is very clean, no scuffs or cuts, grill is very clean, no dinks, handle works well, antenna is very straight. The dial light works (new bulb installed), Covers AM, FM, LW, 80-13 Meters in 11 band band spreads (band changing is smooth). Battery test/signal strength meter works, light button, tone and smooth volume control, no hum. 3 separate tuning knobs. FM and SW tuning is smooth. AM/LW, the tuning wheel is stuck.The battery compartment is very clean. Comes with the AC adapter (VERY RARE) and correct plug so this radio will run on AC and with run with batteries for portable use. Comes with original Nordmende sales booklet. PAYPAL ONLY FORM OF PAYMENT WILL BE ACCEPTED. WILL ONLY SHIP TO USA 48 STATES-NO EXCEPTIONS! Pictures available upon request. K1RRR, Gil

8135. ZENITH TRANS-OCEANIC Y600 tube SW RADIO-EXCELLENT!

Selling this radio from my collection, have another 600 that will sell next. Radio is in excellent working condition, black leatherette material. Built in 1960. All bands function properly. Has new tuning dial cord and new dial light (works off of 2 D batteries installed). Tuning is smooth and all bands are very sensitive with loud volume. All capacitors have been checked, there is NO hum. Chassis is 6A40. All tubes were tested on a Hitchcock tester, 90% or better. IU4, Il6, IU4,IU5,3VR, 50A1 rectifier ($41.) installed. Recently aligned all bands. Covers AM, 4-9MC, 16M, 19M, 25M and 31M bands. Case is in very good shape, only minor nicks. Wave Magnet antenna works, whip antenna is straight with tip, operates very smoothly. Installed new gold inserts on two knobs. All switches function properly. All charts are original and function properly. A copy of the operating manual and restoration manual is included. I ONLY ACCEPT PAYPAL AND WILL ONLY SHIP TO 48 STATES IN USA. NO EXCEPTIONS! pictures available upon request. K1RRR, Gil

8139. FS: MFJ 949D manual antenna tuner

Yahoo group: ham4sale (2007 — 2015)
Date: 2014-04-01 18:04:52 UTC
From: John Geiger
Topic: 8139 Message: 8139

I have for sale a MFJ 949D (black face) manual antenna. It is in decent condition but is not mint. I have been using it for the past 10 years with good results. This is the model with a built in dummy load, built in balun for twin lead or single wire feeder antennas, a cross needle SWR/power meter, and it has 2 coax in jacks with an antenna switch.

It is rated at 300 watts on 160-10 meters. I have used it on 6m with good results also.

There is only 1 glitch with it-it needs a new resistor in the power meter circuit. It currently reads out double what it should (but makes your rig look more impressive).
The current MFJ949E sells new for $155. I am asking $70 plus shipping for this one, and can take paypal/check/MO/cash.

Date: 2014-04-04 15:40:02 UTC
From: Robin Midgett
Topic: 8145 Message: 8145

I have a KLM KT-34XA tri-band (10-15-20 meters) Yagi antenna available.
I've not put it on the air, and it will probably need a bit of work to make it functional. Otherwise it's a great supply of parts to repair another antenna.
It's on the ground near Nashville, TN. I could ship it but prefer not to. I will deliver the antenna within a reasonable distance of Nashville. $225 or best offer.

8154. Antenna tuners for sale (MFJ 949D and 941D)

Yahoo group: ham4sale (2007 — 2015)
Date: 2014-04-08 18:08:43 UTC
From: John Geiger
Topic: 8154 Message: 8154

I have for sale two different MFJ manual antenna tuners. Both are the black faced tuners, with a power/SWR meter and antenna switch built in. Here is what I have available:

1. a MFJ 949D (black face) manual antenna. It is in decent condition but is not mint. I have been using it for the past 10 years with good results. This is the model with a built in dummy load, built in balun for twin lead or single wire feeder antennas, a cross needle SWR/power meter, and it has 2 coax in jacks with an antenna switch. It is rated at 300 watts on 160-10 meters. I have used it on 6m with good results also. There is only 1 glitch with it-it needs a new resistor in the power meter circuit. It currently reads out double what it should (but makes your rig look more impressive). The SWR meter works fine on it.The current MFJ949E sells new for $155. I am asking $65 plus shipping for this one.

2. A MFJ 941D in good condition. It has a built in balun for twin lead or single wire feeder antennas, a SWR/Power meter, 2 coax in jacks, and one bypass antenna jack (uses the power/SWR meter but it permanently bypasses the coax jack). The other two antenna positions can go thru the tuner or in bypass. The MFJ941E sells new for $130 plus shipping. I am asking $65 plus shipping for this one also.

I can take paypal/check/MO/cash for either tuner.

This is a cool little radio for battery operated QRP.
The receiver is sensitive. CW transmit is great fun to operate!

"The KX1 includes a superhet receiver with variable-passband crystal filter, RIT, S-meter, DDS VFO w/3 tuning rates, 3-digit display, memory keyer, battery voltage monitor, and a 1 to 4-watt transmitter with full QSK. The VFO covers the full 20, 30 and 40 meter ham bands, with receive-only tuning of nearby SWL segments.

See a KX-1 in action: http://www.youtube.com/watch?v=k7YZ1W69vRQ

Covers 40-30 & 20
KXAT1 Internal ATU
Internal battery holder...
KXPD1 Paddle option
Original manual

Mint condition
For details:
http://www.elecraft.com/KX1/KX1.htm

Well over $500 to replace
Asking $325 +$10.50 shipped

8158. WTB: KMA 5054 6m/2m yagi

You are bidding on an ICOM ID-51A used less than an hour - in excellent condition, only had it for several months and bought from HRO. I am selling this radio because there are no D-Star repeaters in my area that I could get on. I have a medical breathing condition that ties me at home and I am going for a HF transceiver that I can work psk 31

Here's what you get with this radio.

1. charger
2. One batteries (stock 1100 mAh)
3. 2 meter 70 cm magnetic car whip
4. Hand strap
5. Belt clip
6. The original box with instruction manual and CD
7. Stock rubber ducky antenna

Bought in Dec 2013 - Still under 1 year warranty

8176. Vintage Ham Gear For Sale

Yahoo group: ham4sale (2007 — 2015)
Date: 2014-04-29 01:48:10 UTC
From: WA5LOU Lou Everett Sr
Topic: 8176 Message: 8176

In the 60's Heathkit had some awesome mono-banders. I have two that I have refurbished and are working great. By refurbished I mean that any components that did not meet factory specs were replaced, chassis and board cleaned, circuit board and all wiring checked and repaired or replaced where necessary, complete alignment, and a paint job. I have made several contacts on them and received excellent reports. I also drove my Ameritron AL-811 Amp with them to about 500 watts.

These particular units are the HW-12A (75 Meters 3.800-4.000 SSB Upper and Lower. It does go a little bit into the Extra Portion of the band, as well); and the other one is HW-32A (General Portion of 20 Meters 14.200 - 14.350 SSB Upper and Lower. It does go a little bit into the Extra Portion of the band, as well).

I want to offer these to this group before I go to any other group, or E-Bay. If you are interested, please e-mail me at: loueverettsr@... for pricing and pictures.

Thanks!

I have a KLM KT-34XA tri-band (10-15-20 meters) Yagi antenna available.
I've not put it on the air, and it will probably need a bit of work to make
it functional. Otherwise it's a great supply of parts to repair another
antenna.
It's disassembled & boxed for shipping near Nashville, TN. You can estimate
the shipping charges based on two boxes, each measuring 102 x 10 x 10, one
weighs 30lbs & the other weighs 43lbs. $265 or best offer.

Hi Folks!

Again, from the 60s are two AWESOME Heathkits. These were a special project of mine. 95% of electrical components were replaced. They all did not need replacing, but, as a refurbishing project I went ahead and stripped down the board, etc., and replaced 95% with new parts. These are Heathkit HW-32A and an HW-12A. I am offering these Gems to this group before I go elsewhere. I did not have any intention of ever selling these, but, I have so many pieces, and my wife has talked me into moving some of it.

The first two I offered are gone. But, these are of my special lot. They have been an integral part of my station since I gave them a 95% refurbishment. Nice paint and all. and....they work GREAT! I worked several stations on them yesterday and last night. Received excellent reports.

If you are interested, please e-mail me at my personal e-mail address at: loueverettsr@.... tell me you are interested in the HW-32A and/or the HW-12A. I will send you pictures of outside and inside.

For Sale: AM Broadcast Band Crystals

Great for commercial users or for experimenter purposes. Build an AM transmitter or other fun gadget with them! Most of these are new FT243 original crystals - they are all fully tested.

Examples: (I have a few others that are not listed on the web page)

1000 kHz, 1020 kHz, 1030 kHz, 1050 kHz, 1070 kHz etc.

1100, 1200, 1920, 1300, 1320, 1350, 1400, 1430 kHz etc.

I just found an extra one on 1400 kHz that is an hc6u metal can crystal.

Ordering information and full details may be found here:

Hello all,

'Im leaving Florida in a few days to go to the Dayton Hamfest. One of the things on my shopping list is a restorable Heathkit SB-301 receiver.

I thought maybe someone on here had one available?

Never hurts to ask.

I'll also be looking for a matching SB-401 transmitter.

Maybe I'll run into some of you in Dayton.

73,

Subject: [ham4sale] WANTING HEATHKIT SB-301 RECEIVER

Hello all,

'Im leaving Florida in a few days to go to the Dayton Hamfest. One of the things on my shopping list is a restorable Heathkit SB-301 receiver.

I thought maybe someone on here had one available?

Never hurts to ask.

I'll also be looking for a matching SB-401 transmitter.

Maybe I'll run into some of you in Dayton.

73,

Rick

8197. FS: RCA StratoWorld AM-SW Portable - at Dayton

Yahoo group: ham4sale (2007 — 2015)
Date: 2014-05-16 22:36:22 UTC
From: qrv@kd4e.com
Topic: 8197 Message: 8197

Buyer who was to pick this up at Dayton bailed at the last
minute so it's available at Dayton tomorrow - Saturday.

FS: RCA StratoWorld AM-SW Portable (with a good & rare 1L6 tube)

This was RCA's answer to Zenith's TransOceanics.

It's a neat receiver but I live in a steel house & too much moisture
gathers on the windows to safely keep this there.

A good review of this receiver here:
http://www.ohio.edu/people/postr/bapix/RCAstrat.htm
http://www.ohio.edu/people/postr/bapix/RCAstrat.htm

Asking $75.

8203. KLM KT-34XA Tri-band Yagi

Yahoo group: ham4sale (2007 — 2015)
Date: 2014-05-27 03:13:46 UTC
From: K4IDC@...
Topic: 8145 Message: 8203

I have a KLM KT-34XA tri-band (10-15-20 meters) Yagi antenna available. I've not put it on the air, and it will probably need a bit of work to make it functional. Otherwise it's a great supply of parts to repair another antenna.
It's disassembled & boxed for shipping near Nashville, TN. You can estimate the shipping charges based on two boxes, each measuring 102 x 10 x 10, one weighs 30lbs & the other weighs 43lbs. $265 or best offer.

8204. ESD mat complete set for sale

Yahoo group: ham4sale (2007 — 2015)
Date: 2014-05-27 10:22:03 UTC
From: Petr Ourednik
Topic: 8204 Message: 8204

Hello,

1. I have for sale new high-end ESD mat 60x40cm set including the wires and wristband. Great for "kitchen manufacturing" or home repairing of ham radio gears and building the QRP etc. The best performance of material tested worldwide.

More information can be found here:
[1]http://www.ebay.com/itm/231242806637?ssPageName=STRK:MESELX:IT&_trksid=p3984.m1558.l2649

I can sell it also outside the ebay of course.
The price is $29 + $16 (incl. economy shipping, handling, Paypal fee, insurrance)

2. I have for sale new high-end ESD mat 140x90cm set including the wires and wristband. It is as same as the preview small ESD mat set just the
size is bigger for professional usage in the laboratories etc.

The price is $85 + $55 (incl. economy shipping, handling, Paypal fee, insurrance)

I have few of these new ESD mat sets (small and big sizes) for sale in our local radioclub.

73 - Petr, OK1RP

QST

I'm looking for an ancient Bud MC-941 100pf air variable capacitor for a project.

There has been one on EPAY (350970233658) for quite a while but, it is rather tarnished and worse, out of alignment. I reference it here for the photos.

The part is about 4" deep overall, has 31 plates, with .060 spacing.

Thanks for looking!

73 & Good morning,
Marv WC6W

8206. Motorola parts inventory for sale

Yahoo group: ham4sale (2007 — 2015)
Date: 2014-05-27 22:02:14 UTC
From: AzleComm
Topic: 8204 Message: 8206

Hello,

I have the parts inventory of a MSS that went out of business in West Texas serving the oil industry. It serviced everything up to the Syntor X by the looks of the inventory. There is also 1 UHF Micor 100 Watt base station, 1 UHF 100 Watt repeater complete with Duplexer, and 1 100 Watt VHF Base station. The units have not been tested but are fairly clean and not been wet or damp. Also in the lot is a couple of consolette base stations that can also be converted into repeaters. There is also at least three of the bench mounted meter stations complete with cables, I seem to remember a Motrac cable or three in there somewhere. There are two of the portable meter boxes also. There is several boxes of parts as well as some programming equipment. Included is a box or two with several brand new Sentor/Micor control head halves as well as control cables. There is I think 8 of the hang on the wall parts kits that holds all kinds of hardware and I think resistors and capacitors.

If interested please contact me privately at azlecomm@... for more details. Because of the shear volume of parts and pieces there can't be shipping so local pickup in Azle, Texas is required. It would take a pretty good sized trailer and pickup bed to haul this inventory. At the price I am asking it would be worth it to make a moderate drive.

Also included is a bunch of service Motorola manuals. Everything Motorola must go and I will not piece out this lot.

I have a few pictures but again, because of the shear number if items I can't inventory it all. Anyone buying this lot of parts will not be disappointed. A few photos are available and I can always take more.

TS-2000 with REMOTESHACK SETUP

I am selling my absolutely as new Ts-2000. It was new in November of 2012. No scratche or anything, non smoker with original double boxes, mic and manual. I've only used this setup for monitoring while on trips. About 1 hour of transmit time, total! Works flawlessly. The remoteshack was just sent back to John, at Remoteshack for the firmware update($50) cost to me. Very simple to connect. The radio already has the menu items set all you have to do is plug and play. I am going to upgrade to a FTDX-3000. I've owned 3 TS-2000 and this has the best receiver by far. $1499 and actual shipping. I am away from home so I will upload pics later. Mike 314-803-3635

8231. REDUCED - BA Power Resistors

Yahoo group: ham4sale (2007 — 2015)
Date: 2014-06-15 15:26:49 UTC
From: bcarling@...
Topic: 8231 Message: 8231

FOR SALE: Power Resistors - Bleeder Resistors 30 Watts to 120 Watts
(nearly unobtainium.) - these have been dropped to very low prices.

First quality, USA made resistors. Great for homebrew projects or heavy metal Boatanchor repairs. Build a power supply, or restore a precious BA rig.

Most were $12.00 to $20.00 or more each
Now most are $3.00 to $8.00 each

Priced well below cost - For example:
12K ohms at 40 watts - $3.00
12K at 100 Watts - $6.00
20K at 100 Watts - $8.00
25K at 100 Watts - $9.00
Many other values listed at web page below.
Purchase with Paypal or CC on-line or drop me an e-mail

http://af4k.com/resistors.htm

I have an Ameritron AL-82 with 10 meters installed. The amp is in as new shape. I bought it about 3 years ago at HRO and it has been very lightly used.
It is wired for 220, but I only have 208 volts, so the amp has never seen full power. I have all the boxes and papers
$2000. plus shipping CONUS only or pickup on Long Island

8233. For Sale - 2M SSB, APRS, dual bander

Yahoo group: ham4sale (2007 — 2015)
Date: 2014-06-17 02:18:11 UTC
From: Kris Olmstead, W2FLR/KNYOTISC2
Topic: 8233 Message: 8233

==========
Yaesu:
Yaesu FT-290RII. A great rig from the past. Powerful yet easy to use. This radio is in fantastic shape and works perfectly. It was recently tuned by Universal Radio where it was purchased.

Offers USB / LSB / FM / CW on the 2M band. Output is 25 watts with the included clip-on amp. Also included is the mike, power cord and manual. The power connector has been changed to the standard ICOM/YAESU type.

With this radio you will also receive the FTS-7 tone board already installed.

I've never had this radio mobile (no bracket) and it has lived in a smoke-free environment all its life.

$200.00 for the radio and $25.00 shipping/insurance.
==========
TinyTrak 3 Plus:
TinyTrak 3 APRS is an APRS GPS position encoder which, when connected to a serial GPS and a radio, will transmit its location at an adjustable rate. It is configured by connecting to a computer's serial port, and running a simple configuration tool which allows setting of all user options. After that, the computer can be disconnected, and a GPS connected in its place for operation.

Also included is an M5C power/radio cable for a modular Yaesu radio, null modem adapter (for programming the TT3), software and a defective GPS2. The GPS2 took on water and quit working. Never took it apart to see if it could be fixed.

$50.00 for the above and $10.00 shipping/insurance.

BUT WAIT, THERE'S MORE! I will include a second TinyTrak 3 Plus unit, also in perfect working condition at no extra charge!!. Hurry, offer ends at midnight someday.
==========
ADI AT-600 Dual Band Hand Held:
Works fine, looks OK. Solid radio that operates on VHF and UHF. Comes with the AA battery case (clean) and 2 dead ni-cad packs. It will be shipped in the original box with the original manual, wall-wart and antenna.

This is a great radio but not as intuitive as my Yaesu's or Kenwood's. Must be old age.

$40.00 and $10.00 shipping/insurance.
==========
All items shipped to lower 48 only. PayPal only. Will ship USPS and go out within 48 hours of confirmation of payment.

Reply directly to olmstead at twcny.rr.com with questions or purchases.

From: Robin Midgett
Topic: 8241 Message: 8241

[List owner here: I have to balance a warning with fairness. I'll allow one reply from WBLNA then this topic is closed.]

I had an agreement with Roland Geter WB6LNA to purchase an antenna that I listed on this forum. He has not upheld his end of the agreement, and does not act in good faith, according to his very convincing sounding word.
I've been trying to complete this deal for nearly three months with Roland Geter WB6LNA. I suggest avoiding all dealings with this man. He has clearly demonstrated a lack of integrity. There are other documented incidents similar to this regarding this man.

8243. FS: Array solutions 6 connector remote antenna switch

Yahoo group: ham4sale (2007 — 2015)
Date: 2014-06-26 05:58:10 UTC
From: John Geiger
Topic: 8243 Message: 8243

I have for sale an Array Solutions 6 position remote coax switch, also known as the Rat Pack. This switch was purchased new last year and only used once-in the November SSB Sweepstakes. It has one modification done to it-instead of the normal remote cable it would use it has been modified to use a CAT6 cable instead since you can find various lengths of these anywhere.

It comes with the switch, control box, approximate 100 feet of CAT6 cable for the control,and it has metal covers on all of the SO239 jacks so you can protect the ones you are not using.

More information about it can be found here:
http://www.arraysolutions.com/Products/ratpak.htm

These sell new for 299 plus shipping, plus the cost of the cable for it. I am asking $260 shipped and can take paypal/check/MO.

73 John AF5CC

8244. FS: Array solutions Bandmaster 3 and Bandpasser setup for Icom (perfect for SO2)

Yahoo group: ham4sale (2007 — 2015)
Date: 2014-06-26 13:54:31 UTC
From: John Geiger
Topic: 8244 Message: 8244

I have for sale a like new Array Solutions Bandmaster 3 Universal Band Decoder and the Hamation Bandpasser bandpass filter unit. The Bandmaster 3 is currently set up for Icom CI-V computer/radio interface, but can easily be set up for Kenwood, Yaesu, Tentec or Elecraft radios as well. It allows for seamless station automation with the radio and computer, and you can read more about it here:

http://www.arraysolutions.com/Products/bandmaster.htm#top of page

The Bandpasser bandpass filter unit provides bandpass filters for 160, 80, 40, 20, 15 and 10 meters. It allows for more than 1 radio to the used in the same location on different bands without interference. This is perfect for SO2R setups. You can read more about the bandpasser at:

http://www.arraysolutions.com/Hamation/bandpasser/bandpasser_AS_419.htm

These 2 units are currently hooked together to use for automated SO2R or field day setups. There were purchased new last year and have been used only 1 time in the November Sweepstakes.

The Bandmaster 3 sells new for $329 plus extra for the Icom CI-V cable. The bandpasser is $595 new. A power cable has been added to the bandmaster with powerpole connectors on it. I would like to sell both together as a package if possible for $760 shipped, and can take paypal/check/MO.

8252. Wattmeters, Coax Switches and Connectors FS

Yahoo group: ham4sale (2007 — 2015)
Date: 2014-07-01 19:08:16 UTC
From: Ken Simpson, W8EK
Topic: 8252 Message: 8252

Wattmeters, Digital Rotor Control Box, Coaxial Antenna
Switches, and Coax Connectors For Sale:

Bird 43 Watt Meter:

The Bird 43 is an insertion type RF watt meter, designed
to measure RF power and load match in 50 ohm coaxial
transmission lines. It is intended for use with CW, AM,
FM, and TV modulation. It measures power from 100 mw
to 10KW, depending on the element used. The meter provides
direct readings in watts with an expanded scale for easy
reading. The scale is graduated for 25, 50, and 100 full
scale. Elements are available in a variety of power, and
frequency ranges.

This particular meter is model 4300.21 manufactured in
March 1957, so it is the older, well constructed model.
It has "N" connectors, with the leather handle, which
is in good shape.

The meter works well. $175

50 H Element for Bird Wattmeter
This measures 50 watts full scale over the HF spectrum
from 2 to 30 MHz. $65

Buy both of the above together for $225.

VHF Wattmeters:

The first two of these have sensors that may be separated
from the meter.

Drake WV-4 Watt Meter
This wattmeter covers from 20-200 MHz, and has full
scale readings of 100 W and 1000 W.
It has type N connectors in and out.
This one works fine and looks like new. No scratches.
With paper work for $80.

Heath HM-2102 VHF Wattmeter/SWR Bridge:
The HM-2102 covers 50 to 160 MHz, with 250 and 25 watt
scales. It can be used to check SWR. SO-239 connectors
in and out.
This particular meter works great, looks great, and
includes paper work for $45.

MJF 812 B VHF Wattmeter SWR Bridge:
The MFJ-812 B measures forward / reflected power and
SWR. The wattmeter measures power on two scales, 30 Watts
and 300 Watts. It is designed for 2 meters and 220 MHz,
but can be used down to 21 MHz. It includes a field strength
meter.
It works fine and looks fine. With paper work for $25.

HyGain DCU-1 Deluxe Digital Rotor Control Box:

The innovative DCU-1 Pathfinder Digital Rotor control unit
gives you automatic operation of your brake and rotor. It
has computer control with RS-232 pass through and is compatible
with many logging and contest programs as well. It has 6 presets
for your favorite beam settings, 1 degree heading accuracy,
automatic 8-second brake delay, and 360 degree choice for
center of rotation. It operates at 110V.

The DCU-1 digital rotor control unit is compatible with the
T-2X, HAM-IV, and HAM-V families of rotators.

This unit works fine and looks fine as well.
Paper work is included for $450.

Coaxial Antenna Switches:

All work fine, look fine, and use SO-239 connectors.

B & W Model 550 A Coax Switch
This model will switch up to 5 antennas, and does NOT
ground unused antennas. Coax comes out the side, like
spokes of a wheel.
It will handle the full legal limit. $35

SCP Comm Switch SC-40-AS Coax Switch
Three position antenna switch in rectangular box.
Connectors on the back. In original box. May be new. $25

Two position "Strip Line" Coax Switches:

These switches utilize metal cavity construction for max efficiency
and high isolation. Isolation is better than 50 dB at 300 MHz
with low insertion loss less.
All are two position and are typically rated for 2500 W PEP,
and good to 600 MHz.

Diawa CS-201 - $22
Opek CX-201 - $22
MFJ 1702 C - With center position that grounds both antennas,
and added lightning protection. $25

Coax connectors and adapters:

Prices are per connector. Several of each are available.
Most are unused.

SPECIAL: Buy 5 and take 10% off.
Buy 10 or more and take 20% off.

UG-175 reducing adapters for PL-259 connectors to
use with RG-58 $.50

UG-176 reducing adapters for PL-259 connectors to
use with RG-8 X or RG-59.
Amphenol, still sealed in the package $1

Amphenol crimp type PL-259, sealed in package $3

UHF double female "Barrel connector" $3

UHF "Bulkhead Connector" with mounting hardware
Double female, about 2 inches long $6

UHF "T" connector with two female (SO-239) and one male
(PL-259) connection $5

BNC HT to PL-259 adapter.(BNC male to UHF female) $5

BNC male for coax cables
standard type $2
crimp on type $3

Chassis mount BNC female
square mount (uses 4 screws) $3
Amphenol screw in type, sealed in package $4

BNC "T", two female and one male $3

I also have many other accessories available such as many
different types of microphones, HTs, HF, VHF and UHF rigs,
HF and VHF/UHF antennas, HF linear amplifiers, and many
other accessories.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

8254. Gear for SALE: FINAL Post for this list

Yahoo group: ham4sale (2007 — 2015)
Date: 2014-07-03 07:50:29 UTC
From: Chris Boone
Topic: 8254 Message: 8254

National NC-300 with spkr and 6/2/220 converters...working condition unknown...it is clean but dusty....have not had a chance to test it...was given to me as a gift (my original station was a T60/NC300 in 1973)...I dont have time for it now...(and Yes I have a T60 available as well).....Asking $150 + you ship or pick up in Southeast Texas....I will not pack this thing...TOO big and heavy....

Also have a Heathkit HA-10 linear amp...80-10...3) 811 tubes in it...works great....does NOT have an external relay for transceivers....
$300 PLUS shipping if you want it shipped...Will reduce price IF you pick up (preferred)

5 element triband HF yagi...(Telex iirc)...clean, in storage but may be missing two small parts (it was missing one when I got it) but replacing them still is cheaper than NEW yagi!......$150...you pick up.....

lots of Heliax in storage....7/8 and 1/2in runs....make inquiry.....NO ship...sorry....some runs up to 400 ft..Also have a spool of 3/4in AL CATV hardline.....easy to use PL259s or get AL connectors from Gilbert Electronics in AZ

Lots of GE radios MVPs (mostly UHF but some Hiband VHF and one LB VHF), MSTR II rptrs (two UHF, one VHF see below)....
Some of the UHF MVPs are duplexed already...some are parts radios, others are missing cases but do work..have mods documented for those wanting to run them in rptr or link mode...(some of the mods on the net are not 100% complete)
Also have some power supplies for them but dont suggest they be used for rptr/100% duty cycle.

45W GE MSTRII UHF rptr and 110W GE MSTR II VHF Rptr..100% duty cycle PAs.....$50 for the UHF and $100 for the UHF....you ship or pickup!! (THEY ARE CLEAN and WORK....the VHF already has its XMTR tuned to 147MHz but the rcvr has not been retuned.

AND one MSTR IIe GE LB base on 48MHz...will go to 6m and add duplexer and you have a rptr (the IIe shelf has a built in simple controller.. I have the software for it!) Sold for $2000 new....has cabinet, Power supply (new GE Switcher) and controller shelf...new xtals, retune and its on the air....$500 mint...you ship or pickup

Have an extra GE MSTR II power supply...this one is the big heavy gut buster one that never quits....$150

Kenwood TKR-750V2 VHF rptr....clean and excellent shape. $800 obo

UHF base duplexers and mobile duplexers...$150 for base/rptr; $50 for mobile
Two or three VHF duplexers (they do not do 600kHz splits!)..one rack mount and two mobile. $80 obo

Also have a WACOM WP604 lowband duplexer on 48/49 MHz. 8inch cans and BpBr..can be modified to 52 MHz.....in great shape.....clean and no issues...New over $2500....will take $1250...pickup only; can supply URL for mods.

Need link radios?? Midland 70-530B Syntech 1s...can go down to 430 MHZ and two of them makes a nice duplex link with redundancy...I have almost 20 of them....Will make a good deal on all of them!!

Also have several Midland ST II lowband (50Mhz) radios with VHF extender and some without....great for 6m FM operation....some are complete...some are just the RF decks (for rcvr sites in rptr use, etc)...

Also VHF and UHF STII and XTR models....various versions (including the 70-1336/1526 8 channel models as well as normal XTRs under dash)...too many to list here...do have ONE 65-70w SYNTECH I UHF (makes a nice rptr xmtr or rcvr)...the VHFs make good packet or aprs nodes. Several STII LB with VHF crossband internal rptrs...have various heads and mics

Also have a rare dual head LB Syntech II ....legal to use on LB freqs..

Midland 13-513 220 FM rig...in far shape...works great...Meter sticks and some scratches on case...$125
Somewhere in storage (if the thieves didnt steal it when they broke in a while back) is a ICOM IC-38...$125

RARE Comtronix FM-200 6m FM ONLY radio..covers FM subband with -1Mhz offset and slot of additional (to work -1.7Mhz offsets)...CB size...15+ watts out...$60 obo

Two ACC SM100 Shackmasters $150 each

One ACC DVR fully loaded.....$200
One link RLC BIG DVR....connects to all controllers. $200

KLM Echo 70 432/435 SSB transceiver....missing front small knob (easy to replace)..unit worked last time tested.
$75

WACOM WP652 220MHZ duplexer...

Maggorie KRP5000 220 rptr (NO internal controller; only the chassis holding TX and RX boards...30w on AC power; less on 12V...$200

Homebuilt Midland 13-509 220 rptr...needs a trimmer cap replaced in the exciter for xtal setting...puts out 15watts...rcvr 0.25..only 2 RU high (the former Daisetta 224.82 rptr in the 1980s...) has CW ID and home built controller internal and connections for external controller. $200

Also have LOTS of DB201 antennas as well as some 420-430MHz yagis and a couple of DB 408/413/411 models..and some DB 212 elements for lowband

Motorola LOWBAND base (330 watt with 2 4CX250Bs in the PA)...will separate the 45 watt TXRX chassis from the PA.....will NOT ship....(PS available for the PA....it IS heavy!!)

Also have some Leibert UPS systems...need batteries replaced but in good working shape...3000VA $300 for both (they list more than twice EACH).

Anything with no price listed is BO (please make reasonable offer..the DB UHF antennas are new so they will not go for $100!)...

MAY try to bring some to a hamfest in July...not going to Austin but MAY if interest in Heliax...contact me direct if you are so inclined. (and there may be MORE gear to be listed soon)
Direct Email ONLY for those who dont grasp the concept (and there are some who dont!) Only serious offers considered.

Thanks

MFJ-1026 Noise Eliminator

http://www.mfjenterprises.com/Product.php?productid=MFJ-1026

Purchased used from QRZ. Works fine, but my noise situation went away. No box or manual. Manual available online. Tested and works.

Asking $140 or offer

Kenwood MC60a base station mic

Works great, but using a Heil boom mic now. Works great. May have box. Looks and works as new. Low time.

Asking $90 or offer.

From: bcarling@...
Topic: 8260 Message: 8260

For Sale: Set of Transmitter Tubes... I THINK these are for a Heathkit DX100.

In any event they are in a box marked as such. I know I probably got it wrong last time, but
these are then probably the correct ones, hi hi... Please no silly comments about how any of
them is "not rare" or "worthless" etc. These are good used tubes I have and they are priced reasonably enough.

They all test good unless otherwise indicated. The box contains:

1 X 6146 tested good
1 X 6146 missing plate cap but tests good
2 X 1625 tubes RCA
1 X 5U4GB Westinghouse
1 X 5U4 - RCA
1 X 5763
1 X 12BY7
1X 6AQ5
1 X 12AX7
1 X 6AL5

10 tubes in total - will sell for $25.00 plus shipping

73 and thanks for looking - Brian Carling, AF4K

8262. HeathKit SB-101 amateur ham radio for sale & Speaker/P.Supply SB-600 unit

Yahoo group: ham4sale (2007 — 2015)
Date: 2014-07-09 21:20:25 UTC
From: kc9yvt@...
Topic: 8262 Message: 8262

For your consideration:
A Vintage amateur ham radio which includes the SB-600 speaker and power supply. All very clean and works great, just like it should.

Very well maintained and would be very difficult to find another cleaner combo than this one being offered here today.

$350 OBO + shipping

Thank you for your consideration,
-KC9YVT

Sold as Package only.
$140.00

8264. FS: High Impedance Headhones

Yahoo group: ham4sale (2007 — 2015)
Date: 2014-07-10 21:04:29 UTC
From: bcarling@...
Topic: 8264 Message: 8264

For Sale: High Impedance Headhones

H-43 B/U headset in new condition. Comfortable set with nice padding. They look new and unused, but since is no package are being sold as "used" but in good working condition.

Found on the web:
"The H-43 B/U was a 3000 ohm set that was made for a Radiac Geiger Counter and also works well with crystal radios. "

Seems to be ideal for a regen or other homebrew receiver requiring hi-z.

Available for $15.00 plus shipping

8265. Trade: Rohn 25 etc for Aluminum Tower

Yahoo group: ham4sale (2007 — 2015)
Date: 2014-07-13 01:13:40 UTC
From: qrv@kd4e.com
Topic: 8265 Message: 8265

Looking for a clean aluminum crank-up, tilt-over, or combo
crank/tilt tower.

Minimum 35' (must handle a 10-15' mast w/GP-15 vertical, 2/440
beam, long TV yagi) - or taller (must have no stress fractures
& be in otherwise undamaged condition).

I'm willing to trade all of the following:

1. Two straight sections of Rohn 25

2. One tapered-top section of Rohn 25 w/round flat top plate
(hole in middle for a mast - has a minor mod to mount
on top of the Rohn 25 section)

3. Five sections of Rohn 25 clone

4. Rohn 25 rotator mounting plate

5. Rohn 25 Baseplate

6. Rohn 25 Tilt-plate, etc.

7. Miscellaneous small hardware.

If no trade then only three sections of Rohn 25
clone, two sections of Rohn 25, and a Rohn 25
baseplate are available for sale. (I'll only take
down my tilt-over tower for a trade.)

Located in Statesboro-Savannah area & will deliver
and pickup for trade-only within 200 miles.

8268. Kenwood TS-430s for sale

Yahoo group: ham4sale (2007 — 2015)
Date: 2014-07-19 04:40:10 UTC
From: Robert
Topic: 8268 Message: 8268

I have a Kenwood TS-430s with the FM board option and MARS/CAP modification properly done. The radio was tuned and had new finals put in about 10 months ago. She has full output power and performs flawlessly. I will also include an interface for connecting to a PC for digital communications. I used this for traffic net operations as well as MARS functions. Unfortunately I am in the process of starting a new business so don't have time for radio and need the money. I will sell this for $450 plus shipping or can deliver it to any location within a two hour drive of Ft. Payne, Al. Contact me for pictures or questions at 256-868-0133 or via email.

8269. Tubes, lots of tubes

Yahoo group: ham4sale (2007 — 2015)
Date: 2014-07-21 00:26:08 UTC
From: ko6r@...
Topic: 8269 Message: 8269

I have, from the estate of a Silent Key 107 tubes.
I would preferably like to sell them all as a group.
They are:
1BH2A; 1BY2A; 1V2-QTY:2; 3A3C/3AW3/3B2; 3AU6; 3BU8; 3BZ6-QTY:4; 3CE5/3BC5; 3CU3A; 3DB3; 3DB3/3CY3; 3DC3-QTY:2; 3DF3A; 3DG3; 3HA5(3HM5)-QTY:2; 4EJ7; 4HQ5; 5GH8A; 5GS7; 5R4GY; 5Y3WGTB; 5Z3; 6AH6; 6AK5; 6AL11; 6AN8A; 6AU6; 6AV6; 6AX4GTB; 6BA11; 6BL7; 6BL8/ECF80; 6BQ5/EL84; 6BQ6GTB/6CU6; 6CG3/6CE3/6CD3; 6CG7; 6CG8A-QTY:2; 6CJ3-6DW4B; 6DX8/ECL84-QTY:2; 6EA8; 6EA8-QTY:2; 6EH7/EF183-QTY:2; 6EM5; 6GH8A; 6GU7-QTY:2; 6GX7; 6J6-QTY:2; 6J6WA; 6JH6-QTY:2; 6JW8/ECF802

6KA8; 6LE8; 6LX8/LCF802; 6LY8; 6MD8; 6MK8A; 6U8A/6AX8/5KD8/6KD8; 6Z4-QTY:2; 7189; 7KY6; 807-QTY:2; 866A-QTY:3; 8ET7; 8FQ7-8CG7-QTY:2; 8JV8; 9ML8; 10GK6; 11LQ8; 12AT7WA; 12AT7WB; 12AT7WB-QTY:2; 12AX7; 12BQ6; 12CA5; 12HG7/12GN7; 12JQ6; 15KY8; 16A8/PCL82; 17BW3; 17JQ6; 30AE3; ECG508(R-3A3); ECG510(R-3DB3); OD3; VT118; VT136-QTY:3

Notice that many are multiples. For instance, there are 2 807's, and 3 VT136's.
Most of them are presumably new in their original cartons. The SK was a military radio chief, and had access to lots of equipment. I have not tested them.

I have no idea what to price them at, so I will take the best offer I get within the next week.
Shipping will probably be about $20, give or take. I'll pad them as a group in lots of small-bubble wrap.
Local pickup in the SF Bay Area is also workable.

Peter KO6R

8271. PARTS etc. FOR SALE

Yahoo group: ham4sale (2007 — 2015)
Date: 2014-07-23 18:10:06 UTC
From: bcarling@...
Topic: 8271 Message: 8271

PARTS etc. FOR SALE

1) Barker and Williamson Coaxial Antenna Switch model 592 (two way) - excellent condition
QTY 1 available for $32.00 plus shipping

2) Sprague 8 uF at 1000V DC oil-filled capacitor. Tested and works fine, no leakage or other issues. Dimensions 3.75" X 1.25" X 5.25" tall
QTY 1 available for $6.00 plus shipping

3) Pair of ceramic octal sockets wired for 6146 tubes, an a small copper plated subchassis, with a nice 2.5 mH choke, ceramic feedthru etc. $5.00 plus shipping

4) - Box of 16 power resistors and bleeder resistors, Ohmite etc. mostly 25, 50 and 100 watt.
Examples: 100 ohms at 100 watts, 12K at 100 watts, 14K at 50 watts, 15K at 72 watts, 16K at 50 watts, 20K at 100 watts, 24K at 72 watts, 25K at 100 watts, etc. This is about 10% of list price:
Available - all 15 for $25.00 plus shipping

5) DX100 plate tank coil including extra 160m coil - $5.00

6) RFC - Plate choke from a Viking II transmitter - $5.00

7) Pair of 10K at 10 watts resistors, plus one 15K at 10 watts from DX100 - $4.00 for all 3.

8) Panel Meter from DX100 Transmitter - $10.00

9) Chassis for DX100 Transmitter - $20.00

10) VFO assembly for DX100 - $20.00

11) Transformer with secondary: 50V AC at 20 Amps. Like new, scientific grade, and in excellent condition.
Primary is 120V AC and this is a beautiful workhorse transformer. 4 hole mounting.
Dimensions: 7" X 6.5" X 4.5" tall.
QTY 1 available for $25.00 plus $15 for USA shipping

12) Pair of ceramic 807 sockets with mounting hardware - $5.00

13) Pair of ceramic plate caps for 807 tubes Millen - $4.00

14) Microphone socket for DX100 - 2-pin with hardware - $4.00

15) Group of capacitors - One Astron 0.1 uF at 600V DC, Two 0.05 at 1600V DC, One 0.0002 uF at 1200V and two electrolytics 40 uF at 450V DC. These are good tested used parts. The 0.1 and 0.05 ones have usable short leads - others normal. Also, one DX100 Fixed loading capacitor HV, switches in parallel to the loading variable capacitor.
Total of 7 capacitors for $6.00

16) New Silver mica 0.001 uF capacitors at 2500V DC. Available for $6.00 each while they last.

17) G.E. MASTR external speaker $5.00

18) G.E. mobile Power supply for two way radio - $5.00

19) Three black IERC tube shields, heat dissipating types, for 7 pin miniature tubes. $6.00 for all three.

20) HAL-TRONIX model HAL FC-600A frequency counter. Good working condition. BNC inputs and runs on 120V AC. I have no manual for this. Available for $15.00 plus shipping.

21) 6Y6G tube made by G.E. - QTY 1 available for $3.00

22) 811 Transmitting tube Penta Labs - looks new - $12.00

23) 5R4WGY tube new in box JAN type from Chatham Electronics - $5.00

24) 5T4 tube, new - $2.00

25) 6146 (S2001A) from Matsushita - looks new, like 6146 - $6.00

26) Mullard TDD2A gold tube new in box - $10.00

27) 3B28 rectifier tube - JAN - QTY 1 only for $4.00

Shipping additional on all the above. For additional details, pictures or questions, please e-mail me off the list.

8280. QRP Radios for sale

Yahoo group: ham4sale (2007 — 2015)
Date: 2014-08-03 21:40:27 UTC
From: Fred VE3FAL
Topic: 8280 Message: 8280

I have 2 very slightly used QRP radios for sale.

I have recently acquired a PRC-104 military manpack radio and awaiting the arrival of a X108 radio and need to make some room.

1) X1M Platinum with very few operating hours up for sale. The X1M has the latest firmware in it. Comes with hand microphone and programming cable that is also used to control the radio using HRD.
This model has BNC antenna connector. $300 plus $20 shipping

Transmits continuous 100 kHz - 30 MHz via Menu option. Preset transmit range is the five US bands shown below.

Five Ham Bands are configured with bandpass filtering. Transmitting on frequencies outside these ranges will require external bandpass filtering.

Band 1: 3.5 ~ 4.0 MHz

Band 2: 7.0 ~ 7.3 MHz

Band 3: 14.0 ~ 14.350 MHz

Band 4: 21.0 ~ 21.45 MHz

Band 5: 28.0 ~ 29.7 MHz

Receiving sensitivity: better than 0.45uV,

RF output power: ? 4.5W

Frequency stability: better than 0.5ppm

Frequency accuracy: better than 0.5ppm

Operating voltage: 12.0 ~ 14.0V DC

Receiver Standby Current: 0.5A

Emission current: 1.5A Max

2) HB1B 4 band radio that covers 80,40,30 and 20 meter bands, cw transmit only but is wide coverage receive from 3.2-16 megs and receives USB and LSB. This is the non MKII model so only comes with the alkaline holder not lithium battery and charger like the HB1B MKII model.
Radio and battery holder. This radio has seen very little use as I use my MKII on all my portable adventures. $250 plus $20 shipping

Fred

8288. FS: Several World Atlases

Yahoo group: ham4sale (2007 — 2015)
Date: 2014-08-08 02:42:15 UTC
From: John Geiger
Topic: 8288 Message: 8288

I have for sale several World Atlases, which are great for DXing-look up where the station you just worked is located. Here are what I have available, prices include shipping in the US:

1. A Reader's Digest "Wide World Atlas". This is a large atlas, measuring 11" x 15" and is a nice hardback bound book. It is from 1984 so it is a little dated, but has very detailed maps in it, including some good detailed maps of both the pacific and carribean islands. The maps cover 195 pages and it also has a nice index. Asking $20.

2. A Hammond "World Atlas (Superior Edition)" hardback book measuring 9.5" x 12.5". This is from 1964 which has some historical interest, but also has very detailed, nice colored maps showing the internal political divisions for many countries (like France, Spain, and Italy, and the US counties in each state. Comes with a nice index as well, and includes some information on space, the Moon and other interesting things. Has a total of 288 pages. Asking $15.

3. Hammond "New Comparative World Atlas", softcover book from 1997 and 1998. In addition to the political maps, they also have maps covering many other topics, like climate, standard of living, etc. I have 2 of these, each with a total of 96 pages. Asking $10 each.

I can take paypal/check/MO/cash.

8290. FS: World maps for the shack

Yahoo group: ham4sale (2007 — 2015)
Date: 2014-08-07 21:43:33 UTC
From: John Geiger
Topic: 8290 Message: 8290

I have for sale a few nice, full color maps that would be perfect for hanging up in the shack. You can even mark the different places that you have QSOd on them.

The following ones are $5 each, shipped

2007 National Geographic 20" x 32"
2008 National Geographic 20" x 32"
2012 IFAW 22" x 33"
Doctors without borders map from around 2012 or so, measures 17" x 25"

In addition I have a Hammond World Map from the 1960s, based on the country names. It measures 32" x 48". It does need a little taping at some of the seems but is in good condition overall. I am asking $10 shipped for it. This is good for historical interest, if nothing else.

I can take paypal/check;/MO.

*LTIM**THE DXTREME end-fed antenna covers from 1.0 to 54.9 MHz*

continuous and is rated at 2 KW (SSB) , 1.2 KW CW & RTTY.

*The DXtreme comes with your choice wire radiator lengths ranging from 33' to 124', allowing homeowners with more space the ability of improved performance while offering those with limited space an antenna which will cover all of the amateur HF spectrum. *

*The DXtreme also comes with a counterpoise & radial stud for adding the radial set
(which is included) or adding an existing radial set.*

The DXtreme is designed for the harsh and punishing demands of maritime mobile use.

The DXtreme is ideal for:

. H.O.A. restricted sites . Camping & backpacking

. Emcomm, ARES, RACES . Field day & DXpeditions

Technical specs:

* Bands: 160 to 6 meters (1.0 -54.9 MHz)*

* Max power rating: 2 KW (PEP) 1.2 KW CW & RTTY*

* Length: 72'*

* Max weight: 4.2 pounds*

*Polarization: vertical, horizontal, sloped *

Minimum coax length: 30' feet

* SWR: less than 2.7:1 with a wide range tuner*

* (Most radio tuners will work very well)*

* Radial: not required but adding them improves performance
**
$130 invested [shipping and sales tax]*

Date: 2014-08-16 11:54:06 UTC
From: k4mt@...
Topic: 8298 Message: 8298

I am selling my Drake TR-7 transceiver. It works fine and has a very hot receiver. Puts out over 100 watts on lower bands and less on 10 meters. It is opened and will transmit on any frequency if I remember correctly. It has been modified for a 12 volt fan that is powered on when the radio is powered.

It has some scratches etc, no sticky paint, missing center insert on band knob (available on Ebay), and some case screws are not original. It has the Aux board and if I remember the last time I looked at it is full of modules. Only a couple are programmed. It also has 1.8 SSB optional filter installed. Of course has Digital display board. Also included is the original Drake owners manual. Its a later serial number in the 9000 range with the three piece rear panel.

$450.00

8299. FS: Drake RV-7 External VFO

8301. FS: Yaesu FT100D HF/VHF/UHF all mode radio

Yahoo group: ham4sale (2007 — 2015)
Date: 2014-08-18 00:09:58 UTC
From: John Geiger
Topic: 8301 Message: 8301

I have for sale a Yaesu FT100D HF/6m/2m/70cm all mode transceiver. This is the model that does 100 watts on HF and 6m, 50 watts on 2m, and 20 watts on 70cm. It is in good condition overall, with a few marks on the case from being used mobile at one point. It is a 1I serial number range, and has the SWR/Grounding mod done with a screw attaching the grounding strip to the chassis of the rig (I can verify this with pictures). It also has been modded to work on 60 meters.

It comes with a short power cord, a hand mic, and a very well used copy of the manual. The radio works fine on all bands and modes.

I am asking $500 plus shipping for it.

73 John AF5CC

8302. FS: 8873 linear

From: adastra_2001@...
Topic: 8302 Message: 8302

I inherited an HF linear built from the Oct 1973 QST. I have never fired it up. It was built by WA2CRI (SK). It is complete with power supply and as best I can tell was built as per the original article. It needs cleaning. I can Email pictures to any interested party. Local pick up because it is really too heavy to ship. It is located in zip code 11217 now. Make me a serious offer and it is yours. Not interested in trades.I also have a Drake R4B that can be had separately. Thank You!!!AF2RF

8303. FS: DEM 222mhz transverter and TE systems AMP

Yahoo group: ham4sale (2007 — 2015)
Date: 2014-08-18 16:31:29 UTC
From: John Geiger
Topic: 8303 Message: 8303

Here is a nice packing for anyone looking to get on 222mhz with a little bit of power.

I have for sale a Downeast Microwave 222-28 transverter. This transverter takes up to 10 watts of 10 meter IF drive and puts out 25 watts on 222mhz. It uses a common IF in port on BNC connector, and included is a coax jumper with a BNC male on one end and a PL259 on the other end. It also includes the power cable and a cable which can be used hard key the transverter to place it in transmit.

These sell new for $479, I am asking $350 plus shipping. This is a great way to get your HF rig onto 222mhz in time for the September contest.

I also have for sale a TE systems 2210G 222mhz amp. It takes 5 to 10 watts in for 130 watts out, and includes a preamp. It comes with a power cable as well, and uses SO239 jacks for input and output.

These amps sell new for $520. I am asking $350 plus shipping. Both the amp and the transverter work great, and were recently in use at a VHF contest station.

I can take paypal/check/MO/cash.

8304. FS: RF Concepts 4-310 100 watt UHF amp

Yahoo group: ham4sale (2007 — 2015)
Date: 2014-08-18 14:16:28 UTC
From: John Geiger
Topic: 8304 Message: 8304

I have for sale a RF concepts 4-310 70cm all mode amplifier. This is the model that takes in 30 watts and puts out 100 watts. Of course you can drive it with less, like 20 watts from a FT100/857/897 or Icom 706MKIIG or 7000/7100. It has a built in preamp as well. Comes with a fairly long power cord terminated in powerpoles. The amp works fine, and was purchased earlier this year used from Ham Radio Outlet. It does have a dent in one corner of the rear near where the power cable connect to it, but looks good otherwise. I am asking $225 plus shipping for it, and can take paypal/check/MO/cash.

8310. FS: SKB 6U Roto-Molded Rack Case w/Shelves for Go-Kit

Yahoo group: ham4sale (2007 — 2015)
Date: 2014-08-21 13:24:36 UTC
From: wnypcrepair@...
Topic: 8310 Message: 8310

I'm downsizing my go-kit, so I'm getting rid of this case. It's (6) 19" rack units, handles molded into case. I also have the (2) half-depth shelves I bought with it that I had all of my gear zip-tied to. Worked very well, I had a switching PS, (3) radios, a scanner, auto-tuner, rigblaster, etc. all installed with a little room to spare. I used the 1/2 unused space for a box with a G5RV Jr., Buddipole, COAX, etc. I paid $250 total with the case, shelves and tax about 4-5 months ago, I'm asking $120 + shipping.

Topic: 8311 Message: 8311

I have a KLM KT-34XA tri-band (10-15-20 meters) Yagi antenna available.
I've not put it on the air, and it will probably need a bit of work to make it functional. Otherwise it's a great supply of parts to repair another antenna.
It's boxed & ready for shipment from Nashville, TN. $265 or best offer.

8312. Trade VX-1210 and accessories for loaded Elecraft KX-3

Yahoo group: ham4sale (2007 — 2015)
Date: 2014-08-22 20:06:22 UTC
From: Fred VE3FAL
Topic: 8312 Message: 8312

I have a loaded Vertex VX-1210 manpack radio with way too many extras to list right now that I would like to trade for a fully loaded Elecraft KX-3.

I will compile a list of what I have which includes a spare battery that has only been charged and never used, the battery is just under $400.00 brand new.

The radio if anyone has ever looked was not cheap to purchase when new, in fact this entire package is probably close to over $3000.00 if purchased new not counting any duties or taxes that were paid on it.

Have programming cables and software and as stated all kinds of extras for it.

Contact me direct if you have a Elecraft KX-3 loaded that you would like to trade for a Vertex VX-1210 manpack.

Why am I getting rid of it?

1) I have played with it and used it which is something I have always wanted to get

2) I swap and trade gear all the time after trying them

3) Never have had a KX-3 yet and would like to have one thus the trade idea

4) I have a Hughes PRC-104 manpack radio now that is my built like a tank portable unit

Regards

Fred

8313. Kenwood and related items FS

Yahoo group: ham4sale (2007 — 2015)
Date: 2014-08-23 13:01:32 UTC
From: Ken Simpson, W8EK
Topic: 7474 Message: 8313

Kenwood and related Items For Sale:

Two meter muti-mode transceiver, 2 meter mobile rig, Dual Band HT, Microphones, High Power Antenna Tuner, Original Boxes, Coaxial Antenna Switches, HT Accessories, Noise Filter, Original Manuals, and more

Kenwood TS-711, multimode 2 meter transceiver:

This unit is an FM, SSB, and CW transceiver for 2 meters. It has 40 memory channels, and up to 25 Watts of output power, which is continuously variable (no Hi or Low switch, but a front panel control to continuously vary power). Of course it will scan, and do the things one expects in a 2 meter rig. It has a GASFET in the front end for one of the best receivers I have ever used. The 120 V AC power supply as well as 13 V DC, is built in. The case looks very similar to a TS-440 or TS-450 HF rig.

This particular unit is very nice. I do not find any scratches, but it does show slight use. It has the optional TU-5 subaudible tone PL encoder in it, so it can be used with modern repeaters. Power cord and mic are included, with paper work for $425.

Kenwood TM-G 707 A Dual Band Transceiver:

The TM-G 707 has an extra-large control panel with the welcoming glow of its amber-colored LCD. This mobile transceiver provides 50 watts on 2 meters and 35 watts on 440 MHz. The TM-G 707 offers features such as memory name function, tone encode/decode, dimmer, and auto power-off. Non-simultaneous cross-band repeat is supported.

Receive coverage is 118-174 and 410-524 MHz.
Transmit range is 144-148 and 430-450 MHz.
It requires 13.8 VDC at 11 amps.

Features include:
180 Alpha Memories
Big Display
Guide Function
Auto Repeater Offset
Dimmer
Time Out Timer
Visual Scan
Priority Scan
DTSS Selective Call

PL Decode/Encode
Packet 1200/9600 DIN plug
Hi/Med/Lo RF Out

This particular unit is still in its original box. It functions 100%, and looks the same. As best I can tell, even all of the little packages of screws, fuses, etc. are included. $250

Kenwood TH-78 A Dual Band HT:

The Kenwood TH-78A is a sophisticated dual-band HT. It has built in tone and paging functions, alphanumeric memory and message paging. Additionally it has dual-frequency receive capability (including VHF+VHF and UHF+UHF). There are 50 memory channels. The operator can choose from 8 different scan types. DTSS allows DTMF access to the transceiver.

The receive range is 118-173.995 and 438-449.995 MHz.
It has three RF output levels of about 5.0/0.5/0.02 watts.

Features include:
Two Line LCD Display
50 Memories
Alphanumeric Memory
Message Paging
Cross Band Operation
Backlit Keypad
Multi Scan Function

This one works fine, and looks fine. It includes the HT, rubber duck antenna, wall charger, and paper work.
A PB-13 standard battery is included, that holds its charge fine. Also included are two PB-17 heavy duty packs that are in bad condition. $135

Kenwood MC-60 A Deluxe Desk Microphone:

The Kenwood MC-60A has been a popular desk mic among Kenwood owners for many years. It has a communication type dynamic unidirectional moving coil type mic element and features UP-DOWN tuning (on compatible Kenwood transceivers) plus a built-in pre-amp. There is a switch for PTT (push to talk) and also a lock feature. The mic impedance may be set for 50K ohms or 500 ohms. The frequency response is 150 Hz to 10 kHz (-6dB) with the Preamp off and 200 Hz to 7 kHz (-6 dB) with the Preamp on.

The heavy zinc die-cast base provides extra stability. The mic terminates to a standard 8 pin mic plug. The preamp requires two AA cells which are mounted through the bottom of the base. Please note that the earlier MC-60 (non-"A")

version featured a 4 pin mic plug and did not have UP-DOWN tuning.

This one works 100% and looks very close to new.

With paper work for $100.

Hand Microphone with round 8 pin plug for Kenwood, Alinco, etc.

This hand mic works great on most Kenwood rigs with the round 8 pin connector, such as the TS-430, TS-440, TM-241, TM-2530, TW-4000, and others, including Alinco and ADI. It says "Electret Condenser Mic" on the back, and "Kenwood" on the front, with no model number.

Basically, this mic functions like an MC-43, with a couple more features. It has the mic and PTT switch; it also has up/down switches on the top. There are four "extra" buttons labeled Call, VFO, MR, and PF. What these four buttons do depends on the rig. There is also a "Lock" switch on the back.

Regardless if you use the four extra buttons or not, you still have a mic that works like an MC-43.

This mic works fine, and looks like new. I am guessing it came with a rig, and was immediately put in the drawer, and never used. $30

Dentron Super Super Tuner High Power Antenna Tuner:

Dentron made a very heavy duty antenna tuner. It covers from 160 meters thru 10 meters continuously, including the WARC bands, and includes a balun that is also very heavy duty. This is one of the most rugged tuners available.

The super super tuner is rated at 3000 Watts and a real brute. I don't think there is a heavier one made! Unless you are running far more than legal power, you do not need to worry about this one!

This one works fine and looks extremely nice. At first glance, it looks like new, but there are a couple of very light scratches that can be seen if the light is just right. With paper work for $225.

Original Boxes for Kenwood VHF / UHF Rigs:

The following original boxes for Kenwood equipment are available. They are all in very nice condition, and include the molded styrofoam inserts to protect the rig, plus the box itself.

Kenwood TM-221 two meter transceiver $5

Antennas for your HT:

All rubber ducks are for 2 meters, are in good
condition, and are $10 each, unless stated otherwise.

BNC - Dual Band (2 m and 440 MHz) Telescoping antenna
provides significant gain when extended, $18

BNC - As used on most HTs, 7 inches long

BNC - Original Alinco EA0024, about 4 inches long

BNC - Original from Kenwood TH-215, about 5 inches long

BNC - "Stubby" about 4 1/2 inches long

Type F connector - 6.5 inches long

BNC Stubby for 440 MHz, 3 inches long

Threaded (as used by Motorola, etc.) stubby for 440 MHz

Not a Rubber Duck, but can be used on your HT:
Telescoping Antenna w/ BNC about 19 inches long
can be used as a quarter wave antenna on 2 m,
or on 220, or 450 MHz if telescoped shorter. $12

Special Kenwood "Tone Plugs":

Many years ago, Kenwood used a special plug to go into the back
of many of their radios. If my memory is correct, these rigs
included some TR-2200 models, TR-7400, TR-9000, and some others.

This plug is about 1/4 inch in diameter, and has four small pins
arranged in the shape of a Y. It was used to provide an audio
input for things such as a touch tone DTMF pad or other audio,
plus provide voltage to operate the external device, PTT and
ground.

Recently these plugs have been "Unobtanium". I have found two
from a silent key stash. These are new, still in the plastic
bag. They are $10 each.

Accessories for the Kenwood TH-21 / 31 / 41 series HTs:

Antenna adapter that fits the TH-21 series HTs, and has
an SO-239 on the other end, to accept a PL-259. $5

Antenna adapter that fits the TH-21 series HTs, and has
a BNC on the other end. $8

Kenwood SC-8 T "Soft Case" for any of the TH-21 series HTs
great condition $12

Original Operating manual for TH-21 HT for 2 meters $8

Kenwood W09-0315 charger
This charger is used to charge the larger PB-21 H batteries
for the TH-21 series, and also on other Kenwood radios.
It has a standard 2.1 mm coaxial connector. $12

HT Belt Clips and Wrist Straps:

Belt Clips:
All include the hardware with the belt clip and are $6 each.
Icom IC-2 AT
Kenwood BH-6
Motorola
Yaesu FT-207
Yaesu FT-209

Wrist Straps for various HTs - $4 each
Kenwood TH-215 / 225 / 415, TR-2500, etc.
Kenwood TR-2400
Yaesu FT-209

Two position "Strip Line" Coax Switches:

These switches utilize metal cavity construction for max efficiency
and high isolation. Isolation is better than 50 dB at 300 MHz
with low insertion loss less.
All are two position and are typically rated for 2500 W PEP,
and good to 600 MHz.

Diawa CS-201 - $22
Opek CX-201 - $22
MFJ 1702 C - With center position that grounds both antennas,
and added lightning protection. $25

APC "Pro 7" Noise Filter and Surge Suppressor:

This unit has 7 outlets, with a 6 foot cord, and provides
surge suppressor for your equipment. It also provides
noise filtering / EMI / RFI suppression of 60 db. There
is $75,000 worth of insurance included. It comes with a
lifetime warranty, and I think this is APC's "Top of the
line" unit.

Detailed specs can be found at
http://www.apc.com/products/resource/include/techspec_index.cfm?base_sku=PRO7

This one appears to be new, unused, in its original box. $18

Original Manuals for Kenwood equipment:

All manuals are in very nice condition, for Kenwood equipment.
All are Operating manuals unless otherwise specified.
All are original manuals only.

SPECIAL:
Buy two, three, or four of my books/manuals, and take 10% off.
Buy five or more and take 20% off.

TH-21 HT for 2 m, $8
TH-215/315/415 HT for 2 m, 220 MHz, or 440 MHz, $10
TH-225, 2 m HT, $12
TH-235, 2 m HT, $15
TH-241/441/541 mobile FM transceivers
...For 2 m, 440 MHz, & 1200 MHz, $12
TM-221/421 2 m or 440 MHz mobile, $12
TM-261/461 2m or 440 MHz mobile, $12
TM-2570/2550/2530 2 m mobile, $15
TR-2400, 2 m HT, $12
Service manual for TR-2600, 2 m HT, $12
TR-9000, 2 m multimode, $12
TS-120 S/V, HF xcvr, $20
TW-4000 dual bander mobile, $15
Service manual for TW-4000 dual bander $20
TW-4100 dual band mobile, $15

BC-5 DC to DC quick charger $2
LF-30A Low Pass Filter $5
MC-30 & MC-35 hand microphones $4
MS-1 mobile stand $3
PB-1, PB-2, PB-3, & PB-4 battery packs $3
PB-24 battery pack for TR-2400 $2
PB-25 H battery pack for TR-2500 $2
PS-6 power supply $5
PS-30 power supply $4
SMC-24 speaker mic $3
SMC-25 speaker mic $3
SP-430 speaker $2
SP-820 Speaker $2

These are original Kenwood manuals only.

Versión en español de Kenwood TM G-707 manual de Venta:

Versión en español del Manual de Operación
para el Kenwood TM G-707 transmisor-receptor de banda dual

Este es el manual de instrucciones original, en español.
Parece que es bastante extensa y detallada.
Es básicamente nuevo, sólo se abre para observar que
es sólo en español. Es original de Kenwood.

$ 8 más gastos de envío de la Florida.

Spanish Version of Kenwood TM G-707 manual:

Spanish version of the Operating Manual
for the Kenwood TM G-707 dual band transceiver

This is the original operating manual only, in Spanish.
It looks like it is quite extensive and detailed.
It is basically new, only being opened to observe that
it is in Spanish only. It is original from Kenwood. $8

8324. TEN TEC 1208 6 Meter Transverter

Yahoo group: ham4sale (2007 — 2015)
Date: 2014-09-06 13:52:30 UTC
From: email4utoo@...
Topic: 8324 Message: 8324

transverter lets you transmit as well as receive on 6 Meters using the precision digital tuning, available modes, memories and other features of your HF transceiver. It's simple: 14.000 MHz on your display or dial becomes 50.000 MHz. To operate SSB on 50.200 MHz simply switch the 1208 to 6 Meters, tune to 14.200, keep transceiver output power under 5 watts and just go for it! The 8 watts RF output is generous power during good band openings and for local communications and repeaters.

100. shipped to Conus. email is -- email4utoo (at) y hoo dott c om

73s, "AJ" W5HEH

no worries i am a scam detector , my rep is 100% on Ebay and on QRZ just no pics . I have recent General but was Teen Ham in 60s . We own home in Ozarks and not going anywhere.

I have the following gear for sale:

All sales for price listed then will add actual shipping after getting quote from post office, all items packed and insured, shipping from Canada via Canada Post.

1) YouKits HB1B 4 band cw transceiver, this is the non MKII model and uses a 12 volt supply or the uses alkaline batteries with the holder that is inside the radio. This radio got very little use and the plastic is still over the display. You can see reviews of this radio at www.youkits.com

I am asking $150.00 plus actual shipping

2) Uniden Bearcat BCD996XT Trunktracker IV scanner with in-dash mounting bracket, wall wart, mobile bracket, programming cable, 12 volt cable etc. Asking $350.00 plus actual shipping

3) TenTec Argosy 525D radio in great working condition. This radio has digital display and can be adjusted to 5 or 50 watts on high power setting, radio works extremely well and is very stable for its age. Asking $350.00 plus actual shipping.

Pictures are available for all the items listed above.

I also have for just cost of shipping on all items parts from a TenTec Triton IV, I have most of the boards from the radio, all the knobs and top and bottom cover as well as side covers. Asking only pay shipping costs on these items.

Thanks for looking

8334. Wanted: Tube-type FM Low-VHF Mobile

Yahoo group: ham4sale (2007 — 2015)
Date: 2014-09-13 18:16:15 UTC
From: qrv@kd4e.com
Topic: 8334 Message: 8334

Looking for an old Motorola Dispatcher-series motorcycle transceiver or other compact tube-type low-VHF FM gear for conversion to 10M FM.

Will consider damaged or incomplete to jump-start the project. Maybe a non-FM unit that could be converted to FM.

Thanks - David KD4E

8336. FS: Hammond World Atlas-great for DXing

Yahoo group: ham4sale (2007 — 2015)
Date: 2014-09-15 16:13:43 UTC
From: John Geiger
Topic: 8336 Message: 8336

I have for sale the Hammond "New Comparative World Atlas", softcover atlas, one from 1997 and and one from 1998.

In addition to the political maps, they also have maps covering many other topics, like climate, standard of living, etc. Each has a total of 96 pages. These might be a little dated but are good for looking up where DX stations you contacted are located, and things like that.

Asking $10 each. I can take paypal/check/MO/cash.

From: bcarling@...
Topic: 8337 Message: 8337

FOR SALE: Pro Audio Compressor - Limiter - ideal for AM and SSB stations.

Do you want the best sounding audio you can get - add a little compression and limiting.

Here is a versatile Behringer MDX4400 Multicom Pro audio processor, 19" rack-mount. 120V AC operation. Professional audio processor, great for the ham shack. Uses 1/4" TRS and XLR connectors for microphone I/O.

INPUT AND OUTPUT level is VU metered.

Has up to 4 channels of compression-limiting with multiple adjustments for both effects. Combine compression with limiting.

Looks new and works perfectly.

Cost $179.00 new and now available for $50.00 plus shipping.

Pictures:
http://c1.zzounds.com/media/fit,2018by3200/quality,85/MDX4400_big-bba9a9b382797a8f85e85f2bdb348d6d.jpg

8338. HeathKit HW-16s

Yahoo group: ham4sale (2007 — 2015)
Date: 2014-09-15 22:59:56 UTC
From: nwecop
Topic: 8338 Message: 8338

I have a pair of HW-16 CW Transceivers
One needs very little work to have it on the air.
the second one is a Basket Case, All the parts
starting with a bare chassis, most parts are new and
there was over $300 spent on them alone starting with
the power transformer,tubes etc.
Also one VFO, needs a little work. Has all the manuals
assembly and operation couple of them.
I purchased as a project and spent too much on it, and
have never had the time to start.
I would take $200 plus shipping, will consider best offers
This would make someone a great winter project with real
sized components.
Tnx N7KRE

8339. FS/FT: Drake TR-7 & Extras.

This is a very nice radio with no issues. Included are the following:

1. Noise blanker.
2. Filters- 1.8kc SSB, .500kc CW, 6.0 AM. (makes for a great shortwave receiver)
3. Cooling fan.
4. PS-7 matching power supply with fan.
5. MS-7 matching speaker.
6. Turner 350 hand microphone.
7. Operator and service manuals.
8. Trades considered for a radio that has good AM transmit (Ten-Tec Jupiter, newer Kenwoods) Can add cash.

Prefer demonstration and pick-up South of Tampa Bay. Will discuss shipping. $750.

Icom and related items For Sale --
Many HT Accessories including batteries, Original Boxes,
Cable / Adapter, Speaker Microphones, Communications Speakers,
Manuals, and other Miscellaneous Items

Accessories that fit the Icom A6, A24, V8, V82, U82, and
other Icom HTs:

Batteries America CBE-20 Battery eliminator
Goes on HT; plugs into cigarette lighter to power HT.
Appears new, unused. $18

Icom BP-210 Battery, 7.2 V, 1650 mahr
Heavy duty, high capacity NiMH battery.
Looks like new; holds charge well. $30

Icom BP-222 Battery, 7.2 V, 600 mahr
Light duty, light weight NiMH battery.
Looks like new; holds charge well. $15

Icom BC-146 Desk charger
Use with BP-209, BP-210, and BP-222 battery packs.
Appears to be new. Includes the "spacer". $15

Icom BC-147 A, Wall charger
Can be used to charge the HT direct, or to power
the BC-146 desk charger (above).
In original box. $15

Icom MB-86 Belt clip
Connects to the BP-208, 209, 210, and 222 battery packs.
New condition. $8

Original box for Icom IC-V8 HT
Complete with insert. Looks like new. $8

Accessories for Icom IC-2A, 3A, 4A, 02 A, etc. series of HTs:

Icom BC-30 desk charger
This charger will fast charge many different battery packs used
on the Icom IC-2 AT, IC-02 AT, and other HTs of this series. This
includes the BP-2, BP-3, BP-4, BP-5, etc. With paper work for $30.

Icom DC-1, 13 V DC adapter for many Icom HTs:
This adapter slides on the HT, in place of the battery
pack. If 13 V DC is applied, it converts the voltage to
the proper voltage for the HT. This one works fine, and
looks fine. With paper work for $12.

Icom CP-1 DC cord
This cord will work with the DC-1 above, plus many other items needing the 2.1 mm coaxial power plug. The opposite end has a cigarette lighter plug on it. $10

Belt Clip for the above HTs.
Complete with hardware. $6

Batteries for Icom IC-2 AT series of HTs:

These items can be used on the IC-2 A, 3 A, 4 A, 02 A, 03 A, 04A, 2G AT, 32 AT series HTs plus many others.

Icom BC-25 U wall charger
Standard wall charger for most of these HTs. $15

Icom BP-3 Battery pack
This was the "standard" battery that came with many of these HTs. It can be charged with a BC-25 U wall charger, or the BC-30 or BC-35 desk chargers, or with 12 V DC.
This one appears to hold a charge OK. $10

Icom BP-5 Heavy duty battery pack
This battery has several times the capacity of the BP-3, and slightly higher voltage for more power output.
It must be charged by a desk charger (BC-30 or BC-35).
Good condition. $15

W & W aftermarket BP-8 Heavy duty battery pack
This is a NiMH pack, 8.4 V at 2700 mahr; extremely heavy duty, long life.
This one looks close to new; excellent electrical condition. $30

DC Power Cable

This is the heavy duty power cable as used on most of the Icom HF rigs, plus also many Kenwood, Alinco, and others.
It has the 6 pin molex connector, with four pins used - two for plus and two for ground. The cable may not have ever been used. It looks good, and of course works fine. $22

Original Boxes for Icom IC-27 mobiles and IC-V8 HT:

The box for the IC-27 includes the two internal styrofoam inserts that holds the rig, the cardboard box for accessories that also acts as a spacer, and even includes the original plastic bag for the rig.
It is in nice condition. $8

Original box for Icom IC-V8 HT
Complete with insert. Looks like new. $8

Several Speaker Microphones:

All of these speaker mics have the 3.5 mm and 2.5 mm two conductor plugs that are spaced about 3/8 inch apart, and are molded into a single connector. They are used on Icom, Yaesu, Radio Shack, Maxon, Ritron, Vertex and many other radios.

Icom HM-9
This mic was originally used on the Icom IC-2 AT series of HTs. This one works fine and is in great cosmetic condition. Mic clip included. $18

Premier SPM-100
It is a lightweight and compact unit, featuring a powerful speaker as well as a high-quality condenser-style microphone element that produces excellent transmitted audio clarity. The microphone may be secured to the user's lapel or shoulder. It also features a built-in 3.5mm jack for using an external earphone. $18

DM-100
Appears to be the same as the SPM-100 above, but just with a different label. $18

Icom Battery Charger:

Icom BC-127 A, Battery Charger for Icom IC-Q7A Dual Band HT:
This charger charges two AA NiCads (or NiMH) for the IC-Q7 A Dual band HT, and Icom R-2 receiver, and probably others.
This appears to be new, unused, still in its bag.
Icom lists them at $21. Buy this one for $12.

Communications Speakers:

Realistic 21-549 A
This speaker is about 4 inches square and about 2 inches deep. It is rated for 5 watts, has an 8 ohm impedance, and is listed as a 300 to 3000 Hz frequency response, making it ideal for communications. It has a 3.5 mm (1/8 inch) mono plug, as used by most modern rigs. Gimbal mount included. It is black in color, looks great, and sounds great. $12

Vanco SPB-5
Appears to be the same at above, but with a Vanco label. Also includes gimbal mount. $12

Vanco SPB-6
Similar to SPB-5 above, but is considered a noise cancelling speaker. 10 Watt rating. Still in original box, new. $18

HT Belt Clips and Wrist Straps:

Belt Clips:
All include the hardware with the belt clip and are $6 each.
Icom IC-2 AT
Kenwood BH-6
Motorola
Yaesu FT-207
Yaesu FT-209

Wrist Straps for various HTs - $4 each
Kenwood TH-215 / 225 / 415, TR-2500, etc.
Kenwood TR-2400
Yaesu FT-209

Antennas for your HT:

All rubber ducks are for 2 meters, are in good
condition, and are $10 each, unless stated otherwise.

BNC - Dual Band (2 m and 440 MHz) Telescoping antenna
provides significant gain when extended, $18

BNC - As used on most HTs, 7 inches long

BNC - Original Alinco EA0024, about 4 inches long

BNC - Original from Kenwood TH-215, about 5 inches long

BNC - "Stubby" about 4 1/2 inches long

Type F connector - 6.5 inches long

BNC Stubby for 440 MHz, 3 inches long

Threaded (as used by Motorola, etc.) stubby for 440 MHz

Not a Rubber Duck, but can be used on your HT:
Telescoping Antenna w/ BNC about 19 inches long
can be used as a quarter wave antenna on 2 m,
or on 220, or 450 MHz if telescoped shorter. $12

ORIGINAL Icom operating manuals:

Please note that all of these are original Icom manuals
and are not copies. All are in very good condition.
These are original Icom manuals only.

SPECIAL:
Buy two, three, or four manuals and take 10% off.
Buy five or more and take 20% off.

Mobile transceiver and HT manuals:
IC-2 AT, 2 meter HT, still in plastic bag, $6
IC-22 A, 2 m FM transceiver, $10
IC-22 S, 2 m FM transceiver, $12
IC-27 A/E, 2 m transceiver, still in plastic bag, $15

IC-27 H, 2 m FM transceiver, $12
IC-28 H, 2 m FM transceiver, $12
IC-290 H, 2 m FM transceiver, still in plastic bag, $15
IC-736/738, HF + transceiver, $20
IC-751, HF transceiver, still in plastic bag, $22
IC-765, HF Transceiver, appears to be new, $18
IC-3200 A/E, Dual Band FM Transceiver, $15
IC-V8, 2 meter HT, $6

Other Icom manuals:
BC-30 Desk Charger, $4
BC-35 Desk Charger, $5
BP-2, BP-3, BP-4, BP-5 battery packs, $3
BP-21, BP-22, BP-23, and BP-24 Batteries, $3
DC-1 DC pack for IC-2 AT series HTs, $4
EX-310 Voice Synthesizer, $5
HM-8 Hand Microphone, w/schematic, $5
HM-10 scanning microphone, $3
IC-3 PA Power supply / speaker, $10
MB-5 mobile bracket, $2
MB-65 mobile bracket mount, $2
RC-10 Frequency controller, $4
SM-5 desk microphone, $3
SM-6 desk microphone, $3
UT-16 Voice Synthesizer, $5

These are original Icom manuals only.

I also have many other accessories available such as many
different types of microphones, HTs, HF, VHF and UHF rigs,
HF and VHF/UHF antennas, HF linear amplifiers, and many
other accessories.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

8348. For Sale

Yahoo group: ham4sale (2007 — 2015)
Date: 2014-09-28 14:37:43 UTC
From: wb4u@...
Topic: 764 Message: 8348

Rock Hill Hamfest is coming:

I have for sale the following items that will go to the Rick Hill Hamfest this coming Saturday.

Icom IC-7000 w/all factory accessories, mobile mounting bracket and separation kit and a spare microphone,
box, manual, power cable. Only 2 years old no issues or problems excellent condition $1000. It does have
the fan modification to allow the fan to run at low speed all the time for extra cooling and it will ramp
up to high speed if the radio heats up.

Alinco DR-06T 50 watt 6 meter mobile excellent condition, missing power cord everthing else it present,
never mobile used as a base station. $150

Prefer to meet you at the hamfest, but would be willing to meet within reasonable distance if you
do not plan to go to the hamfest. Reply if interested for further details.

wb4u@wrknradio.com

8349. 4 x 5867A RF triodes

Yahoo group: ham4sale (2007 — 2015)
Date: 2014-09-30 03:57:33 UTC
From: murrayatuptowngallery@...
Topic: 8349 Message: 8349

I have three Amperex 5867/TB3750 and one Siemens RS1026 (same tube), used.

They are or were common in RF heating industrial equipment.

They are absolutely not zero bias but make rugged amplifier tubes with proper bias.

plate dissipation is 350 W, a bit lower than 3-400Z or 3-500Z but they were considered more rugged because the grid has a higher dissipation rating.having said that, I would have to research that to back up the claim.

Years ago I had them tested at an industrial tube dealer in northern NJ. He estimated the three Amperex ones as having 95% emission and the Siemens one 80% (it LOOKS a lot more used).

I have a bunch of pics I can send you. The original owner I bought them from thought he could wash the ink off the Amperex ones and try to hamfest them as 3-500Z (this was in the 70's) (the Siemens has etched marking). His scheme either collapsed or he realized he couldn't really do it.

I bought them because I was really ambitious & never altered my existing GG amp to have a bias supply appropriate for these ;O).

I have a link for a Dutch ham's universal amplifier chassis which included these tubes in the range of tubes that would work...so it has all the bias info.

I need $120 shipped for the quad to US destinations. Elsewhere I fear shipping would be unpleasant, as it is increasingly getting worse.

They are all in Amperex boxes, so there is at least some credible marking that says 5867A, and of course the Siemens tube has permanent marking.

They appear to be graphite anode type, and have the same base as 3-400/500Z tubes, 5V at a little less current...I forget...14.1-14.6 A roughly. I have some links with data sheets also.

Thanks

Murray (K3FD)

8350. Hallicrafters HT-18 VFO

Yahoo group: ham4sale (2007 — 2015)
Date: 2014-10-01 16:41:01 UTC
From: ko6r@...
Topic: 8350 Message: 8350

As part of an SK's estate which I am handling on behalf of his widow, I have an HT-18 available.
I cannot get it to produce any output with a key -- nothing shows up on an output/swr bridge.
All the tubes light up, as nearly as I can tell.
It's very heavy -- so the cost of shipping might be more than the rig is worth. However, I'll take the best offer I get.
Will remove and wrap the tubes in bubble-wrap for shipping. Also, of course, local pickup (SF/East Bay) would be fine.
Peter KO6R
Oakland CA

8351. HEATHKIT MONOBANDERS FOR SALE 80& 20 METERS

Yahoo group: ham4sale (2007 — 2015)
Date: 2014-10-02 13:53:49 UTC
From: wt4t@...
Topic: 8351 Message: 8351

Have the following Heath monobanders for sale.
1. HW-32 Parts rig, nice face and cabinet no tubes.
2. HW-32 RECEIVES AND HAS LOW TRANSMIT.
3. HW-12 RECEIVES ,NO TRANSMIT.
4. HW-12 RECEIVES ,LOW TRANSMIT.
ALL the radios have decent clean cabinets and nice faceplates. Need to clean house would like to sell all together or trade for ??
ASKING 150.00 FOR ALL 4 RADIOS -WILL SPLIT SHIPPING FEDEX OR USPS.

8352. FS: Alpha 8410 in Mint Condition

Yahoo group: ham4sale (2007 — 2015)
Date: 2014-10-03 12:49:39 UTC
From: mal@...
Topic: 8352 Message: 8352

FS: Alpha 8410 in Mint Condition
I have a lightly used Alpha 8410 in Mint condition With 2 4CX1000A tubes.
The Amp puts out a full 1500 watts with 30 watts of drive.
It comes with everything as new. Manual, Data Sheet, CD and SO239 covers
Plus an Elite Cover.
This was a backup amp for my 9500, but I am setting up a second QTH at my winter home, so I purchased another 9500.
$4200 including shipping CONUS
$4000. Cash if Picked up on Long Island
PayPal OK I will split fees.
Contact mal@malcoprecision.com or Cell 516-375-2019

8353. TenTec Triton IV Parts

8354. Discounted Original FT243 Crystals

Yahoo group: ham4sale (2007 — 2015)
Date: 2014-10-08 19:14:52 UTC
From: bcarling@...
Topic: 8354 Message: 8354

Discounted Original FT243 Crystals for the AMATEUR BANDS (mostly!)

The following ARE ALL Original FT243 crystals are offered at a discount price.
There are a few hc6u metal can one slisted and a couple of AX2 (Same pins as FT243.)

These are radio crystals etc. are useful for transmitting, experimenting, homebrewing and testing. Unless otherwise noted, they are all FT243 types -

- indicates more than one is currently avaiable

260 kHz hc6u - $5.00
455 kHz hc6u - $12.00
466 kHz hc6u - $12.00
905 kHz (AM BC Band) - $5.00
1400 kHz (AM BC Band) - $12.00
3715 kHz - $6.00
3735 kHz - $6.00
3742 kHz hc6u - $2.00 each
3797 kHz - $6.00
3937 kHz - $6.00
4000 kHz - $6.00
7000 kHz - $5.00 each
7100 kHz - $5.00 each
7140 kHz (15m AM) - $8.00
7173 kHz - $4.00
7250 kHz (40m/10m AM) - $5.00 each
7275 kHz (40m/10m AM) - $6.00 each
7300 kHz FT243 - $5.00 each
8000 kHz hc6u - $5.00 each
8000 kHz FT243 - $5.00 each
8375 kHz (6m) - $5.00 each
8400 kHz (6m) - $12.00
8425 kHz (6m) - $5.00 each
14.165 MHz - $5.00
14.210 MHz AX2 - $5.00
14.213 MHz AX2 - $5.00
14.213 MHz - $5.00
14.215 MHz - $5.00
14.229 MHz AX2 - $5.00
14.235 MHz - $5.00
14.247 MHz - $5.00
14.300 MHz - $5.00
14.301 MHz - $5.00
14.335 MHz - $5.00
16.133 MHz - $4.00
16.293 MHz - $4.00 each

Order via web page at:
http://af4k.com/FT243_CRYSTALS_Originals.htm

Many other amateur radio crystals are available at:
http://af4k.com/crystals.htm

From: k0kn@...
Topic: 8355 Message: 8355

Hello,

I have a GTX portable 900 MHz for sale. H11WCD4CB1AN

Comes with antenna and aftermarket 2700 mAh li-ion battery. Asking $85 shipped CONUS

Contact me directly if interested.

Thanks,

Kyle Yoksh
K0KN
Olathe, KS

8356. For Sale: Icom FL-45

Yahoo group: ham4sale (2007 — 2015)
Date: 2014-10-09 13:10:44 UTC
From: na6mb.info@...
Topic: 8356 Message: 8356

I have an FL-45 filter
CW Narrow Filter (500 Hz / 6 dB) 9 mHz
for IC-730, 740, 745, R70, and many other Icom radios.

Found in my parts collection...
Looks new / unused, but I have no way to check it as I don't have my IC-730 anymore.

NA6MB
Mike

8357. VHF / UHF Antenna related items FS

Yahoo group: ham4sale (2007 — 2015)
Date: 2014-10-11 17:54:16 UTC
From: Ken Simpson, W8EK
Topic: 8357 Message: 8357

VHF and UHF Antenna related items For Sale:

Mobile Antenna Mounts:

Larsen LM-MM Mag Mount
This rectangular mag mount features an extremely strong
magnet. The center of the mag mount takes an Larsen LM
type antenna (5/16 inch stud). It includes coax for $18.

Round NMO Mag Mount
Black, 4 + inches in diameter, with coax. $24

BNC Mag Mount
Has BNC connector on the mag mount so you can add the
rubber duck from your HT.
Coax has BNC connector for your HT.
It permits one to get the HT rubber duck out of the
car for better performance. $22

Trunk Lip Mount
3/8 inch 24 thread stud, with coax. $10

Round Mag Mount for "Antenna Specialists" antenna
It uses the sort of reversed PL-259 type antenna that
was used for many years by Antenna Specialists.
With coax for $10.

Round Mag Mount
has 5/16 inch threaded connection, with coax $10.

White Round Mag Mount
1/4 inch threaded connection, with coax for $10.

Astatic "Mirror Mount" or "Roof Rack Mount"
Mounts to mirror or roof rack, and takes a PL-259 on one side,
and has a 3/8 inch 24 post for the mobile whip on the other.
Used for either HF or VHF/UHF antennas.
New, still sealed in the package. $12
As above, unused, but out of package. $10

Antenna Specialists Antenna Mounting Hardware:

All of the following hardware is NEW, unused, still in their
original boxes, with original paper work.

HM-66 Gutter Clip Mount
This gutter clip takes a standard 3/8 inch 24 thread antenna.
It includes coax. It is suitable for VHF/UHF antennas, but is

not rugged enough for HF antennas. NEW $15

K-221 NMO Trunk Lip Mount
This takes any of the NMO VHF or UHF type antennas. It is a
nice trunk lip mount, complete with coax. NEW $15

K-66 NMO Hole Mount
This takes any of the NMO type antennas. It is made to mount
in a 3/4 inch diameter hole, and includes coax. NEW $15

M-3 Ball Mount
This is a standard, heavy duty ball, suitable for use with HF
antennas, or VHF antennas requiring a 3/8 inch, 24 thread antenna.
NEW $15

ASC-3D Heavy Duty Ball Mount
Extremely heavy duty, Chrome plated, for 3/8-24 antennas. NEW $28

Mobile Antenna Springs:

These mobile antenna springs appear to be new. They are the chrome
plated type, and designed for light to medium duty use, i.e. use
on VHF type antennas, and not for heavy duty HF use.

These are about 3 inches long. I have some that are for 1/4 inch
diameter antenna mounts, some for 5/16, and some for 3/8 inch.
Please let me know what size you need.

These appear to be new, or at least unused.
They are $5 each.

Dual Band 2 m / 440 MHz Mag Mount Antenna:

This antenna has a very strong mag mount. The antenna itself is
a quarter wave antenna on 2 meters (unity gain), and provides a
couple db gain on 440 MHz. It seems to be very rugged, and even
has extra strain relief on the PL-259 coax connector. It is about
20 inches tall, including the mag mount.

This particular antenna appears to be new, unused. It is the black
color (not silver). $30

Hustler UHT-1, VHF / UHF mobile antenna:

The Hustler UHT-1 is 1/4 Wave Hole Mount Antenna.
It can be cut for any frequency from 136 to 500 MHz. It is low
profile, with a 3/4" hole required. Includes 15' coax and connector,
and is rated to handle up to 200 Watts of power. This particular
antenna is new, still sealed in its original shrink wrap package. $15

Larsen mobile antennas for NLA Mounts:

Both of these fit the Larsen NLA mounts.

Larsen NLA-150
This antenna provides about 3 db gain over a quarter wave,
and is a very rugged antenna, about 4 feet long. In very good
condition, it the fits Larsen NLA mounts.
Coil only $10
Coil with whip $17

Larsen NLA-UHF coil for 440 MHz
This is the coil only for NLA mounts, for use on the amateur
440 MHz band and UHF public service bands.
Good condition. $10

Cushcraft 4 element 124 WB, 2 meter beam:

The Cushcraft 124WB is a 4 element wideband boomer for 2
meters. It is the right choice for packet systems and
other applications requiring a dedicated directional antenna.

124WB Specifications:
Frequency: 144-148 MHz
Elements: 4
Gain: 10.2 dBi
Front To Back Ratio: 19 dB
VSWR 2:1 Bandwidth: 4 MHz.
Power: 2000 watts PEP
Longest Element: 41 inches (1.04 m)
Turning Radius: 8.8 Ft. (2.7 m)
Boom Length: 4 Ft. (1.22 m)
Wind Surface: 0.34 sq. feet
Connector: UHF (SO239)
Weight: 3 Lbs (1.6 kg)

This one is in extremely nice shape. No corrosion.
Only $75.

Coaxial Antenna Switches:

All work fine, look fine, and use SO-239 connectors.

B & W Model 550 A Coax Switch
This model will switch up to 5 antennas, and does NOT ground
unused antennas. Coax comes out the side, like spokes of a wheel.
It will handle the full legal limit. $35

SCP Comm Switch SC-40-AS Coax Switch
Three position antenna switch in rectangular box. Connectors on
the back. In original box. May be new. $24

Two position "Strip Line" Coax Switches:

These switches utilize metal cavity construction for max efficiency
and high isolation. Isolation is better than 50 dB at 300 MHz with
low insertion loss less. All are two position and are typically rated
for 2500 W PEP, and good to 600 MHz.

Diawa CS-201 - $20
Opek CX-201 - $20
MFJ 1702 C - With center position that grounds both antennas,
and added lightning protection. $25

Antennas for your HT:

All rubber ducks are for 2 meters, are in good
condition, and are $10 each, unless stated otherwise.

BNC - Dual Band (2 m and 440 MHz) Telescoping antenna
provides significant gain when extended, $18

BNC - As used on most HTs, 7 inches long

BNC - Original Alinco EA0024, about 4 inches long

BNC - Original from Kenwood TH-215, about 5 inches long

BNC - "Stubby" about 4 1/2 inches long

Type F connector - 6.5 inches long

BNC Stubby for 440 MHz, 3 inches long

Threaded (as used by Motorola, etc.) stubby for 440 MHz

Not a Rubber Duck, but can be used on your HT:
Telescoping Antenna w/ BNC about 19 inches long
can be used as a quarter wave antenna on 2 m,
or on 220, or 450 MHz if telescoped shorter. $12

I also have many other accessories available such as many
different types of microphones, HTs, HF, VHF and UHF rigs,
HF and VHF/UHF antennas, HF linear amplifiers, and many
other accessories.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

8358. FS: Icom 706MKII HF/6m/2m transceiver

Yahoo group: ham4sale (2007 — 2015)
Date: 2014-10-13 22:29:55 UTC
From: John Geiger
Topic: 7808 Message: 8358

I have for sale an Icom 706MKII in good condition-has a smudge on the top cover and a few scratches here and there but actually looks pretty good overall. The sides and face look good as well. .

This is the model that does 100 watts on HF and 6m and 20 watts on 2m. It comes with the hand mic and a short power cord. Works great-I have worked over 160 countries with it since January.

I am asking $450 plus shipping and can take paypal, check, or a MO.

I have a couple of Icom accessories for sale. Price includes shipping and I can take paypal/check/cash/mo. Here is what I have for sale:

1. MB-62 mobile mounting bracket for 706/7000/7100 and AT-180. Comes with 4 screws with the really large plastic heads that you can tighten by hand. Sells new for $39.95, asking $25.

2. OPC-589 mic adaptor, lets you use regular 8 pin round connector mic with radios that use a modular mic plug, like 706, 7000, 7100 and many FM mobile rigs. Sells new for $34.99, asking $22.

8360. Gear for sale

Yahoo group: ham4sale (2007 — 2015)
Date: 2014-10-15 00:21:28 UTC
From: Fred
Topic: 703 Message: 8360

Need to clean up again and get rid of gear that I just am not using:

1) I have an IC-706 MKII that I purchased well over 6 months ago(probably close to a year actually) and have not taken out of the box yet. The radio has power cable, mobile brackets, copied service and owners manual and original box. Touch tone microphone. Not sure of what if any filters are inside of it as I never fired the unit up, was sold to me in working condition.
Asking $600 plus shipping from Canada P7J1B9

2) TenTec Argosy 525D in great working condition, 5/50 watts. Used only on cw and no microphone with radio, never had one. $350.00 includes shipping from Canada P7J1B9

3) YouKits TJ5A brand new. Has accessories, microphone, battery and bolt on box as well as charger for battery. Also has the green radio bag. Receive on this radio is excellent. Output power on 10 meters is much lower as advertised as I believe BPF could have been better made and maybe relay switched. $400.00 includes shipping from P7J1B9

Please email direct if interested, prices are firm

From: John Geiger
Topic: 8361 Message: 8361

I am cleaning out the odds and ends from the ham shack and have the following items for sale. Prices include shipping in the US and I can take paypal/check/MO.

1. Right angle PL259 to SO239 adaptor-$6

2. Dualband 2m/440 SMA antenna 5 inches long-$6

3. A Hammond "New Comparative World Atlas", softcover book from 1998, and a Rand McNally Historical Atlas of the World The comparative world atlast contains political maps, and maps covering many other topics, like climate, standard of living, etc. total of 96 pages. The Historical Atlas of the World has 70 pages and includes maps covering many different time periods. Both are soft cover book.s Asking $12 for both.

4. A set of audio cables which includes: 1) A 54 inch cable with a 1/8" mono male plug on 1 end and a female 1/8" plug on the other end. 2) 1 coiled up cable with a female 1/8" plug on 1 end, bare on the other end. It is approximately 24 inches as is, obviously much longer if you uncoil it. Very tight coils on it, so probably several feet long in total. 3) 28 inch cable with male 1/8" stereo on one end, bare on the other end. 4) two cables that are 45 inches long, with male right angle 1/8" plug on 1 end, bare on the other end. 5) 13 inch cable with female 1/8" mono plug on 1 end, bare on the other end. 6) 10 inch cable with male 1/8" mono plug on 1 end, bare on the other end. I am asking $14.

Let me know what you can use.

8362. Items for Sale

Yahoo group: ham4sale (2007 — 2015)
Date: 2014-10-16 16:25:20 UTC
From: Bill Ockert - ND0B
Topic: 703 Message: 8362

Good morning,

I am doing some switching around in the shack and have the following items for sale:

1. ICOM IC-9100 with 1.2GHz unit. Radio is two years old, has never left the shack and as it was a backup radio has been used very little. New these are around $3500 with the 1.2G unit, not sure what to ask as these do not come up for sale often... Asking $2995.

2. HP 8568B Spectrum analyzer and matching HP 8444A Opt 59 tracking generator. Units were in good working order when taken out of service a few weeks ago. Going rate on the Analyzer appears to be $895 and the tracking generator (the Opt 59 is rare) around $495. I would go $1300 for the pair, somewhat negotiable. I would prefer not to ship so preference given to someone who can meet at a reasonable distance or make pickup arrangements.

3. DEMI L144-28HP high power (60W) 2m transverter with switched antenna RF, split IF and Apollo board set up for dual LO. This is band new never used. Current price from DEMI with these options is $814. Asking $725

4. DEMI L144-28INCK New, still in kit form. This is an intermediate transverter to use between 144MHz IF transverters and a 28 MHz radio. This version includes the enclosure. DEMI price is currently $195, Asking $175.

5. Hygain (as in before MFJ) Tailtwister 2 rotor. The control box on this has had the Idiom Press upgrade installed which in addition to adding computer control adds break delay, startup “jarr” and direction preselect. Rotor has been in the air about two years (it sat in my shop for several years which is why it is still Hygain manufacture) and looks like new. I have a 4 element Steppir with dual 30/40m loops and the Tailtwister was a bit outgunned on windy days so I replaced it with an M2. I will open and clean the direction indicator and make sure everything is fine. Asking $495.

The following item will be available once replacement radio is here...

6. Flex 5000A with 2nd RX, ATU and V/U unit. This has been my workhorse radio for 4 years. I use it on a daily basis and all seems good. With the V/U unit the radio covers 160M –6M (100W), 2M(75) and 432(50W). The 2m is especially good on this, I have worked a lot of 2m EME with no external preamp using just a single yagi. Price on these is all over the place... asking $2895.

If you would like to discuss an of these items please email me direct at nd0b@... or call me at 701.984.2520. All prices are plus shipping, PMO or Paypal (you pick up the fee) accepted.

I have for sale a Baofeng UV3r dualband (2m/70cm) HT. It actually is labeled a Main Trading Company (MTC) UX-4 but it is a Baofeng UV3R. I bought it a little over 2 years ago from MTC at the Oklahoma City hamfest. Still in mint condition with the plastic on the display. It comes with a good battery, antenna, and manual. It will need a charger, though. I am asking $20 shipped for it and can take paypal/check/MO.

From: bcarling@...
Topic: 8368 Message: 8368

FOR SALE:

CABLE LACING CORD...

I have some spools of new old stock, traditional waxed lacing cord; only a few left. They are
rather heavy since there is 500 yards of lacing cord per spool. It ought to last a long time...

The ones I had before were 200 or 250 yards and sold for $12 each. I need $14 per spool for these ones. When inquiring, please give me your ZIP Code so that I can calculate the shipping. (Better price than Paragear and twice as much.)

Please e-mail me OFF the list.

8370. FS: KLM 2-70BL 2m amp

Yahoo group: ham4sale (2007 — 2015)
Date: 2014-10-25 21:02:37 UTC
From: John Geiger
Topic: 8370 Message: 8370

I have for sale a KLM 2-70BL 2 meter amplifier. This is a CW/SSB/FM amp with 1-4 watts input for 70 watts out. It is in very good condition, and even comes with the original box, which is probably a rarity for KLM amps. It has a light duty power cord with it that you might want to replace with something a little heavier. The red LED lamp on the front (indicating power on) doesn't work, but the amp is putting out close to full power-my wattmeter isn't very accurate.

This would be a great amp for lower power rigs like the Icom 202, Yaesu FT817 or FT290R, or some HTs.

I am asking $55 plus shipping and can take paypal/check/MO.

73 John AF5CC

8371. FS: KLM 1977/9178 catalog

Yahoo group: ham4sale (2007 — 2015)
Date: 2014-10-26 03:37:49 UTC
From: John Geiger
Topic: 8371 Message: 8371

Now here is a real piece of ham radio history. A real blast from the past! A piece of real HF/VHF nostalgia. It is a KLM products catalog from 1977/1978. It contains details about their VHF/UHF transceivers like the 661 (6m), Multi2700 (2m and mode A) and Echo 70 (70cm) all mode rigs, their VHF/UHF amps, their HF and VHF antennas, and their rotors. It is in excellent condition for its age. Definitely a highlight piece for any collection from the 1970s.

I am asking $6 shipped and can take paypal/check/mo.

FOR SALE:

Bliley CCO - "Crystal Controlled Oscillator" = 6AG7 Crystal Oscilator Module

Here is a Very Cool Commerically built 6AG7 tube oscillator - great for the heart of a homebrew transmitter. Rare antique rom hte 1950s - long since discontinued.

This is a Bliley Co. gadget uilt on a little chassis with terminals for power and RF out. On the
front there is a nice Ceramic Millen Co. style ceramic crystal socket suitaqble for FT243 crystals.

There is a switch for selecting ranges for use at 27 - 30 MHz or 46 - 54 MHz.
Intended for VHF but with the change of one coil at the poutput this can easily
become be an HF oscillator.

Neat looking gray painted chassis with terminal strip in rear for all connections.
Excellent condition. Comes with all documentation. Complete with the 6AG7, tube - tested nandeworking.

Available for $25.00 plus shipping.

Date: 2014-11-04 15:44:37 UTC
From: John Geiger
Topic: 8380 Message: 8380

I have for sale an Icom 706MKII in good condition-has a smudge on the top cover and a few scratches here and there but actually looks pretty good overall. The sides and face look good as well. This is the model that does 100 watts on HF and 6m and 20 watts on 2m. It comes with the hand mic and a power cord.

It works great (I have worked over 160 countries with it since January) except for the VOX which rapidly switches between transmit and receive once you stop talking. I have tried to fix this with different settings for VOX gain and Anti-VOX but no luck yet.

This is a great rig if you can overlook the VOX issue. No DSP installed either. I am asking $425 plus shipping and can take paypal, check, or a MO.

From: bcarling@...
Topic: 8384 Message: 8384

FOR SALE:

Homebrew Single Tube 6DQ5 CW Transmitter and 120V AC Power Supply

This is a Single Tube transmitter but has room to be modified for additional separate oscillator stage.

RF final consists of a 6DQ5 tube with bandswitching RF tank for 80 through 10m.
PI NETWORK Output with quality air variable capacitors and a tapped EFJ or Heathkit 200 watt class tank coil. (I forget which!) Currently set to just run on 40m, but add rotary switch
and away you go on all bands.

Antenna switch-over is included with switch and SO239 connections for both RCVR and ANTENNA.

Front panel has a XMIT/RVC switch, Key jack 1/4" and crystal socket for FT243 crystals.

Uses top quality patrs laid out on a traditional cake pan chassis with matching power supply.

Power supply runs on 120V AC and has a stabilized 150V screen grid supply / LV supply. Supplies all needed power including 400V DC, 150V DC, 6.3V AC.

Transmitter is working but willl need some improvements to reduce chirp.

I used this in the recejnt WES event for single tube rigs and made some contacts with it. I had intended to add a 6AU6 osc stage.

Pictures available on request. Complete set up has all cables, includes the interconnetcing cable and all connections. You supply a key and crystal, or I will include a 40m ham band crystal for an extra $6.00

Will sell for $55.00 plus shipping

Pictures available - e-mail me with inquiries.

On Thu, Nov 6, 2014 at 2:55 PM, <gregcris@...> wrote:
Bry,
I'm interested in the pictures because I'm building a similar TX and I would like to see how did you arrange the components.
Initially, I used a 6DQ6B, getting 25W with 300 B+ and 150V at screen grid !!!
Then, after the prototype I'm putting everything into a salvaged box, but I changed to the bigger E130L power tube.
What's the power that your transmitter puts out?
I'm used to have regular QSOs with my group of friends,on CW, and I'mused to use the same frequencies -> then I'm building what should become my 'normal service' tx.
I put also a semi-break in circuit, made with a BD140+BD139 transistor: the antenna changeover relay is big and makes a lot of noise ;-), so it's better to turn it on when a thread of dashes and dots are sent, and turn it of in between words. Besides, I prefer keying all my homemade transmittersthrough a buffer relay, and I added one more relay thathandle the negative bias at control grid. This way ... I can have a more comfortable operation and, I hope, a smoother tone.
Chirp: use the LOWEST capacitor between control grid and cathode. In a Clapp oscillator, usually the G1-CATHODE tube capacitance is just fine. In case of chirp, go the MILLEN 90801 way: add a capacitive trimmer between G1 and CATHODE. The other capacitor, between CATHODE and GROUND (bypassing the cathode chocke), should be relatively high: in my 6DQ6 prototype, 500 pf were just good. I had no chirp, which is usually caused by Thermal drift of crystals, due to relatively high currents. FT-243 are practically chrip-less in my circuit.
By working as doubler, my TX puts out about 12-15 W, which is just according theory.

Please, send me your pictures: I would be very pleased to look at them.

73 and ... stay tubed!

FOR SALE:

Homebrew Single Tube 6DQ5 CW Transmitter and 120V AC Power Supply

This is a Single Tube transmitter but has room to be modified for additional separate oscillator stage.

RF final consists of a 6DQ5 tube with bandswitching RF tank for 80 through 10m. PI NETWORK Output with quality air variable capacitors and a tapped EFJ or Heathkit 200 watt class tank coil. (I forget which!) Currently set to just run on 40m, but add rotary switch and away you go on all bands.

Antenna switch-over is included with switch and SO239 connections for both RCVR and ANTENNA.

Front panel has a XMIT/RVC switch, Key jack 1/4" and crystal socket for FT243 crystals.

Uses top quality patrs laid out on a traditional cake pan chassis with matching power supply.

Power supply runs on 120V AC and has a stabilized 150V screen grid supply / LV supply.
Supplies all needed power including 400V DC, 150V DC, 6.3V AC.

Transmitter is working but willl need some improvements to reduce chirp.

I used this in the recejnt WES event for single tube rigs and made some contacts with it.
I had intended to add a 6AU6 osc stage.

Pictures available on request. Complete set up has all cables, includes the interconnetcing cable and all connections. You supply a key and crystal, or I will include a 40m ham band crystal for an extra $6.00

Will sell for $55.00 plus shipping

Pictures available - e-mail me with inquiries.

8388. For Sale: UHF Motorola XPR7550 Portable Radio

Yahoo group: ham4sale (2007 — 2015)
Date: 2014-11-11 19:33:10 UTC
From: w2gld@...
Topic: 8388 Message: 8388

For Sale:

Mint condition, Motorola XPR7550 (Model# AAH56RDN9KA1AN) 1-4 Watt 403-512 MHz portable radio package, with PMNN4409 Hi-cap 2150 mAh battery option and full bluetooth data package.

The package includes the following, in addition to what the radio normally comes with:

1 spare Motorola PMNN4409 Hi-cap 2150 mAh battery pack 1 spare Motorola PMLN7008 belt clip for the spare battery pack 1 Motorola PMMN4024A Remote Speaker-Mic HKVN4088 MotoTRBO Data Transfer via Bluetooth EID license (already installed in the radio) The bluetooth data option is so the radio can be used as a modem when connected to an external computer.

The radio is running the latest firmware and has been tuned and aligned to factory specifications. This unit was used for testing only and has not been used in the field. Photos available upon request as well; but the radio is basically brand new 10 out of 10. I have two of these that I will be selling in the coming weeks, as well as several other DMR related items.

Price is: $750 plus shipping, U.S.P.S. Money Order Only

Interested parties, please contact me off the board at: W2GLD@arrl.net

Thanks,

Jerry, W2GLD

From: John Geiger
Topic: 8389 Message: 8389

I have for sale the programming cable and software for the Icom 706 series of radios, and will probably work on the 703 and 7000 as well. Plugs into a USB jack on the computer. Asking $22 shipped.

I also have an Icom HM-103 hand mic for the 706 and 703 series of radios. Get reports that the audio is a little bassy on it, but perfectly understandable. Asking $21 shipped.

I can take paypal/check/MO/cash for each item.

8395. Trade: RS Pro-92 Scanner for SW-capable Receiver

Yahoo group: ham4sale (2007 — 2015)
Date: 2014-11-15 03:38:52 UTC
From: qrv@kd4e.com
Topic: 8395 Message: 8395

I need a SW-capable receiver for a home-bound elderly
friend.

It needs to have an easily read display, decent sensitivity
and selectivity, external antenna connection, handle AM & SSB,
and not be huge - but doesn't have to be tiny either - nor
cosmetically perfect.

I will make a direct trade of my RS Pro-92 scanner - which
works fine, includes two AA holders, DC wallwart, ant, etc.
(Has mod to DC port - a short dongle vs jack because the
jack was intermittent.)

500-Channel Portable Trunking Scanner
29-54, 108-174, 380-512, 806-960MHz ranges
Scan rate 25cps 5, 12.5kHz steps
Multi-mode trunking (Motorola I/II/IIi, EDACS, LTR)

Lots of documentation here:
http://support.radioshack.com/support_electronics/56346.htm

We each pay shipping to one another.

8401. FS: Baofeng HT accessories package

Yahoo group: ham4sale (2007 — 2015)
Date: 2014-11-22 21:29:36 UTC
From: John Geiger
Topic: 8401 Message: 8401

I have for sale a few Baofeng HT accessories that fit the UV5R, F8+ and probably a few other Baofeng HTs. Here is what I have available:

1.USB02 USB cable and programming software (9.95 new)
2. Speaker mic (9.95 new)
3. Cigarette lighter adapter-replaces battery-plugs into cigarette lighter (9.95 new)
4. SMA/BNC jumper cable, to use your HT with an outside antenna (not sure of new price)

All seem to work fine, but I haven't tried out the software. Asking $25 shipped for all. Can take paypal/check/MO.

8414. WTB: HF Amplifier $600-700

Yahoo group: ham4sale (2007 — 2015)
Date: 2014-12-04 15:57:54 UTC
From: Daniel Hileman
Topic: 8414 Message: 8414

Hi All,
I am still looking for an HF amp in the $600-700 range. Like an AL-811H, SB-220, L4b, SB-1000 etc...what do you have? Prefer something within 200mi of Dallas, TX if able so dont have to ship, but will consider shipping if need be. Email is best way to make initial contact.

Thanks and 73,Dan N9WX

8415. FOR SALE: Timewave ANC-4 Noise Cancellation

From: bcarling@...
Topic: 8415 Message: 8415

FOR SALE:

Timewave ANC-4 Noise Cancelling unit in excellent unused condition. Like new.
These are normally selling for $190.00 - at HRO for example.
They work great for knocking down noise.

Mine is available for $125.00 plus shipping.

See http://www.timewave.com/support/ANC-4/anc4.html

8417. Large for sale text

Yahoo group: ham4sale (2007 — 2015)
Date: 2014-12-07 05:02:58 UTC
From: Chris Boone
Topic: 8417 Message: 8417

The following is for sale (If price is not listed, am taking best SERIOUS offer-If price IS listed, will haggle so donot be afraid to make a SERIOUS offer!). PLEAS READ the reply info at the end. DO NOT reply to this address!

Shipping NOT included on items below and those marked * would PREFER local pickup in SE Texas ONLY (thanks):

Kenwood TKR-750 V2 VHF repeater in excellent condition. Will include rack mounted commercial split (NOT ham 600kHz split) duplexer for those wanting to use it in commercial band; can tune for additional fee with IFR1500 svc monitor): $700 obo
(Duplexer and others also available separately...contact direct for more info)

Several Kenwood TK880 UHF mobiles. LTR and conventional. Some are tuned down to 440-460. Others are 443-464 RX/448-469 TX. Can program for your needs for extra amount. Have mics and power cords for most. MAYBE a bracket or two with them. $90 OBO

National NC300 HF ham receiver. Comes with external spkr case with rare 6, 2 and 220 converters! Status of unit unknown at this time but in great shape (some dust but don't see any dents or blown components). Have NO variac to test correctly and will NOT plug in and turn on in case there is a problem. The wiring, etc all looks good and all controls are easably moved and seem solid. Does have the calibrator option in it as well. Again, no idea as to status of unit. $125 obo (WILL NOT SHIP due to size and weight)

Heath HA-10 Warrior HF 1KW amplifier. In great shape and WORKS great. 1KW out into dummy load last time it was tested. 811 tubes. COULD ship but it wont be cheap (would double cost). This unit does NOT have a TR relay for transceiver use but you could add one easily if you know your stuff. $300 OBO
IF you pick up, will drop price for appreciation of not having me to pack and ship it!! :)

*Two Leibert 3000VAC rack mount UPS systems. Need batteries changed but in excellent and working shape when removed from service. $300 each obo.

*WACOM WP604 BpBr lowband duplexer (currently on 48/49 MHz) can be moved up to 6 with a little work (info is on the internet!) This model is the lowband version of the WP641 2m duplexer. FOUR 8inch diameter cans....complete with notch stubs and harness. NEw they cost over $2000!!! Since this one is not in the 6m band now and would require some easy work to move it there, will accept $1000 for it (but thats about it!). NO SHIPPING unless you pay for crate and shipper. Can provide spec sheet and a picture of it (it is in storage right now and hard to get to for picture..but I think I have a few already..if not, WILL take a picture of it for you!)

*WACOM WP-652 220 Mhz duplexer; excellent shape and excess to my needs. Does have ub missing but have replacement but it has wrong connector on it. Debated whether to modify stub with correct connector or use an adaptor. Either way, it would work according to other Wacom owners (and I knew Kit Parons of WACOM personally...so I KNOW the product line quite well. Sold a lot of them in the 70s-80s for Kit in SE TX and other areas). $400 OBO

*DP Products 216-225 duplexer: originally made for the 216-220 IWCS system. Works even better on the 222-225 ham band. I think I have two but can only find one right now. Offering tuned to your frequency for additional costs. $400 OBO

Several Midland 13-509 boards and radios: Asking $125 for complete radio with crystals; $50 per board or partial radio (which makes nice 220 repeaters)

LOTS of GE MVP radios...VHF and UHF (mostly Us)..some 100% intact and mint shape with power supply included (shipping extra on those). Others partial or parts radios...make offer!!!

Midland 70-530B 430-470MHz UHF 30w mobiles. GREAT for links, etc. Tune to 430 with NO problem for linking and other uses (packet...can be moded for 9600 baud operation!)..have approx 18 total. 14 of them are complete; the rest have messed up faceplates BUT do work ok. For full duplex links, put two at the site; one TX and one RX but programmed for opposite mode as well...that way, a failure means a simple cable swap and the link is back up!! With 80 channels programmable, you can put every link frequency in your system in these with room to spare...also make a nice portable emergency rptr with selectable channels. Asking $30 each.
Comes with Mic, bracket, power cable. Will do a special on ALL of them bought as package!! (in fact there are already boxed for shipping...so one less thing to deal with..in 4 separate boxes now).

*GE MSTR II VHF and UHF rptr/stations...one 45w UHF (untested but in CLEAn shape) and 110w VHF (last checked would PEG a 150watt meter!!)...VHF works but was moving rcvr from 156 to 146 channel and rcvr quit (could be the xtal was too low for the LO chain..the 156 rcv worked fine)..I dont have time and the project was shelved. These are in EXCELLENT condition...PREFER NOT to ship as they are big and bulky...but want just the PAs or parts? We can talk.

*Same for a Motorola 100w VHF Micor in slim upright cabinet. Rcvr and Xmtr work but PA has intermittant issue (likely a crack on the board in the chain somewhere...when it IS working, puts 120w out. Interested?

*DB201 lowband groundplane antenna currently in 48Mhz range. GREAT antennas for 6m FM use..can take direct lightning hits and keep on going. all stainless hardware and SOLID AL elements. $50 each OBO (these are NOT cheap ham antennas!)

DB224 and DB264 in the 150-160Mhz range; alas the company redoing the roof where they were mounted had cut the mast right above the top clamp...so the mast are little short (would be great for UHF DB410/420 models or 220MHz versions). The DB264 has its harness cut at the very bottom dipole. Otherwise are in great shape. hate to scrap these when some group with some time and a little work can save a WHOLE bunch of $$ with these...or may find other uses for the masts (which these are the OLDer THICKER ones that DONT bend!!!) *100 each OBO NO SHIP due to length of course

*DB408-B NEW......yes, NEW covers 440-470MHz...4 bay, 6db omni or 9db elliptical...$250 (these retail for over $400 from dealers..and I are one!)....like I said above, will haggle but on NEW??, not much.

TWO ACC SM-100 Shackmaster100s; V 1.7 firmware (last offered for this model) and manuals. One is missing part of one front panel pushbutton (a $4 replacement from Mouser or Digikey). Used them with my Kenwood TS680 as a remote base on 160-6m...excellent shape.

$150 each OBO (cmon, make a discount for a missing $4 button and switch??? OK, I will...that unit I will take $10 off price)...buy both and get another 10% off! hate to part with them since they work sooooo well but the TS680 is no longer primary radio and the SM100s dont talk well to anything other than Kenwoods. Tied to a TS2000, you have a better thing than Kenwoods own SkyCommand...since SM100s allow phone dial up control as well as RF radio control.

One LinkComm RLC3 with 3 audio cards. Unit has V2.15 in it and has been modifed for flat audio use (can still be used on de/pre phasized systems with no issue) $800

Knight T60 xmtr...ok, looks in good condition $40 OBO

Midland 13-513 220 MHz mobile....meter sticks but that can be easily fixed..needs top cover touched up on paint...NO bottom kickstand for it....have mobile bracket somewhere but no guarantee I can find it now..if I do,its included for free OR will be shipped you to for free later! $150

ICOM IC38 220 MHz mobile..mic and power cable....$150

and MORE to come.......

Still inventorying all the gear in storage for this massive sell...the storage units and gear/feedline/antennas/telecom gear, etc all MUST GO!!! I have a LOT of Heliax, radios, parts, accessories, etc. for sale (mostly 7/8 Andrews but some other sizes and brand...contact direct if interested)...but NONE will ship.

One last mention in this post: Motorola LOWBAND VHF 330 watt PA from base MICOR...this uses the 4CX250B type tubes from Motorola (INCLUDED!)...needs about 20w drive for max out..was going to use it as a rptr but have GE MSTR IIe for that (and thats available for sale as well! IN MINT condition and includes programming software for the MIIe/III CPU shelf!!) The PA MAY be able to be modified for SSB use....I CANNOT swear to it...but, its worth a shot to those who know this box...330w CONTINUOUS output...NOW I do have the PS for it...which weighs 5x more than the PA itself...so NO, no no NO shipping on this..pick up ONLY..Want the tubes and not the PA or PS?? OK....make offer...SERIOUS offer....

Have more to post as I complete inventory.....hate to see this go to scrap..but I have no more need for it and this time, its goes!!!! (The cabinets for the MICORs I have which are rusted, etc are going to scrap this or next week....they are heavily rusted and not worth the effort...the RF decks, one a 35MHz PURC and the other lowband 48MHz , are so so...I would not bother with them UNLESS you really have to have Motorola....

Email me at ChristopherBoone@Earthlink dot net. I do not WANT this inbox being flooded with offers and requests. The Christopherboone inbox is empty so any replies will be noticed as soon as I log in.

Thank you for your cooperation!

8426. FS/Trade: Tower - 38' Crank-Up/Tilt-Over, A3S Beam, Ham-II

Yahoo group: ham4sale (2007 — 2015)
Date: 2015-01-01 16:43:30 UTC
From: qrv@kd4e.com
Topic: 8426 Message: 8426

This is a complete setup less the three base mounting bolts
and, of course, the concrete base you'll need to pour.

US Tower TX438 (38' Tower, 21' nested)

US Tower TX80 Tilt Fixture

US Tower Thrust Bearing

US Tower CX-2 Coax arms

US Tower 10' .12 Mast

Cushcraft A3S 20-15-10 beam

CDE Ham-II Rotator/CD-44 Controller

Fulton KX-1550 Raising Winch

Coax & rotator cable.

Original manuals for most.

It's clean but you'll want to do the usual maintenance.

New it adds up to 4400 plus taxes and shipping.

ASKING $1450. and will deliver within the Atlanta, Charleston,
Savannah, Jacksonville, Macon area.

OR, will consider trading it for an Ameritron ALS-600 w/PS
in very good cosmetic and electrical condition (will consider
other 160-10m HF amps, no sweep tubes) or an as-new ICOM IC-7200
plus cash.

Picture on request (most of it is sitting on my trailer).

8427. Wanted: EE-3 antenna

Yahoo group: ham4sale (2007 — 2015)
Date: 2015-01-02 16:27:36 UTC
From: Ray Brown
Topic: 8427 Message: 8427

I'm looking to see if anyone has one of these little emergency-type
base antennas for sale. This is basically a ground-plane antenna
that you adjust all 4 radials and the driven element to the frequency
you want to be on, 2m, 220, or 440. We gave one away at our club's
annual Christmas party, we got it from a vendor that attended our
hamfest (Joplin, MO) back in August. No one remembers which
vendor we got it from! I would like to get one so that I can demonstrate
it for an upcoming local ARES meet.

Drop me a note off the list at kb0stn@.... Thanks!

Ray, KB0STN

8428. Uniden HR2510 10 meter radio for repair or parts

Yahoo group: ham4sale (2007 — 2015)
Date: 2015-01-02 23:17:30 UTC
From: John Geiger
Topic: 8428 Message: 8428

I have available today a Uniden President HR2510 10 meter all mode radio. It doesn't fully work, though. The display lights up but there is no readout on the display. When I hook an antenna to it the background noise increases so it is receiving something, but with no display, I don't know what frequency it is on. It comes with a handmic, but it doesn't seem to go into transmit, either when I press the PTT button, or push the TX button on the front panel.

It is in pretty good condition physically, and comes with a hand mic, power cord, mobile bracket and manual. I believe this is the same as the Radio Shack HTX100 so it might work as a parts unit for those models also.

Not sure what it is worth, make an offer. I can take paypal/cash/mo, or trades.

8433. Antenna Related Items FS

Yahoo group: ham4sale (2007 — 2015)
Date: 2015-01-06 18:09:35 UTC
From: Ken Simpson, W8EK
Topic: 8433 Message: 8433

Antenna related items For Sale:

Antenna Books:

All are paper back, in nice condition.

The ARRL Antenna Book - 13th Edition - 1974
Close to new condition - $12

The ARRL Antenna Book - 14th Edition - 1984
Close to new condition, although some yellowing of pages, $12

The ARRL Antenna Book - 17th Edition - 1994
Several inches thick! - $18

Antennas - Selection, Installation, and Projects
Published by Radio Shack - 3rd Edition by Evans and Britain - $6

UHF Antennas, Converters, and Tuners by Milton Kiver
Sams Book - $10

Mobile Antenna Mounts:

Larsen LM-MM Mag Mount
This rectangular mag mount features an extremely strong
magnet. The center of the mag mount takes an Larsen LM
type antenna (5/16 inch stud). It includes coax for $18.

BNC Mag Mount
Has BNC connector on the mag mount so you can add the
rubber duck from your HT.
Coax has BNC connector for your HT.
It permits one to get the HT rubber duck out of the
car for better performance. $22

Trunk Lip Mount
3/8 inch 24 thread stud, with coax. $10

Round Mag Mount for "Antenna Specialists" antenna
It uses the sort of reversed PL-259 type antenna that
was used for many years by Antenna Specialists.
With coax for $10.

Round Mag Mount
has 5/16 inch threaded connection, with coax $10.

White Round Mag Mount
1/4 inch threaded connection, with coax for $10.

Astatic "Mirror Mount" or "Roof Rack Mount"
Mounts to mirror or roof rack, and takes a PL-259 on one side,
and has a 3/8 inch 24 post for the mobile whip on the other.
Used for either HF or VHF/UHF antennas.
New, still sealed in the package. $12
As above, unused, but out of package. $10

Antenna Specialists Antenna Mounting Hardware:

All of the following hardware is NEW, unused, still in their
original boxes, with original paper work.

HM-66 Gutter Clip Mount
This gutter clip takes a standard 3/8 inch 24 thread antenna.
It includes coax. It is suitable for VHF/UHF antennas, but is
not rugged enough for HF antennas. NEW $15

K-221 NMO Trunk Lip Mount
This takes any of the NMO VHF or UHF type antennas. It is a
nice trunk lip mount, complete with coax. NEW $15

K-66 NMO Hole Mount
This takes any of the NMO type antennas. It is made to mount
in a 3/4 inch diameter hole, and includes coax. NEW $15

M-3 Ball Mount
This is a standard, heavy duty ball, suitable for use with HF
antennas, or VHF antennas requiring a 3/8 inch, 24 thread antenna.
NEW $15

ASC-3D Heavy Duty Ball Mount
Extremely heavy duty, Chrome plated, for 3/8-24 antennas. NEW $28

Mobile Antenna Springs:

These mobile antenna springs appear to be new. They are the chrome
plated type, and designed for light to medium duty use, i.e. use
on VHF type antennas, and not for heavy duty HF use.

These are about 3 inches long. I have some that are for 1/4 inch
diameter antenna mounts, and some for 3/8 inch.
Please let me know what size you need.

These appear to be new, or at least unused.
They are $5 each.

Dual Band 2 m / 440 MHz Mag Mount Antenna:

This antenna has a very strong mag mount. The antenna itself is
a quarter wave antenna on 2 meters (unity gain), and provides a
couple db gain on 440 MHz. It seems to be very rugged, and even
has extra strain relief on the PL-259 coax connector. It is about
20 inches tall, including the mag mount.

This particular antenna appears to be new, unused. It is the black color (not silver). $30

Hustler UHT-1, VHF / UHF mobile antenna:

The Hustler UHT-1 is 1/4 Wave Hole Mount Antenna.
It can be cut for any frequency from 136 to 500 MHz. It is low profile, with a 3/4" hole required. Includes 15' coax and connector, and is rated to handle up to 200 Watts of power. This particular antenna is new, still sealed in its original shrink wrap package. $15

Hustler "Double Talk" Phasing Harness:

Back in the 1970's, Hustler sold a harness of coaxial cable that they called a "Double Talk Harness". It was used to connect to two mobile ball mounts, each of which would have an antenna for the same band. In theory, they would be phased such that there was about 3 db gain, but the reality is that they really shined by reducing QSB, in effect acting as a sort of diversity system.

This phasing harness looks fine and works fine. $17

Heavy Duty Mobile Antenna Ball and Spring:

This is an extremely heavy duty mobile ball mount designed for heavy HF antennas. Also included is a very heavy duty spring. Both are stainless steel. This is NEW, still in its original package, complete with paper work and all hardware. $50

Quick Disconnects
Hustler QD-1, stainless steel, still sealed in package. $18
Lakeview set of four top portions, and one lower portion, often used with Hamsticks. Like new. $24

Hustler RSS-2, Stainless steel resonator spring
Appears to be unused. No blemishes. $10

Astatic "Mirror Mount" or "Roof Rack Mount"
Mounts to mirror or roof rack, and takes a PL-259 on one side, and has a 3/8 inch 24 post for the mobile whip on the other.
Used for either HF or VHF/UHF antennas.
New, still sealed in the package. $12
As above, unused, but out of package. $10

Larsen mobile antennas for NLA Mounts:

Both of these fit the Larsen NLA mounts.

Larsen NLA-150
This antenna provides about 3 db gain over a quarter wave, and is a very rugged antenna, about 4 feet long. In very good condition, it the fits Larsen NLA mounts.
Coil only $10
Coil with whip $17

Larsen NLA-UHF coil for 440 MHz
This is the coil only for NLA mounts, for use on the amateur
440 MHz band and UHF public service bands.
Good condition. $10

Cushcraft 4 element 124 WB, 2 meter beam:

The Cushcraft 124WB is a 4 element wideband boomer for 2
meters. It is the right choice for packet systems and
other applications requiring a dedicated directional antenna.

124WB Specifications:
Frequency: 144-148 MHz
Elements: 4
Gain: 10.2 dBi
Front To Back Ratio: 19 dB
VSWR 2:1 Bandwidth: 4 MHz.
Power: 2000 watts PEP
Longest Element: 41 inches (1.04 m)
Turning Radius: 8.8 Ft. (2.7 m)
Boom Length: 4 Ft. (1.22 m)
Wind Surface: 0.34 sq. feet
Connector: UHF (SO239)
Weight: 3 Lbs (1.6 kg)

This one is in extremely nice shape. No corrosion.
Only $75.

Coaxial Antenna Switch:
SCP Comm Switch SC-40-AS Coax Switch
Three position antenna switch in rectangular box. SO-239 connectors
on the back. In original box. It looks to be new. $22

Antennas for your HT:

All rubber ducks are for 2 meters, are in good
condition, and are $10 each, unless stated otherwise.

BNC - Dual Band (2 m and 440 MHz) Telescoping antenna
provides significant gain when extended, $18

BNC - As used on most HTs, 7 inches long

BNC - Original Alinco EA0024, about 4 inches long

BNC - Original from Kenwood TH-215, about 5 inches long

BNC - "Stubby" about 4 1/2 inches long

Type F connector - 6.5 inches long

BNC Stubby for 440 MHz, 3 inches long

Threaded (as used by Motorola, etc.) stubby for 440 MHz

Not a Rubber Duck, but can be used on your HT:
Telescoping Antenna w/ BNC about 19 inches long
can be used as a quarter wave antenna on 2 m,
or on 220, or 450 MHz if telescoped shorter. $12

I also have many other accessories available such as many
different types of microphones, HTs, HF, VHF and UHF rigs,
HF and VHF/UHF antennas, HF linear amplifiers, and many
other accessories.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

8434. HT antennas for sale

Yahoo group: ham4sale (2007 — 2015)
Date: 2015-01-09 03:10:53 UTC
From: John Geiger
Topic: 8434 Message: 8434

I have a couple of dualband HT antennas for sale, perfect for the Baofeng UV-3R, Yaesu VX2R/VX3R mini HTs as they have the SMA male connector on them, and are longer (and work better) than the stock antennas for these HTs. Of course they will work on any other dualband (2m/70cm) HT as well.. Either one is $12 shipped. Here is what I have:

1. A 6.5 inch long one, that is rather stiff, and I believe it is the stock antenna for a Radio Shack HTX-420.
2. An 8 inch long one, more flexible, but not one of the very thin whips. Has a nice metal base on the bottom.

Let me know if you are interested in one of these. I can take paypal/check/MO.

8437. Kenwood HT accessories for sale

Yahoo group: ham4sale (2007 — 2015)
Date: 2015-01-15 02:01:46 UTC
From: John Geiger
Topic: 8437 Message: 8437

I have the following HT accessories available for Kenwood HTs:

1. Kenwood PG-3J cigarette lighter cable (36.95 new) asking $23
2. Kenwood SMC-34 Speaker/mic with remote and volume control (31.95 new) asking $22
3. Comet HT-224 2m/222/440 triband HT antenna, great performance increase over stock antenna (42.95 new) asking $30
4. Maha PH-42L aftermarket LiON battery packs for Kenwood TH-F6A, hold a good charge, asking $20
5. Dualband 2m/440 8 inch long HT antenna, increased performance over stock antenna, thinner whip than stock also, Asking $12
6, SMA male/BNC female adaptor, asking $6
7. SMA male/SO239 adaptor, asking $6

Prices include shipping, I can take paypal/check/MO/cash.

73 John AF5CC

8438. Kenwood TH-F6A triband HT (2m/222mhz/70cm) for sale

Yahoo group: ham4sale (2007 — 2015)
Date: 2015-01-15 16:53:10 UTC
From: John Geiger
Topic: 8438 Message: 8438

I have for sale a Kenwood TH-F6A Triband HT in excellent condition. It covers 2m/222mhz/70cm with wideband receive. There are 2 things about this HT that makes it different than any other HT out there:

1. It is the only multiband HT that does 5 watts on 222mhz. The Yaesu VX6/7/8 HTs only do 1.5 watts or less on 222.

2. It not only receives AM/FM, but it also receives SSB and CW. You can use it to listen to the HF bands while you are away from the shack, or use it for a satellite downlink rig for FO29/AO7/AO73.

It also does dual receive, including dual inband receive. Has built in VOX, AM and FM broadcast bands receive, including a built in bar antenna for the AM broadcast bands and lower HF bands.

It comes with the stock antenna, box, charger, manual, and 3 batteries! These are all Lion, long life batteries.

I am asking $230 for this nice package plus a little for shipping. I can take paypal/check/MO/cash. Trade offers always considered.

8439. WTB: 70cm all mode radio

Yahoo group: ham4sale (2007 — 2015)
Date: 2015-01-18 20:45:39 UTC
From: John Geiger
Topic: 8439 Message: 8439

I am looking for a 70cm all mode radio to use on the satellites and UHF contesting/DXing. Something like a Kenwood TR9500, TR851, TS811, TS780, Icom IC451, IC490, IC471, or Yaesu FT780, FT790R2, or FT726 would be fine. Let me know the price shipped to Lawton, OK-zip 73507.

73 John AF5CC

8440. FS: Icom 706MKIIG HF/6m/2m/70cm transceiver

Yahoo group: ham4sale (2007 — 2015)
Date: 2015-01-20 03:35:01 UTC
From: John Geiger
Topic: 8440 Message: 8440

I have for sale a very nice condition Icom 706MKIIG HF/6m/2m/70cm transceiver, with mic, extra long power cord, manual, and box. This is the model that does 100 watts on HF and 6m, 50 watts on 2m, and 20 watts on 70cm. Has built in DSP, built in keyer, and built in SWR meter (only functions on HF and 6m, though).

Rig works fine,looks really good also. I am asking $560 shipped for it in the US and can take paypal/check/MO. Buy it now and have it in time for the January VHF contest this weekend.

You can check my ebay feedback at (af.5cc) and also my feedback on QTH.COM.

73 John AF5CC

8441. FS: Icom FL100 500hz CW filter

Yahoo group: ham4sale (2007 — 2015)
Date: 2015-01-20 15:54:47 UTC
From: John Geiger
Topic: 7982 Message: 8441

I have for an Icom FL100 500hz CW filter, which fits in the following Icom models: 706 series, 725, 726, 728, 729, 736, 737, 738, 746, 756, 761, 765, 775, 781. Comes in its original box.

This is the 9mhz IF filter and will NOT work in the 703/707/718 series of radios.

These sell new for $120. I am asking $70 which includes shipping in the US. I can take paypal/check/MO.

73 John AF5CC

8442. Icom accessories for sale

Yahoo group: ham4sale (2007 — 2015)
Date: 2015-01-19 23:02:35 UTC
From: John Geiger
Topic: 8442 Message: 8442

I have for sale the following accessories for the Icom 706 and Icom 703 series of radios. Prices include shipping in the US and I can take paypal/check/MO. Here is what I have:

1. Icom FL100 500 hz CW filter. Fits many other Icoms as well. Sells new for $120, I am asking $70 and comes with the original box.

2. Icom HM-103 electret condensor mic. This is the stock mic for the 706 and 703 series radios, and would probably work with other Icoms with the RJ45 moduler plug on them. Sells new for $80, I am asking $40.

3. Icom HM-95 Electret mic with touch tone pad. Has RJ45 plug on end. Works fine with Icom 706, and probably many other radios. Comes with the original box. Asking $40.

4. Comet CF-360B Diplexer. Has a lead with PL259 on common port, and SO239 connectors on HF (1.8-30) and VHF (49-470mhz). Great for using separate HF and 6 meter antennas with the 706/703, or other combinations. Sells new for $70, asking $40.

Let me know if you are interested in any of these.

73 John AF5CC

8443. FS: Icom HM-103 hand mic (stock mic for 706/703)

Yahoo group: ham4sale (2007 — 2015)
Date: 2015-01-22 17:14:22 UTC
From: John Geiger
Topic: 8443 Message: 8443

I have for sale an Icom HM-103 electret condensor mic. This is the stock mic for the 706 and 703 series radios, and would probably work with other Icoms with the RJ45 moduler plug on them. The mic is in excellent condition and the tab on the RJ45 plug is intact.

Sells new for $80, I am asking $40 shipped and can take paypal/check/MO.

73 John AF5CC

8444. FS: SMA/BNC adaptor and HT headset

Yahoo group: ham4sale (2007 — 2015)
Date: 2015-01-26 14:02:02 UTC
From: John Geiger
Topic: 8444 Message: 8444

I have the following HT accessories available for HTs:

1. MFJ single ear headset for Kenwood/Wouxun HTs. Has PTT button on it or can be used with VOX for hands free operations. (24.95 new) asking $15

2. SMA male/BNC female adaptor, asking $6

Prices include shipping, I can take paypal/check/MO/cash.

73 John AF5CC

8445. FS: Radio Shack HTX-10 10 meter transceiver

Yahoo group: ham4sale (2007 — 2015)
Date: 2015-01-27 03:28:52 UTC
From: John Geiger
Topic: 8445 Message: 8445

I have for sale a Radio Shack HTX-10 10 meter SSB/AM/FM transceiver with the mic and power cord. Made a few QSOs on it and received my own downlink signal from Oscar 7 with it as well, so it hears well. According to my MFJ 941D wattmeter it is putting out around 35-40 watts.

It looks well used, scratches on it, a somewhat dirty case, and it is missing the 2 button. That is only needed for the call channel and memory #2. The previous owner is supposed to be sending it to me, but haven't seen it yet. I will mail it to you if/when I get it.

As stated, this rig isn't much of a looker, worn case, some of the knobs are work, but seems to work fine, so I will price it accordingly. I am asking $75 shipped in the US and can take paypal/check/MO. Can send pictures upon request also.

73 John AF5CC

8446. Shakespeare Big Stick CB/ antenna

Yahoo group: ham4sale (2007 — 2015)
Date: 2015-01-27 18:59:55 UTC
From: erikavont@...
Topic: 8446 Message: 8446

This is a used Big Stick three piece, screw together, CB base antenna. It's in good condition, and has been stored in the garage the last ten years. Uses an SO-239 on the bottom to feed. I'd think you could use this antenna on both 12 and 10 meters with a tuner.

You'll need a simple plate with 4 U-Bolts to mount to a mast. Email to discuss, Erika KØDD.

8447. Mirage B23 amp for sale

Yahoo group: ham4sale (2007 — 2015)
Date: 2015-01-28 14:08:41 UTC
From: John Geiger
Topic: 8447 Message: 8447

I have for sale a Mirage B23 (brown face, pre MFJ) 2 meter amp for sale, if anyone is looking to give their HT or 10 watt 2m rig a boost. It does both FM and weak signal modes (CW/SSB), and takes 2-10 watts in for 30-35 watts out. SO239 connectors for both input and output. Works fine, just picked up a higher powered 2m amp.

I am asking $30 plus shipping. I can take paypal/check/MO.

73 John AF5CC

8448. Baofeng UV-3R package for sale (3 HTs)

Yahoo group: ham4sale (2007 — 2015)
Date: 2015-01-29 17:20:26 UTC
From: John Geiger
Topic: 8448 Message: 8448

I have for sale a set of 3 Baofeng UV-3R Plus HTs for sale. One is brand new, just arrived yesterday, and powered on to make sure it worked ok (it does). It comes with all the stock accessories, including charger, antenna, box, manual, earphone-just like new. The other 2 UV-3R pluses are used, but in very good condition and work fine also. They both have good batteries and antennas. They both say that they are 3 watts on the serial number label.

I only have 1 charger for the 3 radios, that is why I am selling them as a set-but I could be persuaded to sell 1 of them by itself without the charger.

I also have a programming cable to go with the set. I am asking $80 shipped in the US for the set and can take paypal/check/MO.

73 John AF5CC

8449. FS: Baofeng UV3R dualband HT

Yahoo group: ham4sale (2007 — 2015)
Date: 2015-01-29 18:06:09 UTC
From: John Geiger
Topic: 8367 Message: 8449

I have a Baofeng UV3R 2m/70cm 2 watt HT for sale. It comes with the battery, charger, and a slightly longer antenna than the stock antenna, which works better. It is in good condition and works fine. I have the box for it as well. The rubber covers for the charger and speaker mic are currently off of it, but I have them and they should be easy to put back on the HT.

I am asking $30 for it.

Let me know if you are interested.

73 John AF5CC
580-591-6885

8450. FS: Baofeng UV-3R plus (revised listing)

Yahoo group: ham4sale (2007 — 2015)
Date: 2015-01-30 14:32:42 UTC
From: John Geiger
Topic: 8450 Message: 8450

I have for sale a brand new, just arrived Wednesday, Baofeng UV-3R Plus. Just powered it on to make sure it worked ok (it does) and charged the battery. It comes with all the stock accessories-including battery, antenna, box, manual, earphone-just like new. It also comes with a USB programming cable, which is an optional accessory. It is missing the charger, though. I have 2 drop in chargers (without wall plugs) that may or may not work. I am including them in case you can get them to work.

I am asking $29 shipped for this rig. Great chance to get another UV-3R plus if you already have one. I can take paypal/check/MO.

73 John AF5CC

8451. FS: Military Crystals for ARC

Yahoo group: ham4sale (2007 — 2015)
Date: 2015-01-30 16:55:32 UTC
From: bcarling@...

ATTN: ARC5 Collectors
For sale:
5 Plug-in crystal units (octal base) for ARC 5 radios.
2604 KC - QTY 3 by General Electric
4600 KC - QTY 1 by General Electric
6200 KC - QTY 1 by Western Electric
$2.50 each

Total price for all 5 is only $10.00 plus shipping.

Last chance - If nobody wants them I guess I will throw them away.

73 de AF4K - Bry Carling

8452. FS: Yaesu HT accessories

Yahoo group: ham4sale (2007 — 2015)
Date: 2015-01-30 23:28:15 UTC
From: John Geiger
Topic: 8452 Message: 8452

I have for sale a Yaesu MH-57 speaker mic which works with the Yaesu VX6R and VX7R HTs (maybe the VX5R and others also), sells new for 24.95, I am asking $16 shipped. Also have a CD-15A drop in rapid charger for the VX5R/VX6R/VX7R HTs. Sells new for 37.95. This one does have some velcro on the bottom of it where the previous owner attached it to a PS. Doesn't affect the charger at all. Asking $22 shipped.

I can take paypal/check/MO.

73 John AF5CC

8454. FS: Radio Shack 25amp switching PS

Yahoo group: ham4sale (2007 — 2015)
Date: 2015-01-31 03:32:26 UTC
From: John Geiger
Topic: 8454 Message: 8454

I have a Radio Shack 25 amp switching PS that I am selling for $50 plus shipping. It powered my Icom 706 just fine at full power. Looks pretty good, some wear on the case. This will power a 100 watt HF rig with no problem with some headroom left over for accessories. Would consider a trade on a linear PS like an Astron RS20A.

I can take paypal/check/MO.

73 John AF5CC

8455. Yaesu VX6R triband HT for sale

Yahoo group: ham4sale (2007 — 2015)
Date: 2015-01-31 19:25:53 UTC
From: John Geiger
Topic: 8455 Message: 8455

I have a Yaesu VX6R tri/quadband HT for trade. It does the standard 2m/222mhz/70cm and has been modded to transmit on 6m as well. Does 5 watts on 2m and 70cm, 1/5 watts on 222mhz, and not sure how much on 6m-I don't have an antenna to test it there. In good condition and works fine. Has the antenna, battery, and a charging cord to plug into a PS to operate the HT or charge the battery. It does not have the wall charger, but the DC cord is better anyways as you can operate the HT from it, even while it is charging. Does NOT have the belt clip

It comes with wideband receive, AM/FM broadcast band receive, and is waterproof. Only selling because I have too many HTs here (if that is possible).

Asking $155 shipped and I can take paypal, check/MO.

73 John AF5CC

8456. FS: Baofeng UV-82X 2m/222mhz HT

I have a like new Baofeng UV-82X 2m/222mhz HT for sale. Rated at 5 watts for each band, also receives broadcast band FM. Comes with the antenna, box, manual, charger, earphone, etc. All the accessories that come with a new one. It is about 5 weeks old, did a good job last week in the January VHF contest on 222mhz simplex.

I am asking $44 shipped for it and can take paypal/check/MO.

Great shape !

Was working perfectly when taken down.

All parts are there, ready to reassemble.

You may need to get new mast clamp bolts, mine are rusty.
You can add 40 meters or 30 meters with an add on kit - $179.

Sell for $100 or best offer.

Pickup in San Diego - too big to ship.

8461. Test Equipment FS

Yahoo group: ham4sale (2007 — 2015)

From: Ken Simpson, W8EK
Topic: 8461 Message: 8461

Test equipment for sale:

Heath VC-3 Oscilloscope "Voltage Calibrator":

This unit is used to output precise values of voltage so that an oscilloscope can be calibrated. It uses three tubes and some very precision resistors.

Apparently this unit was produced in the late 1950's and early 1960's. This one looks very nice. It does have a small chip out of the back corner, but otherwise is very good. It has had the electrolytic caps in it replaced, and it has output which varies as one turns the amplitude switch.

Paperwork is included for only $20.

Kepco Variable Bench Power Supply:

This is an ideal bench power supply! It is a Kepco Model ABC 40-0.5, which means that it will produce from zero up to 40 V DC at up to 1/2 amp. Great for the bench.

The voltage is adjustable with a 10 turn pot from close to zero, up to about 40 volts. There is a fairly large analog meter that reads the voltage. There is also current limiting built in that is adjustable from about 100 ma to up to about 700 ma. The same meter that reads voltage can be switched to read current, or short circuit current (the point that the current limit is set). In addition, there are connections on the back to allow remote sensing and remote programming. This is a quality regulated power supply!

This particular unit works 100%, and looks extremely nice. $85

Micro-Z Frequency Prescaler:

Do you have a frequency counter that does not cover 2 meters, but you want to check the frequency of your 2 meter rig? If so, this is what you need. It is a divide by 10 frequency prescaler. Connect the prescaler to your frequency counter, and a short antenna to the prescaler, and you can do it.

This unit works OK, and looks OK, assuming you like the red color of the cover that Micro-Z used. Powered by 115 V AC.
$15

SWR Bridges / Wattmeters For Sale:

All have SO-239 connectors and work fine.

Vanco SWR-2 SWR Bridge / Wattmeter
It covers from 1.7 to 150 MHz. It has a single meter, and
is actually a 10 W and 100 W full scale watt meter as well
as the "normal" SWR meter. It is still in its original box,
with original paper work, and appears to be new. $25.

Lafayette 99-25835 SWR Bridge
This HF single meter SWR Bridge also functions as a field
strength meter. This one is also in its original box, with
original paper work and appears to be new. $20

Radio Shack 21-524 SWR and Power Meter
This HF meter measures both average and PEP power in 20/200/2000
watt ranges as well as functioning as a regular SWR meter.
Looks close to new. With paperwork for $25.

This SWR bridge is good for use from 3 to 150 MHz, meaning it will
cover the HF bands (not including 160 meters), but also 2 meters
and 6 meters. This is a well constructed homebrew unit measuring
about 4 x 4 by 2 1/2 inches (plus knob and connectors).
SO-239 connectors are on the side.
This one works fine and looks fine as well. $12

25 KHz Crystal Calibrator:

This unit is marked "25 Kc Frequency Standard".
It produces markers at 25 KHz intervals for calibrating
your receiver.

This unit is a homebrew unit using two transistors and one
IC, and is powered by three AA batteries. Of course it
includes a 100 KHz crystal that is divided by four. It is
in a black enclosure about 5 inches wide by 4 1/2 inches
deep by 3 1/2 inches high. $15

Miscellaneous Heath Parts:

Heath HM-102/HM-2102 Wattmeter Parts (all are common to both meters):

Outer clam shell cabinet (left and right sides plus top) in nice
condition. $12

Dark Green knobs with aluminum skirt, 1 1/8 inch in diameter.
These are the same knobs as used in all of the SB series of
transceivers, receivers, transmitters and accessories. $5 each

Set of four feet, w/hardware. $10

Three position SWR/Power switch
Switches between SWR, high and low power. $7

I have many Heath SB-630 Station Console parts available. Most of
the internal parts are available, but no clock. The clock movement,

knobs, front panel, outer case and reflectometer assembly are gone, but switches, etc. are still available. Please let me know what you need.

I also have parts from a Heath HD-15 phone patch available. What do you need?

Parting out Daiwa Wattmeter:

These parts all come from a Daiwa CN-460 M wattmeter which covers from 140 to 460 MHz. This is the "mobile" type of meter. Except for the actual reflectometer assembly, the other parts should fit any of the various "mobile" Daiwa wattmeters.

Reflectometer assembly
Covers from 140 to 450 MHz. SO-239 connectors in and out. Includes the three wires that go to the switch board, and mounting screw. $12

High Low Power Switch board
This includes the switch and the small circuit board that includes the four adjustment pots - high power forward and reflected, and low power forward and reflected. Single mounting screw included. $7

Light assembly
With two good bulbs, circuit board, wire pigtail, and two mounting screws. $6

Outer plastic case
Should be the same as all of the mobile meters.
With mounting screw. $5

Buy all above for $25.

Micronta Radio Shack 22-024 Transistor Tester:

This unit is capable of checking a wide range of transistor types, either "in circuit" or out of circuit. It was designed to utilize dynamic testing under current amplifier conditions. The visual indication of the output signal is the result of dynamic current gain in an actual operating circuit.

This particular unit is in the original box. However someone left a battery in it, so it needs the battery holder cleaned, plus some general clean up.

With paper work for $15.

Solid State 5U4 Rectifiers:

These are solid state replacements for 5U4 vacuum tube rectifiers. Basically it is a glob of epoxy with an

octal base to plug into the original 5U4 socket. The
silk screen on the base says "S-5U4 Silicon Rectifier
Tube Replacement." No manufacturer indicated.

Two are available for $15 each.

Coax connectors and adapters:

Prices are per connector. Several of each are available.
Most are unused.

SPECIAL: Buy 5 and take 10% off.
Buy 10 or more and take 20% off.

UG-175 reducing adapters for PL-259 connectors to
use with RG-58 $.50

UG-176 reducing adapters for PL-259 connectors to
use with RG-8 X or RG-59.
Amphenol $.75; NON-Amphenol $.50

Amphenol crimp type PL-259, sealed in package $3

UHF double female "Barrel connector" $3

UHF "L" Elbow, 90 degree connector $3

UHF "Bulkhead Connector" with mounting hardware
Double female, about 2 inches long $6

UHF "T" connector with two female (SO-239) and one male
(PL-259) connection $5

BNC HT to PL-259 adapter.(BNC male to UHF female) $5

BNC male for coax cables
standard type $2
crimp on type $3

Chassis mount BNC female
square mount (uses 4 screws) $3
Amphenol screw in type, sealed in package $4

BNC "T", two female and one male $3

Electronic Catalogs FREE:

I have a variety of electronic catalogs available free for
the cost of shipping. The shipping cost should be relatively
low since they can be shipped via "Media Mail". Of course
some of these are several inches thick.
All are in extremely good condition.

Here is what is available:

Mouser #641 for Feb-June 2010

DigiKey # A091B for 2009

Newark
#103 for 1985
#115 for 1997
#116 for 1998

8462. Power Supplies FS

Yahoo group: ham4sale (2007 — 2015)
Date: 2015-02-08 18:26:03 UTC
From: Ken Simpson, W8EK
Topic: 6888 Message: 8462

Power Supplies For Sale:

Regulated 13 Volt DC power supplies:

TenTec Switching Power Supply:

"Switcher / 25" 25 amp switching power supply:
This is a 25 amp switching power supply in a case that
matches the early Omni series case, with the metal bezel
around it. It is in a case that is the same size as a 243
remote VFO. It has an ammeter on the front, along with
Switch, TenTec logo, and output bulb. The front panel
basically looks like a 280 power supply with a metal bezel,
but says "Switcher/25" on it. It is very quiet, and well
shielded, and does not produce any electrical noise that
I could find. $140

GSC 20 R, 20 amp
This supply is rated at 20 amps. Output terminals are on the back,
with the fuse, power switch, and pilot light on the front. This one
works fine, and looks fine, except for a few scratches on the bottom.
$50

EVG Model 10-395, 4 amp power supply
This supply is regulated, with switch and pilot bulb on the front,
and binding post output on the rear panel, along with the fuse.
It works fine and looks good. $30

Micronta 22-120 A
This supply is rated at 2.5 amps. It is well regulated. It has a
switch and LED light on the front, with a circuit breaker and output
terminals on the back. The case (left & right side & top) is
basically all a heat sink. This one works fine and looks like new.
No scratches. $30

Homebrew Power Supply:
This power supply is in a very nice gray and black enclosure with
binding posts for the output on the front, along with a pilot bulb
and power switch. The back panel has a fuse and the regulator.
It looks to be good for about 1.5 amps.
It works fine and looks really great. No scratches or defects. $15

Kepco Variable Bench Power Supply:

This is an ideal bench power supply! It is a Kepco Model ABC
40-0.5, which means that it will produce from zero up to 40 V
DC at up to 1/2 amp. Great for the bench.

The voltage is adjustable with a 10 turn pot from close to zero, up to about 40 volts. There is a fairly large analog meter that reads the voltage. There is also current limiting built in that is adjustable from about 100 ma to up to about 700 ma. The same meter that reads voltage can be switched to read current, or short circuit current (the point that the current limit is set). In addition, there are connections on the back to allow remote sensing and remote programming. This is a quality regulated power supply!

This particular unit works 100%, and looks extremely nice. $85

"Wall Wart" Power Supplies:

All of these are "regular" wall warts - not the new switching type that create all sorts of noise in your receiver. Use one of these, and you will not need to put up with all of the interference.

There are many uses for the 12 volt variety.
These all have 2.1 mm coaxial connectors with center positive.
12 V DC at 800 ma $15
12 V DC at 625 ma $14
12 V DC at 500 ma $12
12 V DC at 300 ma $10

13.5 V DC at 800 ma $16

12 Volt AC at 1 amp - Note it is AC, not DC. $15

9 Volt DC at 500 ma
This unit was used on a MFJ 422 keyer, but will also power other items needing 9 V DC. It has a 2.5 mm male plug on it, tip positive. $12

Icom BC-25 / Santec HT Charger
Same thing, with slightly different tags. 2.1 mm coaxial power plug output, with center +. 12 V DC at 50 ma. Still in box, unused. $12

Eico 751 AC power supply / Speaker:

This power supply is used with tube type transceivers. It includes a speaker as well as the power supply in a very nice cabinet. It was designed to be used with the Eico 753 transceiver, but can be used with most any of the tube type rigs from the 1960's and 70's.

The manual says it provides the following voltages:
750 V DC at 300 ma High Voltage
280 V DC at 170 ma Low Voltage
-100 V DC at 5 ma for bias
12.6 V AC at 4 amps for filaments

This supply comes from a silent key estate; I am sure it has not been used for years. I do not have a rig to test it, but

would expect it to work fine, but the filter capacitors likely will need to be replaced, as is the case with any of the units of this vintage.

With manual for $120.

I also have many other accessories available such as many different types of microphones, HTs, VHF and UHF rigs, antennas, etc. Just too many things to list here.
Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

FOR SALE: Swan 250C - this is a 50 MHz transmitter and comes with AC power supply.

I have the Swan 250C with the original manual and a 117XC power supply.

This set is complete and in excellent condition other than some minor surface rust on the front of the 117XC. I have not been able to test it, but it looks super clean inside and nothing
is missing. No modifications etc.

Comes with the AC Cable and manual only. I do not have a microphone or the interconnect cable.

E-mail me if you would like to see pictures.

I would like $150.00 for the Swan 250C and $100 for the 117XC power
supply. It has no interconnect cable.

8466. FS: Yaesu FT100D HF/6m/2m/70cm transceiver

Yahoo group: ham4sale (2007 — 2015)
Date: 2015-02-13 18:22:59 UTC
From: John Geiger
Topic: 8466 Message: 8466

I have for sale a Yaesu FT100D transceiver that does 100 watts on HF and 6m, 50 watts on 2m, and 20 watts on 70cm. This is a late model D (serial number in the 2L range) so the fan mod and SWR/Grounding mod were done at the factory. It has built in DSP, a 500hz CW filter, tone decode, and a TXCO, where were all standard in the D model. Also has a built in memory keyer, built in SWR meter which can display power and SWR at the same time.

The physical condition is a little rough, it has some scratches on the body, and some on the bottom side of the faceplate. The front of the radio and the display look fine. It comes with a hand mic, and a power cord that has been hardwired into the pigtail that comes out of the radio. No box or manual with it.

The plastic release tab for the faceplate has been broken. The face stays on the radio fine, and you should be able to order the release tab from Yaesu.

I am asking $475 shipped.

8470. FS: B & W Coaxial Antenna Switches

Yahoo group: ham4sale (2007 — 2015)
Date: 2015-02-14 19:33:35 UTC
From: bcarling@...
Topic: 8470 Message: 8470

FOR SALE: Two BARKER and Williamson 6-position Antenna Switches.

One SO-239 connector for the coaxial input and SIX SO-239 connections for the antennas.

These are both the rectangular, in-line switches with all connectors exiting off the rear. No
awkward round box to mount or other issues. Fairly common and well known design. They typically sell for around $35 - $45 or more on eBay.

Real ceramic construction inside and in excellent condition. They have some markings and show some normal use, but no dents or gouges. Tested and working fine.

Both look more or less identical. E-mail me if you need to see pictures.

One is the Model CS-6G and the other is a model 595. Both are made by B & W and look more or less identical.

Available for only $26.00 each plus shipping.

E-mail if you need details or pictures.

73 - Brian, AF4K

8471. FS: Yaesu MH-57 HT speaker/mic

I have a Motorola XTS 5000R VHF Model III (136-174 MHz) that I am looking to sell. I want to upgrade to the ATX 7000. The XTS 5000R is in EXCELLENT condition and has lots of added features such as FPP and ADP Encryption. The items I have with the radio are listed below with approx prices to purchase.

I am asking for $1500.00 or best offer

-- NO TRADES
-- NO LOW BALL OFFERS
-- I will entertain legitimate, serious offers.
-- I will only ship to CONUS -- NO International.
-- I do accept Paypal.
-- You pay the Shipping (Flat Rate will probably be $19.95).

Some of the prices listed below are for used or refurbished...some are new prices...

Motorola XTS5000R - (On eBay for $800 to $1200) $1000
(See photo for radio features)
Motorola Impres Battery Charger $ 165
Motorola Impres Batteries (4 @ $95.00 each) $ 380
Bluetooth Mic & Adapter $ 200
Motorola Mobile Radio charger for Impres batteries $ 300
Motorola Remote Speaker Mic Submersible $ 190
Programming Cables (2) & Software $ 150

Suggested Pricing $2385

8485. HTs and Ht accessories FS

Yahoo group: ham4sale (2007 — 2015)
Date: 2015-02-22 23:00:29 UTC
From: Ken Simpson, W8EK
Topic: 8485 Message: 8485

HTs and HT accessories For Sale:

Icom IC-W31 A, dual band HT:

The Icom IC-W31A dual bander has alphanumeric and memory
display. The transceiver's two dials are used for independent
tuning of the VHF and UHF band. This allows you to receive both
VHF and UHF simultaneously; or use the V/V and U/U functions
for receiving two frequencies on the same band. Full crossband
duplex is supported. Great for satellites.

You get 100 memories; each can be assigned a name. Alpha tagging
is also available for DTMF memory channels. You also get programmed,
full and memory skip scanning. Other features include impressive
audio, backlit LCD, 50 frequency PL encode, auto power off and
3 power levels.

Features
100 Alpha Memories
Extended Receive
3 RF Levels
Auto Repeater
DTMF Keypad
Battery Saver
DTMF Memories

This one works 100% and looks like new. It includes antenna,
belt clip, wrist strap, paper work, and an almost new battery
for $140.

Radio Shack 2 meter and 440 MHz HTs:

Radio Shack HTX-404 HT for 440 MHz
This HT covers the 440 MHz band and includes SubAudible PL
tones, DTMF tones, Memories, Scan, and the things that one
expects in an HT these days. The receiver is especially good,
with a "tight" front end. This one is like new. It looks
like it has hardly been used. Its original manual even looks
new! Of course it works fine. $60

Radio Shack HTX-202 HT for 2 meters
This HT is the companion to the HTX-440, but covers two
meters. It works fine, and looks great. Not quite as good
as the HTX-404 above, but close. $50

Buy both of the above together for $100.

HT Speaker Microphones:

Both of these speaker mics have the 3.5 mm and 2.5 mm two
conductor plugs that are spaced about 3/8 inch apart, and
are molded into a single connector. They are used on Icom,
Yaesu, Radio Shack, Maxon, Ritron, Vertex and many other
radios.

Premier SPM-100
It is a lightweight and compact unit, featuring a powerful
speaker as well as a high-quality condenser-style microphone
element that produces excellent transmitted audio clarity.
The microphone may be secured to the user's lapel or shoulder.
It also features a built-in 3.5mm jack for using an external
earphone. $17

DM-100
Appears to be the same as the SPM-100 above, but just with
a different label. $17

Kenwood "Soft Case" for HTs:

SC-35 soft case
For Kenwood TH-78 dual band HT. Looks like new.
Only $12.

SC-8 T soft case
For Kenwood TH-21, TH-31, TH-41 series HTs.
Like new condition. $10

Accessories for the Kenwood TH-21 / 31 / 41 series HTs:

Kenwood SC-8 T "Soft Case" for any of the TH-21 series HTs
Appears to be unused, $10

Antenna adapter that fits the TH-21 series HTs, and has an SO-239
on the other end, to accept a PL-259. $5

Antenna adapter that fits the TH-21 series HTs, and has a BNC on
the other end. $8

Original Operating manual for TH-21 HT for 2 meters $8

Kenwood W09-0315 charger
This charger is used to charge the larger PB-21 H batteries for
the TH-21 series, and also on other Kenwood radios.
It has a standard 2.1 mm coaxial connector. $12

Accessories for Icom IC-2 AT series HTs:

These items can be used on the IC-2A, 3A, 4A, 02A,
03A, 04A, 2GAT, 32AT series HTs plus many others.

Icom DC-1, 13 V DC adapter for many Icom HTs:
This adapter slides on the HT, in place of the battery pack. If

13 V DC is applied, it converts the voltage to the proper voltage
for the HT. This one works fine, and looks fine. With paper work
for $12.

Icom CP-1 DC cord
This cord will work with the DC-1 above, plus many other items
needing the 2.1 mm coaxial power plug. The opposite end has a
cigarette lighter plug on it. $10

W & W aftermarket BP-8 Heavy duty battery pack
This is a NiMH pack, 8.4 V at 2700 mahr; extremely heavy
duty, long life.
This one looks close to new; excellent electrical condition. $30

Icom BC-25 U wall charger
Standard wall charger for most of these HTs. $15

Belt Clip for the above HTs, with hardware. $6

Batteries for Icom IC-2 AT series of HTs:

These items can be used on the IC-2 A, 3 A, 4 A, 02 A,
03 A, 04A, 2G AT, 32 AT series HTs plus many others.

Icom BC-25 U wall charger
Standard wall charger for most of these HTs. $15

Icom BP-3 Battery pack
This was the "standard" battery that came with many of
these HTs. It can be charged with a BC-25 U wall charger,
or the BC-30 or BC-35 desk chargers, or with 12 V DC.
This one appears to hold a charge OK. $10

Icom BP-5 Heavy duty battery pack
This battery has several times the capacity of the BP-3,
and slightly higher voltage for more power output.
It must be charged by a desk charger (BC-30 or BC-35).
For rebuild only $5

W & W aftermarket BP-8 Heavy duty battery pack
This is a NiMH pack, 8.4 V at 2700 mahr; extremely heavy
duty, long life.
This one looks close to new; excellent electrical condition. $30

Buy all for $45.

Icom BC-127 A, Battery Charger:

This charger charges the NiCads or NiMH for the IC-Q7 A
Dual band HT, and Icom R-2 receiver, and probably others.

This one appears to be new, unused, still in its bag.
Icom lists them at $21.
Buy this one for $10 plus shipping from Florida.

Accessories for Santec HTs:

These accessories fit most of the Santec HTs, such as the HT-1200,
ST-142, ST-144, etc. They also can be used with some Icom HTs
of the IC-2 AT and IC-02 AT era.

Santec ST-MC, DC Charge cord
Cigarette lighter plug on one end, and 2.1 mm coaxial power connector
on the other. Drops 13 V DC down to the voltage required by the HT.
New, unused, in package, with paper work for $10.

Santec AC "Wall Wart" Charger
12 DC at 50 ma. Linear type, so no switching noise.
Same as Icom BC-25. New, unused, $15.

Real Leather Shoulder Strap
Although used for the Santec HTs, these can be used for many things.
Not only HTs, but also cameras, and other items.
New, unused, in package. $5

"Service Pack" for Santec ST-142/144 HTs
This is similar to a service manual, but Santec calls it a service
pack. It has schematics, circuit explanations, voltages, etc. $15

HT Belt Clips and Wrist Straps:

Belt Clips:
All include the hardware with the belt clip and are $6 each.
Icom IC-2 AT
Kenwood BH-6
Motorola
Radio Shack HTX-202/404
Yaesu FT-207
Yaesu FT-209

Wrist Straps for various HTs - $4 each
Radio Shack HTX-202/404
Kenwood TH-215 / 225 / 415, TR-2500, etc.
Kenwood TR-2400
Yaesu FT-209

Antennas for your HT:

All rubber ducks are for 2 meters, are in good
condition, and are $10 each, unless stated otherwise.

BNC - Dual Band (2 m and 440 MHz) Telescoping antenna
provides significant gain when extended, $18

BNC - As used on most HTs, 7 inches long

BNC - Original Alinco EA0024, about 4 inches long

BNC - Original from Kenwood TH-215, about 5 inches long

BNC - "Stubby" about 4 1/2 inches long

Type F connector - 6.5 inches long

Threaded (as used by Motorola, etc.) - about 7 inches long

BNC Stubby for 440 MHz, 3 inches long

Threaded (as used by Motorola, etc.) stubby for 440 MHz

Not a Rubber Duck, but can be used on your HT:
Telescoping Antenna w/ BNC about 19 inches long
can be used as a quarter wave antenna on 2 m,
or on 220, or 450 MHz if telescoped shorter. $12

I also have many other accessories available such as many
different types of microphones, HTs, VHF and UHF rigs,
antennas, etc. Just too many things to list here.
Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

8486. REDUCED: Pair of EIMAC 4-65A Tubes

Yahoo group: ham4sale (2007 — 2015)
Date: 2015-02-24 13:27:51 UTC
From: bcarling@...
Topic: 8486 Message: 8486

REDUCED: Pair of EIMAC 4-65A Tubes

Rated at - 3000 volts max plate voltage!
2 watts driving power. 380 watts OUTPUT per tube!
handy 6.3V filament at 3.5 Amps.
Inexpensive - though you will almost certainly never need replacements.

USED IN THE GLOBE CHAMPION 350 Transmitter!
GATES HF1 Transmitter uses a pair.
Continental 316 transmitter uses four.
ALSO used in the RT-1B spy transitter.

These look to be new tubes - one is still in the box. Great for homebrew transmitting projects.

These sell typically for $50.00 - $80.00 each on eBay and other sites.

Previously offered at $70.00 for the pair.
Now I'm offering these at only $40.00 for the pair!

See: http://frank.pocnet.net/sheets/088/4/4-65A.pdf

For questions or to arrange purchase please contact me off the list.

From: L L bahr
Topic: 8486 Message: 8488

These were never used in a Globe Champion. The 4-65A tubes only work well run at very high voltage such as 3000 volts. The Globe Champ has a power supply giving less then 1000 volts.

Lee, w0vt

8489. For Sale: TinyTrak 3 APRS Units and accessories

Yahoo group: ham4sale (2007 — 2015)
Date: 2015-02-27 23:32:50 UTC
From: Kris Olmstead, W2FLR/KNYOTISC2
Topic: 8489 Message: 8489

Qty 2: TinyTrak 3 APRS Units - Assembled units from Byonics. Work fine.
Qty 1: M5C Cable to connect Yaesu radios with modular plug to TinyTrak 3.
Qty 1: Null modem cable to connect TinyTrak 3 to a 9-pin serial port for programming.
Qty 1: GPS2 GPS receiver - took on water and stopped working. Probably a simple fix. Will throw in at no charge.

Since this was used on a Yaesu, R8 was snipped on the TT3 but could be re-soldered easily.

$60.00 for everything shipped to CONUS. Will accept PayPal or US Postal Money Order only.

8495. Kenwood Monitor Scope, Mics and other Kenwood items FS

Yahoo group: ham4sale (2007 — 2015)
Date: 2015-03-04 20:53:12 UTC
From: Ken Simpson, W8EK
Topic: 8495 Message: 8495

Kenwood Items For Sale:

Monitor Scope, Microphones, Original Boxes, HT Accessories,
Original Manuals, and more

Kenwood SM-220 Monitor Scope, with BS-8 Pan Adapter

The Kenwood SM-220 Station Monitor is a multi-function monitor scope which functions as a band-scope since it includes the BS-8 pan display option, monitor and tone generator. It is the ideal product for supporting, monitoring and calibrating equipment. It can be used to observe SSB distortion, CW key clicks, and test linearity of linear amplifiers. It has four sweep ranges and also can serve as a RTTY tuning scope. Frequency range: 1.8-150 MHz. Maximum Power: 2000W 1.8-54 MHz and 100W 150 MHz.

Features:
Bandscope ± 100 kHz (with optional BS-8)
10 MHz Oscilloscope
Matches many Kenwood Transceivers
Wideband Transmission Monitor
RTTY X-Y Tuning Meter
Built-in 1000/1575 Hz Two-Tone Generator

Cosmetically, this one looks like new. I can not find a scratch on it, and all lettering is nice and crisp. Electrically, it works fine. The intensity varies as it should, the focus does as it should, and when I connect a signal generator to it, the sine wave looks like a sine wave. I have no TS-820 or TS-830 to confirm that the BS-8 works, but I am fairly certain it is fine, since other parts of it are fine. $350

Kenwood MC-48 DTMF Touch Tone Microphone
Used on most Kenwood rigs with round 8 pin mic plug.
Includes up/down switches as well as the 16 digit tone pad. Excellent, close to new, condition. $40

Hand Microphone with round 8 pin plug for Kenwood, Alinco, etc.

This hand mic works great on most Kenwood rigs with the round 8 pin connector, such as the TS-430, TS-440, TM-241, TM-2530, TW-4000, and others, including Alinco and ADI. It says "Electret Condenser Mic" on the back, and "Kenwood" on the front, with no model number.

Basically, this mic functions like an MC-43, with a couple more features. It has the mic and PTT switch; it also has

up/down switches on the top. There are four "extra" buttons
labeled Call, VFO, MR, and PF. What these four buttons do
depends on the rig. There is also a "Lock" switch on the back.

Regardless if you use the four extra buttons or not, you
still have a mic that works like an MC-43.

This mic works fine, and looks like new. I am guessing it
came with a rig, and was immediately put in the drawer,
and never used. $30

Kenwood "Soft Case" for HTs:

SC-35 soft case
For Kenwood TH-78 dual band HT. Looks like new.
Only $12.

SC-8 T soft case
For Kenwood TH-21, TH-31, TH-41 series HTs.
Like new condition. $10

Original Boxes for Kenwood VHF / UHF Rigs:

The following original boxes for Kenwood equipment
are available. They are all in very nice condition,
and include the molded styrofoam inserts to protect
the rig, plus the box itself.

Original Box for Kenwood TM-221 two meter transceiver
It is in very nice condition, and includes the molded styrofoam
inserts to protect the rig, plus the box itself. $6

Original Box for TH-41, 440 MHz HT
Complete with insert. Looks like new. $8

Original box for Kenwood TR-2600, Two meter HT
Complete with insert. Looks like new. $8

Original box for TenTec 2591, Two meter HT
Complete with insert. Looks like new. $8

Accessories for the Kenwood TH-21 / 31 / 41 series HTs:

Antenna adapter that fits the TH-21 series HTs, and has
an SO-239 on the other end, to accept a PL-259. $5

Antenna adapter that fits the TH-21 series HTs, and has
a BNC on the other end. $8

Kenwood SC-8 T "Soft Case" for any of the TH-21 series HTs
In bag, with original paper work. May be new. $10

Original Operating manual for TH-21 HT for 2 meters $8

Kenwood W09-0315 charger
This charger is used to charge the larger PB-21 H batteries
for the TH-21 series, and also on other Kenwood radios.
It has a standard 2.1 mm coaxial connector. $12

Antennas for your HT:

All rubber ducks are for 2 meters, are in good
condition, and are $10 each, unless stated otherwise.

BNC - As used on most HTs, 7 inches long

BNC - Original Alinco EA0024, about 4 inches long

BNC - Original from Kenwood TH-215, about 5 inches long

BNC - "Stubby" about 4 1/2 inches long

Type F connector - 6.5 inches long

Threaded (as used by Motorola, etc.) - about 7 inches long

BNC Stubby for 440 MHz, 3 inches long

Threaded (as used by Motorola, etc.) stubby for 440 MHz

Not a Rubber Duck, but can be used on your HT:
Telescoping Antenna w/ BNC about 19 inches long
can be used as a quarter wave antenna on 2 m,
or on 220, or 450 MHz if telescoped shorter. $12

Original Manuals for Kenwood equipment:

All manuals are in very nice condition, for Kenwood equipment.
All are Operating manuals unless otherwise specified.
All are original manuals only.

SPECIAL:
Buy two, three, or four of my books/manuals, and take 10% off.
Buy five or more and take 20% off.

TH-21 HT for 2 m, $8
TH-215/315/415 HT for 2 m, 220 MHz, or 440 MHz, $10
TH-225, 2 m HT, $12
TH-235, 2 m HT, $15
TH-241/441/541 mobile FM transceivers
...For 2 m, 440 MHz, & 1200 MHz, $12
TM-221/421 2 m or 440 MHz mobile, $12
TM-261/461 2m or 440 MHz mobile, $12
TM-2570/2550/2530 2 m mobile, $15
TR-2400, 2 m HT, $12
Service manual for TR-2600, 2 m HT, $12
TR-9000, 2 m multimode, $12
TS-120 S/V, HF xcvr, $20
TW-4000 dual band mobile, $15

Service manual for TW-4000 dual bander $20
TW-4100 dual band mobile, $15

BC-5 DC to DC quick charger $2
LF-30A Low Pass Filter $5
MC-30 & MC-35 hand microphones $4
MS-1 mobile stand $3
PB-1, PB-2, PB-3, & PB-4 battery packs $3
PB-24 battery pack for TR-2400 $2
PB-25 H battery pack for TR-2500 $2
PS-6 power supply $5
PS-30 power supply $4
SMC-24 speaker mic $3
SMC-25 speaker mic $3
SP-430 speaker $2
SP-820 Speaker $2

These are original Kenwood manuals only.

Versión en español de Kenwood TM G-707 manual de Venta:

Versión en español del Manual de Operación
para el Kenwood TM G-707 transmisor-receptor de banda dual

Este es el manual de instrucciones original, en español.
Parece que es bastante extensa y detallada.
Es básicamente nuevo, sólo se abre para observar que
es sólo en español. Es original de Kenwood.

$ 8 más gastos de envío de la Florida.

Spanish Version of Kenwood TM G-707 manual:

Spanish version of the Operating Manual
for the Kenwood TM G-707 dual band transceiver

This is the original operating manual only, in Spanish.
It looks like it is quite extensive and detailed.
It is basically new, only being opened to observe that
it is in Spanish only. It is original from Kenwood. $8

I also have many other accessories available such as many
different types of microphones, HTs, HF, VHF and UHF rigs, HF
and VHF/UHF antennas, etc.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

SOLD! Thanks everyone.

On 02/27/2015 06:32 PM, 'Kris Olmstead, W2FLR/KNYOTISC2' olmstead@... [ham4sale] wrote:

Qty 2: TinyTrak 3 APRS Units - Assembled units from Byonics. Work fine.
Qty 1: M5C Cable to connect Yaesu radios with modular plug to TinyTrak 3.
Qty 1: Null modem cable to connect TinyTrak 3 to a 9-pin serial port for programming.
Qty 1: GPS2 GPS receiver - took on water and stopped working. Probably a simple fix. Will throw in at no charge.

Since this was used on a Yaesu, R8 was snipped on the TT3 but could be re-soldered easily.

$60.00 for everything shipped to CONUS. Will accept PayPal or US Postal Money Order only.

8497. Fwd: RE: QTH.COM Ad -- LDG AT-1000ProII & M-1000...

Topic: 8497 Message: 8497

LDG AT-1000ProII auto-tuner & LDG M-1000 Meter

Both units are about 9 months old.

They are both in nearly-new condition & work fine.
(I'm getting a Drake MN-2700 & won't be using these any more.)

AT-1000ProII 5 - 1,000 watts peak RF input, 1.8 to 54.0 MHz,
loads 6 - 1000 ohms HF & 16 – 150 ohms on 6m (250w).

M-1000 Remote Antenna Tuner Meter for AT-1000ProII Analog,
Sweep Needle, w/42 in. Cable.

AT-1000ProII Asking $425.

M-1000 Asking $95.

Includes manuals.

Asking $495.00 for both - purchased in-advance for pick-up at
Charlotte Fest March 13th - 14th.

Will trade for Dual band HT. Just let me know what you have.

email radio8132@yahoo.com or PM

8502. FS: 500' rolls of RG-8/U and RFC400 coax cable

Yahoo group: ham4sale (2007 — 2015)
Date: 2015-03-13 15:00:53 UTC
From: mwallred@...
Topic: 8502 Message: 8502

I have two 500' rolls of coax for sale. Both are new unopened spools.

I have one 500' spool of genuine Belden 9913, which is also known as RG-8/U. It's a low loss cable with a 10 AWG solid copper center conductor. Here's a link to their data sheet on it:
http://www.belden.com/techdatas/english/9913.pdf
http://www.belden.com/techdatas/english/9913.pdf

Top notch name brand cable still shrink wrapped with a Belden label on a wooden spool. Asking $300.

The other 500' spool is from Shireen. Their designation for it is RFC400, because it's an equivalent for LMR400. According to the company it's made in the same facility that makes that cable for Times Microwave, but this has their name on it and not Times. Great quality, lower price. Asking $200.

I can meet in the greater Columbia, SC area or ship to you. Use zip code 29169 when calculating what the shipping cost will be. I'd prefer to sell locally.

Marty

8503. FS: Icom FL223 SSB filter

Yahoo group: ham4sale (2007 — 2015)
Date: 2015-03-13 22:57:24 UTC
From: John Geiger
Topic: 5449 Message: 8503

I have for sale an Icom FL223 1.9khz SSB filter. This is the filter for the 9mhz IF. Some of the radios it works in are the 706 series, 736, 737, 739, 745, 756 original. These sell new for $130,. I am asking $75 shipped for it. I can take paypal/check/MO.

73 John AF5CC

8504. Icom 756 for trade (for HF/VHF/UHF) might sell as well

Yahoo group: ham4sale (2007 — 2015)
Date: 2015-03-14 00:58:46 UTC
From: John Geiger
Topic: 8504 Message: 8504

I have an Icom 756 original HF/6m transceiver I am looking to trade. This is the model that does dual receive, so you can listen to 2 frequencies at once (have to be same band and mode)-great for DX pileups or listening to the 6m calling frequency while also making 6m QSOs. It also has a real time bandscope built in so you can see what is happening on the band. Also has a built in tuner, DSP, built in memory keyer, audio monitor, SWR/power/alc meter, speech compression, notch filter, CW audio peaking filter, pretty much the works.

The radio works great, the case has a few scratches on the bottom, very light scratch or 2 on the side, and one scrape on the front face plate, just above the display. The display gets a blue line in it from time to time (common with this model) that goes away now and then also.

This is a great HF and 6m base radio, and does pretty much what all of the deluxe models do today-dual receive, bandscope. It comes with a manual, power cord, and Heil mic for Icoms.

I am looking to trade it for a HF/VHF/UHF radio like an Icom 706MKIIG, Yaesu FT857D, Yaesu FT100D, Yaesu FT897D, you get the idea. I like the 756 a lot but want something a little smaller for mobile work, and also do get on the satellites with.

I am going to be making a couple of trips in the next couple of weeks and could do an in-person trade in the I-35, I-80, Chicago, Kansas City, Des Moines areas.

I would also accept cash offers or other possible trades.

Interested-let me know!

73 John AF5CC

8505. Hal Boards For Sale

8506. FS-Kenwood TS-430 and matching AT-250

Yahoo group: ham4sale (2007 — 2015)
Date: 2015-03-16 02:55:07 UTC
From: Charles Rader
Topic: 8506 Message: 8506

I have in excess of my needs a Kenwood TS-430S and the matching AT-250 auto tuner. Radio cosmetically is rough and shows its age but functions perfectly. It was my starter rig and made a lot of contacts on it on all bands. No extra filters installed. If requested we can setup a SKED so you can hear it on the air.

Asking $460 shipped. Doubled boxed and in two separate boxes. $400 with local pickup. All cables included to hook up the at-250 to the radio.

Paypal accepted but will charge a little extra for the finance charge. Which is currently 2.9% plus $0.30 per sale. Postal Money orders and checks accepted but will hold till cleared.

From: Ken Simpson, W8EK
Topic: 8513 Message: 8513

DTMF Touch Tone Microphones For Sale:

Kenwood MC-44 DM, DTMF Touch Tone Mic:
Used on many Kenwood rigs with round 8 pin mic plug.
Includes up/down switches, and lock switch, along with
the 16 digit DTMF pad. Excellent condition. $40

Kenwood MC-59 "Potato Head" DTMF Touch Tone Mic:
This DTMF mic has a 16 digit DTMF pad, and a modular "LAN"
connector. Info at
http://www.universal-radio.com/catalog/fm_txvrs/21270071.html
This one appears new, still in its plastic bag. $40

Icom HM-14 DTMF Touch Tone Microphone:
The Icom HM-14 has the standard round 8 pin connector as used
by most Icom radios. It has a 16 digit DTMF Touch Tone pad on
the back. It will work with the IC-25A, 28, 38, 45, 48, 77, 78,
120, 229, 271, 275, 290, 375, 451, 471, 475, 505, 575, 707, 718,
725, 728, 729, 735, 736, 737, 745, 746, 751, 756/PRO, 761, 765,
775, 781, 820H, 821H, 900, 901, 970, 1201, 1271, 1275, 2400,
3200, 3210, and probably others. It can be used to add a DTMF
microphone to a rig that does not normally have one.
This one has good audio quality, all 16 digits on the DTMF pad
work like they should, and the coiled cord is in extremely good
shape. $40

Yaesu MH-15 DTMF Touch Tone Mic:
The MH-15 is a hand microphone with a 16 digit
DTMF Touch Tone Pad on the back, along with a lock/unlock
switch. The top has up/down buttons.
This one presently has the round 8 pin connector, which can
be changed of course.
It works fine and looks close to new. $40

CES 810 L DTMF Mic:
One can manually dial a number, or automatically store it in
the mic, and "speed dial". It has a 12 digit touch tone pad
on the front. With 8 pin modular plug (like computer LAN).
It looks to be unused. $38

Johnson 250-0761-010 / CES 655 L DTMF Mic:
It has a 12 digit pad on the front, and is a rugged mic.
Presently with 4 pin connector. It looks to be unused. $38

16 digit DTMF Touch Tone Pad:
This is a standard 16 digit DTMF Touch Tone Pad that is made
to be added to rigs (or microphones) that do not presently

include one. It is about 2 inches square, with a three wire
interface (Positive DC voltage in, audio output, and ground)
for easy interfacing. There is a pot to adjust the output level.
It appears that this unit is new. At least it has not been used.
$20

Prices do not include shipping from Florida.

Thanks.

8514. FS: Military BC348 Receivers

Yahoo group: ham4sale (2007 — 2015)
Date: 2015-03-21 13:20:08 UTC
From: bcarling@...
Topic: 8514 Message: 8514

FOR SALE - Two very nice Military BC348-R HF Receivers

I have two of these - one with an AC power supply built in (and working) for
use with 120V AC.

Both are excellent radios that wil provide many hours of fun listening.

Excellent old military HF receiver in very good condition. Great for coverage of the
shortwave
and HF amateur bands.

This was the last and best model of the BC-348
Has six Tuning ranges: 200-500 kHz and 1.5 - 18.0 MHz
Includes a built-in 120V AC supply, designed and neatly constructed by an Electrical
Engineer. This is a working receiver ready to plug in and operate.

I will include copies of the instruction manuals, some articles and schematics, mods etc.
with
this radio. Also, Data Sheets for Tubes used in the BC-348.

Available for $135.00 plus shipping.

Second one - Untested and needs a power supply. Complete and in good condition

Available for $105.00 plus shipping.

Pictures and details available at:

http://af4k.com/radios.htm

FS: Pencil Tubes & Shields

Shields (13), 5702's (at least 20), 5840's (at least 9), Others include
5829's, 5896's, 6111's, 6147's 5899A's, etc. Maybe 100 in all? Labels
include GE, Raytheon, US Army, a "CK" prefix, etc.

Some are trimmed for sockets, some have long leads, some are clearly
used, some very clean. A random test suggests that most are good.

Asking $42.50. for it all, including shipping USPS Priority Flat Rate.

FS: Samsung Tab 4 7" Tablet
Barely used Samsung Tab 4 7" Tablet with charger and combo protective
case & stand.
Works fine and looks great. Was going to use for mobile/portable Ham and
other purposes but am not doing so - need funds for other projects.
Asking $175. (or best reasonable offer) shipped USPS Priority Flat Rate USA.

MFJ-8621 2m Data Radio - clean and working fine.

Dedicated high performance packet from 1200 to 9600 baud.
25 mA receive, less than 1 amp transmit.

"... Motorola based receiver recovers data from weak signals for
better throughput and fewer collisions. The filtration is made
for data including wide 9600 baud and 1200 baud signals."

5 watt transmitter optimized for data transmissions.
Supplied crystal is 145.01 MHz. (Others may be substituted).
Compatible with virtually all up-to-date TNC-2 modems.
Info source: http://www.universal-radio.com/catalog/tnc/2026.html

Asking $52.50 shipped in USA.

8523. Power Supplies FS

Yahoo group: ham4sale (2007 — 2015)
Date: 2015-03-25 16:59:45 UTC
From: Ken Simpson, W8EK
Topic: 6888 Message: 8523

Power Supplies For Sale:

Regulated 13 Volt DC power supplies:

Audio Authority 50 amp power supply:

This supply is a 13 V DC power supply rated at 50 amps
continuous, and up to 300 amps peak. It is a linear
supply, and not one of the new switching type supplies,
which means this one does not create electrical noise.
The instructions warn you to allow plenty of room for
adequate ventilation!

This one looks very nice, and functions well. With paper
work for $150. Needless to say, it is very heavy! Pick
up near Ocala, FL is best, although it can be shipped if
necessary. Obviously, shipping is not included in the
$150 price.

Astron SS-30 M, 30 Amp Power Supply:

The SS-30 M will deliver 13 V DC at 25 amps continuous and
30 amps intermittent. It has both an ammeter and voltmeter
on it. Current limiting and over voltage protection are built
in, as is over temperature shutdown. This is a very efficient
supply, which includes extra EMI filtering.

This particular supply works fine, and looks exceptionally nice.
I can not find a scratch on it.

Paper work is included for $100.

Icom PS-30 DeLuxe Power Supply:

The Icom PS-30 power supply delivers 13.8 VDC at 25 amps. This
power supply features a meter which can be set to display amperage
or voltage. Four outputs are provided on the rear panel. Output 1
is a hard wired, high amperage cable with the Icom standard 6 pin
Molex plug. Outputs 2, 3 and 4 provide low current outputs. This
power supply has a snap-out tilt bracket. 9.5 x 5 x 12.5 inches.

This one works 100% and looks extremely nice.
With paper work for $175.

TenTec Switching Power Supply:

"Switcher / 25" 25 amp switching power supply:
This is a 25 amp switching power supply in a case that

matches the early Omni (545/546) series, with the metal bezel around it. It is in a case that is the same size as a 243 remote VFO. It has an ammeter on the front, along with Switch, TenTec logo, and output bulb. The front panel basically looks like a 280 power supply with a metal bezel, but says "Switcher/25" on it. It is very quiet, and well shielded, and does not produce any electrical noise that I could find. $140

Kenwood PS-30 power supply

The Kenwood PS-30 power supply has the 6 pin molex connector as used by most Kenwood and some Icom and Yaesu rigs, plus a lower current output.

It is a very heavy duty supply, providing 13.8 VDC at 20 amps intermittent or 15 amps continuous. The PS-30 may remotely switched on and off with the power switch on the rig. It features large heat sinks and automatic overload reset. Ripple voltage is less than 20 mV at 13.8VDC 20 A. 7.2 x 5.3 x 11.5 inches, 19.6 Lbs

It works fine and looks very nice. With paper work for $125.

Pyramid Phase III, 20 amp power supply:

This power supply will furnish up to 20 amps at about 13.8 Volts DC, which makes it ideal for many high power VHF / UHF rigs, and OK for some HF rigs. It includes an ammeter on the front panel.

This unit works fine, and looks very nice.

With paper work for $50.

EVG Model 10-395, 4 amp power supply
This supply is regulated, with switch and pilot bulb on the front, and binding post output on the rear panel, along with the fuse. It works fine and looks good. $30

Micronta 22-120 A
This supply is rated at 2.5 amps. It is well regulated. It has a switch and LED light on the front, with a circuit breaker and output terminals on the back. The case (left & right side & top) is basically all a heat sink. This one works fine and looks like new. No scratches. $30

Homebrew Power Supply:
This power supply is in a very nice gray and black enclosure with binding posts for the output on the front, along with a pilot bulb and power switch. The back panel has a fuse and the regulator. It looks to be good for about 1.5 amps.
It works fine and looks really great. No scratches or defects. $15

Other power supplies:

Eico 751 AC power supply / Speaker:

This power supply is used with tube type transceivers. It includes a speaker as well as the power supply in a very nice cabinet. It was designed to be used with the Eico 753 transceiver, but can be used with most any of the tube type rigs from the 1960's and 70's.

The manual says it provides the following voltages:
750 V DC at 300 ma High Voltage
280 V DC at 170 ma Low Voltage
-100 V DC at 5 ma for bias
12.6 V AC at 4 amps for filaments

This supply comes from a silent key estate; I am sure it has not been used for years. I do not have a rig to test it, but would expect it to work fine, but the filter capacitors likely will need to be replaced, as is the case with any of the units of this vintage.

With manual for $120.

Kepco Variable Bench Power Supply:

This is an ideal bench power supply! It is a Kepco Model ABC 40-0.5, which means that it will produce from zero up to 40 V DC at up to 1/2 amp. Great for the bench.

The voltage is adjustable with a 10 turn pot from close to zero, up to about 40 volts. There is a fairly large analog meter that reads the voltage. There is also current limiting built in that is adjustable from about 100 ma to up to about 700 ma. The same meter that reads voltage can be switched to read current, or short circuit current (the point that the current limit is set). In addition, there are connections on the back to allow remote sensing and remote programming. This is a quality regulated power supply!

This particular unit works 100%, and looks extremely nice. $85

"Wall Wart" Power Supplies:

All of these are "regular" wall warts - not the new switching type that create all sorts of noise in your receiver. Use one of these, and you will not need to put up with all of the interference.

There are many uses for the 12 volt variety.
These all have 2.1 mm coaxial connectors with center positive.
12 V DC at 800 ma $15
12 V DC at 625 ma $14
12 V DC at 500 ma $12
12 V DC at 300 ma $10

13.5 V DC at 800 ma $16

12 Volt AC at 1 amp - Note it is AC, not DC. $15

9 Volt DC at 500 ma
This unit was used on a MFJ 422 keyer, but will also power other items needing 9 V DC. It has a 2.5 mm male plug on it, tip positive. $12

Icom BC-25 / Santec HT Charger
Same thing, with slightly different tags. Used with Icom IC-2AT, 3AT, 4AT, IC-32, and many other Icoms. Used with Santec HT-1200, ST-142, ST-144, and other Santecs. This is the same as the original wall wart that came with these HTs. 2.1 mm coaxial power plug output, with center +. Still in box, unused. $15

I also have many other accessories available such as many different types of microphones, HTs, VHF and UHF rigs, antennas, etc. Just too many things to list here.
Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

8527. Icom HF Xcvr, Speaker, and more FS

Yahoo group: ham4sale (2007 — 2015)
Date: 2015-04-01 13:02:18 UTC
From: Ken Simpson, W8EK
Topic: 8527 Message: 8527

Icom and related items For Sale --
Deluxe HF Transceiver, Power Cable, Speaker / Phone Patch,
Hand Microphones, Many HT Accessories including batteries,
Original Boxes, Cable, Speaker Microphones, Communications
Speakers, Manuals, and other Miscellaneous Items

Icom IC-756 Pro II HF plus 6 meter Transceiver:

This rig will do it all! It has so many bells and whistles that
I am certain you will not use them all. It transmits on all ham
bands from 160 thru 6 meters, and receives from 30 KHz to 60 MHz.
The color LCD display provides all sorts of information, including
a real-time spectrum scope. The ProII has a DSP Digital IF filter
with 51 selectable bandwidths. You also get a microphone equalizer,
manual notch function, twin peak audio filter, digital twin pass
band tuning (PBT), all mode squelch, multi-function analog meter,
and much more.

For more info
http://www.universal-radio.com/catalog/hamhf/1756.html

This particular unit is immaculate. I can not find a scratch or
defect on it. Power output is 100 to 105 watts on all bands 160
thru 6 m. Receive is great. You will not be disappointed!

With mic, power cord, and paper work for $1200.

DC Power Cable

This is the heavy duty power cable as used on most of
the Icom HF rigs, plus also many Kenwood, Alinco, and others.
It has the 6 pin molex connector, with four pins used - two
for plus and two for ground. The cable may not have ever
been used. It looks good, and of course works fine. $22

Icom Speaker / Phone Patch

Although a phone patch is included, this is also a very nice speaker
with Icom styling.

This one works fine and looks great. $65

Icom HM-14 DTMF Touch Tone Microphone:

The Icom HM-14 has the standard round 8 pin connector as used
by most Icom radios. It has a 16 digit DTMF Touch Tone pad on
the back. It will work with the IC-25A, 28, 38, 45, 48, 77, 78,
120, 229, 271, 275, 290, 375, 451, 471, 475, 505, 575, 707, 718,

725, 728, 729, 735, 736, 737, 745, 746, 751, 756/PRO, 761, 765,
775, 781, 820H, 821H, 900, 901, 970, 1201, 1271, 1275, 2400,
3200, 3210, and probably others. It can be used to add a DTMF
microphone to a rig that does not normally have one.

This one has good audio quality, all 16 digits on the DTMF pad
work like they should, and the coiled cord is in extremely good
shape. $40

Icom HM-36 Hand Microphone:

The Icom HM-36 is used on most of the Icom HF rigs. It has
a round 8 pin plug, making it compatible with almost any of
the Icom rigs with this connector. This includes the IC-746
and 756 series, plus many more. It can also be used on VHF
UHF rigs.

It also has up / down buttons on the top for changing the frequency.

This one works 100% and looks like it is new. It likely was put
in a drawer after receiving it with a rig, and never used. $35

Extra mobile mounting bracket for IC-28 (or any rig needing a
5 1/2 inch wide bracket) $15

Accessories for Icom IC-2A, 3A, 4A, 02 A, etc. series of HTs:

Icom DC-1, 13 V DC adapter for many Icom HTs:
This adapter slides on the HT, in place of the battery
pack. If 13 V DC is applied, it converts the voltage to
the proper voltage for the HT. This one works fine, and
looks fine. With paper work for $12.

Icom CP-1 DC cord
This cord will work with the DC-1 above, plus many other
items needing the 2.1 mm coaxial power plug. The opposite
end has a cigarette lighter plug on it. $10

Belt Clip for the above HTs.
Complete with hardware. $6

Batteries for Icom IC-2 AT series of HTs:

These items can be used on the IC-2 A, 3 A, 4 A, 02 A,
03 A, 04A, 2G AT, 32 AT series HTs plus many others.

Icom BC-25 U wall charger
Standard wall charger for most of these HTs. $15

Icom BP-3 Battery pack
This was the "standard" battery that came with many of
these HTs. It can be charged with a BC-25 U wall charger,
or the BC-30 or BC-35 desk chargers, or with 12 V DC.
This one appears to hold a charge OK. $10

Icom BP-5 Heavy duty battery pack
For rebuilding only. Battery is dead. $5

Original Boxes for Icom IC-27 mobiles and IC-V8 HT:

The box for the IC-27 includes the two internal
styrofoam inserts that holds the rig, the cardboard
box for accessories that also acts as a spacer,
and even includes the original plastic bag for
the rig.
It is in nice condition. $8

Original box for Icom IC-V8 HT
Complete with insert. Looks like new. $8

Several Speaker Microphones:

All of these speaker mics have the 3.5 mm and 2.5 mm two
conductor plugs that are spaced about 3/8 inch apart, and
are molded into a single connector. They are used on Icom,
Yaesu, Radio Shack, Maxon, Ritron, Vertex and many other
radios.

Premier SPM-100
It is a lightweight and compact unit, featuring a powerful
speaker as well as a high-quality condenser-style microphone
element that produces excellent transmitted audio clarity.
The microphone may be secured to the user's lapel or shoulder.
It also features a built-in 3.5mm jack for using an external
earphone. $18

DM-100
Appears to be the same as the SPM-100 above, but just with
a different label. $18

Icom Battery Charger:

Icom BC-127 A, Battery Charger for Icom IC-Q7A Dual Band HT:
This charger charges two AA NiCads (or NiMH) for the
IC-Q7 A Dual band HT, and Icom R-2 receiver, and probably
others.
This appears to be new, unused, still in its bag.
Icom lists them at $21. Buy this one for $12.

Communications Speakers:

Realistic 21-549 A
This speaker is about 4 inches square and about 2 inches
deep. It is rated for 5 watts, has an 8 ohm impedance, and
is listed as a 300 to 3000 Hz frequency response, making it
ideal for communications. It has a 3.5 mm (1/8 inch) mono
plug, as used by most modern rigs. Gimbal mount included.
It is black in color, looks great, and sounds great. $12

Vanco SPB-5
Appears to be the same at above, but with a Vanco label.
Also includes gimbal mount. $12

Vanco SPB-6
Similar to SPB-5 above, but is considered a noise
cancelling speaker. 10 Watt rating. Still in original
box, new. $18

HT Belt Clips and Wrist Straps:

Belt Clips:
All include the hardware with the belt clip and are $6 each.
Icom IC-2 AT
Kenwood BH-6
Motorola
Yaesu FT-207
Yaesu FT-209

Wrist Straps for various HTs - $4 each
Kenwood TH-215 / 225 / 415, TR-2500, etc.
Kenwood TR-2400
Yaesu FT-209

Antennas for your HT:

All rubber ducks are for 2 meters, are in good
condition, and are $10 each, unless stated otherwise.

BNC - Dual Band (2 m and 440 MHz) Telescoping antenna
provides significant gain when extended, $18

BNC - As used on most HTs, 7 inches long

BNC - Original Alinco EA0024, about 4 inches long

BNC - Original from Kenwood TH-215, about 5 inches long

BNC - "Stubby" about 4 1/2 inches long

Type F connector - 6.5 inches long

BNC Stubby for 440 MHz, 3 inches long

Threaded (as used by Motorola, etc.) stubby for 440 MHz

Not a Rubber Duck, but can be used on your HT:
Telescoping Antenna w/ BNC about 19 inches long
can be used as a quarter wave antenna on 2 m,
or on 220, or 450 MHz if telescoped shorter. $12

ORIGINAL Icom operating manuals:

Please note that all of these are original Icom manuals
and are not copies. All are in very good condition.

These are original Icom manuals only.

SPECIAL:
Buy two, three, or four manuals and take 10% off.
Buy five or more and take 20% off.

Mobile transceiver and HT manuals:
IC-2 AT, 2 meter HT, still in plastic bag, $6
IC-22 A, 2 m FM transceiver, $10
IC-22 S, 2 m FM transceiver, $12
IC-27 A/E, 2 m transceiver, still in plastic bag, $15
IC-27 H, 2 m FM transceiver, $12
IC-28 H, 2 m FM transceiver, $12
IC-290 H, 2 m FM transceiver, still in plastic bag, $15
IC-736/738, HF + transceiver, $20
IC-751, HF transceiver, still in plastic bag, $22
IC-820 H, Dual Band Transceiver, original, $18
IC-820 H, good copy, not original $10
IC-3200 A/E, Dual Band FM Transceiver, $15
IC-V8, 2 meter HT, $6

Other Icom manuals:
BC-30 Desk Charger, $4
BC-35 Desk Charger, $5
BP-2, BP-3, BP-4, BP-5 battery packs, $3
BP-21, BP-22, BP-23, and BP-24 Batteries, $3
DC-1 DC pack for IC-2 AT series HTs, $4
EX-310 Voice Synthesizer, $5
HM-8 Hand Microphone, w/schematic, $5
HM-10 scanning microphone, $3
IC-3 PA Power supply / speaker, $10
MB-5 mobile bracket, $2
MB-65 mobile bracket mount, $2
RC-10 Frequency controller, $4
SM-5 desk microphone, $3
UT-16 Voice Synthesizer, $5

These are original Icom manuals only.

I also have many other accessories available such as many
different types of microphones, HTs, HF, VHF and UHF rigs,
HF and VHF/UHF antennas, HF linear amplifiers, and many
other accessories.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

8528. FS: Pencil Tubes & Shields

Yahoo group: ham4sale (2007 — 2015)
Date: 2015-04-04 23:03:16 UTC
From: qrv@kd4e.com
Topic: 8528 Message: 8528

Pencil Tubes 5702's (at least 20), 5840's (at least 9), Others include
5829's, 5896's, 6111's, 6147's 5899A's, etc. Maybe 100 in all? Labels
include GE, Raytheon, US Army, a "CK" prefix, etc.

Some are trimmed for sockets, some have long leads, some are clearly
used, some very clean. A random test suggests that most are good.

Asking $41. for it all, including shipping USPS Priority Flat Rate.

8529. FS: 3 element 6m yagi

Yahoo group: ham4sale (2007 — 2015)
Date: 2015-04-05 18:31:39 UTC
From: John Geiger
Topic: 8529 Message: 8529

I have for sale a MFJ 3 element 6m beam for anyone looking to get on 6m or improve their 6 meter setup. Has a 6 foot boom and weighs 2 pounds. It comes with a coax choke/pigtail and SO239 double female jack so you can hook your coax right up to it and go, instead of having to make up the coax pigtail yourself.

I am asking $65 for it. Can drop it off in OKC on Monday afternoon. Will be going to Wichita Thursday/Friday so can drop it off anywhere between Lawton and Wichita on Thursday evening or Friday late afternoon.

Easy to disassemble for transport. Should fit as is in a truck or minivan.

Comes with manual and boom to mast clamp as well. Will ship at buyer's expense. Can take paypal/check/MO/cash.

Topic: 8530 Message: 8530

I have for sale an MFJ 1890 2 element Moxon Yagi. I put it up in November and have worked 135 countries on 10m with it since then, including China, Hong Kong, and Malayasia. In very good shape, with manual. These cost $80 new plus shipping. I am asking $70 for it. I will be in Oklahoma City on Monday, April 6 and again in the OKC and Wichita, KS areas April 9-10 for in person deals. I have the box and will ship at buyer's expense.

From: Fred
Topic: 8531 Message: 8531

I have for sale a TT525D with microphone. The radio as far as I know has filters but no NB option. Radio receives and transmits well and was used last fall in the ARRL 10 meter SSB contest at QRP levels.I also have a Bux-Comm that was wired for Ten-Tec that will come with it with all cables that should allow digital use.
I am selling for $325.00 shipped in Canada, $360.00 shipped to the USA.

Selling a pristine fully working Motorola MSF-5000 VHF analog base station with interconnect. Its still on commercial frequencies,selling for a lack of being able to find someone to reprogram it. This base is 100% duty cycle and has one of the best recievers ever built. A prime candidate for a kick butt 2 meter repeater. No shipping,this beast is pick up only in Erie,PA priced accordingly. 814-5206317

I have for sale a Diamond A430S15 15 element UHF beam. About 4 months old. Comes with box and manual as well. Still in great shape.

You can read more about it here: http://www.diamondantenna.net/a430s15.html These sell new at Ham Radio Outlet for $90 plus shipping.

I am asking $70 plus shipping or pickup in SW Oklahoma/Northern Texas.

8562. Baofeng UV-82 dualband HT package FS

Yahoo group: ham4sale (2007 — 2015)
Date: 2015-05-19 13:38:58 UTC
From: af5cc@...
Topic: 8562 Message: 8562

I have for sale a Baofeng UV-82 2m/70cm HT. About 3 weeks old. Comes with antenna, charger, box, manual-all of the standard accessories. Does 5 watts on each band, does dual receive and broadcast band FM receive. These sell new at R and L electronics for $45.

In addition I have 2 optional accessories I am including in the HT package. The first is Baofeng speaker/mic. Works with most Baofeng/Wouxun HTs including the UV-82, except on that HT you can only transmit on the B VFO using the speaker/mic.

The second item is a SO239 to SMA jumper coax/adapter. Allows you to connect the Baofeng to an external antenna. Radio Shack sells these for $20.

I am asking $40 for the package plus $7 for shipping. You can also pick it up in SW Oklahoma/North Texas.

8571. FS: 215WB 2 meter beam for sale

Yahoo group: ham4sale (2007 — 2015)
Date: 2015-05-30 19:37:41 UTC
From: John Geiger
Topic: 8571 Message: 8571

I have for sale a Cushcraft 215WB two meter beam. 15 elements on a 15 foot boom, 15.5 dB forward gain. 24 DB F/B radio. Great antenna. Good condition it just needs a boom to mast clamp, something you can probably make up yourself. I am asking $60 for it plus shipping. Pickup is also possible in SW Oklahoma. I can take paypal/check/MO.

73 John AF5CC

8572. For sale: 4 stacked 432 antennas

Yahoo group: ham4sale (2007 — 2015)
Date: 2015-05-31 19:16:25 UTC
From: John Geiger
Topic: 8572 Message: 8572

I have for sale a set of 4 10 element 70cm antennas. These have 6 1/2 foot booms and are end mounted. With these antennas comes the H frame stacking framework with mounting brackets. The stacking distance is 3 feet by 4 feet. It also comes with the power divider for the 4 yagis. Everything you need to get the 4 bay system going is there. The antennas are homebrew but very well made, resembling M2 yagis. This system has been used for 70cm EME with good results. The 4 antennas have a common horizontal cross boom to mount in an elevation rotor if desired.

I would prefer a face to face deal but shipping is possible if you are willing to pay shipping. I can meet someone in the OKC area, around the Dallas/Fort Worth area, SW Oklahoma or North Texas. You can come to Lawton, OK and pick them up also. It might be possible to deliver this setup to Central States conference in July as well.

I am not sure exactly what these are worth, but will entertain offers. This setup will give you a big signal on 432, that is for sure.

I have for sale a brand new, never used Signalink USB by Tigertronics with the mini 6 DIN cable. This is the model with the built in soundcard so you are not tying up the one in your computer. It gets its power thru the USB jack as well. This will work with the Icom 706MKIIG/FT100/FT857/FT897 series of radios. If you want to use it with the Icom 706 original or 706MKII, or other radios, you will need to buy a different adaptor cable. These sell new for $100 plus shipping, I am asking $75 shipped and can take paypal/check/MO.

"Does it all" digi-mode box that goes between your computer and rig to handle the messy stuff - and take a load off your computer.

Lots of free and commercial software out there.

I have three of these, just found one that's the same version as my other one (it will be my backup) so this is an extra.

Minor marks on the case, otherwise in nice shape. It's just the device, no cables included. Manual and tons of information is online. There's also at least one discussion list & these are referred to constantly on most of the digi-mode lists.

Pictures on request.

Asking $37.50 including shipping to standard USA addresses.

8586. Yaesu Vertex VX1210 for sale or trade

Yahoo group: ham4sale (2007 — 2015)
Date: 2015-06-15 15:32:48 UTC
From: flesnick@...
Topic: 8586 Message: 8586

I have a lightly used VX1210 and a whack of extras that I am selling or will trade for a fully loaded KX3.

I have a Vertex VX-1210 with loads of extras for sale.
This radio has seen very little transmit time and has been used mostly for listening.
The specs are:
Frequency Range RX: 0.5 - 30 MHz
TX: 1.6 - 30 MHz
Number of Channels 500
Emission Type A1A(CW); J3E(LSB/USB); H3E(AM); FIB(AFSK)
Power Requirements DC 14.8 V Lithium-ion Battery
Recharge Time 5 hours (typical)
Channel Spacing 10 Hz
Current Consumption RX: 500mA (saver off), 100mA (saver on)
TX: 5A (20 W), 3A (5 W)
Operating Temperature Range -30ºC to +60ºC
Antenna Impedance 50 Ohms (unbalanced)
Dimension (H x W x D) 193 x 74 x 274 mm w/o knobs
Weight (Approx.) 3.2 kg w/FNB-66LI
Receiver Specification
Circuit Type Double Conversion Super Heterodyne
Intermediate Frequency 47.055 MHz & 10.7 MHz
Sensitivity 0.25 µV (J3E/AIA, 10dB S/N)
Selectivity 2.4 kHz / 5.0 kHz (-6/60 dB)
Clarifier Adjustment Range ±200 Hz (J3E/AIA/FIB), ±400 Hz (H3E)
IF and Image Rejection 80 dB
Audio Output At least 1.5 W @ 4 Ohms @ 10% THD
Audio Impedance 4 - 32 Ohms
Transmitter Specification*
Output Power 20W / 5 W (J3E/AIA/FIB)
10W / 2.5W (H3E)
Duty Cycle 25%
Modulation Balanced Modulator (SSB:J3E) Early Stage / Low Level (AM:H3E)
J3E Carrier Suppression 55 dB
Undesired Sideband Suppression 55 dB @ 1.5kHz tone
Spurious Emission -56 dB or better
Audio Response (J3E) 350 - 2650 Hz (-6 dB)
3rd-order IMD -31 dB
Microphone Impedance 2K Ohms, condenser type

Included are the following:

MH-50B7A: Speaker microphone
FNB-66LI: 14.8V Lithium-ion battery pack
And I have a second battery only charged once ($400.00 new)

CD-17: Rapid charger
PA-26: AC Adapter
ATU-1210: Internal antenna coupler
SEL-1200: SELCALL unit
GN-1210: Goose neck connector
SVC-1200: Service Kit
DSV-1200: D-sub 9-pin connector unit
YHA-61 5' HF Whip Antenna
CSC-78 Shoulder Carrying Bag

Asking $1700.00 plus actual shipping.

Please contact me directly if interested and serious inquiries only please.
This would have to ship in 2 separate packages because antenna would require a tube.
Shipping will be actual cost quoted at Post Office or UPS/FEDEX in Canada.

US shipping will be much more and will also require a quote.

8587. SALE: Icom IC-7800 & Icom IC 756 Pro III

Yahoo group: ham4sale (2007 — 2015)
Date: 2015-06-18 06:17:43 UTC
From: g.johnr@...
Topic: 8587 Message: 8587

Icom IC-7800 version 2 with 3 Roofing filters (15,6 & 3 kHz) and the latest 3.10 firmware. Included is the matching SP-20 Speaker.
The radio and speaker are both in excellent condition. No dents of any kind. Smoke-free home. Everything works! Selling because I don’t need two – replaced this radio with IC-7850.
Supplied accessories include printed Factory IC-7800 instruction manual & printed 2013 color instruction manual complete with firmware updates, AC power cable, Antenna jumper cables, Rack mounting handles & screws, Compact Flash memory card, 1-pair front stands, and Main dial.
Radio will be shipped in the original factory double box with speaker packed/shipped separately.

$4,750 shipped CONUS.

Email : g.johnr@yahoo.com

Icom IC 756 Pro III in excellent condition w/options and extras!

Outfit includes power supply, 2 external matching speakers, hand mic, Behringer XM 8500 studio mic, Heilsound mic cable, boom, homebrew PTT switch, voice synthesizer, original instruction manual with schematics, ring binder copy of manual and factory boxes for transceiver and speakers.

$1250 Shipped ConUS.

For sale:

1) The Heathkit SIXER has been sold.

2) Hallicrafters SR46 Transceiver with HA26 VFO and microphone.
120V AC operation. All in very good condition.
SR46 transceiver - $65.00
HA26 VFO - $25.00
Mic - $15.00
ALL of the above for $75.00

CLEGG 22er AM/CW Transceiver - excellent condition
Includes a crystal for 144.450 MHz AM. Built in 120V AC power supply.
Only $75.00 plus shipping

AMECO 2m converter
Extra nice with a shiny copper chassis
Only $25.00

Pictures available on request - e-mail me with inquiries or to arrange purchase.

From: adastra_2001@...
Topic: 8589 Message: 8589

I have a linear built by a SK, WA2CRI. It uses a pair of 8873 finals. The circuit is the one from October 1973 QST. Henry (the SK) built it as near as I can tell, exactly from the article. I am a QRP digital guy. I'd like to get rid of this at a fair price. It has the power supply as well. It is very heavy so local pick up from Brooklyn NY is the best method. If their is interest I will post pictures here. When I saw his log I didn't see any mention of using this amp. Thanks for reading this message. 73 AF2RF

8590. MFJ 15m Moxon yagi for sale

Yahoo group: ham4sale (2007 — 2015)
Date: 2015-06-24 18:32:57 UTC
From: John Geiger
Topic: 8590 Message: 8590

I have for sale a 3 month old MFJ 1895 2 element Moxon Yagi. The elements are 16 feet long with a boom length of 6 feet, and it weighs about 8 pounds. This is an excellent performer, just a little big for my current setup and I already a multiband Mini Quad.

These sell new for $105 at HRO, I am asking $85 shipped for it. Pickup in Oklahoma is also possible. I also have a roof tripod and some 6.5 foot masts I can sell also with a local deal.

FOR SALE: Heathkit Items

1) Heathkit QF-1 accessory Q Multiplier. Great for peaking up the selectivity and gain of your homebrew or boatanchor receiver. In very good condition.
Available for $25.00

2) Heathkit SB-303 or SB-500 Cabinet, Excellent Condition.
Here's a very nice cabinet for the SB-303 receiver. If your radio or tranbsverter is betting a bit
grubby-looking, make it look like new. It has been stripped and painted and looks great.
Available for $19.00

3) Heathkit DX-100 AC power cord - very good condition, with fuses - $5.00

4) Heathkit DX-100 - 4 terminal fixed loading capacitor - $4.00

5) Large Bag of Hardware from a Heathkit DX100, mostly screws, washers etc.
- All for $5.00

6) Set of knobs for Heathkit DX100, DX40 etc. 4 large gray knobs,and 3 small gray knobs. in very good condition. All for $15.00

7) Heathkit DX-100 Driver Coil - tapped for all the bands. Excellent.
Available for $12.00

8) EICO 1171 Decade Resistance box, excellent condition - $35.00

E-mail me for pictures or details.
Shipping is additional on all items above.

73 - Bry Carling, AF4K

8592. FOR SALE: SB-220 CONVERTED TO 6 METERS

Yahoo group: ham4sale (2007 — 2015)
Date: 2015-06-24 17:01:06 UTC
From: dickw1ksz@...
Topic: 8592 Message: 8592

I have an SB-220 for sale that I converted to 6 Meters. I used the April, 2008 QST article as a guide, with a couple of small changes that I discussed with the Author(s). I also gleaned several tips from other sources.

The Amp put out 1,100 Watts, Key Down (no PEP magic here), at which point I quit.
I ran it at 800 Watts out, if for nothing else, to keep the Heath Plate Transformer from giving up the ghost (after all it is only a 600 VA Transformer).
It is quite stable, I could not make it go into oscillation.
The Amp also includes the full gambit of Harbach Mods (Soft-Key, Soft-Start, new Meter Board, Fan and the Filter Cap/Bleeder Resistor Mod).

The Plate Transformer is removable, per the article, to make carrying it around easier.

It comes with a folder full of information, including a copy of the April 2008 QST, an Original SB-220 Heath Manual, and assorted other bits of information. I will also include a CD with additional information.

Asking price is $700, PICK-UP ONLY IN VAIL, AZ (20 miles SSE of Tucson).

I have two NIB sets of RF Parts 3-500Z’s, one a matched pair, that I will also sell for $250 a pair, but only with the Amp or after it is sold.

Yahoo group: ham4sale (2007 — 2015)
Date: 2015-06-28 16:37:59 UTC
From: Tim Haake
Topic: 8596 Message: 8596

Hello.
I am looking for any of the Ameco 144Mc, or 220Mc, or 50Mc converters and their accessories, (pre-amps and power supplies).
I want to put together working units for all three bands. There seem to be several versions of each some with nuvistors and minature tubes (Cn-50, CN-144, CN-220) and some only with minature 7-9 pin tubes.

THanks
Tim WA0TSY

8597. FS: MFJ-202 Noise Bridge

Yahoo group: ham4sale (2007 — 2015)
Date: 2015-06-30 13:49:51 UTC
From: Bry Carling AF4K
Topic: 8597 Message: 8597

FOR SALE: MFJ-202 Noise Bridge

This noise bridge can be used with any radio. It is used to determine the value of unknown antenna impedance etc. A 9-v battery is used to power the noise bridge (not supplied). A manual for the model 202B is included.

Quickly adjust almost any antenna for maximum performance, 1 to 100 MHz.

Lengthen or shorten your antenna for minimum SWR. Measure resonant frequency, feedpoint resistance and reactance.

Works with any receiver or transceiver.

Hand-calibrated resistance scale, expanded capacitance range.

Dimensions: 4-1/4" Wide x 2" High x 4" Deep

Available for $35.00 plus shipping

8602. For Sale: 56 ft Rohn 45 Tower & Accessories

Yahoo group: ham4sale (2007 — 2015)
Date: 2015-07-04 23:41:31 UTC
From: J. Gordon Beattie, Jr.
Topic: 8602 Message: 8602

Hi Folks!

My Rohn 45G tower has five full 10 ft sections and an 6 ft top section which can be used in embedded concrete base OR you can use the tilt base which is also provided!

I also have a stub base and a 9 ft section as a bonus that can be embedded in concrete to make a short tower for an EME or satellite array.

Included are two sets of guy brackets, guy anchor plates and guy wires.

This tower is in excellent condition and will meet the needs of any Amateur who wants to have something a bit easier to climb and load up with antennas!

$1,100 takes it. Delivery within 200 miles of 07621 available.

Photos on request.

From: robert
Topic: 8606 Message: 8606

Hello group:

I had to sell my TS-430 a while back to have some funding for a new business. I am now looking for an older HF rig at a decent price. My son, who is 11, just got his technician last month and is interested in getting his general, but I don't have a radio to show him what can be done. If anyone has or knows of an older hybrid or solid-state HF transceiver, please let me know.

8607. Vertex VX-1210 for sale or trade

Yahoo group: ham4sale (2007 — 2015)
Date: 2015-07-10 20:44:26 UTC
From: Fred
Topic: 8607 Message: 8607

I have a Vertex VX-1210 with loads of extras for sale.
This radio has seen very little transmit time and has been used mostly
for listening.
The specs are:
Frequency Range RX: 0.5 - 30 MHz
TX: 1.6 - 30 MHz
Number of Channels 500
Emission Type A1A(CW); J3E(LSB/USB); H3E(AM); FIB(AFSK)
Power Requirements DC 14.8 V Lithium-ion Battery
Recharge Time 5 hours (typical)
Channel Spacing 10 Hz
Current Consumption RX: 500mA (saver off), 100mA (saver on)
TX: 5A (20 W), 3A (5 W)
Operating Temperature Range -30ºC to +60ºC
Antenna Impedance 50 Ohms (unbalanced)
Dimension (H x W x D) 193 x 74 x 274 mm w/o knobs
Weight (Approx.) 3.2 kg w/FNB-66LI
Receiver Specification
Circuit Type Double Conversion Super Heterodyne
Intermediate Frequency 47.055 MHz & 10.7 MHz
Sensitivity 0.25 µV (J3E/AIA, 10dB S/N)
Selectivity 2.4 kHz / 5.0 kHz (-6/60 dB)
Clarifier Adjustment Range ±200 Hz (J3E/AIA/FIB), ±400 Hz (H3E)
IF and Image Rejection 80 dB
Audio Output At least 1.5 W @ 4 Ohms @ 10% THD
Audio Impedance 4 - 32 Ohms
Transmitter Specification*
Output Power 20W / 5 W (J3E/AIA/FIB)
10W / 2.5W (H3E)
Duty Cycle 25%
Modulation Balanced Modulator (SSB:J3E) Early Stage / Low Level (AM:H3E)
J3E Carrier Suppression 55 dB
Undesired Sideband Suppression 55 dB @ 1.5kHz tone
Spurious Emission -56 dB or better
Audio Response (J3E) 350 - 2650 Hz (-6 dB)
3rd-order IMD -31 dB
Microphone Impedance 2K Ohms, condenser type

Included are the following:

MH-50B7A: Speaker microphone
FNB-66LI: 14.8V Lithium-ion battery pack
And I have a second battery only charged once ($400.00 new)
CD-17: Rapid charger
PA-26: AC Adapter

ATU-1210: Internal antenna coupler
SEL-1200: SELCALL unit
GN-1210: Goose neck connector
SVC-1200: Service Kit
DSV-1200: D-sub 9-pin connector unit
YHA-61 5' HF Whip Antenna
CSC-78 Shoulder Carrying Bag

Please contact me directly if interested and serious inquiries only please.
This would have to ship in 2 separate packages because antenna would
require a tube.
Shipping will be actual cost quoted at Post Office or UPS/FEDEX in Canada.

US shipping will be much more and will also require a quote.

I will entertain the trade/swap of a Elecraft/Yaesu radio of same value
with built in tuner.

Tablet is like this one:
http://www.ebay.com/itm/Samsung-Galaxy-Tab-2-7-0-GT-P3113TS-8GB-Wi-Fi-Pre-Owned-Free-Ship-Buy-it-Now-/311394831017?pt=LH_DefaultDomain_0&hash=item4880940aa9

Case/keyboard is like this:
http://www.ebay.com/itm/Bluetooth-Silicone-Keyboard-With-Case-For-Samsung-Galaxy-Tab-2-7-Tablet-P3100-/190827151895?pt=LH_DefaultDomain_0&hash=item2c6e2f4217

Also included is the charger.

AND ...

BAOFENG UV-82 2/440 HT (lightly used w/protective plastic
still on display).

WANTED: Something for HF SSB. (Traded my best rig for a car then
sold my backup for repairs.) Need a transmitter or a transceiver
(transceiver preferred for simplicity, but I do have an Elmac
PMR-6a receiver I can use), and must either work with a Heath
HP-23A PS or include a PS (if 12vdc I have a PS for that). Prefer
160-10m but 80-10m considered. WARC coverage, esp. 17m, sure would
be nice. Must be in good working order but doesn't have to be pretty.
Homebrew is fine. Solid state, hybrid, or all tube is fine.

CASH: I may be able to add a little cash, perhaps cover shipping,
depending on the rig.

8609. Ranger RCI-2950, 10 meter multimode transceiver FS

Yahoo group: ham4sale (2007 — 2015)
Date: 2015-07-12 18:24:39 UTC
From: Ken, W8EK
Topic: 8609 Message: 8609

Ranger RCI 2950, 10 meter Multimode Transceiver For Sale:

The RCI 2950 is a 10 meter transceiver that has about 50
watts output, and is literally "all mode" with SSB, CW, AM,
FM, and will even do digital modes with the proper interface.
It has memories, scan, split operation, a noise blanker,
and a nice LCD display.

This particular unit works fine and looks great. Of course it
has a mic, power cord and paper work included.

$165 plus shipping from Florida.

I also have many other accessories available such as many
different types of microphones, HTs, HF, VHF and UHF rigs, HF
and VHF/UHF antennas, etc.
Just too many to list here. Please e-mail your requests.

Thanks.

73,

Ken, W8EK

8615. TenTec Jupiter HF Xcvr, Speech Processor and more FS

Yahoo group: ham4sale (2007 — 2015)
Date: 2015-07-17 23:46:33 UTC
From: Ken, W8EK
Topic: 8615 Message: 8615

TenTec Jupiter 538 HF Transceiver, RF Speech Processor,
Power Transformer, and other miscellaneous accessories
For Sale:

TenTec Jupiter 538 HF Transceiver:

Thousands of Jupiter transceivers in use worldwide are renowned
for their terrific audio quality and superb receiver performance.
Although it can be operated as a traditional rig, it can also be
operated from a computer as an SDR rig.

Specifications:
LSB, USB, CW, RTTY (AFSK), FM, AM.
Frequency range: Receive - 100 KHz-30 MHz continuous
Transmit - all ham bands 160-10 meters.
100 Memories
Dual VFO’s with Split mode
39 IF-DSP receive filters from 150-8000 Hz
18 different DSP generated transmit bandwidths from 900-3900 Hz
Passband Tuning
Spectrum Sweep
Adjustable AGC
Variable CW offset with auto-tracking sidetone
RIT / XIT
100% duty cycle
TenTec’s silky-smooth QSK for CW and fast-switching digital modes
Large LCD Display

This particular rig works 100% and looks close to perfect.
With paper work, misc hardware, and original box for $750.

TenTec 234 RF Speech Processor:

The 234 is the predecessor to the 715 speech processor.
It matches the early Omni 545/546 Series A, B, and C rigs, Delta,
and others of that era, but of course can be used with any rig,
since it simply inserts in the microphone line.

This is an extremely effective unit, typically providing about a
6 db increase in talk power. That is about the same as a linear
amplifier -- at much less cost.

It has both a 4 pin plug and a 1/4 inch stereo jack for input,
and needs 13 V DC at low current. With paperwork for $150.

Power Transformer for TenTec Hercules 444 HF linear amplifier:

This power transformer is used with the older Hercules 444 HF linear amplifier (not the newer Hercules II). It includes the molex plug, so that it will simply plug into the 444. This is a "spare" transformer that was never used.

The Hercules 444 provided 48 to 50 volts DC at up to 25 amps to produce about 1000 to 1200 watts DC input in order to get 600 watts of RF out. This transformer is roughly a 7 inch cube, so is a very healthy transformer of approximately 1250 VA, if someone wants to use it for another project. $75

Original box for TenTec 2591, Two meter HT, including the foam insert. $8

Cables for CW keyers and keys:

Cable for paddles
About 3 feet long, and with a 1/8 inch (3.5 mm) stereo connector on the end, like used by most rigs. $8
As above, but 1/4 inch plug. $8

Cable for straight key
About 3 feet long, with a mono 1/8 inch (3.5 mm) phone plug on it, as used with a straight key. $5
As above, but 1/4 inch plug. $5

I also have many other accessories available such as many different types of microphones, HTs, VHF and UHF rigs, antennas, etc. Just too many things to list here.
Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

19yr old son is licensed & younger brother studying, need rigs.

Selling the following or will trade for Alinco DX-70 or
Kenwood TS-430s HF rigs, or something similar.

FOR SALE or TRADE

1. Elmac AF-67 160-10m transmitter in very nice condition. $145.

(includes 10-pin connector to build a cable)

2. Elmac PMR-6a looks good. $95.

(includes 8-pin socket & shell to build a cable)

[Note: I bought both represented in good working order but
haven't modified & cabled the HP-23a to test them myself.]

3. Heath HP-23a in nice shape. $125.

(includes mod info to use with the Elmacs)

4. Heath GD-123 Q-Multiplier/Notch in nice shape. $115.

(connect to 455 IF to add selectivity & carrier-notch to PMR-6a)

5. SECO 107 Tube Tester works, nice w/docs & tube settings. $135.

6. Box of 55 tubes - all NOS, includes one 7360, plus 6AQ5, 12K5,
12AF6, 1Q6, 1T4, 6BA6, etc. (multiples of many -
detailed list pending). $125.

7. SAMSUNG TAB 2 7" GT-3113TS tablet.
Includes a nice case with integral keypad.
Tablet is like this one:
http://www.ebay.com/itm/Samsung-Galaxy-Tab-2-7-0-GT-P3113TS-8GB-Wi-Fi-Pre-Owned-Free-Ship-Buy-it-Now-/311394831017?pt=LH_DefaultDomain_0&hash=item4880940aa9
Case/keyboard is like this:
http://www.ebay.com/itm/Bluetooth-Silicone-Keyboard-With-Case-For-Samsung-Galaxy-Tab-2-7-Tablet-P3100-/190827151895?pt=LH_DefaultDomain_0&hash=item2c6e2f4217
Charger included. $75.

All asking prices are plus the actual cost to ship to you.

Or, whatever we work out as a trade ...

Thanks - David KD4E

8618. FS: 4 bay of 70cm antennas-available in Oklahoma and Texas

Yahoo group: ham4sale (2007 — 2015)
Date: 2015-07-20 19:39:43 UTC
From: John Geiger
Topic: 8618 Message: 8618

I have for sale a set of 4 10 element 70cm antennas. These have 6 1/2 foot booms and are end mounted. With these antennas comes the H frame stacking framework with mounting brackets. The stacking distance is 3 feet by 4 feet. It also comes with the power divider for the 4 yagis. Everything you need to get the 4 bay system going is there. The antennas are homebrew but very well made, resembling M2 yagis. This system has been used for 70cm EME with good results. The 4 antennas have a common horizontal cross boom to mount in an elevation rotor if desired.

I will have these available at Ham Holiday in Oklahoma Cityon Friday and Saturday. I am asking $200 or best reasonable offer for them. I can be reached by email or at 580-591-6885. I can also deliver these to the Dallas/Fort Worth area over the weekend of August 15-16 if you live there and are interested.

8621. FSZ: Icom Z1A dualband HT

Yahoo group: ham4sale (2007 — 2015)
Date: 2015-07-25 22:52:28 UTC
From: John Geiger
Topic: 8621 Message: 8621

I have for sale on of the select group of HTs that does full duplex, making it great for the FM satellites. It is an Icom Z1A 2m/70cm HT that does up to 5 watts with the correct battery pack. It does dual receive so you can listen to 2 frequencies at the same time, and can do dual inband receive as well.

It works fine and comes with the BP170 battery case, so you can add AA cells to it. I will include 4 recharable AA batteries, which I have no way to charge. Also come with the belt clip, antenna, and wrist strap. You can find the manual on line. The lettering on a couple of the keys is warn, but you get use to their function rather quickly.

This is the model where you can remote the top half of the HT to use as a speaker mic, if you can find the remote cable, which I don't have.

I am asking $75 plus shipping for it and can take paypal/check/MO.

73 John AF5CC

8622. FS: Wouxun 222/440 dualband HT

Yahoo group: ham4sale (2007 — 2015)
Date: 2015-07-26 01:23:35 UTC
From: John Geiger
Topic: 8622 Message: 8622

Here is a kind of unique HT you don't see very many of. It is a Wouxun UV-899 222MHZ(1.25 meter)/440mhz (70cm) HT. Like new in box, only used a few times. It does 5 watts on 222 and 4 watts on 70cm.

Like the other Chinese HTs it does dual receive, and also receives the FM broadcast band. Comes with all standard accessories.

I am asking $75 shipped for it, or would trade it for an Icom T8A or T81A, or Yaesu VX5R, or maybe a 2m/222mhz HT. This is a great way to get on both 222 and 70cm at the same time for a very reasonable price.

73 John AF5CC

8623. FS: Mirage D1010 100 watt UHF amplifer (excellent condition)

Yahoo group: ham4sale (2007 — 2015)
Date: 2015-07-26 02:15:04 UTC
From: John Geiger
Topic: 8623 Message: 8623

I have for sale a Mirage D1010 10 watt in 100 watts out 70cm amplifier. This is the brown and white faced model made in California before MFJ bought out Mirage. It has SO239 connectors for the input and output.

This amp looks as close to new as any used amp can. It has the original box, the original sytrofoam inserts, and the original manual.

Buy this now and have some hi power operating in next weekends UHF contest.

I am asking $175 plus shipping for it and can take paypal/check/MO.

8627. NEMA watertight enclosure for outdoor antenna or remote work

Yahoo group: ham4sale (2007 — 2015)
Date: 2015-07-28 07:44:02 UTC
From: Raymond Cote
Topic: 8627 Message: 8627

NEMA steel enclosures used for antenna installation no longer needed. Used for 3 months and they were removed and taken indoors for storage. I no longer want to save them so are offered up for sale plus shipping
see this web site for picture and description. I have 2 available to the first takers. These are water tight with gasketed doors and mounting flanges top and bottom.

Small holes were punched for coax connector and power feed-through.

price will be $80 each plus shipping. This is less than half price from listed

see below web for specs and a picture
http://www.l-com.com/nema-enclosures-14x12x6-inch-weatherproof-nema-steel-enclosure-only

Right is right even if no one is doing it;
wrong is still wrong even if everyone is doing it..

8629. For Sale: 46 ft Rohn 45G Tower & Accessories

Yahoo group: ham4sale (2007 — 2015)
Date: 2015-07-30 01:18:21 UTC
From: J. Gordon Beattie, Jr.
Topic: 8629 Message: 8629

Hi Folks!

My Rohn 45G tower has four full 10 ft sections and an 6 ft top section which can be used in embedded concrete base OR you can use the tilt base which is also provided!

I also have a stub base as a bonus!

Included are two sets of guy brackets, guy anchor plates and guy wires.

This tower is in excellent condition and will meet the needs of any Amateur who wants to have something a bit easier to climb and load up with antennas!

$1,000 (OBO) takes it. Delivery within 200 miles of 07621 available.

Photos on request.

Contact Gordon Beattie, W2TTT at ATT dot NET or phone/text to 201.314.6964

8636. FT-901DM HF Transceiver

Yahoo group: ham4sale (2007 — 2015)
Date: 2015-08-02 21:40:26 UTC
From: Pete Mahowald
Topic: 8636 Message: 8636

FT-901DM Transceiver looks and works the way a ham radio should. The receiver is sensitive and selective, with pass band tuning and a notch filter, the transmitter has tube finals and driver for robustness and an RF Speech processor. This is a super radio in its day. The one is cosmetically an 8 and the tubes are good. Comes with the AC power cord and parts to make up the 12V power cord (this radio runs equally well from either).

8637. wanted automatic antenna tuner

Yahoo group: ham4sale (2007 — 2015)
Date: 2015-08-02 18:10:06 UTC
From: Ron Lawrence W4RON
Topic: 8637 Message: 8637

I'm looking for an automatic antenna tuner to use with my
HF mobile. I'm running a Icom 706 and a Pozy screwdriver antenna.
I don't need the type of auto tuner that controls the screwdriver
just one that'll match the antenna with the push of a button.

If anyone has one or hears of one for sale please let me know.

Thanks,

cheers.

8646. FS: Mosley 12m/17m dipole element

Yahoo group: ham4sale (2007 — 2015)
Date: 2015-08-05 23:33:18 UTC
From: John Geiger
Topic: 8646 Message: 8646

I have for sale the Mosley WARC element to add to the Mosley Mini 32 or Mini 33 antennas. This adds 12m and 17m as a rotatable dipole. It can also be used as a stand alone rotatable dipole for 12m and 17m. It is approximately 16 feet long and has a power limit of 350 watts. It may work with other Mosley antennas as well, you would have to check with Mosley.

It sells new for $210 plus shipping, plus the 6 week wait which is common for Mosley. I am asking $100 plus shipping, and will ship immediately upon payment. It breaks down into small pieces, so shipping shouldn't be too much. I can take paypal/check/mo. Can also deliver to OKC or DFW areas in the next couple of weeks.

73 John AF5CC

8648. Microphones FS

Yahoo group: ham4sale (2007 — 2015)
Date: 2015-08-04 14:33:22 UTC
From: Ken, W8EK
Topic: 819 Message: 8648

Icom, Kenwood, Yaesu, DTMF Touch Tone, Speaker
Microphones, etc. For Sale:

Icom Microphones:

Heil Microphone and Cable:

Heil HM-I Microphone for use on Icom rigs.
This mic is a beautiful gold/bronze color. It has BOTH
the wide (designed for rag chewing and full fidelity) and
the narrow (designed for maximum "punch", especially
for DX pileup penetration) elements. It also has a PTT
switch on the mic, which has a 4 pin XLR connector.

This one works great, and looks great as well. $85

Cable for use with Icom rigs
Has 4 pin XLR connector to mate with the above mic, with a
very nice rubber covered cord, and a round 8 pin connector
wired for Icom on the other end, along with a 1/4 jack that
can be used with an external PTT switch, if desired. $25

Buy both of the above for $100.
Cable sells only with or after the mic.

Icom HM-133 V Remote Control DTMF Microphone:

This mic has a DTMF Touch Tone pad on it, but also offers
full remote control including VFO select, Up-Down tuning
and memory select. It also has keypad back lighting. It
has an 8 pin modular plug and is used with the IC-2100,
IC-2200, IC-2300, IC-2725, IC-V8000, and others.

This one appears to be new, unused, still in its original
plastic bag.

With paper work for $40.

Kenwood Hand Microphones:

Kenwood MC-44 DM, DTMF Touch Tone Mic
Used on many Kenwood rigs with round 8 pin mic plug.
Includes up/down switches, and lock switch, along with
the 16 digit DTMF pad. Excellent condition. $40

Hand Microphone with round 8 pin plug for Kenwood, Alinco, etc.

This hand mic works great on most Kenwood rigs with the round 8 pin connector, such as the TS-430, TS-440, TM-241, TM-2530, TW-4000, and others, including Alinco and ADI. It says "Electret Condenser Mic" on the back, and "Kenwood" on the front, with no model number.

Basically, this mic functions like an MC-43, with a couple more features. It has the mic and PTT switch; it also has up/down switches on the top. There are four "extra" buttons labeled Call, VFO, MR, and PF. What these four buttons do depends on the rig. There is also a "Lock" switch on the back.

Regardless if you use the four extra buttons or not, you still have a mic that works like an MC-43.

This mic works fine, and looks like new. I am guessing it came with a rig, and was immediately put in the drawer, and never used. $30

Yaesu Hand Microphones:

Yaesu MH-15 DTMF Touch Tone Mic:
The MH-15 c6 is a hand microphone that features a 16 digit DTMF Touch Tone Pad on the back, along with a lock/unlock switch. The top has up/down buttons. Of course the PTT is on the side. This one has the round 6 pin connector. It works fine and looks close to new. $40

Yaesu YM-17 hand mic:
The YM-17 is a hand microphone with up/down switches on the top corner. It has the round 6 pin connector. This one works fine and looks really great. $30

Yaesu YM-31 hand mic:
The Yaesu YM-31 is a hand mic with a round 6 pin connector. Apparently it is either similar or the same as the MH-25A6j (not the MH-25 with the 8 pin connector). It is a 600 ohm impedance hand microphone, and has a Monitor on-off switch on the back. It looks very similar to the Yaesu MH-1.
This one works fine and looks extremely nice. $25

DTMF Touch Tone Microphones For Sale:

Kenwood MC-44 DM, DTMF Touch Tone Mic
Used on many Kenwood rigs with round 8 pin mic plug. Includes up/down switches, and lock switch, along with the 16 digit DTMF pad. Excellent condition. $40

Yaesu MH-15 DTMF Touch Tone Mic
The MH-15 c6 is a hand microphone with a 16 digit DTMF Touch Tone Pad on the back, along with a lock/unlock switch. The top has up/down buttons.
This one presently has the round 6 pin connector, which can be changed of course.
It works fine and looks close to new. $40

Johnson 250-0761-010 / CES 655 L DTMF Mic
It has a 12 digit pad on the front, and is a rugged mic.
Presently with 4 pin connector. It looks to be unused. $38

HT Speaker Microphones:

Both of these speaker mics have the 3.5 mm and 2.5 mm two conductor plugs that are spaced about 3/8 inch apart, and are molded into a single connector. They are used on Icom, Yaesu, Radio Shack, Maxon, Ritron, Vertex and many other radios.

Premier SPM-100
It is a lightweight and compact unit, featuring a powerful speaker as well as a high-quality condenser-style microphone element that produces excellent transmitted audio clarity. The microphone may be secured to the user's lapel or shoulder. It also features a built-in 3.5mm jack for using an external earphone. $17

DM-100
Appears to be the same as the SPM-100 above, but just with a different label. $17

I also have many other accessories available such as many different types of microphones, HTs, HF, VHF and UHF rigs, HF and VHF/UHF antennas, etc.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.

Thanks.

8654. Motorola Stuff

Yahoo group: ham4sale (2007 — 2015)
Date: 2015-08-08 21:50:36 UTC
From: Azle Communications
Topic: 8623 Message: 8654

Hello,

I have a Motorola shop that I decommissioned and still have all of the "Stuff" from it. If you have Micor or Syntor vintage equipment you may want this collection. There are a couple complete Micor base/repeater stations, I think 100 watts. This was a MSS so it had all the Motorola parts bins and they go also! There are several bench mounted test meter stations, parts and part galore. Way too much to list, I am in Azle, Texas, about 20 miles Northwest of Fort Worth. If you decide you want it better bring a trailer, $500.00 OBO gets it all! The lower the price to more you will have to load by yourself! Will throw in almost everything I have that's Motorola which is a lot!

If interested contact me off-list and I will get you my phone number.

Paul

From: John Geiger
Topic: 8663 Message: 8663

I have for sale a Mosley Mini 33 three element 20, 15, 10 meter triband yagi. Great antenna for small spaces. The boom is 6 feet long, and the longest element is about 18 feet long. Weights around 13 pounds and can be turned with a TV rotor. The antenna is in good shape, I am just planning on going with monoband Moxon antennas instead.

These sell new for $544 plus shipping, plus a 4 week wait or so from Mosley. I am asking $280 shipped for it, and can take paypal/check/MO. US shipping only.

FS: Drake TR-4C w/NB, AC-4, Mic

Rig is in good shape but because I haven't recapped it I've not tested
it thoroughly.

As ARES-EC I need a remote operated HF rig.

(The Drake Noise Blanker is apparently a hard-to-get accessory that
sells alone for absurd prices on ebay.)

Multiple pictures available.

TR-4C, 34-PNB Noise Blanker, AC-4 PS, & mic $625. plus shipping - or
meet-up in Savannah-Statesboro, GA area. (or make an offer)

Asking $205. for the Noise Blanker alone shipped to USA. (or make an offer)

Without the NB the rig, PS, & mic - asking $415. plus shipping

8673. Items for sale

Yahoo group: ham4sale (2007 — 2015)
Date: 2015-08-16 05:48:57 UTC
From: Raymond Cote
Topic: 6025 Message: 8673

I have some items for sale that were left in a shed by an SK ham. I did not want to leave them in Hawaii when I moved so I shipped them to Illinois where I am now. I will list them separately and price them as low as possible. I would like to recover at least the shipping cost from Hawaii but that might not be realistic, but some items are collectible and usable. Pictures as requested and first come first served. Payment to Paypal if you have an account or a check if not. If you want an item and say "I'm interested" or "send me a pic," that will not NECESSARILY freeze or hold the sale. Payment to Paypal will be the deciding factor. Secondly if you want an item let me know you are mailing a check and i will hold it.

URM-25D Signal Generator. This was in its case so inside it is in much better shpe but still needs serious cleaning. I did not oen it up other to take pictures of the front panel. The material in the cover to seal out the weather, (gasket to use the term loosely) is almost gone.---------------$100

Shipping will be about $50 for boxes, packing and postage. It will be bubble wrapped

Continuing hunger has resulted in the sale of this very clean HP-3325A synthesized function/signal generator with options 01 and 02 <g>. OPT-01 is the oven-stabilized OCXO reference oscillator while OPT-02 is the high-output voltage option. Here is a summary of it's general capabilities:

The HP-3325A has micro-hertz resolution below 100 kHz along and a standard frequency coverage from .000001 Hz to 20.999999999 MHz using the front panel output BNC interface. What a lot of people don't know about the 3325 is that a 0 dBm, 21 MHz to 60 MHz signal is available off a BNC on the rear panel making this a very powerful instrument good for testing rigs etc up to 6m.

Signal purity, accuracy, and stability are as good or better than earlier stand-alone HP synthesizers. Harmonics are at least 65 dB down below 50 kHz and you can externally modulate with AM and PM. OPT-01 provides a high-stability temperature controlled oven quartz oscillator reference that can be jumpered in the rear. 10 MHz ref I/O ports & a multitude of modulation etc ports are also provided on the rear panel.

The frequency can be selected from 11 digits & the output amplitude can be adjusted from 1 mV to 10 V p-p and displayed either in V rms, P-P, or dBm (50 ohms). DC offsets of +/-4.5 V are possible. The high-output voltage option 02 (which this unit has) can supply up to a 40 V p-p signal into a >=500 ohms load rather than the standard 10 V p-p output.

The generator has an HP-IB interface bus with analog and digital outputs for many applications including linear or log sweeps, phase & DC offsets, ext modulation, sine, triangle, square, saw tooth, positive or negative ramp outputs.

This unit was acquired from a local defense contractor & I was going to keep it for myself but I must sell it. I have run a series of basic tests on it this AM to ensure it functions exactly as it should. I did not detect any hiccups whatsoever and it was stable as a rock. I used my SA, O-scope and frequency counter all running simultaneously to monitor frequency and amplitude accuracy. The fan filter looks like it is new. It is in very clean condition and you not have to do any cleaning to it whatsoever.

Below are some snapshots of the unit I took about an hour ago operating at various frequencies and modes using the from and rear output connectors. Note the freq counter and 3325 we not frequency locked or connected to my 10 MHz timebase standard during these tests. It is being offered as-is but I can promise you it will function as shown in the images. It will be well boxed when shipped. HP operating and service manuals are still available off the net for free. Asking $350

plus S/I. I prefer Paypal but have no issues accepting your personal or corporate check or money orders, etc. Pse contact me off-line if you have any questions or need any additional images or testing performed, TU for looking.

FS: Drake TR-4C, AC-4 Power Supply, & Calrad hand Mic.

(Rig specs: 80-10m USB, LSB, CW and AM. Input power is
300 watts PEP SSB, 260 watts AM/SSB)

Rig is in good shape but because I haven't recapped it
I've not tested it thoroughly. Due to vintage sold as-is.

Multiple pictures available.

Asking $415. plus shipping - or meet-up in
Savannah-Statesboro, GA area.

Reasonable offers welcomed.

(NB has been sold, pending funds.)

8682. 2 meter items for sale

Yahoo group: ham4sale (2007 — 2015)
Date: 2015-08-21 02:05:36 UTC
From: John Geiger
Topic: 8682 Message: 8682

I have for sale several different 2 meter items. Will describe them as best as I can, and each one can be picked up in Lawton, OK or add shipping costs to each one. Here is what I have for sale:

1. Kenwood TM255A 2 meter all mode transceiver. Quite possibly is the best 2 meter all mode ever made. 45 watts on high, and 5 watts on low. It is in very good condition physically. Only issue is that the VFO encoder shaft is loose. It still works and there is a sub VFO know also you can use to change frequency with. It comes with a power cord terminated in powerpoles, a copy of the manual, the hand mic, and a mobile mounting bracket. Asking $375.

2. Down East Microwave 144-28 transverter. Currently set for 5 watts in on 10 meters for 25 watts out on 2m. It can be set to take up to 10 watts in. Antenna connector is an N connector, and it is set up for separate TX/RX in lines, but can be modified for a common TX/RX in line. It comes with a powercord terminated in powerpoles, and a copy of the manual. This is the older model transverter, not the current one, but it works fine. They sell new for $479, I am asking $250.

3. Brand new SSB Electronics MHP-145 mast mounted preamp. Rated at 1.5KW power handling. This preamp is specially designed for EME work but would do fine for terrestrial work as well. You can read more about it at: http://www.arraysolutions.com/SSB%20Electronics/EN-1048_MHP%20145.pdf

These sell new for $615. This is new in the box, I am asking $515 for it.

4. Brand new SSB Electronics DCW-2004-B sequencer. This model is rated for 6m-70cm. Great for controlling preamps, amps, transverters for proper order of operation. These sell new for $165. I am asking $110. You can read more about it at http://www.arraysolutions.com/SSB%20Electronics/EN-1025_DCW2004.pdf

I can take paypal/check/MO. I will have a flexradio 1500 (perfect for driving the 2m transverter) and an SSB electronics 23cm 10 watt transverter listed for sale shortly also.

73 John AF5CC

8683. FS: Flex 1500 SDR HF/6m transceiver

Yahoo group: ham4sale (2007 — 2015)
Date: 2015-08-21 02:30:40 UTC
From: John Geiger
Topic: 8683 Message: 8683

I have for sale a Flexradio 1500 HF/6m 5 watt transceiver. The FLEX-1500™ is a low-cost, low-wattage SDR that is positioned to allow ham radio operators the ability to experience the incredible capabilities and just plain fun of operating a software defined radio without breaking the budget. The FLEX-1500 is packed with features that make it ideally positioned to be the ultimate low cost, high performance IF deck for VHF-microwave transverter operation. With a price point set below $700 USD and the ongoing improvements and upgrades provided by PowerSDR, the FLEX-1500 is by far the best value of any entry level amateur radio available today.

It comes with a powercord terminated in powerpoles, a USB radio to computer cable, and a manual. It is set up for us with a Yaesu RJ45 type microphone (not included). It is in very good shape and works fine. You can download the software from the flexradio website.

I am asking $500 plus shipping and can take paypal/check/MO.

From: John Geiger
Topic: 8684 Message: 8684

I have for sale a 23cm (1.2ghz) transverter by SSB electronics-Model LT23S.

It uses a 2m IF and does 10 watts out. Noise figure of 1.8db. Very good condition with 2 small marks on the top. This is probably one of the best 23cm transverters made. It has a watt meter on the front, and has 2 crystal positions so you can also do FM or satellites with it. It already has crystals to do 1296mhz.

It will take up to 10 watts input on 2m. It does come with a manual in German, but that will give some specs and hook up diagrams, and there should be an english manual on-line for it.

I am asking $345 plus shipping for it. I can take paypal/check/MO.

8687. FS: Icom 451 UHF all mode radio

Yahoo group: ham4sale (2007 — 2015)
Date: 2015-08-24 18:05:12 UTC
From: John Geiger
Topic: 8687 Message: 8687

I have for sale an Icom 451 all mode 70cm transceiver in very good condition. Looks really good for a radio of this age, and works fine also. I have been using it on the satellites with good results, and also in the UHF contest earlier this month.

It has a built in power supply, and does 10 watts out. Comes with a power cord and hand mic. The only "issue" with it is that the level to turn the VOX off and on is missing. It is in the VOX on position, but I just turned the VOX gain all the way down and it functions in PTT mode only. You can turn up the VOX gain if you want to use it in VOX mode.

This transceiver covers the 430-440 mhz range of 70cm and doesn't have a tone encoder with it. One could be added, though. Here is a great chance to get on 70cm SSB/CW for not a lot of money.

I am asking $160 for it plus shipping, and can take paypal/check/MO. Pickup is also possible in Lawton, OK or can meet close by for an in-person deal.

From: loueverettsr@...
Topic: 8688 Message: 8688

Folks -

I have a couple of gems my quantity control manager says must go. So, I am reluctantly putting them up for sale. I love these two radios and have a lot of blood, sweat, and tears in them. 90% new parts.

One is a Heathkit HW-12A, 80 meter SSB Transceiver. Refurbished and working GREAT!
The other is a Heathkit HW-32A, 20 meter SSB Transceiver. Refurbished and working GREAT!

I get super reports on the air with both of these radios. They are really nice.

If you are interested please e-mail me direct to my personal e-mail address indicating you are interested. I will then send you pictures, etc. showing them inside and out, so you can get a good look at them. My personal e-mail address is: loueverettsr@gmail.com.

Let me know!

73 and God Bless!

Lou Everett, Sr., WA5LOU

8690. 19" Equipment Racks For Sale

Yahoo group: ham4sale (2007 — 2015)
Date: 2015-08-25 17:16:44 UTC
From: erikavont@...
Topic: 8690 Message: 8690

What we have here is a pair of approximately 4' tall Henry Radio 19" racks with sides, and back door. These racks were used for the Henry line of RF Heating Amplifiers. Use them to build your own amplifier or house your gear.

I also have a deeper Plasmatherm rack of similar size.

I want $100 per rack and they need to be picked up in Sioux Falls, SD.

Feel free to email: erikavont@yahoo.com

Erika K0DD

8691. FS: 6 pin mini DIN data cable

Yahoo group: ham4sale (2007 — 2015)
Date: 2015-08-26 15:43:51 UTC
From: John Geiger
Topic: 8691 Message: 8691

I have for sale a new, never used 6 pin mini DIN cable for radios that use this type of connector for data in/out. The other end of the cable has tinned, bare wires on it. Great for doing RTTY/PSK/other data modes through the accessory jack on many radios.

I am asking $12 shipped in the US and can take paypal/check/MO.

8699. FS: Heathkit HD-10 Keyers etc.

Yahoo group: ham4sale (2007 — 2015)
Date: 2015-08-31 20:24:51 UTC
From: Bry Carling AF4K
Topic: 8699 Message: 8699

FOR SALE:

Pair of Heathkit HD-10 Keyers in good condition, untested. These are from an estate sale and have not been checked out yet but seem fine. The paddles are included with these keyers. Schematic also included. Will sell the pair for $40.00 plus shipping.

ALSO: MFJ-201 Grid Dip Meter - like new in the original box, works fine.
Sold new for around $150 - $165. Available for $65.00 plus shipping.

For sale - a pair of HP3400A RMS Voltmeters.
They look to be complete. Untested. I also have one manual.
These typically go for $50 to $150.00 each on eBay depending on condition.

Will sell the pair for a total of $75.00 plus shipping.

I have for sale a Diamond A-430S15 15 element UHF yagi. Only 3 months old or so, works great on weak signal and satellite operations. Had lots of great satellite QSOs with it. Boom length is 7 1/5 feet long, weights around 2 pounds. Great performer for the cost, that is sure.

I am asking $65 shipped for it and can take paypal/check/MO.

FOR SALE:

1) Hewlett Packard Model: 425A VTVM
Specs: Vacuum Tube DC Micro Volt Ammeter
DC Voltage Ranges: Eleven zero-center ranges in a 1-3-10 sequence with following full scale positive and negative values:
±10, 30, 100, 300 microvolts;
±1, 3, 10, 30 millivolts;
±0.1, 0.3, 1 volt.
Input impedance on Voltage Ranges: 1 meg ohm ±2%; determined by input resistor which can be removed to provide input Z in excess of 50 megohms.
DC Current Ranges: Eighteen zero-center ranges in a 1-3-10 sequence with following full scale positive and negative values.

Has no accessories, untested - sold as-is, but appears to be in good condition.
Requires 115V AC
Available for $35.00 plus shipping.

2) Hewlett Packard 415B SWR Meter. Untested - looks good. I have no specs, but looks like a cool gadget. Available for $30.00 plus shipping.

8720. FS: EICO 710 Grid Dip Meters

Yahoo group: ham4sale (2007 — 2015)
Date: 2015-09-10 10:00:20 UTC
From: Bry Carling AF4K
Topic: 8720 Message: 8720

For sale: EICO 710 Grid Dip Meters

Set of two in excellent condition, with one set of coils.

The EICO 710 GDO was one of the more successful tube-type, AC line powered, GDOs. It had a frequency range of 400kHz-250MHz in 8 overlapping ranges. Uses plug-in coils wound to a 0.5% accuracy on polystyrene forms. The EICO 710 GDO uses a 1:7 planetary drive on the tuning capacitor. It uses a 6AF4A in a Colpitts oscillator circuit. It is transformer-operated,
and uses about 10W of AC power.

Dimensions for the EICO 710 GDO are: 2.25" high; 2.6" wide; & 6.9" long. It weighs approximately 3 lbs. The exterior is Silver and Grey wrinkle finish.

Details on line at:
http://w5jgv.com/downloads/EICO%20710%20Grid%20Dip%20Meter%20Manual.pdf

These are complete, in excellent,working condition with no damage.

Available for only $40.00 each plus $25.00 for the coils, original manual $10.00

Complete package including original manual only $90.00 plus shipping.

E-mail me off list to arrange purchase.

8721. FS: Heathkit IG-18 Sine-Squarewave Generators

Yahoo group: ham4sale (2007 — 2015)
Date: 2015-09-10 20:59:41 UTC
From: Bry Carling AF4K
Topic: 8721 Message: 8721

FOR SALE: Heathkit IG-18 Sine-Squarewave Generators

Extra nice - both in cherry condition. One original Heathkit IG-18 manual is available also.

The Heathkit IG-18 Sign-Square Wave Audio Generator is designed for laboratory

as well as service and testing. Sine wave signals are available between 1 Hz and 100 kHz. The output is stepped from .003 volt to 10 volts. Square wave signals are available from 5 Hz to 100 kHz. The output is available at .1 volt, 1 volt, and 10 volts. The sine and square wave frequencies are identical and the level of each is independently adjustable. Both signals may be used either independently or simultaneously.

SPECIFICATIONS
SINE WAVE OUTPUT
Frequency Range . . . . . 1 Hz to 100 kHz
Output Voltage Ranges . . . . . 0 - .003
0 - .01
0 - .03
0 - .1
0 - .3
0 - 1
0 - 3
0 - 10

Internal Load . . . . . Internal 600 ohm load available on .003, .01, .03, .1, .3, and
1 volt ranges

dB Ranges . . . . . -62 to +22 dB
-12 to +2 on meter
-50 to +20 in eight 10 dB switch positions
+2 dB maximum into 600 ohm load

Output Variation. . . . . +/- 1 dB from 10 Hz to 100 kHz

Output Indication . . . . . Two voltage scales and one dB scale on front panel meter

Output Impedance. . . . . 10 volt range: 0 - 1000 ohms
3 volt range: 800 - 1000 ohms
1 volt range and lower: 600 ohms

Meter Accuracy. . . . . +/- 10% of full scale with proper load termination

Distortion. . . . . Less than 0.1% from 10 Hz to 20 kHz

SQUARE WAVE OUTPUT
Frequency Range . . . . . 5 Hz to 100 kHz

Output Voltage Range. . . . . 0 - .1
0 - 1
0 - 10 (zero-to-peak into 2 kohms or higher load)

Output Impedance. . . . . 52 ohms on .1 V and 1 V ranges
Up to 220 ohms on 10 V range

Rise Time . . . . . Less than 50 nanoseconds

GENERAL
Frequency Selection . . . . . First two significant figures on 0 - 100 and 0 - 10
switches each in ten steps
Third figure on 0 - 1 control
Multiplier switch: X1, X10, X100, & X1000

Frequency Error . . . . . Within +/- 5% of first and second digit

Power Requirements. . . . . 105 - 125 VAC or 210 - 250 VAC, 50/60 Hz, 6 Watts

Dimensions. . . . . 5-1/8" high x 13-1/4" wide x 7" deep

The IG-18s seem to go for anywhere from $50.00 - $200.00 or more, and the
average is round $100.00 - $125.00 each.

I will sell these for $75.00 each or two for $120.00 plus shipping, and $10.00 for the manual.

Photos available on request - both are identical and in cherry condition.
PDF manual available on request.

I have an extra HP-54510A, 1 GSa/S, 250 MHz, Dual-Channel oscilloscope that is for sale. It is very clean with barely a nick on it. It was used in a lab so you will find a few minor marks here & there. This afternoon I ran it through a complete battery of tests and found it to function perfectly. I have this identical model scope which I have been using for myself in my home lab and would not part with it as I like it so much. Very easy to use and full of easy to access functions & features.

Here is an image of the overall test setup. I used two separate sig gens, each operating at 250 MHz and 1 V Peak.

http://w8bya.com/var/albums/Misc/HAM-1/HP-54510A-9.jpg?m=1442086962

The following images show the scope from various angles etc. While taking the images I had the scope make some measurements of channels 1 & 2.....Vp-p on Channel 1 and Frequency on Channel 2. The measurements were right on the money. Asking $250 plus S/I and being sold as-is. I prefer Paypal but will honor your personal check or money order. As always, if you have any questions at all or need additional images just ask. Also please, if you reply to me add a 2nd e-mail address or a phone number in case my ISP does not deliver my reply to you (which has been going on for about a year now). TU 73

I have an extra HP-54510A, 1 GSa/S, 250 MHz, Dual-Channel oscilloscope that is for sale. It is very clean with barely a nick on it. It was used in a lab so you will find a few minor marks here & there. This afternoon I ran it through a complete battery of tests and found it to function perfectly. I have this identical model scope which I have been using for myself in my home lab and would not part with it as I like it so much. Very easy to use and full of easy to access functions & features.

Here is an image of the overall test setup. I used two separate sig gens, each operating at 250 MHz and 1 V Peak.

http://w8bya.com/var/albums/Misc/HAM-1/HP-54510A-9.jpg?m=1442086962
http://w8bya.com/var/albums/Misc/HAM-1/HP-54510A-9.jpg?m=1442086962

The following images show the scope from various angles etc. While taking the images I had the scope make some measurements of channels 1 & 2.....Vp-p on Channel 1 and Frequency on Channel 2. The measurements were right on the money. Asking $250 plus S/I and being sold as-is. I prefer Paypal but will honor your personal check or money order. As always, if you have any questions at all or need additional images just ask. Also please, if you reply to me please reply to me at my normal e-mail address:

W8BYA@MCHSI.COM

Also, if you can pse add a 2nd e-mail address you may have or a phone number in case my ISP does not deliver my reply to you (which has been going on for about a year now). TU 73

Icom IC-720a 100w HF transceiver.

Quad-conversion, general coverage receiver 100 kHz to 30 MHz,
160-10m (TX can be opened but I've made no mods).
.
Includes the original amplified HM-7 hand microphone.

Also the original box and manual, and the fused DC cable.

This has been my daily rig but am upgrading to an IC-746.

Asking $285. shipped to standard locations in the continental
USA (some locations will be extra).

8728. FS: Antique Ham Radio HF and VHF gear

Yahoo group: ham4sale (2007 — 2015)
Date: 2015-09-14 12:46:16 UTC
From: Bry Carling AF4K
Topic: 8728 Message: 8728

REDUCE price: RARE RME-45 shortwave receiver.
This fine beauty has an amazingly smooth easy reduction drive DIAL. A unique receiver with classic and unusual ART DECO stying; they are very collectible.
Included is a copy of the manual. Has the wonderful 180 degree dial with the 600:1 tuning ratio that these RME receivers are famous for. This is an amazing set. Extremely nice to operate. Not many were made and very few remain. Some have sold on eBay for around $450.00 as reported via QRZ dot COM forum.
120V AC operation. No cabinet. 19" rack mount.
Very good condition - was $125.00 - now reduced to $99.00 plus shipping.

FOR SALE: CLEGG 22er Transceiver 144 MHz AM / CW.
CLASSIC 144 MHz AM Transceiver with built-in 120V AC power supply. Comes with Astatic microphone and manual. Good working conditon.
Will include a crystal for 144.450 MHz - that standard 2m AM frequency.
Available for $75.00 plus shipping.

FOR SALE: AMECO CB2 converter for 144 - 148 MHz to various i.f. frequencies. Looks excellent - nice clean copper chassis. Obviously well cared for!
Available for $35.00 plus shipping.

REDUCED: Hallicrafters SR46A transceiver AND HA26 VFO
6m AM at its best! This set is in beautiful condition.
RF output 12 watts. Power: 117V AC or 12V DC
Antenna connection: Standard SO-239
Comes with the standard accessories including the microphone and a crystal for the 50.4 MHz AM calling frequency. Can take up to 4 crystals.
Excellent working condition, and it has a built in 120V AC power supply.
Excellent condition.
Hallicrafters SR46A - very nice - $89.00
HA26 VFO - $55.00
Complete set with the manual and microphone - $125.00

From: duttoncw@...
Topic: 8733 Message: 8733

I don't know anything about this amplifier as to whether it works or not. This was my father's before he became a silent key many years ago and was passed down to me. I remember him saying that it was not putting out full power, that's all I remember.

I have been moving this amp around with me for 9 years and I am ready to part with it. I don't know what it would take to fix it but I don't have the time or money to pursue that task.

Make me a reasonable offer.
I am moving and don't want to move it again.
Local pickup only in the Lawton, OK area.

8736. 706 separation kit?

Yahoo group: ham4sale (2007 — 2015)
Date: 2015-09-19 05:34:58 UTC
From: Ron Lawrence W4RON
Topic: 8736 Message: 8736

I have an original 706, not Mk2,
I wonder if it requires a separation cable made just
for this radio or will any 706 separation cable work?

Now for the real question, does anyone have a separation
kit laying around they'd like to see put to a good use?

I just bought me a Dodge Caravan to replace my '91 Buick PA
that I wrecked a few weeks ago. The mounting system that
I used in the Buick won't work in the van so I have to
build something new and I think being able to mount
the head up where it's easier to use would be the ticket.
The way I had it mounted in the old Buick I could rest
my right arm on the center armrest and my right hand would
just lay right on the 706 tuning knob. I hope to build
a mount that'll allow me to do this in the van. I don't
want a mount that requires me to reach for the know.
I do too much tuning around on HF for that to work.

Thanks a bunch guys.

~~~~~~~~~~~~~~~~~~~
Knee-deep in the cosmic overwhelm, I’m stricken
by the ricochet wonder of it all: the plain

everythingness of everything, in cahoots
with the everythingness of everything else.

8738. Assorted stuff for sale....

Yahoo group: ham4sale (2007 — 2015)
Date: 2015-09-21 14:08:07 UTC
From: pmanfre@...
Topic: 8738 Message: 8738

1- I managed to pick up some extra manual sets for the 8560A series of SA. These were bought I guess as second sets for the SA that were sold. They contain all user, op, quick ref, service AND CLIPS ....and are new never used or taken out of the plastic. Complete set $100 + Shipping.

2- SOLD

3- HP 8753D w/ option 006, 011. good to 6Ghz. This includes 85047a, all interconnect cables, Tested good and working properly. This is from my own bench and was my main unit. (Replaced it with an 8753D all in one 006 unit...) $2700 + Shipping

4- Tek THS720a 100Mhz Hand held Scope / DMM, comes with charger, probe, good battery,....tested working correctly. $465 + Shipping

5- Fluke 199 (monochrome) 200Mhz Hand Held Scope / DMM, comes with charger, 2 probes, DMM leads, good battery (new), Has had LCD screen mod repair (sent out to have done) ...so never any lines or dropouts, ...test and working properly. $700 + Shipping

6- SOLD

7- 2 pieces of Megaphase TM8-S1S1-84, 7ft , These are megaphase orange cables (but have yellow jackets), tested to 8Ghz but are the same cables that are good and used to 40Ghz ... differences is testing and connectors. The have SMA male on each end. These are NEW NEVER USED.... $140 for the pair + Shipping.

Other TE and Ham stuff also posted on testequiptrader at yahoogroups dot com. This is a moderated group and membership is necessary ....but many good deals on TE mostly.

8740. Yaesu FT857/897 accessories for sale

Yahoo group: ham4sale (2007 — 2015)
Date: 2015-09-24 05:35:16 UTC
From: John Geiger
Topic: 8740 Message: 8740

I have a few accessories for the Yaesu FT857/FT897 series of radios for sale. Here is what I have available:

1. Yaesu FC-30 automatic antenna tuner. Clamps on to the FT897D, can be used with the FT857 as well. Comes with mounting hardware and control cable, and is in the original box. In very good condition, I am not sure that it was ever used. These sell new for $249.95, I am asking $135 shipped.

2. LDG FTL meter. This is the LARGE external meter that plugs into the FT897 or FT857 and reads power and SWR. Comes with the necessary cables. You can read more about it at:

http://www.ldgelectronics.com/c/252/products/3/51/1.

The meter face is sort of loose from the case. Would probably be an easy fix. I am pricing it accordingly. These sell new for $85.95 plus shipping, I am asking $40 shipped.

3. A modular to 8 pin mic adaptor. Allows you to use a desk mic with the FT857/897 series of radios. Should work with the Yaesu FT450 and other radios with a modular jack as well. I am asking $15 shipped for it.

4. A "Nifty Mini Manual" for the FT897. but would probably work with a FT857 as well as the menus are the same. Great mini reference on how to set up and operate your yaesu. Small enough to easily carry with you. These sell new for $20.91, I am asking $12 shipped.

5. A radio to amp cable. Fits in the 6 pin mini din jack on the rear of the radio, terminated in a phono jack. This will allow you to hard key your HF amp, VHF brick amp, or transverter. The cable is a couple of feet long. Should work with any radio using a 6 pin mini din jack as the wiring is the same for all of them. I am asking $10 shipped.

6. Yaesu MMB-80 mobile mounting bracket for the FT897D. These sell new for $37.95 plus shipping. I am asking $24 shipped. Come in the original box.

All prices include shipping to the US. I can take paypal/check/MO.

8743. FS: Panel Meters for Heathkit VTVM

Yahoo group: ham4sale (2007 — 2015)
Date: 2015-09-26 11:28:13 UTC
From: Bry Carling AF4K
Topic: 8743 Message: 8743

FOR SALE: Heathkit Panel Meters as used in VTVM.

I have two of these for sale. One is excellent. The other is used, and has a very small crack.
0 - 200 uA FSD. They are used in the V-6, V-7A, and IM-18 VTVM and others

The scales are 0 - infinity ohms
0 - 15 DC V
0 - 50 AC V
-10 dB - 0 - +5 dB
The IM-18 one also has:
0 - 40 p-p
0 - 150 p-p

Will sell the pair for $22.00 plus shipping.

8744. FS: Heathkit HO-13 Hamscan

I have for sale a Yaesu FP-30B internal PS for the Yaesu FT897D transceiver. Works fine, looks fine also. These sell new for $249.95, I am asking $165 shipped for it and can take paypal/check/MO.

73 John AF5CC

8747. FS: Kenwood TS440S

Yahoo group: ham4sale (2007 — 2015)
Date: 2015-09-26 01:47:03 UTC
From: John Geiger
Topic: 8747 Message: 8747

I have for sale a Kenwood TS440S 160-10m all mode transceiver. It does 100 watts on SSB/CW/AM/FM/FSK. Probably one of the most popular selling Kenwood transceivers of all time. It puts out full power, receive is fine, and it has the great Kenwood audio. The case is in very good condition, with only a couple of light scratches on the very back, on the top of the PA unit. The face is in great condition as well The backlight for the S meter is out, and the keypad sometimes does the double strike, where you push the key once and it enters the number twice. It doesn't do this all of the time, though. Those are the only issues with it, and they are minor.

I am asking $335 plus shipping for it. It comes with a Kenwood hand mic and power cord. I can take paypal/check/MO.

8749. FS: Yaesu FT857D HF/VHF/UHF radio

Yahoo group: ham4sale (2007 — 2015)
Date: 2015-09-28 01:53:35 UTC
From: John Geiger
Topic: 8749 Message: 8749

I have for sale a Yaesu FT857D HF/6m/2m/70cm all mode transceiver. This is the model with DSP and that does 100 watts on HF, 50 watts on 2m, and 20 watts on 70cm. Has a built on CW memory keyer as well. It comes with the hand mic and power cord. This rig as been run mobile, and the case shows it. It has quite a few scratches on the case, some of their kind of large. So it isn't a real looker, but it works fine, except for the multi knob which is flaky. It will sometime skip a couple of positions, but with some work, you will get to where you are eventually going.

Due to the multiknob, I am pricing this accordingly. I am asking $425 plus shipping for it, and I can take paypal/check/MO.

73 John AF5CC

8750. FS: Icom 706 HF/VHF all mode radio

Yahoo group: ham4sale (2007 — 2015)
Date: 2015-09-28 02:01:38 UTC
From: John Geiger
Topic: 8750 Message: 8750

I have for sale an Icom 706 original HF/6m/2m all mode radio in very good condition. This is the model that does 100 watts on HF and 6m, and 10 watts on 2m. It also has a built in CW keyer, and SWR meter. It comes with a mic and power cord.

This radio is in excellent condition physically. Looks almost new. Works great also, I have worked 160 countries with this rig in the past year, and plenty of 6m and 2m QSOs with it also. The only defect is a black spot on the lower left hand corner of the display. It doesn't interfere with anything in terms of viewing but it is there. I can send pictures of the display if needed.

I am asking $395 plus shipping for this very nice radio. It is a lot of radio for the price, that is for sure. I can take paypal/check/MO.

8751. RF shielded box for sale

Yahoo group: ham4sale (2007 — 2015)
Date: 2015-09-28 03:11:30 UTC
From: Raymond Cote
Topic: 8751 Message: 8751

I have for sale an RF shielded box. It measures 14" by 16" inside dimensions and it is 5" deep. The cover is held on with many slotted hex head screws, and the cover itself measures 17 1/2" by 19 1/2" and inside the box contains 5 terminal blocks which can be removed. One is missing but have no clue where I might have put it.
All of you know that parts just seem to run off and get lost all by themselves.....
It is large enough to contain a repeater, or a substantial antenna farm relay and sequencing system. It is as large as my tower tuning coil/transmitting capacitor cabinet. No, I don't need another one.

The terminal blocks are proud of the bottom on stand-off mounts. The box bolts to the structure with three welded on brackets that are 12" apart on the top and one centered on the bottom of box.The brackets have 1/2 inch holes drilled into them.

The cover mounting screws are threaded with 3/8-18 thread and are captive type so they will not fall out and get lost.

The box is steel and is painted Battleship gray.

The cover contains a groove with a 1/2 inch wide gasket for water integrity and internal to the gasket, (in the same slot) is a rf shielding braided round material all the way around the cover's slot.

It is well made and looks like it would take a direct torpedo hit.

(well, I spent a lot of time on submarines!)

New similar boxes sell for over $200
Ill ask $120 plus shipping
I have not weighed it but by heft it is around #35

Heft is my calculated arms.

FOR SALE:

Gonset G-50 (Model 3221) 6m AM Transceiver "kit."
12 tubes, Frequency Range: 50.00 - 54.00 MHz
working condition, with manual. Built-in 120V AC supply.
Requires some partial re-assembly. Reduced to $99.00

AMECO converter 144 MHz to 28 MHz - Reduced to $24.00
(one tube and crystal missing)

Brush BA106 microphone - $140.00

Heathkit IG-18 Signal Generator with manual and articles $55.00
Heathkit IG-18 Signal Generator, no manual $45.00

Contact me off the list for details, pictures etc. if needed.

From: Brian Tempero
Topic: 8758 Message: 8766

Fully functional TS-940SAT with MC-60 mic. Recently paid 500 dollars to Old ham dave (http://www.oldhamdave.com/) to get the transceiver fully serviced. Serial number 6030057. $500 and now I will include a very nice mfj 989c antenna tuner.
Prefer radio be picked up as I have bad shoulders and the radio is heavy. Please email me if interested.

Thank you

Brian t

SX-71 2nd Converter Unit needed. Includes V-3 and IF Xfrmrs T-7 and T-21.
OR just p/n 50H416 for the T- 7 would suffice
OR just p/N 50C416 from an earlier series rig.
Thanks in advance!

From: Ken, W8EK
Topic: 8768 Message: 8768

HF Amplifiers and Amplifier Related Items/Parts For Sale:

Heath SB-1000 HF Amp, Kenwood TL-922 HF Amp, SB-614 Monitor Scope, Parts for Amp Supply LK-500 Z A, Parts for Heath SB-220/221, NOS Raytheon 572 B tubes, and more

Heath SB-1000 HF Linear Amplifier (Heath's version of AL-80 A):

The SB-1000 uses a single 3-500 to produce up to 1000 watts output on the 160 thru 10 meter HF bands. I questioned Heath's claim of 1000 watts out with a single 3-500, but depending on band, this one does actually produce 1000 watts out. To be a bit more conservative, 50 W drive typically gives about 750 W out. This is using 120 V AC.

This particular amp has had a glitch resistor added, along with some protective diodes. It looks like the filter caps may have been replaced by a previous owner. In any case, they seem to be in good condition. The 3-500 is an Eimac that is in great shape.

Cosmetically, this unit looks extremely nice. I do not find any scratches or defects. This is a terrific HF amp.

Paper work is included for $750. Pickup near Ocala FL is preferred, although shipping is possible.

Kenwood TL-922 A, HF Linear Amplifier:

The Kenwood TL-922A HF linear amp is designed to provide close to maximum legal power, utilizing two 3-500Z high performance transmitting tubes. The amp features two meters for maximum operating convenience. Power is 2000W PEP SSB, 1000W DC CW/ RTTY input. Drive power is about 80 W.

For all practical purposes, the TL-922 A is similar to the SB-220/ 221, but with improvements added, since it was designed after the Heath amps. It also includes 160 meters. It has larger transformers, and heavier duty tank circuit.

This one has had the filter capacitors replaced, the Harbach "Soft Key" added, along with a glitch resistor, and various protective diodes. All bulbs have been replaced.

The Eimac 3-500's produce from 1300 watts to over 1500 watts into a dummy load, depending on band. Power output was measured with an LP-100 A wattmeter, calibrated traceable to NBS.

Electrically, this amp is a 10, and cosmetically it is a 9.9.
It is an exceptionally nice amp, both electrically and cosmetically.

Power requirement is 120V AC at 28A or 240V AC at 14A.

Paper work is included for $1250. Pickup near Ocala, FL,
is definitely best.

Linear Amp Switching Cable for Kenwood Rigs:

This cable goes from a Kenwood transceiver to a linear
amplifier to switch the amp from transmit to receive.

One end has a DIN connector, as is used with most Kenwood
rigs. The other end has an RCA phono plug, as used by most
linear amplifiers.

Before using this cable, please check the switching
capabilities of your transceiver, and the requirements
of your amplifier.

This cable is for switching the relay. $15

Cable as above, but also includes the connection for ALC in
addition to the amplifier relay keying. $20

Heath SB-614 Monitor Scope:

This unit matches the SB line of Heath equipment, and is
made to monitor your transmitted signal. It uses a 3 inch
CRT.

Heath has designed at least three different monitor scopes.
This is the latest model, and is all solid state, except for the
CRT.

I have used it to monitor transmit signals, and it works great.
Cosmetically, it looks great as well. The graticule is sharp and
nice. No scratches or defects that I can find. Pristine!

With paper work for $150.

Amp Supply LK-500ZA HF Amplifier Parts:

The LK-500 ZA uses a pair of 3-500 tubes, to produce close to
legal limit power. Parts from one are being sold. Most of these
parts could be used on other amps using a pair of 3-500 tubes.

High Voltage Power Transformer
This is the good Peter Dahl transformer. After the full wave bridge
rectifiers, it produces about 3100 volts with currents towards an
amp. This is a very heavy duty transformer! $275

Filament / Control transformer
Provides 5+ volts at 30 amps for the 3-500 filaments, plus 18 V to

be used in control circuitry. $50

Input matching board
This amp has a separate board to be used to match the rig to the amp. It covers 160 thru 10 meters, and is switched by relays. $100

Other parts are available. Please e-mail or call for more info.
Pickup near Ocala FL would be preferred for the heavy parts.
Shipping is not included in the above prices.

Heath SB-220 / SB-221 parts:

Heath SB-221 logo
This is the logo with the Heath name and SB-221, that goes in the upper left of the front panel. It looks perfect. No scratches or defects. $15

Heath SB-220 original metering and rectifier PC board
This is the original board from an SB-220 HF amp that was replaced with one of the Harbach boards. Almost all of the resistors on this board drift over time, and result in inaccurate meter readings. This board has had ALL of the metering resistors replaced with 1% or 2% precision resistors. The 4.7 Meg resistors in the high voltage measuring section have been replaced with resistors rated to take the high voltage, as well as being more precision. This board includes the 10 watt zener diode. This effectively makes the board very similar to the Harbach board, which they sell for $38. Buy this board for only $25.

Original metering rectifier board, as above, but does NOT have the 10 watt zener diode included. $20

Original 10 watt 5.1 volt zener diode for SB-220. $10

SB-220 grid choke (1 mh, Part # 45-4, RFC 4 and 5)
These often go up in smoke when there is a tube problem. These are fine, with no problems. $5 each

Knobs for SB series:
Dark green knobs with aluminum skirt, 1 1/8 inch in diameter. These are the medium size knobs used in all of the SB series of transceivers, receivers, transmitters and accessories.
Two available at $5 each.

Pair of 572 B tubes
This is a pair of NOS Raytheon 572 B tubes. The Raytheon are often considered to be as good as the Cetron 572 B's, and may even have been made in the same factory. These are pristine, unused tubes in their original boxes. Just what you need to make your SB-200 return to original specs. $150 for the pair.

I also have many other accessories available such as many different types of microphones, HTs, VHF and UHF rigs, HF

and VHF/UHF antennas, connectors, miscellaneous accessories,
etc.
Just too many to list here. Please e-mail your requests.

Prices do not include shipping from Florida.
On the heavy items, pickup near Ocala FL is much preferred.

Thanks.

From: Bry Carling AF4K
Topic: 8775 Message: 8775

FOR SALE: Hewlett Packard Oscilloscope model 1725A.
(Also military grade designation of AN/USM483.)

This is a medium sized, dual trace / 2-Channel, high performance scope.

This beautiful laboratory oscilloscope has an input voltage range of 10mV/div to 5 V/div vertical deflection. The scope is capable of providing CH A, CH B, ALT, CHOP, A+B, and A vs. B display modes as well as a 10 nS sweep rate expandable to 1 nS/div. It also has selectable impedance of 50 ohms RF to 1 Megohm input.
Vertical deflection factors of 10 mV/div to 5 V/div over the full bandwidth.
Available display modes of CH A, CH B, ALT, CHOP, A+B, & A vs. B
Sweep ranges from 10 ns/div to 0.5 Sec/div (24 ranges), 1-2-5 sequence.

Incorporates a single marker delayed sweep, and delta time measurement capabilities
For easy percentage measurements, reference lines of 0% and 100% amplitude are five divisions apart and markings for 10%, 20%, 80%, and 90% are also provided for easy transition time measurements.

Comes with the 120V AC power cable and original manual. No probes are included.

Looks very similar to the one shown here. If you need actual pictures I have to get my phone
camera to behave better (!)

This is an excellent working scope.

http://i.imgur.com/OQQ6f.jpg

There are two of these on eBay right now going for $199.00 and $389.00

Available for $139.00 plus shipping.

Sincerely,

Brian Carling AF4K

8781. FS: Multi Elmac AF67 Transmitter

Yahoo group: ham4sale (2007 — 2015)
Date: 2015-10-21 02:12:21 UTC
From: Bry Carling AF4K
Topic: 8781 Message: 8781

FOR SALE: Multi Elmac AF67 Transmitter
from an estate. Appears complete, but sold as-is, untested.

This AM-CW Transmitter as ten tubes and uses VFO or Crystals to cover SEVEN (7) bands
Some have also modified these rigs for DSB operation.

The MULTI-ELMAC AF-67 "Trans-Citer" is a ten-tube variable frequency or crystal controlled seven band transmitter or exciter. All circuits are simultaneously switched to the desired band
by a single bandswitch lever. Designed as a complete transmitter for mobile or fixed installations, or an exciter to drive a higher power transmitter. When used as an exciter the
500 ohm tap on modulation transformer can be used to drive the higher power modulators.

DIMENSIONS. The maximum external dimensions of the AF-67 Trans-citer, excluding projections of control knobs, is 11 1/4 inches wide, 7 inches high, and 8 1/2 inches deep behind panel. Approximate weight is 18 pounds.

CIRCUIT DESCRIPTION. The AF-67 Trans-citer employs a variable frequency oscillator with output on wither 1.75 to 2.0 Mc. or 3.5 to 4.0 Mc. In addition to the V.F.O. feature, two crystal
positions are included for operation on two spot frequencies. Any crystal that will work straight through, double of quadruple to the desired frequency may be used. The oscillator circuit employs a voltage regulator tube to maintain the plate voltage at a constant level. The multiplier stages are broad tuned with a front panel control for peaking the final grid,
insuring best performance on all bands. The audio circuit is designed to use either a carbon
microphone or a low output microphone such as a crystal or dynamic. A slide switch on the rear apron on the AF-67 Trans-citer sets up the circuit for use with either type of microphone.
A reactance tube modulator is incorporated in the variable frequency oscillator circuit for narrow-band-frequency-modulation. The variable frequency oscillator dial scale is directly calibrated in megacycles for each of the amateur bands.

Looks fairly average. No power supply is included. E-mail me for pictures if desired.

Available for $75.00 plus shipping.

Regards - Bry Carling, AF4K

8783. FS: Heathkit QM-1 Meter

Yahoo group: ham4sale (2007 — 2015)
Date: 2015-10-21 19:31:50 UTC
From: Bry Carling AF4K
Topic: 8783 Message: 8783

FOR SALE

Heathkit QM-1 meter in excellent condition with original manual
Beautifully cared for by a gentleman who worked at a calibration lab.

Tests components at operating frequency-150 kc to 18 mc
Large 4½" 50 ua meter-easy to read dial scales
Measures Q, L, and distributed capacity of coils
No special alignment equipment required-test coil and manual included
Metered oscillator output for constant injection

The Q meter is not just a "prestige" instrument to be dusted off each morning when opening the shop or lab. It is fully capable of performing many tasks in a matter of minutes that ordinarily require considerable mechanical and mathematical dexterity. Originally a Q meter
was out of financial reach of the average service shop but now Heathkit ingenuity has brought it into line.

Suspected components and parts being developed or manufactured can be tested at frequencies at which they normally are used (150 kc to 18 mc). Wide ranges of inductance, capacitance and Q will cover practically all values encountered. All indications are read directly on a large 4½", 50 microampere, panel-mounted meter. Surprisingly easy to use, the model QM-1 will take the guesswork out of your electronic efforts.

The Heathkit Q Meter uses a 12AT7 oscillator with pre-wound coils to obtain the full frequency range on four bands. Oscillator output is metered to provide constant injection. A
complete VTVM circuit is used as a resonance indicator, using a 6AL5 twin diode and a 12AU7 VTVM amplifier. Voltage regulated and transformer operated power supply utilizes a 6X5 full wave rectifier and an OD3 regulator tube. All other components are of the highest quality.

Behind the attractive charcoal gray panel with white lettering is a well laid out and factory-formed chassis. No "extras" are required to build or operate this instrument. A special
test coil is provided for calibration purposes.

Specifications: Frequency: 150 kHz to 18 MHz on 4 bands. Inductance: 1 microhenry to 10 millihenrys. Q: 250 Full scale x 1 or x 2. Capacitance: Actual 40 mmf-450 mmf; Effective 40 mmf-400 mmf; Vernier ± 3 mmf. Tubes: 1-12AT7, 1-6AL5, 1-12AU7, 1-6X5, 1-0D3/VR150.

Power Requirements: 105-125 VAC, 50-60 cycles, 30 watts.

Dimensions: 8" high x 17" wide x 6" deep.

Complete with manual etc.
Available for $90.00 plus shipping.

Please contact me off the list to arrange purchase or for pictures, details etc.

TOROTRON THP-05-AD - "Best of the Best" High-Pot Tester

The THP-AD series hipot insulation tester with voltage ranges from 0 to 5 kV.
It features a high-voltage output control that is continuously variable from zero to full voltage.

Looks like it is brand new.

Monitoring is via a 4.5-in. mirror-scale taut-band kilovoltmeter with
an accuracy of ±2% at full scale. Output cables are insulated for
three times the rated voltage of the model used.

This is a high grade piece of commercial equipment and looks new.
Was owned by a gentleman who worked at a calibration lab.

Made by Torotron Co. of Mount Vernon, NY

The list price is $575.00
There are some grubby looking ones on eBay from time to time for around $200 - $350.00
Available for $100.00 plus shipping

Please contact me off the list to arrange purchase or for
pictures, details etc.

> The Q meter is not just a "prestige" instrument to be dusted off each morning when opening the shop or lab. It is fully capable of performing many tasks in a matter of minutes that ordinarily require considerable mechanical and mathematical dexterity. Originally a Q meter was out of financial reach of the average service shop but now Heathkit ingenuity has brought it into line.
>
> Suspected components and parts being developed or manufactured can be tested at frequencies at which they normally are used (150 kc to 18 mc). Wide ranges of inductance, capacitance and Q will cover practically all values encountered. All indications are read directly on a large 4½", 50 microampere, panel-mounted meter. Surprisingly easy to use, the model QM-1 will take the guesswork out of your electronic efforts.
>
> The Heathkit Q Meter uses a 12AT7 oscillator with pre-wound coils to obtain the full frequency range on four bands. Oscillator output is metered to provide constant injection. A complete VTVM circuit is used as a resonance indicator, using a 6AL5 twin diode and a 12AU7 VTVM amplifier. Voltage regulated and transformer operated power supply utilizes a 6X5 full wave rectifier and an OD3 regulator tube. All other components are of the highest quality.
>
> Behind the attractive charcoal gray panel with white lettering is a well laid out and factory-formed chassis. No "extras" are required to build or operate this instrument. A special test coil is provided for calibration purposes.
>
> Specifications: Frequency: 150 kHz to 18 MHz on 4 bands. Inductance: 1 microhenry to 10

millihenrys. Q: 250 Full scale x 1 or x 2. Capacitance: Actual 40 mmf—450 mmf; Effective 40 mmf—400 mmf; Vernier ± 3 mmf. Tubes: 1-12AT7, 1-6AL5, 1-12AU7, 1-6X5, 1-0D3/VR150.

From: Bry Carling AF4K
Topic: 8789 Message: 8789

FOR SALE: AMECO CB2 converter for 144 - 148 MHz to
various i.f. frequencies. Looks excellent - nice clean copper chassis.
Needs crystal and one tube.

Available for $29.00 plus shipping.
